101 Physical Standards

102 Elements on the Face of a Mailpiece

# 101 Physical Standards

## Overview

- [1.0 Physical Standards for Letters](#)
- [2.0 Physical Standards for Flats](#)
- [3.0 Physical Standards for Parcels](#)
- [4.0 Additional Physical Standards for Express Mail](#)
- [5.0 Additional Physical Standards for Priority Mail](#)
- [6.0 Additional Physical Standards for First-Class Mail](#)
- [7.0 Additional Physical Standards for Parcel Post](#)
- [8.0 Additional Physical Standards for Bound Printed Matter](#)
- [9.0 Additional Physical Standards for Media Mail](#)
- [10.0 Additional Physical Standards for Library Mail](#)

## 1.0 Physical Standards for Letters

### 1.1 Minimum and Maximum Size

Letter-size mail is:

- a. Not less than 5 inches long, 3-1/2 inches high, and 0.007-inch thick.
- b. Not more than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4-inch thick. [C050.2.1]

### 1.2 Nonmachinable Criteria

A letter-size piece is nonmachinable if it has one or more of the following characteristics (see [601.1.3](#) to determine the length, height, top, and bottom of a mailpiece):

- a. Has an aspect ratio (length divided by height) of less than 1.3 or more than 2.5.
- b. Is polybagged, polywrapped, or enclosed in any plastic material.
- c. Has clasps, strings, buttons, or similar closure devices.
- d. Contains items such as pens, pencils, or loose keys or coins that cause the thickness of the mailpiece to be uneven (see [601.11.18](#), *Odd-Shaped Items in Paper Envelopes*).
- e. Is too rigid (does not bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch diameter turn).
- f. For pieces more than 4-1/4 inches high or 6 inches long, the thickness is less than 0.009 inch.
- g. Has a delivery address parallel to the shorter dimension of the mailpiece.
- h. Is a self-mailer with a folded edge perpendicular to the address if the piece is not folded and secured according to [201.3.14.2](#).
- i. Is a booklet-type piece with the bound edge (spine) along the shorter dimension of the piece or at the top, regardless of the use of tabs, wafer seals, or other fasteners. [C050.2.2]

101.2.1

## 2.0 Physical Standards for Flats

### 2.1 General Definition

Flat-size mail is:

- a. More than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4 inch thick.
- b. Not more than 15 inches long, or more than 12 inches high, or more than 3/4 inch thick.
- c. Unwrapped, sleeved, wrapped, or enveloped. [C050.3.1]

## 3.0 Physical Standards for Parcels

### 3.1 Maximum Dimensions

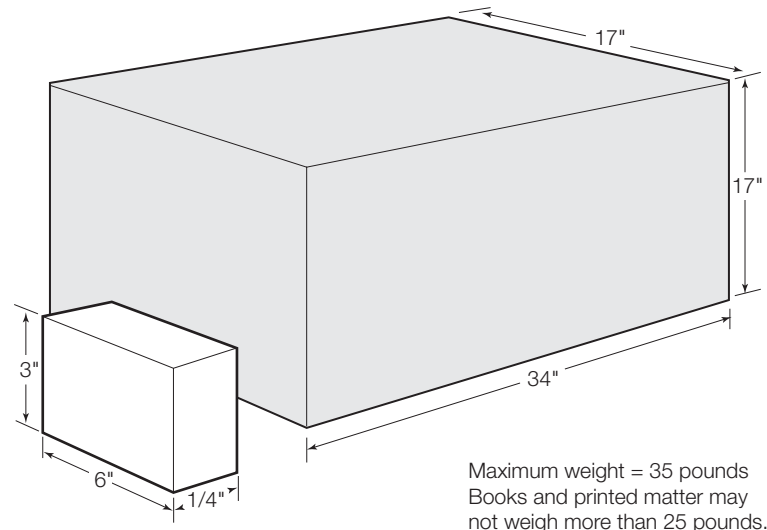

No mailpiece may weigh more than 70 pounds. Except for Parcel Post (see [7.0, Additional Physical Standards for Parcel Post](#)), no mailpiece may measure more than 108 inches in length and girth combined. For parcels, length is the distance of the longest dimension and girth is the distance around the thickest part. [C010.1.2]

### 3.2 Machinable Parcels

A machinable parcel is any piece that is (see [Exhibit 3.2, Machinable Parcel Dimensions](#)):

- a. Not less than 6 inches long, 3 inches high, 1/4 inch thick, and 6 ounces in weight. (A mailpiece exactly 1/4 inch thick is subject to the 3 1/2-inch height minimum under [601.1.1](#).)
- b. Not more than 34 inches long, or 17 inches high, or 17 inches thick, or 35 pounds in weight. For books, or other printed matter, the maximum weight is 25 pounds. [C050.4.1]

**Exhibit 3.2 Machinable Parcel Dimensions**

Minimum weight = 6 oz.  
(for details, see machinable parcel criteria in 401.1.5.1)

[C050.1.0]

**3.3 Soft Goods and Enveloped Printed Matter**

Soft goods wrapped in paper or plastic bags and enveloped printed matter are machinable only if all packaging standards in 601.2.0 are met. [C050.4.2]

**3.4 Irregular Parcels**

An irregular parcel is a parcel not meeting the dimensional criteria in 3.2, *Machinable Parcels*. This processing category also includes parcels that cannot be processed by Bulk Mail Center parcel sorters, including rolls and tubes up to 26 inches long; merchandise samples that are not individually addressed and are not letter-size or flat-size; unwrapped, paper-wrapped, or sleeve-wrapped articles that are not letter-size or flat-size; and articles enclosed in envelopes that are not letter-size, flat-size, or machinable parcels. [C050.5.0]

**3.5 Outside Parcel**

An outside parcel is a parcel that exceeds any of the maximum dimensions for a machinable parcel. This processing category also includes high-density parcels (other than books and printed matter) weighing more than 15 pounds and exerting more than 60 pounds per square foot (0.4167 pound per square inch) pressure on their smallest side; cartons containing more than 24 ounces of liquid in one or more glass containers; cartons containing 1 gallon or more of liquid in metal or plastic containers; cans, paints; rolls and tubes longer than 26 inches; metal-band strapped boxes, metal boxes, and wood boxes; articles not mailed in boxes or other containers; harmful matter; hazardous materials except ORM-D materials; and containers with all dimensions exceeding the minimum dimensions for a machinable

### 101.4.1

(regular) parcel, if their coefficient of friction or ability to slide on a smooth, hard surface is not similar to that of a domestic-class fiberboard box of the same approximate size and weight. [C050.6.0]

## 4.0 Additional Physical Standards for Express Mail

### 4.1 Physical Standards of Mailpieces

Each piece of Express Mail may not weigh more than 70 pounds. The combined length and girth of a piece (i.e., the length of its longest side plus the distance around its thickest part) may not exceed 108 inches. Lower size or weight standards apply to Express Mail addressed to certain APOs and FPOs. [C500.1.0]

### 4.2 Outside Parcels

Express Mail items not required to be presented in a pouch (outside parcels) must be large enough to hold the required mailing labels and indicia without bending or folding on a single optical plane. [C500.2.0]

## 5.0 Additional Physical Standards for Priority Mail

### 5.1 Physical Standards of Mailpieces

The maximum weight is 70 pounds. The combined length and girth of a piece (i.e., the length of its longest side plus the distance around its thickest part) may not exceed 108 inches. Lower size and weight standards apply for some APO and FPO mail subject to [703.2.0, Overseas Military Mail](#), and [703.4.0, Mail Sent by U.S. Armed Forces](#), and for Department of State mail subject to [703.3.0](#). [E120.1.2]

### 5.2 Two or More Packages

Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits. [C100.1.3]

### 5.3 Balloon Rate

Items weighing less than 15 pounds but measuring more than 84 inches in combined length and girth are charged the rate for a 15-pound parcel for the zone to which it is addressed. [E120.2.3]

## 6.0 Additional Physical Standards for First-Class Mail

### 6.1 Maximum Weight and Size

Matter at First-Class Mail rates cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail ([123, Rates and Eligibility](#)). The combined length and girth of a piece (i.e., the length of its longest side plus the distance around its thickest part) may not exceed 108 inches. Lower size or weight standards apply to mail claimed at certain rates or addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail subject to [703.3.0](#). [C100.1.1]

## 6.2 Minimum Standards

Pieces are subject to the minimum standards in [601.1.1](#) and may be subject to other minimum dimensions, based on the standards for specific rates. [C100.1.2]

## 6.3 Cards Claimed at Card Rates

### 6.3.1 Card Rate

A card may be a single or double (reply) stamped card or a single or double postcard. Stamped cards are available from the Postal Service with postage imprinted on them. Postcards are commercially available or privately printed mailing cards. To be eligible for a card rate, a card and each half of a double card must meet the physical standards in [6.3](#) and the applicable eligibility and preparation standards for the rate claimed. Ineligible cards are subject to letter-size rates. Cards may be prepared and mailed at the First-Class Mail single-piece card rate, Presorted card rate, or automation card rates. [E110.3.0]

### 6.3.2 Postcard Dimensions

Each card (i.e., each stamped card or postcard or each half of a double stamped card or postcard) claimed at a card rate must be:

- a. Rectangular.
- b. Not less than 3-1/2 inches high, 5 inches long, and 0.007 inch thick.
- c. Not more than 4-1/4 inches high, or more than 6 inches long, or greater than 0.016 inch thick. [C100.2.1]

### 6.3.3 Other Cards

A card that does not meet the applicable standards in [6.3](#) must not bear the words "Postcard" or "Double Postcard." [C100.2.2]

### 6.3.4 Paper or Card Stock

A card must be of uniform thickness and made of unfolded and uncreased paper or cardstock of approximately the quality and weight of a stamped card (i.e., a card available from the USPS). A card must be formed either of one piece of paper or cardstock or of two pieces of paper permanently and uniformly bonded together. The stock used for a card may be of any color or surface that permits the legible printing of the address, postmark, and any required markings. [C100.2.3]

### 6.3.5 Acceptable Attachments

A card may bear an attachment that is:

- a. A paper label, such as a wafer seal or decal affixed with permanent adhesive to the back side of the card, or within the message area on the address side (see [Exhibit 202.2.1](#)), or to the left of the address block.
- b. A label affixed with permanent adhesive for showing the delivery or return address.
- c. A small reusable seal or decal prepared with pressure-sensitive and nonremovable adhesive that is intended to be removed from the first half of a double card and applied to the reply half. [C100.2.4]

#### **6.3.6 Unacceptable Attachment**

A card may not bear an attachment that is:

- a. Other than paper.
- b. Not totally adhered to the card surface.
- c. An encumbrance to postal processing. [C100.2.5]

#### **6.3.7 Tearing Guides**

A card may have perforations or tearing guides if they do not eliminate or interfere with any address element, postage, marking, or endorsement and do not impair the physical integrity of the card. [C100.2.8]

#### **6.3.8 Address Side of Cards**

The address side of a card is the side bearing the delivery address and postage. The address side may be formatted to contain a message area. Cards that do not contain a message area on the address side are subject to the applicable standards for the rate claimed. For the purposes of 6.3, miscellaneous graphics or printing, such as symbols, logos, or characters, that appear on the address side of cards not containing a message area are generally acceptable provided the items are not intended to convey a message. [C100.2.6]

#### **6.3.9 Special Rules for Single-Piece Rate Cards**

Cards claimed at the single-piece card rate that have the format characteristics in 201.1.2.6a.3. or 201.1.2.6b.3. and are part of a mailing of 200 or more identical pieces must:

- a. Have addresses that include the correct ZIP Code or ZIP+4 code.
- b. Have postage paid with permit imprints, meter stamps, or precanceled stamps.
- c. Be prepared under 235.5.3, *Machinable Preparation*. [C100.2.7]

#### **6.3.10 Double Cards**

A double card (i.e., a double stamped card or double postcard) consists of two attached cards, one of which is designed to be detached by the recipient and returned by mail as a single card. Double cards are subject to these standards:

- a. The reply half of a double card must be used for reply only and may not be used to convey a message to the original addressee or to send statements of account. The reply half may be formatted for response purposes (e.g., contain blocks for completion by the addressee).
- b. A double card must be folded before mailing and prepared so that the address on the reply half is on the inside when the double card is originally mailed. The address side of the reply half may be prepared as business reply mail, courtesy reply mail, meter reply mail, or as a merchandise return service label.
- c. Plain stickers, seals, or a single wire stitch (staple) may be used to fasten the open edge at the top or bottom once the card is folded if affixed so that the inner surfaces of the cards can be readily examined. Fasteners must be affixed according to the applicable preparation requirements for the rate claimed. Any sealing on the left and right sides of the cards, no matter the sealing process used, is not permitted.

- d. The first half of a double card must be detached when the reply half is mailed for return. [C100.2.9]

#### **6.3.11 Enclosures**

Enclosures in double postcards are prohibited at card rates. [C100.3.0]

### **6.4 Nonmachinable Pieces**

#### **6.4.1 Nonmachinable Letters**

Letter-size pieces that weigh 1 ounce or less and meet one or more of the nonmachinable characteristics in 1.2 are subject to the nonmachinable surcharge (see 133.1.9). Pieces mailed at the card rate are not subject to the nonmachinable surcharge. [C100.4.0]

#### **6.4.2 Nonmachinable Flats and Parcels**

Nonletters (flats and parcels) that weigh 1 ounce or less are subject to the nonmachinable surcharge (see 133.1.9) if any one of the following applies (see 601.1.3, *Length and Height*, for how to determine the length and height of a mailpiece):

- a. The piece is more than 1/4-inch thick.
- b. The length is more than 11-1/2 inches or the height is more than 6-1/8 inches.
- c. The aspect ratio (length divided by height) is less than 1.3 or more than 2.5. [C100.4.0]

### **6.5 Two or More Packages**

Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits. [C100.1.3]

## **7.0 Additional Physical Standards for Parcel Post**

### **7.1 Dimension and Weight Standards**

These standards apply to Parcel Post:

- a. No piece may weigh more than 70 pounds.
- b. Parcel Post pieces measuring over 108 inches in combined length and girth, but not more than 130 inches in combined length and girth, are mailable at the applicable oversized rate.
- c. Parcel Post pieces measuring over 84 inches in combined length and girth, but not more than 108 inches in combined length and girth, and weighing less than 15 pounds are mailable at the rate equal to that of a 15-pound parcel for the zone to which the parcel is addressed (balloon rate).
- d. Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

101.7.2

- e. Lower size or weight standards apply to mail addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#). [C700.1.0]

### 7.2 Nonmachinable Parcel Post Standards

Mailpieces described in this section that are mailed at the Inter-BMC/ASF Parcel Post or Intra-BMC/ASF Parcel Post rates are subject to the applicable nonmachinable surcharge in [153.1.0, Parcel Post Rates and Fees](#), unless the applicable special handling fee is paid. An oversized parcel as described in [7.1b](#) is not subject to the nonmachinable surcharge. Mailpieces are nonmachinable if they meet any of the following criteria:

- a. A parcel more than 34 inches long, 17 inches wide, or 17 inches high.
- b. A parcel less than 6 inches long, 1/4 inch thick, or 3 inches high.
- c. A parcel that weighs less than 6 ounces or more than 35 pounds.
- d. A parcel containing more than 24 ounces of liquid in glass containers, or 1 gallon or more of liquid in metal or plastic containers.
- e. An insecurely wrapped or metal-banded parcel.
- f. A can, roll, or tube, or wooden or metal box.
- g. Books, printed matter, or business forms weighing more than 25 pounds.
- h. A high-density parcel weighing more than 15 pounds and exerting more than 60 pounds per-square-foot pressure on its smallest side.
- i. A film case weighing more than 5 pounds or with strap-type closures, except any film case the USPS authorizes to be entered as a machinable parcel under [3.2](#) through [3.4](#) in *Physical Standards for Parcels* and to be identified by the words "Machinable in United States Postal Service Equipment" permanently attached as a nontransferable decal in the lower right corner of the case.
- j. Parcels with characteristics (such as inadequate packaging) that could result in damage to the contents of the mailpiece, other parcels, or postal machinery if mechanical sortation is used. [C700.2.0]

## 8.0 Additional Physical Standards for Bound Printed Matter

### 8.1 Physical Standards for Bound Printed Matter

These standards apply to Bound Printed Matter:

- a. Pieces sent at Bound Printed Matter rates may not weigh more than 15 pounds.
- b. The combined length and girth of a piece (i.e., the length of its longest side plus the distance around its thickest part) may not exceed 108 inches.
- c. Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.

- d. Lower size standards apply to mail addressed to certain APOs and FPOs, subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#). [C700.1.0]

## 9.0 Additional Physical Standards for Media Mail

### 9.1 Dimension and Weight Standards

These standards apply to Media Mail:

- a. No piece may weigh more than 70 pounds.
- b. The combined length and girth of a piece (i.e., the length of its longest side plus the distance around its thickest part) may not exceed 108 inches.
- c. Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- d. Lower size or weight standards apply to mail addressed to certain APOs and FPOs, subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#). [C700.1.0]

## 10.0 Additional Physical Standards for Library Mail

### 10.1 Dimension and Weight Standards

These standards apply to Library Mail:

- a. No piece may weigh more than 70 pounds.
- b. The combined length and girth of a piece (i.e., the length of its longest side plus the distance around its thickest part) may not exceed 108 inches.
- c. Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- d. Lower size or weight standards apply to mail addressed to certain APOs and FPOs, subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#). [C700.1.0]

## 102 Elements on the Face of a Mailpiece

### Overview

- [1.0 All Mailpieces](#)
- [2.0 Address Placement for Letters](#)
- [3.0 Placement and Content of Mail Markings](#)
- [4.0 Endorsement Placement](#)

### 1.0 All Mailpieces

#### 1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements. [A010.1.5]

#### 1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. The piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. (See [2.0](#) for address placement; see [602](#) for additional information regarding addressing.) [A010.1.1]

#### 1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail. [P011.1.1]

### 2.0 Address Placement for Letters

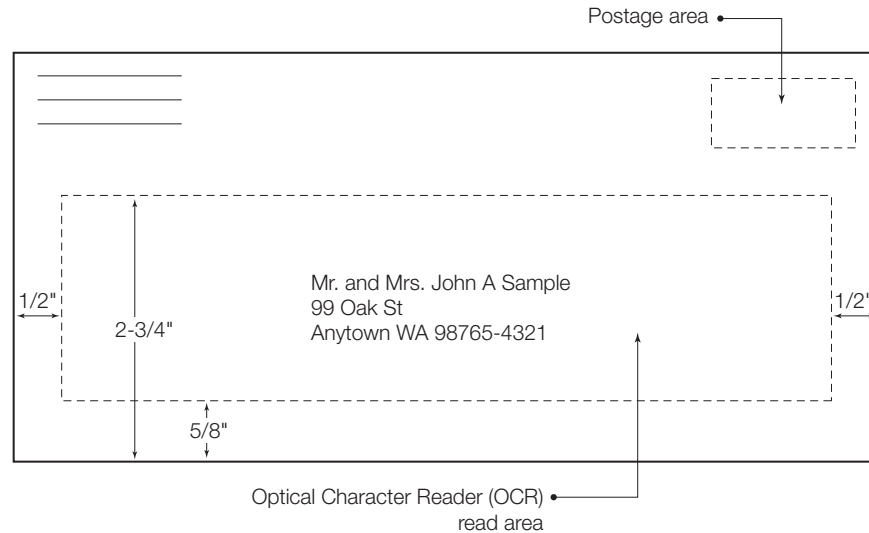

#### 2.1 Delivery Address Placement

On a letter-size piece, the recommended address placement is within the optical character reader (OCR) read area, which is a space on the address side of the mailpiece defined by these boundaries (see [Exhibit 2.1, OCR Read Area](#)):

- a. Left: 1/2 inch from the left edge of the piece.
- b. Right: 1/2 inch from the right edge of the piece.
- c. Top: 2-3/4 inches from the bottom edge of the piece.
- d. Bottom: 5/8 inch from the bottom edge of the piece. [A010.1.3]

### Exhibit 2.1 OCR Read Area

[Exhibit A010.1.3]

### 2.2 Address Placement Causing Mail to be Nonmailable or Nonmachinable

The location of the delivery address on a letter-size mailpiece determines which dimensions are the length and height of the piece. Consequently, the placement of the address may render a piece nonmailable or nonmachinable. [A010.1.4]

## 3.0 Placement and Content of Mail Markings

### 3.1 Placement of Priority Mail Marking

The marking "Priority" or "Priority Mail" must be placed prominently on the address side of each piece of Priority Mail. Matter mailed in USPS-provided Priority Mail packaging is subject to Priority Mail rates regardless of how the packaging is reconfigured or how markings may be obliterated. If shipping address labels are used, it is recommended that they contain the Priority Mail service indicator composed of two elements, the service icon and service banner (see [Exhibit 3.1, Priority Mail Service Indicator](#)):

- a. The service icon should appear in a 1-inch square in the upper left corner of the shipping label. The letter "P" must be printed inside the 1-inch square and must be 0.75 inches (3/4") or greater. A minimum 3/4-point line must border the 1-inch square.
- b. The service banner should appear directly below the postage payment area and the service icon, and it should extend across the shipping label. When the service banner is used, the text "USPS PRIORITY MAIL" must be printed in

minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text. [E120.1.4]

### Exhibit 3.1 Priority Mail Service Indicator

[Exhibit E120.1.4]

### 3.2 Placement of First-Class Markings

Each single-piece rate First-Class Mail piece must have a delivery address but is not required to bear the rate marking “First-Class” or “First-Class Mail.” [M110.1.0]

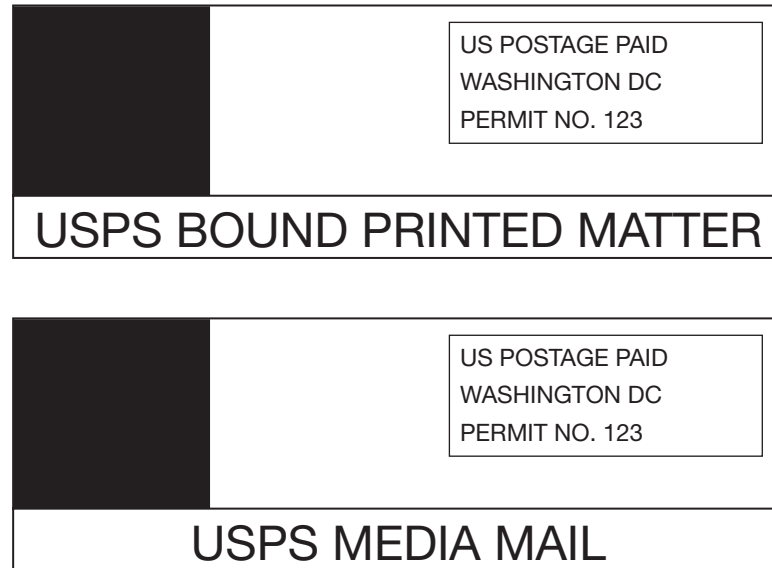

### 3.3 Placement of Parcel Post, Bound Printed Matter, Media Mail, and Library Mail Markings

The basic required Package Services subclass marking—“Parcel Post” or “PP,” “Bound Printed Matter” or “BPM,” “Media Mail,” or “Library Mail”—must be printed on each piece claimed at the respective rate. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 3.3, Package Services Indicators](#)):

- a. The service icon that will identify all Package Services subclasses will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the appropriate subclass marking (e.g., “PARCEL POST,” “BOUND PRINTED MATTER”) must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text. [M012.3.1]

### Exhibit 3.3 Package Services Indicators

[Exhibit M012.3.1]

## 4.0 Endorsement Placement

### 4.1 Endorsements for Delivery Instructions and Ancillary Services

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.3.4.4, \*Holding Mail\*](#), or carrier release under [508.1.2, \*Carrier Release for Uninsured Parcels\*](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.1](#) and [507.1.8 in \*Treatment of Mail\*](#)), subject to the corresponding standards for use and availability. [M012.4.1]

### 4.2 Return Address

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number). [M012.4.2]

### 4.3 Placement of Endorsement

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.

- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
  - 1. Directly below the return address.
  - 2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
  - 3. Directly to the left of the postage area and below or to the left of any rate marking.
  - 4. Directly below the postage area and below any rate marking. [M012.4.3]

**4.4 Physical Standards for Endorsements**

The endorsement or, if combined, endorsements must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. This 1/4-inch clear space is not required for an endorsement that is applied with a multiline optical character reader (MLOCR) inkjet and placed in the location directly below the postage area and any rate marking if the endorsement is clear and legible. [M012.4.4]

## **110 Retail Mail Express Mail**

113 Rates and Eligibility

114 Postage Payment Methods

115 Mail Preparation

116 Deposit

# 113 Rates and Eligibility

## Overview

- [1.0 Express Mail Rates and Fees](#)
- [2.0 Basic Eligibility Standards for Express Mail](#)
- [3.0 Content Standards for Express Mail](#)
- [4.0 Service Features of Express Mail](#)

## 1.0 Express Mail Rates and Fees

### 1.1 Rates Charged Per Piece

Express Mail postage is charged for each addressed piece according to its weight and the service option chosen by the mailer. For shipments presented in Express Mail pouches under an Express Mail Custom Designed Service agreement, each pouch is considered an addressed piece. [E500.1.5]

### 1.2 Express Mail Rate Application

Except under [1.4, Flat-Rate Envelope](#), Express Mail rates are charged per 0.5 pound through 1 pound, and in 1 pound increments over 1 pound. Through 1 pound, any fraction of a 0.5 pound is considered a whole 0.5-pound unit; more than 1 pound, any fraction of a pound is considered a whole pound. For example, if a piece weighs 0.25 pound, the weight (postage) increment is 0.5 pound; if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. The minimum postage amount per addressed piece is that for a piece weighing 0.5 pound. [P013.2.2]

### 1.3 Express Mail Rates—All Service Features

See [Exhibit 1.3 Express Mail Rates—All Service Features \(Same Day Airport Service Suspended\)](#). [R500.1.0]

### 1.4 Flat-Rate Envelope

Material mailed in the special flat-rate envelope available from the USPS is subject to the postage rate for a 1/2-pound piece at the service level requested by the customer, regardless of the actual weight of the piece. [E500.1.6]

### 1.5 Pickup Fees

#### 1.5.1 Pickup Fee

Per occurrence: \$12.50.

May be combined with Priority Mail and Package Services pickups (see [507.5.0](#)). [R500.2.1]

#### 1.5.2 Pickup Service

The required pickup fee is charged every time pickup service is provided, regardless of the number of pieces picked up, as described in [507.5.0](#). [E500.2.1]

1. Same Day Airport service is currently suspended.
2. The 1/2-pound rate is charged for matter sent in an Express Mail flat-rate envelope provided by the USPS, regardless of the actual weight.

[R500.1.0]

## 1.6 Delivery Stop

### 1.6.1 Additional Fee

Express Mail Custom Designed Service items are subject to an additional fee for each delivery stop for items presented for delivery to addressee. [E500.4.3]

### 1.6.2 Fee for Delivery Stops

Custom Designed Service only, each: \$12.50. [R500.2.2]

## 1.7 Computing Postage—Express Mail

Determine single-piece weight and weight (postage) increment for each addressed piece. For Express Mail, affix postage to each piece under [114.1.2, Affixing Postage—Single-Piece Rate Mailings](#), or pay the postage through a corporate account or, for Express Mail Manifesting items ([705.2.6](#)), pay postage through a corporate account. [P013.6.0]

## 2.0 Basic Eligibility Standards for Express Mail

### 2.1 Definition of Express Mail

Express Mail is an expedited postal service available in five basic domestic service offerings: Same Day Airport Service (Suspended), Custom Designed Service, Next Day Service, Second Day Service, and Military Service, for shipping any mailable matter, subject to the standards below. Global Express Mail is available between the United States and most foreign countries (see the *International Mail Manual*). [E500.1.2]

### 2.2 Matter Closed Against Postal Inspection

Matter closed against postal inspection includes First-Class Mail and Express Mail. The USPS may open mail other than First-Class Mail or Express Mail to determine whether the proper rate of postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail or Express Mail rate. [E110.1.3]

## 3.0 Content Standards for Express Mail

### 3.1 Basic Classification

Express Mail is considered closed against postal inspection. [E500.1.1]

### 3.2 Eligibility

All mailable matter may be sent as Express Mail, except Customized MarketMail under [705.1.0](#) or other matter prohibited by the respective standards. [E110.1.1]

### 3.3 Written or Typewritten Matter

Matter wholly or partially in handwriting or typewriting must be mailed as First-Class Mail or Express Mail, except authorized additions to Periodicals, Standard Mail, and Package Services and written or typewritten matter in Library Mail and Media Mail, as permitted by the corresponding standards. [E110.1.2]

113.3.4

### 3.4 Correspondence

Matter that has the character of actual and personal correspondence must be mailed as First-Class Mail or Express Mail. [E110.1.4]

### 3.5 Bills and Statements of Account

Bills and statements of account must be mailed as First-Class Mail or Express Mail according to these definitions:

- a. A *bill* is a request for payment of a definite sum of money claimed to be owing by the addressee to the sender or a third party. The mere assertion of a debt in a definite sum combined with a demand for payment is sufficient to make the message a bill.
- b. A *statement of account* is the assertion of a debt in a definite amount owed by the addressee to the sender or a third party but does not necessarily contain a request or a demand for payment. The amount may be immediately due or may become due after a certain time or on demand or billing at a later date.
- c. A bill or statement of account must present enough details of a debt to inform the debtor of the amount the debtor must pay to acquit himself or herself of the debt. Neither a bill nor a statement of account need state the precise amount if the bill or statement contains enough information to enable the debtor to determine the exact amount of the claim asserted.
- d. A bill or statement of account does not lose that character just because the amount claimed is not, in fact, owing or may not be legally collectible.

[E110.1.5]

### 3.6 Examples

These are examples of material that must be mailed at First-Class Mail or Express Mail rates:

- a. Handwritten or typewritten matter, including identical copies prepared by automatic typewriter and manifold or carbon copies of this matter. Handwritten or typewritten matter does not include all matter produced by computers, but computer-prepared material is subject to First-Class postage if it has the character of actual and personal correspondence.
- b. Autograph albums containing writing.
- c. Notebooks or blank books containing written or typewritten entries or stenographic or shorthand notes.
- d. Blank printed forms filled out in writing, such as notices, certificates, and checks, either canceled or uncanceled.
- e. Printed price lists containing written figures changing individual items.
- f. Printed cards or letters bearing a written date, where the date is not the date of the card but gives information about when something is to occur or has occurred.
- g. Any matter marked "Postcard" or "Double Postcard." [E110.1.6]

## 4.0 Service Features of Express Mail

### 4.1 General

The service features are as follows:

- a. Customers may access delivery information on the Internet by visiting [www.usps.com](http://www.usps.com) or calling 1-800-222-1811 toll-free and providing the article number. A delivery record, including the recipient's signature, will be faxed or mailed upon request.
- b. When a waiver of signature is authorized by the customer, the delivery employee signs upon delivery if the addressee or addressee's agent is not available. The item must be left in a secure location. Customers who waive the signature requirement will be provided only the delivery date and will not receive an image of the signature when accessing the delivery record on the Internet or when calling the toll-free number. Restrictions for waiver of signature are defined in [503.1.1.6, Insurance and Indemnity](#), and [503.1.1.7, Additional Insurance](#).  
[E500.1.3]

### 4.2 Express Mail Next Day Service

#### 4.2.1 Where Available

Express Mail Next Day Service is available at designated USPS facilities, designated Express Mail collection boxes, or through pickup service, for overnight service to designated destination 3-digit ZIP Code delivery areas, facilities, or locations.

[E500.5.1]

#### 4.2.2 Where Not Available

Next Day Service may not be available at or between all post offices or at all times of deposit. An Express Mail Next Day Service directory, showing detailed local information about Express Mail Next Day Service, is available at post offices.

[E500.5.2]

#### 4.2.3 Acceptance Times

Express Mail Next Day Service mail must be presented by the times authorized by the postmaster. Express Mail Next Day Service items mailed after the time authorized by the postmaster are accepted for delivery on the second day after mailing, subject to the standards for this service, unless the item was:

- a. Delayed by strike or work stoppage.
- b. Made available for claim, or delivery was attempted within the times specified by the standards for this service, and then the item was delayed because forwarding or return service was provided. [E500.5.3]

#### 4.2.4 Post Office to Post Office

Under Post Office to Post Office Service, items presented under [4.2.1, Where Available](#), are available for claim by the addressee at the destination facility by 10 a.m. of the next day the destination office is open for retail business. [E500.5.4]

#### **4.2.5 Post Office to Addressee**

Under Post Office to Addressee Service, items presented under [4.2.1](#) are delivered to an addressee within the designated delivery area of the destination facility by noon or 3 p.m. of the next day. If delivery is not made, the addressee is notified and a second delivery attempted. [E500.5.5]

#### **4.2.6 Express Mail Next Day Service Refunds**

For Express Mail Next Day Service, the USPS refunds the postage for an item not available for customer pickup at destination or for which delivery to the addressee was not attempted, subject to the standards for this service, unless the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#). [D500.1.3]

### **4.3 Express Mail Second Day Service**

#### **4.3.1 Availability**

Express Mail Second Day Service is available to any 3-digit or 5-digit ZIP Code destination not listed in the Next Day Service directory mentioned in [4.2.2](#). [E500.6.3]

#### **4.3.2 Acceptance**

Express Mail Second Day Service is accepted at designated USPS facilities, at Express Mail collection boxes, and through pickup service. [E500.6.1]

#### **4.3.3 Acceptance Times**

Express Mail Second Day Service shipments must be presented by 5 p.m., or such later time authorized by the postmaster. For Second Day Service, the USPS refunds postage for an item not available for customer pickup or for which delivery was not attempted, subject to the standards for this service, unless the item was:

- a. Delayed by strike or work stoppage.
- b. Made available for claim, or delivery was attempted within the times specified by the standards for this service, and then the item was delayed because forwarding or return service was provided. [E500.6.2]

#### **4.3.4 Post Office to Post Office**

Under Post Office to Post Office Service, items presented under [4.3.3](#) are available for claim by the addressee at the destination facility by 10 a.m. of the second day that the destination office is open for retail business. [E500.6.4]

#### **4.3.5 Post Office to Addressee**

Under Post Office to Addressee Service, items presented under [4.3.3](#) are delivered to an addressee within the designated delivery area of the destination facility by noon or 3 p.m. of the second day. If delivery is not made, the addressee is notified and a second delivery attempted. [E500.6.5]

#### **4.3.6 Express Mail Second Day Service Refunds**

For Express Mail Next Day Service, the USPS refunds the postage for an item not available for customer pickup at destination or for which delivery to the addressee was not attempted, subject to the standards for this service, unless the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#). [D500.1.3]

#### 4.4 Express Mail Same Day Airport Service (Suspended)

##### 4.4.1 Availability

This service is not currently available. [E500.3.0]

##### 4.4.2 Express Mail Same Day Airport Service Refunds

For Express Mail Same Day Airport Service, the USPS refunds the postage for an item not available for customer pickup at destination by the time specified at acceptance, unless the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#). [D500.1.1]

#### 4.5 Express Mail Custom Designed Service

##### 4.5.1 Availability

Express Mail Custom Designed Service is available to and from any location in the United States. [E500.4.1]

##### 4.5.2 Scheduled Basis

Express Mail Custom Designed Service is available only on a scheduled basis between designated USPS facilities or other designated locations for mailable matter presented under the service agreement between the USPS and the mailer. [E500.4.2]

##### 4.5.3 Additional Fee

Express Mail Custom Designed Service items are subject to an additional fee for each delivery stop for items presented for delivery to addressee. [E500.4.3]

##### 4.5.4 Required Service Agreement

A service agreement is required before mailings may be made under Express Mail Custom Designed Service. An Express Mail Manifesting agreement is required for all manifested Express Mail items accepted under [705.2.6, Express Mail Manifesting Agreements](#). [E500.1.8]

##### 4.5.5 Service Agreement Information

Each Express Mail Custom Designed Service Agreement must specify the scheduled:

- a. Place and day or date of origin for each shipment presented for service to each specific destination.
- b. Place and day or date for claim or delivery at destination for each scheduled shipment.
- c. Times of day for presenting at origin and for claim or delivery at destination.

[E500.4.4]

##### 4.5.6 Service Commencement

Service provided under a service agreement must begin not more than 10 days after the signed service agreement is presented to the USPS. [E500.4.5]

##### 4.5.7 Changes in Destination Address (changes)

At least 30 days' advance notice is required to change the Express Mail destination address for origin caller service mail (accelerated reply mail). [E500.4.6]

113.4.5.8

### **4.5.8 Termination by USPS**

Express Mail Custom Designed Service provided under a service agreement may be terminated by the USPS on 10 days' written notice to the mailer, if service cannot be provided for reasons beyond the control of the USPS or because of changes in USPS facilities or operations, or if the mailer fails to adhere to the terms of the service agreement or these standards. [E500.4.7]

### **4.5.9 Termination by Mailer**

A service agreement may be terminated by the mailer for any reason by notice to the USPS. [E500.4.8]

### **4.5.10 Express Mail Custom Designed Service Refunds**

For Express Mail Custom Designed Service, the USPS refunds the postage for an item not available for customer pickup at destination or not delivered to the addressee within 24 hours of mailing, unless the item was mailed under a service agreement that provides for delivery more than 24 hours after scheduled presentation at the point of origin or if the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#). [D500.1.2]

## **4.6 Express Mail Military Service (EMMS)**

### **4.6.1 Express Mail Military Service Objectives**

For Express Mail Military Service (EMMS), items presented at APO/FPO facilities before the published cut-off time are delivered the second day after acceptance. Items presented after the published cut-off time are delivered the third day after acceptance. For EMMS, the USPS refunds postage for an item not available for customer pickup at the APO/FPO of address or for which delivery to the addressee was not attempted domestically within the times specified by the standards for this service, unless the item was delayed by Customs; the item was destined for an APO/FPO that was closed on the intended day of delivery (delivery is attempted the next business day); or the delay was caused by one of the situations in [114.3.1, Postage Not Refunded](#). [D500.1.4]

### **4.6.2 Availability**

EMMS (under [703.2.6, Express Mail Military Service \(EMMS\)](#)) is available between the United States and designated APOs and FPOs to provide Department of Defense personnel stationed overseas, and others entitled to APO and FPO mailing privileges, an expedited delivery service to or from the United States. EMMS Custom Designed Service and EMMS drop shipment service are available to authorized APO/FPO destinations. [E500.7.1]

## **4.7 Drop Shipment**

Express Mail Custom Designed Service, Express Mail Next Day Service, and Express Mail Second Day Service may be used to expedite movement of any other class of mail from one domestic USPS facility to another by Express Mail drop shipment, subject to the corresponding standards. For more information, see [705.16.0](#). [E500.1.4]

# 114 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for Express Mail](#)
- [2.0 Corporate Accounts](#)
- [3.0 Postage Refunds](#)

## 1.0 Postage Payment Methods for Express Mail

### 1.1 Payment Method

A mailer of Express Mail items may pay postage with adhesive stamps (see [604.1.0](#)), with meter stamps (see [604.4.0](#)), or through an Express Mail corporate account (see [2.0](#)). Federal agency and USPS official Express Mail may use the appropriate indicia, subject to [703.7.0, Official Mail \(Penalty\)](#). The mailer is responsible for proper payment of postage. Customers wishing to manifest Express Mail items may request authorization to use an Express Mail Manifesting System according to the procedures in [705.2.6](#). [P500.1.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed Express Mail mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required.

[P013.1.4]

### 1.3 Prepaid Reply Postage

Meter stamps may be used to prepay reply postage on any Express Mail shipment. The mailer must place meter stamps, sufficient to prepay postage in full, on the envelope, tube, or other mailing container that bears the return address of the meter license holder. Reply mail prepaid with meter stamps is delivered only to the address of the meter license holder. If the address is altered, the mail is held for postage.

[P500.1.2]

## 2.0 Corporate Accounts

### 2.1 Availability

A corporate account is available to any mailer, subject to [2.3](#) through [2.6](#) in [Corporate Accounts](#) and the terms on Form 5639. The address provided by the mailer on Form 5639 must be valid as a condition of an account being opened.

[P500.2.1]

### 2.2 Account

Written application is required to mail with an Express Mail corporate account. Mailers must pay postage through an Express Mail corporate account for all Express Mail items accepted under the terms of an Express Mail Manifesting agreement in [705.2.6](#). [E500.1.9]

#### **2.3 Postage Liability**

The mailer must pay all postage and fees resulting from shipments presented bearing the assigned account number while the account is active and up to 30 days after the account is closed. After that, any shipment bearing the account number is refused and returned to the mailer. [P500.2.2]

#### **2.4 Minimum Balance**

For opening and maintaining an account, the mailer may do any of the following:

- a. Participate in the Centralized Account Processing System (CAPS), which requires no initial deposit and no maintenance of a minimum balance.
- b. Use a personal or business credit card, which requires no initial deposit and no maintenance of a minimum balance.
- c. Make an initial deposit with cash or by check of \$250, or the total postage and fees expected during the first 4 weeks of account usage, whichever is higher. After that, the minimum balance in the account must equal an average week's postage and fees, or \$100, whichever is higher. [P500.2.3]

#### **2.5 USPS Report**

By the 10th of the month, the account holder receives a mailing activity statement for the previous month. This statement includes beginning and ending balances; deposits made; and postage and fees deducted. Accounts with activity have an itemized page included in the statement. This itemization lists each piece mailed, the mailing date, label number, origin and destination ZIP Codes, and postage and fees. Deposits, withdrawals, and adjustments also are itemized. [P500.2.4]

#### **2.6 Closing Account**

The USPS may close an account with 10 days' written advance notice to the account holder if the ending balance on the mailing activity statement is below the minimum balance required for two consecutive months. The USPS may also close an account with 10 days' written advance notice if the account remains inactive for three consecutive months, unless circumstances warrant otherwise (e.g., a seasonal mailer, positive balance, etc.). The USPS reserves the right to refer closed corporate accounts with negative balances to a collection agency. [P500.2.5]

### **3.0 Postage Refunds**

#### **3.1 Postage Not Refunded**

Postage refunds may not be available if delivery was attempted within the times required for the specific service, or if the delay of the item was caused by any of the following reasons:

- a. Properly detained for law enforcement purpose; strike or work stoppage; delayed because of an incorrect ZIP Code or address; forwarding or return service was provided after the item was made available for claim; delay or cancelation of flights. Attempted delivery occurs under any of these situations when the delivery is physically attempted, but cannot be made; the shipment is available for delivery, but the addressee made a written request that the

shipment be held for a specific day or days; the delivery employee discovers that the shipment is undeliverable as addressed before leaving on the delivery route.

- b. As authorized by USPS Headquarters, when the delay was caused by governmental action beyond the control of the USPS or air carriers; war, insurrection, or civil disturbance; breakdown of a substantial portion of the USPS transportation network resulting from events or factors outside the control of the USPS; or acts of God. [D500.1.6]

# 115 Mail Preparation

## Overview

- 1.0 Packaging Supplies Provided by USPS
- 2.0 Express Mail Next Day and Second Day
- 3.0 Express Mail Custom Designed Service
- 4.0 Express Mail Same Day Airport Service (Suspended)
- 5.0 Firm Mailing Book

## 1.0 Packaging Supplies Provided by USPS

### 1.1 Express Mail Packaging

Express Mail packaging provided by the USPS must be used only for Express Mail. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Express Mail packaging is charged the appropriate Express Mail rate. [C010.6.2]

## 2.0 Express Mail Next Day and Second Day

### 2.1 Mailing Label

For each Express Mail item, the mailer must complete a mailing label—either Label 11-A or Label 11-E (for Post Office to Post Office Service) or Label 11-B or Label 11-F (for Post Office to Addressee Service). Mailers authorized to present Next Day or Second Day Express Mail items using an Express Mail Manifesting System are required to follow label preparation procedures in Publication 97, *Express Mail Manifesting Technical Guide*. [M500.3.1]

### 2.2 Waiver of Signature

A mailer sending an Express Mail item may instruct the USPS to deliver an Express Mail Next Day Service or Express Mail Second Day Service item without obtaining the signature of the addressee or the addressee's agent, if not available, by signing a waiver on Label 11-B or Label 11-F. Completion of the waiver authorizes the delivery employee to sign for the delivery of the item. The item must be left in a secure location. Customers who waive the signature requirement will be provided only the delivery date and not an image of the signature when accessing delivery information on the Internet or when calling the toll-free number. [M500.3.3]

### 2.3 ZIP Code Determination

For Express Mail Next Day Service, the mailer must determine whether the item is destined to a 3-digit ZIP Code area to which Express Mail Next Day Service is offered from the point of origin. If the destination is not listed, the mailer must use Express Mail Second Day Service. [M500.3.4]

115.3.1

### 3.0 Express Mail Custom Designed Service

#### 3.1 Forms

The mailer must complete Form 5625 and, when appropriate, Form 3877. The completed form is placed in an EP-13 envelope that is affixed to the Express Mail pouch. [M500.2.1]

#### 3.2 Waiver of Signature

Waiver of signature is not available for Express Mail Custom Designed Service. [M500.2.2]

#### 3.3 Pouches

Except under [3.2, Waiver of Signature](#) and [116, Deposit](#), all Express Mail Custom Designed Service items must be presented in sealed Express Mail pouches. [M500.2.3]

### 4.0 Express Mail Same Day Airport Service (Suspended)

#### 4.1 Security Measures

Because of aviation security and the dispatch of hazardous materials, the USPS may impose additional procedures for accepting an item for Express Mail Same Day Airport Service. USPS employees are not permitted to tell the mailer about the routing or the departure or arrival times of an Express Mail Same Day Airport Service item. [M500.1.1]

#### 4.2 Mailing Label

The mailer must complete a mailing label (Label 11-C) for each item. [M500.1.2]

#### 4.3 Outside Piece

An item that does not fit into an Express Mail pouch or that must be mailed as an outside piece may be accepted if documentation for the item is securely attached and the piece is identified as Express Mail with Label 63. [M500.1.3]

#### 4.4 Tag 2705

Each Express Mail Same Day Airport Service pouch or outside item (i.e., a piece that cannot fit into a mailing container) must have Tag 2705 attached to the pouch closure staple under the hasp. On outside items, the tag must be fastened near the attached Label 63. [M500.1.4]

### 5.0 Firm Mailing Book

#### 5.1 Completing a Firm Mailing Book

Form 3877 is available at no cost to any mailer who mails an average of three or more Express Mail items at one time, following these instructions:

- a. The mailer must prepare Express Mail Custom Designed Service and Express Mail Next Day Service or Second Day Service items as described above.
- b. Form 3877 must be presented with the items to be mailed.

- c. The mailer must enter on Form 3877 the full number of each Express Mail item and the addressee's name and address.
- d. All entries must be made in duplicate by typewriter, ink, or ballpoint pen. One copy is kept by the accepting employee. The other is receipted and returned to the mailer.
- e. All unused parts of the address column in Form 3877 must be obliterated by drawing a diagonal line through the unused part. Any alteration must be initialed by the mailer and accepting employee.
- f. For Express Mail Manifesting, a special verification manifest is used to present Express Mail items for acceptance as described in Publication 97. Form 3877, *Firm Mailing Book for Accountable Mail*, may be used only to list items for which extra services have been requested. See [705.2.6, Express Mail Manifesting Agreements](#), for information. [M500.3.6]

# 116 Deposit

## Overview

- 1.0 Express Mail Next Day and Second Day Services
- 2.0 Express Mail Same Day Airport Service (Suspended)
- 3.0 Express Mail Custom Designed Service
- 4.0 Express Mail Military Service
- 5.0 Pickup Service

## 1.0 Express Mail Next Day and Second Day Services

### 1.1 Next Day and Second Day Services

Express Mail Next Day and Second Day Service items:

- a. If not prepaid, must be deposited at places and times designated by the postmaster, including post offices, branches, or stations. The “time and date of mailing” for these items is the time and date when the items are presented and accepted.
- b. If prepaid, may be deposited in Express Mail collection boxes, handed to delivery and collection employees during their normal delivery and collection duties, or picked up by USPS pickup service. The “time and date of mailing” for items deposited in these ways is the time and date the items are brought to the Express Mail acceptance unit.
- c. If manifested, will be accepted at the locations specified in the Express Mail Manifesting agreement. [D500.2.3]

## 2.0 Express Mail Same Day Airport Service (Suspended)

### 2.1 Same Day Airport Service

Express Mail Same Day Airport Service items must be presented at a designated airport mail facility (AMF) retail counter. These items may not be collected, picked up, or dropped in a collection box. [D500.2.1]

## 3.0 Express Mail Custom Designed Service

### 3.1 Custom Designed Service

Express Mail Custom Designed Service items must be deposited on a scheduled basis under the service agreement. [D500.2.2]

116.4.1

## 4.0 Express Mail Military Service

### 4.1 **Military**

Express Mail Military Service items must be presented by the times authorized by the local postmaster. [D500.2.4]

## 5.0 Pickup Service

### 5.1 **Availability**

Express Mail pickup service is available from designated post offices. [D010.1.1]

### 5.2 **Pickup Fee**

The pickup fee is assessed and paid as described in [507.5.0](#). [P500.1.3]

## **120 Retail Mail Priority Mail**

123 Rates and Eligibility

# 123 Rates and Eligibility

## Overview

- [1.0 Priority Mail Rates and Fees](#)
- [2.0 Basic Eligibility Standards for Priority Mail](#)
- [3.0 Content Standards](#)

## 1.0 Priority Mail Rates and Fees

### 1.1 Application

Priority Mail rates apply to pieces meeting the standards in [123](#). [E120.2.1]

### 1.2 Priority Mail Rate Application

Except under [1.6, Flat-Rate Envelope](#), Priority Mail rates are charged per pound or fraction thereof; any fraction of a pound is rounded up to the next whole pound. For example, if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. The minimum postage amount per addressed piece is the 1-pound rate. The Priority Mail rate up to 1 pound is based solely on weight; for pieces weighing more than 1 pound, rates are based on weight and zone. [P013.2.4]

### 1.3 Priority Mail Rates

Parcels that weigh less than 15 pounds but measure more than 84 inches in combined length and girth are charged the applicable rate for a 15-pound parcel. The 1-pound rate is charged for matter sent in a Priority Mail flat-rate envelope provided by the USPS, regardless of the actual weight of the piece.

See [Exhibit 1.3 Priority Mail Rates](#).

[R100.10.0]

### 1.4 Rates for Keys and Identification Devices

| WEIGHT NOT OVER (pounds) | RATE <sup>1</sup> |
|--------------------------|-------------------|
| 1 pound                  | \$4.45            |
| 2 pounds <sup>2</sup>    | 5.15              |

1. Rates shown include \$0.60 fee.

2. Zone 4 postage charged for all pieces.

[R100.11.0]

### 1.5 Keys and Identification Devices

Keys and identification devices (e.g., identification cards or uncovered identification tags) that weigh more than 13 ounces but not more than 1 pound are returned at the 1-pound Priority Mail rate plus the fee. Keys and identification devices weighing more than 1 pound but not more than 2 pounds are mailed at the 2-pound Priority Mail rate for zone 4 plus the fee. The key or identification device must bear, contain, or have securely attached the name and complete address of a person, organization, or concern, with instructions to return the key or identification device to that address and a statement guaranteeing payment of postage due on delivery.

[E120.2.4]

1. Parcels that weigh less than 15 pounds but measure more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable rate for a 15-pound parcel (balloon rate).
2. For keys and ID devices that weigh:  
Up to 13 ounces, refer to Retail First-Class Mail (133).  
More than 13 ounces but not more than 1 pound, postage is \$4.45.  
More than 1 pound but not more than 2 pounds, postage is \$5.15.
3. The 1-pound rate is charged for matter sent in a Priority Mail flat-rate envelope provided by the USPS, regardless of the actual weight of the piece.

[R100.10.0]

**1.6 Flat-Rate Envelope**

Any amount of material that can be mailed in the special flat-rate envelope available from the USPS is subject to the 1-pound Priority Mail rate, regardless of the weight of the mailpiece. [E120.2.2]

**1.7 Balloon Rate**

Items weighing less than 15 pounds but measuring more than 84 inches in combined length and girth are charged the rate for a 15-pound parcel for the zone to which it is addressed. [E120.2.3]

**1.8 Pickup Fee**

Priority Mail only, per occurrence: \$12.50.

May be combined with Express Mail and Package Services pickups (see [507.5.0, Pickup Service](#)). [R100.13.2]

**1.9 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

**1.10 Computing Postage—Priority Mail**

Determine single-piece weight increment for each piece and affix postage to each piece under [124.1.2, Affixing Postage—Single-Piece Rate Mailings](#) (as applicable) or, for permit imprint mailings, multiply the number of addressed pieces at each rate increment by the corresponding postage rate. [P013.6.0]

**2.0 Basic Eligibility Standards for Priority Mail****2.1 Definition of Priority Mail**

Priority Mail is First-Class Mail weighing more than 13 ounces and, at the mailer's option, any other mailable matter weighing 13 ounces or less. Priority Mail rates are based on zone and weight. The maximum weight is 70 pounds, except for APO and FPO mail subject to [703.2.0, Overseas Military Mail](#), and [703.4.0, Mail Sent by U.S. Armed Forces](#), and Department of State mail subject to [703.3.0](#). [E120.1.1]

**2.2 Service Objectives**

All Priority Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information.

[D100.1.0]

**2.3 Matter Closed Against Postal Inspection**

Matter closed against postal inspection includes First-Class Mail (including Priority Mail) and Express Mail. The USPS may open mail other than First-Class Mail or Express Mail to determine whether the proper rate of postage is paid. Material

wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail or Express Mail rate. [E110.1.3]

### 3.0 Content Standards

#### 3.1 Eligibility

All mailable matter may be sent as First-Class Mail (including Priority Mail) or as Express Mail, except Customized MarketMail under 705.1.0 or other matter prohibited by the respective standards. [E110.1.1]

#### 3.2 Written or Typewritten Matter

Matter wholly or partially in handwriting or typewriting must be mailed as First-Class Mail (including Priority Mail) or Express Mail, except authorized additions to Periodicals, Standard Mail, and Package Services and written or typewritten matter in Library Mail and Media Mail, as permitted by the corresponding standards. [E110.1.2]

#### 3.3 Correspondence

Matter that has the character of actual and personal correspondence must be mailed as First-Class Mail (including Priority Mail) or Express Mail. [E110.1.4]

#### 3.4 Bills and Statements of Account

Bills and statements of account must be mailed as First-Class Mail (including Priority Mail) or Express Mail according to these definitions:

- a. A *bill* is a request for payment of a definite sum of money claimed to be owing by the addressee to the sender or a third party. The mere assertion of a debt in a definite sum combined with a demand for payment is sufficient to make the message a bill.
- b. A *statement of account* is the assertion of a debt in a definite amount owed by the addressee to the sender or a third party but does not necessarily contain a request or a demand for payment. The amount may be immediately due or may become due after a certain time or on demand or billing at a later date.
- c. A bill or statement of account must present enough details of a debt to inform the debtor of the amount the debtor must pay to acquit himself or herself of the debt. Neither a bill nor a statement of account need state the precise amount if the bill or statement contains enough information to enable the debtor to determine the exact amount of the claim asserted.
- d. A bill or statement of account does not lose that character just because the amount claimed is not, in fact, owing or may not be legally collectible. [E110.1.5]

#### 3.5 Examples

These are examples of material that must be mailed at First-Class Mail (including Priority Mail) or Express Mail rates:

- a. Handwritten or typewritten matter, including identical copies prepared by automatic typewriter and manifold or carbon copies of this matter. Handwritten or typewritten matter does not include all matter produced by computers, but computer-prepared material is subject to First-Class postage if it has the character of actual and personal correspondence.
- b. Autograph albums containing writing.
- c. Notebooks or blank books containing written or typewritten entries or stenographic or shorthand notes.
- d. Blank printed forms filled out in writing, such as notices, certificates, and checks, either canceled or uncanceled.
- e. Printed price lists containing written figures changing individual items.
- f. Printed cards or letters bearing a written date, where the date is not the date of the card but gives information about when something is to occur or has occurred.
- g. Any matter marked "Postcard" or "Double Postcard." [E110.1.6]

# 124 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for Priority Mail](#)
- [2.0 Postage Paid With Permit Imprint](#)

## 1.0 Postage Payment Methods for Priority Mail

### 1.1 Payment Method

Priority Mail postage may be paid with postage stamps (see [604.1.0](#)), meter stamps (see [604.4.0](#)), or permit imprint (see [604.6.0](#)). [P100.3.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed Priority Mail mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required (including any surcharges). A mailer also may use precanceled stamps on Priority Mail. [P013.1.4]

## 2.0 Postage Paid With Permit Imprint

### 2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees. This method must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

### 2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except for single-piece rate mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision. [P040.5.1]

### 2.3 Postage Statement

A complete postage statement must accompany each mailing paid with a permit imprint. [P100.1.2]

# 125 Mail Preparation

## Overview

- [1.0 Preparation for Priority Mail](#)
- [2.0 Marking for Priority Mail](#)
- [3.0 Preparation for a Permit Imprint Mailing](#)

## 1.0 Preparation for Priority Mail

### 1.1 Priority Mail Packaging Provided by the USPS

Priority Mail packaging provided by the USPS must be used only for Priority Mail. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Priority Mail packaging is charged the appropriate Priority Mail rate. [C010.6.2]

### 1.2 Required Use

The sender's domestic return address must appear legibly on Priority Mail. [A010.4.4]

## 2.0 Marking for Priority Mail

### 2.1 Marking

The marking "Priority" or "Priority Mail" must be placed prominently on the address side of each piece of single-piece rate Priority Mail. [M120.1.1]

## 3.0 Preparation for a Permit Imprint Mailing

### 3.1 Preparing a Permit Imprint Mailing

To use a permit imprint, the pieces must be of identical weight and, unless all the pieces are in a weight category for which the rate does not vary by zone, the pieces must be separated by zone when presented to the post office. [P100.3.1]

### 3.2 Payment Method

A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters. [P100.1.1]

# 126 Deposit

## Overview

- [1.0 Deposit for Priority Mail](#)
- [2.0 Pickup Service](#)

## 1.0 Deposit for Priority Mail

### 1.1 Pieces Weighing Less Than 16 Ounces

Priority Mail weighing less than 16 ounces may be deposited into any collection box, mail chute, or mail receptacle or at any place where mail is accepted if the full required postage is paid with adhesive stamps. Metered mail must be deposited in locations under the jurisdiction of the licensing post office, except as permitted under [604.4.0, \*Postage Meters \(Postage Evidencing Systems\)\*](#) and [604.5.0, \*PC Postage\*](#). Permit imprint mail must be presented at a post office under [604.6.0, \*Permit Imprint \(Indicia\)\*](#) or [705, \*Advanced Preparation and Special Postage Payment Systems\*](#). [D100.2.1]

### 1.2 Pieces Weighing 16 Ounces or More

Priority Mail weighing 16 ounces or more must be presented at a post office retail counter if postage is paid with adhesive stamps. The sender may be required to provide identification before the mail is accepted by the USPS. Such mail may be presented by a sender known to the postal carrier at the sender's residence or place of business. Priority Mail weighing 16 ounces or more and not complying with the requirements of this section is returned to the sender for proper deposit. [D100.2.6]

## 2.0 Pickup Service

### 2.1 Availability

Priority Mail pickup service is available from designated post offices. [D010.1.1]

**130 Retail Mail  
First-Class Mail**

- 133 Rates and Eligibility
- 134 Postage Payment Methods
- 135 Mail Preparation
- 136 Deposit

# 133 Rates and Eligibility

## Overview

- 1.0 First-Class Mail Rates and Fees
- 2.0 Basic Eligibility Standards for First-Class Mail
- 3.0 Content Standards

## 1.0 First-Class Mail Rates and Fees

### 1.1 First-Class Mail Single-Piece Rate Application

The single-piece rates for First-Class Mail are applied as follows:

- a. The card rate applies to a card meeting the applicable standards in [101.6.3, Cards Claimed at Card Rates](#).
- b. The letter rate applies to any other First-Class Mail (letter, flat, and parcel) weighing 13 ounces or less that is not eligible for and claimed at the card rate. [E130.2.1]

### 1.2 Rate Computation for First-Class Mail

First-Class rates are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. The minimum postage per addressed piece is that for a piece weighing 1 ounce. [P013.2.3]

### 1.3 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

### 1.4 Rates for Cards

Cards meeting the standards in [101.6.3, Cards Claimed at Card Rates](#): \$0.23 each.

[R100.1.1]

### 1.5 Rates for Letters, Flats, and Parcels

Letters, flats, and parcels; nonmachinable surcharge in [1.9](#) might apply:

| WEIGHT INCREMENT                    | RATE   |
|-------------------------------------|--------|
| First ounce or fraction of an ounce | \$0.37 |
| Each additional ounce or fraction   | 0.23   |

[R100.1.2]

133.1.6

### 1.6 First-Class Mail Rates

| Weight Not Over (ounces) <sup>1,2</sup> | Single-Piece  |
|---|---------------|
| 1 <sup>3</sup>                          | \$0.37        |
| 2                                       | 0.60          |
| 3                                       | 0.83          |
| 4                                       | 1.06          |
| 5                                       | 1.29          |
| 6                                       | 1.52          |
| 7                                       | 1.75          |
| 8                                       | 1.98          |
| 9                                       | 2.21          |
| 10                                      | 2.44          |
| 11                                      | 2.67          |
| 12                                      | 2.90          |
| 13                                      | 3.13          |
| <b>Card Rate<sup>4</sup></b>            | <b>\$0.23</b> |

1. For each additional ounce, postage includes \$0.23 for single-piece rates.
2. For keys and ID devices, add a \$0.60 fee. If more than 13 ounces, refer to Retail Priority Mail (see [123](#)).
3. Pieces weighing 1 oz. or less may be subject to a nonmachinable surcharge of \$0.12 per piece (see [101.6.4](#)).
4. The card rate applies to each single or double postcard when originally mailed; reply half of double postcard must bear postage at applicable rate when returned unless prepared as business reply mail.

[R100.9.1]

**1.7 Rates for Keys and Identification Device**

| WEIGHT NOT OVER (ounces) | RATE <sup>1</sup> |
|--------------------------|-------------------|
| 1 <sup>2</sup>           | \$0.97            |
| 2                        | 1.20              |
| 3                        | 1.43              |
| 4                        | 1.66              |
| 5                        | 1.89              |
| 6                        | 2.12              |
| 7                        | 2.35              |
| 8                        | 2.58              |
| 9                        | 2.81              |
| 10                       | 3.04              |
| 11                       | 3.27              |
| 12                       | 3.50              |
| 13                       | 3.73              |
| 1 pound                  | 4.45              |
| 2 pounds                 | 5.15 <sup>3</sup> |

1. Rates shown include \$0.60 fee.

2. Nonmachinable surcharge might apply.

3. Zone 4 postage charged for all pieces.

[R100.11.0]

**1.8 Keys and Identification Devices**

Keys and identification devices (e.g., identification cards or uncovered identification tags) that weigh more than 13 ounces but not more than 1 pound are returned at the 1-pound Priority Mail rate plus the fee. Keys and identification devices weighing more than 1 pound but not more than 2 pounds are mailed at the 2-pound Priority Mail rate for zone 4 plus the fee. The key or identification device must bear, contain, or have securely attached the name and complete address of a person, organization, or concern, with instructions to return the key or identification device to that address and a statement guaranteeing payment of postage due on delivery.

[E120.2.4]

**1.9 Nonmachinable Surcharge**

Surcharge per piece at single-piece rate: \$0.12. [R100.12.0]

**1.10 Applicability of Nonmachinable Surcharge**

The nonmachinable surcharge applies to pieces that weigh 1 ounce or less and meet one or more of the nonmachinable characteristics in [101.1.2](#). Pieces mailed at the card rate are not subject to the nonmachinable surcharge. [E130.2.4]

**1.11 Computing Postage—First-Class Mail**

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in [1.2](#), [Rate Computation for First-Class Mail](#), and [1.8](#), [Keys and Identification Devices](#). For First-Class Mail, affix postage to each piece under

[134.1.2, Affixing Postage—Single-Piece Rate Mailings](#), or, for permit imprint mailings, multiply the number of addressed pieces at each rate increment by the corresponding postage rate. [P013.6.0]

## 2.0 Basic Eligibility Standards for First-Class Mail

### 2.1 Service Objectives

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information. [D100.1.0]

### 2.2 Matter Closed Against Postal Inspection

Matter closed against postal inspection includes First-Class Mail (including Priority Mail) and Express Mail. The USPS may open mail other than First-Class Mail or Express Mail to determine whether the proper rate of postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail or Express Mail rate. [E110.1.3]

### 2.3 All First-Class Mail Pieces

All pieces of First-Class Mail must:

- a. Meet the basic eligibility standards for First-Class Mail in [2.0](#) and [3.0](#).
- b. Weigh 13 ounces or less.
- c. Bear a delivery address.
- d. Meet the applicable postage payment standards. [E130.1.1]

## 3.0 Content Standards

### 3.1 Eligibility

All mailable matter 13 ounces or less may be sent as First-Class Mail (including Priority Mail) except Customized MarketMail under [705.1.0](#) or other matter prohibited by the respective standards. [E110.1.1]

### 3.2 Written or Typewritten Matter

Matter wholly or partially in handwriting or typewriting must be mailed as First-Class Mail (including Priority Mail) or Express Mail, except authorized additions to Periodicals, Standard Mail, and Package Services and written or typewritten matter in Library Mail and Media Mail, as permitted by the corresponding standards. [E110.1.2]

### 3.3 Correspondence

Matter that has the character of actual and personal correspondence must be mailed as First-Class Mail (including Priority Mail) or Express Mail. [E110.1.4]

### 3.4 Bills and Statements of Account

Bills and statements of account must be mailed as First-Class Mail (including Priority Mail) or Express Mail according to these definitions:

- a. A *bill* is a request for payment of a definite sum of money claimed to be owing by the addressee to the sender or a third party. The mere assertion of a debt in a definite sum combined with a demand for payment is sufficient to make the message a bill.
- b. A *statement of account* is the assertion of a debt in a definite amount owed by the addressee to the sender or a third party but does not necessarily contain a request or a demand for payment. The amount may be immediately due or may become due after a certain time or on demand or billing at a later date.
- c. A bill or statement of account must present enough details of a debt to inform the debtor of the amount the debtor must pay to acquit himself or herself of the debt. Neither a bill nor a statement of account need state the precise amount if the bill or statement contains enough information to enable the debtor to determine the exact amount of the claim asserted.
- d. A bill or statement of account does not lose that character just because the amount claimed is not, in fact, owing or may not be legally collectible. [E110.1.5]

### 3.5 Examples

These are examples of material that must be mailed at First-Class Mail (including Priority Mail) or Express Mail rates:

- a. Handwritten or typewritten matter, including identical copies prepared by automatic typewriter and manifold or carbon copies of this matter. Handwritten or typewritten matter does not include all matter produced by computers, but computer-prepared material is subject to First-Class postage if it has the character of actual and personal correspondence.
- b. Autograph albums containing writing.
- c. Notebooks or blank books containing written or typewritten entries or stenographic or shorthand notes.
- d. Blank printed forms filled out in writing, such as notices, certificates, and checks, either canceled or uncanceled.
- e. Printed price lists containing written figures changing individual items.
- f. Printed cards or letters bearing a written date, where the date is not the date of the card but gives information about when something is to occur or has occurred.
- g. Any matter marked "Postcard" or "Double Postcard." [E110.1.6]

### 3.6 Air Transportation Prohibitions

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#). [E110.2.0]

# 134 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for First-Class Mail](#)
- [2.0 Postage Paid With Permit Imprint](#)

## 1.0 Postage Payment Methods for First-Class Mail

### 1.1 Payment Method

Postage for single-piece rate First-Class Mail must be paid with affixed postage ([604.1.0](#) for stamps or [604.4.0](#) for metered postage) or permit imprint ([604.6.0](#)) as specified in [1.0](#). A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters. The mailer is responsible for prompt payment of postage. [P100.1.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed single-piece First-Class Mail mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required (including any surcharges). A mailer also may use precanceled stamps on single-piece First-Class Mail under [604.3.5](#), *Stamp Collectors*. [P013.1.4]

### 1.3 More Than One Mailer

When two or more individuals or organizations, or a party acting as their agent, mail in one package the bills, statements of account, or other letters of the individuals or organizations, to an addressee in common, First-Class postage may be paid on the weight of the entire package of aggregated mail. Postage is not required on each individual piece of First-Class Mail. [P100.2.2]

### 1.4 More Than One Letter

An individual or organization may mail in one envelope more than one of the mailer's own letters and pay postage at the First-Class Mail rate on the weight of the entire package of letters if:

- a. The letters are for persons at the same residence or working for the same organization at the address on the envelope (if the letters relate to the business of such organization); or
- b. The letters are sent to a party who turns them over to other persons as part of a minor service provided in addition to a substantial and independent sales, service, or other business function that party performs for such persons.

[P100.2.3]

### 1.5 Agent

Any agent of a licensing authority may forward completed applications in one envelope to an office of the licensing authority and pay postage at the First-Class Mail rate on the weight of the piece. [P100.2.4]

134.2.1

### 2.0 Postage Paid With Permit Imprint

#### 2.1 **Advance Deposit Account**

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees. This method must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

#### 2.2 **Minimum Quantity**

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except that an occasional First-Class mailing may contain fewer than 200 pieces if from a mailer whose total daily mailings are not much more than 200 pieces but who, to cooperate with the post office, presents a part of that mail early in the day. [P040.5.1]

#### 2.3 **Postage Statement**

A complete postage statement must accompany each mailing paid with a permit imprint. [P100.1.2]

# 135 Mail Preparation

## Overview

### [1.0 Preparation for First-Class Mail](#)

## 1.0 Preparation for First-Class Mail

### 1.1 Preparation of First-Class Mail

The following standards apply to single-piece rate First-Class Mail:

- a. Each piece must have a delivery address but is not required to bear the rate marking “First-Class” or “First-Class Mail.”
- b. No minimum quantity is required unless postage is paid with a permit imprint (in which case the mailing must contain at least 200 pieces or 50 pounds of pieces).
- c. There are no sortation standards for single-piece rate First-Class Mail, but five or more letter-size pieces bearing metered postage and all pieces bearing permit imprints must be faced with the addresses in one direction and bundled. Bundling of letter-size pieces is not required if they fill a letter tray. Metered mail and permit imprint mail may not be bundled or trayed together. [M110.1.0]

# 136 Deposit

## Overview

[1.0 Deposit for First-Class Mail](#)

### 1.0 Deposit for First-Class Mail

#### 1.1 **Single-Piece and Card Rate Mailings**

Single-piece rate and card rate First-Class Mail may be deposited into any collection box, mail chute, or mail receptacle or at any place where mail is accepted if the full required postage is paid with adhesive stamps. Metered mail must be deposited in locations under the jurisdiction of the licensing post office, except as permitted under [604.4.0, \*Postage Meters \(Postage Evidencing Systems\)\*](#), and [604.5.0, \*PC Postage\*](#). Permit imprint mail must be presented at a post office under [604.6.0, \*Permit Imprint \(Indicia\)\*](#), or [705, \*Advanced Preparation and Special Postage Payment Systems\*](#). [D100.2.1]

## **150 Retail Mail Parcel Post**

153 Rates and Eligibility

# 153 Rates and Eligibility

## Overview

- [1.0 Parcel Post Rates and Fees](#)
- [2.0 Basic Eligibility Standards for Parcel Post](#)
- [3.0 Content Standards](#)
- [4.0 Attachments and Enclosures](#)

## 1.0 Parcel Post Rates and Fees

### 1.1 Rate Eligibility

There are two Parcel Post retail rate categories: Intra-BMC and Inter-BMC. Intra-BMC and Inter-BMC Parcel Post rates are calculated based on the zone to which the parcel is addressed and the weight of the parcel. Requirements for Parcel Post rates and discounts are as follows:

- a. Intra-BMC rates apply to all Parcel Post that originates and destines in the service area of the same BMC or ASF. Intra-BMC rates also apply to Parcel Post that originates and destines in the same state for Alaska and Hawaii and in the same territory for Puerto Rico. See [Exhibit 1.1, BMC/ASF Service Areas](#). Nonmachinable pieces ([101.3.2, Machinable Parcels](#), and [101.7.2, Nonmachinable Parcel Post Standards](#)) mailed at Intra-BMC rates are subject to a nonmachinable surcharge in addition to postage.
- b. Inter-BMC rates apply to all Parcel Post that originates in the service area of a BMC or ASF or in Alaska, Hawaii, or Puerto Rico and destines outside that area, state, or territory. Nonmachinable pieces ([101.3.2, Machinable Parcels](#), and [101.7.2, Nonmachinable Parcel Post Standards](#)) mailed at Inter-BMC rates are subject to a nonmachinable surcharge in addition to postage.
- c. The oversized rate applies to pieces that measure over 108 inches but not more than 130 inches in combined length and girth.
- d. Items that weigh less than 15 pounds but measure more than 84 inches in combined length and girth are charged the rate for a 15-pound parcel for the zone to which it is addressed. [E711.2.2]

153.1.1

### Exhibit 1.1 BMC/ASF Service Areas

| SERVICE AREA         | ZIP CODE AREAS SERVED   |
|----------------------|---|
| <b>BMC</b>           |   |
| New Jersey           | 005, 068-079, 085-098, 100-119, 124-127   |
| Springfield          | 010-067, 120-123, 128, 129  |
| Philadelphia         | 080-084, 137-139, 169-199   |
| Pittsburgh           | 150-168, 260-266, 439-447   |
| Washington           | 200-212, 214-239, 244, 254, 267, 268  |
| Greensboro           | 240-243, 245-249, 270-297, 376  |
| Cincinnati           | 250-253, 255-259, 400-418, 421, 422, 425-427, 430-433, 437, 438, 448-462, 469-474 |
| Atlanta              | 298, 300-312, 317-319, 350-352, 354-368, 373, 374, 377-379, 398, 399.             |
| Jacksonville         | 299, 313-316, 320-342, 344, 346, 347, 349.  |
| Memphis              | 369-372, 375, 380-397, 700, 701, 703-705, 707, 708, 713, 714, 716, 717, 719-729   |

[Exhibit E711.2.2]

**1.2 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

**1.3 Parcel Post Rate Application**

The Parcel Post rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per piece is the 1-pound rate. [P013.5.2]

**1.4 Computing Postage—Parcel Post With Permit Imprint**

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. [P013.9.1]

**1.5 Computing Postage—Parcel Post With Postage Affixed**

For each piece, affix the postage for the weight increment (including any surcharges) and the zone to which the piece is addressed, as shown in 1.7 through 1.11 in [Parcel Post Rates and Fees](#). [P013.9.2]

**1.6 Pickup Fees**

Parcel Post only, per occurrence: \$12.50.

May be combined with Express Mail and Priority Mail pickups (see 507.5.0, [Pickup Service](#)). [R700.5.2]

**1.7 Inter-BMC/ASF Machinable Parcel Post**

For barcoded discount, deduct \$0.03 per parcel (50-piece minimum). Parcels that weigh less than 15 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 15-pound parcel. [R700.1.1]

**1.8 Inter-BMC/ASF Nonmachinable Parcel Post**

Rates include the \$2.75 nonmachinable surcharge. Regardless of weight, a parcel that meets any of the criteria in 101.7.2, [Nonmachinable Parcel Post Standards](#), must pay the rate listed in this table. Parcels that weigh less than 15 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 15-pound parcel. Regardless of weight, a parcel that measures more than 108 inches (but not more than 130 inches) in combined length and girth must pay the oversized rate. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling. [R700.1.2]

**1.9 Inter-BMC/ASF Machinable and Nonmachinable Parcel Post Rates**

See [Exhibit, 1.9 Inter-BMC/ASF Machinable and Nonmachinable Parcel Post Rates](#).

### Exhibit 1.9 Inter-BMC/ASF Machinable and Nonmachinable Parcel Post Rates

| Weight Not Over (pounds) | Machinable <sup>1, 2, 3, 4</sup> |        |        |        |        |        |        | Nonmachinable <sup>1, 2, 4, 5</sup> |        |        |        |        |        |        |
|--------------------------|----------------------------------|--------|--------|--------|--------|--------|--------|-------------------------------------|--------|--------|--------|--------|--------|--------|
|                          | Zone                             |        |        |        |        |        |        | Zone                                |        |        |        |        |        |        |
|                          | 1 & 2                            | 3      | 4      | 5      | 6      | 7      | 8      | 1 & 2                               | 3      | 4      | 5      | 6      | 7      | 8      |
| 1                        | \$3.69                           | \$3.75 | \$3.75 | \$3.75 | \$3.75 | \$3.75 | \$3.75 | \$6.44                              | \$6.50 | \$6.50 | \$6.50 | \$6.50 | \$6.50 | \$6.50 |

1. For parcels that destinate to different BMC service areas (see [153.1.1](#)).
2. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
3. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
4. Regardless of weight, a parcel that meets any of the criteria in DMM [101.7.2](#) must pay the nonmachinable rate.
5. Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

| 70                       | ---  | --- | --- | --- | --- | --- | --- | 13.61 | 16.75                               | 20.87   | 25.73   | 29.49   | 33.70   | 43.68   |         |  |
| Oversized                | ---  | --- | --- | --- | --- | --- | --- | 41.70 | 46.73                               | 54.12   | 65.84   | 79.69   | 92.81   | 120.72  |         |  |

- For parcels that destinate to different BMC service areas (see 153.1.1).
- Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
- Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
- Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 must pay the nonmachinable rate.
- Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

[R700.1.1 and R700.1.2]

153.1.10

**1.10 Local and Intra-BMC/ASF Machinable Parcel Post**

Rates for parcels that originate and destinate in the same BMC service area are in [Exhibit, 1.12 Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post Rates](#). For barcoded discount, deduct \$0.03 per parcel (50-piece minimum). Parcels that weigh less than 15 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 15-pound parcel. Regardless of weight, a parcel that meets any of the criteria in [101.7.2](#) must pay the rate for a nonmachinable parcel in [1.11](#). [R700.1.3]

**1.11 Local and Intra-BMC/ASF Nonmachinable Parcel Post**

Rates include the \$1.35 nonmachinable surcharge. Regardless of weight, a parcel that meets any of the criteria in [101.7.2, Nonmachinable Parcel Post Standards](#), must pay the rate listed in this table. Parcels that weigh less than 15 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 15-pound parcel. Regardless of weight, a parcel that measures more than 108 inches (but not more than 130 inches) in combined length and girth must pay the oversized rate. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling. [R700.1.4]

**1.12 Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post Rates**

See [Exhibit, 1.12 Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post Rates](#).

Exhibit 1.12 Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post Rates

| Weight<br>Not Over<br>(pounds) | Machinable <sup>1, 2, 3, 4</sup> |        |        |        |        | Nonmachinable <sup>1, 2, 4, 5</sup> |        |        |        |        |
|--------------------------------|----------------------------------|--------|--------|--------|--------|-------------------------------------|--------|--------|--------|--------|

- For parcels that originate and destinate in the same BMC service area.
- Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
- Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
- Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 (for retail) or 401.2.3.2 (for discount) must pay the nonmachinable rate.
- Rates include the \$1.35 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

| 70                       | ---  | --- | --- | --- | --- | 9.33                                | 11.53  | 13.16   | 13.85   | 14.65   |
| Oversized                | ---  | --- | --- | --- | --- | 23.78                               | 34.47  | 34.79   | 35.48   | 36.53   |

- For parcels that originate and destinate in the same BMC service area.
- Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
- Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
- Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 (for retail) or 401.2.3.2 (for discount) must pay the nonmachinable rate.
- Rates include the \$1.35 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

[R700.1.3 and R700.1.4]

## 2.0 Basic Eligibility Standards for Parcel Post

### 2.1 Definition of Parcel Post

Parcel Post is a subclass of Package Services. Any Package Services matter may be mailed at Parcel Post rates. [E711.1.0]

### 2.2 Service Objectives

The USPS does not guarantee the delivery of Parcel Post within a specified time. Parcel Post might receive deferred service. The local post office can provide more information concerning delivery times within its area. [D700.1.0]

### 2.3 Postal Inspection

Parcel Post mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Parcel Post rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### 2.4 Delivery and Return Addresses

All Parcel Post mail must bear a delivery address. Alternative addressing formats under 602.3.0 may be used. Each piece must bear the sender's return address. [E710.3.1]

## 3.0 Content Standards

### 3.1 General Content Standards

Parcel Post mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (except as permitted under 3.2 or permitted or required under 707.7.9). [E710.1.1]

### 3.2 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at Parcel Post rates. Postage at Parcel Post rates is based on the combined weight of the host piece and the sample copies enclosed.

## 4.0 Attachments and Enclosures

### 4.1 Enclosures

Parcel Post may contain any printed matter mailable as Standard Mail, in addition to the enclosures and additions listed in 4.0. [E711.2.1]

### 4.2 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.

### 153.4.3

- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

#### **4.3 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Parcel Post piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **4.4 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Parcel Post piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Parcel Post rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

# 154 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for Parcel Post](#)
- [2.0 Postage Paid With Permit Imprint](#)

## 1.0 Postage Payment Methods for Parcel Post

### 1.1 Payment Method

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Parcel Post mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only under [705, \*Advanced Preparation and Special Postage Payment Systems\*](#). Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone and same combination of rates. Identical-weight permit imprint mail also may be mailed under [705](#). [P700.1.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed single-piece mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required (including any surcharges). [P013.1.4]

## 2.0 Postage Paid With Permit Imprint

### 2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

### 2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except for single-piece rate mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision. [P040.5.1]

### 2.3 Postage Statement

A complete postage statement must accompany each mailing paid with permit imprint. [P700.1.2]

# 155 Mail Preparation

## Overview

### 1.0 Preparation for Parcel Post

## 1.0 Preparation for Parcel Post

### 1.1 Basic Preparation

There are no presort, sacking, or labeling standards for single-piece rate Parcel Post. [M710.1.1]

### 1.2 Delivery and Return Addresses

All Parcel Post mail must bear a delivery address. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

### 1.3 Basic Markings

The basic required marking—“Parcel Post” or “PP”—must be printed on each piece. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 102.3.3, Package Services Indicators](#)):

- a. The service icon that will identify all Parcel Post pieces will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the marking “PARCEL POST” must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text. [M012.3.1]

### 1.4 Required Use

Except as provided in [602.1.5, Return Addresses](#), the sender's domestic return address must appear legibly on Parcel Post mail. [A010.4.4]

# 156 Deposit

## Overview

### 1.0 Deposit for Parcel Post

## 1.0 Deposit for Parcel Post

### 1.1 Single-Piece Rate Mailings

Single-piece rate Parcel Post mail must be deposited at a time and place specified by the postmaster or designee at the office of mailing. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0, \*Metered Mail Drop Shipment\*](#). Permit imprint mail must be presented at the post office under [604.6.0, \*Permit Imprint \(Indicia\)\*](#). [D700.2.1]

### 1.2 Designated Mailing Office

Parcel Post must be mailed at the post office from which the zone rate postage was computed, except under [1.3](#) and [1.4](#). [E710.2.1]

### 1.3 Redirected Mailings

A mailer who presents large mailings of zoned Parcel Post mail may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original post office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage.
- c. Postage for pieces claimed at the Parcel Post Intra-BMC local zone rates must be recomputed at the applicable zone rate for the alternative postal facility. Postage also may be recomputed for other pieces that are ineligible for the Parcel Post Intra-BMC local zone rates but could become eligible at the postal facility to which the mailing is redirected. [E710.2.2]

### 1.4 BMC Acceptance of Zoned Parcel Post

A mailer may present zoned Parcel Post at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent post office, or permit imprint postage is paid through an advance deposit account at the BMC parent post office or another post office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent post office.
- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry post office. [E710.2.3]

156.1.5

**1.5 Pickup fees**

The Parcel Post pickup fee must be paid every time pickup service is provided, subject to the corresponding standards in [507.5.0](#). [E711.2.3]

## **160 Retail Mail Bound Printed Matter**

- 163 Rates and Eligibility
- 164 Postage Payment Methods
- 165 Mail Preparation
- 166 Deposit

# 163 Rates and Eligibility

## Overview

- [1.0 Bound Printed Matter Rates and Fees](#)
- [2.0 Basic Eligibility Standards for Bound Printed Matter](#)
- [3.0 Content Standards](#)
- [4.0 Attachments and Enclosures](#)

## 1.0 Bound Printed Matter Rates and Fees

### 1.1 Rates

Bound Printed Matter (BPM) rates are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone to which the piece is addressed. The single-piece rate applies to BPM not mailed at the Presorted or carrier route rates. [E712.2.0]

### 1.2 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

### 1.3 Bound Printed Matter Rate Application

The single-piece BPM rate is charged per half-pound from 1 through 5 pounds, and per pound from more than 5 through 15 pounds. For pieces weighing 5 pounds or under, any fraction of a half-pound is considered a whole half-pound. For pieces weighing more than 5 but not more than 15 pounds, any fraction of a pound is considered a whole pound. For example, if a BPM item weighs 4.325 pounds, the weight (postage) increment is 4.5 pounds; if an item weighs 6.25 pounds, the weight (postage) increment is 7 pounds. The minimum postage rate per piece is the 1-pound rate. [P013.5.3]

### 1.4 Barcoded Discount—Flats

The barcoded discount applies only to BPM flat-size pieces that bear a correct, readable ZIP+4 or delivery point barcode (DPBC) under [708.4.0, \*Barcoding Standards for Letters and Flats\*](#), for the ZIP+4 code or numeric DPBC of the delivery address. The pieces must be part of a single-piece rate mailing of 50 or more flat-size pieces. To qualify for the barcoded discount, the flat-size piece must meet the AFSM 100 flat sorting machine requirements under [301.3.3](#). [E712.2.0e]

163.1.5

### 1.5 Single-Piece—Flats

For barcoded discount, deduct \$0.03 per piece (automatable flats only, 50-piece minimum). [R700.2.1]

#### Exhibit 1.5 Single-Piece—Flats Rates

| Weight Not Over (pounds) <sup>1</sup> | Zone         |        |        |        |        |        |        |
|---------------------------------------|--------------|--------|--------|--------|--------|--------|--------|
|                                       | Local, 1 & 2 | 3      | 4      | 5      | 6      | 7      | 8      |
| 1.0                                   | \$1.79       | \$1.84 | \$1.88 | \$1.96 | \$2.03 | \$2.12 | \$2.29 |
| 1.5                                   | 1.79         | 1.84   | 1.88   | 1.96   | 2.03   | 2.12   | 2.29   |

1. Bound Printed Matter automation compatible flats may be eligible for barcoded discount (see 163.1.4) of \$0.03 per flat (50-piece minimum).

[R700.2.1]

### 1.6 Barcode Discount—Machinable Parcels

Barcoded Discount—Machinable Parcels. The barcoded discount applies only to BPM machinable parcels (see 401.1.5.1, *Criteria*) that bear a correct, readable barcode under 708.5.0, *Barcoding Standards for Parcels*, for the ZIP Code of the delivery address. The pieces must be part of a single-piece rate mailing of 50 or more BPM parcels. [E712.2.0d]

**1.7 Single-Piece—Parcels**

For barcoded discount, deduct \$0.03 per parcel (machinable parcels only, 50-piece minimum). [R700.2.2]

**Exhibit 1.7 Single-Piece—Parcels Rates**

| 14  | 3.62            | 4.04   | 4.46   | 5.16   | 5.86   | 6.70   | 8.24   |
| 15  | 3.76            | 4.21   | 4.66   | 5.41   | 6.16   | 7.06   | 8.71   |

1. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).

[R700.2.2]

**1.8 Computing Postage—Bound Printed Matter With Permit Imprint**

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. [P013.9.1]

**1.9 Computing Postage—Bound Printed Matter With Postage Affixed**

For each piece, affix the postage for the weight increment for the zone to which the piece is addressed, as shown in [1.5, Single-Piece—Flats](#), and [1.7, Single-Piece—Parcels](#). [P013.9.2]

**2.0 Basic Eligibility Standards for Bound Printed Matter****2.1 Service Objectives**

The USPS does not guarantee the delivery of BPM within a specified time. BPM might receive deferred service. The local post office can provide more information concerning delivery times within its area. [D700.1.0]

163.2.2

### 2.2 Postal Inspection

BPM is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at BPM rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### 2.3 Delivery and Return Addresses

All BPM mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under 602.3.0 may be used. Except for unendorsed BPM, each piece must bear the sender's return address. [E710.3.1]

## 3.0 Content Standards

### 3.1 Content Standards for Bound Printed Matter

BPM is a subclass of Package Services and must:

- a. Meet the basic standards for BPM in 101.8.1 and 2.0 and 3.0.
- b. Weigh no more than 15 pounds. Pieces might be subject to other minimum weights or dimensions based on the standards for specific rates.
- c. Consist of advertising, promotional, directory, or editorial material (or any combination of such material).
- d. Be securely bound by permanent fastenings such as staples, spiral binding, glue, or stitching. Loose-leaf binders and similar fastenings are not considered permanent.
- e. Consist of sheets of which at least 90% are imprinted by any process other than handwriting or typewriting with words, letters, characters, figures, or images (or any combination of them).
- f. Not have the nature of personal correspondence.
- g. Not be stationery, such as pads of blank printed forms. [E712.1.1]
- h. Consist of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (except as permitted under 3.2 or permitted or required under 707.7.9). [E710.1.1]

### 3.2 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at BPM rates. Postage at BPM rates is based on the combined weight of the host piece and the sample copies enclosed.

## 4.0 Attachments and Enclosures

### 4.1 Enclosures

In addition to the basic standards in 101.8.1, *Physical Standards for Bound Printed Matter*, 2.0, 4.1 through 4.4, and 166.1.1, *Single-Piece Rate Mailings*, BPM may have the following additions and enclosures:

- a. Any printed matter mailable as Standard Mail.

- b. Nonprint attachments and enclosures. The combined weight of all nonprint attachments and enclosures in the mailpiece must be less than or equal to 25% of the weight of the BPM in the mailpiece. The individual cost of each nonprint attachment or enclosure must be less than or equal to the cost of a “low cost” item as defined in [703.1.6.11, \*Products Mailable at Nonprofit Standard Mail Rates\*](#). In addition, the combined cost of all nonprint attachments and enclosures must not exceed two times the cost of a “low cost” item as defined in [703.1.6.11, \*Products Mailable at Nonprofit Standard Mail Rates\*](#). [E712.1.2]

#### 4.2 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by “From” or “To,” and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

#### 4.3 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a BPM piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

163.4.4

#### **4.4 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any BPM piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the BPM rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

# 164 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for Bound Printed Matter](#)
- [2.0 Postage Paid With Permit Imprint](#)

## 1.0 Postage Payment Methods for Bound Printed Matter

### 1.1 Payment Method

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Bound Printed Matter may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only under [705, \*Advanced Preparation and Special Postage Payment Systems\*](#). Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone. Identical-weight permit imprint mail also may be mailed under [705](#).

[P700.1.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed single-piece mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required.

[P013.1.4]

## 2.0 Postage Paid With Permit Imprint

### 2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

### 2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except in the case of single-piece rate mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision.

[P040.5.1]

### 2.3 Postage Statement

A complete postage statement must accompany each mailing paid with permit imprint. [P700.1.2]

# 165 Mail Preparation

## Overview

### 1.0 Preparation for Bound Printed Matter

## 1.0 Preparation for Bound Printed Matter

### 1.1 Basic Preparation

There are no presort, sacking, or labeling standards for single-piece rate Bound Printed Matter. [M721.1.1]

### 1.2 Delivery and Return Addresses

All Bound Printed Matter must bear a delivery address. The delivery address on each article must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Except for unendorsed Bound Printed Matter, each piece must bear the sender's return address. [E710.3.1]

### 1.3 Basic Markings

The basic required Bound Printed Matter marking—“Bound Printed Matter” or “BPM”—must be printed on each piece. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 102.3.3, Package Services Indicators](#)):

- a. The service icon that will identify Bound Printed Matter will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the marking “BOUND PRINTED MATTER” must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text. [M012.3.1]

# 166 Deposit

## Overview

### [1.0 Deposit for Bound Printed Matter](#)

## 1.0 Deposit for Bound Printed Matter

### 1.1 **Single-Piece Rate Mailings**

Single-piece rate Bound Printed Matter must be deposited at a time and place specified by the postmaster or designee at the office of mailing. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0, \*Metered Mail Drop Shipment\*](#). Permit imprint mail must be presented at the post office under [604.6.0](#). [D700.2.1]

### 1.2 **Mailing Office**

Bound Printed Matter must be mailed at the post office from which the zone rate postage was computed, except under [1.3, \*Redirected Mailings\*](#), and [1.4, \*BMC Acceptance\*](#). [E710.2.1]

### 1.3 **Redirected Mailings**

A mailer who presents large mailings of zoned Bound Printed Matter mail may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original post office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage must be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage. [E710.2.2]

### 1.4 **BMC Acceptance**

A mailer may present zoned Bound Printed Matter at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent post office, or permit imprint postage is paid through an advance deposit account at the BMC parent post office or another post office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent post office.
- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry post office. [E710.2.3]

## **170 Retail Mail Media Mail**

173 Rates and Eligibility

174 Postage Payment Methods

175 Mail Preparation

176 Deposit

# 173 Rates and Eligibility

## Overview

- [1.0 Media Mail Rates and Fees](#)
- [2.0 Basic Eligibility Standards for Media Mail](#)
- [3.0 Content Standards](#)
- [4.0 Attachments and Enclosures](#)

## 1.0 Media Mail Rates and Fees

### 1.1 Rates

Media Mail rates are based on the weight of the piece without regard to zone. The single-piece rate applies to pieces not mailed at a 5-digit or basic rate. [E713.2.0]

### 1.2 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

### 1.3 Media Mail Rate Application

The Media Mail rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. (Rate application is identical for the single-piece and presort rates.) For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per piece is that for a piece weighing 1 pound. [P013.5.4]

### 1.4 Barcode Discount—Machinable Parcels

Barcoded Discount. The barcoded discount applies to Media Mail machinable parcels (see [101.3.2](#)) that are included in a mailing of at least 50 pieces of Media Mail. The pieces must bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0, \*Barcoding Standards for Parcels\*](#).

[E713.2.0d]

### 1.5 Media Mail Rates

For barcoded discount for single-piece rate, deduct \$0.03 per parcel (machinable parcels only, 50-piece minimum). See [Exhibit 1.5 \*Media Mail Rates\*](#). [R700.3.0]

173.1.5

### Exhibit 1.5 Media Mail Rates

| Weight Not Over (pounds) | Single-Piece <sup>1</sup> | Weight Not Over (pounds) | Single-Piece <sup>1</sup> |
|--------------------------|---------------------------|--------------------------|---------------------------|
| 1                        | \$1.42                    | 36                       | \$12.64                   |
| 2                        | 1.84                      | 37                       | 12.94                     |
| 3                        | 2.26                      | 38                       | 13.24                     |
| 4                        | 2.68                      | 39                       | 13.54                     |

1. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).

[R700.3.0]

**1.6 Computing Postage—Media Mail With Permit Imprint**

To compute the total postage for a mailing, for each weight increment multiply the number of pieces by the applicable rate per piece. [P013.9.1]

**1.7 Computing Postage—Media Mail With Postage Affixed**

For each piece, affix the postage for the weight increment as shown in [Exhibit 1.5](#). [P013.9.2]

**2.0 Basic Eligibility Standards for Media Mail****2.1 Service Objectives**

The USPS does not guarantee the delivery of Media Mail within a specified time. Media Mail might receive deferred service. The local post office can provide more information concerning delivery times within its area. [D700.1.0]

**2.2 Postal Inspection**

Media Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Media Mail rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

**2.3 Delivery and Return Addresses**

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

**3.0 Content Standards****3.1 General**

Mailable matter meeting one of the specific eligibility standards in [3.2](#), and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Media Mail. [E710.1.1]

**3.2 Qualified Items**

Only these items may be mailed at the Media Mail rates:

- a. Books, including books issued to supplement other books, of at least eight printed pages, consisting wholly of reading matter or scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books. Advertising includes paid advertising and the publishers' own advertising in display, classified, or editorial style.
- b. 16-millimeter or narrower width films, which must be positive prints in final form for viewing, and catalogs of such films of 24 pages or more (at least 22 of which are printed). Films and film catalogs sent to or from commercial theaters do not qualify for the Media Mail rate.
- c. Printed music, whether in bound or sheet form.

- d. Printed objective test materials and their accessories used by or on behalf of educational institutions to test ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark.
- e. Sound recordings, including incidental announcements of recordings and guides or scripts prepared solely for use with such recordings. Video recordings and player piano rolls are classified as sound recordings.
- f. Playscripts and manuscripts for books, periodicals, and music.
- g. Printed educational reference charts designed to instruct or train individuals for improving or developing their capabilities. Each chart must be a single printed sheet of information designed for educational reference. The information on the chart, which may be printed on one or both sides of the sheet, must be conveyed primarily by graphs, diagrams, tables, or other nonnarrative matter. An educational reference chart is normally but not necessarily devoted to one subject. A chart on which the information is conveyed primarily by textual matter in a narrative form does not qualify as a printed educational reference chart for mailing at the Media Mail rates even if it includes graphs, diagrams, or tables. Examples of qualifying charts include maps produced primarily for educational reference, tables of mathematical or scientific equations, noun declensions or verb conjugations used in the study of languages, periodic table of elements, botanical or zoological tables, and other tables used in the study of science.
- h. Loose-leaf pages and their binders consisting of medical information for distribution to doctors, hospitals, medical schools, and medical students.
- i. Computer-readable media containing prerecorded information and guides or scripts prepared solely for use with such media. [E713.1.1]

## 4.0 Attachments and Enclosures

### 4.1 Loose Enclosures

In addition to the enclosures and additions listed in 4.0, any printed matter that is mailable as Standard Mail may be included loose with any qualifying material mailed at the Media Mail rates. [E713.1.2]

### 4.2 Enclosures in Books

Enclosures in books mailed at Media Mail rates are subject to these additional standards:

- a. Either one envelope or one addressed postcard may be bound into the pages of a book. If also serving as an order form, the envelope or card may be in addition to the order form permitted by 4.2b.
- b. One order form may be bound into the pages of a book. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by 4.2a.

- c. Announcements of books may appear as book pages. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related or other materials or services. Announcements may fully describe the conditions and methods of ordering books and may contain ordering instructions for use with a separate order form. Up to three of these announcements may contain as part of their format a single order form, which may also serve as a postcard. The order forms permitted with these announcements are in addition to, and not in place of, order forms that may be enclosed under 4.2a or 4.2b. [E713.1.3]

#### 4.3 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

#### 4.4 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Media Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

173.4.5

### **4.5 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Media Mail piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Package Services rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

# 174 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for Media Mail](#)
- [2.0 Postage Paid With Permit Imprint](#)

## 1.0 Postage Payment Methods for Media Mail

### 1.1 Payment Method

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Media Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Identical-weight permit imprint mail also may be mailed under [705, \*Advanced Preparation and Special Postage Payment Systems\*](#). [P700.1.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed single-piece mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required. [P013.1.4]

## 2.0 Postage Paid With Permit Imprint

### 2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

### 2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except in the case of single-piece rate mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision. [P040.5.1]

### 2.3 Postage Statement

A complete postage statement must accompany each mailing paid with permit imprint. [P700.1.2]

# 175 Mail Preparation

## Overview

### 1.0 Preparation for Media Mail

## 1.0 Preparation for Media Mail

### 1.1 Basic Preparation

There are no presort, sacking, or labeling standards for single-piece Media Mail. [M730.1.1]

### 1.2 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

### 1.3 Basic Markings

The basic required marking—"Media Mail"—must be printed on each piece. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 102.3.3, Package Services Indicators](#)). The service icon that will identify Media Mail is a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label. [M012.3.1]

# 176 Deposit

**Overview**

[1.0 Deposit for Media Mail](#)

1.0 Deposit for Media Mail

1.1 **Single-Piece Rate Mailings**

Single-piece rate Media Mail must be deposited at a time and place specified by the postmaster or designee at the office of mailing. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0, Metered Mail Drop Shipment](#). Permit imprint mail must be presented at the post office under [604.6.0](#). [D700.2.1]

# 183 Rates and Eligibility

## Overview

- [1.0 Library Mail Rates and Fees](#)
- [2.0 Basic Eligibility Standards for Library Mail](#)
- [3.0 Sender, Recipient, and Content Standards](#)
- [4.0 Attachments and Enclosures](#)

## 1.0 Library Mail Rates and Fees

### 1.1 Rates

Library Mail rates are based on the weight of the piece without regard to zone. [E714.2.0]

### 1.2 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

### 1.3 Library Mail Rate Application

The Library Mail rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per addressed piece is that for an addressed piece weighing 1 pound. [P013.5.5]

### 1.4 Barcode Discount—Machinable Parcels

Barcoded Discount. The barcoded discount applies to Library Mail machinable parcels (see [101.3.2](#)) that are included in a mailing of at least 50 pieces of Library Mail. The pieces must bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0](#), *Barcoding Standards for Parcels*. [E714.2.0d]

### 1.5 Library Mail Rates

For barcoded discount for single-piece rate, deduct \$0.03 per parcel (machinable parcels only, 50-piece minimum). See [Exhibit 1.5 Library Mail Rates](#). [R700.4.0]

183.1.5

### Exhibit 1.5 Library Mail Rates

| Weight Not Over (pounds) | Single-Piece <sup>1</sup> | Weight Not Over (pounds) | Single-Piece <sup>1</sup> |
|--------------------------|---------------------------|--------------------------|---------------------------|
| 1                        | \$1.35                    | 36                       | \$12.16                   |
| 2                        | 1.75                      | 37                       | 12.45                     |
| 3                        | 2.15                      | 38                       | 12.74                     |
| 4                        | 2.55                      | 39                       | 13.03                     |

| 31                       | 10.71                     | 66                       | 20.86                     |
| 32                       | 11.00                     | 67                       | 21.15                     |
| 33                       | 11.29                     | 68                       | 21.44                     |
| 34                       | 11.58                     | 69                       | 21.73                     |
| 35                       | 11.87                     | 70                       | 22.02                     |

1. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).

[R700.4.0]

- 1.6 Computing Postage—Library Mail With Permit Imprint**  
To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. [P013.9.1]
- 1.7 Computing Postage—Library Mail With Postage Affixed**  
For each piece, affix the postage for the weight increment as shown in [Exhibit 1.5](#). [P013.9.2]
- 2.0 Basic Eligibility Standards for Library Mail**
- 2.1 Service Objectives**  
The USPS does not guarantee the delivery of Library Mail within a specified time. Library Mail might receive deferred service. The local post office can provide more information concerning delivery times within its area. [D700.1.0]
- 2.2 Postal Inspection**  
Library Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Library Mail rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]
- 2.3 Delivery and Return Addresses**  
All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.1.3]
- 3.0 Sender, Recipient, and Content Standards**
- 3.1 General**  
Mailable matter meeting one of the specific eligibility standards in [3.3](#) or [3.4](#), as applicable, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Library Mail. [E710.1.1]
- 3.2 Sender, Recipient, and Contents**  
Each piece must show in the address or return address the name of a school, college, university, public library, museum, or herbarium or the name of a nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organization or association. For Library Mail standards, these nonprofit organizations are defined in [703.1.0](#). Only the articles described in [3.3](#) and [3.4](#) may be mailed at the Library Mail rate. [E714.1.1]
- 3.3 Qualified Mailings Between Entities**  
The items described in this section may be mailed at the Library Mail rate when sent between: (1) schools, colleges, universities, public libraries, museums, and herbariums and nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, and fraternal organizations or associations; (2) any such institution, organization, or association and an individual who has no financial interest in the sale, promotion, or distribution of the materials; or (3) any such

183.3.4

institution, organization, or association and a publisher, if such institution, organization, or association has placed an order to buy such materials for delivery to itself:

- a. Books, consisting wholly of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising, except for incidental announcements of books.
- b. Printed music, whether in bound or sheet form.
- c. Bound volumes of academic theses, whether in typewritten or duplicated form.
- d. Periodicals, whether bound or unbound.
- e. Sound recordings.
- f. Other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.
- g. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials for informing and furthering the educational work and interests of museums and herbariums. [E714.1.2]

### **3.4 Qualified Mailings “To” or “From”**

The following specific items may be mailed at the Library Mail rate when sent to or from schools, colleges, universities, public libraries, museums, and herbariums and to or from nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organizations:

- a. 16-millimeter or narrower width films, filmstrips, transparencies, slides, and microfilms. All must be positive prints in final form for viewing.
- b. Sound recordings.
- c. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials intended for informing and furthering the educational work and interests of museums and herbariums.
- d. Scientific or mathematical kits, instruments, or other devices.
- e. Catalogs of the materials in 3.4a. through 3.4d and guides or scripts prepared solely for use with such materials. [E714.1.3]

## **4.0 Attachments and Enclosures**

### **4.1 Enclosures in Books and Sound Recordings**

Books and sound recordings mailed at the Library Mail rate may contain these enclosures as well as the additions and enclosures permitted under 4.3 through 4.5:

- a. Either one envelope or one addressed postcard. If also serving as an order form, the envelope or card may be in addition to the order form permitted by 4.1b.
- b. One order form. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by 4.1a.

- c. With books, announcements of books in book pages or as loose enclosures. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related materials or services. Announcements may fully describe the conditions and methods of ordering books (such as by membership in book clubs) and may contain ordering instructions for use with the single order form permitted in 4.1b.
- d. With sound recordings, announcements of sound recordings on title labels, on protective sleeves, on the carton or wrapper, or on loose enclosures. These announcements of sound recordings must be incidental and exclusively devoted to sound recordings. They may not contain extraneous advertising of recording-related materials or services. Announcements may fully describe the conditions and methods of ordering sound recordings (such as by membership in sound recording clubs) and may contain ordering instructions for use with the single order form permitted in 4.1b. [E714.1.4]

#### 4.2 Other Material

Material mailed at the Library Mail rate other than books and sound recordings may contain only those additions and enclosures permitted under 4.3 through 4.5. [E714.1.5]

#### 4.3 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

183.4.4

#### **4.4 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Library Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **4.5 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Library Mail piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Library Mail rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

# 184 Postage Payment Methods

## Overview

- [1.0 Postage Payment Methods for Library Mail](#)
- [2.0 Postage Paid With Permit Imprint](#)

## 1.0 Postage Payment Methods for Library Mail

### 1.1 Payment Method

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Library Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only under [705, \*Advanced Preparation and Special Postage Payment Systems\*](#). Identical-weight permit imprint mail also may be mailed under [705](#). [P700.1.1]

### 1.2 Affixing Postage—Single-Piece Rate Mailings

In a postage-affixed single-piece mailing, the mailer must affix to each piece a value in adhesive stamps or meter stamps equal to at least the postage required. [P013.1.4]

## 2.0 Postage Paid With Permit Imprint

### 2.1 Advance Deposit Account

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees and must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

### 2.2 Minimum Quantity

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except in the case of single-piece rate mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision. [P040.5.1]

### 2.3 Postage Statement

A complete postage statement must accompany each mailing paid with permit imprint. [P700.1.2]

# 185 Mail Preparation

## Overview

### 1.0 Preparation for Library Mail

## 1.0 Preparation for Library Mail

### 1.1 Basic Preparation

There are no presort, sacking, or labeling standards for single-piece Library Mail. [M740.1.1]

### 1.2 Delivery and Return Addresses

All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

### 1.3 Basic Markings

The basic required marking—"Library Mail"—must be printed on each piece. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 102.3.3, Package Services Indicators](#)). The service icon that will identify Library Mail is a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label. [M012.3.1]

# 186 Deposit

**Overview**

[1.0 Deposit for Library Mail](#)

## 1.0 Deposit for Library Mail

### 1.1 **Single-Piece Rate Mailings**

Single-piece rate Library Mail must be deposited at a time and place specified by the postmaster or designee at the office of mailing. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0, Metered Mail Drop Shipment](#). Permit imprint mail must be presented at the post office under [604.6.0](#). [D700.2.1]

201 Physical Standards

202 Elements on the Face of a Mailpiece

## 201 Physical Standards

### Overview

- [1.0 Physical Standards for Machinable Letters and Cards](#)
- [2.0 Physical Standards for Nonmachinable Letters](#)
- [3.0 Physical Standards for Automation Letters and Cards](#)

## 1.0 Physical Standards for Machinable Letters and Cards

### 1.1 Physical Standards for Machinable Letters

#### 1.1.1 Minimum and Maximum Size for Letters

Letter-size mail is:

- a. Not less than 5 inches long, 3-1/2 inches high, and 0.007-inch thick.
- b. Not more than 11-1/2 inches long, or more than 6-1/8 inches high, or greater than 1/4-inch thick. [C050.2.1]

#### 1.1.2 Weight Standards for Machinable Letters

Maximum weight limit for Presorted First-Class Mail machinable letters and Standard Mail machinable letters is 3.3 ounces (0.2063 pound). [C810.2.3]

#### 1.1.3 All Machinable Letters

All pieces of machinable First-Class Mail letters and Standard Mail machinable letters must not have any of the characteristics in [2.1, Criteria for Nonmachinable Letters](#). Each piece must bear a delivery address that includes the correct ZIP Code or ZIP+4 code. [E130.1.1]

### 1.2 Physical Standards for Cards Claimed at Card Rates

#### 1.2.1 Postcard Dimensions

Each card (i.e., each stamped card or postcard or each half of a double stamped card or postcard) claimed at a card rate must be:

- a. Rectangular.
- b. Not less than 3-1/2 inches high, 5 inches long, and 0.007 inch thick.
- c. Not more than 4-1/4 inches high, or more than 6 inches long, or greater than 0.016 inch thick. [C100.2.1]

#### 1.2.2 Other Cards

A card that does not meet the applicable standards in [1.2](#) must not bear the words "Postcard" or "Double Postcard." [C100.2.2]

#### 1.2.3 Paper or Cardstock

A card must be of uniform thickness and made of unfolded and uncreased paper or cardstock of approximately the quality and weight of a stamped card (i.e., a card available from the USPS). A card must be formed either of one piece of paper or cardstock or of two pieces of paper permanently and uniformly bonded together. The stock used for a card may be of any color or surface that permits the legible printing of the address, postmark, and any required markings. [C100.2.3]

#### 1.2.4 Acceptable Attachments

A card may bear an attachment that is:

- a. A paper label, such as a wafer seal or decal affixed with permanent adhesive to the back side of the card, or within the message area on the address side (see [1.2.6](#)), or to the left of the address block.
- b. A label affixed with permanent adhesive for showing the delivery or return address.
- c. A small reusable seal or decal prepared with pressure-sensitive and nonremovable adhesive that is intended to be removed from the first half of a double card and applied to the reply half. [C100.2.4]

#### 1.2.5 Unacceptable Attachment

A card may not bear an attachment that is:

- a. Other than paper.
- b. Not totally adhered to the card surface.
- c. An encumbrance to postal processing. [C100.2.5]

#### 1.2.6 Address Side of Cards

The address side of a card is the side bearing the delivery address and postage. The address side may be formatted to contain a message area. Cards that do not contain a message area on the address side are subject to the applicable standards for the rate claimed. For the purposes of [1.2](#), miscellaneous graphics or printing, such as symbols, logos, or characters, that appear on the address side of cards not containing a message area are generally acceptable provided the items are not intended to convey a message. Cards claimed at the Presorted or automation card rates that contain a message area on the address side must be divided vertically or horizontally and meet the following additional standards, as applicable:

- a. Vertically divided cards.
  1. The address side of the card must be divided into a right portion and a left portion, with or without a vertical rule. The left portion is the message area.
  2. The delivery address, postage, and any USPS marking or endorsement must appear in the right portion. The right portion must be at least 2-1/8 inches wide (measured from the right edge of the card, top to bottom inclusive).
  3. For cards claimed at the Presorted rate, nondelivery address information may extend into the right portion only above the address block and if the information is shaded or surrounded by a border that has at least 1/8 inch clearance between the delivery address block and the border. Mailers may choose not to shade or border the nondelivery address information if there is at least 1/8 inch of clear space around the delivery address block.
  4. For cards claimed at the automation rate, the standards for automation-compatible mail in [3.0](#), *Physical Standards for Automation Letters and Cards*, and [202.5.0](#), *Barcode Placement*, must be met.

- b. Horizontally divided cards.
  1. The address side of the card must be divided into an upper portion and a lower portion, with or without a horizontal rule. The portion of the address side that does not contain the delivery address is the message area.
  2. The delivery address, postage, and any USPS marking or endorsement must appear within the portion containing the delivery address. As an alternative, when the delivery address appears within the lower portion, it is permissible for the postage, return address, and any USPS marking or endorsement to appear in the upper portion. The portion bearing the delivery address must be at least 1-1/2 inches high (measured from the top or bottom edge of the card, as applicable, right edge to left edge inclusive).
  3. For cards claimed at the Presorted rate, nondelivery address information may extend into the portion containing the delivery address only if it appears above the address block and if the information is shaded or surrounded by a border that has at least 1/8 inch clearance between the delivery address block and the border. Mailers may choose not to shade or border the nondelivery address information if there is at least 1/8 inch of clear space around the delivery address block.
  4. For cards claimed at the automation rate, the standards for automation-compatible mail in [3.0, Physical Standards for Automation Letters and Cards](#), and [202.5.0, Barcode Placement](#), must be met.  
[C100.2.6]

### 1.2.7 Tearing Guides

A card may have perforations or tearing guides if they do not eliminate or interfere with any address element, postage, marking, or endorsement and do not impair the physical integrity of the card. [C100.2.8]

### 1.2.8 Double Cards

A double card (i.e., a double stamped card or double postcard) consists of two attached cards, one of which is designed to be detached by the recipient and returned by mail as a single card. Double cards are subject to these standards:

- a. The reply half of a double card must be used for reply only and may not be used to convey a message to the original addressee or to send statements of account. The reply half may be formatted for response purposes (e.g., contain blocks for completion by the addressee).
- b. A double card must be folded before mailing and prepared so that the address on the reply half is on the inside when the double card is originally mailed. The address side of the reply half may be prepared as business reply mail, courtesy reply mail, meter reply mail, or as a merchandise return service label.
- c. Plain stickers, seals, or a single wire stitch (staple) may be used to fasten the open edge at the top or bottom once the card is folded if affixed so that the inner surfaces of the cards can be readily examined. Fasteners must be affixed

201.1.2.9

according to the applicable preparation requirements for the rate claimed. Any sealing on the left and right sides of the cards, no matter the sealing process used, is not permitted.

- d. The first half of a double card must be detached when the reply half is mailed for return. [C100.2.9]

### 1.2.9 Enclosures in Double Cards

Enclosures in double postcards are prohibited at card rates. [C100.3.0]

## 2.0 Physical Standards for Nonmachinable Letters

### 2.1 Criteria for Nonmachinable Letters

A letter-size piece is nonmachinable if it has one or more of the following characteristics (see [601.1.3](#) to determine the length, height, top, and bottom of a mailpiece):

- a. Has an aspect ratio (length divided by height) of less than 1.3 or more than 2.5.
- b. Is polybagged, polywrapped, or enclosed in any plastic material.
- c. Has clasps, strings, buttons, or similar closure devices.
- d. Contains items such as pens, pencils, or loose keys or coins that cause the thickness of the mailpiece to be uneven (see [601.11.18](#), *Odd-Shaped Items in Paper Envelopes*).
- e. Is too rigid (does not bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch diameter turn).
- f. For pieces more than 4-1/4 inches high or 6 inches long, the thickness is less than 0.009 inch.
- g. Has a delivery address parallel to the shorter dimension of the mailpiece.
- h. Self-mailers with a folded edge perpendicular to the address if the piece is not folded and secured according to [3.14.2](#), *Folded Self-Mailer*.
- i. Booklet-type pieces with the bound edge (spine) along the shorter dimension of the piece or at the top, regardless of the use of tabs, wafer seals, or other fasteners. [C050.2.2]

### 2.2 Additional Criteria for First-Class Mail Nonmachinable Letters

#### 2.2.1 Nonmachinable Pieces

Letter-size pieces (except card rate pieces) that weigh 1 ounce or less and meet one or more of the nonmachinable characteristics in [2.1](#) are subject to the nonmachinable surcharge in [2.2.2](#). [C100.4.0]

#### 2.2.2 Nonmachinable Surcharge—Letter-Size Pieces

The nonmachinable surcharge in [233.1.16](#) applies to letter-size pieces that weigh 1 ounce or less and meet one of the following criteria:

- a. Meet one or more of the nonmachinable characteristics in [2.1](#). Pieces mailed at the card rate are not subject to the nonmachinable surcharge.

- b. For which the mailer chooses the manual only (“do not automate”) option. Pieces mailed at the card rate may choose this option but are not subject to the surcharge. [E130.3.3]

## 2.3 Additional Criteria for Standard Mail Nonmachinable Letters

### 2.3.1 Nonmachinable Surcharge Applied

The nonmachinable surcharge in [243.1.5](#) applies only to Regular and Nonprofit Standard Mail letter-size pieces (including card-size pieces), except for letter-size pieces prepared and entered as Customized MarketMail under [705.1.0](#), if the pieces weigh 3.3 ounces or less, are claimed at Presorted letter rates, and are subject to either of these conditions:

- a. The pieces have one or more of the nonmachinable characteristics for letter-size mail in [2.0](#).
- b. The pieces are labeled for manual processing by the mailer under the manual only option in [245.5.3](#). [C600.4.1]

### 2.3.2 Nonmachinable Surcharge Not Applied

The nonmachinable surcharge does not apply to Standard Mail pieces claimed at any nonletter rate. The surcharge also does not apply to Standard Mail letter-size pieces that are claimed at these letter rates:

- a. Automation rates.
- b. Enhanced Carrier Route rates.
- c. Presorted rates if the pieces are not subject to either of the two conditions in [2.3.1](#), or if the pieces are prepared and entered as Customized MarketMail under [705.1.0](#). [C600.4.2]

## 3.0 Physical Standards for Automation Letters and Cards

### 3.1 Basic Standards for Automation Letters

Letters and cards claimed at automation rates and at some Standard Mail Enhanced Carrier Route rates must meet the standards in [3.0](#). Pieces claimed at First-Class Mail automation card rates also must meet the standards in [1.2](#), *Physical Standards for Cards Claimed at Card Rates*. Unless prepared under [3.14.2](#) through [3.14.4](#) in *Self-mailers, Booklets, Postcards, and Heavy Letter Mail*, each mailpiece must be prepared either as a sealed envelope (the preferred method) or, if unenveloped, must be sealed or glued on all four sides. [C810.1.0]

### 3.2 Dimensions and Shape Standards for Automation Letters

Each letter-size piece must be rectangular and:

- a. For height, no more than 6-1/8 or less than 3-1/2 inches high.
- b. For length, no more than 11-1/2 or less than 5 inches long.
- c. For thickness, no more than 0.25 or less than
  1. 0.007 inch thick *if no more than 4-1/4 inches high and 6 inches long*; or

### 201.3.3

2. 0.009 inch thick *if more than 4-1/4 inches high or 6 inches long, or both.*  
[C810.2.1]

#### **3.3 Weight Standards for First-Class Mail Automation Letters and Cards**

Maximum weight limit for First-Class Mail automation (see [3.14.5, Heavy Letter Mail](#), for pieces heavier than 3 ounces) is 3.3 ounces (0.2063 pound). [C810.2.3a]

#### **3.4 Weight Standards for Standard Mail Automation Letters**

Maximum weight limit for Standard Mail mailed at automation, Enhanced Carrier Route high density, saturation, and automation carrier route pieces is 3.5 ounces (0.2183 pound) (see [3.14.5](#) for pieces heavier than 3 ounces). [C810.2.3c]

#### **3.5 Weight Standards for Periodicals Automation Letters**

Maximum weight limit for Periodicals automation letters (see [3.14.5](#) for pieces heavier than 3 ounces) is 3.3 ounces (0.2063 pound). [C810.2.3b]

#### **3.6 Aspect Ratio**

The aspect ratio (length of the mailpiece divided by height) must be between 1.3 and 2.5, inclusive. Length and height are defined in [601.1.3](#). [C810.2.2]

#### **3.7 Wraps and Closures**

An automation-compatible mailpiece may not be polywrapped, polybagged, or shrinkwrapped; have clasps, strings, buttons, or similar closure devices; or have protrusions that might impede or damage the mail or mail processing equipment. [C810.3.1]

#### **3.8 Staples and Saddle Stitching**

Staples or saddle stitching may be used only on booklet-type mailpieces to join the bound edge (spine). Inserted staples or stitching must parallel the bound edge, seat tightly and securely, and have no protrusions that might impede or damage the mail or mail processing equipment. [C810.3.2]

#### **3.9 Rigid and Odd-Shaped Items**

Rigid items (e.g., pens, pencils, keys, bottle caps) are prohibited within mailpieces. Reasonably flexible items (e.g., credit cards) are permitted. Subject to [3.11, Flexibility Standards for Automation Letters](#), odd-shaped items (e.g., coins and tokens) are permitted if firmly affixed to and wrapped within the contents of the mailpiece and envelope to streamline the shape of the mailpiece for automated processing. [C810.3.3]

#### **3.10 Tabs, Wafer Seals, Tape, and Glue**

Tabs, wafer seals, cellophane tape, or permanent glue (continuous or spot) may be used as applicable to the particular type of mailpiece under [3.14, Self-mailers, Booklets, Postcards, and Heavy Letter Mail](#), if the sealing devices do not interfere with the recognition of the barcode, rate marking, postage information, or delivery or return addresses. In all cases, additional tabs or seals may be used. Cellophane tape is not acceptable within the barcode clear zone. Tabs or wafer seals placed in the barcode clear zone must contain a paper face meeting the standards for background reflectance and, if the barcode is not preprinted by the mailer, the standards for acceptance of water-based ink. Tabs, wafer seals, and tape must

have a peel adhesion (shear strength) value of at least 15 ounces/inch at a speed of 12 inches/minute after application to a stainless steel plate; the test is to be conducted 10 minutes after the material is applied to the plate. [C810.4.0]

### **3.11 Flexibility Standards for Automation Letters**

#### **3.11.1 Machinability**

To ensure transport through automated mail processing machines, a mailpiece and its contents must bend easily when subjected to a transport belt tension of 40 pounds around an 11-inch-diameter drum. [C810.5.1]

#### **3.11.2 USPS Services for Flexibility Testing**

A mailer wanting to have mailpieces tested for flexibility must submit at least 50 sample pieces and a written request to USPS Engineering at least 6 weeks before the mailing date. The request must describe mailpiece contents and construction, number of pieces being produced, and preparation level (e.g., presort). Engineering advises the mailer by letter of its findings. If the mailpiece is approved, the letter includes a unique number identifying the piece tested and serves as evidence that the piece meets the relevant standards. A copy of the letter must be attached to each postage statement submitted for mailings of the approved piece. If requested by the USPS, the mailer must show that pieces presented for mailing are the same as those tested and approved. [C810.5.2]

### **3.12 Standards for Labels and Stickers Affixed to the Outside of an Envelope**

#### **3.12.1 Using Labels and Stickers**

Permanent labels and stickers (i.e., those designed not to be removed or relocated) must be affixed directly to the outside of the mailpiece with permanent adhesive. A mailer may provide recipients with relocatable labels to place on the outside of response pieces sent back to the mailer. On pieces mailed at First-Class card rates or at Periodicals rates, labels and stickers may be used only if permitted by the applicable standards. [C810.6.1]

#### **3.12.2 Pressure-Sensitive Label**

Any pressure-sensitive label or sticker affixed directly to a mailpiece before mailing must have a minimum peel adhesion to stainless steel of 8 ounces/inch. This standard does not apply to pressure-sensitive labels provided by the USPS to label bundles to sortation levels. [C810.6.2]

#### **3.12.3 “Sandwich” Label**

A face stock/liner label (“sandwich” label) is a two-part unit with a face stock (top label) attached to a liner (bottom label) affixed to the mailpiece. The face stock must have a peel adhesion value of at least 2 ounces/inch with respect to the liner label and at least 8 ounces/inch when reapplied to stainless steel. [C810.6.3]

### **3.13 Standards for Repositionable Notes**

#### **3.13.1 Using Repositionable Notes**

A repositionable note may be affixed directly to the address side of First-Class Mail and Standard Mail letter-size mailpieces that meet the standards in [3.13.2](#) through [3.13.6](#) in *Standards for Repositionable Notes*. The note is included as an integral

### 201.3.13.2

part of the mailpiece for weight and postage rate computation purposes. Repositionable notes must conform to any content restrictions applicable to the class of the host piece. [C810.7.1]

#### **3.13.2 General Standards for Mailpieces Using Repositionable Notes**

Each mailpiece must:

- a. Bear a valid delivery point barcode.
- b. Meet the requirements for automation-compatible mail under [3.0](#).
- c. Be eligible for and claim an automation letter rate.
- d. Be uniformly thick. [C810.7.2]

#### **3.13.3 Physical and Size Standards for Mailpieces Using Repositionable Notes**

Each mailpiece must be rectangular and have a surface smoothness of 195 Sheffield Units or smoother. The following standards also apply:

- a. *Enveloped mailpieces*. Each mailpiece prepared in an envelope must be constructed from a basis weight of 20 pounds or greater. Window envelopes must have a closed panel made of polystyrene or glassine. Each enveloped mailpiece is limited to the following dimensions:
  1. For height, no less than 4-1/8 inches and no more than 6 inches high.
  2. For length, no less than 8 inches and no more than 9-1/2 inches long.
  3. For thickness, no less than 0.02 inch and no more than 0.125 inch thick.
- b. *Oversize cards*. Each mailpiece prepared as an oversize card is limited to the following dimensions:
  1. For height, no less than 4-1/2 inches and no more than 6 inches high.
  2. For length, no less than 8-1/2 inches and no more than 9 inches long.
  3. For thickness, no less than 0.009 inch thick (cards 5-3/4 inches or more in height must be no less than 0.012 inch thick.) [C810.7.4]

#### **3.13.4 Content Standards for Mailpieces Using Repositionable Notes**

Allowable characteristics of contents of the host piece include:

- a. Paper.
- b. Credit cards or similar plastic cards. Such cards must be affixed to or tightly enclosed within the other contents. The position of the credit cards should alternate in adjacent mailpieces between left and right ends (or left, center, right) to keep the stack thickness consistent.
- c. Maximum insert shift is 7/8 inch. [C810.7.3]

#### **3.13.5 Physical Standards for Repositionable Notes**

Repositionable notes must:

- a. Measure 3 inches by 3 inches, plus or minus 1/8 inch for either dimension.
- b. Not contain phosphorescent or red fluorescent colorants.

- c. Be positioned parallel with the length of the piece, affixed by standard labeling equipment, and placed no closer than 3/8 inch from the left of the delivery address. Manually affixed notes are not permitted.
- d. Be at least 1/2 inch (plus or minus 1/8 inch) from the bottom and left edges of the mailpiece.
- e. Be adhered with a 3/4 inch (plus 1/4 inch or minus 1/16 inch) adhesive strip across the top portion on the reverse side of the note.
- f. Not be placed in a manner that interferes with the delivery address, and must not display a specific address or ZIP Code. References to general landmarks are permissible. The written and graphic characteristics of the notes are considered when determining eligibility of mailpieces mailed at the Standard Mail and Nonprofit Standard Mail rates. [C810.7.5]

### 3.13.6 Compliance for Repositionable Notes

Mailers must comply as follows:

- a. Repositionable notes must be obtained from an approved repositionable notes vendor (see [www.usps.com](http://www.usps.com) for a listing of approved vendors). Prospective vendors can obtain USPS standards and test procedures from USPS Engineering (see [608.8.1, Postal Service](#), for address). Testing must be performed by a certified independent laboratory.
- b. Mailers must present evidence at the time of mailing to show that their repositionable notes have been supplied by an approved vendor. The vendor name on the reverse of the note will be sufficient as evidence; in lieu of the vendor name printed on the notes, an invoice from the approved vendor for purchase of the repositionable notes will constitute such evidence.
- c. Each mailing must include, as part of the mailing, eight pieces addressed to the manager, USPS Engineering Letter Tech (Attn: RPN Sample), and eight pieces addressed to the manager, Product Management–Correspondence and Transactions (Attn: RPN Sample). See [608.8.1, Postal Service](#), for addresses. [C810.7.6]

## 3.14 Self-mailers, Booklets, Postcards, and Heavy Letter Mail

### 3.14.1 Paper Weights for Mailpieces Sealed on All Sides

An envelope or any mailpiece formed by an outer sheet or sheets sealed on all four edges must be prepared from paper with a minimum basis weight of 16 pounds (measured weight for 500 17- by 22-inch sheets). [C810.8.1]

### 3.14.2 Folded Self-Mailer

Except as noted in [3.14.2c](#), a folded self-mailer must be prepared with the folded edge parallel to the longest dimension and the address of the mailpiece. Based on the number of tabs used, these additional standards apply:

- a. With one tab or wafer seal, the folded edge must be at the bottom of the self-mailer. The tab or wafer seal must be placed in the middle of the top edge of the piece. If formed of a single folded sheet, the self-mailer must be prepared from paper with a minimum basis weight of 28 pounds (measured weight for 500 17- by 22-inch sheets) or 70 pounds (measured weight for 500 25- by

### 201.3.14.3

38-inch sheets). If formed of multiple folded sheets, the self-mailer must be prepared from paper with a minimum basis weight of 24 pounds (measured weight for 500 17- by 22-inch sheets) or 60 pounds (measured weight for 500 25- by 38-inch sheets).

- b. With two tabs or wafer seals, the folded edge may be at the top or bottom of the self-mailer. The two tabs or wafer seals must be placed on the open edge, opposite the folded edge. One tab or wafer seal must be placed within 1 inch of the left edge of the piece; the other, within 1 inch of the right edge of the piece. The whole tab need not be placed within 1 inch of the edge. The tabs must not obscure the FIM, postage, or required address information. The folded self-mailer must be prepared from paper with a minimum basis weight of 20 pounds (measured weight for 500 17- by 22-inch sheets).
- c. In specifically identified formats, a self-mailer may have the final fold on the right side (leading edge) of the piece. The left edge (trailing edge) and other open edges must be secured with at least one tab or a glue line. The number of tabs required is determined by the final trim size and paper basis weight of the piece. If the piece is 7 inches long or more, the piece must be sealed on the top and the bottom. In all cases, additional tabs, seals, or glue spots or glue lines may be used. Newsprint paper is acceptable if the basis weight of the paper meets the minimum standards in [3.14.2a](#) and the piece is certified by the USPS mailpiece design analyst to be acceptable for automated processing.

[C810.8.2]

#### **3.14.3 Booklets**

A booklet-type piece must meet these standards:

- a. The front and back covers must be prepared from paper with a minimum basis weight of 20 pounds (measured weight for 500 17- by 22-inch sheets).
- b. Except as noted in [3.14.3d](#), the bound edge (spine) must be the longest edge of the piece and at the bottom, parallel to the address.
- c. The unbound edge (top) must be secured with at least two tabs or wafer seals. One tab or wafer seal must be placed within 1 inch of the left edge of the piece; the second tab or seal, within 1 inch of the right edge of the piece. As an alternative, one tab or wafer seal must be placed within 1 inch from the top left side (trailing edge) of the piece; the second tab or seal, within 1 inch from the top right side (leading edge) of the piece.
- d. In specifically identified formats, prepared with a minimum paper basis weight of 24-pound bond paper, the spine may be on the shorter side (leading edge) of the piece. The address must still be parallel to the longest side of the piece. The unbound edges must be secured with at least two tabs or wafer seals. If the outside covers are prepared with a minimum paper basis weight of 20-pound bond or equivalent, the spine may be on the right side (leading edge) of the piece. The address must still be parallel to the longest side of the piece. The following restrictions apply:
  1. If the final trim size of the piece is no more than 4-1/4 inches high and no more than 6 inches long, the unbound left edges must be secured with at least one tab or wafer seal placed at the vertical center of the piece.

2. If the final trim size of the piece is more than 4-1/4 inches high or more than 6 inches long, the unbound left edge must be secured with two tabs or wafer seals placed within 1 inch of the top and bottom edges.  
[C810.8.3]

#### 3.14.4 Postcard

Any postcard must be prepared from paper stock meeting the industry standard for a basis weight of 75 pounds or greater, with none less than 71.25 pounds (measured weight for 500 25- by 38-inch sheets). The stock must be free from groundwood unless coated with a substance adding to the stock's ability to resist an applied bending force. A double postcard not prepared with all edges sealed must have the folded edge at the top or bottom, and the open edge parallel to the address must be secured with one tab (or other permitted closure) in the middle of the length. [C810.8.4]

#### 3.14.5 Heavy Letter Mail

Heavy letter mail (i.e., barcoded letter-size mail weighing more than 3 ounces) must have a barcode in the address block (see [202.5.0, Barcode Placement](#)) and must be prepared in a sealed envelope. Heavy letter mail may neither contain stiff enclosures nor be prepared as a self-mailer or booklet-type mailpiece. [C810.8.5]

### 3.15 Enclosed Reply Cards and Envelopes

#### 3.15.1 Basic Standard

All letter-size reply cards and envelopes (business reply mail (BRM), courtesy reply mail (CRM), and meter reply mail (MRM)) provided as enclosures in automation First-Class Mail, Periodicals, and Standard Mail and addressed for return to a domestic delivery address must meet the applicable standards for automation-compatible mail in [3.0](#). The mailer's signature on the postage statement certifies that this standard, and the standards listed below, have been met when the corresponding mail is presented to the USPS:

- a. Each reply piece must include the appropriate facing identification mark (FIM) under [1.2, Physical Standards for Cards Claimed at Card Rates](#).
- b. Each BRM piece must bear the correct BRM ZIP+4 barcode; each MRM and CRM piece must bear the correct barcode for the delivery address, subject to [202.5.0, Barcode Placement](#).
- c. Each BRM piece must meet any applicable standard under [507.8.0](#); each MRM piece must meet any applicable standard under [604.4.0, Postage Meters \(Postage Evidencing Systems\)](#), and [604.5.0, PC Postage](#); and each CRM piece as defined in [3.15.2](#) must meet the standards of this section. [C810.9.1]

#### 3.15.2 Courtesy Reply Mail (CRM)

For these standards, courtesy reply mail (CRM) is reply mail other than BRM or MRM enclosed in other mail, with or without prepayment of postage, for return to the address on the reply piece. If postage is required, the customer returning the piece affixes the applicable First-Class Mail postage. Each piece must meet the physical standards for mailability in [601](#) and [1.0](#) or [2.0](#). CRM has no additional required design standards unless enclosed in automation mail. [C810.9.2]

## 202 Elements on the Face of a Mailpiece

### Overview

- [1.0 All Mailpieces](#)
- [2.0 Address Placement](#)
- [3.0 Placement and Content of Mail Markings](#)
- [4.0 Endorsement Placement](#)
- [5.0 Barcode Placement](#)

### 1.0 All Mailpieces

#### 1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements. [A010.1.5]

#### 1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. (See [2.0](#) for address placement; see [602](#) for additional information regarding addressing.) [A010.1.1]

#### 1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail. [P011.1.1]

### 2.0 Address Placement

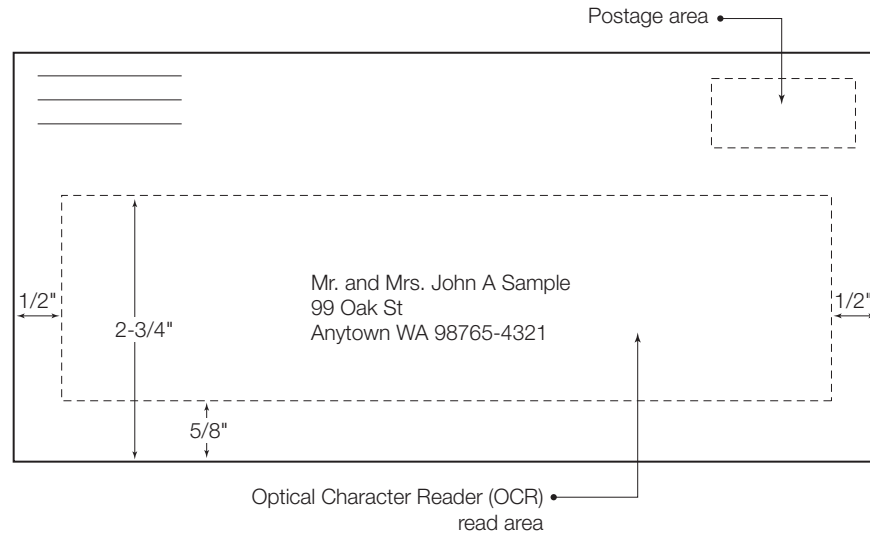

#### 2.1 Address Placement Causing Mail to be Nonmailable and Nonmachinable

The location of the delivery address on a letter-size mailpiece determines which dimensions are the length and height of the piece. The *length* is the dimension parallel to the address as read; the *height* is the dimension perpendicular to the length. Consequently, the placement of the address may render a piece nonmailable or nonmachinable. On a letter-size piece, the recommended address placement is within the optical character reader (OCR) read area, which is a space on the address side of the mailpiece defined by these boundaries (see [Exhibit 2.1, OCR Read Area](#)):

- a. Left: 1/2 inch from the left edge of the piece.
- b. Right: 1/2 inch from the right edge of the piece.
- c. Top: 2-3/4 inches from the bottom edge of the piece.
- d. Bottom: 5/8 inch from the bottom edge of the piece. [A010.1.4 and A010.1.3]

### Exhibit 2.1 OCR Read Area

[Exhibit A010.1.3]

## 3.0 Placement and Content of Mail Markings

### 3.1 Enclosures

Enclosures, attachments, and mixed rate mailpieces must be marked under the applicable standards in [703.9.0, \*Mixed Classes\*](#). [M012.1.2]

### 3.2 Printing and Designs

Required markings may be printed by a postage meter or other means that ensures a legible marking. A marking may not include or be part of a decorative design or advertisement. [M012.1.3]

### 3.3 Placement of Mail Markings

Markings must be placed as follows:

- a. **Basic Marking.** The basic required marking that indicates the class or subclass—"First-Class," "Presorted Standard" or "PRSRT STD," or "Nonprofit Organization" (or "Nonprofit Org." or "Nonprofit")—must be printed or produced as part of, or directly below or to the left of, the permit imprint indicia, meter stamp or impression, or adhesive or precanceled stamp.
- b. **Other Markings.** The rate-specific markings "AUTO," "AUTOOCR," "Presorted" (or "PRSRT"); "Single-Piece" (or "SNGLP") (First-Class Mail only); and "ECRLOT," "ECRWSH," "ECRWSS," and "Customized MarketMail" (or "CUST MKTMAIL" or "CMM") (Standard Mail only) may be placed as follows:
  1. In the location specified in [3.3a](#).

2. In the address area on the line directly above or two lines above the address if the marking appears alone or if no other information appears on the line with the marking except optional endorsement line information under [708.7.0](#) or carrier route bundle information under [708.6.0](#).
  3. If preceded by two asterisks (\*\*), the “AUTO,” “AUTOCR,” “PRESORTED” (or “PRSRT”), “CUSTOMIZED MARKETMAIL” (or “CUST MKTMAIL” or “CMM”), or “Single-Piece” (or “SNGLP”) marking also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage in an MLOCR ink-jet printed date correction/meter drop shipment line. Alternatively, the “AUTO,” “AUTOCR,” “PRSRT,” or “SNGLP” marking may be placed to the left of the barcode clear zone (subject to the standards in [5.0, Barcode Placement](#)) on letter-size pieces.
- c. Additional Requirements for Carrier Route. “AUTOCR,” “ECRLOT,” “ECRWSH,” and “ECRWSS” (Standard Mail only) must appear in their entirety wherever placed, except “ECR” may be placed in the postage area if “LOT,” “WSH,” or “WSS,” as applicable, is placed in the line above or two lines above the address, as specified in [3.3b](#). Pieces not mailed at ECR rates must not bear these markings. [M012.2.1]

### 3.4 Exceptions to Markings

Exceptions are as follows:

- a. Automation Letters: Non-carrier route First-Class Mail and Standard Mail letters do not require an “AUTO” marking if they bear a DPBC in the address block or on an insert visible through a window. Non-carrier route First-Class Mail letters not marked “AUTO” must bear both the “Presorted” or “PRSRT” and “First-Class” markings. Non-carrier route Standard Mail letters not marked “AUTO” must bear the appropriate basic marking in [3.3a](#).
- b. Manifest Mailings. The basic marking must appear in the postage area on each piece as required in [3.3a](#). The two-letter rate category code required in the keyline on manifest mailing pieces prepared under [705.2.0, Manifest Mailing System \(MMS\)](#), meets the requirement for other rate markings (e.g., on a First-Class piece mailed at automation carrier route rates, the “AC” code may replace the “AUTOCR” marking).
- c. MLOCR Prepared Automation Mailings. The basic marking must appear in the postage area on each piece as required in [3.3a](#). The other “AUTO” marking described in [3.3b](#) must be replaced by the appropriate identifier/rate code marking described in [705.5.0, First-Class or Standard Mail Mailings With Different Payment Methods](#), on those pieces that have the marking applied by an MLOCR. This seven-character marking provides a description of the Product Month Designator, MASS/FASTforward System Identifier, postage payment method, and the rate of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail. [M012.2.2]

### 3.5 Marking Hazardous Materials

All mailable hazardous materials must be labeled and/or marked as required in [601.10.0](#). [M012.1.1c]

202.4.1

### 4.0 Endorsement Placement

#### 4.1 **Endorsements for Delivery Instructions and ancillary Services**

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.3.4.4](#) or carrier release under [508.1.2](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.0](#), *Treatment of Mail*), subject to the corresponding standards for use and availability. [M012.4.1]

#### 4.2 **Return Address**

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number). [M012.4.2]

#### 4.3 **Placement of Endorsement**

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.
- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
  1. Directly below the return address.
  2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
  3. Directly to the left of the postage area and below or to the left of any rate marking.
  4. Directly below the postage area and below any rate marking. [M012.4.3]

#### 4.4 **Physical Standards for Endorsements**

The endorsement or, if combined, endorsements must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. This 1/4-inch clear space is not required for an endorsement that is applied with a multiline optical

character reader (MLOCR) inkjet and placed in the location directly below the postage area and any rate marking if the endorsement is clear and legible.

[M012.4.4]

## 5.0 Barcode Placement

### 5.1 Barcode Clear Zone

Each letter-size piece in an automation rate mailing or claimed at an Enhanced Carrier Route saturation or high density rate must have a barcode clear zone unless the piece bears a DPBC in the address block. The barcode clear zone and all printing and material in the clear zone must meet the reflectance standards in [708.4.3](#). The barcode clear zone is a rectangular area in the lower right corner of the address side of cards and letter-size pieces defined by these boundaries:

- a. Left: 4-3/4 inches from the right edge of the piece.
- b. Right: right edge of the piece.
- c. Top: 5/8 inch from the bottom edge of the piece.
- d. Bottom: bottom edge of the piece. [C840.2.1]

### 5.2 General Barcode Placement for Letters

Automation rate pieces and pieces claimed at an Enhanced Carrier Route saturation or high density rate that weigh 3 ounces or less may bear a DPBC either in the address block or in the barcode clear zone. Pieces that weigh more than 3 ounces must bear a DPBC in the address block. [C840.2.2]

### 5.3 Barcode on Mailpiece

Except as noted in [5.5, 5-Digit Barcode Placement in Clear Zone](#), for 5-digit barcodes, if the barcode is printed directly on the mailpiece in the lower right corner, the entire barcode must be within the barcode read area defined by these limits:

- a. Horizontally, the leftmost bar must be between 3-1/2 inches and 4-1/4 inches from the right edge of the piece.
- b. Vertically, the barcode must be within the area between 3/16 inch and 7/16 inch from the bottom edge of the piece; the bottom of the bars must be 1/4 inch  $\pm$  1/16 inch from the bottom edge of the piece. [C840.2.3]

### 5.4 5-Digit and ZIP+4 Barcode Permissibility

An automation rate letter-size piece may not bear a 5-digit or ZIP+4 barcode in the lower right corner (barcode clear zone); the piece may bear a 5-digit or ZIP+4 barcode in the address block only if a DPBC appears in the lower right corner. The ZIP+4 barcode may appear in the address block when printed on an insert that appears through a window or on an address label affixed directly to the piece; or it may appear in the lower right corner either printed directly on the mailpiece or on an insert that appears through a window. [C840.8.1]

### 5.5 5-Digit Barcode Placement in Clear Zone

Any 5-digit barcode must be located as specified in [5.4](#), except that, if placed in the barcode clear zone, the leftmost bar of the barcode must be between 4-1/8 and 4-1/4 inches from the right edge of the mailpiece. [C840.8.2]

202.5.6

### 5.6 DPBC Numeric Equivalent

In delivery point barcoded automation rate mailings only, the numbers corresponding to the POSTNET bars in a correct delivery point barcode (DPBC) may appear in the delivery address. If read from left to right, a correct DPBC numeric equivalent consists of five digits, a hyphen, and seven digits. [C840.9.0]

### 5.7 Barcode in Address Block

When the barcode is included as part of the address block:

- a. The barcode must be placed in one of these positions:
  1. Above the address line containing the recipient's name.
  2. Below the city, state, and ZIP Code line.
  3. Above or below the keyline information.
  4. Above or below the optional endorsement line.
- b. The printing of the barcode is prohibited anywhere between the address line containing the recipient's name and the city, state, and ZIP Code line.
- c. The minimum clearance between the barcode and any information line above or below it within the address block must be at least 1/25 inch, and the separation between the barcode and top line or bottom line of the address block must not exceed 5/8 inch. The clearance between the leftmost and rightmost bars and any adjacent printing must be at least 1/8 inch.
- d. If a window envelope is used, the clearance between the leftmost and rightmost bars and any printing or window edge must be at least 1/8 inch, and the clearance between the barcode and the top and bottom window edges must be at least 1/25 inch. These clearances must be maintained during the insert's range of movement in the envelope. Address block windows on heavy letter mail (as defined in [5.2, General Barcode Placement for Letters](#)) must be covered; such windows may be covered on other mail. Covers for address block windows are subject to [5.11](#).
- e. If an address label is used, a clear space of at least 1/8 inch must be left between the barcode and the left and right edges of the address label, and the clearance between the barcode and the top and bottom edges of the address label must be at least 1/25 inch.
- f. The rightmost bar must be at least 1/2 inch from the right edge of the mailpiece, and the leftmost bar must be less than 10-1/2 inches from the right edge of the mailpiece and at least 1/2 inch from the left edge of the mailpiece; the top of each bar must be less than 4 inches from the bottom edge of the mailpiece; and the bottom line of the address block, including the barcode, must be at least 5/8 inch from the bottom of the mailpiece. [C840.2.5]

### 5.8 Barcode on Insert

If the barcode is printed on an insert to appear through a window in the lower right corner of an envelope:

- a. The envelope and window must meet the physical standards in [5.9](#) through [5.11 in Barcode Placement](#).

- b. The entire barcode must be within the barcode clear zone (but need not be completely within the barcode read area).
- c. When the insert showing through the window is moved to any of its limits inside the envelope, the entire barcode must remain within the barcode clear zone, and a clear space must be maintained that is at least 1/8 inch between the barcode and the left and right edges of the window, at least 1/25 inch between the barcode and the top edge of the window, and at least 3/16 inch between the barcode and the bottom edge of the mailpiece. [C840.2.4]

**5.9 Edges of Barcode Window**

The edges of the barcode window must meet these criteria:

- a. Left: at least 4-3/4 inches from the right edge of the envelope.
- b. Right: at least 1/4 inch from the right edge of the envelope.
- c. Top: at least 5/8 inch from the bottom of the envelope.
- d. Bottom: form part of the bottom edge of the envelope. [C840.7.1]

**5.10 Window Construction**

A barcode window must extend fully to the bottom edge of the envelope, must be of wraparound construction, and must be covered subject to 5.11. [C840.7.2]

**5.11 Window Cover**

The window cover must be of a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in 708.4.3. The edges of the window cover must be securely glued to the envelope. [C840.7.3]

## **230 Discount Letters and Cards First-Class Mail**

233 Rates and Eligibility

234 Postage Payment and Documentation

235 Mail Preparation

236 Enter and Deposit

## 233 Rates and Eligibility

### Overview

- 1.0 Rates and Fees for First-Class Mail
- 2.0 Content Standards for First-Class Mail Letters
- 3.0 Basic Standards for First-Class Mail Letters
- 4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Letters
- 5.0 Additional Eligibility Standards for Automation Rate First-Class Mail (and Carrier Route) Letters
- 6.0 Eligibility Standards for Card Rate First-Class Mail

### 1.0 Rates and Fees for First-Class Mail

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Rate Computation for First-Class Mail Letters

First-Class rates are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. The minimum postage per addressed piece is that for a piece weighing 1 ounce. [P013.2.3]

#### 1.3 Nonautomation Presorted Cards

Cards meeting the standards in [201.1.2, Physical Standards for Cards Claimed at Card Rates](#): \$0.212 each. [R100.2.1]

#### 1.4 Nonautomation Presorted Letters

Letters, flats, and parcels; nonmachinable surcharge in [1.16](#) might apply:

| WEIGHT INCREMENT                         | RATE    |
|--|---------|
| First ounce or fraction of an ounce      |         |
| (For pieces weighing 2 ounces or less)   | \$0.352 |
| (For pieces weighing more than 2 ounces) | 0.311   |
| Each additional ounce or fraction        | 0.225   |

[R100.2.2]

#### 1.5 Mixed AADC Automation Cards

Cards meeting the standards in [201.1.2, Physical Standards for Cards Claimed at Card Rates](#): \$0.194 each. [R100.4.1]

233.1.6

### 1.6 Mixed AADC Automation Letters

Letter-size pieces:

| WEIGHT INCREMENT                         | RATE    |
|--|---------|
| First ounce or fraction of an ounce      |         |
| (For pieces weighing 2 ounces or less)   | \$0.309 |
| (For pieces weighing more than 2 ounces) | 0.268   |
| Each additional ounce or fraction        | 0.225   |

[R100.4.2]

### 1.7 AADC Automation Cards

Cards meeting the standards in [201.1.2, Physical Standards for Cards Claimed at Card Rates](#): \$0.187 each. [R100.5.1]

### 1.8 AADC Automation Letters

Letter-size pieces:

| WEIGHT INCREMENT                         | RATE    |
|--|---------|
| First ounce or fraction of an ounce      |         |
| (For pieces weighing 2 ounces or less)   | \$0.301 |
| (For pieces weighing more than 2 ounces) | 0.260   |
| Each additional ounce or fraction        | 0.225   |

[R100.5.2]

### 1.9 3-Digit Automation Cards

Cards meeting the standards in [201.1.2, Physical Standards for Cards Claimed at Card Rates](#): \$0.183 each. [R100.6.1]

### 1.10 3-Digit Automation Letters

Letter-size pieces:

| WEIGHT INCREMENT                         | RATE    |
|--|---------|
| First ounce or fraction of an ounce      |         |
| (For pieces weighing 2 ounces or less)   | \$0.292 |
| (For pieces weighing more than 2 ounces) | 0.251   |
| Each additional ounce or fraction        | 0.225   |

[R100.6.2]

### 1.11 5-Digit Automation Cards

Cards meeting the standards in [201.1.2, Physical Standards for Cards Claimed at Card Rates](#): \$0.176 each. [R100.7.1]

**1.12 5-Digit Automation Letters**

Letter-size pieces:

| <b>WEIGHT INCREMENT</b>                  | <b>RATE</b> |
|--|-------------|
| First ounce or fraction of an ounce      |             |
| (For pieces weighing 2 ounces or less)   | \$0.278     |
| (For pieces weighing more than 2 ounces) | 0.237       |
| Each additional ounce or fraction        | 0.225       |

[R100.7.2]

**1.13 Carrier Route Automation Cards**Cards meeting the standards in [201.1.2](#), *Physical Standards for Cards Claimed at Card Rates*: \$0.170 each. [R100.8.1]**1.14 Carrier Route Automation Letters**

Letter-size pieces:

| <b>WEIGHT INCREMENT</b>                  | <b>RATE</b> |
|--|-------------|
| First ounce or fraction of an ounce      |             |
| (For pieces weighing 2 ounces or less)   | \$0.275     |
| (For pieces weighing more than 2 ounces) | 0.234       |
| Each additional ounce or fraction        | 0.225       |

[R100.8.2]

233.1.15

### 1.15 Summary Presorted, Automation and Carrier Route Rates for Cards and Letters

| Weight Not Over (ounces) <sup>1</sup> | Nonautomation        | Automation |         |         |         |               |
|---------------------------------------|----------------------|------------|---------|---------|---------|---------------|
|                                       | Presorted            | Mixed AADC | AADC    | 3-Digit | 5-Digit | Carrier Route |
| 1                                     | \$0.352 <sup>2</sup> | \$0.309    | \$0.301 | \$0.292 | \$0.278 | \$0.275       |
| 2                                     | 0.577                | 0.534      | 0.526   | 0.517   | 0.503   | 0.500         |
| 3                                     | 0.761                | 0.718      | 0.710   | 0.701   | 0.687   | 0.684         |
| 3.3                                   | 0.986                | 0.943      | 0.935   | 0.926   | 0.912   | 0.909         |
| 4                                     | 0.986                | ---        | ---     | ---     | ---     | ---           |
| 5                                     | 1.211                | ---        | ---     | ---     | ---     | ---           |
| 6                                     | 1.436                | ---        | ---     | ---     | ---     | ---           |
| 7                                     | 1.661                | ---        | ---     | ---     | ---     | ---           |
| 8                                     | 1.886                | ---        | ---     | ---     | ---     | ---           |
| 9                                     | 2.111                | ---        | ---     | ---     | ---     | ---           |
| 10                                    | 2.336                | ---        | ---     | ---     | ---     | ---           |
| 11                                    | 2.561                | ---        | ---     | ---     | ---     | ---           |
| 12                                    | 2.786                | ---        | ---     | ---     | ---     | ---           |
| 13                                    | 3.011                | ---        | ---     | ---     | ---     | ---           |
| <b>Card Rate<sup>3</sup></b>          | \$0.212              | \$0.194    | \$0.187 | \$0.183 | \$0.176 | \$0.170       |

1. For each additional ounce, postage includes \$0.225 for presorted and automation rates. The rates include a \$0.041 discount for presorted and automation rate pieces weighing more than 2 ounces.

2. Letters weighing 1 oz. or less may be subject to a nonmachinable surcharge of \$0.055 per piece.

3. Rates shown apply to each single or double postcard when originally mailed; reply half of double postcard must bear postage at applicable rate when returned unless prepared as business reply mail.

[R100.9.1 and R100.9.2]

#### 1.16 Nonmachinable Surcharge

Surcharge per Presorted and automation rate piece (see [201.2.1, Criteria for Nonmachinable Letters](#), and [4.3, Nonmachinable Surcharge for Letter-Size Pieces](#)): \$0.055. [R100.12.0]

#### 1.17 Presort Mailing Fee

Presort mailing fee, per 12-month period, per office of mailing: \$150.00. [R100.13.1]

#### 1.18 Computing Postage for First-Class Mail

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in [1.19](#) and [1.2, Rate Computation for First-Class Mail Letters](#). For First-Class Mail, affix postage to each piece under [234.2.2, Affixed Postage for Presorted First-Class Mail](#), or, for permit imprint mailings, multiply the number of addressed pieces at each rate increment (and in each rate category, if applicable) by the corresponding postage rate, add the *unrounded* products, and round off the total postage to the nearest whole cent. [P013.6.0]

**1.19 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

**2.0 Content Standards for First-Class Mail Letters****2.1 General**

All mailable matter may be sent as First-Class Mail, except Customized MarketMail under 705.1.0 or other matter prohibited by the respective standards. [E110.1.1]

**2.2 Written or Typewritten Matter**

Matter wholly or partially in handwriting or typewriting must be mailed as First-Class Mail or Express Mail, except authorized additions to Periodicals, Standard Mail, and Package Services and written or typewritten matter in Library Mail and Media Mail, as permitted by the corresponding standards. [E110.1.2]

**2.3 Correspondence**

Matter that has the character of actual and personal correspondence must be mailed as First-Class Mail or Express Mail. [E110.1.4]

**2.4 Bills and Statements of Account**

Bills and statements of account must be mailed as First-Class Mail or Express Mail according to these definitions:

- a. A *bill* is a request for payment of a definite sum of money claimed to be owing by the addressee to the sender or a third party. The mere assertion of a debt in a definite sum combined with a demand for payment is sufficient to make the message a bill.
- b. A *statement of account* is the assertion of a debt in a definite amount owed by the addressee to the sender or a third party but does not necessarily contain a request or a demand for payment. The amount may be immediately due or may become due after a certain time or on demand or billing at a later date.
- c. A bill or statement of account must present enough details of a debt to inform the debtor of the amount the debtor must pay to acquit himself or herself of the debt. Neither a bill nor a statement of account need state the precise amount if the bill or statement contains enough information to enable the debtor to determine the exact amount of the claim asserted.
- d. A bill or statement of account does not lose that character just because the amount claimed is not, in fact, owing or may not be legally collectible. [E110.1.5]

**2.5 Examples of First-Class Mail**

These are examples of material that must be mailed at First-Class Mail or Express Mail rates:

### 233.2.6

- a. Handwritten or typewritten matter, including identical copies prepared by automatic typewriter and manifold or carbon copies of this matter. Handwritten or typewritten matter does not include all matter produced by computers, but computer-prepared material is subject to First-Class postage if it has the character of actual and personal correspondence.
- b. Autograph albums containing writing.
- c. Notebooks or blank books containing written or typewritten entries or stenographic or shorthand notes.
- d. Blank printed forms filled out in writing, such as notices, certificates, and checks, either canceled or uncanceled.
- e. Printed price lists containing written figures changing individual items.
- f. Printed cards or letters bearing a written date, where the date is not the date of the card but gives information about when something is to occur or has occurred.
- g. Any matter marked "Postcard" or "Double Postcard." [E110.1.6]

#### **2.6 Postal Inspection**

Matter closed against postal inspection includes First-Class Mail and Express Mail. The USPS may open mail other than First-Class Mail or Express Mail to determine whether the proper rate of postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail or Express Mail rate. [E110.1.3]

#### **2.7 Prohibited Air Transportation**

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#). [E110.2.0]

### 3.0 Basic Standards for First-Class Mail Letters

#### **3.1 Basic Standards for First-Class Mail**

All pieces of First-Class Mail must:

- a. Meet the basic standards for First-Class Mail in [2.0, Content Standards for First-Class Mail Letters](#).
- b. Weigh 13 ounces or less.
- c. Meet the applicable standards in [234, Postage Payment and Documentation](#), and [1.0, Rates and Fees for First-Class Mail](#).
- d. Be part of a single mailing of at least 500 pieces of Presorted First-Class Mail.
- e. Meet the applicable physical standards in:
  1. [201.1.0, Physical Standards for Machinable Letters and Cards](#).
  2. [201.2.0, Physical Standards for Nonmachinable Letters](#).
  3. [201.3.0, Physical Standards for Automation Letters and Cards](#).

- f. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The Move Update standard in [3.3](#).
  2. The ZIP Code accuracy standard in [3.4](#).
  3. If an alternative addressing format is used, the additional standards in [602.3.0](#). [E130.1.1 and E130.3.1]

### 3.2 Presort Mailing Fee

A First-Class Mail presort mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail rates. Payment of one fee allows a mailer to enter mail at all those rates. Persons or organizations paying this fee may enter mail of their clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [E110.4.1]

### 3.3 Move Update Standards

#### 3.3.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, *address* means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

- a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 185 days before the mailing date, with one of the USPS-approved methods in [3.3.2](#).
- b. Each individual address in the mailing is subject to the Move Update standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is updated with an approved method (e.g., Address Change Service), the same address may be used during the following 185 days and meets the Move Update standard. [A030.1.1]
- d. Except for mail bearing an alternative address format, addresses used on pieces claiming First-Class Mail Presorted rates, regardless of any required surcharge, must meet the Move Update standard. [A030.1.2 and A0301.3]

#### 3.3.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

- a. Address Change Service (ACS).
- b. [\[02-03-05\]](#) National Change of Address Linkage System (NCOA<sup>Link</sup>).
- c. *FASTforward* Mailing List Correction (MLC).
- d. *FASTforward* MLOCR processes if used each time before mail entry. If a mailpiece that initially uses *FASTforward* MLOCR processing is rejected and then entered into a Direct View Encoding Desk (DVED) operation (or similar system), the piece does not meet the Move Update standard. The name and

### 233.3.3.3

address information on the piece must then be processed through a *FASTforward* RVE system to meet the Move Update standard. *FASTforward* RVE processes also meet the Move Update standard if used each time before mail entry.

- e. Mailer Move Update Process Certification and USPS-approved alternative methods for mailers with legitimate restrictions on incorporating USPS-supplied change-of-address information into their mailing lists. The National Customer Support Center (see [608.8.1](#) for address) administers and approves both Mailer Move Update Process Certification and alternative methods.
- f. Ancillary service endorsements under [507.1.5.1, First-Class Mail and Priority Mail](#), except “Forwarding Service Requested.” [A030.1.4]

#### **3.3.3 Mailer Certification**

The mailer’s signature on the postage statement certifies that the Move Update standard has been met for each address in the corresponding mailing presented to the USPS. [A030.1.5]

### **3.4 ZIP Code Accuracy**

#### **3.4.1 Basic Standards**

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.4.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.4.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming First-Class Mail rates, regardless of any required surcharges, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

#### **3.4.2 USPS-Approved Methods**

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer’s computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:

1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
3. Any mailing list service in [507.6.0](#).
4. An authorized service provider.
5. CASS-certified matching software.
6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

### 3.4.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

## 4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Letters

### 4.1 Additional Standards for Machinable First-Class Mail

In addition to the standards in [3.0](#), *Basic Standards for First-Class Mail Letters*, all pieces in a First-Class Mail Presorted rate mailing must be marked, sorted, and documented as specified in [235.5.0](#), *Preparation for Nonautomation Letters*. [E130.3.1]

### 4.2 Barcodes

Any POSTNET barcode on a mailpiece in a nonautomation First-Class mailing must be correct for the delivery address and meet the standards in [202.5.0](#), *Barcode Placement*, and [708.3.0](#), *Coding Accuracy Support System (CASS)*. [E130.1.2]

### 4.3 Nonmachinable Surcharge for Letter-Size Pieces

The nonmachinable surcharge in [1.16](#) applies to letter-size pieces that weigh 1 ounce or less and meet one of the following criteria:

- a. Meet one or more of the nonmachinable characteristics in [201.2.1](#). Pieces mailed at the card rate are not subject to the nonmachinable surcharge.
- b. For which the mailer chooses the manual only ("do not automate") option. Pieces mailed at the card rate may choose this option but are not subject to the surcharge. [E130.3.3]

## 5.0 Additional Eligibility Standards for Automation Rate First-Class Mail (and Carrier Route) Letters

### 5.1 Basic Standards for Automation First-Class Mail

All pieces in a First-Class Mail automation rate mailing must:

- a. Meet the basic standards for First-Class Mail in [3.0](#).

### 233.5.2

- b. Be part of a single mailing of at least 500 pieces of automation rate First-Class Mail.
- c. Meet the physical standards in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  - 1. The address matching and coding standards in [5.6, \*Address Standards for Barcoded Pieces\*](#), and [708.3.0, \*Coding Accuracy Support System \(CASS\)\*](#).
  - 2. If the automation carrier route rate for letter-size mail is claimed, the additional carrier route accuracy standard in [5.2](#).
- e. Bear an accurate barcode meeting the standards in [202.5.0, \*Barcode Placement\*](#), either a DPBC (if a card or letter) or a ZIP+4 barcode or DPBC (if a flat), either on the piece or on an insert showing through a barcode window.
- f. Be marked, sorted, and documented as specified in [235.6.0, \*Preparation for Automation Rate Letters\*](#), for letters and cards. [E140.1.1]

## 5.2 Carrier Route Accuracy

### 5.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain rates under [5.2.2](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [5.2.4](#). For the First-Class Mail automation carrier route rate, USPS City State Product information must also be updated within 90 days before the mailing date.
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]

### 5.2.2 Mail Classes and Rates

Except as provided in [5.2.3](#), addresses used on pieces claiming automation carrier route rates for First-Class Mail, regardless of any required surcharges, must meet the carrier route accuracy standard. [A030.3.2]

**5.2.3 Exception**

The carrier route accuracy standard does not apply to mail of any class bearing a simplified address format under [602.3.0, Use of Alternative Addressing](#). [A030.3.3]

**5.2.4 USPS-Approved Methods**

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#). [A030.3.4]

**5.2.5 Mailer Certification**

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

**5.3 Maximum Weight for Automation Letters**

Maximum weight limit for First-Class Automation (see [201.3.14.5, Heavy Letter Mail](#), for pieces heavier than 3 ounces) mail is 3.3 ounces (0.2063 pound). [C810.2.3]

**5.4 Rate Application – Automation Cards and Letters**

Automation rates apply to each piece that is sorted under [235.6.0](#) into the corresponding qualifying groups:

- a. Pieces in full carrier route trays, in carrier route groups of 10 or more pieces each placed in 5-digit carrier routes trays, or in carrier route bundles of 10 or more pieces each placed in 3-digit carrier routes trays qualify for the carrier route rate. Preparation to qualify for the carrier route rate is optional and need not be done for all carrier routes in a 5-digit area.
- b. Groups of 150 or more pieces in 5-digit or 5-digit scheme trays qualify for the 5-digit rate. Preparation to qualify for the 5-digit rate is optional and need not be done for all 5-digit or 5-digit scheme destinations.
- c. Groups of 150 or more pieces in 3-digit or 3-digit scheme trays qualify for the 3-digit rate.
- d. Groups of fewer than 150 pieces in origin 3-digit or origin 3-digit scheme trays and all pieces in AADC trays qualify for the AADC rate.
- e. All pieces in mixed AADC trays qualify for the mixed AADC rate. [E140.2.0]

**5.5 Carrier Route Rate for Automation First-Class Mail**

The automation carrier route rate is available only for letter-size mail and only for those 5-digit ZIP Code areas identified with an "A" or "B" in the Carrier Route Indicators field in the USPS City State Product used for address coding. [E140.1.3]

**5.6 Address Standards for Barcoded Pieces****5.6.1 Basic Address Standards for Barcodes**

To qualify for automation rates, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not

### 233.5.6.2

required. Any barcode that appears on a mailpiece claimed at an automation rate must be the correct barcode for the corresponding delivery address on the piece.

[A800.1.1]

#### **5.6.2 Numeric ZIP+4**

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

[A800.1.2]

#### **5.6.3 Numeric Delivery Point Barcode (DPBC)**

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [202.5.6](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A800.1.3]

#### **5.6.4 Address Elements**

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product. [A800.2.2]

#### **5.6.5 Firm Name**

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used. [A800.2.1]

#### **5.6.6 Secondary Designator**

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used. [A800.2.3]

#### **5.6.7 Rural and Highway Contract Routes**

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line. [A800.2.4]

**5.6.8 P.O. Box**

A post office box address must contain a post office box number that can be exactly matched with the USPS ZIP+4 Product in effect. [A800.2.5]

**5.7 Reply Cards and Envelopes Enclosed in Automation Rate First-Class Mail**

All letter-size reply cards and envelopes provided as enclosures in automation First-Class Mail and addressed for return to a domestic delivery address must meet the standards in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#), for enclosed reply cards and envelopes. The mailer must certify that this standard has been met when the corresponding mail is presented to the USPS. [E140.1.4]

**6.0 Eligibility Standards for Card Rate First-Class Mail****6.1 Card Rate**

A card may be a single or double (reply) stamped card or a single or double postcard. Stamped cards are available from the Postal Service with postage imprinted on them. Postcards are commercially available or privately printed mailing cards. To be eligible for a card rate, a card and each half of a double card must meet the physical standards in [201.1.2](#) and the applicable eligibility and preparation standards for the rate claimed. Ineligible cards are subject to letter-size rates. Cards may be prepared and mailed at the First-Class Mail single-piece card rate, Presorted card rate, or automation card rates. [E110.3.0]

**6.2 Cards and Letters**

Pieces claimed at card rates and pieces claimed at letter rates are subject to separate minimum volume criteria, but may be combined in the same mailing and reported on the same postage statement. [E130.3.2]

## 234 Postage Payment and Documentation

### Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted Letters](#)
- [3.0 Postage Payment for Automation Letters](#)
- [4.0 Mailing Documentation](#)

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

Postage for discount (Presorted or automation) rate -First-Class Mail must be paid with affixed postage ([604.1.0](#) for stamps, [604.3.0](#) for precanceled stamps, or [604.4.0](#) for metered postage) or permit imprint ([604.6.0](#)) as specified in [2.0, Postage Payment for Presorted Letters](#), and [3.0, Postage Payment for Automation Letters](#). A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters. [P100.1.1]

### 2.0 Postage Payment for Presorted Letters

#### 2.1 Payment Methods for Presorted Rates

Presorted First-Class Mail rate postage must be paid with meter stamps under [604.4.0](#), permit imprints under [604.6.0](#), or precanceled postage under [604.3.0](#), subject to the corresponding standards for these methods. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. [P100.4.1]

#### 2.2 Affixed Postage for Presorted First-Class Mail

Unless permitted by other standards or by Business Mailer Support, USPS Headquarters, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. The full postage at the First-Class Mail rate for which it qualifies (no postage documentation is required).
- b. A precanceled stamp or the full postage at the lowest First-Class first-ounce rate applicable to the mailing job, and full postage on metered pieces for any additional ounce(s) or nonmachinable surcharge; postage documentation may be required by standard.
- c. Postage in an amount not less than the lowest available First-Class first-ounce letter or card rate (as applicable) in the mailing job if authorized by Business Mailer Support, plus full postage on metered pieces for any extra ounce(s); postage documentation may be required by standard. [P100.4.2]

### **2.3 Additional Postage**

Additional postage for pieces not bearing sufficient postage when presented to the USPS must be paid before acceptance either using an advance deposit account or with a meter stamp affixed to the postage statement accompanying the mail. When the amount of postage affixed is subject to Business Mailer Support authorization under [2.2c](#), credit is not given for postage affixed in excess of the authorized amount. [P100.4.3]

## **3.0 Postage Payment for Automation Letters**

### **3.1 Payment Methods for Automation Rates**

First-Class Mail automation rate postage must be paid with meter stamps, permit imprints, or precanceled stamps. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. Permit imprints may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support. [P100.5.1]

### **3.2 Affixing Postage for Automation Rate First-Class Mail**

Unless permitted by other standards or Business Mailer Support authorization, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. Each metered piece weighing more than 1 ounce must bear the correct additional postage to pay for the additional ounce(s).
- b. Each piece must bear a precanceled stamp or meter postage in the exact amount or at the lowest rate applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing with an advance deposit account or with a meter stamp affixed to the required postage statement.
- c. Documentation meeting the standards in [4.0, Mailing Documentation](#), must be presented with the postage statement to show the number of pieces at each rate and the computation of the additional postage due for pieces not bearing full postage at the applicable rate (i.e., the difference between what the pieces bear and the correct postage at the rate for which each qualifies). [P100.5.2]

### **3.3 Nondenominated Precanceled Stamps**

A mailer may use available nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each rate and the computation of the additional postage due at the applicable rate (i.e., the difference between the value of the nondenominated stamp affixed and the correct postage at the rate for which each piece qualifies). [P100.5.3]

**3.4 Lower Denomination Precanceled Stamps**

A mailer may use precanceled stamps of a denomination less than the postage for the first ounce at the lowest rate in the mailing if:

- a. The stamps do not bear an improper rate marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each rate and the computation of the additional postage due at the applicable rate (i.e., the difference between the value of the stamps affixed and the correct postage at the rate for which each piece qualifies). [P100.5.4]

**3.5 Postage Affixed at Lowest Rate to All Pieces**

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage rate to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest rate affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest rate affixed to any piece in the mailing and the rate for each rate level in the mailing. This computation must be documented to meet the basic standards in [4.0, Mailing Documentation](#). No refund is paid for any piece where postage is affixed at a rate higher than the lowest rate claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement. [P100.5.5]

**4.0 Mailing Documentation****4.1 Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

**4.2 Basic Documentation Standards**

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

#### 4.3 Documentation Standards for Automation Mailings

A complete postage statement must accompany each mailing. Each mailing also must be accompanied by presort and rate documentation produced by PAVE-certified or MAC-certified software or by standardized documentation.

*Exception:* For mailings of fewer than 10,000 pieces, presort and rate documentation is not required if postage at the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. First-Class Mail mailings prepared under the value added refund procedures or as combined mailings must meet additional standardized documentation requirements under [604.10.0, Refunds and Exchanges](#), and [705.5.0, First-Class or Standard Mail Mailings With Different Payment Methods](#). [M810.1.3]

#### 4.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### 4.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### 4.6 Standard Format for Documentation

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation.

Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### 4.7 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0, Rulings on Mailing Standards](#). [P012.1.5]

#### 4.8 Reporting Multiple Mailings on One Statement

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

**4.9 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

## 235 Mail Preparation

### Overview

- [1.0 General Definition of Terms](#)
- [2.0 Bundles](#)
- [3.0 Letter Trays](#)
- [4.0 Tray Labels](#)
- [5.0 Preparation for Nonautomation Letters](#)
- [6.0 Preparation for Automation Rate Letters](#)

### 1.0 General Definition of Terms

#### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. [M011.1.1]

#### 1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, automation carrier route, and nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. First-Class Mail. Cards and letters must be prepared as separate mailings except that they may be sorted together if each meets separate minimum volume requirements. The types of First-Class Mail listed below must not be part of the same mailing despite being in the same processing category:
  1. Automation rate and any other type of mail.
  2. Presorted rate and any other type of mail.
  3. Single-piece rate and any other type of mail.
  4. Machinable and nonmachinable pieces. [M011.1.4]

#### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.

- c. *5-digit scheme (trays) for automation letters*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in the USPS City State Product.
- d. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- e. *Unique 3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits, and that the 3-digit prefix is so identified in [L002](#), Column A.
- f. *3-digit scheme*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L003](#).
- g. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- h. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- i. *ADC/AADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) or automated area distribution center (AADC) (see [L004](#) or [L801](#)).
- j. *Mixed [ADC, AADC, etc.]*: the pieces are for delivery in the service area of more than one ADC, AADC, etc.
- k. *Residual pieces/bundles/sacks* contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full* letter tray is one in which faced, upright pieces fill the length of the tray between 75% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the rate claimed.

- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the rate claimed.
- e. A *5-digit scheme sort for automation letters* yields 5-digit scheme trays for those 5-digit ZIP Codes identified in the USPS City State Product and 5-digit trays for other areas. Mail prepared using 5-digit scheme sort must be entered no later than 90 days after the release date of the City State Product used to obtain the scheme information (see [708.3.0, Coding Accuracy Support System \(CASS\)](#)). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Trays prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is *always* optional, including when 5-digit sortation is required for rate eligibility; need not be used for all 5-digit ZIP Codes that are part of a scheme; and is available only for automation rate letter-size First-Class Mail.
- f. A *3-digit scheme sort* yields 3-digit scheme trays for those 3-digit ZIP Code prefixes listed in [L003](#) and 3-digit trays for other areas. The 3-digit ZIP Code prefixes in each scheme are treated as a single presort destination subject to a single minimum tray volume, with no further separation by 3-digit prefix required. Trays prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit areas are still considered 3-digit scheme sorted and are labeled accordingly. The 3-digit scheme sort is required for automation rate letter-size First-Class Mail.
- g. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray must be prepared for each.
- h. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- i. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.

- j. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer's location, the post office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- k. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- l. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term bundle does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [2.0, Bundles](#).
- m. A *tic mark* is defined as a solid black rectangle that must be printed on both the front side (extending over the top) and back side (flap side) of the envelope. Tic marks may be used in lieu of separator cards for First-Class Mail automation mailings. Tic marks must be printed on the top edge of the first mailpiece in each carrier route grouping during the mailpiece production process and must meet the following specifications:
  - 1. Color: black.
  - 2. Reflectance and Contrast Ratio: The tic mark must meet the reflectance and contrast ratio specifications in [708.4.3, Reflectance](#).
  - 3. Location: The tic mark must extend along the top edge of the envelope, to the left of center line of the envelope. Its location must be referenced to the center line. The right edge of the tic mark must be 0.5 inch (+ 0.125 inch) from the center line of the envelope.
  - 4. Size: The width of the tic mark must be 0.5 inch (+ 0.125 inch). The tic mark must extend over the top of the envelope, down each side a distance of 0.25 inch (+ 0.125 inch). When a second tic mark is used to indicate a tray break at the end of the tray, all specifications are the same as for one tick mark, except for the location on the envelope. When a second tic mark is used on the last piece in a tray to indicate a tray break, the right edge of the second tic mark must be 0.5 inch (+ 0.125 inch) from the left edge of the first tic mark.
- n. A "*logical*" *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container due to applicable preparation requirements or the size of the individual pieces as described in [2.3](#). [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles

Cards and letter-size pieces are subject to these bundling standards:

- a. The maximum thickness for bundles of carrier route rate mail is 4 inches. The maximum thickness for other bundles is 6 inches.
- b. Mailings consisting entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch) must always be prepared in bundles.
- c. Bundles must be prepared for mail in all less-than-full trays and 3-digit carrier routes trays; for nonmachinable Presorted First-Class Mail; and for First-Class Mail pieces where the mailer has requested “manual only” processing.
- d. Separator cards or tic marks *must* be used instead of bundling for letter-size pieces in full 5-digit trays of automation carrier route First-Class Mail. The cards must be of paper or card stock, at least 0.25 inch higher than the highest pieces in the mailing, and in front of the corresponding groups of mail. The tic mark must be applied during the mailpiece production process and be printed on the top edge of the envelope, to the left of the center line of the envelope. Each tic mark must have its location referenced to the center line. The right edge of the tic mark must be 0.5 inch (+ 0.125 inch) from the center line of the envelope. The width of the tic mark must be 0.5 inch (+ 0.125 inch). The tic mark must extend over the top of the envelope, down each side a distance of 0.25 inch (+ 0.125 inch). In trays of tic-marked mail, all mailpieces must be the same dimension so that the tic marks are visible.
- e. For mailings consisting entirely of card-size pieces and mail in less-than-full trays, bundles must be secured with rubber bands, elastic strapping, flat plastic strapping, or string. (Elastic strapping must have a minimum strength of 15 pounds and a minimum of 150% elongation before breaking. Minimum tension, when applied to the bundle, must be 50% breaking strength. Elastic strapping may not be used unless approved by USPS Engineering. If requested, the mailer must be able to show such approval for the strapping material used for a mailing.)

235.2.4

- f. Bundles up to 1 inch thick must be secured with appropriate banding placed once around the girth (narrow dimension). Bundles over 1 inch thick must be secured with at least two bands, one around the length and one around the girth. [M020.2.1]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [2.3f, Preparing Bundles](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.5 Exception to Bundle Preparation—Full Single-Sort-Level Trays

In bundle-based mailings not entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch), mail need not be prepared in 5-digit bundles if placed in a full 5-digit tray. Similarly, mail need not be prepared in other levels of bundles when it will be placed in a full tray to the corresponding tray level, and none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if, when correctly sorted, it would have all been prepared in ADC bundles to the same destination; conversely, this exception would not apply if some pieces would require preparation in 5-digit or 3-digit bundles.

[M020.1.9]

### 2.6 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder).

[M020.2.3]

**2.7 Bundles With Fewer Than the Minimum Number of Pieces Required**

An individual bundle may be prepared with fewer than the minimum number of pieces required if the pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

**2.8 Labeling Bundles**

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels.

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

**2.9 Use of Optional Endorsement Lines (OEL)**

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under 708.7.0. [M013.1.1]

**2.10 Use of Carrier Route Information Lines**

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under 2.0, *Bundles*, optional endorsement lines under 708.7.0, or carrier route information lines under 708.6.0. These standards apply to automation carrier route First-Class Mail. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

**2.11 Facing Slips—All Carrier Route Mail**

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content, followed by carrier route type and route number (e.g., “FCM LTRS CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

**3.0 Letter Trays****3.1 Standard Containers**

Mailings must be prepared in letter trays with sleeves. However, a postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2c]

### 3.2 Letter Tray Sizes

These approximate measurements define the tray sizes that apply to all letter-size mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high. [M033.1.3]

### 3.3 Letter Tray Preparation

Letter trays are prepared as follows:

- a. Subject to availability of equipment, standard MM trays must be used for all letter-size mail, except that EMM trays must be used when available for letter-size mail that exceeds the inside dimensions of MM trays defined in [3.2, Letter Tray Sizes](#). When EMM trays are not available for those larger pieces, they must be placed in MM trays, angled back, or placed upright perpendicular to the length of the tray in row(s) to preserve their orientation.
- b. Pieces must be “faced” (oriented with all addresses in the same direction with the postage area in the upper right).
- c. Each tray prepared must be filled before filling the next tray, with the contents in multiple trays relatively balanced. When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that results in the fewest total number of trays for that presort level. As an alternative, if there is mail remaining, mailers may move those pieces to the next higher presort level at which there is a minimum quantity (e.g., 150 pieces).
- d. For presort destinations that do not require full trays, pieces are placed in a less-than-full tray.
- e. Mailers must use as few trays as possible without jeopardizing rate eligibility. For instance, a mailer will never have two 1-foot trays to a single destination; instead, that mail must be placed in a single 2-foot tray. A 1-foot tray is prepared only if it is a full tray with no overflow; or if there is less than 1 foot of mail for that destination; or if the overflow from a full 2-foot tray is less than 1 foot of mail.
- f. Each tray must bear the correct tray label.
- g. Each tray must be sleeved and strapped under [3.4, Tray Sleeving and Strapping](#), and [3.5, Strapping Exception](#).
- h. If a mailing is prepared using an MLOCR/barcode sorter and is submitted with standardized documentation, then pieces do *not* have to be grouped by 3-digit ZIP Code prefix (or by 3-digit scheme, if applicable) in AADC trays, or by AADC in mixed AADC trays. [M033.2.1]

### 3.4 Tray Sleevling and Strapping

Letter trays are secured using USPS-provided sleeves. Each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve. [M033.1.5]

### 3.5 Strapping Exception

If the processing and distribution manager gives a written waiver, strapping is not required for any mixed AADC letter tray of First-Class Mail or for any letter tray that originates and destines in the same SCF (mail processing plant) service area. [M033.1.6]

### 3.6 Origin/Entry 3-Digit/Scheme Trays

After all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the post office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the post office where the mail is verified). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area. [M033.1.7]

## 4.0 Tray Labels

### 4.1 Basic Standards

Only tray labels may be used for trays. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Container labels for automation rate mailings are subject to [4.9.1, Basic Standards for Barcoded Tray Labels](#), [4.9.2, Physical Characteristics of Barcoded Tray Labels](#), and [708.6.0](#). [M031.1.1]

### 4.2 Physical Characteristics of a Tray Label

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum. [M031.3.2]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement*. Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.

### 235.4.4

- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the tray. [M031.1.2]

#### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of tray labels.

| CONTENT TYPE   | CODE              |
|--|-------------------|
| Barcoded   | BC                |
| Barcoded and Nonbarcoded   | BC/NBC            |
| Carrier Route  | C (type of route) |
| Carrier Routes   | CR-RT or CR-RTS   |
| Digit  | D                 |
| First-Class Mail   | FCM               |
| General Delivery Unit  | G                 |
| Highway Contract Route   | H                 |
| Letters  | LTR or LTRS       |
| Machinable   | MACH              |
| Manual (cannot be processed on automated equipment or mailer requests manual processing) | MAN or MANUAL     |
| Mixed  | MXD               |
| Nonmachinable  | NON MACH          |
| Post Office Box Section  | B                 |
| Rural Route  | R                 |
| Working  | WKG               |

[M031.5.0]

**4.5 Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**4.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**4.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**4.8 Placement of Tray Label**

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down. [M031.3.1]

**4.9 Barcoded Tray Labels****4.9.1 Basic Standards for Barcoded Tray Labels**

Barcoded tray labels must be used for automation-rate letter-size mailings. Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing. [M032.1.1]

### 4.9.2 Physical Characteristics of Barcoded Tray Labels

A barcoded tray label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.2.4i.](#)
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum. [\[M032.2.1\]](#)

## 5.0 Preparation for Nonautomation Letters

### 5.1 Basic Standards

#### 5.1.1 All Mailpieces

Each Presorted First-Class mailing must meet the applicable standards in [233.4.0](#), [Additional Eligibility Standards for Nonautomation First-Class Mail Letters](#), and in [235, Mail Preparation](#); All pieces must be in the same processing category, subject to [5.1.4, Cards and Letters](#), and must be sorted together and prepared under [5.3, Machinable Preparation](#), or [5.4, Nonmachinable Preparation](#). Letter-size pieces (including card-size pieces) must be prepared in letter trays. [\[M130.1.1\]](#)

#### 5.1.2 Single-Piece Rate Pieces Presented With Presort Mailings

Regardless of the method of postage payment, pieces of single-piece rate First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at automation or presort rates if the single-piece rate pieces are physically separated from other pieces; bear no rate marking, or are marked only "First-Class," or (if not affixed with full single-piece rate postage) are marked "Single-Piece" or "SNGLP" under [202.3.0, Placement and Content of Mail Markings](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective rate marking) have all additional postage paid at the time of mailing. [\[P100.2.5\]](#)

#### 5.1.3 Marking

Subject to [202.3.0, Placement and Content of Mail Markings](#), all pieces must be marked "Presorted" (or "PRSRT") and "First-Class." [\[M130.1.1\]](#)

#### 5.1.4 Cards and Letters

Pieces claimed at card rates and pieces claimed at letter rates are each subject to a separate minimum volume criterion whether prepared as separate or combined mailings. Either way, card-size and letter-size pieces may be presented at the same time and reported on the same postage statement. [\[M130.1.3\]](#)

## 5.2 Manual Only Option

Mailers who prefer that the USPS not automate letter-size pieces (including cards) must use the preparation sequence and tray labeling for nonmachinable pieces in [5.4](#). [M130.1.6]

## 5.3 Machinable Preparation

### 5.3.1 Machinable Bundling

Machinable pieces are not bundled, except for (see [2.0](#), *Bundles*):

- a. Card-size pieces.
- b. All pieces in a less-than-full origin 3-digit tray.
- c. All pieces in a less-than-full mixed AADC tray. [M130.2.1]

### 5.3.2 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (optional); full trays (no overflow); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0](#), *Tray Labels*, for overseas military mail).
  2. Line 2: "FCM LTR 5D MACH."
- b. 3-digit (required); full trays (no overflow), except for one less-than-full tray for each origin 3-digit(s); labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "FCM LTR 3D MACH."
- c. AADC (required); full trays (no overflow), with pieces grouped by 3-digit ZIP Code prefix; labeling:
  1. Line 1: [L801](#).
  2. Line 2: "FCM LTR AADC MACH."
- d. Mixed AADC (required); no minimum, with pieces grouped by AADC; labeling:
  1. Line 1: "MXD" followed by city, state, and 3-digit ZIP Code prefix of facility serving 3-digit ZIP Code prefix of entry office, as shown in [L002](#), Column C.
  2. Line 2: "FCM LTR MACH WKG." [M130.2.2]

## 5.4 Nonmachinable Preparation

### 5.4.1 Nonmachinable Bundling

Except as provided in [2.5](#), *Exception to Bundle Preparation—Full Single-Sort-Level Trays*, bundling is required before traying. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Mailers who prefer that the USPS not automate letter-size pieces must also identify each bundle with a facing slip marked "MANUAL ONLY" or use a "MANUAL ONLY" optional endorsement line (see [708.7.0](#)). Preparation sequence, bundle size, and labeling:

### 235.5.4.2

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL); labeling not required for pieces in full 5-digit trays.
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M130.3.1]

#### 5.4.2 Nonmachinable Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (required); full trays (no overflow); labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, Tray Labels](#), for overseas military mail).
  - 2. Line 2: "FCM LTR 5D MANUAL."
- b. 3-digit (required); full trays (no overflow), except for one less-than-full tray for each origin 3-digit(s); labeling:
  - 1. Line 1: [L002](#), Column A.
  - 2. Line 2: "FCM LTR 3D MANUAL."
- c. ADC (required); full trays (no overflow); labeling:
  - 1. Line 1: [L004](#), Column B.
  - 2. Line 2: "FCM LTR ADC MANUAL."
- d. Mixed ADC (required); no minimum; labeling:
  - 1. Line 1: "MXD" followed by city, state, and 3-digit ZIP Code prefix of facility serving 3-digit ZIP Code prefix of entry post office, as shown in [L002](#), Column C.
  - 2. Line 2: "FCM LTR MANUAL WKG." [M130.3.2]

## 6.0 Preparation for Automation Rate Letters

### 6.1 Basic Standards

Letter-size automation rate First-Class Mail must be prepared under [6.0](#) and the eligibility standards for the rate claimed. Bundle and tray preparation are subject to [235, Mail Preparation](#), [202.3.0, Placement and Content of Mail Markings](#), [202.4.0, Endorsement Placement](#), [708.7.0, Optional Endorsement Lines \(OEL\)](#), and [708.6.0, Barcoding Standards for Container Labels](#). Trays must bear barcoded tray labels under [4.9](#). [M810.1.1]

### 6.2 Mailings

The requirements for mailings are as follows:

- a. General. All pieces in a mailing must meet the standards in [201.3.0, Physical Standards for Automation Letters and Cards](#), and must be sorted together to the finest extent required for the rate claimed except under [6.2c](#). The definitions of a mailing and permissible combinations are in [1.0, General Definition of Terms](#).

- b. First-Class. A single automation rate First-Class Mail mailing may include pieces prepared at carrier route, 5-digit, 3-digit, AADC, and mixed AADC rates. [M810.1.2]
- c. Regardless of the method of postage payment, pieces of single-piece rate First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at automation or presort rates if the single-piece rate pieces are physically separated from other pieces; bear no rate marking, or are marked only “First-Class,” or (if not affixed with full single-piece rate postage) are marked “Single-Piece” or “SNGLP” under [202.3.0, Placement and Content of Mail Markings](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective rate marking) have all additional postage paid at the time of mailing. [P100.2.5]

### 6.3 Marking

All automation rate pieces must be marked under [202.3.0, Placement and Content of Mail Markings](#), and [202.4.0, Endorsement Placement](#). Pieces claimed at an automation rate must bear the appropriate class marking and, except as provided in [202.3.0, Placement and Content of Mail Markings](#), and [202.4.0, Endorsement Placement](#), “AUTO” (or “AUTOOCR” for carrier route rate). Pieces not claimed at an automation rate must not bear “AUTO” or “AUTOOCR” unless single-piece rate postage is affixed or the corrective single-piece rate marking (“SNGLP” or “Single-Piece”) is applied. [M810.1.4]

### 6.4 General Preparation

Grouping, bundling, and labeling are not generally required or permitted, *except* bundling is required in any mailing consisting entirely of card-size pieces and for pieces in overflow, less-than-full, and 3-digit carrier routes trays. [M810.1.5]

### 6.5 Cards

Pieces claimed at First-Class card rates and pieces claimed at First-Class letter rates are each subject to a separate minimum volume criteria whether prepared as separate or combined mailings. Either way, card-size and letter-size pieces may be presented at the same time and reported on the same postage statement. [M810.1.7]

### 6.6 Carrier Route Traying Standards

Carrier route groups (or bundles, if applicable) may be placed only in carrier route, 5-digit carrier routes, or 3-digit carrier routes trays. Preparation of mail to qualify for automation carrier route rates is optional for First-Class Mail under [233.5.0, Additional Eligibility Standards for Automation Rate First-Class Mail \(and Carrier Route\) Letters](#). [M810.1.6]

### 6.7 Carrier Route Pieces

Grouping size, preparation sequence, and labeling: carrier route (only); required (10-piece minimum); use an optional endorsement line under [708.7.0](#) or carrier route information line under [708.6.0](#). Group pieces by carrier route in full 5-digit carrier routes trays, using separator cards or tic marks under [1.0, General Definition of Terms](#), not bundling. Bundle pieces by carrier route in less-than-full 5-digit carrier routes trays and in all 3-digit carrier routes trays. [M810.2.1]

### 6.8 Tray Preparation

Preparation sequence, tray size, and Line 1 labeling:

- a. Carrier route: optional, but required for rate eligibility (full trays); no overflow; for Line 1, use city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by the prefixes under [4.0, Tray Labels](#).
- b. 5-digit carrier routes (carrier route pieces/bundles only): required for rate eligibility if full tray, optional with minimum one 10-piece bundle; for Line 1, use city, state, and 5-digit ZIP Code destination of bundles, preceded for military mail by the prefixes under [4.0, Tray Labels](#).
- c. 3-digit carrier routes (carrier route bundles only): optional with minimum one 10-piece bundle for each of two or more 5-digit areas; for Line 1, use the city, state, and ZIP shown in [L002](#), Column A, that corresponds to the 3-digit ZIP Code prefix of bundles.
- d. 5-digit/scheme: optional, but 5-digit trays required for rate eligibility (150-piece minimum); overflow allowed; for Line 1, for 5-digit trays, use city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by the prefixes under [4.0, Tray Labels](#); for Line 1, for optional 5-digit scheme trays, use destination shown in the current USPS City State Product.
- e. 3-digit/scheme: required (150-piece minimum except no minimum for required origin/optional entry 3-digit(s)/scheme); overflow allowed; for Line 1, use [L002](#), Column B.
- f. AADC: required (150-piece minimum); overflow allowed; group pieces by 3-digit ZIP Code prefix (or 3-digit/scheme if applicable); for Line 1, use [L801](#), Column B.
- g. Mixed AADC: required (no minimum); group pieces by AADC; for First-Class Mail Line 1 labeling, use “MXD” followed by city, state, and ZIP Code of facility serving 3-digit ZIP Code prefix of entry post office, as shown in [L002](#), Column C. [M810.2.2]

### 6.9 Tray Line 2

Line 2: “FCM LTR” and:

- a. Carrier route: “CR BC,” followed by route type and number.
- b. 5-digit carrier routes: “5D CR-RT BC.”
- c. 3-digit carrier routes: “3D CR-RT BC.”
- d. 5-digit scheme: “BC 5D SCHEME.”
- e. 5-digit: “5D BC.”
- f. 3-digit scheme: “BC SCHEME” and, if applicable, as shown in [L002](#), Column B, followed by the letter “A,” “B,” or “C.”
- g. 3-digit: “3D BC.”
- h. AADC: “AADC BC.”
- i. Mixed AADC: “BC WKG.” [M810.2.3]

**6.10 Presentation**

Upon presentation of letter-size automation rate First-Class Mail mailings to the Postal Service for verification, mailers must present all mixed AADC trays together, and such trays must either be adjacent to one another, or side by side, and must be placed as the top layer(s) on any given container. Containerization instructions for First-Class Mail letters and cards may be established by local USPS managers.

[M810.1.8]

## 236 Enter and Deposit

### Overview

- [1.0 Deposit](#)
- [2.0 Verification](#)

### 1.0 Deposit

#### 1.1 Service Objectives

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information. [D100.1.1]

#### 1.2 Time and Location of Deposit

First-Class Mail paid at the Presorted rate or at any automation rate must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing post office except as permitted in [604.4.10](#). Permit imprint mail must be deposited under [604.6.0](#) or [705, Advanced Preparation and Special Postage Payment Systems](#). [D100.2.2]

#### 1.3 Approved Collections

The USPS may collect Presorted First-Class Mail and automation rate First-Class Mail at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation required for those classes; and:

- Acceptance and verification are done at the customer's facility; or
- Postage is paid with permit imprint under an optional procedure; or
- Postage is paid with meter or precanceled stamps. [D100.2.5]

#### 1.4 Permit Imprint Collection

The USPS does not collect presort mailings from a customer's facility if paid with a permit imprint and not covered by optional procedures. [D100.2.4]

### 2.0 Verification

#### 2.1 USPS Verification and Mailer Correction

Mailings are subject to USPS procedures to verify correct preparation and postage payment. The mailer is responsible for correcting irregularities found in the mailing. If, at the acceptance unit, a mailing is found not to qualify for a Presorted First-Class rate or an automation First-Class rate, the mailer must either take corrective action or pay the full single-piece rate. The return of such mailings to the mailer's facility for any reworking is the mailer's responsibility. [D100.3.1]

#### 2.2 Timeframe for Corrective Action

If a mailer corrects the presort or preparation problems in a metered or precanceled stamped mailing that caused its disqualification when originally presented for acceptance, but cannot resubmit that mailing on the same day, the date shown in

236.2.3

the meter or mailer's precancel postmark must be corrected. The mailer may either re-envelope each piece and reapply postage and request a postage refund under [604.10.0, Refunds and Exchanges](#), or apply a legible “.00” meter impression that includes the correct mailing date. [D100.3.2]

### **2.3 Payment at Single-Piece Rate Rather Than Correcting Errors**

A mailer who pays the single-piece First-Class rate rather than correcting errors in a mailing paid with meter or precanceled stamps must pay the difference in cash at the window and present the copy of the cash receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a mailing paid with a permit imprint must correct the postage statement presented with the mailing to show that postage is to be paid at the higher rate. [D100.3.3]

## 243 Rates and Eligibility

### Overview

- 1.0 Rates and Fees for Standard Mail
- 2.0 Content Standards for Standard Mail Letters
- 3.0 Basic Standards for Standard Mail Letters
- 4.0 Rate Eligibility for Standard Mail
- 5.0 Additional Eligibility Standards for Presorted Standard Mail Letters
- 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail
- 7.0 Eligibility Standards for Automation Rate Standard Mail

### 1.0 Rates and Fees for Standard Mail

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Standard Mail Rate Application

Standard Mail rates are based on the weight of the pieces and are applied differently to pieces weighing less than or equal to 3.3 ounces (0.2063 pound) and those weighing more, as follows:

- a. The appropriate minimum per piece rate applies to any Standard Mail piece that weighs 3.3 ounces or less.
- b. A rate determined by adding the appropriate fixed per piece charge and the corresponding variable per pound charge (based on the weight of the piece) applies to any Standard Mail piece that weighs more than 3.3 ounces.  
[P013.4.0]

1. Nonmachinable letters (see 201.2.0) are subject to a surcharge of \$0.04.

2. ECR High Density letters or ECR Saturation letters that are not automation-compatible are mailable at the applicable flat rate (201.3.0).

3. For pieces weighing more than 3.3 ounces, each piece is subject to both a per piece rate and a per pound rate. Multiply the number of pieces in the mailing by per piece rate. Multiply the number of pounds of the mailing by per pound rate. Add both totals.

4. Per piece rate for ECR letters and automation letters that weigh more than 3.3 oz. but less than (or equal to) 3.5 oz. includes a discount from the nonletter rate (more than 3.3 oz.) that equals the applicable nonletter rate (3.3 oz. or less) minus the applicable letter piece rate (3.3 oz. or less).

|  |      | 0.110                  | 0.063   | 0.050                                     | 0.026 <sup>4</sup> | 0.019 <sup>4</sup> | 0.035 <sup>4</sup> | 0.024 <sup>4</sup> | 0.016 <sup>4</sup> | 0.009 <sup>4</sup> | -0.006 <sup>4</sup> |

1. Nonmachinable letters (see 201.2.0) are subject to a surcharge of \$0.02.

2. ECR High Density letters or ECR Saturation letters that are not automation-compatible are mailable at the applicable flat rate (201.3.0).

3. For pieces weighing more than 3.3 ounces, each piece is subject to both a per piece rate and a per pound rate. Multiply the number of pieces in the mailing by per piece rate. Multiply the number of pounds of the mailing by per pound rate. Add both totals.

4. Per piece rate for ECR letters and automation letters that weigh more than 3.3 oz. but less than (or equal to) 3.5 oz. includes a discount from the nonletter rate (more than 3.3 oz.) that equals the applicable nonletter rate (3.3 oz. or less) minus the applicable letter piece rate (3.3 oz. or less).

[R600.3.1, R600.3.3, R600.4.1, R600.4.3]

### 1.5 Nonmachinable Surcharge

Surcharge per piece:

- a. Presorted Regular: \$0.04.
- b. Presorted Nonprofit: \$0.02. [R600.5.0]

### 1.6 Fees

#### 1.6.1 Presort Mailing Fee

Mailing fee, per 12-month period: \$150.00. [R600.8.1]

### 1.6.2 Weighted Fee

For return of pieces bearing the ancillary service markings “Address Service Requested” and “Forwarding Service Requested.”

| <b>WEIGHTED FEE</b>                          |   |
|--|---|
| <b>Single Piece Weight Not Over (ounces)</b> | <b>Weighted Fee per Piece<sup>1</sup></b> |

| 12   | 7.17                                      |
| 13   | 7.74                                      |
| Over 13 but under 16                         | 9.52                                      |

1. Weighted fee equals single-piece First-Class Mail or Priority Mail rate multiplied by 2.472. Nonmachinable surcharge may apply.

[R600.8.2]

## 1.7 Computing Postage for Standard Mail

### 1.7.1 Weight

To compute the total weight of the addressed pieces in a mailing or mailing segment for:

- a. Identical-weight pieces, multiply the computed average weight of a single piece by the corresponding number of pieces; do not round the product.
- b. Nonidentical-weight pieces, add the actual weight of the individual pieces or weigh the entire mailing in bulk; do not round either result. [P013.8.1]

### 1.7.2 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

**1.7.3 Net Postage**

Postage is computed at the applicable rates on the entire mailing to be mailed at one time. The net postage rate that must be paid is either the applicable minimum per piece rate or the piece/pound rate, as reduced by any discounts for which the piece is eligible, and/or as increased by any surcharge to which the piece is subject. The net postage rate is commonly designated by the name of the primary rate category or discount (e.g., Enhanced Carrier Route rate, automation letter rate, automation flat rate, Presorted rate). [E610.5.6]

**1.7.4 Per Piece and Per Pound Charges**

The per piece charge is computed based on the total number of addressed pieces for each rate category claimed. The minimum rate may apply to each piece as detailed in 1.2, *Standard Mail Rate Application*. Otherwise, the per piece charge must be added to the per pound charge to determine total postage. Where applicable, the per pound charge is computed based on the total weight of the addressed pieces for each rate category claimed, and is added to the per piece charge to determine total postage. For example, a quantity of pieces weighing 100.25 pounds is charged 100.25 times the applicable rate per pound, based on the rate claimed, plus one unit of the applicable per piece charge for each addressed piece. [P013.8.2]

**1.7.5 Computing Affixed Postage**

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable rate per pound; add the applicable per piece charge and any surcharge; and round the sum up to the next tenth of a cent. The applicable minimum per piece charge must be affixed if it is more than the total computed per piece postage. [P013.8.3]

**1.7.6 Computing Affixed Postage—Heavy Letters**

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable rate per pound; add the applicable per piece charge, subtract the heavy letter discount (see 1.7.8 through 1.7.10); and round the sum up to the next tenth of a cent. [P013.8.4]

**1.7.7 Permit Imprint**

In any permit imprint mailing:

- a. For each rate or rate category, multiply the number of addressed pieces by the corresponding rate per piece and (if applicable) multiply the *unrounded* total weight of the pieces by the corresponding rate per pound; round off each product to four decimal places.
- b. Add the per piece and per pound charges and round off the total postage to the nearest whole cent. [P013.8.5]

**1.7.8 Discount for Heavy Automation Letters**

Automation letters that weigh more than 3.3 ounces but not more than 3.5 ounces are charged postage equal to the automation piece/pound rate for that piece and receive a discount equal to the corresponding automation nonletter piece rate (3.3 ounces or less) minus the corresponding automation letter piece rate (3.3 ounces or less). For automation ECR pieces, postage is calculated using the

243.1.7.9

regular basic piece/pound rate and the regular basic nonletter piece rate. If a destination entry rate is claimed, the discount is calculated using the corresponding rates. [P013.8.6]

### **1.7.9 Discount for Heavy ECR Letters**

Pieces that otherwise qualify for the high density or saturation letter rate and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the piece/pound rate and receive a discount equal to the nonletter piece rate (3.3 ounces or less) minus the letter piece rate (3.3 ounces or less). If a destination entry rate is claimed, the discount is calculated using the corresponding rates. [P013.8.7]

### **1.7.10 Discount for Heavy ECR Basic Automation Letters**

Pieces that otherwise qualify for the automation basic rate and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the regular basic piece/pound rate and receive a discount equal to the regular basic nonletter piece rate (3.3 ounces or less) minus the automation basic piece rate (3.3 ounces or less). If a destination entry rate is claimed, the discount is calculated using the corresponding rates. [P013.8.8]

## 2.0 Content Standards for Standard Mail Letters

### **2.1 Definition and Weight**

Standard Mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (unless permitted or required by standard) and that weighs less than 16 ounces. Standard Mail includes matter formerly classified as Standard Mail (A) and third-class mail. [E610.1.1]

### **2.2 Postal Inspection**

Standard Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Standard Mail rates constitutes consent by the mailer to postal inspection of the contents. [E610.1.2]

### **2.3 Circulars**

Circulars, including printed letters that, according to their contents, are sent in identical terms to more than one person are Standard Mail. A circular does not lose its character as such if a date and the individual names of the addressee and sender are written (handwritten or typewritten) on the circular or written corrections of typographical errors are made on the circular. [E610.2.1]

### **2.4 Printed Matter**

Printed matter may be sent as Standard Mail. For this standard, *printed matter* means paper on which words, letters, characters, figures, or images (or any combination of them), not having the character of a bill or statement of account or of actual and personal correspondence, are reproduced by any process other than handwriting or typewriting. [E610.2.2]

## 2.5 Computer-Prepared Material

Computer-prepared material is considered printed matter. Such material is not considered to have the character of actual and personal correspondence merely because it contains:

- a. Specific information about a product (e.g., size, color, price) or a service being offered for sale or lease (e.g., the name, address, and telephone number of a company representative).
- b. Information relating the addressee directly to an advertised product or service being offered for sale or lease.
- c. Information such as the amount paid for a previous purchase, pledge, or donation, when associated with a sales promotion or solicitation for donations. [E610.2.3]

## 2.6 Attachments and Enclosures

### 2.6.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Standard Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E610.4.1]

### 2.6.2 Incidental First-Class Attachments and Enclosures

Incidental First-Class matter may be enclosed in or attached to Standard Mail merchandise (including books but excluding merchandise samples) without payment of First-Class postage. Incidental First-Class matter may not be enclosed in or attached to matter mailed as Customized MarketMail under 705.1.0. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared not to encumber postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Standard Mail or Package Services rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E610.4.2]

### 2.6.3 Nonincidental First-Class Enclosures

Letters or other pieces of nonincidental First-Class Mail, subject to postage at First-Class Mail rates, may be enclosed with Standard Mail pieces (except matter mailed as Customized MarketMail under 705.1.0). Postage for the First-Class enclosure must be placed on the outside of the piece. It may be affixed separately or

added to the postage for the host piece. The endorsement “First-Class Mail Enclosed” must be placed on the piece, below the postage and above the address.

[E610.4.3]

#### **2.6.4 Nonincidental First-Class Attachments**

Letters or other pieces of nonincidental First-Class Mail may be placed in an envelope and securely attached to the address side of a Standard Mail piece (except matter mailed as Customized MarketMail under [705.1.0](#)), or of the principal piece, as applicable. Combination envelopes or containers with separate parts for the two classes of mail may be used. The names and addresses of the sender and addressee must be placed on both the principal piece and the attachment.

Alternatively, the sender’s name and address must be placed on one part and the addressee’s name and address on the other. If the piece is a combination container with inseparable parts or compartments, the names and addresses may appear on only one part. The applicable Standard Mail postage for the Standard Mail matter must be prepaid and placed in the upper right corner of the address space.

Postage at the applicable First-Class rate must be paid for and affixed to the First-Class attachment, unless other payment methods are permitted by standard.

[E610.4.4]

#### **2.6.5 Attachment of Other Standard Mail Matter**

Standard Mail pieces may bear an attachment that is eligible as Standard Mail matter if these additional conditions are met:

- a. The piece bearing the attachment is claimed as Customized MarketMail (CMM) under [705.1.0](#) or as Enhanced Carrier Route Standard Mail under [6.0](#).
- b. The face of the attachment may bear only the rate markings and endorsements permitted for the rate claimed for the host piece.
- c. At the time of mailing, the piece shows only one complete delivery address. If the attachment is a reply card, the address for returning the piece is not visible.
- d. Enhanced Carrier Route host pieces are larger than 6 by 11 inches. CMM host pieces are any size permitted under [705.1.1.3, Physical Standards](#).
- e. The attachment is not larger than the host piece and does not extend beyond the host piece. An attachment affixed to a CMM piece may not be greater than 1/4 inch thick at its thickest point.
- f. Each piece in the mailing bears the attachment, and the attachment is of identical size, weight, and positioning on the host piece. Different wording or designs may be used.
- g. The attachment does not interfere with processing or delivery. Folded or multipage attachments must be secured to prevent opening during handling.

[E610.4.5]

### **2.7 Written Additions**

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E610.3.0]

## 3.0 Basic Standards for Standard Mail Letters

### 3.1 Basic Standards

Each Standard Mail mailing is subject to these general standards:

- a. All pieces in a mailing must be of the same processing category.
- b. Each mailing must contain at least 200 pieces or 50 pounds of pieces. See [3.4, Residual Volume Requirement](#), for volume requirement eligibility unique to Presorted Standard rate mailings. Other volume standards also can apply, based on the rate claimed.
- c. All pieces in an automation mailing must be eligible for an automation rate.
- d. All pieces in a mailing must be sorted together and marked under the standards for the rate claimed.
- e. Each piece must bear the addressee's name and delivery address, including the correct ZIP Code or ZIP+4 code, unless an alternative addressing format is used subject to [602.3.0](#). Detached address labels may be used subject to [602.4.0](#).
- f. Postage must be paid under [244.1.0](#) through [244.3.0](#) with precanceled stamps, meter stamps, or permit imprint.
- g. A postage statement, completed and signed by the mailer, using the correct USPS form or an approved facsimile, must be submitted with each mailing. In addition, mailings must be documented under [244.4.2, Basic Documentation Standards](#), and the standards for the rate claimed.

- h. Each piece must meet the standards for any other rate or discount claimed.
- i. Any POSTNET barcode on a mailpiece must be correct for the delivery address and meet the standards in [202.5.0, Barcode Placement](#), [708.3.0, Coding Accuracy Support System \(CASS\)](#), and [708.4.0, Barcoding Standards for Letters and Flats](#).
- j. Mailings must be deposited at a business mail entry unit of the post office where the postage permit or license is held and the annual mailing fee paid, unless deposit elsewhere is permitted by standard. [E610.8.0]

#### **3.2 Presort Mailing Fees**

An annual mailing fee must be paid once each 12-month period at each post office of mailing. A mailer paying this fee may enter clients' mail as well as the mailer's own. The mailer whose permit imprint appears on pieces in a mailing paid with a permit imprint must show that permit number on the postage statement and must pay the annual mailing fee for that permit; this fee is in addition to the one-time fee for an application to use permit imprints. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [E610.6.1]

#### **3.3 Merging Similar Standard Mailings**

Mailings are subject to the general definitions and conditions in [245.1.0, General Information for Mail Preparation](#). Generally, mailers may merge similar Standard Mail matter into a single mailing. Differences in text, address labels, and address lists or list key numbers do not prohibit the mailer from merging and sorting pieces together. Pieces with different methods of postage payment may be combined in the same mailing only if authorized by Business Mailer Support (BMS). Pieces of nonidentical weight, if merged in the same mailing, must bear the correct postage when mailed, unless otherwise authorized by BMS. [E610.7.0]

#### **3.4 Residual Volume Requirement**

Pieces in an Enhanced Carrier Route rate mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted rate mailing, provided that the Enhanced Carrier Route rate mailing and the Presorted rate mailing are part of the same mailing job. Likewise, pieces in an automation rate mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted rate mailing, provided that the automation rate mailing and the Presorted mailing are part of the same mailing job. Pieces mailed at Presorted Standard Mail rates must not be counted toward the minimum volume requirements for an Enhanced Carrier Route rate or an automation rate mailing. [E620.1.2]

#### **3.5 Residual Mail Subject to First-Class or Priority Mail Rates**

Pieces prepared as Standard Mail (i.e., that bear Standard Mail rate markings, ACS codes, etc.) that do not qualify for Enhanced Carrier Route, automation, or Presorted Standard Mail rates are subject to the single-piece First-Class or Priority Mail rates as applicable for the weight of the mailpiece. Metered pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail rates and any pieces that do not qualify for Standard Mail rates for which First-Class or

Priority Mail service is desired must be re-enveloped or otherwise prepared so that they do not bear Standard Mail markings, endorsements, and ACS codes and must bear the proper First-Class Mail or Priority Mail rate markings and ACS codes. Mailers who have pieces (other than metered pieces weighing over 13 ounces but less than 16 ounces) that do not qualify for Standard Mail rates but that are prepared as Standard Mail and who do not desire to receive First-Class Mail or Priority Mail service for those pieces may enter their mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), provided the requirements in [244.5.1, Residual Standard Mail Subject to First-Class Rates](#), and [244.5.2, Residual Standard Mail Subject to Priority Mail Rates](#), are met. [E620.1.3]

### 3.6 ZIP Code Accuracy

#### 3.6.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.6.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.6.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail rates, regardless of any required surcharges, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

#### 3.6.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer’s computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
  2. Surveys of addressees on mailer’s address list inquiring about the accuracy of ZIP Code information.
  3. Any mailing list service in [507.6.0](#).
  4. An authorized service provider.

5. CASS-certified matching software.
6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

#### **3.6.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

## 4.0 Rate Eligibility for Standard Mail

### **4.1 General Information**

All Standard Mail rates are presorted rates (including all nonprofit rates). These rates apply to mailings meeting the basic standards in [2.0](#) through [4.0](#) and the corresponding standards for Presorted rates under [3.0](#) and [5.0](#), Enhanced Carrier Route rates under [6.0](#), automation rates under [7.0](#), or Customized MarketMail rates under [705.1.0](#). Except for Customized MarketMail pieces, destination entry discount rates are available under [246.2.0](#) through [246.5.0](#). Nonprofit rates may be used only by organizations authorized by the USPS. Not all processing categories qualify for every rate. Pieces are subject to either a single minimum per piece rate or a combined piece/pound rate, depending on the weight of the individual pieces in the mailing. [E610.5.1]

### **4.2 Minimum Per Piece Rates**

The minimum per piece rates (i.e., the minimum postage that must be paid for each piece) apply as follows:

- a. Basic Requirement. Pieces mailed at Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route rates are subject to minimum per piece rates when they weigh no more than 3.3 ounces (0.2063 pound).
- b. In applying the minimum per piece rates, a mailpiece is categorized as either a letter or a nonletter, based on whether the piece meets the letter-size standard in [201.1.1.1](#), *Minimum and Maximum Size for Letters*, without regard to placement of the address on the piece, except under these conditions:
  1. If the piece meets both the definition of a letter in [201.1.1.1](#), *Minimum and Maximum Size for Letters*, and the definition of an automation flat in [301.3.0](#), *Physical Standards for Automation Flats*, the piece may be prepared and entered at an automation flat (nonletter) rate.
  2. If the piece is prepared for automation letter rates, address placement is used to determine the length when applying the size standards and aspect ratio requirements to qualify for automation letter rates under [201.3.0](#), *Physical Standards for Automation Letters and Cards*. For this purpose, the length is considered to be the dimension parallel to the address.
  3. If the piece is mailed as a Customized MarketMail piece under [705.1.0](#), the piece is always subject to the applicable Regular or Nonprofit Standard Mail basic nonletter per piece rate and must not exceed the maximum weight for those rates.

- c. Individual Rates. There are separate minimum per piece rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. Except for Customized MarketMail pieces, discounted per piece rates also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [246](#). DDU rates are available only for mail entered at Enhanced Carrier Route or Nonprofit Enhanced Carrier Route rates. See [1.0](#) for individual per piece rates. [E610.5.2]

#### 4.3 Piece/Pound Rates

Pieces that exceed 3.3 ounces (0.2063 pound) are subject to a two-part piece/pound rate that includes a fixed charge per piece and a variable pound charge based on weight. Pieces exceeding 3.3 ounces may not be mailed as Customized MarketMail. There are separate per piece rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing under [3.0](#) through [7.0](#). There are separate per pound rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) under [3.0](#) through [7.0](#). Discounted per pound rates also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [246](#). [E610.5.3]

#### 4.4 Residual Shape Surcharge

Any piece that is prepared as Customized MarketMail under [705.1.0](#) is subject to the residual shape surcharge. [E610.5.5]

## 5.0 Additional Eligibility Standards for Presorted Standard Mail Letters

### 5.1 Basic Standards

All pieces in a Regular Standard Mail or Nonprofit Standard Mail Presorted rate mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#) in [Rates and Eligibility](#).
- b. Except as provided in [3.4, Residual Volume Requirement](#), be part of a single mailing of at least 200 addressed pieces or 50 pounds of pieces qualifying for Presorted Standard Mail. Basic rate and 3/5 rate pieces prepared as part of the same mailing are subject to a single minimum volume standard. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  - 1. The ZIP Code accuracy standard in [3.6](#).
  - 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).

243.5.2

- d. Be marked, sorted, and documented as specified in [245, Mail Preparation](#), or [705.8.0, Preparation for Pallets](#). [E620.1.1]

### 5.2 Weight Standards for Machinable Pieces

Maximum weight limit for machinable Presorted Standard mail is 3.3 ounces (0.2063 pound). [C810.2.3]

### 5.3 Rate Application

Presorted rates for Regular and Nonprofit Standard Mail apply to letters that meet the eligibility standards in [2.0, Content Standards for Standard Mail Letters](#), and the preparation standards in [245, Mail Preparation](#), or [705.8.0, Preparation for Pallets](#). [E620.2.1]

### 5.4 Basic Rate

The basic rate applies to pieces that do not meet the standards for 3/5 rates described in [5.5](#). [E620.2.2]

### 5.5 3/5 Rate

The 3/5 rate applies to qualifying letter-size pieces (see [201.1.0, Physical Standards for Machinable Letters and Cards](#)) presented in quantities of 150 or more pieces for a single 3-digit ZIP Code prefix area and prepared in 5-digit or 3-digit trays. [E620.2.3]

### 5.6 Nonmachinable Surcharge

The nonmachinable surcharge in [1.0](#) applies only to Regular and Nonprofit Standard Mail letter-size pieces (including card-size pieces), except for letter-size pieces prepared and entered as Customized MarketMail under [705.1.0](#), if the pieces weigh 3.3 ounces or less, are claimed at Presorted letter rates, and are subject to either of these conditions:

- a. The pieces have one or more of the nonmachinable characteristics for letter-size mail in [201.2.0](#).
- b. The pieces are labeled for manual processing by the mailer under the manual only option in [245.5.3](#). [E620.4.0]

## 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail

### 6.1 General Enhanced Carrier Route Standards

#### 6.1.1 Optional Preparation

Preparation to qualify for any Enhanced Carrier Route rate is optional and need not be performed for all carrier routes in a 5-digit area. An Enhanced Carrier Route mailing may include pieces at basic, high density, and saturation Enhanced Carrier Route rates. Automation basic carrier route rate pieces must be prepared as a separate mailing. [E630.1.3]

#### 6.1.2 Basic Eligibility Standards

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#) in *Rates and Eligibility*.
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of Enhanced Carrier Route Standard Mail. Automation basic carrier route rate pieces are subject to a separate 200-piece or 50-pound minimum volume standard and may not be included in the same mailing as other Enhanced Carrier Route mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Be marked and sorted to carrier routes.
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The carrier route accuracy standard in [6.2](#).
  2. If high density and saturation rate letter-size mail is prepared, the address matching and coding standards in [7.4](#), *Address Standards for Barcoded Pieces*, and [708.3.0](#), *Coding Accuracy Support System (CASS)*.
  3. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Meet the applicable sequencing requirements in [6.3](#) through [6.5](#) and [245.6.9](#). [E630.1.1]
- f. Meet the applicable documentation and postage payment standards in [244](#), *Postage Payment and Documentation*, and [1.7](#), *Computing Postage for Standard Mail*. [E640.2.1]

### 6.1.3 Maximum Weight for Enhanced Carrier Route Letters

Maximum weight limit for Standard Mail Enhanced Carrier Route high density mail, saturation mail, and automation carrier route mail pieces: 3.5 ounces (0.2188 pound) (see [201.3.14.5](#), *Heavy Letter Mail*, for pieces heavier than 3 ounces). [C810.2.3]

## 6.2 Carrier Route Accuracy

### 6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain rates under [6.2.2](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [3.6.2](#). For the Enhanced Carrier Route Standard Mail automation rate, USPS City State Product information must also be updated within 90 days before the mailing date.
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.

### 243.6.2.2

- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]

#### **6.2.2 Mail Classes and Rates**

Except as provided in [243.6.2.3](#), addresses used on pieces claiming all Enhanced Carrier Route rates for Standard Mail, regardless of any required surcharges, must meet the carrier route accuracy standard. [A030.3.2]

#### **6.2.3 Exception**

The carrier route accuracy standard does not apply to mail of any class bearing a simplified address format under [602.3.0, Use of Alternative Addressing](#). [A030.3.3]

#### **6.2.4 USPS-Approved Methods**

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#). [A030.3.4]

#### **6.2.5 Mailer Certification**

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

### **6.3 Basic Rate Enhanced Carrier Route Standards**

#### **6.3.1 Sequencing**

All pieces mailed at basic rates must be prepared in walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (see [245.6.9](#) through [245.6.10 in Preparation for Enhanced Carrier Route Letters](#)). [E630.2.1]

#### **6.3.2 Basic Rate Eligibility**

Basic rates apply to each piece sorted under [245.6.0](#) or [705.8.0, Preparation for Pallets](#), and in a full carrier route tray or in a carrier route bundle of 10 or more pieces placed in a 5-digit carrier routes or 3-digit carrier routes tray. [E630.2.2]

### **6.4 High Density Enhanced Carrier Route Standards**

#### **6.4.1 Basic Eligibility Standards for High Density Rates**

High density rates apply to each piece that is automation-compatible according to [201.3.0, Physical Standards for Automation Letters and Cards](#), has a delivery point barcode under [202.5.0, Barcode Placement](#), and [708.4.0, Barcoding Standards for Letters and Flats](#), and is in a full carrier route tray or in a carrier route bundle of 10 or more pieces placed in a 5-digit carrier routes or 3-digit carrier routes tray. Pieces that are not automation-compatible or are not barcoded are mailable at the high density nonletter rate. Pieces bearing a simplified address do not need to meet the standards in [201.3.0, Physical Standards for Automation Letters and Cards](#), and are not required to have a delivery point barcode. [E630.3.2]

#### 6.4.2 High Density Rates for Letters

All pieces mailed at high density rates must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [245.6.9](#) through [245.6.10](#) in *Preparation for Enhanced Carrier Route Letters*).
- b. Meet the density requirement of at least 125 pieces for each carrier route. Multiple pieces per delivery address can count toward this density standard. Fewer pieces may be prepared for routes with fewer than 125 possible deliveries if a piece is addressed to every possible delivery on the route. [E630.3.1]

#### 6.4.3 High Density Discount for Heavy Letters

Pieces that otherwise qualify for the high density letter rate and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the piece/pound rate and receive a discount equal to the high density nonletter piece rate (3.3 ounces or less) minus the high density letter piece rate (3.3 ounces or less). If claiming a destination entry rate, the discount is calculated using the corresponding rates. [E630.3.3]

### 6.5 Saturation ECR Standards

#### 6.5.1 Basic Eligibility Standards for Saturation Rates

Saturation rates apply to each piece that is automation-compatible according to [201.3.0, Physical Standards for Automation Letters and Cards](#), has a delivery point barcode under [202.5.0, Barcode Placement](#), and [708.4.0, Barcoding Standards for Letters and Flats](#), and is in a full carrier route tray or in a carrier route bundle of 10 or more pieces placed in a 5-digit carrier routes or 3-digit carrier routes tray. Pieces that are not automation-compatible or are not barcoded are mailable at the saturation nonletter rate. Pieces bearing a simplified address do not need to meet the standards in [201.3.0, Physical Standards for Automation Letters and Cards](#), and are not required to have a delivery point barcode to qualify for letter rates. [E630.4.2]

#### 6.5.2 Saturation Rates for Letters

All pieces mailed at saturation rates must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [245.6.9](#) through [245.6.10](#) in *Preparation for Enhanced Carrier Route Letters*).
- b. Meet the density requirement of at least 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses on each carrier route receiving this mail. Pieces bearing a simplified address must meet the coverage standards in [602.3.0, Use of Alternative Addressing](#). Multiple pieces per delivery address do not count toward this density standard. [E630.4.1]

#### 6.5.3 Saturation Discount for Heavy Letters

Pieces that otherwise qualify for the saturation letter rate and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the piece/pound rate and receive a discount equal to the saturation nonletter piece rate (3.3 ounces

or less) minus the saturation letter piece rate (3.3 ounces or less). If claiming a destination entry rate, the discount is calculated using the corresponding rates.

[E630.4.3]

## 6.6 Automation ECR Standards

### 6.6.1 Optional Preparation

Preparation to qualify for any of Enhanced Carrier Route automation rates is optional and need not be done for all carrier routes in a 5-digit area. An automation rate Enhanced Carrier Route mailing may not include pieces at basic, high density, and saturation Enhanced Carrier Route rates. [E640.2.2]

### 6.6.2 Basic Eligibility Standards

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail automation rate mailing (available only for letter-size mail) must: Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in Rates and Eligibility](#).

- a. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of automation rate Enhanced Carrier Route Standard Mail.
- b. Meet the physical standards in [201.3.0, Physical Standards for Automation Letters and Cards](#).
- c. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The carrier route accuracy standard in [6.2](#).
  2. The address matching and coding standards in [7.4, Address Standards for Barcoded Pieces](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).
  3. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- d. Bear an accurate barcode meeting the standards in [202.5.0](#), either a DPBC (if a card or letter) either on the piece or on an insert showing through a barcode window.
- e. Be marked and sorted to carrier routes.
- f. Meet the applicable documentation and postage payment standards in [244, Postage Payment and Documentation](#), and [1.7, Computing Postage for Standard Mail](#). [E640.2.1]

### 6.6.3 Carrier Route Information

The automation basic carrier route rate is available only for letter-size mail and only for those 5-digit ZIP Code areas identified with an “A” or “B” in the Carrier Route Indicators field in the USPS City State Product used for address coding. [E640.2.3]

### 6.6.4 Enclosed Reply Cards and Envelopes

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation Enhanced Carrier Route Standard Mail, and addressed for return to a domestic delivery address, must meet the

standards in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#), for enclosed reply cards and envelopes. The mailer must certify that this standard has been met when the corresponding mail (in which the reply pieces are enclosed) is presented to the USPS. [E640.2.4]

### **6.6.5 Specific Eligibility Standards for Enhanced Carrier Route Automation Rates**

Automation basic carrier route rates apply to each piece that is sorted under [245.7.0, \*Preparation for Automation Rate Letters\*](#), into full carrier route trays, in carrier route groups (or bundles, where appropriate) of 10 or more pieces each placed in 5-digit carrier routes trays, or in carrier route bundles of 10 or more pieces each placed in 3-digit carrier routes trays. (Preparation to qualify for that rate is optional and need not be done for all carrier routes in a 5-digit area.) [E640.2.5]

### **6.6.6 Automation Discount for Heavy Letters**

Pieces that otherwise qualify for the ECR automation basic letter rate and weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the ECR regular basic nonletter piece/pound rate and receive a discount equal to the regular basic nonletter piece rate (3.3 ounces or less) minus the automation basic letter piece rate. If claiming a destination entry rate, the discount is calculated using the corresponding rates. [E640.2.6]

## 7.0 Eligibility Standards for Automation Rate Standard Mail

### **7.1 Basic Eligibility Standards for Automation Standard Mail**

All pieces in a Regular Standard Mail or Nonprofit Standard Mail automation rate mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in \*Rates and Eligibility\*](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of automation rate Standard Mail (Regular and Nonprofit mailings must meet separate minimum volumes).
- c. Be in the same processing category and meet the physical standards in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The address matching and coding standards in [7.4, \*Address Standards for Barcoded Pieces\*](#), and [708.3.0, \*Coding Accuracy Support System \(CASS\)\*](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Bear an accurate delivery point barcode meeting the standards in [202.5.0, \*Barcode Placement\*](#), and [708.4.0, \*Barcoding Standards for Letters and Flats\*](#), either on the piece or on an insert showing through a barcode window.

243.7.2

- f. Be marked and sorted according to [245.7.0, Preparation for Automation Rate Letters](#).
- g. Meet the applicable documentation and postage payment standards in [1.7, Computing Postage for Standard Mail](#), and [244.1.0](#) through [244.3.0](#) in [Postage Payment and Documentation](#). [E640.1.1]

### 7.2 Maximum Weight for Automation Letters

Maximum weight limit for automation rate mail is 3.5 ounces (0.2188 pound). See [201.3.14.5, Heavy Letter Mail](#), for pieces heavier than 3 ounces. [C810.2.3]

### 7.3 Rate Application for Automation Letters

Automation rates apply to each piece that is sorted under [245.7.0, Preparation for Automation Rate Letters](#), into the corresponding qualifying groups:

- a. Groups of 150 or more pieces in 5-digit or 5-digit scheme trays qualify for the 5-digit rate. Preparation to qualify for that rate is optional and need not be done for all 5-digit or 5-digit scheme destinations.
- b. Groups of 150 or more pieces in 3-digit or 3-digit scheme trays qualify for the 3-digit rate.
- c. Groups of fewer than 150 pieces in origin or entry 3-digit or 3-digit scheme trays and groups of 150 or more pieces in AADC trays qualify for the AADC rate.
- d. All pieces in mixed AADC trays qualify for the mixed AADC rate. [E640.1.3]

### 7.4 Address Standards for Barcoded Pieces

#### 7.4.1 Basic Address Standards for Barcodes

To qualify for automation rates, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode as defined in [202.5.0, Barcode Placement](#), and [708.4.0, Barcoding Standards for Letters and Flats](#), that appears on a mailpiece claimed at an automation rate must be the correct barcode for the corresponding delivery address on the piece. [A800.1.1]

#### 7.4.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits. [A800.1.2]

#### 7.4.3 Numeric Delivery Point Barcode (DPBC)

The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A800.1.3]

#### 7.4.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product. [A800.2.2]

#### 7.4.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used. [A800.2.1]

#### 7.4.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used. [A800.2.3]

#### 7.4.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line. [A800.2.4]

#### 7.4.8 Post Office Box

A post office box address must contain a post office box number that can be exactly matched with the USPS ZIP+4 Product in effect. [A800.2.5]

### 7.5 Enclosed Reply Cards and Envelopes

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation Regular or Nonprofit Standard Mail, and addressed for return to a domestic delivery address, must meet the standards in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#), for enclosed reply cards and envelopes. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. [E640.1.2]

### 7.6 Discount for Heavy Automation Letters

Automation letters that weigh more than 3.3 ounces but not more than 3.5 ounces pay postage equal to the automation piece/pound rate and receive a discount equal to the automation nonletter piece rate (3.3 ounces or less) minus the automation letter piece rate (3.3 ounces or less). If claiming a destination entry rate, the discount is calculated using the corresponding rates. [E640.1.4]

## 244 Postage Payment and Documentation

### Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted and Enhanced Carrier Route Letters](#)
- [3.0 Postage Payment for Automation Letters](#)
- [4.0 Mailing Documentation](#)
- [5.0 Residual Pieces](#)

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Postage for Standard Mail must be paid with meter (604.4.0), permit imprint (604.6.0), or precanceled stamps (604.3.0). Postage-affixed pieces must bear the correct postage unless excepted by standard. A permit imprint may be used for mailings that contain nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

[P600.1.1]

### 2.0 Postage Payment for Presorted and Enhanced Carrier Route Letters

#### 2.1 Identical-Weight Pieces

Mailings of identical-weight pieces may have postage affixed to each piece at the exact rate for which the piece qualifies, or each piece in the mailing may have postage affixed at the lowest rate applicable to pieces in the mailing or mailing job. Alternatively, a nondenominated precanceled stamp may be affixed to every piece in the mailing or mailing job, or each piece may bear a permit imprint. If exact postage is not affixed, all additional postage and surcharges must be paid at the time of mailing with an advance deposit account or with a meter strip affixed to the required postage statement. If exact postage is not affixed, documentation meeting the standards in 4.0 must be submitted to substantiate the additional postage unless the pieces are identical weight and separated by rate when presented for acceptance. [P600.2.1]

#### 2.2 Nonidentical-Weight Pieces

Postage for nonidentical-weight pieces subject to the minimum per piece rates may be paid by meter stamps, precanceled stamps, or precanceled stamped envelopes. Mailings of nonidentical-weight pieces subject to the piece/pound rates may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter or precanceled stamps (if each piece has the full postage affixed). Alternatively, except for heavy automation and Enhanced Carrier Route letters, the mailer may affix the per piece rate to each piece and pay the pound rate for the mailing through an advance deposit account. Under this alternative, the mailer must provide a postage statement for each payment method and mark each piece "Pound Rate Pd via Permit," in the postage meter indicium or ad plate or other

244.2.3

means that ensures a legible endorsement. For mailings of nonidentical-weight pieces, “nonidentical” must be shown as the weight of a single piece on the applicable postage statement; other entries must be completed as directed. [P600.2.2]

### **2.3 Combined Rate**

Meter postage may be used for combined rate mailings containing both pieces subject to pound rates and pieces subject to minimum per piece charges. Postage for such mailings may be paid with permit imprint only if authorized by Business Mailer Support. [P600.2.3]

## **3.0 Postage Payment for Automation Letters**

### **3.1 All Pieces**

Unless authorized by the USPS under [705.2.0](#) through [705.5.0 in \*Advanced Preparation and Special Postage Payment Systems\*](#), when precanceled postage or meter stamps are used, only one payment method may be used in a mailing, and each piece must bear the correct postage at the rate claimed based on its eligibility. For mailings of nonidentical-weight pieces subject to the piece/pound rates, the mailer may affix the applicable per piece rate to each piece and pay the pound rate for the mailing by a permit imprint advance deposit account. All pieces prepared this way in the same mailing must be subject to the same pound rate. A postage statement must be submitted for each payment method and each piece must be marked “Pound Rate Pd via Permit,” in the postage meter indicium or ad plate or other means that ensures a legible endorsement. “Nonidentical” must be shown as the weight of a single piece on the applicable postage statement. [P600.3.1]

### **3.2 Adding Additional Postage**

In a metered or precanceled stamp mailing:

- a. Each piece must bear a precanceled stamp or meter postage in the exact postage or at the lowest rate applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing through an advance deposit account or with a meter stamp affixed to the required postage statement.
- b. Documentation presented with the postage statement must show the computation of the additional postage due for pieces not bearing full postage at the applicable rate (i.e., the difference between what the pieces bear and the correct postage at the rate for which each qualifies). [P600.3.2]

### **3.3 Nondenominated Precanceled Stamps**

A mailer may use nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement as described in [3.2b, \*Adding Additional Postage\*](#). [P600.3.3]

**3.4 Precanceled Stamps in Lower Rate Denominations**

A mailer may use precanceled stamps of a denomination less than the postage for the lowest rate in the mailing if:

- a. The stamps do not bear an improper rate marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement as described in [3.2b](#), [Adding Additional Postage](#). [P600.3.4]

**3.5 Mixed Rate Mailing Documentation**

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage rate to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest rate affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest rate affixed to any piece in the mailing and the rate for each rate level in the mailing. This computation must be documented to meet the basic standards in [4.0](#). No refund is paid for any piece where postage is affixed at a rate higher than the lowest rate claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement. [P600.3.5]

**4.0 Mailing Documentation****4.1 Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

**4.2 Basic Documentation Standards**

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

**4.3 Documentation Standards for Automation Mailings**

A complete postage statement must accompany each mailing. Each mailing also must be accompanied by presort and rate documentation produced by PAVE-certified or MAC-certified software or by standardized documentation. *Exception:* For mailings of fewer than 10,000 pieces, presort and rate

documentation is not required if postage at the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. Standard Mail mailings prepared under the value added refund procedures or as combined mailings must meet additional standardized documentation requirements under [604.10.0, Refunds and Exchanges](#), and [705.5.0, First-Class or Standard Mail Mailings With Different Payment Methods](#). [M810.1.3]

#### **4.4 Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### **4.5 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### **4.6 Standard Format for Documentation**

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0 in Standardized Documentation for First-Class Mail, Periodicals, Standard Mail, and Flat-Size Bound Printed Matter](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### **4.7 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0, Rulings on Mailing Standards](#). [P012.1.5]

#### **4.8 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

#### 4.9 Facsimile Postage Statements

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. For example: Part A, lines A5, A6, and total – Part A from Form 3602-R, and Part F, lines F1, F2, and total – Part F from Form 3602-RS, can be consolidated onto a single Form 3602 (Facsimile). Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

### 5.0 Residual Pieces

#### 5.1 Residual Standard Mail Subject to First-Class Rates

Mailers who have pieces weighing 13 ounces or less that do not qualify for Standard Mail rates but that are prepared as Standard Mail must pay single-piece First-Class Mail postage for such pieces. If mailers do not desire to receive First-Class Mail service for such pieces they may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. Mail bearing metered or precanceled stamp postage must pay the difference between the postage affixed at the Standard Mail rates and the single-piece First-Class Mail rates by means of an advance deposit account or by affixing a meter stamp for the appropriate amount to Form 3600-P. These pieces are reported in Part C on the reverse side of Form 3600-P under the heading “From Standard Mail.”
- c. Mail bearing permit imprints must pay the appropriate single-piece First-Class rates by completing Form 3600-R. These pieces are reported in Part C on the reverse side of Form 3600-R under the heading “From Standard Mail.” For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job. [P100.2.6]

#### 5.2 Residual Standard Mail Subject to Priority Mail Rates

Mailers who have permit imprint pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail rates but that are prepared as Standard Mail must pay Priority Mail postage for such pieces. Mailpieces paid with meters or permit imprints must re-envelope or otherwise prepare the pieces so that

### 244.5.2

when mailed they bear only the appropriate Priority Mail markings, ancillary service endorsements, and ACS codes and do not bear Standard Mail markings, endorsements, or ACS codes. Mailpieces paid with permit imprints for which mailers do not desire to receive Priority Mail service may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. The appropriate Priority Mail rates must be paid by completing Form 3600-PM. The pieces must be recorded on this postage statement on the line titled “Pieces From Standard Mail” in the postage calculation section. For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.  
[P100.3.2]

## 245 Mail Preparation

### Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Letter Trays](#)
- [4.0 Tray Labels](#)
- [5.0 Preparation for Presorted Letters](#)
- [6.0 Preparation for Enhanced Carrier Route Letters](#)
- [7.0 Preparation for Automation Rate Letters](#)

### 1.0 General Information for Mail Preparation

#### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. [M011.1.1]

#### 1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation, enhanced carrier route) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Standard Mail. Except as provided in [243.3.4, Residual Volume Requirement](#), the types of Standard Mail listed below may not be part of the same mailing.
  1. Automation Enhanced Carrier Route and any other type of mail.
  2. Automation rate and any other type of mail.
  3. Enhanced Carrier Route and any other type of mail.
  4. Enhanced Carrier Route letter rate pieces and Enhanced Carrier Route nonletter rate pieces.
  5. Presorted rate mail and any other type of mail.
  6. Machinable and nonmachinable pieces.
  7. Except as provided by standard, Regular mail may not be in the same mailing as Nonprofit mail, and Enhanced Carrier Route mail may not be in the same mailing as Nonprofit Enhanced Carrier Route mail.
  8. Customized MarketMail and any other type of mail. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (trays) for automation letters*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in the USPS City State Product.
- d. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- e. *3-digit scheme*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L003](#).
- f. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- g. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- h. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- i. *ADC/AADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) or automated area distribution center (AADC) (see [L801](#) or [L801](#)).
- j. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- k. *Mixed [ADC or AADC]*: the pieces are for delivery in the service area of more than one ADC or AADC.
- l. *Residual pieces/bundles* contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full* letter tray is one in which faced, upright pieces fill the length of the tray between 75% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the rate claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the rate claimed.
- e. A *5-digit scheme sort for automation letters* yields 5-digit scheme trays for those 5-digit ZIP Codes identified in the USPS City State Product and 5-digit trays for other areas. Mail prepared using 5-digit scheme sort must be entered no later than 90 days after the release date of the City State Product used to obtain the scheme information (see [708.3.0, Coding Accuracy Support System \(CASS\)](#)). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Trays prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is *always* optional, including when 5-digit sortation is required for rate eligibility, and need not be used for all 5-digit ZIP Codes that are part of a scheme.
- f. A *3-digit scheme sort* yields 3-digit scheme trays for those 3-digit ZIP Code prefixes listed in [L003](#) and 3-digit trays for other areas. The 3-digit ZIP Code prefixes in each scheme are treated as a single presort destination subject to a single minimum tray volume, with no further separation by 3-digit prefix required. Trays prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit areas are still considered 3-digit scheme sorted and are labeled accordingly.
- g. An *origin 3-digit* (or *origin 3-digit scheme*) tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray must be prepared for each.
- h. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility

### 245.1.4

standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.

- i. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- j. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- k. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- l. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [2.0](#).
- m. A *tic mark* is defined as a solid black rectangle that must be printed on both the front side (extending over the top) and back side (flap side) of the envelope. Tic marks may be used in lieu of separator cards for Standard Mail automation mailings and separator cards or rubber bands in Standard Mail nonautomation carrier route mailings prepared in full 5-digit carrier routes trays. Tic marks must be printed on the top edge of the first mailpiece in each carrier route grouping during the mailpiece production process and must meet the following specifications:
  1. Color: black.
  2. Reflectance and Contrast Ratio: The tic mark must meet the reflectance and contrast ratio specifications in [708.4.3, Reflectance](#).
  3. Location: The tic mark must extend along the top edge of the envelope, to the left of center line of the envelope. Its location must be referenced to the center line. The right edge of the tic mark must be 0.5 inch (+ 0.125 inch) from the center line of the envelope.

4. Size: The width of the tic mark must be 0.5 inch (+ 0.125 inch). The tic mark must extend over the top of the envelope, down each side a distance of 0.25 inch (+ 0.125 inch). When a second tic mark is used to indicate a tray break at the end of the tray, all specifications are the same as for one tick mark, except for the location on the envelope. When a second tic mark is used on the last piece in a tray to indicate a tray break, the right edge of the second tic mark must be 0.5 inch (+ 0.125 inch) from the left edge of the first tic mark.
- n. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., tray, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Standard Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable restrictions on bundles. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles

Cards and letter-size pieces are subject to these bundling standards:

- a. The maximum thickness for bundles of carrier route rate mail is 4 inches. The maximum thickness for other bundles is 6 inches.
- b. Mailings consisting entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch) must always be prepared in bundles.
- c. Bundles must be prepared for mail in all less-than-full trays and 3-digit carrier routes trays; for nonmachinable Presorted Standard Mail; and for Standard Mail pieces where the mailer has requested “manual only” processing.
- d. Separator cards or tic marks *may* be used instead of bundling for letter-size pieces in full 5-digit carrier routes trays of Enhanced Carrier Route Standard Mail. Separator cards or tic marks *must* be used instead of bundling for letter-size pieces in full 5-digit trays of automation Enhanced Carrier Route Standard Mail. The cards must be of paper or card stock, at least 0.25 inch higher than the highest pieces in the mailing, and in front of the corresponding

### 245.2.4

groups of mail. The tic mark must be applied during the mailpiece production process and be printed on the top edge of the envelope, to the left of the center line of the envelope.

- e. For mailings consisting entirely of card-size pieces and mail in less-than-full trays, bundles must be secured with rubber bands, elastic strapping, flat plastic strapping, or string. (Elastic strapping must have a minimum strength of 15 pounds and a minimum of 150% elongation before breaking. Minimum tension, when applied to the bundle, must be 50% breaking strength. Elastic strapping may not be used unless approved by USPS Engineering. If requested, the mailer must be able to show such approval for the strapping material used for a mailing.)
- f. Bundles up to 1 inch thick must be secured with appropriate banding placed once around the girth (narrow dimension). Bundles over 1 inch thick must be secured with at least two bands, one around the length and one around the girth. [M020.2.1]

## 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

## 2.5 Exception to Bundle Preparation—Full Single-Sort-Level Trays

In bundle-based mailings not entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch), mail need not be prepared in 5-digit bundles if placed in a full 5-digit tray. Similarly, mail need not be prepared in other levels of bundles when it will be placed in a full tray to the corresponding tray level, and none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if, when correctly sorted, it would have all been prepared in ADC bundles to the same destination; conversely, this exception would not apply if some pieces would require preparation in 5-digit or 3-digit bundles. [M020.1.9]

**2.6 Pieces With Simplified Address**

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder). Bundles must be secure subject to specific thickness limits in [707.19.5, Letter-Size Bundles](#), for cards and letter-size pieces. [M020.2.3]

**2.7 Bundles With Fewer Than the Minimum Number of Pieces Required**

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of 28 pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

**2.8 Labeling Bundles**

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

**2.9 Use of Optional Endorsement Lines (OEL)**

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under [708.7.0](#). [M013.1.1]

**2.10 Use of Carrier Route Information Lines**

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [2.0](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Enhanced Carrier Route Standard Mail mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

245.2.11

### 2.11 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “STD LTR BC R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

## 3.0 Letter Trays

### 3.1 Standard Containers

Mailings must be prepared in letter trays with sleeves. Containers for Customized MarketMail are specified in 705.1.4. The following additional standards apply:

- a. Palletized mail is also subject to 705.8.0.
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2]

### 3.2 Tray Sizes

These approximate measurements define the letter tray sizes that apply to all Standard Mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high. [M033.1.3]

### 3.3 Letter Tray Preparation

Letter trays are prepared as follows:

- a. Subject to availability of equipment, standard managed mail (MM) trays must be used for all letter-size mail, except that extended managed mail (EMM) trays must be used when available for letter-size mail that exceeds the inside dimensions of MM trays defined in 3.2. When EMM trays are not available for those larger pieces, they must be placed in MM trays, angled back, or placed upright perpendicular to the length of the tray in row(s) to preserve their orientation.
- b. Pieces must be “faced” (oriented with all addresses in the same direction with the postage area in the upper right).
- c. Each tray prepared must be filled before filling the next tray, with the contents in multiple trays relatively balanced. When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that results in the

fewest total number of trays for that presort level. As an alternative, if there is mail remaining, mailers may move those pieces to the next higher presort level at which there is a minimum quantity (e.g., 150 pieces).

- d. For presort destinations that do not require full trays, pieces are placed in a less-than-full tray.
- e. Mailers must use as few trays as possible without jeopardizing rate eligibility. For instance, a mailer will never have two 1-foot trays to a single destination; instead, that mail must be placed in a single 2-foot tray. A 1-foot tray is prepared only if it is a full tray with no overflow; or if there is less than 1 foot of mail for that destination; or if the overflow from a full 2-foot tray is less than 1 foot of mail.
- f. Each tray must bear the correct tray label.
- g. Each tray must be sleeved and strapped under [3.4](#) and [3.5](#).
- h. If a mailing is prepared using an MLOCR/barcode sorter and is submitted with standardized documentation, then pieces do *not* have to be grouped by 3-digit ZIP Code prefix (or by 3-digit scheme, if applicable) in AADC trays, or by AADC in mixed AADC trays. [M033.2.1]

### 3.4 Tray Sleevng and Strapping

Each letter tray must be sleeved using USPS-provided sleeves. Except under [3.5](#), each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve. [M033.1.5]

### 3.5 Strapping Exception

Strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF (mail processing plant) service area. [M033.1.6]

### 3.6 Origin/Entry 3-Digit/Scheme Trays

After all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the post office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the post office where the mail is verified—e.g., a PVDS deposit site). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area. [M033.1.7]

## 4.0 Tray Labels

### 4.1 Basic Standards

Only tray labels may be used for trays. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Container labels for automation rate mailings are subject to [4.9](#), [Barcoded Tray Labels](#), and [708.6.0](#). [M031.1.1]

### 4.2 Physical Characteristics of Tray Labels

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum. [M031.3.2]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., "ADC"). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit trays for overseas military destinations, Line 1 shows, from left to right, "APO" or "FPO," followed by "AE" (for ZIP Codes within the ZIP Code prefix range 090-098), "AA" (for ZIP Codes within the 3-digit ZIP Code prefix 340), or "AP" (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the tray and other information as specified by standards. [M031.1.3]

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of tray and pallet labels.

| CONTENT TYPE   | CODE  |
|--|---|
| Barcoded   | BC  |
| Barcoded and Nonbarcoded   | BC/NBC  |
| Carrier Route  | C (type of route)   |
| Carrier Routes   | CR-RT or CR-RTS   |
| Digit  | D   |
| General Delivery Unit  | G   |
| Highway Contract Route   | H   |
| Letters  | LTR or LTRS   |
| Machinable   | MACH  |
| Manual (cannot be processed on automated equipment or mailer requests manual processing) | MAN or MANUAL   |
| Mixed  | MXD   |
| Nonmachinable  | NON MACH  |
| Nonbarcoded  | NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under <a href="#">705.9.0</a> ) |
| Post Office Box Section  | B   |
| Rural Route  | R   |
| Standard Mail  | STD   |
| Working  | WKG   |

[M031.5.0]

#### 4.5 **Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

#### 4.6 **Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

#### 4.7 **Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.

- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3. [M031.1.5]

### 4.8 Placement of Tray Label

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down. [M031.3.1]

### 4.9 Barcoded Tray Labels

#### 4.9.1 Basic Standards for Barcoded Tray Labels

[Exhibit 4.9.1, Required Barcoded Container Labels](#), shows the types of mail requiring barcoded tray labels. Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing. [M032.1.1]

#### Exhibit 4.9.1 Required Barcoded Container Labels

| RATE OR TYPE  | PROCESSING CATEGORY  |
|---|--|
| <b>Standard Mail</b>  |  |
| Automation rate   | Letter-size  |
| Enhanced Carrier Route high-density and saturation letter rates | Letter-size (barcoded labels not required for letter-size pieces at nonletter rates) |

[Exhibit M032.1.1]

#### 4.9.2 Physical Characteristics of Barcoded Tray Labels

A barcoded tray label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.2i](#).
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).

- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum. [M032.2.1]

## 5.0 Preparation for Presorted Letters

### 5.1 Basic Standards

All mailings and all pieces in each mailing at Regular Standard Mail and Nonprofit Standard Mail nonautomation rates are subject to specific preparation standards in [5.0](#) and to these general standards (automation rate mailings must be prepared under [7.0](#)):

- a. All pieces must meet the eligibility standards in [243.2.0](#) through [243.5.0](#). Nonprofit Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces in each mailing must be in the letter-size processing category. Unless excepted by standard, letter-size pieces must be prepared in letter trays.
- c. All pieces must meet the applicable general preparation standards in [202, Elements on the Face of a Mailpiece](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [5.0](#).
- e. Sortation determines rate eligibility as specified in [243.5.0, Additional Eligibility Standards for Presorted Standard Mail Letters](#). [M610.1.1]

### 5.2 Marking

Subject to the marking standards in [202.3.0, Placement and Content of Mail Markings](#), and [202.4.0, Endorsement Placement](#), regular Standard Mail pieces must be marked “Presorted Standard” (or “PRSRT STD”) and Nonprofit Standard Mail pieces must be marked “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”). Regular and Nonprofit Standard Mail pieces must not be marked “ECRLOT,” “ECRWSH,” “ECRWSS,” “AUTO,” “AUTOOCR,” or “Single-Piece” (or “SNGLP”). [M610.1.1b1]

### 5.3 Manual Only Option

Mailers who prefer that the USPS not automate letter-size pieces (including cards) must use the bundling and tray preparation sequence for nonmachinable pieces in [3.5, Strapping Exception](#), and [3.4, Tray Sleevling and Strapping](#). [M610.1.6]

### 5.4 Machinable Preparation

#### 5.4.1 Machinable Bundling

Machinable pieces are not bundled, except for (see [707.19.0, Bundles](#)):

- a. Card-size pieces.
- b. All pieces in a less-than-full 3-digit, 3-digit origin, or 3-digit entry tray.
- c. All pieces in a less-than-full mixed AADC tray. [M610.2.1]

#### 5.4.2 Traying and Labeling

Only mail eligible for the 3/5 rate (i.e., 150 or more pieces for the 3-digit area) may be prepared in 5-digit and 3-digit trays. Preparation sequence, tray size, and labeling:

- a. 5-digit (optional); full trays (no overflow); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail, preceded for military mail by correct prefix under [4.0, Tray Labels](#).
  2. Line 2: "STD LTR 5D MACH."
- b. 3-digit (required); no minimum; labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "STD LTR 3D MACH."
- c. Origin 3-digit(s) (required) and entry 3-digit(s) (optional); no minimum; labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "STD LTR 3D MACH."
- d. AADC (required); full trays (no overflow), with pieces grouped by 3-digit ZIP Code prefix; labeling:
  1. Line 1: [L801](#), Column B.
  2. Line 2: "STD LTR AADC MACH."
- e. Mixed AADC (required); no minimum, with pieces grouped by AADC; labeling:
  1. [\[02-04-05\]](#) Line 1: [L011](#), Column B. If entered at an ASF or BMC or for mail placed on an ASF or BMC pallet under option in [705.8.10.2, L010](#), Column B.
  2. Line 2: "STD LTR MACH WKG." [\[M610.2.2\]](#)

### 5.5 Nonmachinable Preparation

#### 5.5.1 Nonmachinable Bundling

Except as provided in [2.5, Exception to Bundle Preparation—Full Single-Sort-Level Trays](#), bundling is required before traying. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Mailers who prefer that the USPS not automate letter-size pieces must also identify each bundle with a facing slip marked "MANUAL ONLY" or use a "MANUAL ONLY" optional endorsement line (see [708.7.0](#)). Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL); labeling not required for pieces in full 5-digit trays.
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [\[M610.3.1\]](#)

### 5.5.2 Traying and Labeling

Only mail eligible for the 3/5 rate (i.e., 150 or more pieces for the 3-digit area) may be prepared in 5-digit and 3-digit trays. Preparation sequence, tray size, and labeling:

- a. 5-digit (required); full trays (no overflow); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, Tray Labels](#), for overseas military mail).
  2. Line 2: "STD LTR 5D MANUAL."
- b. 3-digit (required); no minimum; labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "STD LTR 3D MANUAL."
- c. Origin 3-digit(s) (required) and entry 3-digit(s) (optional); one-bundle minimum (for origin) and no minimum (for entry); labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "STD LTR 3D MANUAL."
- d. ADC (required); full trays (no overflow); labeling:
  1. Line 1: [L004](#), Column B.
  2. Line 2: "STD LTR ADC MANUAL."
- e. Mixed ADC (required); no minimum; labeling:
  1. [\[03-17-05\]](#) [\[02-03-05\]](#) Line 1: "MXD" followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry post office, as shown in [L004](#). If placed on an ASF or BMC pallet under option in [705.8.10.2](#), use [L010](#).
  2. Line 2: "STD LTR MANUAL WKG." [\[M610.3.2\]](#)

## 6.0 Preparation for Enhanced Carrier Route Letters

### 6.1 Basic Standards

All mailings and all pieces in each mailing at Enhanced Carrier Route Standard Mail and Nonprofit Enhanced Carrier Route Standard Mail nonautomation rates are subject to specific preparation standards in [6.0](#) and to these general standards (Enhanced Carrier Route automation rate mailings must be prepared under [7.0](#)):

- a. All pieces must meet the standards for basic eligibility in [243.2.0](#) through [243.4.0](#) and specific eligibility in [243.6.0, Additional Eligibility Standards for Enhanced Carrier Route Standard Mail](#). Nonprofit Enhanced Carrier Route Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces in each mailing must be in the letter-size processing category. Unless excepted by standard, letter-size pieces must be prepared in letter trays.
- c. All pieces must meet the applicable general preparation standards in [2.0](#) through [4.0](#) and [202, Elements on the Face of a Mailpiece](#), and the following:

### 245.6.2

1. Pieces must be sequenced according to [6.9, \*Delivery Sequence Standards\*](#).
2. Pieces with a simplified address format must meet the standards in [602.3.0, \*Use of Alternative Addressing\*](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [6.0](#) or the palletization standards in [705.8.0](#).
- e. Sortation determines rate eligibility as specified in [243.6.0, \*Additional Eligibility Standards for Enhanced Carrier Route Standard Mail\*](#). [M620.1.1]

#### **6.2 Marking**

Subject to the marking standards in [202.3.0, \*Placement and Content of Mail Markings\*](#), and [202.4.0, \*Endorsement Placement\*](#), Enhanced Carrier Route Standard Mail pieces must be marked “Presorted Standard” (or “PRSRT STD”), and Nonprofit Enhanced Carrier Route Standard Mail pieces must be marked “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”). All pieces must also be marked “ECRLOT” for basic rate, “ECRWSH” for high density rate, or “ECRWSS” for saturation rate. [M620.1.1c1]

#### **6.3 Residual Pieces**

Pieces not sorted as a carrier route mailing must be prepared as a separate mailing at Standard Mail automation or Presorted rates or at single-piece First-Class or Priority Mail rates. [M620.1.5]

#### **6.4 General Carrier Route Bundle Preparation**

Only carrier route bundles are prepared. Bundles are not required in full carrier route trays. [M620.2.1]

#### **6.5 Bundles and Trays With Fewer Than the Minimum Number of Pieces Required**

As a general exception to [6.4](#) and [6.6](#), a bundle with fewer than 10 pieces *and* a less-than-full tray may be prepared to a carrier route when the saturation rate is claimed for the contents and the applicable density standard is met. [M620.1.3]

#### **6.6 Bundle Preparation**

Bundle size: carrier route; required (10-piece minimum). Carrier route bundle labels are based on tray level in which placed:

- a. No label is required if the bundle is placed in a correctly labeled carrier route tray.
- b. Bundles in 5-digit carrier routes trays and in 3-digit carrier routes trays must have a facing slip unless the pieces in the bundle show a carrier route information line or an optional endorsement line. [M620.2.2]

#### **6.7 Traying and Labeling**

Preparation sequence, tray size, and labeling:

- a. Carrier route: required; full trays only, no overflow.
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, \*Tray Labels\*](#), for overseas military mail).

2. Line 2: (a) Saturation: “STD LTR BC WSS,” followed by route type and number; (b) High density: “STD LTR BC WSH,” followed by route type and number; (c) Basic: “STD LTR BC LOT,” followed by route type and number.
- b. 5-digit carrier routes: required if full tray, optional with minimum one 10-piece bundle.
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.0, Tray Labels](#), for overseas military mail).
  2. Line 2: “STD LTR 5D CR-RT BC.”
- c. 3-digit carrier routes: optional with minimum one 10-piece bundle for each of two or more 5-digit areas.
  1. Line 1: city, state, and 3-digit ZIP Code prefix shown in [L002](#), Column A, that corresponds to 3-digit ZIP Code prefix on mail.
  2. Line 2: “STD LTR 3D CR-RT BC.” [M620.3.1]

### 6.8 Alternative Line 2 Information

For trays containing nonbarcoded or nonmachinable letter-size pieces, these Line 2 label designations are used in place of “BC”:

- a. Trays containing nonbarcoded machinable pieces: “MACH.”
- b. Trays containing nonmachinable pieces: “MAN.”
- c. Trays containing simplified address pieces: “MAN.” [M620.3.2]

### 6.9 Delivery Sequence Standards

#### 6.9.1 Basic Standards

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under [6.1](#) through [6.8 in Preparation for Enhanced Carrier Route Letters](#) and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards.

[M050.1.1]

#### 6.9.2 Missing Addresses

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

[M050.1.2]

#### 6.9.3 Updating Walk Sequence Information—General

Walk-sequence rate pieces prepared with other than a simplified address format under [6.9.4](#) must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

245.6.9.4

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File (DSF) or Delivery Sequence File, Second Generation (DSF<sup>2</sup>).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer. [M050.2.2]

### **6.9.4 Updating Walk Sequence Information for Simplified Addressing**

Walk-sequence rate pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

[M050.2.1]

### **6.9.5 Out-of-Date Walk Sequence Information**

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence rates. [M050.2.3]

### **6.9.6 Updating Line-of-Travel Sequence Information**

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic rates. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing. [M050.2.4]

## **6.10 Delivery Sequence Documentation**

### **6.10.1 Basic Standards**

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF<sup>2</sup> invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer’s bills for address sequencing service charges.

- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software. [M050.3.1]

#### **6.10.2 High Density**

For each carrier route to which high density rate mail is addressed, the mailer must document the total number of addressed pieces to the route. If there are fewer than 125 addressed pieces for a given route, the documentation also must show the number of possible deliveries on the route. [M050.3.2]

#### **6.10.3 Saturation Density—Simplified Address Mail**

For each carrier route to which mail with a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.3]

#### **6.10.4 Saturation Density—Other Mail**

For each carrier route to which mail without a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.4]

#### **6.10.5 Both Rates**

If a mailing contains pieces qualifying for both walk-sequence rates, the documentation required by [6.10.2, High Density](#), and either [6.10.3, Saturation Density—Simplified Address Mail](#), or [6.10.4, Saturation Density—Other Mail](#), may be combined. Entries for pieces at the high density rate must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing. [M050.3.5]

#### **6.10.6 Carrier Route Rate**

If a mailing includes high density and saturation rate and basic carrier route rate pieces, in addition to the applicable information required by [6.10.2](#) through [6.10.5](#) in [Delivery Sequence Documentation](#), the documentation for the basic carrier route rate mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each rate for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route rate must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route rate. [M050.3.6]

## 7.0 Preparation for Automation Rate Letters

### 7.1 Basic Standards

Letter-size automation rate Standard Mail must be prepared under [7.0](#) and the eligibility standards for the rate claimed. Trays must bear barcoded tray labels under [4.9](#). [M810.1.1]

### 7.2 Mailings

The requirements for mailings are as follows:

- a. General. All pieces in a mailing must meet the standards in [201.1.0](#), *Physical Standards for Machinable Letters and Cards*, and [201.3.0](#), *Physical Standards for Automation Letters and Cards*, and must be sorted together to the finest extent required for the rate claimed. The definitions of a mailing and permissible combinations are in [1.0](#), *General Information for Mail Preparation*.
- b. Standard Mail. Automation carrier route pieces must be prepared as a separate mailing (meet a separate minimum volume requirement) from pieces prepared at 5-digit, 3-digit, AADC, and mixed AADC rates. [M810.1.2]

### 7.3 Marking

All Standard Mail automation rate pieces must be marked under [202.3.0](#), *Placement and Content of Mail Markings*. Pieces claimed at an automation rate must bear the appropriate class marking and, except as provided in [202.3.0](#), *Placement and Content of Mail Markings*, “AUTO” (or “AUTOOCR” for carrier route rate). Pieces not claimed at an automation rate must not bear “AUTO” or “AUTOOCR” unless single-piece rate postage is affixed or a corrective single-piece rate marking “Single-Piece” or “SNGLP” is applied. [M810.1.4]

### 7.4 General Preparation

Grouping, bundling, and labeling are not generally required or permitted, *except* bundling is required in any mailing consisting entirely of card-size pieces and for pieces in overflow, less-than-full, and 3-digit carrier routes trays. [M810.1.5]

### 7.5 Carrier Route Traying Standards

Carrier route groups (or bundles, if applicable) may be placed only in carrier route, 5-digit carrier routes, or 3-digit carrier routes trays. Preparation of mail to qualify for automation carrier route rates is optional for Standard Mail. [M810.1.6]

### 7.6 Carrier Route Pieces

Grouping size, preparation sequence, and labeling: carrier route (only); required (10-piece minimum); use an optional endorsement line or carrier route information line. Group pieces by carrier route in full 5-digit carrier routes trays, using separator cards or tic marks under [4.3](#), *Line 1 (Destination Line)*, not bundling. Bundle pieces by carrier route in less-than-full 5-digit carrier routes trays and in all 3-digit carrier routes trays. [M810.2.1]

### 7.7 Tray Preparation

Preparation sequence, tray size, and Line 1 labeling:

- a. Carrier route: optional, but required for rate eligibility (full trays); no overflow; for Line 1, use city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by the prefixes under [4.0](#), *Tray Labels*.

- b. 5-digit carrier routes (carrier route pieces/bundles only): required for rate eligibility if full tray, optional with minimum one 10-piece bundle; for Line 1, use city, state, and 5-digit ZIP Code destination of bundles, preceded for military mail by the prefixes under [4.0, Tray Labels](#).
- c. 3-digit carrier routes (carrier route bundles only): optional with minimum one 10-piece bundle for each of two or more 5-digit areas; for Line 1, use the city, state, and ZIP shown in [L002](#), Column A, that corresponds to the 3-digit ZIP Code prefix of bundles.
- d. 5-digit/scheme: optional, but 5-digit trays required for rate eligibility (150-piece minimum); overflow allowed; for Line 1, for 5-digit trays, use city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by the prefixes under [4.0, Tray Labels](#); for Line 1, for optional 5-digit scheme trays, use destination shown in the current USPS City State Product.
- e. 3-digit/scheme: required (150-piece minimum except no minimum for required origin/optional entry 3-digit(s)/scheme); overflow allowed; for Line 1, use [L002](#), Column B.
- f. AADC: required (150-piece minimum); overflow allowed; group pieces by 3-digit ZIP Code prefix (or 3-digit/scheme if applicable); for Line 1, use [L801](#), Column B.
- g. [\[03-17-05\]](#) [\[02-03-05\]](#) Mixed AADC: required (no minimum); group pieces by AADC; for Line 1 labeling: use [L011](#), Column B. If entered at an ASF or BMC or for mail placed on an ASF or BMC pallet under option in [705.8.10.2](#), use [L010](#), Column B. [\[M810.2.2\]](#)

## 7.8 Tray Line 2

Line 2: "STD LTR" and:

- a. Carrier route: "CR BC," followed by route type and number.
- b. 5-digit carrier routes: "5D CR-RT BC."
- c. 3-digit carrier routes: "3D CR-RT BC."
- d. 5-digit scheme: "BC 5D SCHEME."
- e. 5-digit: "5D BC."
- f. 3-digit scheme: "BC SCHEME" and, if applicable, as shown in [L002](#), Column B, followed by the letter "A," "B," or "C."
- g. 3-digit: "3D BC."
- h. AADC: "AADC BC."
- i. Mixed AADC: "BC WKG." [\[M810.2.3\]](#)

## 7.9 Presentation

Upon presentation of letter-size automation rate Standard Mail mailings to the Postal Service for verification, mailers must present all mixed AADC trays together, and such trays must either be adjacent to one another or side by side, and must be placed as the top layer(s) on any given container. [\[M810.1.8\]](#)

# 246 Enter and Deposit

## Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

## 1.0 Presenting a Mailing

### 1.1 Basic Standards for Standard Mail Deposit

Standard Mail must be presented at the post office where the permit or license is held and the presort mailing fee is paid. Mailings must be presented at the locations and times specified by the postmaster. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#).

Plant-loaded mailings must be presented, verified, accepted, and entered as specified by the plant load agreement and applicable standards. Metered Standard Mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). Nonprofit Standard Mail must be presented only at post offices where the organization producing the mailing has an approved nonprofit authorization ([703.1.0](#)). [D600.2.1]

### 1.2 Separation of Mailings

Pieces at different rates (e.g., 3/5 and basic) may be combined in the same mailing as provided in [245.1.0](#). Separate mailings may be reported on the same postage statement if the pieces in the mailings are in the same letter-size processing category, are part of the same mailing job, and are presented for verification at the same time. [D600.2.2]

## 2.0 Destination Entry

### 2.1 General

Except for Customized MarketMail pieces as defined in [705.1.0](#), Regular, Nonprofit, Enhanced Carrier Route, and Nonprofit Enhanced Carrier Route Standard Mail pieces meeting the basic standards in [243.2.0](#) through [243.4.0](#) may qualify for the destination BMC, SCF, or DDU entry rates, as applicable, if deposited at the correct destination postal facility, subject to the general standards below and the specific standards in [3.0](#), [4.0](#), and [5.0](#). Only one destination reduction may be claimed for each piece. An individual pallet may contain mail claimed at different destination entry rates. [E650.1.1]

### 2.2 Minimum Volume

A destination entry rate Standard Mail mailing is subject to these minimum volume requirements:

### 246.2.3

- a. Each mailing must contain at least 200 addressed pieces or 50 pounds of addressed pieces.
- b. Except as provided in [2.2e](#), each group of pieces prepared for deposit at different destination entry post offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3602 postage statement.
- c. Separate Standard Mail mailings may be copalletized under [705.8.0](#).
- d. Pieces deposited at the same destination entry post office but claimed at different destination entry rates may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry post office is the proper facility for claiming each of the destination entry discounts.
- e. When pieces from different Standard Mail mailings (Presorted, automation, and/or Enhanced Carrier Route) are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3602 and accompanied by Form 3602-C (or a postage statement register) to meet the 200-piece or 50-pound minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 200 pieces or 50 pounds at a single destination entry post office if there is a total of at least 200 pieces or 50 pounds of Presorted rate mail, 200 pieces or 50 pounds of automation rate mail, and/or 200 pieces or 50 pounds of Enhanced Carrier Route mail for all entry points combined for the single presort file listed on Form 3602 and Form 3602-C (or a postage statement register). [E650.1.3]

### **2.3 Postage Payment**

Postage payment for destination entry mailings is subject to the same standards that apply generally to Standard Mail. Postage and fees are paid to the post office that verifies the mailings. The correct mailing fee(s) must be paid for the current 12-month period at the postal facility where postage is paid for the mailing. [E650.1.4]

### **2.4 Office of Mailing**

Unless the mailing is paid and deposited as a metered mail drop shipment (see [705.17.0](#)) or a plant-verified drop shipment (see [705.15.0](#)), mail paid with meter postage, precanceled stamps, or permit imprint must be deposited at the post office that issued the corresponding license or permit, or at the destination bulk mail center serving that post office. Under the latter alternative, only the DBMC rate is available. [E650.1.5]

### **2.5 Documentation**

No documentation for destination entry discounts is required, although the mailing must be accompanied by the appropriate postage statement. Documentation may be required by other rates or discounts claimed for the same mailing. [E650.1.6]

**2.6 Plant Loads**

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry discounts. [E650.1.7]

**2.7 Verification****2.7.1 Place**

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification either:

- a. At the origin mailer's plant or the origin post office serving the mailer's plant under an authorized plant-verified drop shipment system.
- b. At the destination post office or business mail entry unit. [E650.2.1]

**2.7.2 Mail Separation and Presentation**

Destination entry rate mail must be verified under a PVDS system (705.15.0) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination sectional center facility, or other designated destination postal facility. Only plant-verified drop shipments may be deposited at a destination delivery unit not co-located with a post office or other postal facility having a business mail entry unit. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each mailing must be separated from other mailings for verification. For PVDS, destination entry rate mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as Standard Mail, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- d. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings. [E650.2.2]

**2.7.3 Form 8125**

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying post office. [E650.2.3]

**2.7.4 At BMC**

For a mailing to be verified at a BMC, the post office where the mailer's account or license is held must be within the service area of that BMC. The post office must authorize the BMC to act as its agent by sending Form 4410 to the BMC. [E650.2.4]

**2.7.5 PVDS Seal**

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility. [E650.2.5]

#### **2.7.6 Mailer Transport**

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility (BMC, SCF, or delivery unit), appropriate to the mailing and the rate claimed. [E650.2.6]

#### **2.7.7 Volume Standards**

Except as permitted for a local mailer under 2.8.13, destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination rate is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, *mailer* is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).
- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination rate mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments. [E650.2.7]

### **2.8 Deposit**

#### **2.8.1 Time and Location of Deposit**

Each mailing claimed at a destination rate must be deposited at the time and location specified by the USPS. [E650.3.1]

#### **2.8.2 Freight**

Drop shipments are freight until deposited and accepted as mail at the destination facility. [E650.3.2]

#### **2.8.3 Appointments**

Appointments must be made for destination entry rate mail as follows:

- a. Except for a local mailer under 2.8.13 and mailings of perishable commodities, appointments for deposit of destination entry rate mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.

- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with Standard Mail or Package Services as a mixed load (707.28.0, [Destination Entry Rate Eligibility](#)), an appointment must be obtained for deposit at a destination entry facility.  
[E650.3.3]

#### 2.8.4 Advance Scheduling

Except under 2.8.13, a mailer must schedule deposit of destination rate mailings at least 24 hours in advance by contacting the proper district or BMC control center or destination delivery unit. Appointments at delivery units must be made by calling the delivery unit at least 24 hours in advance. Appointments for ASFs, SCFs, or for any multistop loads must be made through the USPS district control center. Appointments for BMC loads must be scheduled by the proper BMC control center. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type. [E650.3.4]

#### 2.8.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units. [E650.3.5]

#### 2.8.6 Redirection by USPS

A mailer may be directed to transport destination entry rate mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints. [E650.3.6]

#### 2.8.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF rate mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF rate in this

situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

[E650.3.7]

#### **2.8.8 Recurring Appointments**

*Recurring* refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule. [E650.3.8]

#### **2.8.9 Vehicle Unloading**

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs, ASFs, and SCFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At delivery units, the driver must unload all mail within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver is required to unload, unstack, and unstrap them. If a mailer transports palletized mail to a DDU facility that cannot handle pallets, then the driver must unload the pallets into a container specified by the delivery unit.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area. [E650.3.9]

**2.8.10 Drop and Pick**

Drop and pick service is not available for destination entry Standard Mail. [E650.3.10]

**2.8.11 Demurrage**

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry rate mailings. [E650.3.11]

**2.8.12 Appeals**

Mailers who believe they are denied equitable treatment may appeal to the manager, customer service (district), responsible for the destination postal facility. [E650.3.12]

**2.8.13 Exception for Local Mailer**

The restrictions in [2.7.7, Volume Standards](#), and [2.8.4, Advance Scheduling](#), do not apply when a mailer deposits mailings for verification and acceptance at the local post office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry rates for mailings or portions of mailings deposited at the local post office that meet the standards in [3.0](#) through [5.0 in Enter and Deposit](#). [E650.4.0]

**3.0 Destination Bulk Mail Center (DBMC) Entry**

**3.1 Definition**

For this standard, *destination bulk mail center (DBMC)* includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) as shown in [Exhibit 3.1, BMC/ASF—DMBC Rate Eligibility](#). [E650.5.1]

### Exhibit 3.1 BMC/ASF—DMBC Rate Eligibility

| ELIGIBLE DESTINATION ZIP CODES  | ENTRY FACILITY                    |

[Exhibit E751.1.3]

### 3.2 Eligibility

Pieces in a mailing that meet the standards in 2.0 and 3.0 are eligible for the DBMC rate when they meet all of the following conditions: 1) are deposited at a BMC or ASF; 2) are addressed for delivery to one of the 3-digit ZIP Codes served by the

BMC or ASF where deposited that are listed in [Exhibit 3.1](#); and 3) are placed in a tray or pallet (subject to the standards for the rate claimed) that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within the service area of that BMC or ASF (see [Exhibit 3.1](#)). DBMC rate mail also must be eligible for Presorted, automation, or Enhanced Carrier Route rates, subject to the corresponding standards for those rates. [E650.5.2]

### 3.3 Eligibility for ADC or AADC Mailpieces

All pieces in an ADC sack or tray or AADC tray are eligible for the DBMC discount if the ADC or AADC facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the sack or tray is deposited as shown in [Exhibit 3.1](#). All pieces in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility that is the destination of the bundle (determined by using the “Label To” ZIP Code in Column B of [L004](#)) is within the service area of the BMC or ASF at which it is deposited as shown in [Exhibit 3.1](#). [E650.5.3]

### 3.4 Eligibility for Mixed ADC Bundles, Trays, or Mixed AADC Trays

Mailpieces either in a mixed ADC bundle or tray or in a mixed AADC tray can qualify for the DBMC rates if the following standards are met:

- a. All pieces in the bundle or tray must destinate within the ASF or BMC service area shown in [Exhibit 3.1](#), [BMC/ASF—DMBC Rate Eligibility](#).
- b. [\[03-17-05\]](#) [\[02-03-05\]](#) Use labeling list [L010](#) when labeling bundles or trays containing such pieces.
- c. Pieces claiming DBMC rates and any mixed ADC or mixed AADC pieces not claiming DBMC rates must be prepared in separate mixed ADC bundles or trays or in separate mixed AADC trays.
- d. Otherwise applicable restrictions (e.g., minimum volume, number of less-than-full trays) are excepted when necessary to meet the standards in [3.4](#). [E650.5.4]

### 3.5 Vehicles

Mailings deposited at a DBMC must be presented in vehicles compatible with BMC dock and yard operations. [E650.5.6]

### 3.6 Form 4410

Mailings may be deposited at the DBMC only if that facility is authorized (by Form 4410) to act as acceptance agent for the entry post office (i.e., where the meter license, precanceled stamp permit, or permit imprint authorization is held). Form 4410 is not required for plant-verified drop shipments. [E650.5.7]

## 4.0 Destination Sectional Center Facility (DSCF) Entry

### 4.1 Definition

For this standard, *destination sectional center facility (DSCF)* refers to the facilities listed in [L002](#), Column C, and [L006](#), Column C. [E650.6.1]

246.4.2

### 4.2 Eligibility

Pieces in a mailing that meet the standards in [2.0, Destination Entry](#), and [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), are eligible for the DSCF rate when deposited at a DSCF, addressed for delivery within that facility's service area, and placed in other than an ADC, AADC, mixed ADC, or mixed AADC tray or sack, or BMC sack or pallet (as permitted by the standards for the rate claimed) that is labeled to that DSCF or to a postal facility within its service area. Pieces prepared under [2.0](#) and [4.0](#) and that are prepared in 5-digit bundles placed in a merged 5-digit sack or pallet or in a merged 5-digit scheme sack or pallet that is deposited at the destination delivery unit as defined in [5.1](#) are eligible for the DSCF rate. DSCF rate mail may also be eligible for a presort or automation discount, subject to the corresponding standards. [E650.6.2]

### 4.3 Vehicles

Mailings deposited at a DSCF must be presented in vehicles that are compatible with SCF dock and yard operations. [E650.6.3]

## 5.0 Destination Delivery Unit (DDU) Entry

### 5.1 Definition

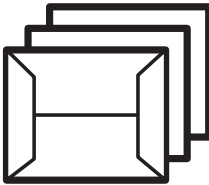

For this standard, *destination delivery unit (DDU)* refers to the facility designated by the USPS district drop shipment coordinator (for automation rate Standard Mail) or the facility (post office, branch, station, etc.) where the carrier cases mail for delivery to the addresses on pieces in the mailing (for other Standard Mail). [E650.7.1]

### 5.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [5.0](#) are eligible for the DDU rate when deposited at a DDU, addressed for delivery within that facility's service area (carrier routes), and placed in properly prepared and labeled carrier route bundles sorted to carrier route trays or 5-digit carrier routes trays or palletized under [705.8.0](#) and otherwise eligible for and claimed at a carrier route rate. Pieces for which the DDU discount is claimed must also be eligible for and claimed at either the carrier route or a walk-sequence rate. No other rates or discounts are available. A mailing that contains copies claimed at the DDU rates may include pieces claimed at other destination entry discounts and pieces for which no destination discount is claimed, subject to the standard for separation in [2.7.2](#). [E650.7.2]

# **Discount Flats**

## **Design Standards**

301 Physical Standards

302 Elements on the Face of a Mailpiece

# 301 Physical Standards

## Overview

- 1.0 Physical Standards for Flats
- 2.0 Physical Standards for Presorted (Nonautomation) Flats
- 3.0 Physical Standards for Automation Flats

## 1.0 Physical Standards for Flats

### 1.1 General Definition of Flat Size Mail

Flat-size mail other than that in [3.0, Physical Standards for Automation Flats](#), is:

- a. More than 11-1/2 inches long, or more than 6-1/8 inches high, or more than 1/4 inch thick.
- b. Not more than 15 inches long, or more than 12 inches high, or greater than 3/4 inch thick.
- c. Unwrapped, sleeved, wrapped, or enveloped. [C050.3.1]
- d. Pieces are subject to the minimum standards in [601.1.1](#) and may be subject to other minimum dimensions, based on the standards for specific rates. [C100.1.2]

### 1.2 Length and Height of Flats

The location and orientation of the delivery address on a mailpiece generally establish which dimensions of the piece are the length and the height. The *length* is the dimension parallel to the address as read; the *height* is the dimension perpendicular to the length; the *top* and *bottom* of the piece are the upper and lower edges, respectively, when the address is positioned for normal reading. This general rule does not apply to:

- a. Automation rate flats.
- b. Standard Mail Enhanced Carrier Route flats.
- c. Standard Mail Customized MarketMail.
- d. Pieces thicker than 1/4 inch that are not prepared and mailed as a flat. [C010.1.3]

## 2.0 Physical Standards for Presorted (Nonautomation) Flats

### 2.1 First-Class Mail

#### 2.1.1 Maximum Weight

Matter at First-Class Mail rates cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail. (Lower size or weight standards apply to mail claimed at certain rates or addressed to certain APOs and FPOs.) [C100.1.1]

301.2.1.2

### **2.1.2 Nonmachinable Surcharge**

First-Class Mail flats that weigh 1 ounce or less are subject to the nonmachinable surcharge if any one of the following applies (see [1.2](#) for how to determine the length and height of a mailpiece):

- a. The piece is greater than 1/4-inch thick.
- b. The length is more than 11-1/2 inches or the height is more than 6-1/8 inches.
- c. The aspect ratio (length divided by height) is less than 1.3 or more than 2.5.  
[C100.4.0 and E130.2.5]

## **2.2 Standard Mail**

### **2.2.1 Basic Physical Standards**

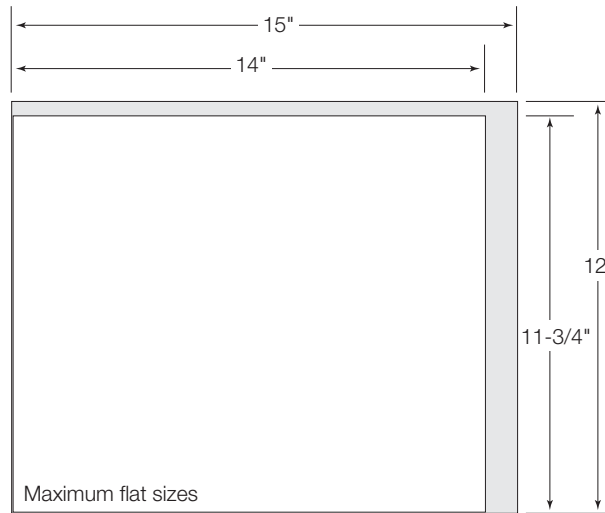

These standards apply to Standard Mail:

- a. Each piece must weigh less than 16 ounces.
- b. Presorted rate and Customized MarketMail pieces are subject to the basic mailability standards in [601](#).
- c. Except for automation basic carrier route rate pieces and merchandise samples mailed with detached address labels (DALs), the maximum size for Enhanced Carrier Route Standard Mail is 14 inches long, 11-3/4 inches high, and 3/4 inch thick (see [Exhibit 2.2.1c](#)). Merchandise samples whose dimensions exceed these maximums may be sent at the Enhanced Carrier Route rates if mailed using DALs, provided that the samples meet all other applicable standards and the DALs meet the standards in [602.4.0](#). [C600.1.1]

**Exhibit 2.2.1c Maximum Dimensions for Standard Mail Flats**

| Measure Maximums | Enhanced CR Rates   | Other Standard Mail |
|------------------|---------------------|---------------------|
| Height           | 11-3/4"             | 12"                 |
| Length           | 14"                 | 15"                 |
| Thickness        | 3/4"                | 3/4"                |
| Weight           | Less than 16 ounces | Less than 16 ounces |

[Exhibit C600.1.1e]

**2.2.2 Cover Page and Protective Cover**

If the piece is not completely enclosed in a mailing wrapper, then any protective cover or cover page must cover both the front and back of the host publication and extend to within at least 3/4 inch of the edge opposite the fold or binding. *Exception:* Flat-size pieces may have short covers as provided in 3.7.2. [C600.1.2]

**2.2.3 Residual Shape Surcharge**

Mail that is prepared as a parcel or is not letter-size or flat-size as defined in 101, *Physical Standards*, is subject to a residual shape surcharge. Mail that is prepared as Customized MarketMail under 705.1.0 also is subject to the residual shape surcharge. There are different surcharges for Presorted rate pieces and Enhanced Carrier Route rate pieces. Only the surcharges for Presorted rate pieces apply to CMM pieces. [C600.3.0]

**2.2.4 Nonmachinable Surcharge**

The nonmachinable surcharge in 343.1.0 does not apply to Standard Mail pieces (including parcels) that are claimed at any nonletter rate. [C600.4.2]

301.2.3

### 2.3 Bound Printed Matter

#### 2.3.1 General Standards

These standards apply to Bound Printed Matter:

- a. Bound Printed Matter may not weigh more than 15 pounds.
- b. Two or more flats may be mailed as a single piece if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- c. Lower size or weight standards apply to mail claimed at certain rates, addressed to certain APOs and FPOs, or sent by the Department of State to U.S. government personnel abroad. [C700.1.0]

### 2.4 Media Mail

#### 2.4.1 General Standards

These standards apply to Media Mail:

- a. No piece may weigh more than 70 pounds.
- b. Two or more flats may be mailed as a single piece if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- c. Lower size or weight standards apply to mail claimed at certain rates, addressed to certain APOs and FPOs, or sent by the Department of State to U.S. government personnel abroad. [C700.1.0]

### 2.5 Library Mail

#### 2.5.1 General Standards

These standards apply to Library Mail:

- a. No piece may weigh more than 70 pounds.
- b. Two or more flats may be mailed as a single piece if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits.
- c. Lower size or weight standards apply to mail claimed at certain rates, addressed to certain APOs and FPOs, or sent by the Department of State to U.S. government personnel abroad. [C700.1.0]

## 3.0 Physical Standards for Automation Flats

### 3.1 Basic Standards for Automation Flats

Flat-size mail claimed at automation rates must meet the applicable standards in 3.0, and the general and specific mailability and eligibility standards for the class of mail and the rate claimed. The mail may qualify for automation rates either under the dimensions and characteristics for automated flat sorting machine (AFSM) 100 processing in 3.3, or under the dimensions and characteristics for upgraded flat

sorting machine (UFSM) 1000 processing in 3.4, except for Bound Printed Matter (BPM), which can qualify only under AFSM 100 criteria. Additional standards apply as follows:

- a. If a flat-size mailpiece meets all AFSM 100 criteria except for the turning ability or deflection standards under 3.3.4, the piece may be claimed at automation rates if all UFSM 1000 criteria are met.
- b. If polywrap film is used, the film and preparation of the mailpiece must meet the applicable standards in 3.5. [C820.1.0]

### 3.2 Determining Length and Height

The length and height of an automation-compatible flat-size mailpiece is not determined by the orientation of the address, but by the preparation of the piece:

- a. For a piece prepared as a single sheet or in an envelope, full-length wrapper, or full-length sleeve, the length is the longest dimension. The height is the dimension perpendicular to the length.
- b. For a piece prepared with a bound, folded, or closed edge (e.g., a catalog, a newspaper or tabloid, a folded envelope), the length is the dimension parallel to the bound, folded, or closed edge. The height is the dimension perpendicular to the length. If the piece is folded more than once or is bound and then folded, the length is the dimension parallel to the final fold. [C820.2.1]

### 3.3 Criteria for AFSM 100 Flats

#### 3.3.1 Final Fold

An AFSM 100 flat-size piece with a final fold must be designed so that the address is in view when the final folded edge is at the bottom of the piece and any intermediate bound or folded edge is to the right. [C820.2.2]

#### 3.3.2 Shape and Size

Each flat-size piece must be rectangular and:

- a. For height, no more than 12 inches and no less than 5 inches high.
- b. For length, no more than 15 inches and no less than 6 inches long.
- c. For thickness, no more than 0.75 inch and no less than 0.009 inch thick. [C820.2.3]

#### 3.3.3 Maximum Weight

Maximum weight limits are as follows:

- a. For First-Class Mail, 13 ounces.
- b. For Periodicals, 20 ounces.
- c. For Standard Mail, less than 16 ounces.
- d. For Bound Printed Matter, 20 ounces. [C820.2.4]

#### 3.3.4 Turning Ability and Deflection

The piece must meet the following standards for turning ability and deflection:

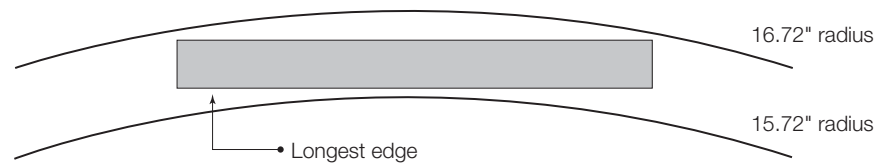

301.3.3.4

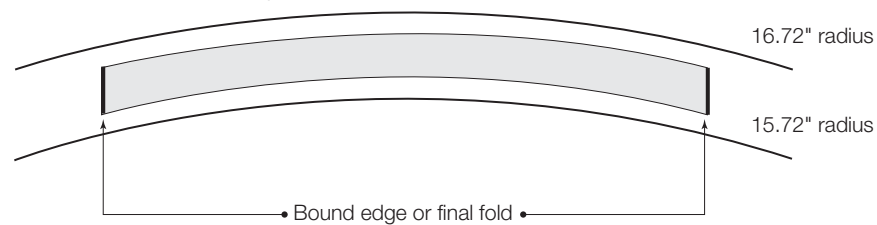

- a. **Turning Ability.** The mailpiece must fit between two concentric arcs drawn on a horizontal flat surface, one with a radius of 15.72 inches and the other with a radius of 16.72 inches, in one of the following ways:
  1. The piece must be flexible enough to bend between the two arcs when positioned vertically, with (if applicable) the bound, folded, or final folded edge perpendicular to the surface where the arcs are drawn.
  2. If rigid (constructed of or containing inflexible materials), the piece must be small enough to allow its longest edge to be placed between the two arcs without touching the lines of the arcs.

### Exhibit 3.3.4a Turning Ability Rigid and Flexible Flats

Rigid flat on curved path

Flexible flat on curved path

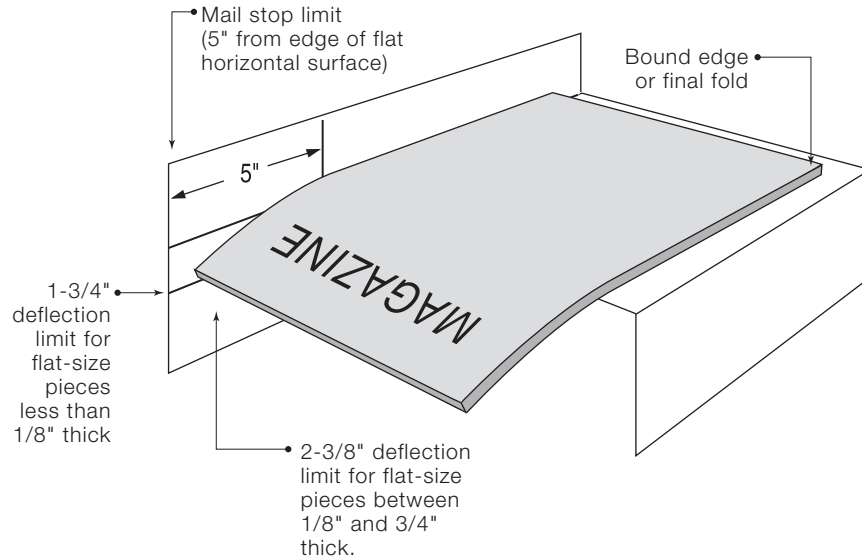

[Exhibit C820.2.5a]

- b. **Deflection.** A flat-size mailpiece meeting the AFSM 100 dimensions must be rigid enough so that, when placed flat on a surface to extend unsupported 5 inches off that surface, no part of the edge of the piece that is opposite the bound, folded, or final folded edge (as applicable) deflects more than 1-3/4 inches (if the piece is less than 1/8 inch thick) or more than 2-3/8 inches (if the piece is from 1/8 to 3/4 inch thick).

### Exhibit 3.3.4b Deflection Flat-Size Mail

[Exhibit C820.2.5b]

- c. Test Device. Testing for compliance with the above standards must be done with a flat mail machinability tester constructed to USPS specification USPS-STD-28 and following the instructions for use of that device. Information about obtaining or using the tester is available from the local USPS area or district marketing office or local postmaster. [C820.2.5]

## 3.4 Criteria for UFSM 1000 Flats

### 3.4.1 Address Placement and Folded Pieces

The following requirements apply to folded pieces:

- a. A flat-size piece with a final fold must be designed so that the address is in view when the final folded edge is to the right and any intermediate bound or folded edge is at the bottom of the piece.
- b. Unbound flat-size pieces must be at least double-folded. [C820.3.2]

### 3.4.2 Shape and Size

Pieces must meet the following requirements:

- a. Height: no more than 12 inches or less than 4 inches.
- b. Length: no more than 15-3/4 inches or less than 4 inches.
- c. Minimum thickness:
  1. For pieces at least 5 inches long: 0.009 inch.
  2. For pieces at least 4 inches long but less than 5 inches long: greater than 0.25 inch.

### 301.3.4.3

- d. Maximum thickness:
  - 1. For pieces 13 inches long or less: 1.25 inches.
  - 2. For pieces longer than 13 inches up to and including 15-3/4 inches: 7/8 inch. [C820.3.3]

#### **3.4.3 Maximum Weight**

Maximum weight limits are as follows:

- a. For First-Class Mail, 13 ounces.
- b. For Periodicals, 6 pounds.
- c. For Standard Mail, less than 16 ounces. [C820.3.4]

### **3.5 Polywrap Coverings**

#### **3.5.1 Polywrap Films**

If polywrap film is used to enclose flat-size mailpieces claimed at automation rates, the pieces must meet the standards in 3.5. Film approved for use under 3.5.5 must meet the specifications in Exhibit 3.5.1 as follows:

- a. For mailpieces meeting all the dimensions, turning ability, and deflection characteristics for AFSM 100 criteria under 3.3, the film must meet all eight properties in this exhibit. If the address label is affixed to the outside of the polywrap, the haze property (property 2) is not required.
- b. For mailpieces not meeting all the dimensions and characteristics of the AFSM 100 criteria but meeting all the criteria for the UFSM 1000 under 3.4, the film must meet, at a minimum, only the haze property (property 2) in this exhibit. If the address label is affixed to the outside of the polywrap, the haze property is not required. [C820.4.1]

### Exhibit 3.5.1 AFSM 100 Polywrap Specifications

Polywrapped AFSM 100 flats (see 3.3) must be prepared with polywrap that meets all eight properties in this exhibit. Polywrapped UFSM 1000 flats (see 3.4) must be prepared with polywrap that meets, at a minimum, only property 2 (haze).

| PROPERTY  | REQUIREMENT         | TEST METHOD   | COMMENT   |
|---|---------------------|---------------|---|
| <b>1. Kinetic Coefficient of Friction, MD</b>         |                     |               |   |
| a. Film on Stainless Steel with No. 8 (Mirror) Finish | <0.28               | ASTM D1894    | Stainless steel finish must be in accordance with ASTM A 480/A 480M.                          |
| b. Film on Film                                       | 0.20 to 0.40        | ASTM D1894    |   |
| <b>2. Haze</b>  | <70                 | ASTM D1003    | Affixing address labels to outside of polywrap is an alternative to meeting this requirement. |
| <b>3. Secant Modulus, 1% elongation</b>               |                     |               |   |
| a. TD   | >50,000 psi         | ASTM D882     |   |
| b. MD   | >40,000 psi         | ASTM D882     |   |
| <b>4. Tensile Strength</b>                            |                     |               |   |
| a. TD   | >2,000 psi          | ASTM D882     |   |
| b. MD   | >3,000 psi          | ASTM D882     |   |
| <b>5. Density</b>                                     | 0.900 to 0.950 g/cc | ASTM D1505    |   |
| <b>6. Nominal Gauge</b>                               | >0.001 in           | ASTM D374     |   |
| <b>7. Static Charge</b>                               | <2.0 kV             | ASTM D4470    | Antistatic additives can regulate this charge.  |
| <b>8. Blocking</b>                                    | <15 g               | ASTM D3354-96 |   |

[Exhibit C820.4.1]

### 3.5.2 Wrap Direction and Seam Placement

Wrap direction, seam direction, and seam placement must follow these standards:

- a. Wrap direction and seam direction:
  1. For an AFSM 100 mailpiece, the wrap direction must be around the longer axis of the mailpiece, with the seam parallel to that axis. The longer axis is always parallel to the longer edge (the length) of the mailpiece.
  2. For a UFSM 1000 mailpiece, the wrap direction may be around either the longer axis or the shorter axis of the mailpiece, with the seam parallel to that axis. The longer axis is always parallel to the longer edge (the length) of the mailpiece, and the shorter axis is always parallel to the shorter edge (the height) of the mailpiece.
- b. For either an AFSM 100 or a UFSM 1000 mailpiece, the preferred seam placement is on the nonaddressed side of the mailpiece. If the seam is placed on the addressed side, the seam must not cover any part of the delivery address and barcode, postage area, or any required markings or

### 301.3.5.3

endorsements. Regardless of seam placement, the polywrap over the address area must be a smooth surface to avoid interference with address and barcode readability. [C820.4.2]

#### **3.5.3 Overhang**

For purposes only of the polywrap standards for overhang (selvage) in 3.5, the edge of the mailpiece designated as top must be one of the two physically longer edges of the piece, regardless of address orientation and whether bound or unbound. Any polywrap overhang (selvage) around the four edges of the mailpiece (top, bottom, and left and right sides) must meet these standards:

- a. For an AFSM 100 mailpiece:
    1. When the mailpiece contents are totally positioned at the bottom of the polywrap, the overhang must not be more than 0.5 inch at the top of the mailpiece.
    2. When the mailpiece contents are totally positioned to the left or to the right side of the polywrap, the overhang must not be more than 1.5 inches on the opposite side.
    3. The polywrap covering must not be so tight that it bends the mailpiece.
  - b. For a UFSM 1000 mailpiece:
    1. When the mailpiece contents are totally positioned at the bottom of the polywrap, the overhang must not be more than 1.5 inches at the top of the mailpiece.
    2. When the mailpiece contents are totally positioned to the left or to the right side of the polywrap, the overhang must not be more than 1.5 inches on the opposite side.
    3. The polywrap covering must not be so tight that it bends the mailpiece.
- [C820.4.3]

#### **3.5.4 Mailpiece Identification**

Polywrapped flat-size mailpieces claimed at automation rates must be endorsed to show that the polywrap meets USPS approval as automation-compatible. This requirement is met by printing “USPS AFSM 100 Approved Polywrap” or “USPS 100 Approved Poly” or “USPS UFSM 1000 Approved Polywrap” or “USPS 1000 Approved Poly,” as applicable, directly on the address side of the pieces, preferably below the postage area or in another visible location. Alternatively, the polywrap marking may be printed directly onto the polywrap material. The polywrap marking must not interfere with delivery address or barcode recognition. [C820.4.4]

#### **3.5.5 Polywrap Certification**

The USPS polywrap certification program requires plastic manufacturers to provide to a producer of polywrapped flat-size mailpieces a certificate of conformance from the manufacturer stating that the polywrap physical properties meet or exceed the minimum requirements specified in Exhibit 3.5.1. The certification program applies only to polywrap used for AFSM 100 mailpieces. A list of USPS-approved polywrap products is maintained on the USPS Web site <http://ribbs.usps.gov>. The first time

that a specific polywrap product is to be used for an automation rate mailing of flat-size mailpieces and that product is not listed on the USPS Web site, these steps must occur:

- a. The producer of the polywrapped pieces provides a USPS mailpiece design analyst (MDA) with the manufacturer's certificate of conformance verifying that the polywrap film meets the specifications in [Exhibit 3.5.1](#) for AFSM 100 mailpieces.
- b. The MDA reviews the manufacturer's certificate of conformance to confirm that the requirements listed on the certificate for the polywrap film meet the eight properties in [Exhibit 3.5.1](#) for AFSM 100 mailpieces. The reviewing MDA provides written confirmation to the producer of the polywrapped pieces and sends a copy to the appropriate business mail entry unit or detached mail unit and a copy to Mailing Standards (see [608.8.1, \*Postal Service\*](#), for address).  
[C820.4.5]

### 3.6 Prohibitions

#### 3.6.1 Protrusions

Clasps, strings, buttons, or like materials, or other protrusions that impede or damage mail processing equipment are prohibited. [C820.5.1]

#### 3.6.2 Staples

Staples must not be substituted for tabs or wafer seals on pieces in automation rate mailings. As a binding method, staples may be placed in the fold or spine of a magazine or booklet-type or similar mailpiece if parallel with the bound edge, tightly and securely inserted, and not protruding to damage or interfere with mail processing equipment. [C820.5.2]

### 3.7 Tabs, Wafer Seals, Tape, and Glue

#### 3.7.1 General

Although not required, mailpieces may be prepared with tabs, wafer seals, cellophane tape, or permanent glue (continuous or spot) if these sealing devices do not interfere with the recognition of the barcode, rate marking, postage information, and delivery and return addresses. Cellophane tape may not be placed over the barcode or where any part of the barcode will be printed. Tabs or seals placed in the area on which any part of the barcode is printed must contain a paper face meeting the standards for background reflectance. Tabs, wafer seals, and tape must have a peel adhesion (shear strength) value of at least 15 ounces/inch at a speed of 12 inches/minute after application to a stainless steel plate; the test is to be conducted 10 minutes after the material is applied to the plate. [C820.6.1]

#### 3.7.2 Short Covers

Flats may be prepared with a cover page or protective cover that is more than 3/4 inch from each edge if the cover page is secured with at least two tabs, wafer seals, or glue spots placed within 1 inch of the top and bottom edges of the cover page or protective cover. [C820.6.2]

### **3.8 Uniformity and Exterior Format**

#### **3.8.1 General Requirements**

A flat-size mailpiece prepared and claimed at automation rates must be uniformly thick. Each flat-size mailpiece must have a smooth and regular shape and be free of creases, folds, tears, or other irregularities not compatible with automation equipment. The exterior surface must not have protuberances caused by prohibited closures; attachments (except as provided below); irregularly shaped or distributed contents; or untrimmed excess material from the envelope, wrapper, or sleeve.

[C820.7.1]

#### **3.8.2 Outside Attachment**

An attachment to a flat-size mailpiece must be a single sheet, the same size as the cover. The attachment must be permanently, securely, and uniformly affixed to the front or back cover along a bound, folded, or otherwise closed edge. Pieces claimed at a Periodicals rate may bear attachments only if permitted by the applicable standards. [C820.7.2]

#### **3.8.3 Contents**

The contents of a flat-size mailpiece must remain uniformly thick so that the dimensions of the envelope, wrapper, or sleeve remain constant. If the contents are of irregular thickness or significantly smaller than the envelope, wrapper, or sleeve, those contents must be secured in place to prevent shifting within the wrapping during processing and surrounded with loose packing material or padding to ensure that the mailpiece remains uniformly thick. [C820.7.3]

#### **3.8.4 Booklet-Type Piece or Magazine**

The contents of flat-size mailpieces prepared in sleeves or other wrappers must be sufficiently secure in the sleeve or wrapper to stay in place during processing. If material bearing the delivery address or barcode for the mailpiece is enclosed in a partial wrapper, that wrapper must be sufficiently secure to prevent the contents from shifting and obscuring the delivery address or barcode. [C820.7.4]

### **3.9 Outside Labels and Stickers**

#### **3.9.1 Use**

Permanent labels and stickers (i.e., those designed not to be removed or relocated) must be affixed directly to the outside of the mailpiece with permanent adhesive. A mailer may provide recipients with relocatable labels to place on the outside of response pieces sent back to the mailer. On pieces mailed at Periodicals rates, labels and stickers may be used only if permitted by the applicable standards.

[C820.8.1]

#### **3.9.2 Pressure-Sensitive Label**

Any pressure-sensitive label or sticker affixed directly to a mailpiece before mailing must have a minimum peel adhesion to stainless steel of 8 ounces/inch. This standard does not apply to pressure-sensitive labels provided by the USPS to label bundles to sortation levels. [C820.8.2]

**3.9.3 “Sandwich” Label**

A face stock/liner label (“sandwich” label) is a two-part unit with a face stock (top label) attached to a liner (bottom label) affixed to the mailpiece. The face stock must have a peel adhesion value of at least 2 ounces/inch with respect to the liner label and at least 8 ounces/inch when reapplied to stainless steel. [C820.8.3]

## 302 Elements on the Face of a Mailpiece

### Overview

- [1.0 All Mailpieces](#)
- [2.0 Placement and Content of Mail Markings](#)
- [3.0 Endorsement Placement](#)
- [4.0 Barcode Placement](#)

### 1.0 All Mailpieces

#### 1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements. [A010.1.5]

#### 1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. (See [602](#) for additional information regarding addressing.) [A010.1.1]

#### 1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail. [P011.1.1]

### 2.0 Placement and Content of Mail Markings

#### 2.1 First-Class Mail and Standard Mail Markings

##### 2.1.1 Placement

Mailpieces must be marked under the corresponding standards to show the class of service and/or rate paid:

- a. Basic Marking. The basic required marking that indicates the class or subclass—“First-Class,” “Presorted Standard” or “PRSRT STD,” or “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”)—must be printed or produced as part of, or directly below or to the left of, the permit imprint indicia, meter stamp or impression, or adhesive or precanceled stamp.
- b. Other Markings. The rate-specific markings “AUTO,” “AUTOOCR,” “Presorted” (or “PRSRT”); “Single-Piece” (or “SNGLP”) (First-Class Mail only); and “ECRLOT,” “ECRWSH,” “ECRWSS,” and “Customized MarketMail” (or “CUST MKTMAIL” or “CMM”) (Standard Mail only) may be placed as follows:
  1. In the location specified in [2.1.1a](#).
  2. In the address area on the line directly above or two lines above the address if the marking appears alone or if no other information appears on the line with the marking except optional endorsement line information under [708.7.0](#) or carrier route bundle information under [708.6.0](#).

### 302.2.1.2

3. If preceded by two asterisks (\*\*), the “AUTO,” “AUTOOCR,” “PRESORTED” (or “PRSRT”), “CUSTOMIZED MARKETMAIL” (or “CUST MKTMAIL” or “CMM”), or “Single-Piece” (or “SNGLP”) marking also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage in an MLOCR ink-jet printed date correction/meter drop shipment line.
- c. Additional Requirements for Carrier Route. “AUTOOCR,” “ECRLOT,” “ECRWSH,” and “ECRWSS” (Standard Mail only) must appear in their entirety wherever placed, except “ECR” may be placed in the postage area if “LOT,” “WSH,” or “WSS,” as applicable, is placed in the line above or two lines above the address. Pieces not mailed at ECR rates must not bear these markings. [M012.2.1]

#### 2.1.2 Exceptions to Markings

Exceptions are as follows:

- a. Automation Flats: First-Class Mail and Standard Mail flats do not require an “AUTO” marking. First-Class Mail flats not marked “AUTO” must bear both the “Presorted” or “PRSRT” and “First-Class” markings. Standard Mail flats not marked “AUTO” must bear the appropriate basic marking in [2.1.1a](#).
- b. Manifest Mailings. The basic marking must appear in the postage area on each piece. The two-letter rate category code required in the keyline on manifest mailing pieces prepared under [705.2.0](#) meets the requirement for other rate markings (e.g., on a First-Class piece mailed at automation carrier route rates, the “AC” code may replace the “AUTOOCR” marking).
- c. MLOCR Prepared Automation Mailings. The basic marking must appear in the postage area on each piece. The other “AUTO” marking must be replaced by the appropriate identifier/rate code marking described in [705.5.3.2, Rate and Postage Marking](#), on those pieces that have the marking applied by an MLOCR. This seven-character marking provides a description of the Product Month Designator, MASS/FASTforward System Identifier, postage payment method, and the rate of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail. [M012.2.2]

## 2.2 Bound Printed Matter, Media Mail, and Library Mail Markings

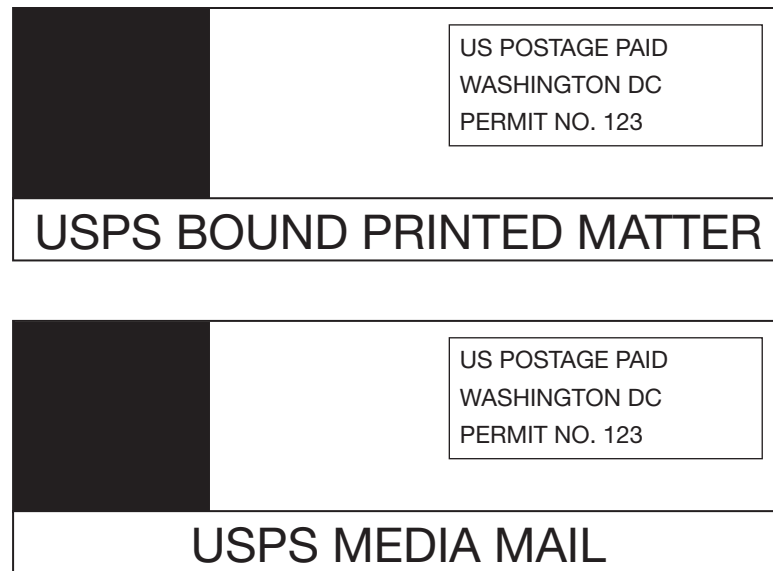

### 2.2.1 Basic Markings

The basic required Package Services subclass marking—“Bound Printed Matter” or “BPM,” “Media Mail,” or “Library Mail”—must be printed on each piece claimed at the respective rate. The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 2.2.1, Package Services Indicators](#)):

- a. The service icon that will identify all Package Services subclasses will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.

- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the appropriate subclass marking (e.g., “MEDIA MAIL”) must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text. [M012.3.1]

#### Exhibit 2.2.1 Package Services Indicators

[Exhibit M012.3.1]

#### 2.2.2 Bound Printed Matter Markings

In addition to the basic marking “Bound Printed Matter” or “BPM,” each piece of Bound Printed Matter mailed at a presorted or carrier route rate must bear additional rate markings. The additional markings may be placed in the postage area as specified in [2.2.1, Basic Markings](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#) or postal carrier route bundle information under [708.6.0](#). The additional rate markings are:

- a. For Presorted rate mail, the additional required marking is “Presorted” (or “PRSRT”). For presorted flats claiming the barcoded discount prepared under [365.7.0](#), the optional marking “AUTO” may be used in place of “Presorted” (or “PRSRT”). If the “AUTO” marking is not used, the automation rate flats must bear the “Presorted” (or “PRSRT”) rate marking.
- b. For carrier route rate mail, the additional required marking is “Carrier Route Presort” (or “CAR-RT SORT”). [M012.3.3]

#### **2.2.3 Media Mail Markings**

Each piece of Media Mail mailed at a presorted rate must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Media Mail.” This additional marking may be placed in the postage area as specified in [2.2.1, Basic Markings](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#). [M012.3.4]

#### **2.2.4 Library Mail Markings**

Each piece of Library Mail mailed at a presorted rate must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Library Mail.” This additional marking may be placed in the postage area as specified in [2.2.1, Basic Markings](#). Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under [708.7.0](#). [M012.3.5]

### **2.3 Enclosures**

Enclosures, attachments, and mixed rate mailpieces must be marked under the applicable standards in [703.9.0, Mixed Classes](#), and [705.16.0, Express Mail and Priority Mail Drop Shipment](#). [M012.1.2]

### **2.4 Printing and Designs**

Required markings may be printed by a postage meter or other means that ensures a legible marking. A marking may not include or be part of a decorative design or advertisement. [M012.1.3]

### **2.5 Marking Hazardous Materials**

All mailable hazardous materials must be labeled and/or marked as required in [601.10.0, Hazardous Materials](#). [M012.1.1g]

## **3.0 Endorsement Placement**

### **3.1 Endorsements for Delivery Instructions and Ancillary Services**

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.3.4.4](#), or carrier release under [508.1.2](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.0](#)), subject to the corresponding standards for use and availability. [M012.4.1]

### **3.2 Return Address**

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number). [M012.4.2]

### **3.3 Placement of Endorsements**

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.
- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
  1. Directly below the return address.
  2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
  3. Directly to the left of the postage area and below or to the left of any rate marking.
  4. Directly below the postage area and below any rate marking. [M012.4.3]

### 3.4 Physical Standards for Endorsements

The endorsement, or, if combined, endorsements, must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. This 1/4-inch clear space is not required for an endorsement that is applied with a multiline optical character reader (MLOCR) inkjet and placed in the location directly below the postage area and any rate marking if the endorsement is clear and legible. [M012.4.4]

## 4.0 Barcode Placement

### 4.1 General Barcode Placement for Flats

On any flat-size piece claimed at automation rates, the piece may bear one POSTNET barcode under 4.2 or may bear two POSTNET barcodes under 4.3. Other mailer-applied non-POSTNET barcodes may appear on the address side of the piece if the barcode format is not detectable or confusing to automated postal equipment. [C840.3.1]

### 4.2 Applying One Barcode

On any flat-size mailpiece claimed at an automation rate, the barcode may be anywhere on the address side as long as it is at least 1/8 inch from any edge of the piece. For UFSM 1000 mailpieces, the preferred location of the barcode is at least 2 inches from the edge of the dimension that is the length for that type of automation piece (the longest edge or, for pieces with a folded or bound edge, the folded or bound edge). The portion of the surface of the piece on which the barcode is printed must meet the barcode dimensions and spacing requirements in 708.4.2, and the reflectance standards in 708.4.3. Address block barcodes are subject to the standards in 4.6a. through 4.6e. [C840.3.2]

### 4.3 Applying Second Barcode

At the mailer's option, a second POSTNET barcode may be applied to the piece only if the first POSTNET barcode on the piece is an address block barcode prepared under 4.2, that is not CASS-certified. In addition, the second barcode must meet the following requirements:

- a. It must be must be a delivery point barcode (DPBC).
- b. The preferred placement is the lower right corner of the mailpiece parallel to and in the same direction as the delivery address.
- c. It must be placed at least 1 inch below the return address.
- d. The space between the two POSTNET barcodes must be greater than 1 inch. [C840.3.3]

### 4.4 5-Digit and ZIP+4 Barcode Permissibility

The ZIP+4 barcode may appear in the address block when printed on an insert that appears through a window or on an address label affixed directly to the piece; or it may appear in the lower right corner either printed directly on the mailpiece or on an insert that appears through a window. An automation rate flat-size piece must not bear a 5-digit barcode. [C840.8.1]

### 4.5 DPBC Numeric Equivalent

In delivery point barcoded automation rate mailings only, the numbers corresponding to the POSTNET bars in a correct delivery point barcode (DPBC) may appear in the delivery address. If read from left to right, a correct DPBC numeric equivalent consists of five digits, a hyphen, and seven digits. [C840.9.0]

### 4.6 Barcode in Address Block

When the barcode is included as part of the address block:

- a. The barcode must be placed in one of these positions:
  1. Above the address line containing the recipient's name.
  2. Below the city, state, and ZIP Code line.
  3. Above or below the keyline information.
  4. Above or below the optional endorsement line.
- b. The printing of the barcode is prohibited anywhere between the address line containing the recipient's name and the city, state, and ZIP Code line.

- c. The minimum clearance between the barcode and any information line above or below it within the address block must be at least 1/25 inch, and the separation between the barcode and top line or bottom line of the address block must not exceed 5/8 inch. The clearance between the leftmost and rightmost bars and any adjacent printing must be at least 1/8 inch.
- d. If a window envelope is used, the clearance between the leftmost and rightmost bars and any printing or window edge must be at least 1/8 inch, and the clearance between the barcode and the top and bottom window edges must be at least 1/25 inch. These clearances must be maintained during the insert's range of movement in the envelope. Covers for address block windows are subject to 4.7.
- e. If an address label is used, a clear space of at least 1/8 inch must be left between the barcode and the left and right edges of the address label, and the clearance between the barcode and the top and bottom edges of the address label must be at least 1/25 inch.
- f. The rightmost bar must be at least 1/2 inch from the right edge of the mailpiece, and the leftmost bar must be less than 10-1/2 inches from the right edge of the mailpiece and at least 1/2 inch from the left edge of the mailpiece; the top of each bar must be less than 4 inches from the bottom edge of the mailpiece; and the bottom line of the address block, including the barcode, must be at least 5/8 inch from the bottom of the mailpiece. [C840.2.5]

#### 4.7 Window Cover

The window cover must be of a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in 708.4.3. The edges of the window cover must be securely glued to the envelope. [C840.7.3]

## **330 Discount Flats First-Class Mail**

333 Rates and Eligibility

334 Postage Payment and Documentation

335 Mail Preparation

336 Enter and Deposit

## 333 Rates and Eligibility

### Overview

- [1.0 Rates and Fees for First-Class Mail](#)
- [2.0 Content Standards for First-Class Mail Flats](#)
- [3.0 Eligibility Standards for First-Class Mail Flats](#)
- [4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Flats](#)
- [5.0 Additional Eligibility Standards for Automation Rate First-Class Mail Flats](#)

### 1.0 Rates and Fees for First-Class Mail

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Rate Computation for First-Class Flats

First-Class rates are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. [P013.2.3]

#### 1.3 Nonautomation Presorted Rates

A nonmachinable surcharge applies to flat-size pieces 1 ounce or less.

| WEIGHT INCREMENT                         | RATE    |
|--|---------|
| First ounce or fraction of an ounce      |         |
| (For pieces weighing 2 ounces or less)   | \$0.352 |
| (For pieces weighing more than 2 ounces) | 0.311   |
| Each additional ounce or fraction        | 0.225   |

[R100.2.2]

#### 1.4 Automation Mixed ADC Rates

A nonmachinable surcharge might apply to pieces 1 ounce or less.

| WEIGHT INCREMENT                         | RATE    |
|--|---------|
| First ounce or fraction of an ounce      |         |
| (For pieces weighing 2 ounces or less)   | \$0.341 |
| (For pieces weighing more than 2 ounces) | 0.300   |
| Each additional ounce or fraction        | 0.225   |

[R100.4.3]

333.1.5

### 1.5 Automation ADC Rates

A nonmachinable surcharge might apply to pieces 1 ounce or less:

| <b>WEIGHT INCREMENT</b>                  | <b>RATE</b> |
|--|-------------|
| First ounce or fraction of an ounce      |             |
| (For pieces weighing 2 ounces or less)   | \$0.333     |
| (For pieces weighing more than 2 ounces) | 0.292       |
| Each additional ounce or fraction        | 0.225       |

[R100.5.3]

### 1.6 Automation 3-Digit Rates

A nonmachinable surcharge might apply to pieces 1 ounce or less:

| <b>WEIGHT INCREMENT</b>                  | <b>RATE</b> |
|--|-------------|
| First ounce or fraction of an ounce      |             |
| (For pieces weighing 2 ounces or less)   | \$0.322     |
| (For pieces weighing more than 2 ounces) | 0.281       |
| Each additional ounce or fraction        | 0.225       |

[R100.6.3]

### 1.7 Automation 5-Digit Rates

A nonmachinable surcharge might apply to pieces 1 ounce or less:

| <b>WEIGHT INCREMENT</b>                  | <b>RATE</b> |
|--|-------------|
| First ounce or fraction of an ounce      |             |
| (For pieces weighing 2 ounces or less)   | \$0.302     |
| (For pieces weighing more than 2 ounces) | 0.261       |
| Each additional ounce or fraction        | 0.225       |

[R100.7.3]

**1.8 Summary Presorted and Automation Rates for Flats**

| Weight Not Over (ounces) <sup>1</sup> | Nonautomation | Automation |         |         |         |
|---------------------------------------|---------------|------------|---------|---------|---------|
|                                       | Presorted     | Mixed ADC  | ADC     | 3-Digit | 5-Digit |
| 1 <sup>2</sup>                        | \$0.352       | \$0.341    | \$0.333 | \$0.322 | \$0.302 |
| 2                                     | 0.577         | 0.566      | 0.558   | 0.547   | 0.527   |
| 3                                     | 0.761         | 0.750      | 0.742   | 0.731   | 0.711   |
| 4                                     | 0.986         | 0.975      | 0.967   | 0.956   | 0.936   |
| 5                                     | 1.211         | 1.200      | 1.192   | 1.181   | 1.161   |
| 6                                     | 1.436         | 1.425      | 1.417   | 1.406   | 1.386   |
| 7                                     | 1.661         | 1.650      | 1.642   | 1.631   | 1.611   |
| 8                                     | 1.886         | 1.875      | 1.867   | 1.856   | 1.836   |
| 9                                     | 2.111         | 2.100      | 2.092   | 2.081   | 2.061   |
| 10                                    | 2.336         | 2.325      | 2.317   | 2.306   | 2.286   |
| 11                                    | 2.561         | 2.550      | 2.542   | 2.531   | 2.511   |
| 12                                    | 2.786         | 2.775      | 2.767   | 2.756   | 2.736   |
| 13                                    | 3.011         | 3.000      | 2.992   | 2.981   | 2.961   |

1. For each additional ounce, computed postage includes \$0.225 for presorted and automation rates. The rates include a \$0.041 discount for presorted and automation rate flats weighing more than 2 ounces.

2. Flats weighing 1 oz. or less may be subject to a nonmachinable surcharge of \$0.055 per piece.

[R100.9.1 and R100.9.2]

**1.9 Nonmachinable Surcharge**

Surcharge per piece (see [4.3, Nonmachinable Surcharge for Flat-Size Pieces](#)) for Presorted and automation rate: \$0.055. [R100.12.0]

**1.10 Presort Mailing Fee**

Presort mailing fee, per 12-month period, per office of mailing: \$150.00. [R100.13.1]

**1.11 Computing Postage for First-Class Mail**

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in [1.12](#) and [1.2, Rate Computation for First-Class Flats](#). For First-Class Mail, affix postage to each piece under [334.2.2, Affixed Postage for Presorted First-Class Mail](#), or, for permit imprint mailings, multiply the number of addressed pieces at each rate increment (and in each rate category, if applicable) by the corresponding postage rate, add the *unrounded* products, and round off the total postage to the nearest whole cent. [P013.6.0]

**1.12 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

333.2.1

## 2.0 Content Standards for First-Class Mail Flats

### 2.1 **General**

All mailable matter may be sent as First-Class Mail, except Customized MarketMail under [705.1.0](#) or other matter prohibited by the respective standards. [E110.1.1]

### 2.2 **Written or Typewritten Matter**

Matter wholly or partially in handwriting or typewriting must be mailed as First-Class Mail or Express Mail, except authorized additions to Periodicals, Standard Mail, and Package Services and written or typewritten matter in Library Mail and Media Mail, as permitted by the corresponding standards. [E110.1.2]

### 2.3 **Correspondence**

Matter that has the character of actual and personal correspondence must be mailed as First-Class Mail or Express Mail. [E110.1.4]

### 2.4 **Bills and Statements of Account**

Bills and statements of account must be mailed as First-Class Mail or Express Mail according to these definitions:

- a. A *bill* is a request for payment of a definite sum of money claimed to be owing by the addressee to the sender or a third party. The mere assertion of a debt in a definite sum combined with a demand for payment is sufficient to make the message a bill.
- b. A *statement of account* is the assertion of a debt in a definite amount owed by the addressee to the sender or a third party but does not necessarily contain a request or a demand for payment. The amount may be immediately due or may become due after a certain time or on demand or billing at a later date.
- c. A bill or statement of account must present enough details of a debt to inform the debtor of the amount the debtor must pay to acquit himself or herself of the debt. Neither a bill nor a statement of account need state the precise amount if the bill or statement contains enough information to enable the debtor to determine the exact amount of the claim asserted.
- d. A bill or statement of account does not lose that character just because the amount claimed is not, in fact, owing or may not be legally collectible. [E110.1.5]

### 2.5 **Examples of First-Class Mail**

These are examples of material that must be mailed at First-Class Mail or Express Mail rates:

- a. Handwritten or typewritten matter, including identical copies prepared by automatic typewriter and manifold or carbon copies of this matter. Handwritten or typewritten matter does not include all matter produced by computers, but computer-prepared material is subject to First-Class postage if it has the character of actual and personal correspondence.
- b. Autograph albums containing writing.
- c. Notebooks or blank books containing written or typewritten entries or stenographic or shorthand notes.

- d. Blank printed forms filled out in writing, such as notices, certificates, and checks, either canceled or uncanceled.
- e. Printed price lists containing written figures changing individual items.
- f. Printed cards or letters bearing a written date, where the date is not the date of the card but gives information about when something is to occur or has occurred.
- g. Any matter marked "Postcard" or "Double Postcard." [E110.1.6]

## 2.6 Postal Inspection

Matter closed against postal inspection includes First-Class Mail and Express Mail. The USPS may open mail other than First-Class Mail or Express Mail to determine whether the proper rate of postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail or Express Mail rate. [E110.1.3]

## 2.7 Prohibited Air Transportation

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#). [E110.2.0]

# 3.0 Eligibility Standards for First-Class Mail Flats

## 3.1 Basic Standards for First-Class Mail

All pieces of First-Class Mail must:

- a. Meet the basic standards for First-Class Mail in [2.0, Content Standards for First-Class Mail Flats](#).
- b. Weigh 13 ounces or less.
- c. Meet the applicable standards in [333, Rates and Eligibility](#), [334, Postage Payment and Documentation](#), and [604.8.0, Computing Postage](#).
- d. Be part of a single mailing of at least 500 pieces of Presorted First-Class Mail.
- e. Meet the applicable physical standards in [301.2.0](#).
- f. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  - 1. The Move Update standard in [3.3](#).
  - 2. The ZIP Code accuracy standard in [3.4](#).
  - 3. If an alternative addressing format is used, the additional standards in [602.3.0](#). [E130.1.1 and E130.3.1]

## 3.2 Presort Mailing Fee

A First-Class Mail presort mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail rates. Payment of one fee allows a mailer to enter mail at all those rates. Persons or organizations paying this fee may enter mail of their

clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [E110.4.1]

### 3.3 Move Update Standards

#### 3.3.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, *address* means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

- a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 185 days before the mailing date, with one of the USPS-approved methods in 3.3.2.
- b. Each individual address in the mailing is subject to the Move Update standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is updated with an approved method (e.g., Address Change Service), the same address may be used during the following 185 days and meets the Move Update standard. [A030.1.1]
- d. Except for mail bearing an alternative address format, addresses used on pieces claiming First-Class Mail Presorted rates, regardless of any required surcharge, must meet the Move Update standard. [A030.1.2]

#### 3.3.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

- a. Address Change Service (ACS).
- b. [02-03-05] National Change of Address Linkage System (NCOA<sup>Link</sup>).
- c. *FASTforward* Mailing List Correction (MLC).
- d. *FASTforward* MLOCR processes (letter-size and flat-size mail only) if used each time before mail entry. If a mailpiece that initially uses *FASTforward* MLOCR processing is rejected and then entered into a Direct View Encoding Desk (DVED) operation (or similar system), the piece does not meet the Move Update standard. The name and address information on the piece must then be processed through a *FASTforward* RVE system to meet the Move Update standard. *FASTforward* RVE processes also meet the Move Update standard if used each time before mail entry.
- e. Mailer Move Update Process Certification and USPS-approved alternative methods for mailers with legitimate restrictions on incorporating USPS-supplied change-of-address information into their mailing lists. The National Customer Support Center (see 608.8.1 through 608.8.3 in *USPS Contact Information* for address) administers and approves both Mailer Move Update Process Certification and alternative methods.
- f. Ancillary service endorsements under 507.1.5.1, *First-Class Mail and Priority Mail*, except "Forwarding Service Requested." [A030.1.4]

### 3.3.3 Mailer Certification

The mailer's signature on the postage statement certifies that the Move Update standard has been met for each address in the corresponding mailing presented to the USPS. [A030.1.5]

## 3.4 ZIP Code Accuracy

### 3.4.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.4.1d3, Basic Standards](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.4.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming First-Class Mail rates, regardless of any required surcharges, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

### 3.4.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, National Five-Digit ZIP Code and Post Office Directory.
  2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
  3. Any mailing list service in [507.6.0, Mailing List Services](#).
  4. An authorized service provider.
  5. CASS-certified matching software.
  6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

#### **3.4.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

## 4.0 Additional Eligibility Standards for Nonautomation First-Class Mail Flats

### **4.1 Basic Standards for Nonautomation First-Class Mail**

In addition to the standards in [3.0, \*Eligibility Standards for First-Class Mail Flats\*](#), all pieces in a First-Class Mail Presorted rate mailing must be marked, sorted, and documented as specified in [334.4.0, \*Mailing Documentation\*](#), and [335.5.0, \*Preparation of Nonautomation Flats\*](#), or, alternatively under [705.9.0, \*Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats\*](#). [E130.3.1]

### **4.2 Barcodes on Nonautomation First-Class Mail**

Any POSTNET barcode on a mailpiece in a nonautomation First-Class mailing must be correct for the delivery address and meet the standards in [708.3.0, \*Coding Accuracy Support System \(CASS\)\*](#), and [708.4.0, \*Barcoding Standards for Letters and Flats\*](#). [E130.1.2]

### **4.3 Nonmachinable Surcharge for Flat-Size Pieces**

Flats that weigh 1 ounce or less are subject to the nonmachinable surcharge in [1.9](#) if any one of the following applies (see [301.1.2, \*Length and Height of Flats\*](#), for how to determine the length and height of a mailpiece):

- a. The piece is greater than 1/4-inch thick.
- b. The length is more than 11-1/2 inches or the height is more than 6-1/8 inches.
- c. The aspect ratio (length divided by height) is less than 1.3 or more than 2.5.

[E130.3.4]

## 5.0 Additional Eligibility Standards for Automation Rate First-Class Mail Flats

### **5.1 Basic Standards for Automation First-Class Mail**

All pieces in a First-Class Mail automation rate mailing must:

- a. Meet the basic standards for First-Class Mail in [3.0](#).
- b. Be part of a single mailing of at least 500 pieces of automation rate First-Class Mail.
- c. Meet the physical standards in [301.3.0](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:

1. The address matching and coding standards in [5.5, Address Standards for Barcoded Pieces](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).
2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Bear an accurate barcode meeting the standards in [708.4.0](#), a ZIP+4 barcode or DPBC, either on the piece or on an insert showing through a barcode window.
- f. Be marked, sorted, and documented as specified in [335.6.0, Preparation of Automation Rate Flats](#), or [705.9.0, Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats](#). [E140.1.1]

## 5.2 Nonmachinable Surcharge for Flat-Size Pieces

Flats that weigh 1 ounce or less are subject to the nonmachinable surcharge in [1.9](#) if any one of the following applies (see [301.1.2, Length and Height of Flats](#), for how to determine the length and height of a mailpiece):

- a. The piece is greater than 1/4-inch thick.
- b. The length is more than 11-1/2 inches or the height is more than 6-1/8 inches.
- c. The aspect ratio (length divided by height) is less than 1.3 or more than 2.5. [E130.3.4]

## 5.3 Rate Application—Bundle-Based Flats

Automation rates apply to each piece that is sorted under [335.6.0](#) or [705, Advanced Preparation and Special Postage Payment Systems](#):

- a. Pieces in 5-digit bundles of 10 or more pieces qualify for the 5-digit rate. Preparation to qualify for the 5-digit rate is optional and need not be done for all 5-digit destinations.
- b. Pieces in 3-digit bundles of 10 or more pieces qualify for the 3-digit rate.
- c. Pieces in ADC bundles of 10 or more pieces qualify for the ADC rate.
- d. Pieces in mixed ADC bundles qualify for the mixed ADC rate. [E140.3.1]

## 5.4 Rate Application—Tray-Based Flats

Automation rates apply to each piece that is sorted under [335.6.6, First-Class Mail Optional Tray-Based Preparation](#), into the corresponding qualifying groups:

- a. Groups of 90 or more pieces in 5-digit trays qualify for the 5-digit rate. Preparation to qualify for the 5-digit rate is optional and need not be done for all 5-digit destinations.
- b. Groups of 90 or more pieces in 3-digit trays qualify for the 3-digit rate.
- c. Groups of fewer than 90 pieces in origin 3-digit trays and all pieces in ADC trays qualify for the ADC rate.
- d. All pieces in mixed ADC trays qualify for the mixed ADC rate. [E140.3.2]

### 5.5 Address Standards for Barcoded Pieces

#### 5.5.1 Basic Address Standards for Barcodes

To qualify for automation rates, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode that appears on a mailpiece claimed at an automation rate must be the correct barcode for the corresponding delivery address on the piece. [A800.1.1]

#### 5.5.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits. [A800.1.2]

#### 5.5.3 Numeric Delivery Point Barcode (DPBC)

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.1.4, Delivery Point Barcode](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A800.1.3]

#### 5.5.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product. [A800.2.2]

#### 5.5.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used. [A800.2.1]

#### 5.5.6 Secondary Designator

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used. [A800.2.3]

#### 5.5.7 Rural and Highway Contract Routes

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest

level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line. [A800.2.4]

**5.5.8 Post Office Box**

A post office box address must contain a post office box number that can be exactly matched with the USPS ZIP+4 Product in effect. [A800.2.5]

**5.6 Reply Cards and Envelopes Enclosed in Automation Rate First-Class Mail**

All letter-size reply cards and envelopes provided as enclosures in automation First-Class Mail and addressed for return to a domestic delivery address must meet the standards in [201.3.0, Physical Standards for Automation Letters and Cards](#), for enclosed reply cards and envelopes. The mailer must certify that this standard has been met when the corresponding mail is presented to the USPS. [E140.1.4]

## 334 Postage Payment and Documentation

### Overview

- 1.0 Basic Standards for Postage Payment
- 2.0 Postage Payment for Presorted Flats
- 3.0 Postage Payment for Automation Flats
- 4.0 Mailing Documentation

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

Postage for discount (presorted or automation) rate First-Class Mail must be paid with affixed postage (604.1.0 for stamps, 604.3.0 for precanceled stamps, or 604.4.0 for metered postage) or permit imprint (604.6.0) as specified in 2.0, *Postage Payment for Presorted Flats*, and 3.0, *Postage Payment for Automation Flats*. A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters. [P100.1.1]

### 2.0 Postage Payment for Presorted Flats

#### 2.1 Payment Methods for Presorted Rates

Presorted First-Class Mail rate postage must be paid with meter stamps under 604.4.0, permit imprints under 604.6.0, or precanceled postage under 604.3.0, subject to the corresponding standards for these methods. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. [P100.4.1]

#### 2.2 Affixed Postage for Presorted First-Class Mail

Unless permitted by other standards or by Business Mailer Support, USPS Headquarters, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. The full postage at the First-Class Mail rate for which it qualifies (no postage documentation is required).
- b. A precanceled stamp or the full postage at the lowest First-Class first-ounce rate applicable to the mailing job, and full postage on metered pieces for any additional ounce(s) or nonmachinable surcharge; postage documentation may be required by standard.
- c. Postage in an amount not less than the lowest available First-Class first-ounce letter or card rate (as applicable) in the mailing job if authorized by Business Mailer Support, plus full postage on metered pieces for any extra ounce(s); postage documentation may be required by standard. [P100.4.2]

334.2.3

### 2.3 Additional Postage

Additional postage for pieces not bearing sufficient postage when presented to the USPS must be paid before acceptance either using an advance deposit account or with a meter stamp affixed to the postage statement accompanying the mail. When the amount of postage affixed is subject to Business Mailer Support authorization under [2.2c, Affixed Postage for Presorted First-Class Mail](#), credit is not given for postage affixed in excess of the authorized amount. [P100.4.3]

## 3.0 Postage Payment for Automation Flats

### 3.1 Payment Methods

First-Class Mail automation rate postage must be paid with meter stamps, permit imprints, or precanceled stamps. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. Permit imprints may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support. [P100.5.1]

### 3.2 Affixing Postage for Automation Rate First-Class Mail

Unless permitted by other standards or Business Mailer Support authorization, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. Each metered piece weighing more than 1 ounce must bear the correct additional postage to pay for the additional ounce(s).
- b. Flat-size pieces must bear enough postage to include the nonmachinable surcharge if applicable.
- c. Each piece must bear a precanceled stamp or meter postage in the exact amount or at the lowest rate applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing with an advance deposit account or with a meter stamp affixed to the required postage statement.
- d. Documentation meeting the standards in [4.0](#) must be presented with the postage statement to show the number of pieces at each rate and the computation of the additional postage due for pieces not bearing full postage at the applicable rate (i.e., the difference between what the pieces bear and the correct postage at the rate for which each qualifies). [P100.5.2]

### 3.3 Nondenominated Precanceled Stamps

A mailer may use available nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.

- c. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each rate and the computation of the additional postage due at the applicable rate (i.e., the difference between the value of the nondenominated stamp affixed and the correct postage at the rate for which each piece qualifies). [P100.5.3]

### 3.4 Lower Denomination Precanceled Stamps

A mailer may use precanceled stamps of a denomination less than the postage for the first ounce at the lowest rate in the mailing if:

- a. The stamps do not bear an improper rate marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement showing, by 5-digit and 3-digit ZIP Code, the number of pieces at each rate and the computation of the additional postage due at the applicable rate (i.e., the difference between the value of the stamps affixed and the correct postage at the rate for which each piece qualifies). [P100.5.4]

### 3.5 Postage Affixed at Lowest Rate to All Pieces

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage rate to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest rate affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest rate affixed to any piece in the mailing and the rate for each rate level in the mailing. This computation must be documented to meet the basic standards in [4.0, Mailing Documentation](#). No refund is paid for any piece where postage is affixed at a rate higher than the lowest rate claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement. [P100.5.5]

## 4.0 Mailing Documentation

### 4.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 4.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the

preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

#### **4.3 Documentation Standards for Automation Mailings**

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified (or MAC-certified) software or standardized documentation. Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. Documentation of postage is not required if the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. [M820.1.3]

#### **4.4 Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### **4.5 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### **4.6 Standard Format for Documentation**

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### **4.7 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0, Rulings on Mailing Standards](#). [P012.1.5]

#### **4.8 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

**4.9 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

## 335 Mail Preparation

### Overview

- [1.0 General Definition of Terms](#)
- [2.0 Bundles](#)
- [3.0 Flat Trays](#)
- [4.0 Tray Labels](#)
- [5.0 Preparation of Nonautomation Flats](#)
- [6.0 Preparation of Automation Rate Flats](#)

### 1.0 General Definition of Terms

#### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

#### 1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation and nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. The types of First-Class Mail listed below must not be part of the same mailing despite being in the same processing category (see [705.9.0, Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats](#), and [705.10.0, Preparation for Merged Containerization of Bundles of Flats Using City State Product](#), for advanced preparation options for flat-size mail):
  1. Automation rate and any other type of mail.
  2. Presorted rate and any other type of mail.
  3. Single-piece rate and any other type of mail.
  4. Machinable and nonmachinable pieces. [M011.1.4]

#### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).

- c. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- d. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- e. *Mixed ADC*: the pieces are for delivery in the service area of more than one ADC. [M011.1.2]

### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full flat tray* is one that is physically full. Although a specific minimum volume is required (at least a single stack of mail lying flat on the bottom of the tray and filling the tray to the bottom of the handholds) before a tray may or must be prepared to the corresponding presort destination, trays must be filled with additional available pieces (up to the reasonable capacity of the tray) when standards require preparation of *full* trays.
- c. A *less-than-full flat tray* is one that contains First-Class Mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full flat trays may be prepared only if permitted by the standards for the rate claimed.
- d. An *overflow flat tray* is a less-than-full First-Class Mail tray that contains all pieces remaining after preparation of one or more full trays for the same destination. Overflow flat trays may be prepared only if permitted by the standards for the rate claimed.
- e. A *5-digit scheme sort for AFSM 100-compatible flats* yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#). Presorting must be performed using [L007](#). Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in [301.3.3, Criteria for AFSM 100 Flats](#). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is optional. Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#). Bundles are placed in appropriate containers using the OEL "label to" 5-digit ZIP Code.
- f. An *origin 3-digit (or origin 3-digit scheme)* tray contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray must be prepared for each.

- g. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- h. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- i. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry SCF”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location the post office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- j. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- k. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [2.0, Bundles](#).
- l. A “*logical presort destination*” represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a First-Class Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles.
- m. *Cobundling* is an alternate preparation method available under [705.11.0](#) for First-Class Mail that allows the combining of flat-size automation rate and Presorted rate pieces within the same bundle under the single minimum bundle size requirement. Regardless of the class of mail, pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).  
[M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).

- d. Bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.5 Exception to Bundle Preparation—Full Single-Sort-Level Trays

In bundle-based mailings not entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch), mail need not be prepared in 5-digit bundles if placed in a full 5-digit tray. Similarly, mail need not be prepared in other levels of bundles when it will be placed in a full tray to the corresponding tray level, and none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if, when correctly sorted, it would have all been prepared in ADC bundles to the same destination; conversely, this exception would not apply if some pieces would require preparation in 5-digit or 3-digit bundles.

[M020.1.9]

### 2.6 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder).

[M020.2.3]

### 2.7 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

### 2.8 Labeling Bundles

Unless excepted by standard, the presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.

335.2.9

- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

### 2.9 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under [708.7.0](#). [M013.1.1]

## 3.0 Flat Trays

### 3.1 Presort

Presort, presort levels, and standard preparation terms are defined in [1.0, General Definition of Terms](#). [M033.1.4]

### 3.2 Standard Containers

Mailings must be prepared in flat trays with green lids. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2]

### 3.3 Tray Sizes

These approximate measurements define the flat tray sizes that apply to all mail preparation standards:

- a. Inside bottom dimensions: 14-3/4 inches long by 10-3/4 inches wide.
- b. Height: 8 inches to bottom of handhold, 11-1/4 inches to top of tray. [M033.1.3]

### 3.4 Tray Preparation

All flat tray preparation is subject to these standards:

- a. Addresses on all pieces must face upward in the same direction.
- b. Pieces must be placed in trays to maintain their orientation. Once the required minimum volume is reached to allow or require preparation of a tray, additional pieces must be placed in the same tray up to its capacity to minimize the number of trays used. When possible, pieces must be placed in two or more stacks to optimize tray use, but mail must not overflow the tray to inhibit adequate closure or covering of the content.
- c. The weight of a tray and its content must not exceed 70 pounds.
- d. Each tray must bear the correct tray label.
- e. Each tray must be covered (with the green side of the lid facing up) and strapped under [3.4i, Tray Preparation](#).
- f. For automation rate mailings prepared under the optional tray-based preparation rules in [6.0](#), one less-than-full overflow tray may be prepared for a presort destination when the total number of pieces for that destination meets the minimum for preparation of the tray level, and when one or more full trays for that destination are also prepared.

- g. For automation rate mailings prepared under the optional tray-based preparation rules, if the total number of pieces for a presort destination meets or exceeds the minimum number of pieces required to prepare a tray for that destination, but the total volume does not physically fill a single tray, then the mail for that presort destination may be prepared in a less-than-full tray.
- h. Pieces prepared as automation flats under the tray-based preparation option do not have to be grouped by 3-digit ZIP Code prefix in ADC trays or by ADC in mixed ADC trays if the mailing is prepared using an MLOCR/barcode sorter and standardized documentation is submitted. [M033.2.3]
- i. Each flat tray must be covered with a lid. Each covered flat tray must then be secured with two straps placed tightly around the width of the tray (i.e., the shorter dimension). [M033.1.5]

### 3.5 Origin/Entry 3-Digit/Scheme Trays

After all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the post office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the post office where the mail is verified). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area. [M033.1.7]

## 4.0 Tray Labels

### 4.1 Basic Standards

Only tray labels may be used for trays; only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Container labels for automation rate mailings are subject to 4.9 and 708.6.0, [Barcoding Standards for Container Labels](#). [M031.1.1]

### 4.2 Physical Characteristics of a Tray Label

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum. [M031.3.2]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of tray labels.

| CONTENT TYPE             | CODE   |
|--------------------------|--------|
| Barcoded                 | BC     |
| Barcoded and Nonbarcoded | BC/NBC |
| Digit                    | D      |
| First-Class Mail         | FCM    |
| Flats                    | FLTS   |
| General Delivery Unit    | G      |
| Highway Contract Route   | H      |
| Mixed                    | MXD    |
| Nonbarcoded              | NON BC |
| Post Office Box Section  | B      |
| Rural Route              | R      |
| Working                  | WKG    |

[M031.5.0]

**4.5 Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**4.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**4.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**4.8 Placement of a Tray Label**

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down. [M031.3.1]

**4.9 Barcoded Tray Labels****4.9.1 Basic Standards for Barcoded Tray Labels**

[Exhibit 4.9.1](#) shows the types of mail requiring barcoded tray labels. Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- c. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing.

- d. Mailer-produced barcoded labels must meet the standards in [708.6.0](#), [Barcoding Standards for Container Labels](#). [M032.1.1]

### Exhibit 4.9.1 Required Barcoded Container Labels

| RATE OR TYPE  | PROCESSING CATEGORY |
|---|---------------------|
| <b>First-Class Mail</b>   |                     |
| Automation rate   | Flat-size           |
| Cobundled and cotrayed under <a href="#">705.9.0</a> through <a href="#">705.13.0</a> | Flat-size           |

[Exhibit M032.1.1]

### 4.9.2 Physical Characteristics of Barcoded Tray Labels

A barcoded tray label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.2.4i](#), [Barcode](#).
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum. [M032.2.1]

## 5.0 Preparation of Nonautomation Flats

### 5.1 Basic Standards

Each Presorted First-Class mailing must be prepared under [5.0](#) and [333.3.0](#), [Eligibility Standards for First-Class Mail Flats](#). All pieces must be in the flat-size processing category. Flat-size pieces must be prepared in flat trays. All pieces must be marked “Presorted” and “First-Class.” [M130.1.1]

### 5.2 Single-Piece Rate Pieces Presented With Presort Mailings

Regardless of the method of postage payment, pieces of single-piece rate First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at automation or presort rates if the single-piece rate pieces are physically separated from other pieces; bear no rate marking, or are marked only “First-Class,” or (if not affixed with full single-piece rate postage) are marked “Single-Piece” or “SNGLP” under [202.3.0](#), [Placement and Content of Mail Markings](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective rate marking) have all additional postage paid at the time of mailing. [P100.2.5]

### 5.3 Nonautomation Pieces

Nonautomation flats must use the preparation sequence and tray labeling in [5.4](#) and [5.5](#). [M130.1.5]

#### 5.4 Bundling and Labeling

Except under [2.7b](#), bundling is required before traying. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [[M130.4.1](#)]

#### 5.5 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (required); full trays (no overflow); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3c](#) for overseas military mail).
  2. Line 2: "FCM FLTS 5D NON BC."
- b. 3-digit (required); full trays (no overflow), except for one less-than-full tray for each origin 3-digit(s); labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "FCM FLTS 3D NON BC."
- c. ADC (required); full trays (no overflow); labeling:
  1. Line 1: [L004](#), Column B.
  2. Line 2: "FCM FLTS ADC NON BC."
- d. Mixed ADC (required); no minimum; labeling:
  1. Line 1: "MXD" followed by city, state, and 3-digit ZIP Code prefix of facility serving 3-digit ZIP Code prefix of entry post office, as shown in [L002](#), Column C.
  2. Line 2: "FCM FLTS NON BC WKG." [[M130.4.2](#)]

#### 5.6 Cotraying and Cobundling With Automation Rate Mail

Except for automation rate mailings prepared under the tray-based preparation option in [6.6](#), if a single mailing job contains an automation rate mailing and a Presorted rate mailing and both mailings are reported on the same postage statement, then the mailing job must be presorted under the cotraying standards in [705.9.0](#). Flat-size Presorted rate pieces may be cobundled with flat-size automation rate pieces under the standards in [705.11.0](#). [[M130.1.7](#)]

## 6.0 Preparation of Automation Rate Flats

### 6.1 Basic Standards

Automation rate First-Class Mail must be prepared under [6.0](#) and meet the eligibility standards for the rate claimed; trays must bear the appropriate barcoded container labels under [708.6.0, \*Barcoding Standards for Container Labels\*](#). Flat-size pieces must be prepared in flat trays. [M820.1.1]

### 6.2 Mailings

#### 6.2.1 Automation Rate Pieces

All pieces in a mailing must be sorted together to the finest extent required. First-Class Mail mailings may include pieces prepared at automation 5-digit, 3-digit, ADC, and mixed ADC rates. The definitions of a mailing and permissible combinations are in [1.2](#). [M820.1.2]

#### 6.2.2 Single-Piece Rate Pieces

Regardless of the method of postage payment, pieces of single-piece rate First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at automation or presort rates if the single-piece rate pieces are physically separated from other pieces; bear no rate marking, or are marked only "First-Class," or (if not affixed with full single-piece rate postage) are marked "Single-Piece" or "SNGLP" under [202.3.0, \*Placement and Content of Mail Markings\*](#), in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective rate marking) have all additional postage paid at the time of mailing. [P100.2.5]

### 6.3 Marking

All automation rate pieces must be marked under [302](#). Pieces claimed at an automation rate must bear the appropriate class marking. Pieces not claimed at an automation rate must not bear "AUTO" unless single-piece rate postage is affixed or a corrective single-piece rate marking ("single-piece" or "SNGLP") is applied. [M820.1.4]

### 6.4 General Preparation

Except for First-Class Mail prepared under [6.6, \*First-Class Mail Optional Tray-Based Preparation\*](#), all pieces must be prepared in bundles and meet the following requirements:

- a. Pieces that meet both the size dimensions and the turning ability and deflection standards under [301.3.3, \*Criteria for AFSM 100 Flats\*](#), must be prepared in separate bundles from pieces that do not meet all AFSM 100 dimensions and the turning ability and deflection standards (but that do meet the dimensions and other criteria for UFSM 1000 processing under [301.3.4](#)).
- b. Each AFSM 100 bundle and each UFSM 1000 bundle must separately meet the bundle size minimum number of pieces in [6.5.1, \*Bundling and Labeling\*](#). When the total number of AFSM 100 or UFSM 1000 pieces for a specific presort destination (e.g., the 5-digit ZIP Code 12345) meets or exceeds the applicable minimum bundle size, the pieces for that presort destination must be prepared into a bundle or bundles labeled to that presort destination under the standards for the rate claimed.

- c. The physical size of each bundle for each specific presort destination may contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Rate eligibility is not affected when a physical bundle contains fewer pieces than the minimum bundle size for the above reasons, provided the total number of AFSM 100 pieces physically bundled for that presort destination or the total number of UFSM 1000 pieces physically bundled for that presort destination meets or exceeds the rate eligibility bundle minimum under [333.5.0, Additional Eligibility Standards for Automation Rate First-Class Mail Flats](#). [M820.1.5]

## 6.5 First-Class Mail Required Bundle-Based Preparation

### 6.5.1 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit rate eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M820.2.1]

### 6.5.2 Combining Bundles into the Same Tray

Mailers may combine AFSM 100 bundles and UFSM 1000 bundles in the same tray. [M820.1.7]

### 6.5.3 Traying and Labeling

Preparation sequence, tray size, and labeling:

- a. 5-digit (optional, but required for 5-digit rate eligibility); full trays (no overflow); labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [708.6.0, Barcoding Standards for Container Labels](#), for overseas military mail).
  - 2. Line 2: "FCM FLTS 5D BC."
- b. 3-digit (required); full trays (no overflow); labeling:
  - 1. Line 1: L002, Column A.
  - 2. Line 2: "FCM FLTS 3D BC."
- c. Origin 3-digit(s) (required); no minimum; labeling:
  - 1. Line 1: L002, Column A.
  - 2. Line 2: "FCM FLTS 3D BC."
- d. ADC (required); full trays (no overflow); labeling:
  - 1. Line 1: L004, Column B.
  - 2. Line 2: "FCM FLTS ADC BC."

- e. Mixed ADC (required); no minimum; labeling:
  - 1. Line 1: "MXD" followed by city, state, and ZIP of facility serving 3-digit ZIP Code prefix of entry post office, as shown in [L002](#), Column C.
  - 2. Line 2: "FCM FLTS BC WKG." [M820.2.2]

### 6.6 First-Class Mail Optional Tray-Based Preparation

Tray size, preparation sequence, and Line 1 labeling:

- a. Mailers may not combine AFSM 100 and UFSM 1000 pieces in the same mailing. [M820.1.12]
- b. 5-digit: optional, but 5-digit trays required for rate eligibility (90-piece minimum); one less-than-full or overflow tray allowed; for Line 1, use city, state, and 5-digit ZIP Code destination of pieces (for military mail see [4.3c](#)). (Preparation to qualify for 5-digit rate is optional and need not be done for all 5-digit destinations.)
- c. 3-digit: required (90-piece minimum); one less-than-full or overflow tray allowed; for Line 1, use [L002](#), Column A for 3-digit destinations.
- d. Origin 3-digit: required for each 3-digit ZIP Code served by the SCF of the origin (verification) office; no minimum; for Line 1, use [L002](#), Column A for 3-digit destinations.
- e. ADC: required (90-piece minimum); one less-than-full or overflow tray allowed; group pieces by 3-digit ZIP Code prefix; for Line 1, use [L004](#) (ZIP Code prefixes in Column A must be combined and labeled to the corresponding ADC destination shown in Column B). As an exception, pieces do *not* have to be grouped by 3-digit ZIP Code prefix in ADC trays if the mailing is prepared using a MLOCR/barcode sorter and standardized documentation is submitted.
- f. Mixed ADC: required (no minimum for rate eligibility); group pieces by ADC; for Line 1, use "MXD" followed by the city, state, and ZIP of the facility serving the 3-digit ZIP Code of the entry post office, as shown in [L002](#), Column C. As an exception, pieces do *not* have to be grouped by ADCs in mixed ADC trays if the mailing is prepared using a MLOCR/barcode sorter and standardized documentation is submitted. [M820.3.0]

### 6.7 5-Digit Scheme Bundle Preparation

Pieces meeting the AFSM 100 compatibility criteria in [301.3.3, Criteria for AFSM 100 Flats](#), may be prepared in 5-digit scheme bundles for those 5-digit ZIP Code combinations identified in [L007](#). These bundles must meet the additional standards in [1.4e, Preparation Definitions and Instructions](#). [M820.1.6]

### 6.8 Cotraying and Cobundling With Presorted Rate Mail

Except for mailings prepared under the tray-based preparation option in [6.6](#), if the mailing job contains an automation rate mailing and a Presorted rate mailing and both mailings are reported on the same postage statement, then the mailing job must be prepared under the cotraying standards in [705.9.0](#). Automation rate pieces may be cobundled with Presorted rate pieces under the standards in [705.11.0](#). [M820.1.10]

## 336 Enter and Deposit

### Overview

- [1.0 Deposit](#)
- [2.0 Verification](#)

## 1.0 Deposit

### 1.1 Service Objectives

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information. [D100.1.1]

### 1.2 Time and Location of Deposit

First-Class Mail paid at the Presorted rate or at any automation rate must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing post office except as permitted in [604.4.10](#). Permit imprint mail must be deposited under [604.6.0](#) and [705, Advanced Preparation and Special Postage Payment Systems](#). [D100.2.2]

### 1.3 Approved Collections

The USPS may collect Presorted First-Class Mail and automation rate First-Class Mail at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation required for those classes; and:

- a. Acceptance and verification are done at the customer's facility; or
- b. Postage is paid with permit imprint under an optional procedure; or
- c. Postage is paid with meter or precanceled stamps. [D100.2.5]

### 1.4 Permit Imprint Collection

The USPS does not collect presort mailings from a customer's facility if paid with a permit imprint and not covered by optional procedures. [D100.2.4]

## 2.0 Verification

### 2.1 USPS Verification and Mailer Correction

Mailings are subject to USPS procedures to verify correct preparation and postage payment. The mailer is responsible for correcting irregularities found in the mailing. If, at the acceptance unit, a mailing is found not to qualify for a Presorted First-Class rate or an automation First-Class rate, the mailer must either take corrective action or pay the full single-piece rate. The return of such mailings to the mailer's facility for any reworking is the mailer's responsibility. [D100.3.1]

### 2.2 Timeframe for Corrective Action

If a mailer corrects the presort or preparation problems in a metered or precanceled stamped mailing that caused its disqualification when originally presented for acceptance, but cannot resubmit that mailing on the same day, the date shown in

336.2.3

the meter or mailer's precancel postmark must be corrected. The mailer may either re-envelope each piece and reapply postage and request a postage refund or apply a legible ".00" meter impression that includes the correct mailing date. [D100.3.2]

### **2.3 Payment at Single-Piece Rate Rather than Correcting Errors**

A mailer who pays the single-piece First-Class rate rather than correcting errors in a mailing paid with meter or precanceled stamps must pay the difference in cash at the window and present the copy of the cash receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a mailing paid with a permit imprint must correct the postage statement presented with the mailing to show that postage is to be paid at the higher rate. [D100.3.3]

## 343 Rates and Eligibility

### Overview

- 1.0 Rates and Fees for Standard Mail
- 2.0 Content Standards for Standard Mail Flats
- 3.0 Basic Standards for Standard Mail Flats
- 4.0 Rate Eligibility for Standard Mail
- 5.0 Additional Eligibility Standards for Presorted Standard Mail Flats
- 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Flats
- 7.0 Additional Eligibility Standards for Automation Rate Standard Mail Flats

### 1.0 Rates and Fees for Standard Mail

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Standard Mail Rate Application

Standard Mail rates are based on the weight of the pieces and are applied differently to pieces weighing less than or equal to 3.3 ounces (0.2063 pound) and those weighing more, as follows:

- a. The appropriate minimum per piece rate applies to any Standard Mail piece that weighs 3.3 ounces or less.
- b. A rate determined by adding the appropriate fixed per piece charge and the corresponding variable per pound charge (based on the weight of the piece) applies to any Standard Mail piece that weighs more than 3.3 ounces.

|  |      | 0.110     | 0.063   | 0.050                  | 0.034        | 0.028      | 0.069      | 0.046   |

1. For pieces weighing more than 3.3 ounces, each piece is subject to both a per piece rate and a per pound rate. Multiply the number of pieces in the mailing by per piece rate. Multiply the number of pounds of the mailing by per pound rate. Add both totals.

[R600.3.2, R600.3.3, R600.4.2, R600.4.3]

### 1.5 Fees

#### 1.5.1 Presort Mailing Fee

Mailing fee, per 12-month period: \$150.00. [R600.8.1]

**1.5.2 Weighted Fee**

For return of pieces bearing the ancillary service markings “Address Service Requested” and “Forwarding Service Requested.”

| <b>WEIGHTED FEE</b>                          |   |
|--|---|
| <b>Single Piece Weight Not Over</b> (ounces) | <b>Weighted Fee per Piece<sup>1</sup></b> |
| 1  | 0.92                                      |
| 2  | 1.49                                      |
| 3  | 2.06                                      |
| 4  | 2.63                                      |
| 5  | 3.19                                      |
| 6  | 3.76                                      |
| 7  | 4.33                                      |
| 8  | 4.90                                      |
| 9  | 5.47                                      |
| 10   | 6.04                                      |
| 11   | 6.61                                      |
| 12   | 7.17                                      |
| 13   | 7.74                                      |
| Over 13 but under 16                         | 9.52                                      |

1. Weighted fee equals single-piece First-Class Mail or Priority Mail rate multiplied by 2.472. Nonmachinable surcharge may apply.

[R600.8.2]

**1.6 Computing Postage—Standard Mail****1.6.1 Weight**

To compute the total weight of the addressed pieces in a mailing or mailing segment for:

- a. Identical-weight pieces, multiply the computed average weight of a single piece by the corresponding number of pieces; do not round the product.
- b. Nonidentical-weight pieces, add the actual weight of the individual pieces or weigh the entire mailing in bulk; do not round either result. [P013.8.1]

**1.6.2 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

#### **1.6.3 Net Postage**

Postage is computed at the applicable rates on the entire mailing to be mailed at one time. The net postage rate that must be paid is either the applicable minimum per piece rate or the piece/pound rate, as reduced by any discounts for which the piece is eligible, and/or as increased by any surcharge to which the piece is subject. The net postage rate is commonly designated by the name of the primary rate category or discount (e.g., Enhanced Carrier Route rate, automation letter rate, automation flat rate, Presorted rate). [E610.5.6]

#### **1.6.4 Per Piece and Per Pound Charges**

The per piece charge is computed based on the total number of addressed pieces for each rate category claimed. The minimum rate may apply to each piece as detailed in [1.2, Standard Mail Rate Application](#). Otherwise, the per piece charge must be added to the per pound charge to determine total postage. Where applicable, the per pound charge is computed based on the total weight of the addressed pieces for each rate category claimed, and is added to the per piece charge to determine total postage. For example, a quantity of pieces weighing 100.25 pounds is charged 100.25 times the applicable rate per pound, based on the rate claimed, plus one unit of the applicable per piece charge for each addressed piece. [P013.8.2]

#### **1.6.5 Computing Affixed Postage**

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable rate per pound; add the applicable per piece charge and any surcharge; and round the sum up to the next tenth of a cent. The applicable minimum per piece charge must be affixed if it is more than the total computed per piece postage. [P013.8.3]

#### **1.6.6 Permit Imprint**

In any permit imprint mailing:

- a. For each rate or rate category, multiply the number of addressed pieces by the corresponding rate per piece and (if applicable) multiply the *unrounded* total weight of the pieces by the corresponding rate per pound; round off each product to four decimal places.
- b. Add the per piece and per pound charges and round off the total postage to the nearest whole cent. [P013.8.5]

## 2.0 Content Standards for Standard Mail Flats

### **2.1 Definition and Weight**

Standard Mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (unless permitted or required by standard) and that weighs less than 16 ounces. Standard Mail includes matter formerly classified as Standard Mail (A) and third-class mail. [E610.1.1]

**2.2 Postal Inspection**

Standard Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Standard Mail rates constitutes consent by the mailer to postal inspection of the contents. [E610.1.2]

**2.3 Circulars**

Circulars, including printed letters that, according to their contents, are sent in identical terms to more than one person are Standard Mail. A circular does not lose its character as such if a date and the individual names of the addressee and sender are written (handwritten or typewritten) on the circular or written corrections of typographical errors are made on the circular. [E610.2.1]

**2.4 Printed Matter**

Printed matter may be sent as Standard Mail. For this standard, *printed matter* means paper on which words, letters, characters, figures, or images (or any combination of them), not having the character of a bill or statement of account or of actual and personal correspondence, are reproduced by any process other than handwriting or typewriting. [E610.2.2]

**2.5 Computer-Prepared Material**

Computer-prepared material is considered printed matter. Such material is not considered to have the character of actual and personal correspondence merely because it contains:

- a. Specific information about a product (e.g., size, color, price) or a service being offered for sale or lease (e.g., the name, address, and telephone number of a company representative).
- b. Information relating the addressee directly to an advertised product or service being offered for sale or lease.
- c. Information such as the amount paid for a previous purchase, pledge, or donation, when associated with a sales promotion or solicitation for donations. [E610.2.3]

**2.6 Attachments and Enclosures****2.6.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Standard Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E610.4.1]

**2.6.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to Standard Mail merchandise (including books but excluding merchandise samples) without payment of First-Class postage. Incidental First-Class matter may not be enclosed

### 343.2.6.3

in or attached to matter mailed as Customized MarketMail under [705.1.0](#). An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared not to encumber postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Standard Mail or Package Services rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E610.4.2]

#### **2.6.3 Nonincidental First-Class Enclosures**

Letters or other pieces of nonincidental First-Class Mail, subject to postage at First-Class Mail rates, may be enclosed with Standard Mail pieces (except matter mailed as Customized MarketMail under [705.1.0](#)). Postage for the First-Class enclosure must be placed on the outside of the piece. It may be affixed separately or added to the postage for the host piece. The endorsement “First-Class Mail Enclosed” must be placed on the piece, below the postage and above the address. [E610.4.3]

#### **2.6.4 Nonincidental First-Class Attachments**

Letters or other pieces of nonincidental First-Class Mail may be placed in an envelope and securely attached to the address side of a Standard Mail piece (except matter mailed as Customized MarketMail under [705.1.0](#)), or of the principal piece, as applicable. Combination envelopes or containers with separate parts for the two classes of mail may be used. The names and addresses of the sender and addressee must be placed on both the principal piece and the attachment. Alternatively, the sender's name and address must be placed on one part and the addressee's name and address on the other. If the piece is a combination container with inseparable parts or compartments, the names and addresses may appear on only one part. The applicable Standard Mail postage for the Standard Mail matter must be prepaid and placed in the upper right corner of the address space. Postage at the applicable First-Class rate must be paid for and affixed to the First-Class attachment, unless other payment methods are permitted by standard. [E610.4.4]

#### **2.6.5 Attachment of Other Standard Mail Matter**

Standard Mail pieces may bear an attachment that is eligible as Standard Mail matter if these additional conditions are met:

- a. The piece bearing the attachment is claimed as Customized MarketMail (CMM) under [705.1.0](#) or as Enhanced Carrier Route Standard Mail under [6.0](#).
- b. The face of the attachment may bear only the rate markings and endorsements permitted for the rate claimed for the host piece.
- c. At the time of mailing, the piece shows only one complete delivery address. If the attachment is a reply card, the address for returning the piece is not visible.
- d. Enhanced Carrier Route host pieces are larger than 6 by 11 inches. CMM host pieces are any size permitted under [705.1.1.3](#), *Physical Standards*.

- e. The attachment is not larger than the host piece and does not extend beyond the host piece. An attachment affixed to a CMM piece may not be greater than 1/4 inch thick at its thickest point.
- f. Each piece in the mailing bears the attachment, and the attachment is of identical size, weight, and positioning on the host piece. Different wording or designs may be used.
- g. The attachment does not interfere with processing or delivery. Folded or multipage attachments must be secured to prevent opening during handling. [E610.4.5]

## 2.7 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E610.3.0]

## 3.0 Basic Standards for Standard Mail Flats

### 3.1 Basic Standards

Each Standard Mail mailing is subject to these general standards:

- a. All pieces in a mailing must be of the same processing category.
- b. Each mailing must contain at least 200 pieces or 50 pounds of pieces. See [3.4, Residual Volume Requirement](#), for volume requirement eligibility unique to Presorted Standard rate mailings. Other volume standards also can apply, based on the rate claimed.

### 343.3.2

- c. All pieces in an automation mailing must be eligible for an automation rate. Separate automation and Presorted rate mailings of flats that are reported on the same postage statement must be cosacked under [705.9.0, \*Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats\*](#). Separate automation, Presorted, and Enhanced Carrier Route mailings of flats may be co-containerized under [705](#).
- d. All pieces in a mailing must be sorted together and marked under the standards for the rate claimed.
- e. Each piece must bear the addressee's name and delivery address, including the correct ZIP Code or ZIP+4 code, unless an alternative addressing format is used subject to [602.3.0, \*Use of Alternative Addressing\*](#). Detached address labels may be used subject to [602.4.0, \*Detached Address Labels \(DAL\)\*](#).
- f. Postage must be paid under [344.1.0](#) through [344.3.0 in \*Postage Payment and Documentation\*](#) with precanceled stamps, meter stamps, or permit imprint.
- g. A postage statement, completed and signed by the mailer, using the correct USPS form or an approved facsimile, must be submitted with each mailing. In addition, mailings must be documented under [344.4.2](#) and the standards for the rate claimed.
- h. Each piece must meet the standards for any other rate or discount claimed.
- i. Any POSTNET barcode on a mailpiece must be correct for the delivery address and meet the standards in [302.4.0, \*Barcode Placement\*](#), [708.4.0, \*Barcoding Standards for Letters and Flats\*](#), and [708.3.0, \*Coding Accuracy Support System \(CASS\)\*](#).
- j. Mailings must be deposited at a business mail entry unit of the post office where the postage permit or license is held and the annual mailing fee paid, unless deposit elsewhere is permitted by standard. [E610.8.0]

### 3.2 Presort Mailing Fees

An annual mailing fee must be paid once each 12-month period at each post office of mailing. A mailer paying this fee may enter clients' mail as well as the mailer's own. The mailer whose permit imprint appears on pieces in a mailing paid with a permit imprint must show that permit number on the postage statement and must pay the annual mailing fee for that permit; this fee is in addition to the one-time fee for an application to use permit imprints. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [E610.6.1]

### 3.3 Merging Similar Standard Mailings

Mailings are subject to the general definitions and conditions in [345.1.0, \*General Information for Mail Preparation\*](#). Generally, mailers may merge similar Standard Mail matter into a single mailing. Differences in text, address labels, and address lists or list key numbers do not prohibit the mailer from merging and sorting pieces together. Pieces with different methods of postage payment may be combined in the same mailing only if authorized by Business Mailer Support (BMS). Pieces of nonidentical weight, if merged in the same mailing, must bear the correct postage when mailed, unless otherwise authorized by BMS. [E610.7.0]

### 3.4 Residual Volume Requirement

Pieces in an Enhanced Carrier Route rate mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted rate mailing, provided that the Enhanced Carrier Route rate mailing and the Presorted rate mailing are part of the same mailing job. Likewise, pieces in an automation rate mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted rate mailing, provided that the automation rate mailing and the Presorted mailing are part of the same mailing job. Pieces mailed at Presorted Standard Mail rates must not be counted toward the minimum volume requirements for an Enhanced Carrier Route rate or an automation rate mailing. [E620.1.2]

### 3.5 Residual Mail Subject to First-Class or Priority Mail Rates

Pieces prepared as Standard Mail (i.e., that bear Standard Mail rate markings, ACS codes, etc.) that do not qualify for Enhanced Carrier Route, automation, or Presorted Standard Mail rates are subject to the single-piece First-Class or Priority Mail rates as applicable for the weight of the mailpiece. Metered pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail rates and any pieces that do not qualify for Standard Mail rates for which First-Class or Priority Mail service is desired must be re-enveloped or otherwise prepared so that they do not bear Standard Mail markings, endorsements, and ACS codes and must bear the proper First-Class Mail or Priority Mail rate markings and ACS codes. Mailers who have pieces (other than metered pieces weighing over 13 ounces but less than 16 ounces) that do not qualify for Standard Mail rates but that are prepared as Standard Mail and who do not desire to receive First-Class Mail or Priority Mail service for those pieces may enter their mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), provided the requirements in [344.1.0, Basic Standards for Postage Payment](#), are met. [E620.1.3]

### 3.6 ZIP Code Accuracy

#### 3.6.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.6.1d, Basic Standards](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.6.2, USPS-Approved Methods](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]

### 343.3.6.2

- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail rates, regardless of any required surcharges, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

#### **3.6.2 USPS-Approved Methods**

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
  2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
  3. Any mailing list service in [507.6.0](#).
  4. An authorized service provider.
  5. CASS-certified matching software.
  6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

#### **3.6.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

## 4.0 Rate Eligibility for Standard Mail

### **4.1 General Information**

All Standard Mail rates are presorted rates (including all nonprofit rates). These rates apply to mailings meeting the basic standards in [2.0](#) through [4.0](#) and the corresponding standards for Presorted rates under [3.0](#) and [5.0](#), Enhanced Carrier Route rates under [6.0](#), automation rates under [7.0](#), or Customized MarketMail rates under [705.1.0](#). Except for Customized MarketMail pieces, destination entry discount rates are available under [346.2.0](#) through [346.5.0](#). Nonprofit rates may be used only by organizations authorized by the USPS. Not all processing categories qualify for every rate. Pieces are subject to either a single minimum per piece rate or a combined piece/pound rate, depending on the weight of the individual pieces in the mailing. [E610.5.1]

### **4.2 Minimum Per Piece Rates**

The minimum per piece rates (i.e., the minimum postage that must be paid for each piece) apply as follows:

- a. **Basic Requirement.** Pieces mailed at Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route rates are subject to minimum per piece rates when they weigh no more than 3.3 ounces (0.2063 pound).

- b. In applying the minimum per piece rates, a mailpiece is categorized as either a letter or a nonletter, based on whether the piece meets the letter-size standard in [201.1.0](#), without regard to placement of the address on the piece, except under these conditions:
  1. If the piece meets both the definition of a letter in [201.1.0](#), *Physical Standards for Machinable Letters and Cards*, and the definition of an automation flat in [301.3.0](#), the piece may be prepared and entered at an automation flat (nonletter) rate.
  2. If the piece is mailed as a Customized MarketMail piece under [705.1.0](#), *Customized MarketMail*, the piece is always subject to the applicable Regular or Nonprofit Standard Mail basic nonletter per piece rate and must not exceed the maximum weight for those rates.
- c. Individual Rates. There are separate minimum per piece rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. Except for Customized MarketMail pieces, discounted per piece rates also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [346](#). DDU rates are available only for mail entered at Enhanced Carrier Route or Nonprofit Enhanced Carrier Route rates. See [1.0](#) for individual per piece rates. [E610.5.2]

#### **4.3 Piece/Pound Rates**

Pieces that exceed 3.3 ounces (0.2063 pound) are subject to a two-part piece/pound rate that includes a fixed charge per piece and a variable pound charge based on weight. Pieces exceeding 3.3 ounces may not be mailed as Customized MarketMail. There are separate per piece rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. There are separate per pound rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route). Discounted per pound rates also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [346](#). [E610.5.3]

#### **4.4 Residual Shape Surcharge**

Any piece that is prepared as Customized MarketMail under [705.1.0](#) is subject to the residual shape surcharge. [E610.5.5]

### **5.0 Additional Eligibility Standards for Presorted Standard Mail Flats**

#### **5.1 Basic Standards**

All pieces in a Regular Standard Mail or Nonprofit Standard Mail Presorted rate mailing must:

343.5.2

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#) in *Rates and Eligibility*.
- b. Except as provided in [3.4](#), *Residual Volume Requirement*, be part of a single mailing of at least 200 addressed pieces or 50 pounds of pieces qualifying for Presorted Standard Mail. Basic rate and 3/5 rate pieces prepared as part of the same mailing are subject to a single minimum volume standard. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The ZIP Code accuracy standard in [3.6](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- d. Be marked, sorted, and documented as specified in [345](#), *Mail Preparation*, or [705](#), *Advanced Preparation and Special Postage Payment Systems*. [E620.1.1]

### 5.2 Rate Application

Presorted rates for Regular and Nonprofit Standard Mail apply to flats that meet the eligibility standards in [2.0](#) through [4.0](#) and the preparation standards in [705](#), *Advanced Preparation and Special Postage Payment Systems*. [E620.2.1]

### 5.3 Basic Rate

The basic rate applies to pieces that do not meet the standards for 3/5 rates described in [5.4](#). [E620.2.2]

### 5.4 3/5 Rate

The 3/5 rate applies to qualifying flat-size pieces if they are presented:

- a. In a 5-digit scheme (under [705.11.0](#)) and 5-digit bundle of 10 or more pieces, or 15 or more pieces, as applicable; in a 3-digit scheme (under [705.11.0](#)) or 3-digit bundle of 10 or more pieces; placed in a 5-digit scheme (under [705.10.0](#)), 5-digit, or 3-digit sack containing at least 125 pieces or 15 pounds of pieces.
- b. In a 5-digit bundle of 10 or more pieces, or 15 or more pieces, as applicable, that is part of a group of bundles sorted to a merged 5-digit or merged 5-digit scheme (under [705.10.0](#)) sack that contains either at least one qualifying carrier route bundle of 10 or more pieces, or contains at least 125 pieces or 15 pounds of pieces prepared in 5-digit bundles (both automation and Presorted rate 5-digit bundles count toward the 125-piece or 15-pound sack minimum).
- c. When palletized under [705.8.0](#) and [705.10.0](#) through [705.13.0](#), in a 5-digit scheme (under [705.11.0](#)) and 5-digit bundle of 10 or more pieces, or 15 or more pieces, as applicable; or in a 3-digit scheme (under [705.11.0](#)) and 3-digit bundle of 10 or more pieces. [E620.2.3]

## 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Flats

### 6.1 General Enhanced Carrier Route Standards

#### 6.1.1 Optional Preparation

Preparation to qualify for any Enhanced Carrier Route rate is optional and need not be performed for all carrier routes in a 5-digit area. An Enhanced Carrier Route mailing may include pieces at basic, high density, and saturation Enhanced Carrier Route rates. [E630.1.3]

#### 6.1.2 Basic Eligibility Standards

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in Rates and Eligibility](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of Enhanced Carrier Route Standard Mail. Automation basic carrier route rate pieces are subject to a separate 200-piece or 50-pound minimum volume standard and may not be included in the same mailing as other Enhanced Carrier Route mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Be sorted to carrier routes, marked, and documented under [705.8.0, Preparation for Pallets, 345.6.0](#), or [705, Advanced Preparation and Special Postage Payment Systems](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The carrier route accuracy standard in [6.2](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
  3. If flat-size pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- e. Meet the applicable sequencing requirements in [6.3](#) through [6.5 in Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Flats](#) and in [345.6.9, Delivery Sequence Standards](#), and [345.6.10, Delivery Sequence Documentation](#). [E630.1.1]
- f. Meet the applicable documentation and postage payment standards in [344, Postage Payment and Documentation](#), and [1.6, Computing Postage—Standard Mail](#). [E640.2.1]
- g. Enhanced Carrier Route rate mail may not be more than 11-3/4 inches high, 14 inches long, or 3/4-inch thick. *Exception:* Merchandise samples with detached address labels (DALs) may exceed these dimensions if the labels meet the standards in [602.4.0](#). [E630.1.2]

## 6.2 Carrier Route Code Accuracy

### 6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain rates under [6.2.1d](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [6.2.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail Enhanced Carrier Route rates, regardless of any required surcharge, must meet the carrier route accuracy standard.

[A030.3.2 and A030.3.3]

### 6.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#). Printed Carrier Route Files (schemes) may be used for Standard Mail Enhanced Carrier Route flat-size mail at basic, high density, and saturation rates. [A030.3.4]

### 6.2.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

## 6.3 Basic Rate Enhanced Carrier Route Standards

### 6.3.1 Sequencing

All pieces mailed at basic rates must be prepared in walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (see [345.6.9, Delivery Sequence Standards](#), and [345.6.10, Delivery Sequence Documentation](#)). [E630.2.1]

### 6.3.2 Basic Rate Eligibility

Basic rates apply to each piece in a carrier route bundle of 10 or more pieces that is:

- a. Palletized under [705.8.0, Preparation for Pallets](#), [705.10.0, Preparation for Merged Containerization of Bundles of Flats Using City State Product](#), [705.12.0, Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold](#), or [705.13.0, Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold](#).
- b. Placed in a carrier route sack containing at least 125 pieces or 15 pounds of pieces.
- c. Placed in a merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sack. [E630.2.3]

## 6.4 High Density Enhanced Carrier Route Standards

### 6.4.1 Basic Eligibility Standards for High Density Rates

All pieces mailed at high density rates must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [345.6.9](#)).
- b. Meet the density requirement of at least 125 pieces for each carrier route. Multiple pieces per delivery address can count toward this density standard. Fewer pieces may be prepared for routes with fewer than 125 possible deliveries if a piece is addressed to every possible delivery on the route. [E630.3.1]

### 6.4.2 High Density Rates for Flats

High density rates apply to each piece in a carrier route bundle of 10 or more pieces that is:

- a. Palletized under [705.8.0, Preparation for Pallets](#), [705.10.0, Preparation for Merged Containerization of Bundles of Flats Using City State Product](#), [705.12.0, Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold](#), or [705.13.0, Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold](#).
- b. Placed in a carrier route sack containing at least 125 pieces or 15 pounds of pieces.
- c. Placed in a merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sack. [E630.3.4]

## 6.5 Saturation Enhanced Carrier Route Standards

### 6.5.1 Basic Eligibility Standards for Saturation Rates

All pieces mailed at saturation rates must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [345.6.9](#)).
- b. Meet the density requirement of at least 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses on each carrier route receiving this mail. Pieces bearing a simplified

343.6.5.2

address must meet the coverage standards in [602.3.0, Use of Alternative Addressing](#). Multiple pieces per delivery address do not count toward this density standard. [E630.4.1]

### 6.5.2 Saturation Rates for Flats

Saturation rates apply to each piece in a carrier route bundle of 10 or more pieces that is:

- a. Palletized under [705.8.0, Preparation for Pallets](#), [705.10.0, Preparation for Merged Containerization of Bundles of Flats Using City State Product](#), [705.12.0, Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold](#), or [705.13.0, Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold](#).
- b. Placed in a carrier route sack containing at least 125 pieces or 15 pounds of pieces.
- c. Placed in a merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sack. [E630.4.4]

## 7.0 Additional Eligibility Standards for Automation Rate Standard Mail Flats

### 7.1 Basic Eligibility Standards for Automation Standard Mail

All pieces in a Regular Standard Mail or Nonprofit Standard Mail automation rate mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0 in Rates and Eligibility](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of automation rate Standard Mail (Regular and Nonprofit mailings must meet separate minimum volumes).
- c. Be in the same processing category and meet the physical standards in [301.3.0](#).
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The address matching and coding standards in [7.3, Address Standards for Barcoded Pieces](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The ZIP Code accuracy standard in [3.6](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).

- f. Be marked, sorted and documented as specified in [345.7.0](#), and [705.8.0](#) through [705.13.0](#).
- g. Meet the applicable documentation and postage payment standards in [344](#).  
[E640.1.1]

## 7.2 Rate Application

Automation rates apply to each piece that is sorted properly into the corresponding qualifying groups:

- a. Pieces in 5-digit scheme and 5-digit bundles of 10 or more pieces, or 15 or more pieces, as applicable, or in 3-digit scheme and 3-digit bundles of 10 or more pieces qualify for the 3/5 automation rate.
- b. Pieces in ADC or mixed ADC bundles qualify for the basic automation rate.  
[E640.1.5]

## 7.3 Address Standards for Barcoded Pieces

### 7.3.1 Basic Address Standards for Barcodes

To qualify for automation rates, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode that appears on a mailpiece claimed at an automation rate must be the correct barcode for the corresponding delivery address on the piece.  
[A800.1.1]

### 7.3.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.  
[A800.1.2]

### 7.3.3 Numeric Delivery Point Barcode (DPBC)

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.1](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A800.1.3]

### 7.3.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product. [A800.2.2]

### 7.3.5 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used. [A800.2.1]

#### **7.3.6 Secondary Designator**

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used. [A800.2.3]

#### **7.3.7 Rural and Highway Contract Routes**

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line. [A800.2.4]

#### **7.3.8 Post Office Box**

A post office box address must contain a post office box number that can be exactly matched with the USPS ZIP+4 Product in effect. [A800.2.5]

### **7.4 Enclosed Reply Cards and Envelopes**

All letter-size reply cards and envelopes (business reply, courtesy reply, and meter reply mail) provided as enclosures in automation Regular or Nonprofit Standard Mail, and addressed for return to a domestic delivery address, must meet the standards in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#), for enclosed reply cards and envelopes. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. [E640.1.2]

## 344 Postage Payment and Documentation

### Overview

- 1.0 Basic Standards for Postage Payment
- 2.0 Postage Payment for Presorted and Enhanced Carrier Route Flats
- 3.0 Postage Payment for Automation Flats
- 4.0 Mailing Documentation
- 5.0 Residual Pieces

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Postage for Standard Mail must be paid with meter (604.4.0), permit imprint (604.6.0), or precanceled stamps (604.3.0). Postage-affixed pieces must bear the correct postage unless excepted by standard. A permit imprint may be used for mailings that contain nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

[P600.1.1]

### 2.0 Postage Payment for Presorted and Enhanced Carrier Route Flats

#### 2.1 Identical-Weight Pieces

Mailings of identical-weight pieces may have postage affixed to each piece at the exact rate for which the piece qualifies, or each piece in the mailing may have postage affixed at the lowest rate applicable to pieces in the mailing or mailing job. Alternatively, a nondenominated precanceled stamp may be affixed to every piece in the mailing or mailing job, or each piece may bear a permit imprint. If exact postage is not affixed, all additional postage and surcharges must be paid at the time of mailing with an advance deposit account or with a meter strip affixed to the required postage statement. If exact postage is not affixed, documentation meeting the standards in 4.0 must be submitted to substantiate the additional postage unless the pieces are identical weight and separated by rate when presented for acceptance. [P600.2.1]

#### 2.2 Nonidentical-Weight Pieces

Postage for nonidentical-weight pieces subject to the minimum per piece rates may be paid by meter stamps, precanceled stamps, or precanceled stamped envelopes. Mailings of nonidentical-weight pieces subject to the piece/pound rates may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter or precanceled stamps (if each piece has the full postage affixed). Alternatively, except for heavy automation and Enhanced Carrier Route letters, the mailer may affix the per piece rate to each piece and pay the pound rate for the mailing through an advance deposit account. Under this alternative, the mailer must provide a postage statement for each payment method and mark each piece "Pound Rate Pd via Permit," in the postage meter indicium or ad plate or other

344.2.3

means that ensures a legible endorsement. For mailings of nonidentical-weight pieces, “nonidentical” must be shown as the weight of a single piece on the applicable postage statement; other entries must be completed as directed. [P600.2.2]

### 2.3 Combined Rate

Meter postage may be used for combined rate mailings containing both pieces subject to pound rates and pieces subject to minimum per piece charges. Postage for such mailings may be paid with permit imprint only if authorized by Business Mailer Support. [P600.2.3]

## 3.0 Postage Payment for Automation Flats

### 3.1 All Pieces

Unless authorized by the USPS under [705.2.0](#) through [705.5.0](#) in *Advanced Preparation and Special Postage Payment Systems* and [705.15.0](#), *Plant-Verified Drop Shipment (PVDS)*, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing, and each piece must bear the correct postage at the rate claimed based on its eligibility. For mailings of nonidentical-weight pieces subject to the piece/pound rates, the mailer may affix the applicable per piece rate to each piece and pay the pound rate for the mailing by a permit imprint advance deposit account. All pieces prepared this way in the same mailing must be subject to the same pound rate. A postage statement must be submitted for each payment method and each piece must be marked “Pound Rate Pd via Permit” in the postage meter indicium or ad plate or other means that ensures a legible endorsement. “Nonidentical” must be shown as the weight of a single piece on the postage statement. [P600.3.1]

### 3.2 Adding Additional Postage

In a metered or precanceled stamp mailing:

- a. Each piece must bear a precanceled stamp or meter postage in the exact postage or at the lowest rate applicable to pieces in the mailing job. If exact postage is not affixed, all additional postage must be paid at the time of mailing through an advance deposit account or with a meter stamp affixed to the required postage statement.
- b. Documentation presented with the postage statement must show the computation of the additional postage due for pieces not bearing full postage at the applicable rate (i.e., the difference between what the pieces bear and the correct postage at the rate for which each qualifies). [P600.3.2]

### 3.3 Nondenominated Precanceled Stamps

A mailer may use nondenominated precanceled stamps if:

- a. Stamps are affixed to every piece in the mailing.
- b. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- c. Documentation is presented with the postage statement as described in [3.2b](#). [P600.3.3]

**3.4 Precanceled Stamps at Lower Denominations**

A mailer may use precanceled stamps of a denomination less than the postage for the lowest rate in the mailing if:

- a. The stamps do not bear an improper rate marking.
- b. The same denomination of stamp is affixed to every piece in the mailing.
- c. Additional postage is paid at the time of mailing by advance deposit account or meter stamp affixed to the back of the accompanying postage statement.
- d. Documentation is presented with the postage statement as described in [3.2b](#).

[P600.3.4]

**3.5 Mixed Rate Mailing Documentation**

Where it is not practicable for the mailer to affix the exact postage to each piece or to affix the lowest postage rate to all pieces in the mailing, the mailer may compute postage for the mailing as if the lowest rate affixed to any piece in the mailing were affixed to all pieces. Additional postage is computed based on the difference between the lowest rate affixed to any piece in the mailing and the rate for each rate level in the mailing. This computation must be documented to meet the basic standards in [4.0](#). No refund is paid for any piece where postage is affixed at a rate higher than the lowest rate claimed for or affixed to any piece. The total additional postage must be paid either by advance deposit account or by a meter stamp affixed to the back of the accompanying postage statement. [P600.3.5]

**4.0 Mailing Documentation****4.1 Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

**4.2 Basic Documentation Standards**

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

**4.3 Documentation Standards for Automation Mailings**

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified (or MAC-certified) software or standardized documentation. Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. Documentation of

postage is not required if the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. [M820.1.3]

#### **4.4 Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### **4.5 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### **4.6 Standard Format for Documentation**

Standard Mail documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in 708.1.0, as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### **4.7 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under 607.2.0. [P012.1.5]

#### **4.8 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

#### **4.9 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. For example: Part A, lines A5, A6, and

total – Part A from Form 3602-R, and Part F, lines F1, F2, and total – Part F from Form 3602-RS, can be consolidated onto a single Form 3602 (Facsimile). Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

## 5.0 Residual Pieces

### 5.1 Residual Standard Mail Subject to First-Class Rates

Mailers who have pieces weighing 13 ounces or less that do not qualify for Standard Mail rates but that are prepared as Standard Mail must pay single-piece First-Class Mail postage for such pieces. If mailers do not desire to receive First-Class Mail service for such pieces they may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. Mail bearing metered or precanceled stamp postage must pay the difference between the postage affixed at the Standard Mail rates and the single-piece First-Class Mail rates by means of an advance deposit account or by affixing a meter stamp for the appropriate amount to Form 3600-P. These pieces are reported in Part C on the reverse side of Form 3600-P under the heading “From Standard Mail.”
- c. Mail bearing permit imprints must pay the appropriate single-piece First-Class rates by completing Form 3600-R. These pieces are reported in Part C on the reverse side of Form 3600-R under the heading “From Standard Mail.” For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job. [P100.2.6]

### 5.2 Residual Standard Mail Subject to Priority Mail Rates

Mailers who have permit imprint pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail rates but that are prepared as Standard Mail must pay Priority Mail postage for such pieces. Mailpieces paid with meters or permit imprints must re-envelope or otherwise prepare the pieces so that when mailed they bear only the appropriate Priority Mail markings, ancillary service endorsements, and ACS codes and do not bear Standard Mail markings, endorsements, or ACS codes. Mailpieces paid with permit imprints for which mailers do not desire to receive Priority Mail service may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.

# 344

## Discount Flats: Standard Mail Postage Payment and Documentation

---

344.5.2

- b. The appropriate Priority Mail rates must be paid by completing Form 3600-PM. The pieces must be recorded on this postage statement on the line titled "Pieces From Standard Mail" in the postage calculation section. For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job.  
[P100.3.2]

# 345 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks and Trays](#)
- [4.0 Sack and Tray Labels](#)
- [5.0 Preparation for Presorted Flats](#)
- [6.0 Preparation for Enhanced Carrier Route Flats](#)
- [7.0 Preparation for Automation Rate Flats](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Under standards for bundle reallocation for Standard Mail flats on pallets (see [705.8.0](#)), mail will not necessarily be placed on the lowest (finest) level pallets (bundle reallocation is optional, but, if performed, must be done for the complete mailing job). Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

Mailings are defined as:

- a. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Except as provided in [343.3.4, Residual Volume Requirement](#), the types of Standard Mail listed below may not be part of the same mailing.
  1. Automation Enhanced Carrier Route and any other type of mail.
  2. Automation rate and any other type of mail.
  3. Enhanced Carrier Route and any other type of mail.
  4. Enhanced Carrier Route letter rate pieces and Enhanced Carrier Route nonletter rate pieces.
  5. Presorted rate mail and any other type of mail.
  6. Machinable and nonmachinable pieces.

7. Except as provided by standard, Regular mail may not be in the same mailing as Nonprofit mail, and Enhanced Carrier Route mail may not be in the same mailing as Nonprofit Enhanced Carrier Route mail.
8. Customized MarketMail and any other type of mail. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (bundles and sacks) for AFSM 100-compatible flats*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in [L007](#).
- d. *5-digit scheme carrier routes (pallets and sacks) for Standard Mail flats*: the ZIP Code in the delivery address on all pieces in carrier route bundles is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- e. *Merged 5-digit sacks*: the carrier route bundles and/or automation rate 5-digit bundles and/or Presorted rate 5-digit bundles in a sack are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route rate bundles with automation rate 5-digit bundles and Presorted rate 5-digit bundles in the same 5-digit container.
- f. *Merged 5-digit pallet*: contains carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or presorted rate 5-digit bundles).
- g. *Merged 5-digit scheme sack*: the 5-digit ZIP Codes on pieces in carrier route bundles and/or automation rate 5-digit bundles and/or Presorted rate 5-digit bundles in a sack are all for 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#), and the automation rate 5-digit bundles and/or the Presorted rate 5-digit bundles also are for 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles with automation rate 5-digit bundles and Presorted rate 5-digit bundles in the same 5-digit container.
- h. *Merged 5-digit scheme pallet*: contains carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or presorted rate 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#).
- i. *5-digit metro pallets for Standard Mail flats*: the 5-digit ZIP Codes on pieces in carrier route, automation rate, and presorted rate bundles are all destined for the same mail processing facility listed in [L006](#).
- j. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).

- k. *3-digit scheme bundles, for AFSM 100-compatible flats*: the ZIP Code in the delivery address begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L008](#).
- l. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- m. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- n. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- o. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- p. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- q. *Mixed ADC*: the pieces are for delivery in the service area of more than one ADC.
- r. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [[M011.1.2](#)]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full* letter tray is one in which faced, upright pieces fill the length of the tray between 75% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the rate claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the rate claimed.

### 345.1.4

- e. A *full sack* is defined in the standards for the class and rate claimed.
- f. A *5-digit scheme sort for AFSM 100-compatible flats* yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#). Presorting must be performed using [L007](#). Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in [301.3.3](#). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is optional, except under [705.12.0, Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold](#), and [705.13.0, Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold](#). Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#). Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code.
- g. A *5-digit scheme carrier routes sort for Enhanced Carrier Route rate Standard Mail flats prepared in sacks or as bundles on pallets* yields a 5-digit scheme carrier routes sack or pallet for those 5-digit ZIP Codes listed in [L001](#) and 5-digit carrier routes sacks or pallets for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum sack or pallet volume, with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme carrier routes destination that contain carrier route bundles for only one of the schemed 5-digit areas are still considered to be sorted to 5-digit scheme carrier routes and are labeled accordingly. The 5-digit scheme carrier routes sort is required for carrier route bundles of Enhanced Carrier Route Standard Mail flats. Preparation of 5-digit scheme carrier routes sacks or pallets must be done for all 5-digit scheme destinations.
- h. A *5-digit scheme sort for Standard Mail flats prepared as bundles on pallets* yields 5-digit scheme pallets containing automation rate and Presorted rate 5-digit bundles for those 5-digit ZIP Codes listed in [L001](#) and yields 5-digit pallets containing automation rate and Presorted rate 5-digit bundles for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum pallet volume, with no further separation by 5-digit ZIP Code required. Pallets prepared for a 5-digit scheme destination that contain 5-digit bundles for only one of the schemed 5-digit areas are still considered to be sorted to the 5-digit scheme and are labeled accordingly. The 5-digit scheme sort is required for Standard Mail flats. The 5-digit scheme sort may not be used for other mail prepared on pallets, except for 5-digit bundles of Standard Mail irregular parcels that are part of a mailing job that is prepared in part as palletized flats at automation rates. Preparation of 5-digit scheme pallets must be done for all 5-digit scheme destinations.
- i. A *merged 5-digit sort for Standard Mail flats prepared in sacks* yields merged 5-digit sacks that contain carrier route bundles and/or automation rate 5-digit bundles, and/or Presorted rate 5-digit bundles that are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles, automation rate

5-digit bundles, and Presorted rate 5-digit bundles in the same 5-digit sack or pallet. The merged 5-digit sort is optional for Standard Mail flats prepared in sacks. Sacks prepared for a merged 5-digit destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only Presorted rate 5-digit bundle(s)) or that contain only two rate levels of bundle(s) are still considered to be merged 5-digit sorted and are labeled accordingly. If preparation of merged 5-digit sacks is performed, it must be done for all 5-digit ZIP Code destinations with an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles in the same 5-digit container.

- j. *A merged 5-digit sort for Standard Mail flats prepared as bundles on pallets yields merged 5-digit pallets that contain carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or Presorted rate 5-digit bundles). The merged 5-digit sort is optional for Standard Mail flats prepared in sacks under [705.10.0](#). Sacks or pallets prepared for a merged 5-digit destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only Presorted rate 5-digit bundle(s)) or only two rate levels of bundle(s) are still considered to be merged 5-digit sorted and must be labeled accordingly.*
- k. *A merged 5-digit scheme sort for Standard Mail flats prepared in sacks under [705.10.0](#) yields merged 5-digit scheme sacks that contain carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or Presorted rate 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#). Sacks prepared for a merged 5-digit scheme destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only presorted rate 5-digit bundle(s)), or only two rate levels of bundle(s), or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme sacks is performed, it must be done for all 5-digit scheme destinations in [L001](#).*
- l. *A merged 5-digit scheme sort for Standard Mail flats prepared as bundles on pallets under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#) yields merged 5-digit scheme pallets that contain carrier route bundles and noncarrier route 5-digit bundles (automation rate and/or Presorted rate 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#). Pallets prepared for a merged 5-digit scheme destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only Presorted rate 5-digit bundle(s)), or only two rate levels of bundle(s), or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme pallets is performed, it must be done for all 5-digit scheme destinations in [L001](#).*
- m. *A 5-digit metro sort for Standard Mail flats prepared as bundles on pallets yields 5-digit metro pallets that contain carrier route and/or noncarrier route 5-digit and 3-digit bundles (automation rate and/or presorted bundles) for the 5-digit*

ZIP Codes listed in [L006](#). The ZIP Codes in [L006](#) are treated as a single presort destination, with no further separation by 5-digit ZIP Code required. The 5-digit metro sort is optional and need not be done for all possible destinations in [L006](#).

- n. A 3-digit scheme sort for AFSM 100-compatible flats yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Presorting may be performed using [L008](#) starting January 6, 2005. The 3-digit scheme sort is optional, except under [705.12.0](#) and [705.13.0](#). For [705.12.0](#) and [705.13.0](#), presorting must be performed using [L008](#) by April 18, 2005. Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in [301.3.3](#). The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#). Three-digit scheme bundles are placed in 3-digit through Mixed ADC containers, as applicable, using the OEL “label to” 3-digit ZIP Code. Periodicals firm bundles must not be physically combined within 3-digit scheme bundles, but can contribute toward the six-piece minimum for rate eligibility.
- o. An *origin 3-digit* (or *origin 3-digit scheme*) sack contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate sack must be prepared for each.
- p. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- q. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- r. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry

determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.

- s. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [2.0, Bundles](#).
- t. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Standard Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.
- u. *Cobundling* is an alternate preparation method available under [705.11.0](#) for Standard Mail that allows the combining of flat-size automation rate and Presorted rate pieces within the same bundle under the single minimum bundle size requirement. Regardless of the class of mail, pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).

[M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

Except as noted in [2.3](#), all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece.

[M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [705.8.5.11, Bundles on Pallets](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

## 2.5 Preparing Bundles in Sacks

Standard Mail prepared in sacks must be secured in bundles as follows:

- a. The maximum weight for all bundles is 20 pounds.
- b. Bundles up to 1 inch in height (thickness) must be secured with appropriate banding, placed at least once around the girth (narrow dimension), or with shrinkwrap. Bundles over 1 inch in height must be secured with at least two bands (plastic bands, rubber bands, or twine/string), one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or two bands.
- c. Bundles should be measured at the lowest (thinnest) point to determine the bundle height.
- d. A bundle that exceeds the maximum prescribed height by less than the thickness of a single piece meets the standard (e.g., if a glossy piece is 0.625 (5/8) of an inch thick, five pieces may be secured in a bundle 3.125 inches high; if a piece with uncoated cover stock is 0.75 (3/4) of an inch thick, 11 pieces may be secured in a bundle 8.25 inches high).
- e. Bundles of pieces with covers of coated stock that are not individually enclosed in a mailing wrapper (e.g., magazines or catalogs with glossy covers not individually enclosed in an envelope, uncoated paper wrapper, or plastic wrapper (polybag)) are subject to these conditions:
  1. Except as noted in [2.5e2](#), bundles must not exceed 3 inches in height (thickness).
  2. Bundles of such pieces secured with shrinkwrap plus one or two plastic straps, or with at least two plastic straps, one around the length and one around the girth, must not exceed 6 inches in height (thickness).
- f. Bundles containing pieces with outer surfaces of uncoated stock are subject to these conditions:
  1. “Uncoated stock” also refers to pieces with coated covers that are individually enclosed in a cover or mailing wrapper of uncoated stock such as an envelope, sleeve, protective cover, partial wrapper, or polybag and pieces with outer surfaces composed of material other than paper (e.g., plastic, cloth, fiberboard, or metal).
  2. Bundles must not exceed 8 inches in height (thickness); however, it is recommended that such bundles not exceed 6 inches in height (thickness). [M020.1.8]

## 2.6 Exception to Bundle Preparation—Full Single-Sort-Level Trays

In bundle-based mailings, mail need not be prepared in 5-digit bundles if placed in a full 5-digit tray. Similarly, mail need not be prepared in other levels of bundles when it will be placed in a full tray to the corresponding tray level, and none of the mail in that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if, when correctly sorted, it would have all been prepared in ADC bundles to the same destination; conversely, this exception would not apply if some pieces would require preparation in 5-digit or 3-digit bundles.

[M020.1.9]

### 2.7 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, and specific weight and height limits in [2.5](#) if placed in sacks. [M020.2.3]

### 2.8 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

### 2.9 Labeling Bundles

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

### 2.10 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece of bundles under [708.7.0](#). [M013.1.1]

### 2.11 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [2.0](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Enhanced Carrier Route Standard mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

**2.12 Facing Slips—All Carrier Route Mail**

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “STD FLTS CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

**3.0 Sacks and Trays****3.1 Standard Containers**

Mailings must be prepared in sacks except when permitted to be prepared in letter trays, as shown in [Exhibit 3.1](#) and under other applicable standards in this section. Containers for Customized MarketMail are specified in [705.1.0](#). The following additional standards apply:

- a. Palletized mail is also subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2]

**Exhibit 3.1 Standard Containers**

| PROCESSING CATEGORY                     | USPS CONTAINER            |
|---|---------------------------|
| <b>Standard Mail</b>                    |                           |
| Flat-size under <a href="#">345.3.2</a> | Sack (white)              |
| Flat-size under <a href="#">345.3.4</a> | Letter tray (with sleeve) |

[Exhibit M033.1.2]

**3.2 Sack Preparation**

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

**3.3 Tray Sizes**

These approximate measurements define the letter tray sizes that apply to all Standard Mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high. [M033.1.3]

### 3.4 Preparation for Flats in Letter Trays

Standard Mail flat-size pieces may be prepared in letter trays instead of sacks only if the following standards are met:

- a. At least 90% of the mailing job must be claimed at automation rates or Enhanced Carrier Route rates. No more than 10% of the mailing job may be claimed at Presorted rates. The following minimum volumes for Standard Mail must be met:
  1. For the portion claimed at automation nonletter rates, a separate 200-piece minimum must be met. For any portion of the job claimed at Presorted rates, no separate minimum is required.
  2. For any portion claimed at Enhanced Carrier Route nonletter rates, a separate 200-piece minimum must be met.
- b. Automation rate pieces must meet the applicable flat-size dimensions in [301.3.0](#). Presorted and Enhanced Carrier Route pieces must meet the flat-size dimensions in [301.1.0](#).
- c. The pieces must fit completely within the dimensions for height and the bottom (floor) dimensions for length and width specified in [3.3, Tray Sizes](#), for a managed mail (MM) letter tray or an extended managed mail (EMM) letter tray. If a single row of pieces is placed in a tray, all pieces must be upright, faced toward the end of the tray (the short dimension), and perpendicular to the length of the tray. If two rows of pieces are placed in a tray, the rows must be parallel to each other and to the length of the tray and all pieces must be upright, faced toward the end of the tray, and perpendicular to the length of the tray. Other applicable standards in [245.3.3, Letter Tray Preparation](#), must also be met.
- d. Trays must bear tray-size labels that meet all applicable physical and barcode standards under [4.9](#), with Line 1 and Line 2 information as required for flat-size mail in sacks. Each label must contain a barcode as specified in [708.6.2.4](#) and the content identifier number required in [Exhibit 708.6.1](#) for the same type of flat-size mail prepared in sacks.
- e. All mail prepared under [5.0, Preparation for Presorted Flats](#), [6.0, Preparation for Enhanced Carrier Route Flats](#), or [7.0, Preparation for Automation Rate Flats](#), must be bundled except for full 5-digit trays and full carrier route trays. The exception to bundling in [2.6, Exception to Bundle Preparation—Full Single-Sort-Level Trays](#), may be used for other sort levels. All mail prepared under [705.9.0, Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats](#), must be bundled.
- f. All mail in the mailing job must be trayed. Sacking is not permitted except when the required minimum pallet load in [705.8.5.3](#) cannot be met.
- g. All trays must be palletized under [705.8.10.2](#), except for mail prepared in trays for Priority Mail or Express Mail drop shipment or for mail prepared and claimed at Enhanced Carrier Route destination delivery unit rates. Trays of letter-size pieces must not be placed onto pallets with trays of flat-size pieces. Pallet labels must identify the mail as flat-size pieces.

- h. All other applicable standards in [5.0, Preparation for Presorted Flats](#), [6.0, Preparation for Enhanced Carrier Route Flats](#), [7.0, Preparation for Automation Rate Flats](#), or [705.9.0](#) must be met, including required preparation sequence and use of sack minimums as tray minimums. [M033.2.2]

### 3.5 Tray Sleevling and Strapping

Each letter tray must be sleeved using USPS-provided sleeves. Except under [3.6](#), each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve. [M033.1.5]

### 3.6 Strapping Exception

Strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any mixed ADC letter tray or for any letter tray that originates and destines in the same SCF (mail processing plant) service area. [M033.1.6]

### 3.7 Origin/Entry 3-Digit Sacks

After all finer sort levels are prepared, an origin/entry 3-digit sacks must be prepared to contain any remaining mail for each 3-digit area serviced by the SCF serving the post office where the mail is verified (origin), and may be prepared for each 3-digit area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the post office where the mail is verified—e.g., a PVDS deposit site). In all cases, only one less-than-full sack may be prepared for each 3-digit area. [M033.1.7]

## 4.0 Sack and Tray Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks; only tray labels may be used for trays. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Container labels for automation rate mailings are subject to [4.9, Barcoded Sack and Tray Labels](#) and [708.6.0](#). [M031.1.1]

### 4.2 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes

within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.3 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack and tray labels.

| CONTENT TYPE             | CODE   |
|--------------------------|--|
| Barcoded                 | BC   |
| Barcoded and Nonbarcoded | BC/NBC   |
| Carrier Route            | C (type of route)  |
| Carrier Routes           | CR-RT or CR-RTS  |
| Digit                    | D  |
| Flats                    | FLTS   |
| General Delivery Unit    | G  |
| Highway Contract Route   | H  |
| Mixed                    | MXD  |
| Nonbarcoded              | NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0) |
| Post Office Box Section  | B  |
| Rural Route              | R  |
| Scheme                   | SCH  |
| Standard Mail            | STD  |
| Working                  | WKG  |

[M031.5.0]

### 4.4 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry post office.

[M031.1.4]

### 4.5 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

#### 4.6 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

[M031.1.5]

#### 4.7 Sack Label

##### 4.7.1 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- d. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum.

[M031.2.1]

##### 4.7.2 Additional Standards for Automation-Compatible Flats

For sack labels used on mailings of automation-compatible flats only.

- a. The human-readable content of sack labels must be machine-printed at five lines per inch. If the information cannot be shortened by postal abbreviations, it may be printed at a pitch of up to 15 characters per inch, if at least 22 human-readable characters fit on the label without interfering with the “quiet zone.”
- b. The minimum acceptable height for the destinating ZIP Code is 0.111 inch (8-point type).
- c. The minimum acceptable character height for all other information on Lines 1, 2, and 3 is 0.083 inch (6-point type). [M031.2.2]

#### 4.8 Tray Labels

##### 4.8.1 Physical Characteristics of a Tray Label

A tray label must meet these specifications:

- a. Color: white or manila.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).

### 345.4.8.2

- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum. [M031.3.2]

#### 4.8.2 Placement of a Tray Label

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down. [M031.3.1]

### 4.9 Barcoded Sack and Tray Labels

#### 4.9.1 Basic Standards for Barcoded Sack and Tray Labels

[Exhibit 4.9.1](#) shows the types of mail requiring barcoded tray or sack labels. Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

#### Exhibit 4.9.1 Required Barcoded Container Labels

| RATE OR TYPE   | PROCESSING CATEGORY |
|--|---------------------|
| <b>Standard Mail</b>   |                     |
| Automation rate  | Flat-size           |
| Cobundled and cosacked under <a href="#">705.9.0</a> through <a href="#">705.13.0</a>                                | Flat-size           |
| Automation, Presorted, and Enhanced Carrier Route in letter trays under <a href="#">345.3.0</a>                      | Flat-size           |
| Automation and Presorted in letter trays cotrayed under <a href="#">705.9.0</a> using <a href="#">345.3.0</a> option | Flat-size           |

[Exhibit M032.1.1]

#### 4.9.2 Additional Physical Standards for Barcoded Sack Labels

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i.](#), *Barcode*.
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

### 4.9.3 Additional Physical Standards for Barcoded Tray Labels

A barcoded tray label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#), *Barcode*.
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum. [M032.2.1]

## 5.0 Preparation for Presorted Flats

### 5.1 Basic Standards

All mailings and all pieces in each mailing at Regular Standard Mail and Nonprofit Standard Mail nonautomation rates are subject to specific preparation standards in [5.2](#) through [5.9](#) and to these general standards (automation rate mailings must be prepared under [7.0](#)):

- a. All pieces must meet the standards for basic eligibility in [2.0](#) through [4.0](#) in *Mail Preparation* and specific eligibility in [5.0](#), *Preparation for Presorted Flats*. Nonprofit Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces must meet the applicable general preparation standards in [1.0](#) through [4.0](#) in *Mail Preparation* and the following:
  1. Subject to the marking standards in [302.2.0](#) and [302.3.0](#), regular Standard Mail pieces must be marked "Presorted Standard" (or "PRSRT STD") and Nonprofit Standard Mail pieces must be marked "Nonprofit Organization" (or "Nonprofit Org." or "Nonprofit"). Regular and Nonprofit Standard Mail pieces must not be marked "ECRL0T," "ECRWSH," "ECRWSS," "AUTO," "AUTOOCR," or "Single-Piece" (or "SNGLP").
  2. Unless excepted by standard, all pieces must be in the flat-size processing category and must be prepared in sacks or on pallets. Certain flat-size pieces may be prepared in letter trays under [3.0](#), *Sacks and Trays*.
- c. All pieces in the mailing must meet the specific sortation and preparation standards in [5.0](#) or the palletization standards in [705.8.0](#). Flat-size pieces may be prepared under [705.9.0](#) through [705.13.0](#) in *Advanced Preparation and Special Postage Payment Systems*.
- d. Sortation determines rate eligibility as specified in [343.5.0](#). [M610.1.1]

### 5.2 Required Bundling

Except as provided in 5.4, *Loose Packing*, bundling is required before sacking. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches the required minimum bundle size in 5.3, *Bundling and Labeling*. Smaller volumes are not permitted except for mixed ADC bundles.

[M610.4.1]

### 5.3 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (required):
  1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; red Label 5 or optional endorsement line (OEL).
  2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; red Label 5 or OEL.
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M610.4.2]

### 5.4 Loose Packing

District managers may authorize loose packing of unbundled pieces to fill Number 3 sacks if no pieces in a sack would be more finely sorted if bundled. Pieces must be faced and packed to remain oriented in transit. The total weight of sacks containing such pieces may not exceed 70 pounds. Requests for loose packing must be made in advance through the post office of mailing. [M610.4.3]

### 5.5 Required Sacking or Traying

Except as provided in 5.6, a sack, or a letter tray under 3.0, must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, mailers must apply these methods:
  1. Pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum.
  2. Pieces weighing more than 1.92 ounces must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must apply either one of these methods:
  1. The minimum that applies to the average piece weight for the entire mailing is used. The net weight of the mailing is divided by the number of pieces, and the resulting average single-piece weight is used to determine whether the 125-piece or 15-pound minimum applies.
  2. The actual piece count or mail weight for each sack is used, if documentation can be provided with the mailing that shows for each sack the number of pieces and the total weight.

- c. The accompanying postage statement must indicate whether the 125-piece minimum, the 15-pound minimum, or both minimums are applied. [M610.4.4]

### 5.6 Drop Shipment

A mailer using Priority Mail or Express Mail to drop ship Standard Mail flat-size pieces may prepare sacks containing fewer than 125 pieces or less than 15 pounds of mail. [M610.4.5]

### 5.7 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit (required); 125-piece or 15-pound minimum; labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see 4.2 for overseas military mail).
  - 2. Line 2: "STD FLTS 5D NON BC."
- b. 3-digit (required); 125-piece or 15-pound minimum; labeling:
  - 1. Line 1: L002, Column A.
  - 2. Line 2: "STD FLTS 3D NON BC."
- c. Origin 3-digit(s) (required) and entry 3-digit(s) (optional); one-bundle minimum (for origin or entry); labeling:
  - 1. Line 1: L002, Column A.
  - 2. Line 2: "STD FLTS 3D NON BC."
- d. ADC (required); 125-piece or 15-pound minimum; labeling:
  - 1. Line 1: L004, Column B.
  - 2. Line 2: "STD FLTS ADC NON BC."
- e. Mixed ADC (required); no minimum; labeling:
  - 1. [3-17-05] [02-03-05] Line 1: Use L009, effective May 15, 2005. Until then, use "MXD" followed by city, state, and ZIP Code of ADC serving the 3-digit ZIP Code prefix of the entry post office as shown in L004, Column B, or use L009, Column B.
  - 2. Line 2: "STD FLTS NON BC WKG." [M610.4.6]

### 5.8 Cotraying and Cobundling Flats With Automation Rate Mail

The following standards apply:

- a. If the mailing job contains a carrier route mailing, an automation rate mailing, and a Presorted rate mailing, then it must be prepared under one of the following options: 1) the carrier route mailing must be prepared under 6.0 and the automation rate and Presorted rate mailings must be prepared under 705.9.0, *Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats*; or 2) all three mailings in the mailing job must be prepared under 705.10.0, *Preparation for Merged Containerization of Bundles of Flats Using City State Product*.
- b. If the mailing job contains an automation rate mailing and a Presorted rate mailing, then it must be prepared under the cosacking standards in 705.9.0.

345.5.9

- c. If the mailing job contains a carrier route mailing and a Presorted rate mailing, then it must be separately sacked under [5.0](#) and [6.0](#) or prepared using the merged sacking option in [705.10.0](#).
- d. If the mailing job contains a carrier route mailing and an automation rate mailing, then it must be separately sacked under [6.0](#) and [7.0](#) or prepared using the merged sacking option in [705.10.0](#).
- e. Presorted rate pieces may be cobundled with automation rate pieces under the standards in [705.11.0](#). [M610.1.2]

### 5.9 **Merged Containerization of Carrier Route, Automation, and Presorted Flats**

Under the optional preparation in [705.10.0](#), Presorted rate 5-digit bundles prepared under [5.2](#) through [5.8](#) are cosacked with carrier route rate bundles prepared under [6.0](#) and with automation rate 5-digit bundles prepared under [7.0](#) in merged 5-digit scheme sacks and merged 5-digit sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), Presorted rate 5-digit bundles are copalletized with carrier route rate bundles prepared under [6.0](#) and with automation rate 5-digit bundles prepared under [7.0](#) on merged 5-digit scheme pallets and merged 5-digit pallets. See [5.8a](#) for information on when preparation under [705.10.0](#) may be required. [M610.1.7]

## 6.0 Preparation for Enhanced Carrier Route Flats

### 6.1 **Basic Standards**

All mailings and all pieces in each mailing at Enhanced Carrier Route Standard Mail and Nonprofit Enhanced Carrier Route Standard Mail nonautomation rates are subject to specific preparation standards in [6.2](#) through [6.7](#) and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [343.2.0](#) through [343.4.0](#) and specific eligibility in [343.6.0](#). Nonprofit Enhanced Carrier Route Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces must be in the flat-size processing category.
- c. All pieces must meet the applicable general preparation standards in [2.0](#) through [4.0](#) and [302](#), and the following:
  - 1. Subject to the marking standards in [302](#)., Enhanced Carrier Route Standard Mail pieces must be marked “Presorted Standard” (or “PRSRT STD”), and Nonprofit Enhanced Carrier Route Standard Mail pieces must be marked “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”). All pieces must also be marked “ECRLOT” for basic rate, “ECRWSH” for high density rate, or “ECRWSS” for saturation rate.
  - 2. Unless excepted by standard, flat-size pieces must be prepared in sacks or on pallets. Certain flat-size pieces may be prepared in letter trays under [3.0](#).
  - 3. Pieces must be sequenced according to [6.9](#).

4. Pieces with a simplified address format must meet the standards in [602.3.0, Use of Alternative Addressing](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [6.0](#) or the palletization standards in [705.8.0](#). Flat-size pieces may be prepared under [705.9.0](#) through [705.13.0 in Advanced Preparation and Special Postage Payment Systems](#).
- e. Sortation determines rate eligibility as specified in [343.5.0](#). [M620.1.1]

## 6.2 Residual Pieces

Pieces not sorted as a carrier route mailing must be prepared as a separate mailing at Standard Mail automation or Presorted rates or at single-piece First-Class Mail or Priority Mail rates. [M620.1.5]

## 6.3 General Carrier Route Bundle Preparation

Only carrier route bundles are prepared. Bundles are not required in full carrier route trays. [M620.2.1]

## 6.4 Bundle Preparation

Bundle size: carrier route; required (10-piece minimum). Carrier route bundle labels are based on the sack or tray level in which placed:

- a. No label is required if the bundle is placed in a correctly labeled carrier route tray or sack.
- b. Bundles in 5-digit carrier routes trays and sacks must have a facing slip unless the pieces in the bundle show a carrier route information line or an optional endorsement line. [M620.2.2]

## 6.5 Bundles With Fewer Than the Minimum Number of Pieces Required

As a general exception to [6.2](#) through [6.7](#), a bundle with fewer than 10 pieces and either a less-than-full tray or a sack with fewer than 125 pieces *and* less than 15 pounds of pieces may be prepared to a carrier route when the saturation rate is claimed for the contents and the applicable density standard is met. [M620.1.3]

## 6.6 Required Sack Minimums

A sack must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, a single-piece weight of 1.92 ounces (0.12 pound) results in 125 pieces weighing 15 pounds. Identical-weight pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum; those that weigh more must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 125-piece or 15-pound minimum applies) or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.

345.6.7

- c. Mailers must note on the accompanying postage statement whether they applied the 125-piece (“PCS”) or 15-pound (“WT”) threshold or the method in [6.6b, Required Sack Minimums](#) (“BOTH”).
- d. Sacks with fewer than 125 pieces or less than 15 pounds of pieces may be prepared to a carrier route when the saturation rate is claimed for the contents and the applicable density standard is met. [M620.4.1]

### 6.7 Sack Preparation

Preparation sequence, sack size, and labeling:

- a. Carrier route: required (minimum of 125 pieces/15 pounds).
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.2](#) for overseas military mail).
  - 2. Line 2: “STD FLTS ECRWSS” or “STD FLTS ECRWSH” or “STD FLTS ECRLOT” as applicable, followed by the route type and number.
- b. 5-digit scheme carrier routes: required (no minimum).
  - 1. Line 1: use [L001](#), column B.
  - 2. Line 2: “STD FLTS CR-RTS SCH.”
- c. 5-digit carrier routes: required (no minimum).
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.2](#) for overseas military mail).
  - 2. Line 2: “STD FLTS CR-RTS.” [M620.4.2]

### 6.8 Merged Containerization of Carrier Route, Automation, and Presorted Rate Flats

Under the optional preparation in [705.10.0](#), carrier route rate bundles are cosacked with Presorted rate 5-digit bundles prepared under [5.0](#) and with automation rate 5-digit bundles prepared under [7.0](#) in merged 5-digit scheme sacks and merged 5-digit sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), carrier route rate bundles prepared under [6.3](#) and [6.4](#) are copalletized with Presorted rate 5-digit bundles prepared under [5.0](#) and with automation rate 5-digit bundles prepared under [7.0](#) on merged 5-digit scheme pallets and merged 5-digit pallets. Presorted rate pieces may be cobundled with automation rate pieces under [705.11.0](#). [M620.1.4]

### 6.9 Delivery Sequence Standards

#### 6.9.1 Basic Standards

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under [6.0](#) and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards. [M050.1.1]

#### 6.9.2 Missing Addresses

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.  
[M050.1.2]

### 6.9.3 Updating Walk Sequence Information—General

Walk-sequence rate pieces prepared with other than a simplified address format under 6.9.4 must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File, Second Generation (DSF<sup>2</sup>).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer. [M050.2.2]

### 6.9.4 Updating Walk Sequence Information for Simplified Addressing

Walk-sequence rate pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

[M050.2.1]

### 6.9.5 Out-of-Date Walk Sequence Information

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence rates. [M050.2.3]

### 6.9.6 Updating Line-of-Travel Sequence Information

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic rates. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing. [M050.2.4]

## 6.10 Delivery Sequence Documentation

### 6.10.1 Basic Standards

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer

must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF<sup>2</sup> invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer's bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software. [M050.3.1]

#### **6.10.2 High Density**

For each carrier route to which high density rate mail is addressed, the mailer must document the total number of addressed pieces to the route. If there are fewer than 125 addressed pieces for a given route, the documentation also must show the number of possible deliveries on the route. [M050.3.2]

#### **6.10.3 Saturation Density—Simplified Address Mail**

For each carrier route to which mail with a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.3]

#### **6.10.4 Saturation Density—Other Mail**

For each carrier route to which mail without a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.4]

#### **6.10.5 Both Rates**

If a mailing contains pieces qualifying for both walk-sequence rates, the documentation required by [6.10.2, High Density](#), and either [6.10.3, Saturation Density—Simplified Address Mail](#), or [6.10.4, Saturation Density—Other Mail](#), may be combined. Entries for pieces at the high density rate must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing. [M050.3.5]

### 6.10.6 Carrier Route Rate

If a mailing includes high density and saturation rate and basic carrier route rate pieces, in addition to the applicable information required by 6.10.2 through 6.10.5 in *Delivery Sequence Documentation*, the documentation for the basic carrier route rate mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each rate for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route rate must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route rate.

[M050.3.6]

## 7.0 Preparation for Automation Rate Flats

### 7.1 Basic Standards

Flat-size automation rate Standard Mail must be prepared under 7.0 and the eligibility standards for the rate claimed. Trays and sacks must bear the appropriate barcoded container labels under 4.9. [M820.1.1]

### 7.2 Mailings

All pieces in a mailing must meet the standards in 301.3.0, *Physical Standards for Automation Flats*, and be sorted together to the finest extent required. Standard Mail mailings may include pieces prepared at automation 3/5 and basic rates. The definitions of a mailing and permissible combinations are in 1.2. [M820.1.2]

### 7.3 Marking

All Standard Mail automation rate pieces must be marked under 302. Pieces claimed at an automation rate must bear the appropriate class marking and, except as provided in 302.2.0, "AUTO." Pieces not claimed at an automation rate must not bear "AUTO" unless single-piece rate postage is affixed or the corrective single-piece rate marking "Single-Piece" or "SNGLP" is applied. [M820.1.4]

### 7.4 General Preparation

All pieces must be prepared in bundles and meet the following requirements:

- a. Pieces that meet both the size dimensions and the turning ability and deflection standards under 301.3.3, *Criteria for AFSM 100 Flats*, must be prepared in separate bundles from pieces that do not meet all AFSM 100 dimensions and the turning ability and deflection standards (but that do meet the dimensions and other criteria for UFSM 1000 processing under 301.3.4).
- b. Each AFSM 100 bundle and each UFSM 1000 bundle must separately meet the bundle size minimum number of pieces in 7.5.1. When the total number of AFSM 100 or UFSM 1000 pieces for a specific presort destination (e.g., the 5-digit ZIP Code 12345) meets or exceeds the applicable minimum bundle size, the pieces for that presort destination must be prepared into a bundle or bundles labeled to that presort destination under the standards for the rate claimed.

345.7.5

- c. The physical size of each bundle for each specific presort destination may contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Rate eligibility is not affected when a physical bundle contains fewer pieces than the minimum bundle size for the above reasons, provided the total number of AFSM 100 pieces physically bundled for that presort destination or the total number of UFSM 1000 pieces physically bundled for that presort destination meets or exceeds the rate eligibility bundle minimum under [343.7.0](#). [M820.1.5]

## 7.5 Standard Mail Bundle Preparation

### 7.5.1 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional):
  1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; optional endorsement line (OEL) required.
  2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; OEL required.
- b. 5-digit (required):
  1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less and measuring 3/4 inch thick or less: 15-piece minimum; red Label 5 or OEL.
  2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound) or measuring more than 3/4 inch thick: 10-piece minimum; red Label 5 or OEL.
- c. 3-digit scheme (optional); 10-piece minimum; OEL required.
- d. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- e. ADC (required); 10-piece minimum; pink Label A or OEL.
- f. Mixed ADC (required); no minimum; tan Label X or OEL. [M820.5.1]

### 7.5.2 AFSM 100 and UFSM 1000 Bundling

Mailers may combine AFSM 100 bundles and UFSM 1000 bundles in the same sack. [M820.1.7]

### 7.5.3 Required Sacking

A sack, or a letter tray under [3.0](#), must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, a single-piece weight of 1.92 ounces (0.12 pound) results in 125 pieces weighing 15 pounds. Identical-weight pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum; those that weigh more must be prepared using the 15-pound minimum.

- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 125-piece or 15-pound minimum applies) or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the 125-piece (“PCS”) or 15-pound (“WT”) threshold or the method in [7.5.3b](#) (“BOTH”). [M820.5.2]

#### 7.5.4 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit scheme (required containing 5-digit scheme bundles only); 125-piece/15-pound minimum, labeling:
  1. Line 1: [L007](#), Column B.
  2. Line 2: “STD FLTS 5D SCH BC.”
- b. 5-digit (required); 125-piece/15-pound minimum; labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.2](#) for overseas military mail).
  2. Line 2: “STD FLTS 5D BC.”
- c. 3-digit (required); 125-piece/15-pound minimum; labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: “STD FLTS 3D BC.”
- d. Origin 3-digit(s) (required) and entry 3-digit(s) (optional); one-bundle minimum (for origin and entry); labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: “STD FLTS 3D BC.”
- e. ADC (required); 125-piece/15-pound minimum; labeling:
  1. Line 1: [L004](#), Column B.
  2. Line 2: “STD FLTS ADC BC.”
- f. Mixed ADC (required); no minimum; labeling:
  1. [\[03-17-05\]](#) [\[02-03-05\]](#) Line 1: Use [L009](#), Column B, effective May 15, 2005. Until then, use either [L009](#), Column B, or [L011](#), Column B or [L010](#), Column B, as applicable.
  2. Line 2: “STD FLTS BC WKG.” [M820.5.3]

#### 7.6 Scheme Bundle Preparation

Pieces meeting the AFSSM 100 compatibility criteria in [301.3.3](#) may be prepared in 5-digit scheme bundles for those 5-digit ZIP Code combinations identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Code combinations identified in [L008](#). These bundles must meet the additional standards in [1.4f](#). [M820.1.6]

### 7.7 Cotraying, Cosacking, and Cobundling With Presorted Rate Mail

The following standards apply to Standard Mail (except as provided in [7.9](#), *Exception—Automation and Nonautomation Pieces on Pallets*):

- a. If the mailing job contains a carrier route mailing, an automation rate mailing, and a Presorted rate mailing, then it must be prepared under one of the following options: 1) the carrier route mailing must be prepared under [6.0](#), *Preparation for Enhanced Carrier Route Flats*, and the automation rate and Presorted rate mailings must be prepared under [705.9.0](#); or 2) all three mailings in the mailing job must be prepared under [705.10.0](#), *Preparation for Merged Containerization of Bundles of Flats Using City State Product*.
- b. If the mailing job contains only an automation rate mailing and a Presorted rate mailing and both mailings are reported on the same postage statement, then the mailing job must be prepared under the cosacking standards in [705.9.0](#), *Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats*. Automation rate pieces may be cobundled with Presorted rate pieces under the standards in [705.11.0](#), *Preparation of Cobundled Automation Rate and Presorted Rate Flats*.
- c. If the mailing job contains only a carrier route mailing and an automation rate mailing, then it must be separately sacked under [6.0](#), *Preparation for Enhanced Carrier Route Flats*, and [7.0](#), *Preparation for Automation Rate Flats*, or prepared using the merged sack option under [705.10.0](#), *Preparation for Merged Containerization of Bundles of Flats Using City State Product*.

[M820.1.10]

### 7.8 Merged Containerization With Presorted and Carrier Route Flats

When the conditions and preparation standards in [705.10.0](#), [705.12.0](#), or [705.13.0](#) are met, 5-digit bundles of Presorted, automation, and carrier route rate mail that are part of the same mailing job may be combined on merged 5-digit scheme sacks or pallets and merged 5-digit sacks or pallets. Bundles that are cosacked or copalletized must be part of the same mailing job and mail class. Automation rate pieces may be cobundled with Presorted rate pieces under [705.11.0](#). [M820.1.11]

### 7.9 Exception—Automation and Nonautomation Pieces on Pallets

When the physical dimensions of mailpieces in a Standard Mail mailing meet the definition of both a letter-size piece under [201.1.1.1](#) and an automation flat-size piece under [301.3.0](#), the entire job may be prepared, merged, and palletized under [705.9.0](#) through [705.11.0](#), [705.12.0](#), and [705.13.0](#) if the applicable standards are met. The nonautomation portion is all paid at nonautomation nonletter rates for Standard Mail. Mailing jobs prepared entirely in sacks and claiming this exception must be cobundled under [705.11.0](#). As an alternative to [705.9.0](#) through [705.11.0](#), [705.12.0](#), and [705.13.0](#), if a portion of the job is prepared as palletized automation flats, the nonautomation portion may be prepared as palletized flats at Presorted nonletter rates and at Enhanced Carrier Route nonletter rates. The nonautomation rate pieces that cannot be placed on BMC or finer level pallets may be prepared as flats in sacks and paid at the appropriate nonautomation nonletter rates. As provided in [343.5.0](#), the following minimum volumes for Standard Mail must be met for this alternative to [705.9.0](#) through [705.11.0](#), [705.12.0](#), and [705.13.0](#):

- a. For the portion claimed at automation nonletter rates, a separate 200-piece minimum must be met. For any portion of the job claimed at Presorted rates, no separate minimum is required.
- b. For any portion claimed at Enhanced Carrier Route nonletter rates, a separate 200-piece minimum must be met. [M820.1.8]

# 346 Enter and Deposit

## Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

## 1.0 Presenting a Mailing

### 1.1 Basic Standards for Standard Mail Deposit

Standard Mail must be presented at the post office where the permit or license is held and the presort mailing fee is paid. Mailings must be presented at the locations and times specified by the postmaster. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#).

Plant-loaded mailings must be presented, verified, accepted, and entered as specified by the plant load agreement and applicable standards. Metered Standard Mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). Nonprofit Standard Mail must be presented only at post offices where the organization producing the mailing has an approved nonprofit authorization ([703.1.0](#)). [D600.2.1]

### 1.2 Separation of Mailing

Pieces at different rates (e.g., 3/5 and basic) may be combined in the same mailing as provided in [345.1.0](#). Separate mailings may be reported on the same postage statement if the pieces in the mailings are in the same flat-size processing category, are part of the same mailing job, and are presented for verification at the same time. [D600.2.2]

## 2.0 Destination Entry

### 2.1 General

Except for Customized MarketMail pieces as defined in [705.1.0](#), Regular, Nonprofit, Enhanced Carrier Route, and Nonprofit Enhanced Carrier Route Standard Mail pieces meeting the basic standards in [343.2.0](#) through [343.4.0](#) may qualify for the destination BMC, SCF, or DDU entry rates, as applicable, if deposited at the correct destination postal facility, subject to the general standards below and the specific standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#). Only one destination reduction may be claimed for each piece. An individual pallet may contain mail claimed at different destination entry rates. [E650.1.1]

### 2.2 Minimum Volume

A destination entry rate Standard Mail mailing is subject to these minimum volume requirements:

### 346.2.3

- a. Each mailing must contain at least 200 addressed pieces or 50 pounds of addressed pieces.
- b. Except as provided in [2.2e](#), each group of pieces prepared for deposit at different destination entry post offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3602 postage statement.
- c. Separate Standard Mail mailings may be copalletized under [705.8.0](#).
- d. Pieces deposited at the same destination entry post office but claimed at different destination entry rates may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry post office is the proper facility for claiming each of the destination entry discounts.
- e. When pieces from different Standard Mail mailings (Presorted, automation, and/or Enhanced Carrier Route) are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3602 and accompanied by Form 3602-C (or a postage statement register) to meet the 200-piece or 50-pound minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 200 pieces or 50 pounds at a single destination entry post office if there is a total of at least 200 pieces or 50 pounds of Presorted rate mail, 200 pieces or 50 pounds of automation rate mail, and/or 200 pieces or 50 pounds of Enhanced Carrier Route mail for all entry points combined for the single presort file listed on Form 3602 and Form 3602-C (or a postage statement register). [E650.1.3]

#### **2.3 Postage Payment**

Postage payment for destination entry mailings is subject to the same standards that apply generally to Standard Mail. Postage and fees are paid to the post office that verifies the mailings. The correct mailing fee(s) must be paid for the current 12-month period at the postal facility where postage is paid for the mailing. [E650.1.4]

#### **2.4 Office of Mailing**

Unless the mailing is paid and deposited as a metered mail drop shipment (see [705.17.0](#)) or a plant-verified drop shipment (see [705.15.0](#)), mail paid with meter postage, precanceled stamps, or permit imprint must be deposited at the post office that issued the corresponding license or permit, or at the destination bulk mail center serving that post office. Under the latter alternative, only the DBMC rate is available. [E650.1.5]

#### **2.5 Documentation**

No documentation for destination entry discounts is required, although the mailing must be accompanied by the appropriate postage statement. Documentation may be required by other rates or discounts claimed for the same mailing. [E650.1.6]

**2.6 Plant Loads**

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry discounts. [E650.1.7]

**2.7 Verification****2.7.1 Place**

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification either:

- a. At the origin mailer's plant or the origin post office serving the mailer's plant under an authorized plant-verified drop shipment system.
- b. At the destination post office or business mail entry unit. [E650.2.1]

**2.7.2 Mail Separation and Presentation**

Destination entry rate mail must be verified under a PVDS system (705.15.0) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination sectional center facility, or other designated destination postal facility. Only plant-verified drop shipments may be deposited at a destination delivery unit not co-located with a post office or other postal facility having a business mail entry unit. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each mailing must be separated from other mailings for verification. For PVDS, destination entry rate mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as Standard Mail, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- d. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings. [E650.2.2]

**2.7.3 Form 8125**

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying post office. [E650.2.3]

**2.7.4 At BMC**

For a mailing to be verified at a BMC, the post office where the mailer's account or license is held must be within the service area of that BMC. The post office must authorize the BMC to act as its agent by sending Form 4410 to the BMC. [E650.2.4]

**2.7.5 PVDS Seal**

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility. [E650.2.5]

346.2.7.6

### 2.7.6 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility (BMC, SCF, or delivery unit), appropriate to the mailing and the rate claimed. [E650.2.6]

### 2.7.7 Volume Standards

Except as permitted for a local mailer under 2.8.13, destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination rate is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, *mailer* is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).
- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination rate mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments. [E650.2.7]

## 2.8 Deposit

### 2.8.1 Time and Location of Deposit

Each mailing claimed at a destination rate must be deposited at the time and location specified by the USPS. [E650.3.1]

### 2.8.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility. [E650.3.2]

### 2.8.3 Appointments

Appointments must be made for destination entry rate mail as follows:

- a. Except for a local mailer under 2.8.13 and mailings of perishable commodities, appointments for deposit of destination entry rate mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.

- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with Standard Mail or Package Services as a mixed load (707.28.0, [Destination Entry Rate Eligibility](#)), an appointment must be obtained for deposit at a destination entry facility.  
[E650.3.3]

#### 2.8.4 Advance Scheduling

Except under 2.8.13, a mailer must schedule deposit of destination rate mailings at least 24 hours in advance by contacting the proper district or BMC control center or destination delivery unit. Appointments at delivery units must be made by calling the delivery unit at least 24 hours in advance. Appointments for ASFs, SCFs, or for any multistop loads must be made through the USPS district control center. Appointments for BMC loads must be scheduled by the proper BMC control center. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type. [E650.3.4]

#### 2.8.5 Adherence to Schedule

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units. [E650.3.5]

#### 2.8.6 Redirection by USPS

A mailer may be directed to transport destination entry rate mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints. [E650.3.6]

#### 2.8.7 Redirection at Mailer's Request

For service reasons, a mailer may ask to transport destination SCF rate mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF rate in this

situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF.

[E650.3.7]

#### **2.8.8 Recurring Appointments**

*Recurring* refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule. [E650.3.8]

#### **2.8.9 Vehicle Unloading**

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs, ASFs, and SCFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At delivery units, the driver must unload all mail within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver is required to unload, unstack, and unstrap them. If a mailer transports palletized mail to a DDU facility that cannot handle pallets, then the driver must unload the pallets into a container specified by the delivery unit.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area. [E650.3.9]

**2.8.10 Drop and Pick**

Drop and pick service is not available for destination entry Standard Mail.

[E650.3.10]

**2.8.11 Demurrage**

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry rate mailings. [E650.3.11]

**2.8.12 Appeals**

Mailers who believe they are denied equitable treatment may appeal to the manager, customer service (district), responsible for the destination postal facility. [E650.3.12]

**2.8.13 Exception for Local Mailer**

The restrictions in [2.7.7, Volume Standards](#), and [2.8.4, Advance Scheduling](#), do not apply when a mailer deposits mailings for verification and acceptance at the local post office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry rates for mailings or portions of mailings deposited at the local post office that meet the standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#). [E650.4.0]

## 3.0 Destination Bulk Mail Center (DBMC) Entry

### 3.1 Definition

For this standard, *destination bulk mail center (DBMC)* includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) as shown in [Exhibit 3.1](#). [E650.5.1]

### Exhibit 3.1 BMC/ASF—DMBC Rate Eligibility

| ELIGIBLE DESTINATION ZIP CODES  | ENTRY FACILITY                    |
|---|-----------------------------------|
| 005, 068-079, 085-098, 100-119, 124-127   | BMC New Jersey NJ 00102           |
| 010-067, 120-123, 128,129   | BMC Springfield MA 05500          |
| 130-136, 140-149  | ASF Buffalo NY 140                |
| 150-168, 260-266, 439-447   | BMC Pittsburgh PA 15195           |
| 080-084, 137-139, 169-199   | BMC Philadelphia PA 19205         |
| 200-212, 214-239, 244, 254, 267, 268  | BMC Washington DC 20499           |
| 240-243, 245-249, 270-297, 376  | BMC Greensboro NC 27075           |
| 298, 300-312, 317-319, 350-352, 354-368, 373, 374, 377-379, 398, 399              | BMC Atlanta GA 31195              |
| 299, 313-316, 320-342, 344, 346, 347, 349.  | BMC Jacksonville FL 32099         |
| 369-372, 375, 380-397, 700, 701, 703-705, 707, 708, 713, 714, 716, 717, 719-729   | BMC Memphis TN 38999              |

| 565, 567, 580-588   | ASF Fargo ND 580                  |
| 590-599, 821  | ASF Billings MT 590               |
| 463, 464, 530-532, 534, 535, 537-539, 600-611, 613                                | BMC Chicago IL 60808              |
| 420, 423, 424, 475-479, 614-620, 622-631, 633-639                                 | BMC St. Louis MO 63299            |
| 640, 641, 644-658, 660-662, 664-679, 739  | BMC Kansas City KS 64399          |
| 730, 731, 734-738, 740, 741, 743-746, 748, 749                                    | ASF Oklahoma City OK 730          |
| 706, 710-712, 718, 733, 747, 750-799, 885   | BMC Dallas TX 75199               |
| 690-693, 800-816, 820, 822-831, 856-857   | BMC Denver CO 80088               |
| 832-834, 836, 837, 840-847, 898, 979  | ASF Salt Lake City UT 840         |
| 850, 852, 853, 855, 859, 860, 863, 864  | ASF Phoenix AZ 852                |
| 865, 870-875, 877-884   | ASF Albuquerque NM 870            |
| 889-891, 893, 900-908, 910-928, 930-935   | BMC Los Angeles CA 90901          |
| 894, 895, 897, 936-966  | BMC San Francisco CA 94850        |
| 835, 838, 970-978, 980-986, 988-994   | BMC Seattle WA 98000              |

[Exhibit E751.1.3]

### 3.2 Eligibility

Pieces in a mailing that meet the standards in 2.0 and 3.0 are eligible for the DBMC rate when they meet all of the following conditions: 1) are deposited at a BMC or ASF; 2) are addressed for delivery to one of the 3-digit ZIP Codes served by the

BMC or ASF where deposited that are listed in [Exhibit 3.1](#); and 3) are placed in a tray, sack, or pallet (subject to the standards for the rate claimed) that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within the service area of that BMC or ASF (see [Exhibit 3.1](#)). If bundles of flats on pallets are reallocated from an ASF pallet to a BMC pallet under [705.8.13](#), mail for the ASF ZIP Codes placed on the BMC pallet is not eligible for the DBMC rates. DBMC rate mail also must be eligible for Presorted, automation, or Enhanced Carrier Route rates, subject to the corresponding standards for those rates. [E650.5.2]

### 3.3 Eligibility for ADC Mailpieces

All pieces in an ADC sack or tray are eligible for the DBMC discount if the ADC facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the sack or tray is deposited as shown in [Exhibit 3.1](#). All pieces in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility that is the destination of the bundle (determined by using the “Label To” ZIP Code in Column B of [L004](#)) is within the service area of the BMC or ASF at which it is deposited as shown in [Exhibit 3.1](#). [E650.5.3]

### 3.4 Eligibility for Mixed ADC Bundles, Sacks or Trays

Mailpieces either in a mixed ADC bundle, sack, or tray can qualify for the DBMC rates if the following standards are met:

- a. All pieces in the bundle, sack, or tray must destinate within the ASF or BMC service area shown in [Exhibit 3.1](#).
- b. ~~[03-17-05]~~ ~~[02-03-05]~~ Use labeling list [L009](#) when labeling bundles, sacks, or trays containing such pieces, effective May 15, 2005. Until then, use either [L010](#) or [L009](#) for labeling.
- c. Pieces claiming DBMC rates and any mixed ADC pieces not claiming DBMC rates must be prepared in separate mixed ADC bundles, sacks, or trays.
- d. Otherwise applicable restrictions (e.g., minimum volume, number of less-than-full trays) are excepted when necessary to meet the standards in [3.4](#). [E650.5.4]

### 3.5 Vehicles

Mailings deposited at a DBMC must be presented in vehicles compatible with BMC dock and yard operations. [E650.5.6]

### 3.6 Form 4410

Mailings may be deposited at the DBMC only if that facility is authorized (by Form 4410) to act as acceptance agent for the entry post office (i.e., where the meter license, precanceled stamp permit, or permit imprint authorization is held). Form 4410 is not required for plant-verified drop shipments. [E650.5.7]

## 4.0 Destination Sectional Center Facility (DSCF) Entry

### 4.1 Definition

For this standard, *destination sectional center facility (DSCF)* refers to the facilities listed in [L002](#), Column C, and [L006](#), Column C. [E650.6.1]

346.4.2

### 4.2 Eligibility

Pieces meeting the standards in [2.0, Destination Entry](#), and [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), are eligible for DSCF rates when deposited at an SCF (or USPS-designated facility); are addressed for delivery within that facility's service area, including when 3-digit scheme combination in [L008](#); and are placed in or on other than an ADC or mixed ADC sack, or BMC sack or pallet (as permitted by the standards for the rate claimed). Pieces prepared in 5-digit bundles and placed in or on a merged 5-digit scheme, merged 5-digit, or 5-digit scheme sack or pallet, that is deposited at the destination delivery unit as defined in [5.1](#) are eligible for the DSCF rate. [E650.6.2]

### 4.3 Vehicles

Mailings deposited at a DSCF must be presented in vehicles that are compatible with SCF dock and yard operations. [E650.6.3]

## 5.0 Destination Delivery Unit (DDU) Entry

### 5.1 Definition

For this standard, *destination delivery unit (DDU)* refers to the facility designated by the USPS district drop shipment coordinator (for automation rate Standard Mail) or the facility (post office, branch, station, etc.) where the carrier cases mail for delivery to the addresses on pieces in the mailing (for other Standard Mail). [E650.7.1]

### 5.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [5.0](#) are eligible for the DDU rate when deposited at a DDU, addressed for delivery within that facility's service area (carrier routes), and placed in properly prepared and labeled carrier route bundles sorted to carrier route sacks, 5-digit carrier routes sacks, 5-digit scheme carrier routes sacks under [345](#) or [705.10.0](#), merged 5-digit sacks, merged 5-digit scheme sacks under [705.10.0](#), or palletized under [705.8.0](#) or [705.10.0](#), [705.12.0](#), or [705.13.0](#) and otherwise eligible for and claimed at a carrier route rate. Pieces for which the DDU discount is claimed must also be eligible for and claimed at either the carrier route or a walk-sequence rate. No other rates or discounts are available. A mailing that contains copies claimed at the DDU rates may include pieces claimed at other destination entry discounts and pieces for which no destination discount is claimed, subject to the standard for separation in [2.7.2](#). [E650.7.2]

## **360 Discount Flats Bound Printed Matter**

363 Rates and Eligibility

364 Postage Payment and Documentation

365 Mail Preparation

366 Enter and Deposit

## 363 Rates and Eligibility

### Overview

- 1.0 Rates and Fees for Bound Printed Matter
- 2.0 Content Standards for Bound Printed Matter Flats
- 3.0 Basic Standards for Bound Printed Matter Flats
- 4.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Flats
- 5.0 Additional Eligibility Standards for Barcoded Bound Printed Matter Flats

### 1.0 Rates and Fees for Bound Printed Matter

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Bound Printed Matter Rate Application

The presorted Bound Printed Matter rate has a per piece charge and a per pound charge. The minimum postage rate for an addressed piece is one unit of the per piece charge plus the per pound charge for an addressed piece weighing 1 pound. Postage is based on the rate that applies to the weight (postage) increment of each addressed piece and, on the zone to which the piece is addressed. [P013.5.6]

#### 1.3 Bound Printed Matter Rates

##### 1.3.1 Bound Printed Matter Presorted and Carrier Route Rates

Each piece is subject to both a piece rate and a pound rate. For the barcoded discount on Presorted flats, deduct \$0.03 per piece (automatable flats only). The barcoded discount is not available for flats mailed at carrier route rates. [R700.2.3]

##### 1.3.2 Bound Printed Matter Destination Entry Rates

Each piece is subject to both a piece rate and a pound rate. For the barcoded discount on Presorted flats, deduct \$0.03 per piece (automatable flats only). The barcoded discount is not available for flats mailed at Presorted DDU rates or carrier route rates. Presorted DDU rates are not available for flats that weigh 1 pound or less. [R700.2.5]

### Exhibit 1.3 Bound Printed Matter Presorted, Carrier Route, and Destination Entry Rates

| Each piece is subject to both a per piece rate and a pound rate. <sup>1</sup> |                          | Presorted <sup>2</sup> |   |                | Carrier Route  |   |                |
|---|--------------------------|------------------------|---|----------------|----------------|---|----------------|
|   |                          | Rate per piece         | + | Rate per pound | Rate per piece | + | Rate per pound |
| Zone  | Local, 1&2               | \$1.078                | + | \$0.090        | \$0.978        | + | \$0.090        |
|   | 3                        | 1.078                  | + | 0.112          | 0.978          | + | 0.112          |
|   | 4                        | 1.078                  | + | 0.149          | 0.978          | + | 0.149          |
|   | 5                        | 1.078                  | + | 0.198          | 0.978          | + | 0.198          |
|   | 6                        | 1.078                  | + | 0.248          | 0.978          | + | 0.248          |
|   | 7                        | 1.078                  | + | 0.308          | 0.978          | + | 0.308          |
|   | 8                        | 1.078                  | + | 0.419          | 0.978          | + | 0.419          |
|   | <b>Destination Entry</b> |                        |   |                |                |   |                |
| DBMC  | 1&2                      | 0.818                  | + | 0.073          | 0.718          | + | 0.073          |
|   | 3                        | 0.818                  | + | 0.102          | 0.718          | + | 0.102          |
|   | 4                        | 0.818                  | + | 0.139          | 0.718          | + | 0.139          |
|   | 5                        | 0.818                  | + | 0.187          | 0.718          | + | 0.187          |
| DSCF  |                          | 0.603                  | + | 0.060          | 0.503          | + | 0.060          |
| DDU   |                          | 0.532 <sup>3</sup>     | + | 0.030          | 0.432          | + | 0.030          |

1. Multiply the number of pounds in the mailing by rate per pound. Multiply the number of pieces in the mailing by rate per piece. Add both totals.

2. For barcoded discount, deduct \$0.03 per piece (automation compatible flats only).

3. Each flat must weigh more than 1 pound to be eligible for presorted DDU rate.

[R700.2.3 and R700.2.5]

#### 1.4 Destination Entry Mailing Fee

Destination entry mailing fees for Bound Printed Matter, per 12-month period: \$150.00. [R700.5.1]

#### 1.5 Computing Postage for Bound Printed Matter

##### 1.5.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

##### 1.5.2 Computing Postage for Affixed Postage

Presorted and Carrier Route Bound Printed Matter mailings with postage affixed are charged a per pound rate and a per piece rate as follows:

- a. For each addressed piece, calculate the per pound rate:
  1. If the piece weighs 1 pound or less, the per pound rate is the rate listed in 1.3.1 or 1.3.2 for the rate category and zone.
  2. If the piece weighs more than 1 pound, compute the per pound rate by multiplying the unrounded weight of the piece by the pound rate for the category and zone. Do not round this result.

- b. Postage per piece. Compute the postage for each piece by adding the calculated per pound rate to the per piece rate for the category and zone. Round this number up to the next tenth of a cent. Affix this amount of postage to the piece.
- c. Total Postage for Mailing. Add all of the affixed postage amounts for each piece in the mailing. [P013.9.4]

### 1.5.3 Computing Postage for Permit Imprint

Presorted and Carrier Route Bound Printed Matter mailings paid with permit imprint are charged a per pound rate and a per piece rate as follows:

- a. Per pound rate:
  1. *For pieces weighing 1 pound or less*, compute the per pound rate by multiplying the total number of addressed pieces by the 1-pound rate for the rate category and zone. Do not round this result.
  2. *For pieces weighing more than 1 pound*, compute the per pound rate by multiplying the unrounded total weight of the addressed pieces by the pound rate for the category and zone. Do not round this result.
- b. Per piece rate. Multiply the total number of addressed pieces by the applicable piece rate.
- c. Total Postage. Calculate total postage by adding the total per piece calculation to the total per pound calculation. Round off the total postage to the nearest whole cent. [P013.9.3]

## 2.0 Content Standards for Bound Printed Matter Flats

### 2.1 Basic Content Standards

Bound Printed Matter (BPM) is a subclass of Package Services and must:

- a. Meet the basic standards in [2.0](#).
- b. Weigh no more than 15 pounds. Pieces might be subject to other minimum weights or dimensions based on the standards for specific rates.
- c. Consist of advertising, promotional, directory, or editorial material (or any combination of such material).
- d. Be securely bound by permanent fastenings such as staples, spiral binding, glue, or stitching. Loose-leaf binders and similar fastenings are not considered permanent.
- e. Consist of sheets of which at least 90% are imprinted by any process other than handwriting or typewriting with words, letters, characters, figures, or images (or any combination of them).
- f. Not have the nature of personal correspondence.
- g. Not be stationery, such as pads of blank printed forms. [E712.1.1]

363.2.2

- h. Consist of mailable matter that is neither mailed or required to be mailed as First-Class Mail or Customized MarketMail under [705.1.0](#) nor entered as Periodicals (except as permitted under [2.2](#) or permitted or required under [707.7.9](#)). [E710.1.1]

### **2.2 Attachments or Enclosures of Periodicals Sample Copies**

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at BPM rates. Postage at BPM rates is based on the combined weight of the host piece and the sample copies enclosed.

### **2.3 Postal Inspection**

Bound Printed Matter is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Bound Printed Matter rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### **2.4 Attachments and Enclosures**

#### **2.4.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Bound Printed Matter piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **2.4.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Bound Printed Matter piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Bound Printed Matter rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

#### **2.4.3 Additional Enclosures**

Bound Printed Matter may have the following additions and enclosures:

- a. Any printed matter mailable as Standard Mail.
- b. Nonprint attachments and enclosures. The combined weight of all nonprint attachments and enclosures in the mailpiece must be less than or equal to 25% of the weight of the BPM in the mailpiece. The individual cost of each nonprint attachment or enclosure must be less than or equal to the cost of a "low cost" item as defined in [703.1.6.11](#), *Products Mailable at Nonprofit Standard Mail*

*Rates.* In addition, the combined cost of all nonprint attachments and enclosures must not exceed two times the cost of a “low cost” item as defined in [703.1.6.11](#). [E712.1.2]

## 2.5 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender’s and the addressee’s names, occupations, and addresses, preceded by “From” or “To,” and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

## 3.0 Basic Standards for Bound Printed Matter Flats

### 3.1 Rate Eligibility

BPM rates are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone (where applicable) to which the piece is addressed. Rate categories are as follows:

- a. Presorted Rate. The Presorted rate applies to BPM prepared in a mailing of at least 300 pieces, prepared and presorted as specified in [705.8.0, Preparation for Pallets](#), or [365.5.0, Preparation for Presorted Flats](#).
- b. Carrier Route Rate. The Carrier Route rate applies to BPM prepared in a mailing of at least 300 pieces presorted to carrier routes, prepared and presorted as specified in [705.8.0, Preparation for Pallets](#), or [365.6.0, Preparation for Carrier Route Flats](#).
- c. Barcoded Discount—Flats. The barcoded discount applies only to BPM flat-size pieces that bear a correct, readable ZIP+4 or delivery point barcode (DPBC) under [708.4.0](#) for the ZIP+4 Code or numeric DPBC of the delivery

address. The pieces must be part of a single-piece rate mailing of 50 or more flat-size pieces or part of a presort rate mailing of at least 300 BPM flat-size pieces prepared under [705.8.0, Preparation for Pallets](#), and [365.7.0, Preparation for Barcoded Flats](#). The barcoded discount is not available for flat-size pieces mailed at Presorted DDU rates or carrier route rates. To qualify for the barcoded discount, the flat-size piece must meet the flat sorting machine requirements under [301.3.3, Criteria for AFSM 100 Flats](#). [E712.2.0]

### 3.2 Nonidentical Weight Pieces

Mailings may contain nonidentical-weight pieces only if the correct postage is affixed to each piece or if Business Mailer Support (BMS) has authorized payment of postage by permit imprint under [705.2.0, Manifest Mailing System \(MMS\)](#), or [705.4.0, Alternate Mailing System \(AMS\)](#). [E712.1.3]

### 3.3 ZIP Code Accuracy

#### 3.3.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.3.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.3.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Bound Printed Matter Presorted and Carrier Route rates, regardless of any required surcharges, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

#### 3.3.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.

2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
3. Any mailing list service in [507.6.0](#).
4. An authorized service provider.
5. CASS-certified matching software.
6. USPS Web site [www.usps.com](http://www.usps.com). [[A030.2.4](#)]

### 3.3.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [[A030.2.5](#)]

## 3.4 Delivery and Return Addresses

All Bound Printed Matter mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Except for unendorsed Bound Printed Matter, each piece must bear the sender's return address. [[E710.3.1](#)]

## 4.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Flats

### 4.1 Additional Standards for Presorted Bound Printed Matter

In addition to the basic standards in [2.0](#), [Content Standards for Bound Printed Matter Flats](#), and [3.2](#), [Nonidentical Weight Pieces](#), all pieces in a Bound Printed Matter Presorted rate mailing must:

- a. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The ZIP Code accuracy standard in [3.3](#).
  2. If the barcoded discount for flat-size pieces is claimed (see [3.1](#)), the additional address matching and coding standards in [5.3](#), [Address Standards for Barcode Discount](#), and [708.3.0](#), [Coding Accuracy Support System \(CASS\)](#).
  3. If an alternative addressing format is used, the additional standards in [602.3.0](#).
  4. If pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- b. Meet the preparation standards under [705.8.0](#), [Preparation for Pallets](#), or [365.5.0](#), [Preparation for Presorted Flats](#), or, for flat-size mail claiming the barcoded discount, under [365.7.0](#), [Preparation for Barcoded Flats](#), or [705.8.0](#), [Preparation for Pallets](#). [[E712.3.1](#)]

363.4.2

### 4.2 Additional Standards for Carrier Route Bound Printed Matter

In addition to the basic standards in [2.0, Content Standards for Bound Printed Matter Flats](#), and [3.2, Nonidentical Weight Pieces](#), all pieces in a Bound Printed Matter carrier route rate mailing must:

- a. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The carrier route accuracy standard in [4.3](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
  3. If pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- b. Meet the preparation standards in [365.6.0, Preparation for Carrier Route Flats](#), or [705.8.0, Preparation for Pallets](#). [E712.3.2]

### 4.3 Carrier Route Accuracy

#### 4.3.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming carrier route rates that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [4.3.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Bound Printed Matter Carrier Route rates must meet the ZIP Code accuracy standards. [A030.3.3]

#### 4.3.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).

[A030.3.4]

### 4.3.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

## 5.0 Additional Eligibility Standards for Barcoded Bound Printed Matter Flats

### 5.1 Basic Eligibility Standards for Barcoded Bound Printed Matter

The barcoded discount applies only to BPM flat-size pieces that bear a correct, readable ZIP+4 or delivery point barcode (DPBC) under [708.4.0, \*Barcoding Standards for Letters and Flats\*](#), for the ZIP+4 code or numeric DPBC of the delivery address. The pieces must be part of a single-piece rate mailing of 50 or more flat-size pieces or part of a presort rate mailing of at least 300 BPM flat-size pieces prepared under [705.8.0, \*Preparation for Pallets\*](#), and [365.7.0, \*Preparation for Barcoded Flats\*](#). The barcoded discount is not available for flat-size pieces mailed at Presorted DDU rates or carrier route rates. To qualify for the barcoded discount, the flat-size piece must meet the flat sorting machine requirements under [301.3.3, \*Criteria for AFSM 100 Flats\*](#). [E712.2.0e]

### 5.2 Weight Standard

Maximum weight limit for barcoded Bound Printed Matter is 20 ounces. [C820.2.4]

### 5.3 Address Standards for Barcode Discount

#### 5.3.1 Basic Address Standards

To qualify for barcode discounts, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode as defined in [708.2.0](#) that appears on a mailpiece claimed at an automation rate must be the correct barcode for the corresponding delivery address on the piece. [A800.1.1]

#### 5.3.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits. [A800.1.2]

#### 5.3.3 Numeric DPBC

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.0](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A800.1.3]

#### 5.3.4 Address Elements

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product. [A800.2.2]

#### **5.3.5 Firm Name**

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used. [A800.2.1]

#### **5.3.6 Secondary Designator**

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used. [A800.2.3]

#### **5.3.7 Rural and Highway Contract Routes**

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line. [A800.2.4]

#### **5.3.8 Post Office Box**

A post office box address must contain a post office box number that can be exactly matched with the USPS ZIP+4 Product in effect. [A800.2.5]

## 364 Postage Payment and Documentation

### Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Bound Printed Matter may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone and same combination of rates (e.g., all are zone 4, Inter-BMC, with a BMC presort discount and a barcoded discount). Identical-weight permit imprint mail also may be mailed under [705.2.0, Manifest Mailing System \(MMS\)](#), [705.3.0, Optional Procedure \(OP\) Mailing System](#), or [705.4.0, Alternate Mailing System \(AMS\)](#). [P700.1.1]

### 2.0 Mailing Documentation

#### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

#### 2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

#### 2.3 Documentation for Mail Claiming the Barcode Discount

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified or MAC-certified software or standardized documentation. Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. Documentation of

postage is not required if the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. [M820.1.3]

#### **2.4 Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### **2.5 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### **2.6 Standard Format for Documentation**

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### **2.7 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#). [P012.1.5]

#### **2.8 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

#### **2.9 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that

appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

## 365 Mail Preparation

### Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation for Presorted Flats](#)
- [6.0 Preparation for Carrier Route Flats](#)
- [7.0 Preparation for Barcoded Flats](#)

### 1.0 General Information for Mail Preparation

#### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. [M011.1.1]

#### 1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Bound Printed Matter and any other type of mail may not be part of the same mailing even if in the same processing category. See [705.2.0, Manifest Mailing System \(MMS\)](#), and [705.11.0, Preparation of Cobundled Automation Rate and Presorted Rate Flats](#), for the advanced preparation options available for flat-size Bound Printed Matter. [M011.1.4]

#### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (bundles and sacks) for AFSM 100-compatible flats*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in [L007](#).

365.1.4

- d. *5-digit scheme carrier routes (sacks only) for Bound Printed Matter flats:* the ZIP Code in the delivery address on all pieces in carrier route bundles is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- e. *5-digit scheme (pallets) for Bound Printed Matter flats:* the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- f. *5-digit metro pallets for Bound Printed Matter flats:* the 5-digit ZIP Codes on pieces in carrier route, automation rate, and presorted rate bundles are all destined for the same mail processing facility listed in [L006](#).
- g. *3-digit:* the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- h. *3-digit scheme bundles, for AFSM 100-compatible flats:* the ZIP Code in the delivery address begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L008](#).
- i. *Origin/optional entry 3-digit(s):* the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- j. *SCF:* the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- k. *Origin/optional entry SCF:* the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- l. *ADC:* all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- m. *ASF/BMC:* all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- n. *Mixed [BMC, ADC, etc.]:* the pieces are for delivery in the service area of more than one BMC, ADC, etc. [[M011.1.2](#)]

### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full* sack is defined in the standards for the class and rate claimed.

- c. A 5-digit scheme sort for AFSM 100-compatible flats yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#). Presorting must be performed using [L007](#). Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in [301.3.3, Criteria for AFSM 100 Flats](#). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is optional, except under [705.12.0, Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold](#), and [705.13.0, Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold](#). Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#). Bundles are placed in appropriate containers using the OEL "label to" 5-digit ZIP Code. Periodicals firm bundles must not be part of a 5-digit scheme bundles.
- d. A 5-digit scheme carrier routes sort for Carrier Route Bound Printed Matter flats prepared in sacks or as bundles on pallets yields a 5-digit scheme carrier routes sack or pallet for those 5-digit ZIP Codes listed in [L001](#) and 5-digit carrier routes sacks or pallets for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum sack or pallet volume, with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme carrier routes destination that contain carrier route bundles for only one of the schemed 5-digit areas are still considered to be sorted to 5-digit scheme carrier routes and are labeled accordingly. The 5-digit scheme carrier routes sort is required for Carrier Route Bound Printed Matter flats. Preparation of 5-digit scheme carrier routes sacks or pallets must be done for all 5-digit scheme destinations.
- e. A 5-digit scheme sort for Presorted Bound Printed Matter flats prepared as bundles on pallets yields 5-digit scheme pallets containing Presorted rate 5-digit bundles for those 5-digit ZIP Codes listed in [L001](#) and yields 5-digit pallets containing Presorted rate 5-digit bundles for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum pallet volume, with no further separation by 5-digit ZIP Code required. Pallets prepared for a 5-digit scheme destination that contain 5-digit bundles for only one of the schemed 5-digit areas are still considered to be sorted to the 5-digit scheme and are labeled accordingly. The 5-digit scheme sort is required for Presorted Bound Printed Matter flats. The 5-digit scheme sort may not be used for other mail prepared on pallets. Preparation of 5-digit scheme pallets must be done for all 5-digit scheme destinations.
- f. A 5-digit metro sort for Bound Printed Matter flats prepared as bundles on pallets yields 5-digit metro pallets that contain carrier route and/or noncarrier route 5-digit and 3-digit bundles (automation rate and/or presorted bundles) for the 5-digit ZIP Codes listed in [L006](#). The ZIP Codes in [L006](#) are treated as a single presort destination, with no further separation by 5-digit ZIP Code required. The 5-digit metro sort is optional and need not be done for all possible destinations in [L006](#).

- g. A 3-digit scheme sort for AFSM 100-compatible flats yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in [L008](#). Presorting may be performed using [L008](#) starting January 6, 2005. The 3-digit scheme sort is optional, except under [705.12.0](#) and [705.13.0](#). For [705.12.0](#) and [705.13.0](#), presorting must be performed using [L008](#) by April 18, 2005. Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in [301.3.3](#). The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#). Three-digit scheme bundles are placed in 3-digit through Mixed ADC containers, as applicable, using the OEL “label to” 3-digit ZIP Code. Periodicals firm bundles must not be physically combined within 3-digit scheme bundles, but can contribute toward the six-piece minimum for rate eligibility.
- h. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- i. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- j. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- k. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [2.0](#).

- l. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Bound Printed Matter “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.
- m. *Cobundling* is available for combining within the same bundle flat-size Bound Printed Matter Presorted rate pieces qualifying for and claiming the barcoded discount and Presorted rate pieces not qualifying for the barcoded discount. Pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#). [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

Except as noted in [2.3, Preparing Bundles of Pieces of Nonuniform Thickness \(“Counterstacking”\)](#), all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.

365.2.4

- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [705.8.5.11, Bundles on Pallets](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.5 Preparing Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0](#).
- b. If placed in sacks, the specific weight limits in [5.0, Preparation for Presorted Flats](#), and [6.0, Preparation for Carrier Route Flats](#). [M020.2.2]

### 2.6 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Bound Printed Matter must meet the applicable minimum and maximum bundle size standards in [705.8.0, Preparation for Pallets](#), [5.0, Preparation for Presorted Flats](#), or [7.0, Preparation for Barcoded Flats](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless

otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Except for mixed ADC bundles and for carrier route bundles prepared in sacks, each physical bundle of Bound Printed Matter must contain at least two pieces. For carrier route rate Bound Printed Matter prepared in sacks, the last physical bundle to an individual carrier route may consist of a single addressed piece, provided that all other bundles to that carrier route destination contain at least two addressed pieces, and that the total group of pieces to that carrier route (the logical bundle) meets the carrier route rate eligibility minimum in [363](#). Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0, Preparation for Pallets](#), and each physical bundle, including carrier route rate mail, must always contain at least two pieces. [M020.1.6]

### **2.7 Pieces With Simplified Addresses**

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets and, for Bound Printed Matter in sacks, specific weight limits in [5.0, Preparation for Presorted Flats](#), and [6.0, Preparation for Carrier Route Flats](#). [M020.2.3]

### **2.8 Labeling Bundles**

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

### **2.9 Use of Optional Endorsement Lines (OEL)**

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under [708.7.0](#). [M013.1.1]

### **2.10 Use of Carrier Route Information Lines**

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [2.11](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Carrier Route Bound Printed Matter mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

365.2.11

### 2.11 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “BPM FLTS CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

## 3.0 Sacks

### 3.1 Maximum Weight

The maximum weight of any sack (mail plus sack tare) must not exceed 70 pounds. [M033.1.1]

## 4.0 Sack Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Sack labels for barcoded rate mailings are subject to [4.8](#) and [708.6.0](#). [M031.1.1]

### 4.2 Physical Standards of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- d. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes

within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

#### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE             | CODE   |
|--------------------------|--|
| Barcoded                 | BC   |
| Barcoded and Nonbarcoded | BC/NBC   |
| Carrier Route            | C (type of route)  |
| Carrier Routes           | CR-RT or CR-RTS  |
| Digit                    | D  |
| Flats                    | FLTS   |
| General Delivery Unit    | G  |
| Highway Contract Route   | H  |
| Mixed                    | MXD  |
| Nonbarcoded              | NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0) |
| Package Services         | PSVC   |
| Post Office Box Section  | B  |
| Rural Route              | R  |
| Scheme                   | SCH  |
| Working                  | WKG  |

[M031.5.0]

#### 4.5 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry post office.

[M031.1.4]

#### 4.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

365.4.7

### 4.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

[M031.1.5]

### 4.8 Barcoded Sack Labels

#### 4.8.1 Basic Standards for Barcoded Sack Labels

Barcoded tray labels must be used for barcoded flat-size mailings. Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

#### 4.8.2 Physical Standards for Barcoded Sack Labels

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#), [Barcode](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation for Presorted Flats

### 5.1 Basic Standards

All mailings of Presorted Bound Printed Matter (BPM) are subject to the standards in [5.2, Bundling](#), and [5.3, Sacking](#), and to these general standards:

- a. Each mailing must meet the applicable standards in [302.2.0, Placement and Content of Mail Markings](#), [363, Rates and Eligibility](#), [365, Mail Preparation](#), and [366, Enter and Deposit](#).
- b. All pieces must be sorted to the finest extent possible under [5.2, Bundling](#), and [5.3, Sacking](#), or palletized under [705.8.0](#).
- c. Subject to [302.2.2](#), pieces must be marked “Bound Printed Matter” (or “BPM”) and “Presorted” (or “PRSRT”). [M722.1.1]

### 5.2 Bundling

#### 5.2.1 Required Bundling

Bundling is required before sacking. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces or 10 pounds, whichever occurs first. Smaller volumes are not permitted except for mixed ADC bundles. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds each. Each physical bundle must contain at least two addressed pieces (except mixed ADC bundles). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies), or bundle by the actual piece count or mail weight for each bundle, if documentation can be provided with the mailing that shows the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count, weight, or both. [M722.2.1]

#### 5.2.2 Bundling and Labeling

Preparation sequence and labeling:

- a. 5-digit (required); red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); green Label 3 or OEL.
- c. ADC (required); pink Label A or OEL.
- d. Mixed ADC (required); tan Label X or OEL. [M722.2.2]

### 5.3 Sacking

#### 5.3.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 20 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except mixed ADC sacks). Optional SCF sacks may only be prepared when there are at least 20 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 20-piece minimum; those that weigh more than 1 pound must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 20-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M722.2.3]

#### 5.3.2 Separation by Zone

Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. *Exception:* Pieces for different zones may be sacked together and the sacks do not have to be separated by zone for verification if any of the following apply:

- a. Full (exact) postage is affixed to each piece in the mailing.
- b. The mailing is prepared under [705.2.0, Manifest Mailing System \(MMS\)](#), [705.4.0, Alternate Mailing System \(AMS\)](#), or [5.3.3, Commingling Zones](#). [M722.1.3]

#### 5.3.3 Commingling Zones

Zoned BPM need not be separated by zones when presented other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented:

- a. Under [705.2.0, Manifest Mailing System \(MMS\)](#), or [705.4.0, Alternate Mailing System \(AMS\)](#); or
- b. Under all these conditions:
  1. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).
  2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the post office where the mail is to be entered (entry post office), a

unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number, the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage. [M722.1.4]

#### 5.3.4 Cosacking Presorted Mail With Barcoded Mail

The following standards apply:

- a. If the mailing job contains a carrier route mailing, a Presorted rate mailing qualifying for and claiming the barcoded discount under [363](#), and a Presorted rate mailing (not claiming the barcoded discount), then the carrier route mailing must be prepared under [6.0](#), and the Presorted rate mailing qualifying for and claiming the barcoded discount and the Presorted rate mailing (not claiming the barcoded discount) must be cosacked under [705.9.0](#). As an option, the Presorted rate pieces qualifying for and claiming the barcoded discount may be cobundled with Presorted rate pieces (not claiming the barcoded discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).
- b. If the mailing job contains only a Presorted rate mailing qualifying for and claiming the barcoded discount and a Presorted rate mailing (not claiming the barcoded discount), both mailings must be cosacked under [705.9.0](#). As an option, the Presorted rate pieces qualifying for and claiming the barcoded discount may be cobundled with Presorted rate pieces (not claiming the barcoded discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#). [M722.1.5]

#### 5.3.5 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit (required); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.4](#) for overseas military mail).
  2. Line 2: "PSVC FLTS 5D NON BC."
- b. 3-digit (required); labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "PSVC FLTS 3D NON BC."
- c. SCF (optional); labeling:
  1. Line 1: [L005](#), Column B.
  2. Line 2: "PSVC FLTS SCF NON BC."

365.6.1

- d. ADC (required); labeling:
  - 1. Line 1: L004, Column B.
  - 2. Line 2: "PSVC FLTS ADC NON BC."
- e. Mixed ADC (required); labeling:
  - 1. [3-17-05] [02-03-05] Line 1: Use L009, effective May 15, 2005. Until then, use "MXD" followed by city, state, and ZIP Code of ADC serving the 3-digit ZIP Code prefix of the entry post office as shown in L004, Column B, or use L009.
  - 2. Line 2: "PSVC FLTS NON BC WKG." [M722.2.4]

## 6.0 Preparation for Carrier Route Flats

### 6.1 Basic Standards

All mailings of Carrier Route Bound Printed Matter (BPM) are subject to the standards in 6.2 and 6.3 and to these general standards:

- a. Each mailing must meet the applicable standards in 363, *Rates and Eligibility*, 365, *Mail Preparation*, 366, *Enter and Deposit*. The mailer is responsible for proper payment of postage. (Information regarding postage payment methods is specified by standards according to each shape and class of mail, e.g. 364 for Bound Printed Matter Flats.
- b. All pieces must be sorted to the finest extent possible under 6.2 and 6.3, *Sacking*, or palletized under 705.8.0.
- c. Subject to 302.2.2, pieces must be marked "Bound Printed Matter" (or "BPM") and "Carrier Route Presort" (or "CAR-RT SORT"). [M723.1.1]

### 6.2 Required Bundling

A carrier route bundle (or bundles) must be prepared when there are 10 or more addressed pieces or 10 or more pounds, whichever occurs first, for an individual carrier route. Smaller volumes are not permitted. The maximum weight of each physical bundle is 40 pounds. Each bundle must contain at least two addressed pieces except for the last bundle for each carrier route destination under 2.0. Bundles must be labeled with a facing slip unless the bundle is labeled using a carrier route information line (708.7.0) or an optional endorsement line (708.6.0). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies), or bundle by the actual piece count or mail weight for each bundle, if documentation can be provided with the mailing that shows the number of pieces and their total weight.

- c. Mailers must note on the accompanying postage statement whether they applied the piece count, weight, or both. [M723.2.1]

## 6.3 Sacking

### 6.3.1 Required Sacking

A direct carrier route sack must be prepared when the quantity of mail for an individual carrier route reaches a minimum of 20 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. Remaining bundles must be placed in a 5-digit scheme carrier routes sack and/or a 5-digit carrier routes sack, which have no minimum sack size. Carrier route sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 20-piece minimum; those that weigh more than 1 pound must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 20-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M723.2.2]

### 6.3.2 Separation by Zone

Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. *Exception:* Pieces for different zones may be sacked together and the sacks do not have to be separated for verification if any of the following apply:

- a. Full postage is affixed to each piece in the mailing.
- b. The mailing is prepared under [705.2.0, Manifest Mailing System \(MMS\)](#), [705.4.0, Alternate Mailing System \(AMS\)](#), or [6.3.3, Commingling Zones](#). [M723.1.3]

### 6.3.3 Commingling Zones

Zoned BPM need not be separated by zones when presented other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the manager, Business Mailer Support, USPS Headquarters. The mail must be prepared and documented under one of the following:

- a. Under [705.2.0, Manifest Mailing System \(MMS\)](#), or [705.4.0, Alternate Mailing System \(AMS\)](#).
- b. Under all these conditions:
  - 1. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).

365.6.3.4

2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the post office where the mail is to be entered (entry post office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage. [M723.1.4]

### 6.3.4 Residual Pieces

Residual pieces not sorted under 6.0 may be prepared as a Presorted Bound Printed Matter mailing under 5.0 provided that they are part of the same mailing job and reported on the same postage statement. Residual pieces paid at the Presorted rate do not need to meet a separate 300 piece minimum. These pieces must be separated from the Carrier Route portion when presented to the USPS for verification. Presorted flats weighing 1 pound or less are not eligible for DDU rates. [M723.1.5]

### 6.3.5 Sack Preparation

Preparation sequence and Line 1 sack labeling:

- a. Carrier route: required; for Line 1, use city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
- b. 5-digit scheme carrier routes: required (no minimum); for Line 1, use L001, Column B.
- c. 5-digit carrier routes: required (no minimum); for Line 1, use city, state, and 5-digit ZIP Code destination of bundles (see 4.3 for overseas military mail). [M723.2.3]

### 6.3.6 Sack Label Line 2

Line 2 information:

- a. Carrier route: "PSVC FLTS CR," followed by the route type and number.
- b. 5-digit scheme carrier routes: "PSVC FLTS CR-RTS SCH."
- c. 5-digit carrier routes: "PSVC FLTS CR-RTS." [M723.2.4]

### 6.3.7 Exception to Sacking

Sacking is not required for bundles that are prepared for and entered at DDU rates; such bundles may be bedloaded and may weigh up to 40 pounds each. [M723.2.5]

## 7.0 Preparation for Barcoded Flats

### 7.1 Basic Standards

Flat-size Bound Printed Matter pieces claiming the barcode discount must be prepared under 7.0 and the eligibility standards for the rate claimed. Bundle and sack preparation are subject to 365. Sacks must bear the appropriate barcoded container labels under 4.8. [M820.1.1]

### 7.2 Mailings

All pieces in a mailing must meet the standards in 7.0 and be sorted together to the finest extent required. Bound Printed Matter mailings may include presorted pieces claiming the barcode discount. [M820.1.2]

### 7.3 Bundling

#### 7.3.1 Bundle Standards

All pieces must be prepared in bundles and meet the following requirements:

- a. Meet both the size dimensions and the turning ability and deflection standards under 301.3.3, *Criteria for AFSM 100 Flats*.
- b. The physical size of each bundle for each specific presort destination may contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Rate eligibility is not affected when a physical bundle contains fewer pieces than the minimum bundle size for the above reasons. [M820.1.5]

#### 7.3.2 Bundle Preparation

Bundles must be prepared and labeled in the following sequence:

- a. 5-digit scheme: (optional); minimum 10 pieces or 10 pounds, maximum weight 20 pounds; optional endorsement line (OEL) required.
- b. 5-digit: (minimum 10 pieces or 10 pounds, maximum weight 20 pounds); red Label 5 or OEL.
- c. 3-digit scheme (optional); minimum 10 pieces or 10 pounds, maximum weight 20 pounds; OEL required.
- d. 3-digit: (minimum 10 pieces or 10 pounds, maximum weight 20 pounds); green Label 3 or OEL.
- e. ADC: (minimum 10 pieces or 10 pounds, maximum weight 20 pounds); pink Label A or OEL.
- f. Mixed ADC: (no minimum, maximum weight 20 pounds); tan Label X or OEL. [M820.6.1]

#### 7.3.3 Scheme Bundle Preparation

Pieces meeting the AFSM 100 compatibility criteria in 301.3.3 may be prepared in 5-digit scheme bundles for those 5-digit ZIP Code combinations identified in L007 and in 3-digit scheme bundles for those 3-digit ZIP Code combinations identified in L008. These bundles must meet the additional standards in 1.4d. [M820.1.6]

### 7.4 Sacking

#### 7.4.1 Sack Preparation and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit scheme (optional, containing 5-digit scheme bundles only); minimum 20 addressed pieces; labeling:
  1. Line 1: L007, Column B.
  2. Line 2: "PSVC FLTS 5D SCH BC."
- b. 5-digit (required); minimum 20 addressed pieces; labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see 4.4 for overseas military mail).
  2. Line 2: "PSVC FLTS 5D BC."
- c. 3-digit (required, except for optional bundles with 3-digit ZIP Code prefixes indicated by an "N" in L002, when optional SCF sacks are prepared); minimum 20 addressed pieces; labeling:
  1. Line 1: L002, Column A.
  2. Line 2: "PSVC FLTS 3D BC."
- d. SCF (optional); minimum 20 addressed pieces; labeling:
  1. Line 1: L005, Column B.
  2. Line 2: "PSVC FLTS SCF BC."
- e. ADC (required); minimum 20 addressed pieces; labeling:
  1. Line 1: L004, Column B.
  2. Line 2: "PSVC FLTS ADC BC."
- f. Mixed ADC (required); no minimum; labeling:
  1. [02-03-05] Line 1: L009, Column B, effective May 15, 2005. Until then, use either L009, Column B, or L011, Column B or L010, Column B, as applicable.
  2. Line 2: "PSVC FLTS BC WKG." [M820.6.2]

### 7.5 Mixed Rate Preparation

#### 7.5.1 Cobundling and Cosacking Mixed Rate Mail

The following standards apply to Bound Printed Matter:

- a. If the mailing job contains a carrier route mailing, a Presorted rate mailing qualifying for and claiming the barcoded discount under 363.5.1, and a Presorted rate mailing (not claiming the barcoded discount), then the carrier route mailing must be prepared under 6.0, and the Presorted rate mailing qualifying for and claiming the barcoded discount and the Presorted rate mailing (not claiming the barcoded discount) must be cosacked under 705.9.0. As an option, the Presorted rate pieces qualifying for and claiming the

barcoded discount may be cobundled with Presorted rate pieces (not claiming the barcoded discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).

- b. If the mailing job contains only a Presorted rate mailing qualifying for and claiming the barcoded discount and a Presorted rate mailing (not claiming the barcoded discount), both mailings must be cosacked under [705.9.0](#). As an option, the Presorted rate pieces qualifying for and claiming the barcoded discount may be cobundled with Presorted rate pieces (not claiming the barcoded discount) under [705.11.0](#). Cobundled pieces must be cosacked under [705.9.0](#).
- c. If the mailing job contains only a carrier route mailing and a Presorted rate mailing qualifying for and claiming the barcoded discount, each mailing must be prepared separately under the applicable standards in [6.0](#) and [7.0](#). [M820.1.10]

### 7.5.2 Merged Containerization

When the conditions and preparation standards in [705.10.0](#), [705.12.0](#), or [705.13.0](#) are met, 5-digit bundles of Presorted (barcoded and nonbarcoded pieces) and carrier route rate mail that are part of the same mailing job may be combined on merged 5-digit scheme sacks or pallets and merged 5-digit sacks or pallets. Bundles that are cosacked or copalletized must be part of the same mailing job and mail class. Barcoded discount rate pieces may be cobundled with presorted rate pieces under [705.11.0](#) [M820.1.11]

# 366 Enter and Deposit

## Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

## 1.0 Presenting a Mailing

### 1.1 Verification and Entry

All presorted, carrier route, destination entry, and barcoded discount mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#). Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). [D700.2.2]

### 1.2 Office of Mailing

Bound Printed Matter must be mailed at the post office from which the zone rate postage was computed, except under [1.3, Redirected Mailings](#), and [1.4, BMC Acceptance](#). [E710.2.1]

### 1.3 Redirected Mailings

A mailer who presents large mailings of zoned Package Services mail may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original post office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage. [E710.2.2]

### 1.4 BMC Acceptance

A mailer may present Bound Printed Matter at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent post office, or permit imprint postage is paid through an advance deposit account at the BMC parent post office or another post office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent post office.

366.1.5

- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry post office. [E710.2.3]

### 1.5 Drop Shipment Information

Essential information for entering drop shipment Bound Printed Matter mailings at specific postal facilities can be found in the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1, Postal Service](#)). There is a charge for the Drop Shipment Product. [D700.2.4]

## 2.0 Destination Entry

### 2.1 General

Destination entry rates apply to Presorted and carrier route Bound Printed Matter (BPM) that is deposited at a destination bulk mail center (DBMC), destination sectional center facility (DSCF), or destination delivery unit (DDU) as specified below. Eligibility for a destination entry rate is determined by the sort level, processing category of the mail, and the type of container the mail is in (i.e., sacked or palletized). Each piece can claim only one destination entry rate; an individual pallet may contain pieces claimed at different destination entry rates. [E752.1.1]

### 2.2 Minimum Volume

A destination entry rate BPM mailing is subject to these minimum volume requirements:

- a. Each mailing must contain at least 300 Presorted addressed pieces or 300 Carrier Route addressed pieces.
- b. Except as provided in [2.2e](#), each group of pieces prepared for deposit at different destination entry post offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3605 postage statement.
- c. Separate Presorted and Carrier Route mailings may be copalletized under [705.8.0](#).
- d. Pieces deposited at the same destination entry post office but claimed at different destination entry rates may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry post office is the proper facility for claiming each of the destination entry discounts.
- e. When Presorted or Carrier Route mailings are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3605 and accompanied by a postage statement register to meet the separate 300-piece minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 300 pieces for a Presorted or Carrier Route mailing entered at a single destination entry post office if there is a total of at least 300 Presorted rate

pieces and/or 300 Carrier Route pieces for all entry points combined for the single presort file listed on Form 3605 and the postage statement register.

[E752.1.2]

### **2.3 Postage Payment**

Postage payment for destination entry mailings is subject to the same standards that apply generally to BPM. Postage and fees are paid to the post office that verifies the mailings. [E752.1.3]

### **2.4 Mailing Fee**

A destination entry mailing fee (363.1.3.2) must be paid once each 12-month period at each postal facility where the mailing(s) are verified. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment.

[E752.1.4]

### **2.5 Documentation**

Each mailing must be accompanied by the appropriate Form 3605 and, if applicable, Form 8125. No additional documentation is required for destination entry rates. [E752.1.5]

### **2.6 Plant Loads**

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry discounts. [E752.1.6]

### **2.7 Bedloaded Mailings**

Bedloaded BPM bundles are permitted only when prepared for and entered at DDU rates. These bundles must be prepared under the applicable sortation standards for flat-size mail and are not eligible for the barcoded discount. [E752.1.7]

### **2.8 Verification**

#### **2.8.1 Place**

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification either:

- a. At the origin mailer's plant or the origin post office serving the mailer's plant under an authorized plant-verified drop shipment system.
- b. At the destination post office or business mail entry unit. [E752.5.1]

#### **2.8.2 Mail Separation and Presentation**

Destination entry rate mail must be verified under a PVDS system (705.15.0) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination SCF, or other designated destination postal facility. Only plant-verified drop shipments may be deposited at a destination delivery unit not co-located with a post office or other postal facility having a business mail entry unit. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each mailing must be separated from other mailings for verification. For PVDS, destination entry rate mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.

### 366.2.8.3

- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as BPM, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- d. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings. [E752.5.2]

#### **2.8.3 Form 8125**

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying post office. [E752.5.3]

#### **2.8.4 At BMC**

For a mailing to be verified at a BMC, the post office where the mailer's account or license is held must be within the service area of that BMC. The post office must authorize the BMC to act as its agent by sending Form 4410 to the BMC. [E752.5.4]

#### **2.8.5 PVDS Seal**

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility. [E752.5.5]

#### **2.8.6 Mailer Transport**

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility. [E752.5.6]

#### **2.8.7 Volume Standards**

Except as permitted for a local mailer under 2.9.12, destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination rate is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, mailer is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).
- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination rate mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments. [E752.5.7]

## **2.9 Deposit**

### **2.9.1 Time and Location of Deposit**

Each mailing claimed at a destination rate must be deposited at the time and location specified by the USPS. Mailings must be presented in vehicles that are compatible with dock, yard, and DDU operations, as applicable. [E752.6.1]

### **2.9.2 Freight**

Drop shipments are freight until deposited and accepted as mail at the destination facility. [E752.6.2]

### 2.9.3 Appointments

Appointments must be made for destination entry rate mail as follows:

- a. Except for a local mailer under [2.9.12](#) and mailings of perishable commodities, appointments for deposit of destination entry rate mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made through the Dropship Appointment System (DSAS) by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancelations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with BPM as a mixed load ([707.28.0](#)), an appointment must be obtained for deposit at a destination entry facility. [E752.6.3]

### 2.9.4 Advance Scheduling

Except under [2.9.12](#), a mailer must schedule deposit of destination entry rate mailings at least 24 hours in advance by contacting the proper district or BMC control center or destination delivery unit. Appointments at delivery units must be made by calling the delivery unit at least 24 hours in advance. Appointments for ASFs, SCFs, or for any multistop loads must be made through the USPS district control center or DSAS in [2.9.3](#). Appointments for BMC loads must be scheduled by the proper BMC control center. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.

366.2.9.5

- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type. [E752.6.4]

### **2.9.5 Adherence to Schedule**

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units. [E752.6.5]

### **2.9.6 Redirection by USPS**

A mailer may be directed to transport destination entry rate mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints. [E752.6.6]

### **2.9.7 Redirection at Mailer's Request**

For service reasons, a mailer may ask to transport destination SCF rate mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF rate in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF. [E752.6.7]

### **2.9.8 Recurring Appointments**

Recurring appointments refer to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule. [E752.6.8]

### 2.9.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs and ASFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At delivery units, the driver must unload all mail within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver is required to unload, unstack, and unstrap them. If a mailer transports palletized mail (including sacks on pallets) to a DDU facility that cannot handle pallets, then the driver must unload the pallets into a container specified by the delivery unit.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area. [E752.6.9]

### 2.9.10 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry rate mailings. [E752.6.10]

### 2.9.11 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, Customer Service (district), responsible for the destination postal facility. [E752.6.11]

### 2.9.12 Exception for Local Mailer

The restrictions in [2.8.7, Volume Standards](#), and [2.9.3, Appointments](#), do not apply when a mailer deposits mailings for verification and acceptance at the local post office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry rates for mailings or portions of mailings deposited at the local post office that meet the standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), or [5.0, Destination Delivery Unit \(DDU\) Entry](#). [E752.7.0]

## 3.0 Destination Bulk Mail Center (DBMC) Entry

### 3.1 Eligibility

Pieces in a mailing meeting the standards in [2.0, Destination Entry](#), and [3.0](#) are eligible for the DBMC rate when they meet all of the following conditions:

### 366.3.1

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route rates, subject to the corresponding standards for those rates.
- b. Are deposited at a BMC or ASF.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in [Exhibit 3.1](#).
- d. Are placed in a sack or pallet that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within that BMC's or ASF's service area (see [Exhibit 3.1](#)). [E752.2.1]

**Exhibit 3.1 BMC/ASF – DBMC Rate Eligibility**

[Exhibit E751.1.3]

**3.2 Presorted Flats**

Presorted flats in sacks or on pallets at all sort levels may claim DBMC rates. Separate mixed ADC sacks must be prepared for flats eligible for and claimed at the DBMC rate and for flats not claimed at the DBMC rate. Use the “label to” ZIP Code

of the ADC to assign ADC bundles to the respective mixed ADC sack. Use the address on the mailpieces to assign pieces to the respective mixed ADC bundle. All pieces in an ADC sack or in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility ZIP Code (as shown in Line 1 of the corresponding sack label or the ADC facility that is the destination of the palletized ADC bundle as would be shown on an ADC sack label for that facility using L004, Column B) is within the service area of the BMC or ASF at which the sack is deposited. Mail must be entered at the appropriate facility under [3.1, Eligibility](#). [E752.2.2]

### 3.3 Carrier Route Flats

Carrier Route flats in sacks or on pallets at all sort levels may claim DBMC rates. Mail must be entered at the appropriate facility under [3.1, Eligibility](#). [E752.2.5]

## 4.0 Destination Sectional Center Facility (DSCF) Entry

### 4.1 Eligibility

Pieces in a mailing meeting the standards in [2.0, Destination Entry](#), and [4.0](#) are eligible for the DSCF rate when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route rates, subject to the corresponding standards for those rates.
- b. Are deposited at an SCF listed in [L005](#) or [L006](#), except that machinable parcels prepared on pallets for the 5-digit ZIP Codes listed in [Exhibit 4.1, BMC Deposit of DSCF Rate Pallets](#), must be entered at the corresponding BMC facility shown in that exhibit (not at the SCF) unless an exception is requested and granted. An exception to [Exhibit 4.1](#), must be requested at least 15 days in advance of the mailing in writing from the area manager, Operations Support, who has jurisdiction over the BMC and SCF. Exceptions, if granted, are for a limited time.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the facility, or are part of a 3-digit scheme combination in [L008](#).
- d. Are placed in a sack or pallet that is labeled to the facility where deposited or labeled to a postal facility within that facility's service area. [E752.3.1]

[Exhibit E751.6.0]

### 4.2 Presorted Flats

Presorted flats and automation flats in sacks for the 5-digit, 3-digit, and SCF sort levels or on pallets at the 5-digit scheme, 5-digit, 3-digit, SCF, and ASF sort levels may claim DSCF rates. Mail must be entered at the appropriate facility under [4.1](#).  
[E752.3.2]

### 4.3 Carrier Route Flats

Carrier route flats in sacks at all sort levels or on pallets at the 5-digit scheme carrier routes, 5-digit carrier routes, 5-digit metro, 3-digit, SCF, and ASF sort levels may claim DSCF rates. Mail must be entered at the appropriate facility under [4.1](#).  
[E752.3.5]

## 5.0 Destination Delivery Unit (DDU) Entry

### 5.1 Eligibility

Pieces in a mailing meeting the standards in [2.0](#), [Destination Entry](#), and [5.0](#) are eligible for the DDU rate when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route rates, subject to the corresponding standards for those rates.
- b. Are addressed for delivery within the ZIP Code(s) served by the destination delivery unit.

- c. Are deposited:
1. For Carrier Route flats, at the DDU where the carrier cases the mail, as shown in the Drop Shipment Product.
  2. For Presorted flats, the Drop Shipment Product must be used to determine the correct destination entry facility for the 5-digit sorted flats entered at Presorted rates. If the Drop Shipment Product lists multiple facilities for a single 5-digit ZIP Code, then the mailer must inquire about the correct drop site when contacting the DDU to schedule an appointment. [E752.4.1]

**5.2 Presorted Flats**

Presorted flats that weigh more than 1 pound in 5-digit sacks, on 5-digit scheme or 5-digit pallets, or prepared as bedloaded 5-digit bundles may claim DDU rates. Mail must be entered at the appropriate facility under [5.1](#). Presorted flats weighing 1 pound or less are not eligible for DDU rates. [E752.4.2]

**5.3 Carrier Route Flats**

Carrier Route flats in sacks, on 5-digit carrier routes scheme and 5-digit carrier routes pallets, or prepared as bedloaded carrier route bundles may claim DDU rates. Mail must be entered at the appropriate facility under [5.1](#). [E752.4.5]

## 373 Rates and Eligibility

### Overview

- [1.0 Media Mail Rates and Fees](#)
- [2.0 Content Standards for Media Mail Flats](#)
- [3.0 Rate Eligibility for Media Mail Flats](#)

### 1.0 Media Mail Rates and Fees

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Media Mail Rate Application

The Media Mail rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. (Rate application is identical for the single-piece and presort rates.) For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per piece is that for a piece weighing 1 pound. [P013.5.4]

#### 1.3 Media Mail Presorted Rates

| Weight Not Over (pounds) | Basic  | 5-Digit |
|--------------------------|--------|---------|
| 1                        | \$1.12 | \$0.80  |
| 2                        | 1.54   | 1.22    |
| 3                        | 1.96   | 1.64    |
| 4                        | 2.38   | 2.06    |
| 5                        | 2.80   | 2.48    |

[R700.3.0]

#### 1.4 Mailing Fee

A mailing fee must be paid once each 12-month period at each post office of mailing by or for any person who mails at the Presorted Media Mail rates. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. Presort mailing fees for Media Mail, per 12-month period: \$150.00.

[E713.3.2 and R700.5.3]

#### 1.5 Computing Postage for Media Mail

##### 1.5.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected

pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

#### **1.5.2 Computing Postage for Affixed Postage**

For each piece, affix the postage for the weight increment (including any surcharges or discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece. [P013.9.2]

#### **1.5.3 Computing Postage for Permit Imprint**

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent. [P013.9.1]

## 2.0 Content Standards for Media Mail Flats

### **2.1 General**

Mailable matter meeting one of the specific eligibility standards in 2.2, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Media Mail. [E710.1.1]

### **2.2 Content Standards**

Only these items may be mailed at the Media Mail rates:

- a. Books, including books issued to supplement other books, of at least eight printed pages, consisting wholly of reading matter or scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books. Advertising includes paid advertising and the publishers' own advertising in display, classified, or editorial style.
- b. 16-millimeter or narrower width films, which must be positive prints in final form for viewing, and catalogs of such films of 24 pages or more (at least 22 of which are printed). Films and film catalogs sent to or from commercial theaters do not qualify for the Media Mail rate.
- c. Printed music, whether in bound or sheet form.
- d. Printed objective test materials and their accessories used by or on behalf of educational institutions to test ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark.
- e. Sound recordings, including incidental announcements of recordings and guides or scripts prepared solely for use with such recordings. Video recordings and player piano rolls are classified as sound recordings.
- f. Playscripts and manuscripts for books, periodicals, and music.
- g. Printed educational reference charts designed to instruct or train individuals for improving or developing their capabilities. Each chart must be a single printed sheet of information designed for educational reference. The information on the

chart, which may be printed on one or both sides of the sheet, must be conveyed primarily by graphs, diagrams, tables, or other nonnarrative matter. An educational reference chart is normally but not necessarily devoted to one subject. A chart on which the information is conveyed primarily by textual matter in a narrative form does not qualify as a printed educational reference chart for mailing at the Media Mail rates even if it includes graphs, diagrams, or tables. Examples of qualifying charts include maps produced primarily for educational reference, tables of mathematical or scientific equations, noun declensions or verb conjugations used in the study of languages, periodic table of elements, botanical or zoological tables, and other tables used in the study of science.

- h. Loose-leaf pages and their binders consisting of medical information for distribution to doctors, hospitals, medical schools, and medical students.
- i. Computer-readable media containing prerecorded information and guides or scripts prepared solely for use with such media. [E713.1.1]

### **2.3 Postal Inspection**

Media Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Media Mail rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### **2.4 Attachments and Enclosures**

#### **2.4.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Media Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **2.4.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Media Mail piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Media Mail rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

#### **2.4.3 Loose Enclosures**

In addition to the enclosures and additions listed in [343.2.6, Attachments and Enclosures](#), any printed matter that is mailable as Standard Mail may be included loose with any qualifying material mailed at the Media Mail rates. [E713.1.2]

#### **2.4.4 Enclosures in Books**

Enclosures in books mailed at Media Mail rates are subject to these additional standards:

- a. Either one envelope or one addressed postcard may be bound into the pages of a book. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.4.4b](#).
- b. One order form may be bound into the pages of a book. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.4.4a](#).
- c. Announcements of books may appear as book pages. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related or other materials or services. Announcements may fully describe the conditions and methods of ordering books and may contain ordering instructions for use with a separate order form. Up to three of these announcements may contain as part of their format a single order form, which may also serve as a postcard. The order forms permitted with these announcements are in addition to, and not in place of, order forms that may be enclosed under [2.4.4a](#) or [2.4.4b](#). [E710.1.3]

#### **2.5 Written Additions**

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

### 3.0 Rate Eligibility for Media Mail Flats

#### 3.1 Basic Weight Standards

There is no minimum weight for Media Mail. A single piece of Media Mail can weigh no more than 70 pounds. [E710.1.2]

#### 3.2 Rate Eligibility Standards

A Presorted Media Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic rates. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort rate and those pieces that meet the basic presort requirements are eligible for the basic rates, subject to the preparation standards in [375.5.0, Preparation for Media Mail Flats](#), or [705.8.0, Preparation for Pallets](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters. [E713.3.1]

#### 3.3 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

#### 3.4 Rate Categories for Media Mail

Media Mail rates are based on the weight of the piece without regard to zone. The rate categories and discounts are as follows: [E713.2.0]

- a. 5-Digit Presort Rate. To qualify for the 5-digit rate, a piece must be prepared and sorted to 5-digit sacks under [375.5.0, Preparation for Media Mail Flats](#), or 5-digit pallets under [705.8.0, Preparation for Pallets](#). All logical 5-digit bundles on pallets must contain at least 10 pieces. [E713.3.3]
- b. Basic Presort Rate. All pieces prepared and sorted under [375.5.0, Preparation for Media Mail Flats](#), or [705.8.0, Preparation for Pallets](#), that are not eligible for the 5-digit rate qualify for the basic rate. [E713.3.4]

## 374 Postage Payment and Documentation

### Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Media Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. [P700.1.1]

### 2.0 Mailing Documentation

#### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). The mailer may submit a computer-generated facsimile (see [2.7, Facsimile Postage Statements](#)). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

#### 2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

#### 2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### 2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

### **2.5 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607, Mailer Compliance and Appeals of Classification Decisions](#). [P012.1.5]

### **2.6 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

### **2.7 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

# 375 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation for Media Mail Flats](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Media Mail and any other type of mail may not be part of the same mailing even if in the same processing category. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit:* the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *3-digit:* the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- c. *Origin/optional entry 3-digit(s):* the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.

### 375.1.4

- d. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- e. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- g. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- d. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- e. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#).

- f. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.

### 375.2.5

- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [705.8.5.11, Bundles on Pallets](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

#### 2.5 Preparing Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0, Preparation for Pallets](#).
- b. If placed in sacks, Media Mail must meet the specific weight limits in [5.2](#). [M020.2.2]

#### 2.6 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Media Mail must meet the applicable minimum and maximum bundle size standards in [5.2](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#), and each physical bundle, including carrier route rate mail, must always contain at least two pieces. [M020.1.6]

#### 2.7 Other Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).

- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

## 2.8 Labeling Bundles

The presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

## 2.9 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece of bundles under 708.7.0. [M013.1.1]

## 3.0 Sacks

### 3.1 Maximum Weight

The maximum weight of any sack (mail plus sack tare) must not exceed 70 pounds. [M033.1.1]

## 4.0 Sack Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- d. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE           |
|-------------------------|----------------|
| Barcoded                | BC             |
| Digit                   | D              |
| Flats                   | FLTS           |
| General Delivery Unit   | G              |
| Highway Contract Route  | H              |
| Mixed                   | MXD            |
| Nonbarcoded             | NON BC (sacks) |
| Package Services        | PSVC           |
| Post Office Box Section | B              |
| Rural Route             | R              |
| Working                 | WKG            |

[M031.5.0]

**4.5 Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**4.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**4.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**4.8 Barcoded Sack Labels****4.8.1 Basic Standards for Barcoded Sack Labels**

Barcoded sack labels are not required on Presorted Media Mail mailings. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0, \*Barcoding Standards for Container Labels\*](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing. [M032.1.1]

**4.8.2 Physical Characteristics of Barcoded Sack Labels**

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i, \*Barcode\*](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).

375.5.1

- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation for Media Mail Flats

### 5.1 Basic Standards

All mailings of Presorted Media Mail are subject to the standards in [5.2, Bundling](#), and [5.3, Sacking](#), and to these general requirements:

- a. Each mailing must meet the applicable standards in [5.0](#).
- b. All pieces must be sorted to the finest extent possible under [5.2, Bundling](#), or palletized under [705.8.0, Preparation for Pallets](#).
- c. Each piece claimed at Media Mail rates must be marked “Media Mail” under [302.2.0, Placement and Content of Mail Markings](#). Each piece claimed at Presorted Media Mail rates also must be marked “Presorted” or “PRSRT”. [M730.1.1]

### 5.2 Bundling

#### 5.2.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces. [M730.2.1]

#### 5.2.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit rate eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M730.2.2]

### 5.3 Sacking

#### 5.3.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches the minimums specified in [5.3.2](#) or 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks). [M730.2.3]

#### 5.3.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit: optional, but required for 5-digit rate eligibility (10-piece minimum).
  - 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [4.3c](#) for overseas military mail).

2. Line 2: "PSVC FLTS 5D NON BC."
- b. 3-digit: required (20-piece minimum).
  1. Line 1: use [L002](#), Column A.
  2. Line 2: "PSVC FLTS 3D NON BC."
- c. ADC: required (20-piece minimum).
  1. Line 1: use [L004](#), Column B.
  2. Line 2: "PSVC FLTS ADC NON BC."
- d. Mixed ADC: required (no minimum).
  1. [\[3-17-05\]](#) [\[02-03-05\]](#) Line 1: Use [L009](#), effective May 15, 2005. Until then, use "MXD" followed by city, state, and ZIP Code of ADC serving the 3-digit ZIP Code prefix of the entry post office as shown in [L004](#), or use [L009](#).
  2. Line 2: "PSVC FLTS NON BC WKG." [\[M730.2.4\]](#)

## 376 Enter and Deposit

### Overview

[1.0 Verification and Deposit](#)

### 1.0 Verification and Deposit

#### 1.1 Verification and Entry

All presorted mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#).  
[D700.2.2]

385 Mail Preparation

386 Enter and Deposit

## 383 Rates and Eligibility

### Overview

- [1.0 Library Mail Rates and Fees](#)
- [2.0 Content Standards for Library Mail Flats](#)
- [3.0 Rate Eligibility for Library Mail Flats](#)

### 1.0 Library Mail Rates and Fees

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Library Mail Rate Application

The Library Mail rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per addressed piece is that for an addressed piece weighing 1 pound. [P013.5.5]

#### 1.3 Library Mail Presorted Rates

| Weight Not Over (pounds) | Basic  | 5-Digit |
|--------------------------|--------|---------|
| 1                        | \$1.06 | \$0.76  |
| 2                        | 1.46   | 1.16    |
| 3                        | 1.86   | 1.56    |
| 4                        | 2.26   | 1.96    |
| 5                        | 2.66   | 2.36    |

[R700.4.0]

#### 1.4 Mailing Fee

A mailing fee must be paid once each 12-month period at each post office of mailing by or for any person who mails at the Presorted Library Mail rates. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment.

Presort mailing fees for Library Mail, per 12-month period: \$150.00.

[E714.3.2 and R700.5.3]

#### 1.5 Computing Postage for Library Mail

##### 1.5.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected

383.1.5.2

pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

### **1.5.2 Computing Postage for Affixed Postage**

For each piece, affix the postage for the weight increment (including any surcharges or discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece. [P013.9.2]

### **1.5.3 Computing Postage for Permit Imprint**

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent. [P013.9.1]

## **2.0 Content Standards for Library Mail Flats**

### **2.1 General**

Mailable matter meeting one of the specific eligibility standards in 2.3 or 2.4, as applicable, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Library Mail. [E710.1.1]

### **2.2 Sender and Recipient Qualifications**

Each piece must show in the address or return address the name of a school, college, university, public library, museum, or herbarium or the name of a nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organization or association. For Library Mail standards, these nonprofit organizations are defined in 703.1.0. [E714.1.1]

### **2.3 Content Standards for Mailings Between Entities**

The items described in this section may be mailed at the Library Mail rate when sent between: (1) schools, colleges, universities, public libraries, museums, and herbariums and nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, and fraternal organizations or associations; (2) any such institution, organization, or association and an individual who has no financial interest in the sale, promotion, or distribution of the materials; or (3) any such institution, organization, or association and a publisher, if such institution, organization, or association has placed an order to buy such materials for delivery to itself:

- a. Books, consisting wholly of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising, except for incidental announcements of books.
- b. Printed music, whether in bound or sheet form.
- c. Bound volumes of academic theses, whether in typewritten or duplicated form.
- d. Periodicals, whether bound or unbound.
- e. Sound recordings.

- f. Other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.
- g. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials for informing and furthering the educational work and interests of museums and herbariums. [E714.1.2]

## 2.4 Qualified Mailings “To” or “From”

The following specific items may be mailed at the Library Mail rate when sent to or from schools, colleges, universities, public libraries, museums, and herbariums and to or from nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organizations:

- a. 16-millimeter or narrower width films, filmstrips, transparencies, slides, and microfilms. All must be positive prints in final form for viewing.
- b. Sound recordings.
- c. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials intended for informing and furthering the educational work and interests of museums and herbariums.
- d. Scientific or mathematical kits, instruments, or other devices.
- e. Catalogs of the materials in 2.4a. through d. in [Content Standards for Library Mail Flats](#) and guides or scripts prepared solely for use with such materials. [E714.1.3]

## 2.5 Postal Inspection

Library Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Library Mail rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

## 2.6 Attachments and Enclosures

### 2.6.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Library Mail piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

### 2.6.2 Incidental First-Class Attachments and Enclosures

Incidental First-Class matter may be enclosed in or attached to any Library Mail piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for

past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Library Mail rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

#### **2.6.3 Enclosures in Books and Sound Recordings**

Books and sound recordings mailed at the Library Mail rate may contain these enclosures as well as the additions and enclosures permitted under [2.6.1](#), [2.6.2](#) and [2.7](#):

- a. Either one envelope or one addressed postcard. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.6.3b](#).
- b. One order form. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.6.3a](#).
- c. With books, announcements of books in book pages or as loose enclosures. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related materials or services. Announcements may fully describe the conditions and methods of ordering books (such as by membership in book clubs) and may contain ordering instructions for use with the single order form.
- d. With sound recordings, announcements of sound recordings on title labels, on protective sleeves, on the carton or wrapper, or on loose enclosures. These announcements of sound recordings must be incidental and exclusively devoted to sound recordings. They may not contain extraneous advertising of recording-related materials or services. Announcements may fully describe the conditions and methods of ordering sound recordings (such as by membership in sound recording clubs) and may contain ordering instructions for use with the single order form. [E714.1.4]

#### **2.6.4 Other Enclosures**

Material mailed at the Library Mail rate other than books and sound recordings may contain only those additions and enclosures permitted under [2.6.1](#), [2.6.2](#) and [2.7](#). [E714.1.5]

### **2.7 Written Additions**

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.

- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

### 3.0 Rate Eligibility for Library Mail Flats

#### 3.1 Basic Weight Standards

There is no minimum weight for Library Mail. A single piece of Library Mail can weigh no more than 70 pounds. [E710.1.2]

#### 3.2 Rate Eligibility Standards

A Presorted Library Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic rates. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort rate, and those pieces that meet the basic presort requirements are eligible for the basic rate, subject to the preparation standards in [385.5.0, Preparation of Library Mail Flats](#), or [705.8.0, Preparation for Pallets](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters. [E714.3.1]

#### 3.3 Delivery and Return Addresses

All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

#### 3.4 Rate Categories for Library Mail

Library Mail rates are based on the weight of the piece without regard to zone. The rate categories and discounts are as follows: [E714.2.0]

- a. 5-Digit Presort Rate. To qualify for the 5-digit rate, a piece must be prepared and sorted to 5-digit sacks under [385.5.0, Preparation of Library Mail Flats](#), or to 5-digit pallets under [705.8.0](#). All logical 5-digit bundles on pallets must contain at least 10 pieces. [E714.3.3]
- b. Basic Presort Rate. All pieces prepared and sorted under [385.5.0, Preparation of Library Mail Flats](#), or [705.8.0, Preparation for Pallets](#), that are not eligible for the 5-digit rate qualify for the basic rate. [E714.3.4]

# 384 Postage Payment and Documentation

## Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

## 1.0 Basic Standards for Postage Payment

### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Library Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces. [P700.1.1]

## 2.0 Mailing Documentation

### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). The mailer may submit a computer-generated facsimile (see [2.7, Facsimile Postage Statements](#)). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

### 2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### **2.4 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### **2.5 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607, Mailer Compliance and Appeals of Classification Decisions](#). [P012.1.5]

#### **2.6 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

#### **2.7 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

# 385 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation of Library Mail Flats](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Library Mail and any other type of mail may not be part of the same mailing even if in the same processing category. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. **5-digit:** the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. **3-digit:** the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- c. **SCF:** the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- d. **ADC:** all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).

### 385.1.4

- e. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- g. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- d. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- e. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry* facility. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- f. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0, Bundles](#).

- g. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.

385.2.5

- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [705.8.5.11, Bundles on Pallets](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.5 Preparing Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0, Preparation for Pallets](#).
- b. If placed in sacks, Library Mail must meet the specific weight limits in [5.2](#). [M020.2.2]

### 2.6 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Library Mail must meet the applicable minimum and maximum bundle size standards in [5.2](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#) and each physical bundle, including carrier route rate mail, must always contain at least two pieces. [M020.1.6]

### 2.7 Other Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).

- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

## 2.8 Labeling Bundles

The presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

## 2.9 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece of bundles under 708.7.0. [M013.1.1]

## 3.0 Sacks

### 3.1 Maximum Weight

The maximum weight of any sack (mail plus sack tare) must not exceed 70 pounds. [M033.1.1]

## 4.0 Sack Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE           |
|-------------------------|----------------|
| Barcoded                | BC             |
| Digit                   | D              |
| Flats                   | FLTS           |
| General Delivery Unit   | G              |
| Highway Contract Route  | H              |
| Mixed                   | MXD            |
| Nonbarcoded             | NON BC (sacks) |
| Package Services        | PSVC           |
| Post Office Box Section | B              |
| Rural Route             | R              |
| Working                 | WKG            |

[M031.5.0]

**4.5 Line 3 (Office of mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**4.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**4.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**4.8 Barcoded Sack Labels****4.8.1 Basic Standards for Barcoded Sack Labels**

Barcoded sack labels are not required on Presorted Library Mail mailings. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0, \*Barcoding Standards for Container Labels\*](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray to prevent their loss during transport and processing. [M032.1.1]

**4.8.2 Physical Characteristics of Barcoded Sack Labels**

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i, \*Barcode\*](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).

385.5.1

- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation of Library Mail Flats

### 5.1 Basic Standards

All mailings of Presorted Library Mail are subject to the standards in [5.2](#) and [5.3](#) and to these general standards:

- a. Each mailing must meet the applicable standards in [5.0](#).
- b. All pieces must be sorted to the finest extent possible under [5.2](#) and [5.3](#) or palletized under [705.8.0](#).
- c. Each piece claimed at Library Mail rates must be marked “Library Mail” under [302.2.0, Placement and Content of Mail Markings](#). Each piece claimed at Presorted Library Mail rates also must be marked “Presorted” or “PRSRT” under [302.2.0](#). [M740.1.1]

### 5.2 Bundling

#### 5.2.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles, placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces. [M740.2.1]

#### 5.2.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit rate eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M740.2.2]

### 5.3 Sacking

#### 5.3.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches the minimums specified in [5.3.2](#) or 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks). [M740.2.3]

#### 5.3.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit: optional, but required for 5-digit rate eligibility (10-piece minimum).
  - 1. Line 1, use city, state, and 5-digit ZIP Code on mail (see [4.3c](#) for overseas military mail).

2. Line 2: "PSVC FLTS 5D NON BC."
- b. 3-digit: required (20-piece minimum).
  1. Line 1: use L002, Column A.
  2. Line 2: "PSVC FLTS 3D NON BC."
- c. ADC: required (20-piece minimum).
  1. Line 1: use L004, Column B.
  2. Line 2: "PSVC FLTS ADC NON BC."
- d. Mixed ADC: required (no minimum).
  1. [3-17-05] [02-03-05] Line 1: Use L009, effective May 15, 2005. Until then, use "MXD" followed by city, state, and ZIP Code of ADC serving the 3-digit ZIP Code prefix of the entry post office as shown in L004, or use L009.
  2. Line 2: "PSVC FLTS NON BC WKG." [M740.2.4]

## 386 Enter and Deposit

### Overview

[1.0 Verification and Deposit](#)

### 1.0 Verification and Deposit

#### 1.1 Verification and Entry

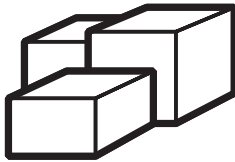

All presorted mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#).

# **Discount Parcels Design Standards**

401 Physical Standards

402 Elements on the Face of a Mailpiece

# 401 Physical Standards

## Overview

- [1.0 Physical Standards for Parcels](#)
- [2.0 Additional Physical Standards by Class of Mail](#)

## 1.0 Physical Standards for Parcels

### 1.1 Parcels

Each parcel is assigned to one of three mail processing categories: machinable, irregular, or outside parcel. These categories are based on the physical dimensions of the piece, regardless of the placement (orientation) of the delivery address on the piece. [C050.1.0]

### 1.2 Minimum Size

Pieces are subject to the minimum standards in [601.1.0, General Standards](#), and may be subject to other minimum dimensions, based on the standards for specific rates. [C100.1.2]

### 1.3 Maximum Weight and Size

No mailpiece may weigh more than 70 pounds. Lower weight limits apply to First-Class Mail, Standard Mail, and Bound Printed Matter. Pieces may not measure more than 108 inches in length and girth combined, except Parcel Post, which may not measure more than 130 inches in length and girth combined. For parcels, length is the distance of the longest dimension and girth is the distance around the thickest part. Lower size or weight standards apply to mail addressed to some APOs and FPOs subject to [703.2.0](#) and [703.4.0](#) and for Department of State mail, subject to [703.3.0](#). [C010.1.2]

### 1.4 Two or More Packages

Two or more packages may be mailed as a single parcel, if they are about the same size or shape or if they are parts of one article, if they are securely wrapped or fastened together, and if they do not together exceed the weight or size limits. [C100.1.3]

### 1.5 Machinable Parcels

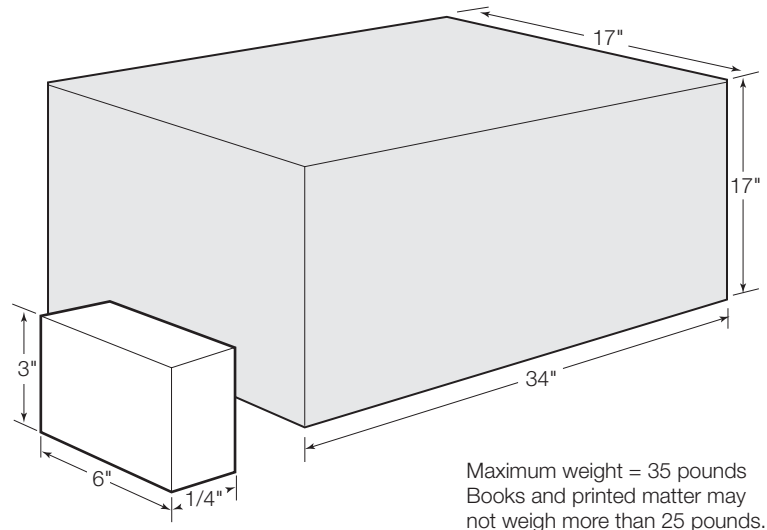

#### 1.5.1 Criteria

A machinable parcel is any piece that is (see [Exhibit 1.5.1, Machinable Parcel Dimensions](#)):

- a. Not less than 6 inches long, 3 inches high, 1/4 inch thick, and 6 ounces in weight. (A mailpiece exactly 1/4 inch thick is subject to the 3 1/2-inch height minimum under [601.1.0](#).)
- b. Not more than 34 inches long, or 17 inches high, or 17 inches thick, or 35 pounds in weight. For books or other printed matter, the maximum weight is 25 pounds. [C050.4.1]

### Exhibit 1.5.1 Machinable Parcel Dimensions

Minimum weight = 6 oz.  
*(for details, see machinable parcel criteria in 401.1.5.1)*

[Exhibit C050.1.0]

### 1.5.2 Soft Goods and Enveloped Printed Matter

Soft goods wrapped in paper or plastic bags and enveloped printed matter are machinable only if all packaging standards in [601.1.0, General Standards](#), are met. [C050.4.2]

### 1.5.3 Exception

Some parcels may be successfully processed on BMC parcel sorters even though they do not conform to the general machinability criteria in [1.5.1](#). The manager, BMC Operations, USPS Headquarters (see [608.8.1](#) for address) may authorize a mailer to enter such parcels as machinable parcels rather than irregular parcels if the parcels are tested on BMC parcel sorters and prove to be machinable. Mailers who wish to have parcels tested for machinability on USPS parcel sorting machines must:

- a. Submit a written request to BMC Operations. The request must list mailpiece characteristics for every shape, weight, construction, and size to be considered. If the letter requesting testing describes a mailpiece that falls within the specifications of pieces that were tested previously, the mailpiece will not be acknowledged for testing.
- b. Define estimated number of parcels to be mailed in the coming year, and preparation level (e.g., destination BMC pallets).

- c. Upon acknowledgement from the manager, BMC Operations, send 100 mailpiece samples to the designated test facility at least 6 weeks prior to the first mailing date. The manager, BMC Operations will recommend changes to ensure machinability of parcels that do not qualify. [C050.4.3]

#### 1.5.4 Exclusions

Items categorized as flats, irregular parcels, or outside parcels may not be prepared as machinable parcels. [C050.4.4]

### 1.6 Irregular Parcel

An irregular parcel is a parcel not meeting the dimensional criteria in 1.5.1. This processing category also includes parcels that cannot be processed by BMC parcel sorters, including rolls and tubes up to 26 inches long; merchandise samples that are not individually addressed and are not letter-size or flat-size; unwrapped, paper-wrapped, or sleeve-wrapped articles that are not letter-size or flat-size; and articles enclosed in envelopes that are not letter-size, flat-size, or machinable parcels. [C050.5.0]

### 1.7 Outside Parcel

An outside parcel is a parcel that exceeds the any of the maximum dimensions for a machinable parcel. This processing category also includes high-density parcels (other than books and printed matter) weighing more than 15 pounds and exerting more than 60 pounds per square foot (0.4167 pound per square inch) pressure on their smallest side; cartons containing more than 24 ounces of liquid in one or more glass containers; cartons containing 1 gallon or more of liquid in metal or plastic containers; cans, paints; rolls and tubes longer than 26 inches; metal-band strapped boxes, metal boxes, and wood boxes; articles not mailed in boxes or other containers; harmful matter; hazardous materials except ORM-D materials; and containers with all dimensions exceeding the minimum dimensions for a machinable (regular) parcel, if their coefficient of friction or ability to slide on a smooth, hard surface is not similar to that of a domestic-class fiberboard box of the same approximate size and weight. [C050.6.0]

## 2.0 Additional Physical Standards by Class of Mail

### 2.1 First-Class Mail Parcels

#### 2.1.1 Weight

Matter at First-Class Mail rates cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail. [C100.1.1]

#### 2.1.2 Nonmachinable Surcharge

Parcels that weigh 1 ounce or less are subject to the nonmachinable surcharge if the piece is greater than 1/4-inch thick. [C100.4.0]

### 2.2 Standard Mail Parcels

#### 2.2.1 Basic Physical Standards

These standards apply to Standard Mail:

- a. Each piece must weigh less than 16 ounces.

### 401.2.2.2

- b. Presorted rate and Customized MarketMail pieces are subject to the basic mailability standards in [601](#).
- c. Except for automation basic carrier route rate pieces and merchandise samples mailed with detached address labels (DALs), the maximum size for Enhanced Carrier Route Standard Mail is 14 inches long, 11-3/4 inches high, and 3/4 inch thick. Merchandise samples whose dimensions exceed these maximums may be sent at the Enhanced Carrier Route rates if mailed using DALs, provided that the samples meet all other applicable standards and the DALs meet the standards in [602.4.0](#). [C600.1.1]

#### **2.2.2 Residual Shape Surcharge**

Mail that is prepared as a parcel or is not letter-size or flat-size is subject to a residual shape surcharge. Mail that is prepared as Customized MarketMail under [705.1.0](#) is subject also to the residual shape surcharge. There are different surcharges for Presorted rate pieces and Enhanced Carrier Route rate pieces. Only the surcharges for Presorted rate pieces apply to CMM pieces. [C600.3.0]

#### **2.2.3 Nonmachinable Surcharge**

The nonmachinable surcharge does not apply to Standard Mail pieces (including parcels) that are claimed at any nonletter rate. [C600.4.2]

### **2.3 Parcel Post**

#### **2.3.1 General Standards**

These standards apply to Parcel Post:

- a. Parcel Post pieces measuring over 108 inches in combined length and girth, but not more than 130 inches in combined length and girth, are mailable at the applicable oversized rate.
- b. Items weighing less than 15 pounds but measuring more than 84 inches in combined length and girth are charged the rate for a 15-pound parcel for the zone to which it is addressed (balloon rate). [E120.2.3 and C700.1.0]

#### **2.3.2 Nonmachinable Parcel Post**

Mailpieces described in this section that are mailed at the Inter-BMC/ASF Parcel Post, Intra-BMC/ASF Parcel Post, DSCF Parcel Select, or DBMC Parcel Select rates are subject to the applicable nonmachinable surcharge in [453.1.0](#) unless the applicable special handling fee is paid. An oversized parcel as described in [2.3.1a](#) is not subject to the nonmachinable surcharge. Mailpieces are nonmachinable if they meet any of the following criteria:

- a. A parcel more than 34 inches long, 17 inches wide, or 17 inches high.
- b. A parcel less than 6 inches long, 1/4 inch thick, or 3 inches high.
- c. A parcel that weighs less than 6 ounces or more than 35 pounds.
- d. A parcel containing more than 24 ounces of liquid in glass containers, or 1 gallon or more of liquid in metal or plastic containers.
- e. An insecurely wrapped or metal-banded parcel.
- f. A can, roll, or tube, or wooden or metal box.
- g. Books, printed matter, or business forms weighing more than 25 pounds.

- h. A high-density parcel weighing more than 15 pounds and exerting more than 60 pounds per-square-foot pressure on its smallest side.
- i. A film case weighing more than 5 pounds or with strap-type closures, except any film case the USPS authorizes to be entered as a machinable parcel under [1.0](#) and to be identified by the words “Machinable in United States Postal Service Equipment” permanently attached as a nontransferable decal in the lower right corner of the case.
- j. Parcels with characteristics (such as inadequate packaging) that could result in damage to the contents of the mailpiece, other parcels, or postal machinery if mechanical sortation is used. [C700.2.0]

## **2.4 Bound Printed Matter Parcels**

### **2.4.1 General Standards**

Pieces mailed at Bound Printed Matter rates may not weigh more than 15 pounds. [C700.1.0]

## 402 Elements on the Face of a Mailpiece

### Overview

- [1.0 All Mailpieces](#)
- [2.0 Placement and Content of Markings](#)
- [3.0 Endorsement Placement](#)
- [4.0 General Barcode Placement for Parcels](#)

### 1.0 All Mailpieces

#### 1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements. [A010.1.5]

#### 1.2 Delivery and Return Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under [602.4.0](#), the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. (See [602](#) for additional information regarding addressing.) [A010.1.1]

#### 1.3 Postage Payment

The mailer is responsible for proper payment of postage. Standards for postage payment are specified for each shape and class of mail. [P011.1.1]

### 2.0 Placement and Content of Markings

#### 2.1 First-Class Mail and Standard Mail Markings

##### 2.1.1 Placement

Markings must be placed as follows:

- a. **Basic Marking.** The basic required marking that indicates the class or subclass—“First-Class,” “Presorted Standard” or “PRSRT STD,” or “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”)—must be printed or produced as part of, or directly below or to the left of, the permit imprint indicia, meter stamp or impression, or adhesive or precanceled stamp.
- b. **Other Markings.** The rate-specific markings “ECRLOT,” “ECRWSH,” “ECRWSS,” and “Customized MarketMail” (or “CUST MKTMAIL” or “CMM”) (Standard Mail only) may be placed as follows:
  1. In the location specified in [2.1.1a](#).
  2. In the address area on the line directly above or two lines above the address if the marking appears alone or if no other information appears on the line with the marking except optional endorsement line information under [708.7.0](#) or carrier route bundle information under [708.6.0](#).

### 402.2.1.2

3. If preceded by two asterisks (\*\*), the “PRESORTED” (or “PRSRT”) or “CUSTOMIZED MARKETMAIL” (or “CUST MKTMAIL” or “CMM”) marking also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage in an MLOCR ink-jet printed date correction/meter drop shipment line.
- c. Additional Requirements for Carrier Route. “ECRLOT,” “ECRWSH,” and “ECRWSS” (Standard Mail only) must appear in their entirety wherever placed, except “ECR” may be placed in the postage area if “LOT,” “WSH,” or “WSS,” as applicable, is placed in the line above or two lines above the address. Pieces not mailed at ECR rates must not bear these markings. [M012.2.1]

#### 2.1.2 Exceptions to Markings

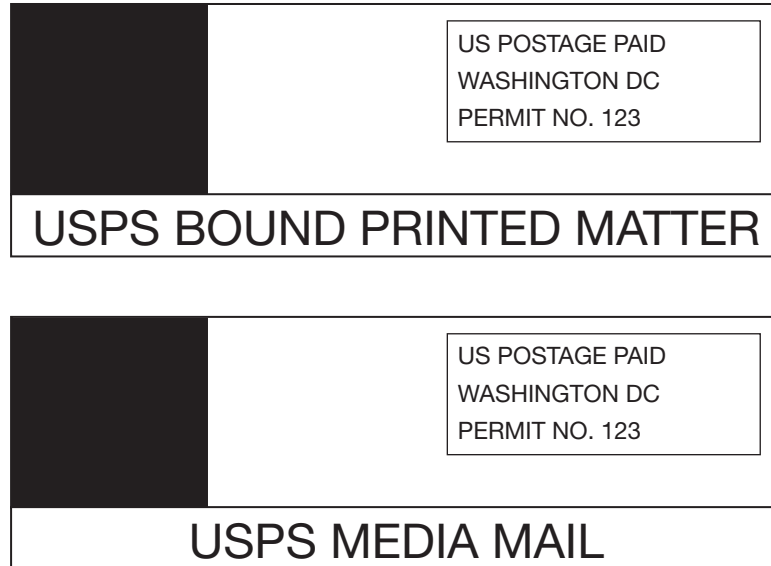

In manifest mailings, the basic marking must appear in the postage area on each piece. The two-letter rate category code required in the keyline on manifest mailing pieces prepared under [705.2.0](#) meets the requirement for other rate markings. [M012.2.2]

## 2.2 Parcel Post, Bound Printed Matter, Media Mail, and Library Mail Markings

### 2.2.1 Basic Markings

The basic required Package Services subclass marking—“Parcel Post” or “PP,” “Bound Printed Matter” or “BPM,” “Media Mail,” or “Library Mail”—must be printed on each piece claimed at the respective rate. For Parcel Post destination entry rate mail, the marking “Parcel Select” may be used as the basic required marking instead of “Parcel Post.” The basic required marking must be placed in the postage area (i.e., printed or produced as part of, or directly below or to the left of, the permit imprint indicia or meter stamp or impression). Optionally, the basic required marking may be printed on the shipping address label as service indicators composed of a service icon and service banner (see [Exhibit 2.2.1](#)):

- a. The service icon that will identify all Package Services subclasses will be a 1-inch solid black square. If the service icon is used, it must appear in the upper left corner of the shipping label.
- b. The service banner must appear directly below the postage payment area and the service icon, and it must extend across the shipping label. If the service banner is used, the appropriate subclass marking (e.g., “BOUND PRINTED MATTER,” “MEDIA MAIL”) must be preceded by the text “USPS” and must be printed in minimum 20-point bold sans serif typeface, uppercase letters, centered within the banner, and bordered above and below by minimum 1-point separator lines. There must be a 1/16-inch clearance above and below the text. [M012.3.1]

**Exhibit 2.2.1 Package Services Indicators**

[Exhibit M012.3.1]

**2.2.2 Parcel Post Markings**

Marking requirements for Parcel Post are as follows:

- a. Destination Entry Rate Mail. Each piece mailed at a DBMC, DSCF, or DDU Parcel Post rate must bear the marking “Parcel Post” (or “PP”) or “Parcel Select” in the postage area as described in 2.2.1. If “Parcel Select” is shown in the postage area, then no other marking is required. If “Parcel Post” (or “PP”) is shown in the postage area, then the additional marking “Drop Ship” (or “D/S”) or “Parcel Select,” or both, must be placed on each piece in either the postage area or the address area (as described under 2.0) to indicate that the piece was entered at a destination entry rate.
- b. Other Parcel Post Mail. Pieces must bear the marking “Parcel Post” (or “PP”) in the postage area as described under 2.2.1. [M710.1.2]

**2.2.3 Parcel Select (Parcel Post) Markings**

Each piece in a Parcel Select (destination entry Parcel Post) mailing must bear a marking to indicate it was mailed at a destination entry rate. If the “Parcel Select” marking is used as the basic marking in the postage area on such pieces under 2.2.1, no additional marking is required because the “Parcel Select” marking identifies the mail as destination entry rate mail. If the “Parcel Post” (or “PP”) marking is used as the basic marking in the postage area under 2.2.1, one or both of the following markings also must appear on each piece in the mailing to identify it as destination entry rate mail: (1) “Drop Ship” (or “D/S”); (2) “Parcel Select.” These additional destination entry rate markings must appear in either the postage area described in 2.2.1 or in the address area on the line directly above or two lines above the address if the marking appears alone (i.e., if no other information appears

### 402.2.2.4

on that line). The “Parcel Select” and “Drop Ship” (or “D/S”) markings must not appear on Parcel Post mail that is entered at rates other than DBMC, DSCF, or DDU destination entry rates. [M012.3.2]

#### **2.2.4 Bound Printed Matter Markings**

In addition to the basic marking “Bound Printed Matter” or “BPM,” each piece of Bound Printed Matter mailed at a presorted or carrier route rate must bear additional rate markings. The additional markings may be placed in the postage area as specified in 2.2.1. Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under 708.7.0 or postal carrier route bundle information under 708.6.0. The additional rate markings are:

- a. For Presorted rate mail, the additional required marking is “Presorted” (or “PRSRT”).
- b. For carrier route rate mail, the additional required marking is “Carrier Route Presort” (or “CAR-RT SORT”). [M012.3.3]

#### **2.2.5 Media Mail Markings**

Each piece of Media Mail mailed at a presorted rate must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Media Mail.” This additional marking may be placed in the postage area as specified in 2.2.1. Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under 708.7.0. [M012.3.4]

#### **2.2.6 Library Mail Markings**

Each piece of Library Mail mailed at a presorted rate must bear the required marking “Presorted” or “PRSRT” in addition to the basic marking “Library Mail.” This additional marking may be placed in the postage area as specified in 2.2.1. Alternatively, these markings may be placed in the address area on the line directly above or two lines above the address if the marking appears alone, or if no other information appears on the line with the marking except postal optional endorsement line information under 708.7.0. [M012.3.5]

### **2.3 Enclosures**

Enclosures, attachments, and mixed rate mailpieces must be marked under the applicable standards in 703.9.0, *Mixed Classes*. [M012.1.2]

### **2.4 Printing and Designs**

Required markings may be printed by a postage meter or other means that ensures a legible marking. A marking may not include or be part of a decorative design or advertisement. [M012.1.3]

### **2.5 Marking Hazardous Materials**

All mailable hazardous materials must be labeled and/or marked as required in 601.10.0. [M012.1.1]

## 3.0 Endorsement Placement

### 3.1 Endorsements for Delivery Instructions and Ancillary Services

The mailer must place the correct endorsement on each mailpiece to provide delivery instructions (retention period under [507.3.4.4](#) or carrier release under [508.1.2](#)) or to request an ancillary service (forwarding, return, or address correction under [507.1.0, Treatment of Mail](#)), subject to the corresponding standards for use and availability. [M012.4.1]

### 3.2 Return Address

When an ancillary service endorsement is used, a domestic return address must be placed in the upper left corner of the address side of the mailpiece or the upper left corner of the addressing area. If the return address is a multiple delivery address, it must show a unit designator (e.g., an apartment number). [M012.4.2]

### 3.3 Placement of Endorsements

Placement of the endorsement on the mailpiece is determined as follows:

- a. The carrier release endorsement must be placed directly below the return address. If any other endorsement is used, the carrier release endorsement must be separated by the equivalent of one blank line of the type size used.
- b. A retention period specified by the mailer must be placed directly above the return address.
- c. Any ancillary service endorsement (e.g., Address Service Requested, Forwarding Service Requested, Return Service Requested, Change Service Requested) must be placed in one of these four positions:
  1. Directly below the return address.
  2. Directly above the delivery address area (which includes the delivery address block and any related nonaddress elements such as a barcode, keyline, or optional endorsement line).
  3. Directly to the left of the postage area and below or to the left of any rate marking.
  4. Directly below the postage area and below any rate marking. [M012.4.3]

### 3.4 Physical Standards for Endorsements

Endorsements must meet these physical standards:

- a. The type size of the endorsement must be at least 8 points.
- b. The read direction of the endorsement and return address must be the same as the read direction of the delivery address.
- c. The color contrast between the endorsement and the mailpiece background must be kept at a reasonable degree. A brilliant colored background or reverse printing is not permitted.
- d. A clear space of at least 1/4 inch around (above, below, and both sides) the total area containing the endorsement(s) is required. [M012.4.4]

402.4.1

### 4.0 General Barcode Placement for Parcels

#### 4.1 Barcode Location

The address and barcode (see [708.5.0](#)) must be placed squarely onto the largest surface area of the parcel, except when its shape and contents requires specific orientation for stability during processing; then the address and barcode(s) must be placed on the top. The address and barcode label(s) must not overlap any side of the parcel or other label. The barcode should be placed immediately adjacent to the delivery address and at least 1 inch from the edge of the parcel. The delivery address and barcode may be printed on an attachment or enclosure in a window envelope affixed to the parcel, subject to the reflectance standards in [708.5.8](#). The barcode may be placed on a separate label or in an alternate location on the address label, subject to the clearance standards in [4.2](#). Barcodes that are not placed immediately adjacent to the delivery address must not encroach the return address, postage, applicable markings, endorsements, and extra service labels. [C850.3.0]

#### 4.2 Clear Zone

The barcode must be located as specified in [4.1](#). No printing may appear in an area 1/8 inch above and below the barcode. A minimum clear (quiet) zone equal to 10 times the average measured narrow element (bars or space) width must be maintained to the left and right of the barcode. [C850.2.2]

## **430 Discount Parcels First-Class Mail**

433 Rates and Eligibility

434 Postage Payment and Documentation

435 Mail Preparation

436 Enter and Deposit

## 433 Rates and Eligibility

### Overview

- [1.0 Rates and Fees for First-Class Mail](#)
- [2.0 Content Standards for First-Class Mail Parcels](#)
- [3.0 Eligibility Standards for First-Class Mail Parcels](#)

### 1.0 Rates and Fees for First-Class Mail

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Rate Computation for First-Class Parcels

First-Class rates are charged per ounce or fraction thereof; any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 1.2 ounces, the weight (postage) increment is 2 ounces. The minimum postage per addressed piece is that for a piece weighing 1 ounce. [P013.2.3]

#### 1.3 Nonautomation Presorted Rates

Parcels; A nonmachinable surcharge might apply to pieces 1 ounce or less.

| Weight Not Over (ounces) <sup>1</sup> | Presorted |
|---------------------------------------|-----------|
| 1 <sup>2</sup>                        | \$0.352   |
| 2                                     | 0.577     |
| 3                                     | 0.761     |
| 4                                     | 0.986     |
| 5                                     | 1.211     |
| 6                                     | 1.436     |
| 7                                     | 1.661     |
| 8                                     | 1.886     |
| 9                                     | 2.111     |
| 10                                    | 2.336     |
| 11                                    | 2.561     |
| 12                                    | 2.786     |
| 13                                    | 3.011     |

1. For each additional ounce, postage includes \$0.225 for presorted rates. The rates include a \$0.041 discount for presorted parcels weighing more than 2 ounces.

2. Parcels weighing 1 oz. or less are subject to nonmachinable surcharge of \$0.055 per piece.

[R100.9.1]

#### 1.4 Nonmachinable Surcharge

The surcharge per piece for Presorted rate mail is \$0.055. [R100.12.0]

433.1.5

### 1.5 **Presort Mailing Fee**

Presort mailing fee, per 12-month period, per office of mailing: \$150.00. [R100.13.1]

### 1.6 **Computing Postage for First-Class Mail**

Determine single-piece weight and weight (postage) increment for each addressed piece as prescribed in 1.1 and 1.2. For First-Class Mail, affix postage to each piece or, for permit imprint mailings, multiply the number of addressed pieces at each rate increment (and in each rate category, if applicable) by the corresponding postage rate, add the *unrounded* products, and round off the total postage to the nearest whole cent. [P013.6.0]

### 1.7 **Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

## 2.0 Content Standards for First-Class Mail Parcels

### 2.1 **General**

All mailable matter may be sent as First-Class Mail, except Customized MarketMail under 705.1.0 or other matter prohibited by the respective standards. [E110.1.1]

### 2.2 **Written or Typewritten Matter**

Matter wholly or partially in handwriting or typewriting must be mailed as First-Class Mail or Express Mail, except authorized additions to Periodicals, Standard Mail, and Package Services and written or typewritten matter in Library Mail and Media Mail, as permitted by the corresponding standards. [E110.1.2]

### 2.3 **Correspondence**

Matter that has the character of actual and personal correspondence must be mailed as First-Class Mail or Express Mail. [E110.1.4]

### 2.4 **Bills and Statements of Account**

Bills and statements of account must be mailed as First-Class Mail or Express Mail according to these definitions:

- a. A *bill* is a request for payment of a definite sum of money claimed to be owing by the addressee to the sender or a third party. The mere assertion of a debt in a definite sum combined with a demand for payment is sufficient to make the message a bill.
- b. A *statement of account* is the assertion of a debt in a definite amount owed by the addressee to the sender or a third party but does not necessarily contain a request or a demand for payment. The amount may be immediately due or may become due after a certain time or on demand or billing at a later date.

- c. A bill or statement of account must present enough details of a debt to inform the debtor of the amount the debtor must pay to acquit himself or herself of the debt. Neither a bill nor a statement of account need state the precise amount if the bill or statement contains enough information to enable the debtor to determine the exact amount of the claim asserted.
- d. A bill or statement of account does not lose that character just because the amount claimed is not, in fact, owing or may not be legally collectible. [E110.1.5]

## 2.5 Examples of First-Class Mail

These are examples of material that must be mailed at First-Class Mail or Express Mail rates:

- a. Handwritten or typewritten matter, including identical copies prepared by automatic typewriter and manifold or carbon copies of this matter. Handwritten or typewritten matter does not include all matter produced by computers, but computer-prepared material is subject to First-Class postage if it has the character of actual and personal correspondence.
- b. Autograph albums containing writing.
- c. Notebooks or blank books containing written or typewritten entries or stenographic or shorthand notes.
- d. Blank printed forms filled out in writing, such as notices, certificates, and checks, either canceled or uncanceled.
- e. Printed price lists containing written figures changing individual items.
- f. Printed cards or letters bearing a written date, where the date is not the date of the card but gives information about when something is to occur or has occurred.
- g. Any matter marked "Postcard" or "Double Postcard." [E110.1.6]

## 2.6 Postal Inspection

Matter closed against postal inspection includes First-Class Mail and Express Mail. The USPS may open mail other than First-Class Mail or Express Mail to determine whether the proper rate of postage is paid. Material wrapped or packaged so that it cannot be examined easily or examined without destruction or serious damage is closed against postal inspection and is charged the appropriate First-Class Mail or Express Mail rate. [E110.1.3]

## 2.7 Prohibited Air Transportation

All First-Class Mail is subject to limitations for air transportation. Generally, all mailable matter may be transported by aircraft, unless restricted in [601.10.0, Hazardous Materials](#). [E110.2.0]

## 3.0 Eligibility Standards for First-Class Mail Parcels

### 3.1 Basic Standards for First-Class Mail

All pieces of First-Class Mail must:

- a. Meet the basic standards for First-Class Mail in [2.0](#).

### 433.3.2

- b. Weigh 13 ounces or less.
- c. Meet the applicable standards in [433, Rates and Eligibility](#), [434, Postage Payment and Documentation](#), and [604.8.0, Computing Postage](#).
- d. Be part of a single mailing of at least 500 pieces of Presorted First-Class Mail.
- e. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The Move Update standard in [3.4](#).
  2. The ZIP Code accuracy standard in [3.5](#).
  3. If an alternative addressing format is used, the additional standards in [602.3.0](#). [E130.1.1 and E130.3.1]

### 3.2 Nonmachinable Surcharge for Parcel-Size Pieces

Parcels that weigh 1 ounce or less are subject to the nonmachinable surcharge if:

- a. The piece is greater than 1/4 inch thick, or
- b. The length is more than 11-1/2 inches or the height is more than 6-1/8 inches. [C100.4.0]

### 3.3 Presort Mailing Fee

A First-Class Mail presort mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail rates. Payment of one fee allows a mailer to enter mail at all those rates. Persons or organizations paying this fee may enter mail of their clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [E110.4.1]

### 3.4 Move Update Standards

#### 3.4.1 Basic Standards

The Move Update standard is a means of reducing the number of mailpieces in a mailing that require forwarding or return by the periodic matching of a mailer's address records with customer-filed change-of-address orders received and maintained by the USPS. For the purposes of this standard, *address* means a specific address associated with a specific occupant name. Addresses subject to the Move Update standard must meet these requirements:

- a. Each address and associated occupant name used on the mailpieces in a mailing must be updated within 185 days before the mailing date, with one of the USPS-approved methods in [3.4.2](#).
- b. Each individual address in the mailing is subject to the Move Update standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is updated with an approved method (e.g., Address Change Service), the same address may be used during the following 185 days and meets the Move Update standard. [A030.1.1]

- d. Except for mail bearing an alternative address format, addresses used on pieces claiming First-Class Mail Presorted rates, regardless of any required surcharge, must meet the Move Update standard. [A030.1.2]

### 3.4.2 USPS-Approved Methods

The following methods are authorized for meeting the Move Update standard:

- a. Address Change Service (ACS).
- b. [02-03-05] National Change of Address Linkage System (NCOA<sup>Link</sup>).
- c. Mailer Move Update Process Certification and USPS-approved alternative methods for mailers with legitimate restrictions on incorporating USPS-supplied change-of-address information into their mailing lists. The National Customer Support Center (see 608.8.1 for address) administers and approves both Mailer Move Update Process Certification and alternative methods.
- d. Ancillary service endorsements except “Forwarding Service Requested.” [A030.1.4]

### 3.4.3 Mailer Certification

The mailer’s signature on the postage statement certifies that the Move Update standard has been met for each address in the corresponding mailing presented to the USPS. [A030.1.5]

## 3.5 ZIP Code Accuracy

### 3.5.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in 3.4.2.
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming First-Class Mail Presorted rates, regardless of any required surcharge, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

### 3.5.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer’s computer systems or through an authorized service provider.

# 433

## Discount Parcels: First-Class Mail Rates and Eligibility

---

### 433.3.5.3

- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
  2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
  3. Any mailing list service in [507.6.0](#).
  4. An authorized service provider.
  5. CASS-certified matching software.
  6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

#### **3.5.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

## 434 Postage Payment and Documentation

### Overview

- 1.0 Basic Standards for Postage Payment
- 2.0 Postage Payment for Presorted Parcels
- 3.0 Mailing Documentation

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

Postage for discount (presorted) rate First-Class Mail must be paid with affixed postage (604.1.0 for stamps, 604.3.0 for precanceled stamps, or 604.4.0 for metered postage) or permit imprint (604.6.0) as specified in 2.0. A permit imprint may be used for mailings of nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters. [P100.1.1]

### 2.0 Postage Payment for Presorted Parcels

#### 2.1 Payment Methods for Presorted Rates

Presorted First-Class Mail rate postage must be paid with meter stamps under 604.4.0, permit imprints under 604.6.0, or precanceled postage under 604.3.0, subject to the corresponding standards for these methods. All pieces in a mailing must be paid with the same method unless otherwise permitted by standard or Business Mailer Support authorization. [P100.4.1]

#### 2.2 Affixed Postage for Presorted First-Class Mail

Unless permitted by other standards or by Business Mailer Support, USPS Headquarters, when precanceled postage or meter stamps are used, only one payment method may be used in a mailing and each piece must bear postage under one of these conditions:

- a. The full postage at the First-Class Mail rate for which it qualifies (no postage documentation is required).
- b. A precanceled stamp or the full postage at the lowest First-Class first-ounce rate applicable to the mailing job, and full postage on metered pieces for any additional ounce(s) or nonmachinable surcharge; postage documentation may be required by standard.
- c. Postage in an amount not less than the lowest available First-Class first-ounce letter or card rate (as applicable) in the mailing job if authorized by Business Mailer Support, plus full postage on metered pieces for any extra ounce(s); postage documentation may be required by standard. [P100.4.2]

#### 2.3 Additional Postage

Additional postage for pieces not bearing sufficient postage when presented to the USPS must be paid before acceptance either using an advance deposit account or with a meter stamp affixed to the postage statement accompanying the mail. When

434.3.1

the amount of postage affixed is subject to Business Mailer Support authorization under [2.2c](#), credit is not given for postage affixed in excess of the authorized amount. [P100.4.3]

### 3.0 Mailing Documentation

#### 3.1 **Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

#### 3.2 **Basic Documentation Standards**

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and the content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

#### 3.3 **Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

#### 3.4 **Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

#### 3.5 **Standard Format for Documentation**

Documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the rate claimed, or the documentation must be prepared as standardized documentation. Standardized documentation contains the elements described in [708.1.0](#), as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### 3.6 **Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#). [P012.1.5]

**3.7 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

**3.8 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

## 435 Mail Preparation

### Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation for Parcels](#)

### 1.0 General Information for Mail Preparation

#### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

#### 1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system must be prepared as a separate mailing.
- b. Presorted rate and single-piece rate mail must not be part of the same mailing despite being in the same processing category. [M011.1.4]

#### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *5-digit:* the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *3-digit:* the ZIP Code in the delivery address on all pieces begins with the same three digits (see L002, Column A).
- c. *Origin/optional entry 3-digit(s):* the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- d. *ADC:* all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see L004).
- e. *Mixed [ADC]:* the pieces are for delivery in the service area of more than one ADC. [M011.1.2]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. An *origin 3-digit* (or *origin 3-digit scheme*) tray/sack contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray/sack must be prepared for each.
- d. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- e. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location, the post office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- f. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- g. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces. Bundle preparation is described in [435.2.0](#).
- h. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 431 12 forming a First-Class Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. [\[M011.1.3\]](#)

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces. [M011.1.3z]

### 2.2 Bundling Not Required

Bundling is not required if the parcels are 1/2 inch thick or greater and placed in a sack to the same destination to which they would otherwise be bundled (e.g., in a 3-digit sack rather than in a 3-digit bundle). Bundling also is not required if the parcels are so large that 10 or fewer fill a sack. [M130.5.1]

### 2.3 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.4 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.5 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.

435.2.6

- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### **2.6 Bundles With Fewer Than the Minimum Number of Pieces Required**

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

### **2.7 Labeling Bundles**

Unless excepted by standard, the presort level of each bundle must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

### **2.8 Use of Optional Endorsement Lines (OEL)**

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under [708.7.0](#). [M013.1.1]

## 3.0 Sacks

### 3.1 Presort

Presort, presort levels, and standard preparation terms are defined in 1.0. [M033.1.4]

### 3.2 Standard Containers

Mailings must be prepared in green sacks. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2]

### 3.3 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

## 4.0 Sack Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock.
- c. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- d. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes

within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE |
|-------------------------|------|
| Digit                   | D    |
| First-Class Mail        | FCM  |
| General Delivery Unit   | G    |
| Highway Contract Route  | H    |
| Mixed                   | MXD  |
| Post Office Box Section | B    |
| Rural Route             | R    |
| Working                 | WKG  |

[M031.5.0]

### 4.5 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry post office.

[M031.1.4]

### 4.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

### 4.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.

- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3. [M031.1.5]

## 4.8 Barcoded Sack Labels

### 4.8.1 Basic Standards for Barcoded Sack Labels

Barcoded sack labels are not required on Presorted First-Class mailings. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#), *Barcoding Standards for Container Labels*.
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

### 4.8.2 Physical Characteristics of Barcoded Sack Labels

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.2i](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation for Parcels

### 5.1 Basic Standards

Each Presorted First-Class mailing must be prepared in green sacks and marked “Presorted” (or “PRSRT”) and “First-Class.” All pieces must be sorted together and prepared under [5.3](#) and [5.4](#). [M130.1.1]

### 5.2 Single-Rate Pieces Presented With Presorted Mailings

Regardless of the method of postage payment, pieces of single-piece rate First-Class Mail may be presented with and reported on the same postage statement as pieces claimed at presort rates if the single-piece rate pieces are physically separated from other pieces; bear no rate marking, or are marked only “First-Class,” or (if not affixed with full single-piece rate postage) are marked “Single-Piece” or “SNGLP” under [202.3.0](#) in addition to any other marking; and either have additional postage affixed to yield the correct amount on each piece or (if prepared with a corrective rate marking) have all additional postage paid at the time of mailing. [P100.2.5]

### 5.3 Bundling and Labeling

Bundling is generally required before sacking. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Bundling is not required if the parcels are 1/2 inch thick or greater and placed in a sack to the same destination to which they would otherwise be bundled (e.g., in a 3-digit sack rather than in a 3-digit bundle). Bundling also is not required if the parcels are so large that 10 or fewer fill a sack. Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M130.5.1]

### 5.4 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit (required); 10-pound minimum; labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3c](#) for overseas military mail).
  2. Line 2: "FCM PARCELS 5D."
- b. 3-digit (required); 10-pound minimum, except for required origin 3-digit(s); labeling:
  1. Line 1: [L002](#), Column A.
  2. Line 2: "FCM PARCELS 3D."
- c. ADC (required); 10-pound minimum; labeling:
  1. Line 1: [L004](#), Column B.
  2. Line 2: "FCM PARCELS ADC."
- d. Mixed ADC (required); no minimum; labeling:
  1. Line 1: "MXD" followed by city, state, and 3-digit ZIP Code prefix of facility serving 3-digit ZIP Code prefix of entry post office, as shown in [L002](#), Column C.
  2. Line 2: "FCM PARCELS WKG." [M130.5.2]

## 436 Enter and Deposit

### Overview

- [1.0 Deposit](#)
- [2.0 Verification](#)

### 1.0 Deposit

#### 1.1 Service Objective

All First-Class Mail receives expeditious handling and transportation. The USPS follows uniform guidelines for distributing and delivering mail but does not guarantee delivery within the specified time. Local postmasters can provide more information. [D100.1.0]

#### 1.2 Time and Location of Deposit

First-Class Mail paid at the Presorted rate must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing post office except as permitted in [604.4.10](#). Permit imprint mail must be deposited under [604.6.0](#), [705](#), *Advanced Preparation and Special Postage Payment Systems*. [D100.2.2]

#### 1.3 Approved Collections

The USPS may collect Presorted First-Class Mail at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation required for those classes; and:

- Acceptance and verification are done at the customer's facility; or
- Postage is paid with permit imprint under an optional procedure; or
- Postage is paid with meter or precanceled stamps. [D100.2.5]

#### 1.4 Permit Imprint Collection

The USPS does not collect presort mailings from a customer's facility if paid with a permit imprint and not covered by optional procedures. [D100.2.4]

### 2.0 Verification

#### 2.1 USPS Verification and Mailer Correction

Mailings are subject to USPS procedures to verify correct preparation and postage payment. The mailer is responsible for correcting irregularities found in the mailing. If, at the acceptance unit, a mailing is found not to qualify for a Presorted First-Class rate or an automation First-Class rate, the mailer must either take corrective action or pay the full single-piece rate. The return of such mailings to the mailer's facility for any reworking is the mailer's responsibility. [D100.3.1]

#### 2.2 Timeframe for Corrective Action

If a mailer corrects the presort or preparation problems in a metered or precanceled stamped mailing that caused its disqualification when originally presented for acceptance, but cannot resubmit that mailing on the same day, the date shown in

436.2.3

the meter or mailer's precancel postmark must be corrected. The mailer may either re-envelope each piece and reapply postage and request a postage refund or apply a legible ".00" meter impression that includes the correct mailing date. [D100.3.2]

### **2.3 Payment at Single-Piece Rate Rather than Correcting Errors**

A mailer who pays the single-piece First-Class rate rather than correcting errors in a mailing paid with meter or precanceled stamps must pay the difference in cash at the window and present the copy of the cash receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a mailing paid with a permit imprint must correct the postage statement presented with the mailing to show that postage is to be paid at the higher rate. [D100.3.3]

## **440 Discount Parcels Standard Mail**

443 Rates and Eligibility

444 Postage Payment and Documentation

445 Mail Preparation

## 443 Rates and Eligibility

### Overview

- [1.0 Rates and Fees for Standard Mail](#)
- [2.0 Content Standards for Standard Mail Parcels](#)
- [3.0 Basic Standards for Standard Mail Parcels](#)
- [4.0 Rate Eligibility for Standard Mail](#)
- [5.0 Additional Eligibility Standards for Presorted Standard Mail Parcels](#)
- [6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Parcels](#)

### 1.0 Rates and Fees for Standard Mail

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Standard Mail Rate Application

Standard Mail rates are based on the weight of the pieces and are applied differently to pieces weighing less than or equal to 3.3 ounces (0.2063 pound) and those weighing more, as follows:

- a. The appropriate minimum per piece rate applies to any Standard Mail piece that weighs 3.3 ounces or less.
- b. A rate determined by adding the appropriate fixed per piece charge and the corresponding variable per pound charge (based on the weight of the piece) applies to any Standard Mail piece that weighs more than 3.3 ounces.

[P013.4.0]

|                                  | DDU  | ---                    | ---                | 0.453                               | 0.453        | 0.453      |
| +                                |      | +                      | +                  | +                                   | +            |            |
| per piece rate                   |      | 0.428 <sup>5</sup>     | 0.372 <sup>5</sup> | 0.268                               | 0.243        | 0.234      |

1. Per piece rate for presorted parcels includes residual shape surcharge of \$0.23.
2. Per piece rate for ECR parcels includes residual shape surcharge of \$0.20.
3. Use this rate for Customized MarketMail pieces.
4. For pieces weighing more than 3.3 ounces, each piece is subject to both a per piece rate and a per pound rate. Multiply the number of pieces in the mailing by per piece rate. Multiply the number of pounds of the mailing by per pound rate. Add both totals.
5. Presorted machinable parcels for which the residual shape surcharge is paid may be eligible for the barcoded discount of \$0.03 per parcel (see 443.5.5).

| 11   | 6.61                                      |
| 12   | 7.17                                      |
| 13   | 7.74                                      |
| Over 13<br>but under 16                          | 9.52                                      |

1. Weighted fee equals single-piece First-Class Mail or Priority Mail rate multiplied by 2.472. Nonmachinable surcharge may apply.

[R600.8.2]

**1.6 Computing Postage for Standard Mail****1.6.1 Weight**

To compute the total weight of the addressed pieces in a mailing or mailing segment for:

- a. Identical-weight pieces, multiply the computed average weight of a single piece by the corresponding number of pieces; do not round the product.
- b. Nonidentical-weight pieces, add the actual weight of the individual pieces or weigh the entire mailing in bulk; do not round either result. [P013.8.1]

**1.6.2 Determining Single-Piece Weight**

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical weight pieces, weigh a sample group of at least 10 randomly selected pieces and

### 443.1.6.3

divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

#### **1.6.3 Net Postage**

Postage is computed at the applicable rates on the entire mailing to be mailed at one time. The net postage rate that must be paid is either the applicable minimum per piece rate or the piece/pound rate, as reduced by any discounts for which the piece is eligible, and/or as increased by any surcharge to which the piece is subject. The net postage rate is commonly designated by the name of the primary rate category or discount (e.g., Enhanced Carrier Route rate and Presorted rate).

[E610.5.6]

#### **1.6.4 Per Piece and Per Pound Charges**

The per piece charge is computed based on the total number of addressed pieces for each rate category claimed. The minimum rate may apply to each piece as detailed in [1.2, Standard Mail Rate Application](#). Otherwise, the per piece charge must be added to the per pound charge to determine total postage. Where applicable, the per pound charge is computed based on the total weight of the addressed pieces for each rate category claimed, and is added to the per piece charge to determine total postage. For example, a quantity of pieces weighing 100.25 pounds is charged 100.25 times the applicable rate per pound, based on the rate claimed, plus one unit of the applicable per piece charge for each addressed piece. [P013.8.2]

#### **1.6.5 Computing Affixed Postage**

To compute postage to be affixed to each piece, multiply the weight of the piece (in pounds) by the applicable rate per pound; add the applicable per piece charge and any surcharge; and round the sum up to the next tenth of a cent. The applicable minimum per piece charge must be affixed if it is more than the total computed per piece postage. [P013.8.3]

#### **1.6.6 Permit Imprint**

In any permit imprint mailing:

- a. For each rate or rate category, multiply the number of addressed pieces by the corresponding rate per piece and (if applicable) multiply the *unrounded* total weight of the pieces by the corresponding rate per pound; round off each product to four decimal places.
- b. Add the per piece and per pound charges and round off the total postage to the nearest whole cent. [P013.8.5]

## 2.0 Content Standards for Standard Mail Parcels

### 2.1 Definition and Weight

Standard Mail consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals (unless permitted or required by standard) and that weighs less than 16 ounces. [E610.1.1]

**2.2 Postal Inspection**

Standard Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Standard Mail rates constitutes consent by the mailer to postal inspection of the contents. [E610.1.2]

**2.3 Circulars**

Circulars, including printed letters that, according to their contents, are sent in identical terms to more than one person are Standard Mail. A circular does not lose its character as such if a date and the individual names of the addressee and sender are written (handwritten or typewritten) on the circular or written corrections of typographical errors are made on the circular. [E610.2.1]

**2.4 Printed Matter**

Printed matter may be sent as Standard Mail. For this standard, *printed matter* means paper on which words, letters, characters, figures, or images (or any combination of them), not having the character of a bill or statement of account or of actual and personal correspondence, are reproduced by any process other than handwriting or typewriting. [E610.2.2]

**2.5 Computer-Prepared Material**

Computer-prepared material is considered printed matter. Such material is not considered to have the character of actual and personal correspondence merely because it contains:

- a. Specific information about a product (e.g., size, color, price) or a service being offered for sale or lease (e.g., the name, address, and telephone number of a company representative).
- b. Information relating the addressee directly to an advertised product or service being offered for sale or lease.
- c. Information such as the amount paid for a previous purchase, pledge, or donation, when associated with a sales promotion or solicitation for donations. [E610.2.3]

**2.6 Attachments and Enclosures****2.6.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Standard Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E610.4.1]

**2.6.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to Standard Mail merchandise (including books but excluding merchandise samples) without payment of First-Class postage. Incidental First-Class matter may not be enclosed

in or attached to matter mailed as Customized MarketMail under [705.1.0](#). An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared not to encumber postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Standard Mail or Package Services rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E610.4.2]

#### **2.6.3 Nonincidental First-Class Enclosures**

Letters or other pieces of nonincidental First-Class Mail, subject to postage at First-Class Mail rates, may be enclosed with Standard Mail pieces (except matter mailed as Customized MarketMail under [705.1.0](#)). Postage for the First-Class enclosure must be placed on the outside of the piece. It may be affixed separately or added to the postage for the host piece. The endorsement “First-Class Mail Enclosed” must be placed on the piece, below the postage and above the address. [E610.4.3]

#### **2.6.4 Nonincidental First-Class Attachments**

Letters or other pieces of nonincidental First-Class Mail may be placed in an envelope and securely attached to the address side of a Standard Mail piece (except matter mailed as Customized MarketMail under [705.1.0](#)), or of the principal piece, as applicable. Combination envelopes or containers with separate parts for the two classes of mail may be used. The names and addresses of the sender and addressee must be placed on both the principal piece and the attachment. Alternatively, the sender's name and address must be placed on one part and the addressee's name and address on the other. If the piece is a combination container with inseparable parts or compartments, the names and addresses may appear on only one part. The applicable Standard Mail postage for the Standard Mail matter must be prepaid and placed in the upper right corner of the address space. Postage at the applicable First-Class rate must be paid for and affixed to the First-Class attachment, unless other payment methods are permitted by standard. [E610.4.4]

#### **2.6.5 Attachment of Other Standard Mail Matter**

Standard Mail pieces may bear an attachment that is eligible as Standard Mail matter if these additional conditions are met:

- a. The piece bearing the attachment is claimed as Customized MarketMail (CMM) under [705.1.0](#) or as Enhanced Carrier Route Standard Mail under [6.0](#).
- b. The face of the attachment may bear only the rate markings and endorsements permitted for the rate claimed for the host piece.
- c. At the time of mailing, the piece shows only one complete delivery address. If the attachment is a reply card, the address for returning the piece is not visible.
- d. Enhanced Carrier Route host pieces are larger than 6 by 11 inches. CMM host pieces are any size permitted under [705.1.1.3](#), *Physical Standards*.

- e. The attachment is not larger than the host piece and does not extend beyond the host piece. An attachment affixed to a CMM piece may not be greater than 1/4 inch thick at its thickest point.
- f. Each piece in the mailing bears the attachment, and the attachment is of identical size, weight, and positioning on the host piece. Different wording or designs may be used.
- g. The attachment does not interfere with processing or delivery. Folded or multipage attachments must be secured to prevent opening during handling. [E610.4.5]

## 2.7 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E610.3.0]

## 3.0 Basic Standards for Standard Mail Parcels

### 3.1 Basic Standards

Each Standard Mail mailing is subject to these general standards:

- a. All pieces in a mailing must be of the same processing category, except that irregular and machinable parcels may be combined in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets.

### 443.3.2

- b. Each mailing must contain at least 200 pieces or 50 pounds of pieces. See [3.4, Residual Volume Requirement](#), for volume requirement eligibility unique to Presorted Standard rate mailings. Other volume standards also can apply, based on the rate claimed.
- c. All pieces in a mailing must be sorted together and marked under the standards for the rate claimed.
- d. Each piece must bear the addressee's name and delivery address, including the correct ZIP Code or ZIP+4 code, unless an alternative addressing format is used subject to [602.3.0](#). Detached address labels may be used subject to [602.4.0](#).
- e. Postage must be paid under [444.1.0](#) through [444.3.0 in Postage Payment and Documentation](#) with precanceled stamps, meter stamps, or permit imprint.
- f. A postage statement, completed and signed by the mailer, using the correct USPS form or an approved facsimile, must be submitted with each mailing. In addition, mailings must be documented under [444.3.0](#).
- g. Each piece must meet the standards for any other rate or discount claimed.
- h. Any postal routing code barcode on a machinable parcel must be correct for the delivery address and must meet the standards in [708.5.0, Barcoding Standards for Parcels](#).
- i. Mailings must be deposited at a business mail entry unit of the post office where the postage permit or license is held and the annual mailing fee paid, unless deposit elsewhere is permitted by standard. [E610.8.0]

### **3.2 Presort Mailing Fees**

An annual mailing fee must be paid once each 12-month period at each post office of mailing. A mailer paying this fee may enter clients' mail as well as the mailer's own. The mailer whose permit imprint appears on pieces in a mailing paid with a permit imprint must show that permit number on the postage statement and must pay the annual mailing fee for that permit; this fee is in addition to the one-time fee for an application to use permit imprints. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [E610.6.1]

### **3.3 Merging Similar Standard Mailings**

Mailings are subject to the general definitions and conditions in [445.1.0, General Information for Mail Preparation](#). Generally, mailers may merge similar Standard Mail matter into a single mailing. Differences in text, address labels, and address lists or list key numbers do not prohibit the mailer from merging and sorting pieces together. Pieces with different methods of postage payment may be combined in the same mailing only if authorized by Business Mailer Support (BMS). Pieces of nonidentical weight, if merged in the same mailing, must bear the correct postage when mailed, unless otherwise authorized by BMS. [E610.7.0]

### **3.4 Residual Volume Requirement**

Pieces in an Enhanced Carrier Route rate mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted rate mailing, provided that the

Enhanced Carrier Route rate mailing and the Presorted rate mailing are part of the same mailing job. Likewise, pieces in an automation rate mailing that has separately met a 200-piece or 50-pound minimum quantity requirement may be counted toward the minimum quantity requirement for a Presorted rate mailing, provided that the automation rate mailing and the Presorted mailing are part of the same mailing job. Pieces mailed at Presorted Standard Mail rates must not be counted toward the minimum volume requirements for an Enhanced Carrier Route rate or an automation rate mailing. [E620.1.2]

### 3.5 Residual Mail Subject to First-Class or Priority Mail Rates

Pieces prepared as Standard Mail (i.e., that bear Standard Mail rate markings, ACS codes, etc.) that do not qualify for Enhanced Carrier Route, automation, or Presorted Standard Mail rates are subject to the single-piece First-Class or Priority Mail rates as applicable for the weight of the mailpiece. Metered pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail rates and any pieces that do not qualify for Standard Mail rates for which First-Class or Priority Mail service is desired must be re-enveloped or otherwise prepared so that they do not bear Standard Mail markings, endorsements, and ACS codes and must bear the proper First-Class Mail or Priority Mail rate markings and ACS codes. Mailers who have pieces (other than metered pieces weighing over 13 ounces but less than 16 ounces) that do not qualify for Standard Mail rates but that are prepared as Standard Mail and who do not desire to receive First-Class Mail or Priority Mail service for those pieces may enter their mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), provided the requirements in [444.1.0, Basic Standards for Postage Payment](#), are met. [E620.1.3]

### 3.6 ZIP Code Accuracy

#### 3.6.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.6.1d, Basic Standards](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.6.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming the Standard Mail rates must meet the ZIP Code accuracy standard, regardless of any required surcharges. [A030.2.2 and A030.2.3]

#### 3.6.2 USPS-Approved Methods

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
  2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
  3. Any mailing list service in [507.6.0](#).
  4. An authorized service provider.
  5. CASS-certified matching software.
  6. USPS Web site [www.usps.com](http://www.usps.com). [[A030.2.4](#)]

#### 3.6.3 Mailer Certification

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [[A030.2.5](#)]

## 4.0 Rate Eligibility for Standard Mail

### 4.1 General Information

All Standard Mail rates are Presorted rates (including all nonprofit rates). These rates apply to mailings meeting the basic standards in [2.0](#) through [4.0](#) and the corresponding standards for Presorted rates under [5.0](#), Enhanced Carrier Route rates under [6.0](#), or Customized MarketMail rates under [705.1.0](#). Except for Customized MarketMail pieces, destination entry discount rates are available under [446.2.0](#) through [446.5.0](#) in *Enter and Deposit* and barcode discounts are available for machinable parcels under [5.5](#). Nonprofit rates may be used only by organizations authorized by the USPS under [703.1.0](#). Pieces are subject to either a single minimum per piece rate or a combined piece/pound rate, depending on the weight of the individual pieces in the mailing under [4.2](#) or [4.3](#). [[E610.5.1](#)]

### 4.2 Minimum Per Piece Rates

The minimum per piece rates (i.e., the minimum postage that must be paid for each piece) apply as follows:

- a. Basic Requirement. Pieces mailed at Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route rates are subject to minimum per piece rates when they weigh no more than 3.3 ounces (0.2063 pound).
- b. In applying the minimum per piece rates, a mailpiece is categorized as either a letter or a nonletter, based on whether the piece meets the letter-size standard in [201](#), *Physical Standards*, without regard to placement of the address on the

piece. However, if the piece is mailed as a Customized MarketMail piece under [705.1.0](#), the piece is always subject to the applicable Regular or Nonprofit Standard Mail basic nonletter per piece rate and must not exceed the maximum weight for those rates.

- c. Individual Rates. There are separate minimum per piece rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. Except for Customized MarketMail pieces, discounted per piece rates also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [446.2.0](#) through [446.5.0](#) in *Enter and Deposit*. DDU rates are available only for mail entered at Enhanced Carrier Route or Nonprofit Enhanced Carrier Route rates. See [1.0, Rates and Fees for Standard Mail](#), for individual per piece rates. [E610.5.2]

#### **4.3 Piece/Pound Rates**

Pieces that exceed 3.3 ounces (0.2063 pound) are subject to a two-part piece/pound rate that includes a fixed charge per piece and a variable pound charge based on weight. Pieces exceeding 3.3 ounces may not be mailed as Customized MarketMail. There are separate per piece rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route) and within each subclass for the type of mailing and the level of presort within each mailing. There are separate per pound rates for each subclass (Regular, Enhanced Carrier Route, Nonprofit, and Nonprofit Enhanced Carrier Route). Discounted per pound rates also may be claimed for destination entry mailings (destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU)) under [446.2.0](#) through [446.5.0](#) in *Enter and Deposit*. [E610.5.3]

#### **4.4 Residual Shape Surcharge**

Any Standard Mail piece that is prepared as a parcel or is not letter-size under [201](#) or flat-size under [301](#) is subject to a residual shape surcharge. Any piece that is prepared as Customized MarketMail under [705.1.0](#) is also subject to the residual shape surcharge. [E610.5.5]

#### **4.5 Surcharge Cost**

Surcharge per piece for items that are prepared as a parcel or are not letter-size or flat-size:

- a. Presorted Regular and Nonprofit: \$0.23.
- b. Enhanced Carrier Route and Nonprofit Enhanced Carrier Route: \$0.20.  
[R600.6.0]

#### **4.6 Extra Services for Standard Mail**

##### **4.6.1 Available Services**

Only the following extra services may be used with Standard Mail that is eligible under [4.6.2, Eligible Matter](#):

- a. Bulk insurance.
- b. Return receipt for merchandise.

### 443.4.6.2

- c. Delivery Confirmation (electronic option only). [E610.9.1]

#### **4.6.2 Eligible Matter**

Extra services available for Standard Mail may be used only with Standard Mail subject to the residual shape surcharge under [4.4](#). [E610.9.2]

#### **4.6.3 Ineligible Matter**

Extra services may not be used for any of the following types of Standard Mail:

- a. Pieces not subject to the residual shape surcharge.
- b. Machinable parcels mailed using Bulk Parcel Return Service.
- c. Pieces mailed with detached address labels under [602.4.0](#).
- d. Pieces mailed at Enhanced Carrier Route rates.
- e. Pieces mailed as Customized MarketMail. [E610.9.3]

#### **4.6.4 Additional Preparation Requirements**

Any eligible mailpiece with an extra service must bear a return address under [602.1.0](#), *Elements of Addressing*, and an ancillary service endorsement under [507.1.0](#) as follows:

- a. Pieces with bulk insurance or return receipt for merchandise must bear an endorsement that returns any undeliverable-as-addressed piece to the sender. Required endorsements are “Address Service Requested,” “Forwarding Service Requested,” or “Return Service Requested.”
- b. Pieces with Delivery Confirmation must bear one of the required endorsements in [4.6.4a](#) or “Change Service Requested.” [E610.9.4]

## 5.0 Additional Eligibility Standards for Presorted Standard Mail Parcels

### **5.1 Basic Standards**

All pieces in a Regular Standard Mail or Nonprofit Standard Mail Presorted rate mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#).
- b. Except as provided in [3.4](#), *Residual Volume Requirement*, be part of a single mailing of at least 200 addressed pieces or 50 pounds of pieces qualifying for Presorted Standard Mail. Basic rate and 3/5 rate pieces prepared as part of the same mailing are subject to a single minimum volume standard. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  - 1. The ZIP Code accuracy standard in [3.6](#).
  - 2. If an alternative addressing format is used, the additional standards in [602.3.0](#).

3. If merchandise samples are prepared with detached address labels, the additional standards in [602.4.0](#).
- d. Be marked, sorted, and documented as specified in [445.5.0, Preparation for Presorted Parcels](#), and [705.8.0, Preparation for Pallets](#). [E620.1.1]

### 5.2 Rate Application

Presorted rates for Regular and Nonprofit Standard Mail apply to machinable and irregular parcels that meet the eligibility standards in [2.0](#) through [4.0](#) and the preparation standards in [445.5.0, Preparation for Presorted Parcels](#), or [705.8.0, Preparation for Pallets](#). [E620.2.1]

### 5.3 Basic Rate

The basic rate applies to pieces that do not meet the standards for 3/5 rates described in [5.4](#). [E620.2.2]

### 5.4 3/5 Rates

The 3/5 rate applies to qualifying pieces if they are presented:

- a. For machinable parcels (see [401.1.5, Machinable Parcels](#)):
  1. In a 5-digit scheme ([L606](#)), 5-digit, ASF, or BMC sack containing at least 10 pounds of parcels. (The 3/5 rates are available only when all possible 5-digit scheme and 5-digit sacks are prepared.)
  2. On a 5-digit scheme ([L606](#)), 5-digit, ASF, or BMC pallet. (The 3/5 rates are available only when all possible 5-digit scheme and 5-digit pallets are prepared.)
- b. For irregular parcels (see [401.1.6, Irregular Parcel](#)) of uniform thickness and more than 15 inches long or more than 12 inches high in a 5-digit bundle of 10 or more pieces, or in a 3-digit bundle of 10 or more pieces, palletized under [705.8.0](#).
- c. For all other irregular parcels (see [401.1.6, Irregular Parcel](#)) in a 5-digit scheme ([L606](#)), 5-digit, or 3-digit sack containing at least 125 parcels or 15 pounds of parcels. (The 3/5 rates are available only when all possible 5-digit scheme and 5-digit sacks are prepared.)
- d. For commingled machinable and irregular parcels, in a 5-digit scheme ([L606](#)) or 5-digit sack containing at least 10 pounds of parcels. [E620.2.3]

### 5.5 Barcoded Discount for Presorted Standard Mail Parcels

The barcoded discount applies to Presorted rate machinable parcels that are subject to the residual shape surcharge; bear a correct, readable barcode under [708.5.0](#) for the ZIP Code shown in the delivery address; and are prepared as machinable parcels under [445.5.0, Preparation for Presorted Parcels](#), or [705.8.0, Preparation for Pallets](#). Machinable parcels entered at the DSCF rates are eligible for the barcoded discount only if prepared in 5-digit sacks or on 5-digit pallets (i.e., are not prepared in ASF, BMC, or mixed BMC sacks or pallets). Machinable parcels claiming the DBMC rates that are entered at an ASF are not eligible for the barcoded discount except that mail entered at the Phoenix, AZ, ASF may claim the barcoded

discount because that facility uses barcode scanning equipment. Pieces mailed at Enhanced Carrier Route, Nonprofit Enhanced Carrier Route, or Customized MarketMail rates are not eligible for a barcoded discount. [E620.5.0]

## 6.0 Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Parcels

### 6.1 General Enhanced Carrier Route Standards

#### 6.1.1 Optional Preparation

Preparation to qualify for any Enhanced Carrier Route rate is optional and need not be performed for all carrier routes in a 5-digit area. An Enhanced Carrier Route mailing may include pieces at basic, high density, and saturation Enhanced Carrier Route rates. [E630.1.3]

#### 6.1.2 Basic Eligibility Standards

All pieces in an Enhanced Carrier Route or Nonprofit Enhanced Carrier Route Standard Mail mailing must:

- a. Meet the basic standards for Standard Mail in [2.0](#) through [4.0](#).
- b. Be part of a single mailing of at least 200 pieces or 50 pounds of pieces of Enhanced Carrier Route Standard Mail. Regular and Nonprofit mailings must meet separate minimum volumes.
- c. Be sorted to carrier routes, marked, and documented under [445.6.0](#), *Preparation for Enhanced Carrier Route Parcels*, or [705.8.0](#), *Preparation for Pallets*.
- d. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The carrier route accuracy standard in [6.2](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- e. Meet the applicable sequencing requirements in [6.3](#) through [6.5](#) and in [445.6.6](#), *Delivery Sequence Standards*. [E630.1.1]
- f. Enhanced Carrier Route rate mail may not be more than 11-3/4 inches high, 14 inches long, or 3/4-inch thick. *Exception:* Merchandise samples with detached address labels (DALs) may exceed these dimensions if the labels meet the standards in [602.4.0](#), *Detached Address Labels (DAL)*. [E630.1.2]

### 6.2 Carrier Route Accuracy

#### 6.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain rates that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [6.2.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Standard Mail Enhanced Carrier Route rates must meet the carrier route accuracy standard, regardless of any required surcharge. [A030.3.2]

### 6.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#). [A030.3.4]

### 6.2.3 Mailer Certification

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

## 6.3 Basic Rate Enhanced Carrier Route Standards

### 6.3.1 Sequencing

All pieces mailed at basic rates must be prepared in walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (see [445.6.6, Delivery Sequence Standards](#)). [E630.2.1]

### 6.3.2 Basic Rate Discount for Irregular Parcels

Basic rates apply to each piece in a carrier route sack or carton containing at least 125 pieces or 15 pounds of pieces, or in a 5-digit carrier routes sack or carton. DALs must be in carrier route bundles of 10 or more pieces and prepared under [602.4.0](#). [E630.2.4]

## 6.4 High Density Enhanced Carrier Route Standards

### 6.4.1 Basic Eligibility Standards for High Density Rates

All pieces mailed at high density rates must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [445.6.6, Delivery Sequence Standards](#)).

443.6.4.2

- b. Meet the density requirement of at least 125 pieces for each carrier route. Multiple pieces per delivery address can count toward this density standard. Fewer pieces may be prepared for routes with fewer than 125 possible deliveries if a piece is addressed to every possible delivery on the route. [E630.3.1]

### **6.4.2 High Density Rate Discount for Irregular Parcels**

High density rates apply to each piece in a carrier route sack or carton containing at least 125 pieces or 15 pounds of pieces, or in a 5-digit carrier routes sack or carton. DALs must be in carrier route bundles of 10 or more pieces and prepared under [602.4.0](#). [E630.3.5]

## **6.5 Saturation Enhanced Carrier Route Standards**

### **6.5.1 Basic Eligibility Standards for Saturation Rates**

All pieces mailed at saturation rates must:

- a. Be prepared in walk sequence according to schemes prescribed by the USPS (see [445.6.6](#), *Delivery Sequence Standards*).
- b. Meet the density requirement of at least 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses on each carrier route receiving this mail. Pieces bearing a simplified address must meet the coverage standards in [602.3.0](#), *Use of Alternative Addressing*. Multiple pieces per delivery address do not count toward this density standard. [E630.4.1]

### **6.5.2 Saturation Rate Discount for Irregular Parcels**

Saturation rates apply to each piece in a carrier route sack or carton containing at least 125 pieces or 15 pounds of pieces, or in a 5-digit carrier routes sack or carton. DALs must be in carrier route bundles of 10 or more pieces and prepared under [602.4.0](#). [E630.4.5]

# 444 Postage Payment and Documentation

## Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Postage Payment for Presorted and Enhanced Carrier Route Parcels](#)
- [3.0 Mailing Documentation](#)
- [4.0 Residual Pieces](#)

## 1.0 Basic Standards for Postage Payment

### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Postage for Standard Mail must be paid with meter (604.4.0), permit imprint (604.6.0), or precanceled stamps (604.3.0). Postage-affixed pieces must bear the correct postage unless excepted by standard. A permit imprint may be used for mailings that contain nonidentical-weight pieces only if authorized by Business Mailer Support at USPS Headquarters.

[P600.1.1]

## 2.0 Postage Payment for Presorted and Enhanced Carrier Route Parcels

### 2.1 Identical-Weight Pieces

Mailings of identical-weight pieces may have postage affixed to each piece at the exact rate for which the piece qualifies, or each piece in the mailing may have postage affixed at the lowest rate applicable to pieces in the mailing or mailing job. Alternatively, a nondenominated precanceled stamp may be affixed to every piece in the mailing or mailing job, or each piece may bear a permit imprint. If exact postage is not affixed, all additional postage and surcharges must be paid at the time of mailing with an advance deposit account or with a meter strip affixed to the required postage statement. If exact postage is not affixed, documentation meeting the standards in 3.0 must be submitted to substantiate the additional postage unless the pieces are identical weight and separated by rate when presented for acceptance. [P600.2.1]

### 2.2 Nonidentical-Weight Pieces

Postage for nonidentical-weight pieces subject to the minimum per piece rates may be paid by meter stamps, precanceled stamps, or precanceled stamped envelopes. Mailings of nonidentical-weight pieces subject to the piece/pound rates may have postage paid by permit imprint (if the mailer is authorized by Business Mailer Support) or by meter or precanceled stamps (if each piece has the full postage affixed). Alternatively, except for heavy automation and Enhanced Carrier Route letters, the mailer may affix the per piece rate to each piece and pay the pound rate for the mailing through an advance deposit account. Under this alternative, the mailer must provide a postage statement for each payment method and mark each piece "Pound Rate Pd via Permit," in the postage meter indicium or ad plate or other means that ensures a legible endorsement. For mailings of nonidentical-weight

444.2.3

pieces, “nonidentical” must be shown as the weight of a single piece on the applicable postage statement; other entries must be completed as directed.

[P600.2.2]

### **2.3 Combined Rate**

Meter postage may be used for combined rate mailings containing both pieces subject to pound rates and pieces subject to minimum per piece charges. Postage for such mailings may be paid with permit imprint only if authorized by Business Mailer Support. [P600.2.3]

## **3.0 Mailing Documentation**

### **3.1 Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### **3.2 Basic Documentation Standards**

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; reports the result of a process (i.e., presort or barcoding); and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

### **3.3 Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

### **3.4 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

### **3.5 Standard Format for Documentation**

Standard Mail documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the

elements described in 708.1.0, as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

### **3.6 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under 607.2.0. [P012.1.5]

### **3.7 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

### **3.8 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. For example: Part A, lines A5, A6, and total – Part A from Form 3602-R, and Part F, lines F1, F2, and total – Part F from Form 3602-RS, can be consolidated onto a single Form 3602 (Facsimile). Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

## **4.0 Residual Pieces**

### **4.1 Postage Payment for Ineligible Standard Mail**

#### **4.1.1 13 Ounces or Less**

Mailers who have pieces weighing 13 ounces or less that do not qualify for Standard Mail rates but that are prepared as Standard Mail must pay single-piece First-Class Mail postage for such pieces. If mailers do not desire to receive First-Class Mail service for such pieces they may enter the mailpieces “as is” (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.

### 444.4.1.2

- b. Mail bearing metered or precanceled stamp postage must pay the difference between the postage affixed at the Standard Mail rates and the single-piece First-Class Mail rates by means of an advance deposit account or by affixing a meter stamp for the appropriate amount to Form 3600-P. These pieces are reported in Part C on the reverse side of Form 3600-P under the heading "From Standard Mail."
- c. Mail bearing permit imprints must pay the appropriate single-piece First-Class rates by completing Form 3600-R. These pieces are reported in Part C on the reverse side of Form 3600-R under the heading "From Standard Mail." For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job. [P100.2.6]

#### 4.1.2 Over 13 Ounces

Mailers who have permit imprint pieces weighing over 13 ounces but less than 16 ounces that do not qualify for Standard Mail rates but that are prepared as Standard Mail must pay Priority Mail postage for such pieces. Mailpieces paid with meters or permit imprints must re-envelope or otherwise prepare the pieces so that when mailed they bear only the appropriate Priority Mail markings, ancillary service endorsements, and ACS codes and do not bear Standard Mail markings, endorsements, or ACS codes. Mailpieces paid with permit imprints for which mailers do not desire to receive Priority Mail service may enter the mailpieces "as is" (i.e., bearing the Standard Mail markings and endorsements), under the following conditions:

- a. Additional markings and/or postage must not be added to these pieces.
- b. The appropriate Priority Mail rates must be paid by completing Form 3600-PM. The pieces must be recorded on this postage statement on the line titled "Pieces From Standard Mail" in the postage calculation section. For permit imprint mail there must be at least 200 pieces, except when the pieces are part of a larger mailing job and are submitted for acceptance along with the mail and a Standard Mail postage statement for the other pieces in the same mailing job. [P100.3.2]

## 4.2 Postage Payment for Barcoded Machinable Parcels

### 4.2.1 100% Eligible

If 100% of the pieces in a mailing are eligible for the machinable parcel barcoded discount under [443.5.0, Additional Eligibility Standards for Presorted Standard Mail Parcels](#), then the mailing may be paid with meter stamps, permit imprint, or precanceled postage. [P600.4.1]

### 4.2.2 Less Than 100% Eligibility

If less than 100% of the parcels in the mailing are eligible for the machinable parcel barcoded discount, then the following standards apply:

- a. Payment with precanceled stamps is not permitted.
- b. Metered postage may be used only if exact postage is affixed to each piece in the mailing.

- c. Payment with permit imprint is permitted only under a manifest mailing system in [705.2.0](#). [P600.4.2]

# 445 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation for Presorted Parcels](#)
- [6.0 Preparation for Enhanced Carrier Route Parcels](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and, except for certain parcel rates, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Standard Mail. Except as provided in [443.3.4, Residual Volume Requirement](#), the types of Standard Mail listed below may not be part of the same mailing.
  1. Enhanced Carrier Route and any other type of mail.
  2. Enhanced Carrier Route letter rate pieces and Enhanced Carrier Route nonletter rate pieces.
  3. Presorted rate mail and any other type of mail.
  4. Machinable and nonmachinable pieces.
  5. Except as provided by standard, Regular mail may not be in the same mailing as Nonprofit mail, and Enhanced Carrier Route mail may not be in the same mailing as Nonprofit Enhanced Carrier Route mail.
  6. Customized MarketMail and any other type of mail. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *5-digit scheme (pallets and sacks) for Standard Mail parcels*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- d. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- e. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- f. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- g. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- h. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- i. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- j. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- k. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying or working* mail. [[M011.1.2](#)]

### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full* sack is defined in the standards for the class and rate claimed.

- c. A *5-digit scheme sort for Standard Mail parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for rate eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. An *origin 3-digit (or origin 3-digit scheme) sack* contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray/sack must be prepared for each.
- e. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- f. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- g. *Entry [facility] (or origin [facility])* refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- h. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- i. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and

size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces. Bundle preparation is described in 2.0.

- j. A “logical” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Standard Mail “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces. Bundle preparation is described in 2.0. [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

Except as noted in 2.3, all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.

- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

## 2.4 Preparing Bundles in Sacks

Standard Mail prepared in sacks must be secured in bundles as follows:

- a. The maximum weight for all bundles is 20 pounds.
- b. Bundles up to 1 inch in height (thickness) must be secured with appropriate banding, placed at least once around the girth (narrow dimension), or with shrinkwrap. Bundles over 1 inch in height must be secured with at least two bands (plastic bands, rubber bands, or twine/string), one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or two bands.
- c. Bundles should be measured at the lowest (thinnest) point to determine the bundle height.
- d. A bundle that exceeds the maximum prescribed height by less than the thickness of a single piece meets the standard (e.g., if a glossy piece is 0.625 (5/8) of an inch thick, five pieces may be secured in a bundle 3.125 inches high; if a piece with uncoated cover stock is 0.75 (3/4) of an inch thick, 11 pieces may be secured in a bundle 8.25 inches high).
- e. Bundles of pieces with covers of coated stock that are not individually enclosed in a mailing wrapper (e.g., magazines or catalogs with glossy covers not individually enclosed in an envelope, uncoated paper wrapper, or plastic wrapper (polybag)) are subject to these conditions:
  - 1. Except as noted in 2.4e2, bundles must not exceed 3 inches in height (thickness).
  - 2. Bundles of such pieces secured with shrinkwrap plus one or two plastic straps, or with at least two plastic straps, one around the length and one around the girth, must not exceed 6 inches in height (thickness).
- f. Bundles containing pieces with outer surfaces of uncoated stock are subject to these conditions:
  - 1. "Uncoated stock" also refers to pieces with coated covers that are individually enclosed in a cover or mailing wrapper of uncoated stock such as an envelope, sleeve, protective cover, partial wrapper, or polybag and pieces with outer surfaces composed of material other than paper (e.g., plastic, cloth, fiberboard, or metal).
  - 2. Bundles must not exceed 8 inches in height (thickness); however, it is recommended that such bundles not exceed 6 inches in height (thickness). [M020.1.8]

445.2.5

### 2.5 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under [705.8.5.11, Bundles on Pallets](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.6 Pieces With Simplified Address

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder).

Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, and specific weight and height limits in [2.4](#) if placed in sacks.

[M020.2.3]

### 2.7 Bundles With Fewer Than the Minimum Number of Pieces Required

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

## 2.8 Labeling Bundles

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

## 2.9 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under [708.7.0](#). [M013.1.1]

## 2.10 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [2.0](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Enhanced Carrier Route Standard Mail mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

## 2.11 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “STD IRREG LOT CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

## 3.0 Sacks

### 3.1 Standard Containers

Mailings must be prepared in white sacks. Containers for Customized MarketMail are specified in [705.1.0](#). The following additional standards apply:

- a. Palletized mail is also subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2]

### 3.2 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.

445.4.1

- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

## 4.0 Sack Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks; only tray labels may be used for trays. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Weight: 70-pound or heavier stock (optional).
- c. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- d. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack and other information as specified by standards. [M031.1.3]

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels:

| CONTENT TYPE                           | CODE              |
|--|-------------------|
| Carrier Route                          | C (type of route) |
| Carrier Routes                         | CR-RT or CR-RTS   |
| Digit                                  | D                 |
| General Delivery Unit                  | G                 |
| Highway Contract Route                 | H                 |
| Irregular Parcels                      | IRREG             |
| Machinable                             | MACH              |
| Mixed                                  | MXD               |
| Mixed Machinable and Irregular Parcels | MACH & IRREG      |
| Post Office Box Section                | B                 |
| Rural Route                            | R                 |
| Standard Mail                          | STD               |
| Working                                | WKG               |

[M031.5.0]

#### 4.5 **Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

#### 4.6 **Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

#### 4.7 **Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- It may appear below Line 3.

445.4.8

- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.

[M031.1.5]

### 4.8 Barcoded Sack Labels

#### 4.8.1 Basic Standards for Barcoded Sack Labels

Barcoded sack labels are not required on Presorted Standard Mail parcel mailings. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

#### 4.8.2 Physical Characteristics of a Barcoded Sack Label

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#), *Barcode*.
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation for Presorted Parcels

### 5.1 Basic Standards

All mailings and all pieces in each mailing at Regular Standard Mail and Nonprofit Standard Mail nonautomation rates are subject to specific preparation standards in [5.3, Preparation of Machinable Parcels](#), and [5.4, Preparation for Irregular Parcels](#), and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [443.2.0](#) through [443.4.0 in Rates and Eligibility](#) and specific eligibility in [443.5.0](#). Nonprofit Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. Pieces in each mailing must be all machinable parcels or all irregular parcels as defined in [401.1.0](#), unless prepared under [5.3.1](#).
- c. All pieces must meet the applicable general preparation standards in [1.0](#) through [4.0](#), [708.7.0, Optional Endorsement Lines \(OEL\)](#), [708.6.0, Barcoding Standards for Container Labels](#), and [708.6.0, Barcoding Standards for Container Labels](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [5.0](#) or the palletization standards in [705.8.0](#).

- e. Sortation determines rate eligibility as specified in [443.5.0, Additional Eligibility Standards for Presorted Standard Mail Parcels](#). [M610.1.1]

## 5.2 Markings

Subject to the marking standards in [402.2.0, Placement and Content of Markings](#), regular Standard Mail pieces must be marked “Presorted Standard” (or “PRSRT STD”) and Nonprofit Standard Mail pieces must be marked “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”). Regular and Nonprofit Standard Mail pieces must not be marked “ECRLOT,” “ECRWSH,” “ECRWSS,” or “Single-Piece” (or “SNGLP”). [M610.1.1c1]

## 5.3 Preparation of Machinable Parcels

### 5.3.1 5-Digit Sacks

5-digit scheme (optional) and 5-digit sacks containing both machinable and irregular parcels must be prepared under [5.4.2, Bundling and Labeling](#). Any 5-digit scheme (optional) and all possible 5-digit sacks must be prepared in a mailing including pieces claimed at the 3/5 rate. If any 5-digit scheme (optional) and all possible 5-digit sacks are not prepared when there are 10 pounds or more of mail for that destination, the 3/5 rate may not be claimed for any part of the mailing. If the scheme sort is used, it need not be done for all 5-digit scheme destinations. [M610.6.1]

### 5.3.2 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit scheme (optional); 10-pound minimum except under [5.3.1](#); labeling:
  - 1. Line 1: [L606](#), Column B.
  - 2. Line 2: “STD MACH 5D SCHEME” or “STD MACH 5D SCH.”
- b. 5-digit (optional); 10-pound minimum except under [5.3.1](#); labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by correct prefix under [4.0, Sack Labels](#).
  - 2. Line 2: “STD MACH 5D.”
- c. ASF (optional), allowed only for mail deposited at an ASF to claim DBMC rate; 10-pound minimum; labeling:
  - 1. Line 1: [L602](#), Column B. DBMC rate eligibility determined by [Exhibit 446.3.1, BMC/ASF—DMBC Rate Eligibility](#).
  - 2. Line 2: “STD MACH ASF.”
- d. BMC (required); 10-pound minimum; labeling:
  - 1. Line 1: [L601](#), Column B. DBMC rate eligibility determined by [Exhibit 446.3.1, BMC/ASF—DMBC Rate Eligibility](#).
  - 2. Line 2: “STD MACH BMC.”
- e. Mixed BMC (required); no minimum; labeling:
  - 1. Line 1: “MXD” followed by [L601](#), Column B information for BMC serving 3-digit ZIP Code prefix of entry post office.

2. Line 2: "STD MACH WKG." [M610.6.2]

### 5.4 Preparation for Irregular Parcels

#### 5.4.1 Required Bundling

[02-03-05] Except as provided in 5.4.3, *Bundling Exceptions*, and 5.4.5, *Loose Packing*, bundling is required before sacking. A bundle must be prepared when the quantity of addressed irregular parcels for a required presort level reaches the required minimum bundle size. Irregular parcels of nonuniform thickness must be prepared in accordance with 5.4. Irregular parcels of uniform thickness (e.g., printed publications) and exceeding either 15 inches in length or 12 inches in height also must be bundled and sacked in accordance with 5.4 using the alternate labeling lists as specified in 5.4.8, *Sacking and Labeling*, or placed on pallets under 705.8.0. Smaller volumes are not permitted except for mixed ADC bundles and bundles prepared under 5.4.4, *Commingling Irregular Parcel Mailings*. [M610.5.1]

#### 5.4.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M610.5.2]

#### 5.4.3 Bundling Exceptions

Bundling is not required for irregular parcels under any of these conditions:

- a. The parcels are 1/2 inch thick or greater and placed in a sack to the same destination to which they would otherwise be bundled (e.g., in a 3-digit sack rather than a 3-digit bundle).
- b. The parcels are so large that 10 or fewer fill a sack.
- c. The parcels are in a 5-digit scheme or 5-digit sack containing both machinable and irregular parcels. Sacks containing both machinable and irregular parcels may not be prepared to other presort levels. [M610.5.3]

#### 5.4.4 Commingling Irregular Parcel Mailings

Business Mailer Support (BMS) (see 608.8.1 for address) may authorize the commingling of several permit imprint mailings of irregular parcels to achieve a finer presort if the payment of proper postage can be documented. BMS may waive minimum quantity standards for preparation of 5-digit and 3-digit presort destination bundles if doing so results in a finer preparation of at least 50% of the mail. [M610.5.4]

#### 5.4.5 Loose Packing

District managers may authorize loose packing of unbundled irregular parcels to fill Number 3 sacks if no parcels in a sack would be more finely sorted if bundled. Parcels must be faced and packed to remain oriented in transit. The total weight of sacks containing such parcels may not exceed 70 pounds. Requests for loose packing must be made in advance through the post office of mailing. [M610.5.5]

#### 5.4.6 Required Sacking

Except as provided in [5.4.7, Drop Shipment](#), a sack must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, mailers must apply these methods:
  1. Pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum.
  2. Pieces weighing more than 1.92 ounces must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must apply either one of these methods:
  1. The minimum that applies to the average piece weight for the entire mailing is used. The net weight of the mailing is divided by the number of pieces, and the resulting average single-piece weight is used to determine whether the 125-piece or 15-pound minimum applies.
  2. The actual piece count or mail weight for each sack is used, if documentation can be provided with the mailing that shows for each sack the number of pieces and the total weight.
- c. The accompanying postage statement must indicate whether the 125-piece minimum, the 15-pound minimum, or both minimums are applied. [\[M610.5.6\]](#)

#### 5.4.7 Drop Shipment

A mailer using Priority Mail or Express Mail to drop ship Standard Mail irregular parcels may prepare sacks containing fewer than 125 pieces or less than 15 pounds of mail. [\[M610.5.7\]](#)

#### 5.4.8 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit scheme (optional), as applicable:
  1. Irregular parcels: 125-piece or 15-pound minimum; labeling for Line 1, [L606](#), Column B; for Line 2, “STD IRREG 5D SCHEME” or “STD IRREG 5D SCH.”
  2. Commingled machinable and irregular parcels: no minimum; labeling for Line 1, [L606](#), Column B; for Line 2, “STD MACH-IRREG 5D SCH.”
- b. 5-digit (required), as applicable:
  1. Irregular parcels: 125-piece or 15-pound minimum; labeling for Line 1, city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail); for Line 2, “STD IRREG 5D.”
  2. Commingled machinable and irregular parcels: 10-pound minimum; labeling for Line 1, city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail); for Line 2, “STD MACH-IRREG 5D.”
- c. 3-digit (required); 125-piece or 15-pound minimum; labeling:
  1. Line 1: [L002](#), Column A.

445.6.1

2. Line 2: "STD IRREG 3D."
- d. Origin 3-digit(s) (required) and entry 3-digit(s) (optional); one-bundle minimum (for origin or entry); labeling:
  1. Line 1: L002, Column A.
  2. Line 2: "STD IRREG 3D."
- e. ADC (required); 125-piece or 15-pound minimum; labeling:
  1. [02-03-05] Line 1: L603, Column B (recommended use of L004 when sacking pieces of uniform thickness; required use of L004 for such pieces effective May 15, 2005).
  2. Line 2: "STD IRREG ADC."
- f. Mixed ADC (required); no minimum; labeling:
  1. [02-03-05] Line 1: L604, Column B (recommended use of L009 when sacking pieces of uniform thickness; required use of L009 for such pieces effective May 15, 2005).
  2. Line 2: "STD IRREG WKG." [M610.5.8]

## 6.0 Preparation for Enhanced Carrier Route Parcels

### 6.1 Basic Standards

All mailings and all pieces in each mailing at Enhanced Carrier Route Standard Mail and Nonprofit Enhanced Carrier Route Standard Mail nonautomation rates are subject to specific preparation standards in [6.4, Bundling](#), and [6.5, Preparation for Irregular Parcels](#), and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [443.2.0](#) through [443.4.0 in Rates and Eligibility](#) and specific eligibility in [443.6.0, Additional Eligibility Standards for Enhanced Carrier Route Standard Mail Parcels](#). Nonprofit Enhanced Carrier Route Standard Mail must meet the additional eligibility standards in [703.1.0](#).
- b. All pieces in each mailing must be either all machinable parcels or all irregular parcels as defined in [401.1.0](#), unless excepted by standard.
- c. All pieces must meet the applicable general preparation standards in [1.0](#) through [4.0](#), and the following:
  1. Pieces must be sequenced according to [6.6](#) and [6.7](#).
  2. Pieces with a simplified address format must meet the standards in [602.3.0, Use of Alternative Addressing](#).
- d. All pieces in the mailing must meet the specific sortation and preparation standards in [6.0](#) or the palletization standards in [705.8.0](#).
- e. Sortation determines rate eligibility as specified in [443.6.0](#). [M620.1.1]

**6.2 Marking**

Subject to the marking standards in [402.2.0](#), Enhanced Carrier Route Standard Mail pieces must be marked “Presorted Standard” (or “PRSRT STD”), and Nonprofit Enhanced Carrier Route Standard Mail pieces must be marked “Nonprofit Organization” (or “Nonprofit Org.” or “Nonprofit”). All pieces must also be marked “ECRL0T” for basic rate, “ECRWSH” for high density rate, or “ECRWSS” for saturation rate. [M620.1.1c1]

**6.3 Residual Pieces**

Pieces not sorted as a carrier route mailing must be prepared as a separate mailing at Standard Mail automation or Presorted rates. [M620.1.5]

**6.4 Bundling****6.4.1 General Carrier Route Bundle Preparation**

Only carrier route bundles are prepared. [M620.2.1]

**6.4.2 Bundle Preparation**

Bundle size: carrier route; required (10-piece minimum). Carrier route bundle labels are based on the sack level in which placed:

- a. No label is required if the bundle is placed in a correctly labeled carrier route tray or sack.
- b. Bundles in 5-digit carrier routes sacks must have a facing slip unless the pieces in the bundle show a carrier route information line or an optional endorsement line. [M620.2.2]

**6.4.3 Bundles and Sacks With Fewer Than the Minimum Number of Pieces Required**

A bundle with fewer than 10 pieces and a less-than-full a sack with fewer than 125 pieces *and* less than 15 pounds of pieces may be prepared to a carrier route when the saturation rate is claimed for the contents and the applicable density standard is met. [M620.1.3]

**6.5 Preparation for Irregular Parcels****6.5.1 Sack Minimums**

A sack must be prepared when the quantity of mail for a required presort destination reaches either 125 pieces or 15 pounds of pieces, whichever occurs first, subject to these conditions:

- a. For identical-weight pieces, a single-piece weight of 1.92 ounces (0.12 pound) results in 125 pieces weighing 15 pounds. Identical-weight pieces weighing 1.92 ounces (0.12 pound) or less must be prepared using the 125-piece minimum; those that weigh more must be prepared using the 15-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 125-piece or 15-pound minimum applies) or

sack by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.

- c. Mailers must note on the accompanying postage statement whether they applied the 125-piece (“PCS”) or 15-pound (“WT”) threshold or the method in [6.5.1b](#) (“BOTH”). [M620.5.1]

#### **6.5.2 Sacking and Labeling**

Preparation sequence, sack size, and labeling:

- a. Carrier route: required (minimum of 125 pieces/15 pounds).
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
  2. Line 2: “STD IRREG WSS” or “STD IRREG WSH” or “STD IRREG LOT” as applicable, followed by the route type and number.
- b. 5-digit carrier routes: required (no minimum).
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
  2. Line 2: “STD IRREG CR-RTS.” [M620.5.2]

### **6.6 Delivery Sequence Standards**

#### **6.6.1 Basic Standards**

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under [6.0](#) and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards. [M050.1.1]

#### **6.6.2 Missing Addresses**

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.
- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address. [M050.1.2]

#### **6.6.3 Updating Walk Sequence Information—General**

Walk-sequence rate pieces prepared with other than a simplified address format under [6.6.4](#) must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File, Second Generation (DSF<sup>2</sup>).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer. [M050.2.2]

#### 6.6.4 Updating Walk Sequence Information for Simplified Addressing

Walk-sequence rate pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

[M050.2.1]

#### 6.6.5 Out-of-Date Walk Sequence Information

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence rates. [M050.2.3]

#### 6.6.6 Updating Line-of-Travel Sequence Information

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic rates. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing. [M050.2.4]

### 6.7 Delivery Sequence Documentation

#### 6.7.1 General Standards

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF<sup>2</sup> invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer’s bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software. [M050.3.1]

### **6.7.2 High Density**

For each Standard Mail carrier route to which high density rate mail is addressed, the mailer must document the total number of addressed pieces to the route. If there are fewer than 125 addressed pieces for a given route, the documentation also must show the number of possible deliveries on the route. [M050.3.2]

### **6.7.3 Saturation Density—Simplified Address Mail**

For each carrier route to which mail with a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.3]

### **6.7.4 Saturation Density—Other Mail**

For each carrier route to which mail without a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.4]

### **6.7.5 Both Rates**

If a mailing contains pieces qualifying for high density and saturation walk-sequence rates, the documentation required may be combined. Entries for pieces at the high density rate must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing. [M050.3.5]

### **6.7.6 Carrier Route Rate**

If a mailing includes high density and saturation rate and basic carrier route rate pieces, in addition to the applicable information required by 6.7.2 through 6.7.5, the documentation for the basic carrier route rate mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each rate for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route rate must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route rate. [M050.3.6]

# 446 Enter and Deposit

## Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

## 1.0 Presenting a Mailing

### 1.1 Basic Standards for Standard Mail Deposit

Standard Mail must be presented at the post office where the permit or license is held and the presort mailing fee is paid. Mailings must be presented at the locations and times specified by the postmaster. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#).

Plant-loaded mailings must be presented, verified, accepted, and entered as specified by the plant load agreement and applicable standards. Metered Standard Mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). Nonprofit Standard Mail must be presented only at post offices where the organization producing the mailing has an approved nonprofit authorization ([703.1.0](#)). [D600.2.1]

### 1.2 Separation of Mailings

Pieces at different rates (e.g., 3/5 and basic) may be combined in the same mailing as provided in [445.1.0, General Information for Mail Preparation](#). Separate mailings may be reported on the same postage statement if the pieces in the mailings are in the same processing category, are part of the same mailing job, and are presented for verification at the same time. [D600.2.2]

## 2.0 Destination Entry

### 2.1 General

Except for Customized MarketMail pieces as defined in [705.1.0](#), Regular, Nonprofit, Enhanced Carrier Route, and Nonprofit Enhanced Carrier Route Standard Mail pieces meeting the basic standards in [443.5.0, Additional Eligibility Standards for Presorted Standard Mail Parcels](#), may qualify for the destination BMC, SCF, or DDU entry rates, as applicable, if deposited at the correct destination postal facility, subject to the general standards below and the specific standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#). Only one destination reduction may be claimed for each piece. An individual pallet may contain mail claimed at different destination entry rates. [E650.1.1]

### 2.2 Minimum Volume

A destination entry rate Standard Mail mailing is subject to these minimum volume requirements:

### 446.2.3

- a. Each mailing must contain at least 200 addressed pieces or 50 pounds of addressed pieces.
- b. Except as provided in [2.2e](#), each group of pieces prepared for deposit at different destination entry post offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3602 postage statement.
- c. Separate Standard Mail mailings may be copalletized under [705.8.0](#).
- d. Pieces deposited at the same destination entry post office but claimed at different destination entry rates may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry post office is the proper facility for claiming each of the destination entry discounts.
- e. When pieces from different Standard Mail mailings (Presorted, automation, and/or Enhanced Carrier Route) are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3602 and accompanied by Form 3602-C (or a postage statement register) to meet the 200-piece or 50-pound minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 200 pieces or 50 pounds at a single destination entry post office if there is a total of at least 200 pieces or 50 pounds of Presorted rate mail, 200 pieces or 50 pounds of automation rate mail, and/or 200 pieces or 50 pounds of Enhanced Carrier Route mail for all entry points combined for the single presort file listed on Form 3602 and Form 3602-C (or a postage statement register). [E650.1.3]

#### **2.3 Postage Payment**

Postage payment for destination entry mailings is subject to the same standards that apply generally to Standard Mail. Postage and fees are paid to the post office that verifies the mailings. The correct mailing fee(s) must be paid for the current 12-month period at the postal facility where postage is paid for the mailing.

[E650.1.4]

#### **2.4 Office of Mailing**

Unless the mailing is paid and deposited as a metered mail drop shipment (see [705.17.0](#)) or a plant-verified drop shipment (see [705.15.0](#)), mail paid with meter postage, precanceled stamps, or permit imprint must be deposited at the post office that issued the corresponding license or permit, or at the destination bulk mail center serving that post office. Under the latter alternative, only the DBMC rate is available. [E650.1.5]

#### **2.5 Documentation**

No documentation for destination entry discounts is required, although the mailing must be accompanied by the appropriate postage statement. Documentation may be required by other rates or discounts claimed for the same mailing. [E650.1.6]

**2.6 Plant Loads**

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry discounts. [E650.1.7]

**2.7 Verification****2.7.1 Place**

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification either:

- a. At the origin mailer's plant or the origin post office serving the mailer's plant under an authorized plant-verified drop shipment system.
- b. At the destination post office or business mail entry unit. [E650.2.1]

**2.7.2 Mail Separation and Presentation**

Destination entry rate mail must be verified under a PVDS system (705.15.0) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination sectional center facility, or other designated destination postal facility. Only plant-verified drop shipments may be deposited at a destination delivery unit not co-located with a post office or other postal facility having a business mail entry unit. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each mailing must be separated from other mailings for verification. For PVDS, destination entry rate mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.
- c. If Periodicals mail is on the same vehicle as Standard Mail, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- d. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings. [E650.2.2]

**2.7.3 Form 8125**

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying post office. [E650.2.3]

**2.7.4 At BMC**

For a mailing to be verified at a BMC, the post office where the mailer's account or license is held must be within the service area of that BMC. The post office must authorize the BMC to act as its agent by sending Form 4410 to the BMC. [E650.2.4]

**2.7.5 PVDS Seal**

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility. [E650.2.5]

### 2.7.6 Mailer Transport

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility (BMC, SCF, or delivery unit), appropriate to the mailing and the rate claimed. [E650.2.6]

### 2.7.7 Volume Standards

Except as permitted for a local mailer under 2.8.13, destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination rate is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, *mailer* is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).
- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination rate mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments. [E650.2.7]

## 2.8 Deposit

### 2.8.1 Time and Location of Deposit

Each mailing claimed at a destination rate must be deposited at the time and location specified by the USPS. [E650.3.1]

### 2.8.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility. [E650.3.2]

### 2.8.3 Appointments

Appointments must be made for destination entry rate mail as follows:

- a. Except for a local mailer under 2.8.13 and mailings of perishable commodities, appointments for deposit of destination entry rate mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancellations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.

- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often. [E650.3.3]

#### **2.8.4 Advance Scheduling**

Except under [2.8.13, Exception for Local Mailer](#), a mailer must schedule deposit of destination rate mailings at least 24 hours in advance by contacting the proper district or BMC control center or destination delivery unit. Appointments at delivery units must be made by calling the delivery unit at least 24 hours in advance. Appointments for ASFs, SCFs, or for any multistop loads must be made through the USPS district control center. Appointments for BMC loads must be scheduled by the proper BMC control center. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type. [E650.3.4]

#### **2.8.5 Adherence to Schedule**

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units. [E650.3.5]

#### **2.8.6 Redirection by USPS**

A mailer may be directed to transport destination entry rate mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints. [E650.3.6]

#### **2.8.7 Redirection at Mailer's Request**

For service reasons, a mailer may ask to transport destination SCF rate mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF rate in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF. [E650.3.7]

446.2.8.8

### **2.8.8 Recurring Appointments**

*Recurring* refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule. [E650.3.8]

### **2.8.9 Vehicle Unloading**

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs, ASFs, and SCFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At delivery units, the driver must unload all mail within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver is required to unload, unstack, and unstrap them. If a mailer transports palletized mail to a DDU facility that cannot handle pallets, then the driver must unload the pallets into a container specified by the delivery unit.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area. [E650.3.9]

### **2.8.10 Drop and Pick**

Drop and pick service is not available for destination entry Standard Mail. [E650.3.10]

**2.8.11 Demurrage**

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry rate mailings. [E650.3.11]

**2.8.12 Appeals**

Mailers who believe they are denied equitable treatment may appeal to the manager, customer service (district), responsible for the destination postal facility. [E650.3.12]

**2.8.13 Exception for Local Mailer**

The restrictions in [2.7.7, Volume Standards](#), and [2.8.4, Advance Scheduling](#), do not apply when a mailer deposits mailings for verification and acceptance at the local post office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry rates for mailings or portions of mailings deposited at the local post office that meet the standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#). [E650.4.0]

**3.0 Destination Bulk Mail Center (DBMC) Entry****3.1 Definition**

For this standard, *destination bulk mail center (DBMC)* includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) as shown in [Exhibit 3.1](#). [E650.5.1]

446.3.1

### Exhibit 3.1 BMC/ASF—DMBC Rate Eligibility

| ELIGIBLE DESTINATION ZIP CODES   | ENTRY FACILITY                    |
|--|-----------------------------------|
| 005, 068-079, 085-098, 100-119, 124-127  | BMC New Jersey NJ 00102           |
| 010-067, 120-123, 128,129  | BMC Springfield MA 05500          |
| 130-136, 140-149 [Except machinable parcels]   | ASF Buffalo NY 140                |
| 130-136, 140-168, 260-266, 439-447 [Machinable parcels only or machinable parcels combined with bedloaded nonmachinable parcels] | BMC Pittsburgh PA 15195           |
| 150-168, 260-266, 439-447 [Except machinable parcels]  | BMC Pittsburgh PA 15195           |
| 080-084, 137-139, 169-199  | BMC Philadelphia PA 19205         |
| 200-212, 214-239, 244, 254, 267, 268   | BMC Washington DC 20499           |
| 240-243, 245-249, 270-297, 376   | BMC Greensboro NC 27075           |
| 298, 300-312, 317-319, 350-352, 354-368, 373, 374, 377-379, 398, 399   | BMC Atlanta GA 31195              |
| 299, 313-316, 320-342, 344, 346, 347, 349.   | BMC Jacksonville FL 32099         |
| 369-372, 375, 380-397, 700, 701, 703-705, 707, 708, 713, 714, 716, 717, 719-729  | BMC Memphis TN 38999              |
| 250-253, 255-259, 400-418, 421, 422, 425-427, 430-433, 437, 438, 448-462, 469-474  | BMC Cincinnati OH 45900           |
| 434-436, 465-468, 480-497  | BMC Detroit MI 48399              |
| 500-516, 520-528, 612, 680, 681, 683-689   | BMC Des Moines IA 50999           |
| 498, 499, 540-551, 553-564, 566  | BMC Minneapolis/St. Paul MN 55202 |
| 570-577  | ASF Sioux Falls SD 570            |
| 565, 567, 580-588  | ASF Fargo ND 580                  |
| 590-599, 821   | ASF Billings MT 590               |
| 463, 464, 530-532, 534, 535, 537-539, 600-611, 613   | BMC Chicago IL 60808              |
| 420, 423, 424, 475-479, 614-620, 622-631, 633-639  | BMC St. Louis MO 63299            |
| 640, 641, 644-658, 660-662, 664-679, 739   | BMC Kansas City KS 64399          |
| 730, 731, 734-738, 740, 741, 743-746, 748, 749   | ASF Oklahoma City OK 730          |
| 706, 710-712, 718, 733, 747, 750-799, 885  | BMC Dallas TX 75199               |
| 690-693, 800-816, 820, 822-831, 856, 857   | BMC Denver CO 80088               |
| 832-834, 836, 837, 840-847, 898, 979   | ASF Salt Lake City UT 840         |
| 850, 852, 853, 855, 859, 860, 863, 864   | ASF Phoenix AZ 852                |
| 865, 870-875, 877-884  | ASF Albuquerque NM 870            |
| 889-891, 893, 900-908, 910-928, 930-935  | BMC Los Angeles CA 90901          |
| 894, 895, 897, 936-966   | BMC San Francisco CA 94850        |
| 835, 838, 970-978, 980-986, 988-994  | BMC Seattle WA 98000              |

[Exhibit E751.1.3]

**3.2 Eligibility**

Pieces in a mailing that meet the standards in 2.0 and 3.0 are eligible for the DBMC rate when they meet all of the following conditions: 1) are deposited at a BMC or ASF; 2) are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in Exhibit 3.1; and 3) are placed in a sack or pallet (subject to the standards for the rate claimed) that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within the service area of that BMC or ASF (see Exhibit 3.1). DBMC rate mail also must be eligible for Presorted or Enhanced Carrier Route rates, subject to the corresponding standards for those rates. [E650.5.2]

**3.3 Eligibility for ADC Mailpieces**

All pieces in an ADC sack are eligible for the DBMC discount if the ADC facility ZIP Code (as shown on Line 1 of the corresponding container label) is within the service area of the BMC or ASF at which the sack or tray is deposited as shown in Exhibit 3.1. All pieces in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility that is the destination of the bundle (determined by using the "Label To" ZIP Code in Column B of L004) is within the service area of the BMC or ASF at which it is deposited as shown in Exhibit 3.1. [E650.5.3]

**3.4 Eligibility for Mixed ADC Bundles**

Mailpieces in a mixed ADC bundle or sack can qualify for the DBMC rates if the following standards are met:

- a. All pieces in the bundle or sack must destinate within the ASF or BMC service area shown in Exhibit 3.1.
- b. [03-17-05] [02-03-05] Use labeling list L010 when labeling bundles or sacks containing such pieces. For irregular parcels of uniform thickness, effective May 15, 2005, use L009.
- c. Pieces claiming DBMC rates and any mixed ADC not claiming DBMC rates must be prepared in separate mixed ADC bundles or sacks.
- d. Otherwise applicable restrictions (e.g., minimum volume) are excepted when necessary to meet the standards in 3.4. [E650.5.4]

**3.5 Additional Standards for Machinable Parcels**

Additional standards for machinable parcels are as follows:

- a. Destination BMC/ASF Containers. Machinable parcels palletized or sacked may be sorted to destination BMCs or to destination BMCs and ASFs. When machinable parcels are sorted to both destination BMCs and ASFs they qualify for DBMC rates. Except as provided in Exhibit 3.1, sortation of machinable parcels to ASFs is optional but is required for the ASF mail to be eligible for DBMC rates. Mailers may opt to sort some or all machinable parcels for ASF service area ZIP Codes to ASFs *only* when the mail will be deposited at the respective ASFs where the DBMC rate is claimed, under applicable volume standards, using L602; otherwise, mailers must sort machinable parcels only to destination BMCs under L601. If machinable parcels are sorted under L601, only mail for 3-digit ZIP Codes served by a BMC as listed in Exhibit 3.1 is eligible

446.3.6

for DBMC rates (i.e., mail for 3-digit ZIP Codes served by an ASF in [Exhibit 3.1](#) is not eligible for DBMC rates, nor is mail for 3-digit ZIP Codes that do not appear on [Exhibit 3.1](#)).

- b. Mixed BMC Containers. Pieces in mixed BMC sacks or on mixed BMC pallets that are sorted to the origin BMC under [705.8.0, Preparation for Pallets](#), or [445.5.0, Preparation for Presorted Parcels](#), are eligible for the DBMC rates if both of the following conditions are met: 1) the mixed BMC sack or pallet is entered at the origin BMC facility to which it is labeled; and 2) the pieces are for 3-digit ZIP Codes listed as eligible destination ZIP Codes for that BMC in [Exhibit 3.1](#). [E650.5.5]

### 3.6 Vehicles

Mailings deposited at a DBMC must be presented in vehicles compatible with BMC dock and yard operations. [E650.5.6]

### 3.7 Form 4410

Mailings may be deposited at the DBMC only if that facility is authorized (by Form 4410) to act as acceptance agent for the entry post office (i.e., where the meter license, precanceled stamp permit, or permit imprint authorization is held). Form 4410 is not required for plant-verified drop shipments. [E650.5.7]

## 4.0 Destination Sectional Center Facility (DSCF) Entry

### 4.1 Definition

For this standard, *destination sectional center facility (DSCF)* refers to the facilities listed in [L002](#), Column C, and [L006](#), Column C. [E650.6.1]

### 4.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [4.0](#) are eligible for the DSCF rate when deposited at a DSCF, addressed for delivery within that facility's service area, and placed in other than an ADC, AADC, mixed ADC or BMC sack or pallet (as permitted by the standards for the rate claimed) that is labeled to that DSCF or to a postal facility within its service area. Pieces prepared under [2.0, Destination Entry](#), and [4.0](#) and that are prepared in 5-digit bundles placed in a merged 5-digit sack or pallet or in a merged 5-digit scheme sack or pallet that is deposited at the destination delivery unit as defined in [5.1](#) are eligible for the DSCF rate. DSCF rate mail may also be eligible for a presort or automation discount, subject to the corresponding standards. [E650.6.2]

### 4.3 Vehicles

Mailings deposited at a DSCF must be presented in vehicles that are compatible with SCF dock and yard operations. [E650.6.3]

## 5.0 Destination Delivery Unit (DDU) Entry

### 5.1 Definition

For this standard, *destination delivery unit (DDU)* refers to the facility designated by the USPS district drop shipment coordinator (for automation rate Standard Mail) or the facility (post office, branch, station, etc.) where the carrier cases mail for delivery to the addresses on pieces in the mailing (for other Standard Mail). [E650.7.1]

### 5.2 Eligibility

Pieces in a mailing that meet the standards in [2.0](#) and [5.0](#) are eligible for the DDU rate when deposited at a DDU, addressed for delivery within that facility's service area (carrier routes), and placed in properly prepared and labeled carrier route bundles sorted to carrier route sacks (irregular parcels), and otherwise eligible for and claimed at a carrier route rate. Pieces for which the DDU discount is claimed must also be eligible for and claimed at either the carrier route or a walk-sequence rate. No other rates or discounts are available. A mailing that contains copies claimed at the DDU rates may include pieces claimed at other destination entry discounts and pieces for which no destination discount is claimed, subject to the standard for separation in [2.7.2](#). [E650.7.2]

## **450 Discount Parcels Parcel Post**

453 Rates and Eligibility

454 Postage Payment and Documentation

455 Mail Preparation

456 Enter and Deposit

## 453 Rates and Eligibility

### Overview

- 1.0 Parcel Post Rates and Fees
- 2.0 Content Standards for Parcel Post
- 3.0 Rate Eligibility Standards for Parcel Post

### 1.0 Parcel Post Rates and Fees

#### 1.1 Rate Application for Parcel Post

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece and on the zone to which the piece is addressed. The Parcel Post rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per piece is the 1-pound rate.

[P013.5.1 and P013.5.2]

#### 1.2 Inter-BMC/ASF Machinable and Nonmachinable Parcel Post

For Inter-BMC Machinable and Nonmachinable Parcel Post rates, see:

- a. [Exhibit 1.2a. Parcel Post Inter-BMC/ASF Single Piece Rates](#) for single-piece rates.
- b. [Exhibit 1.2b. Parcel Post Inter-BMC/ASF OBMC Presort](#) for OBMC Presort discount.
- c. [Exhibit 1.2c. Parcel Post Inter-BMC/ASF BMC Presort](#) for BMC Presort discount.

[R700.1.1 and R700.1.2]

#### 1.3 Local and Intra-BMC/ASF Machinable and Nonmachinable Parcel Post

See [Exhibit 1.3 Parcel Post Local and Intra-BMC/ASF](#). [R700.1.3 and R700.1.4]

#### 1.4 Parcel Select—DBMC, DSCF, and DDU

See [Exhibit 1.4 Parcel Select—DBMC, DSCF, and DDU](#).

[R700.1.5, R700.1.6, R700.1.7]

#### 1.5 Destination Entry Mailing Fee

Destination entry mailing fee for Parcel Select, per 12-month period: \$150.00.

[R700.5.1]

#### 1.6 Pickup Fees

Parcel Post only, per occurrence: \$12.50.

May be combined with Express Mail and Priority Mail pickups (see [507.5.0, Pickup Service](#)). [R700.5.2]

- For parcels that destinate to different BMC service areas (see 153.1.1).
- Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
- Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
- Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 must pay the nonmachinable rate.
- Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

**Exhibit 1.2a. Parcel Post Inter-BMC/ASF Single Piece Rates**

| Weight Not Over (pounds) | Machinable <sup>1, 2, 3, 4</sup>                     |     |     |     |     |     |     | Nonmachinable <sup>1, 2, 4, 5</sup> |         |         |         |         |         |         |

| Oversized                | ---  | --- | --- | --- | --- | --- | --- | 41.70                               | 46.73   | 54.12   | 65.84   | 79.69   | 92.81   | 120.72  |

1. For parcels that destinate to different BMC service areas (see 153.1.1).
2. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
3. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
4. Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 must pay the nonmachinable rate.
5. Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

[R700.1.1 and R700.1.2]

1. For parcels that destinate to different BMC service areas (see [453.3.1](#)).
2. All rates include an OBMC Presort discount of \$1.17 per parcel.
3. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
4. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
5. Regardless of weight, a parcel that meets any of the criteria in [DMM 401.2.3.2](#) must pay the nonmachinable rate.
6. Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

1. For parcels that destinate to different BMC service areas (see 453.3.1).
2. All rates include an OBMC Presort discount of \$1.17 per parcel.
3. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
4. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
5. Regardless of weight, a parcel that meets any of the criteria in DMM 401.2.3.2 must pay the nonmachinable rate.
6. Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

- For parcels that destinate to different BMC service areas (see [453.3.1](#)).
- All rates include a BMC Presort discount of \$0.28 per parcel.
- Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
- Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
- Regardless of weight, a parcel that meets any of the criteria in DMM [401.2.3.2](#) must pay the nonmachinable rate.
- Rates include the \$2.75 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

1. For parcels that originate and destinate in the same BMC service area.
2. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
3. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
4. Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 (for retail) or 401.2.3.2 (for discount) must pay the nonmachinable rate.
5. Rates include the \$1.35 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

| Oversized                | ---  | --- | --- | --- | --- | 23.78                               | 34.47  | 34.79   | 35.48   | 36.53   |

1. For parcels that originate and destinate in the same BMC service area.
2. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates regardless of weight.
3. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50-piece minimum).
4. Regardless of weight, a parcel that meets any of the criteria in DMM 101.7.2 (for retail) or 401.2.3.2 (for discount) must pay the nonmachinable rate.
5. Rates include the \$1.35 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

[R700.1.3 and R700.1.4]

1. Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates (regardless of weight).
2. Regardless of weight, a parcel that meets any of the criteria in DMM 401.2.3.2 must pay the nonmachinable rate.
3. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel.
4. Rates include the \$1.09 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.
5. Rates include the \$1.45 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

- Parcels that measure in combined length and girth:
  - More than 84 inches but not more than 108 inches, and the piece weighs less than 15 pounds, use 15-pound rates (balloon rate).
  - More than 108 inches but not more than 130 inches, use oversized rates (regardless of weight).
- Regardless of weight, a parcel that meets any of the criteria in DMM 401.2.3.2 must pay the nonmachinable rate.
- Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel.
- Rates include the \$1.09 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.
- Rates include the \$1.45 nonmachinable surcharge. The nonmachinable surcharge does not apply to parcels mailed at oversized rates or parcels sent with special handling.

[R700.1.5, R700.1.6, R700.1.7]

### 1.7 Computing Postage for Parcel Post and Parcel Select

#### 1.7.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

#### 1.7.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any surcharges or discounts) and, if applicable, the zone to which the piece is addressed, as shown in 1.1 through 1.5. To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece. [P013.9.2]

#### 1.7.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent. [P013.9.1]

## 2.0 Content Standards for Parcel Post

### 2.1 Definition of Parcel Post

Parcel Post is a subclass of Package Services. Any Package Services matter may be mailed at Parcel Post rates. [E711.1.0]

### 2.2 Basic Content Standards

Parcel Post is a subclass of Package Services and consists of mailable matter that is neither mailed or required to be mailed as First-Class Mail or Customized MarketMail under 705.1.0 nor entered as Periodicals (except as permitted under 2.3 or permitted or required under 707.7.9). [E710.1.1]

### 2.3 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at Parcel Post rates. Postage at Parcel Post rates is based on the combined weight of the host piece and the sample copies enclosed.

### 2.4 Postal Inspection

Parcel Post mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Parcel Post rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

## 2.5 Attachments and Enclosures

### 2.5.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Parcel Post piece or in an envelope marked “Invoice Enclosed” and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

### 2.5.2 Incidental First-Class Attachments and Enclosures

Incidental First-Class matter may be enclosed in or attached to any Parcel Post piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Parcel Post rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

### 2.5.3 Additional Enclosures

Parcel Post (including Parcel Select) may contain any printed matter mailable as Standard Mail, in addition to the enclosures and additions listed in 2.5 and 2.6. [E711.2.1]

## 2.6 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender’s and the addressee’s names, occupations, and addresses, preceded by “From” or “To,” and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.

- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

### 3.0 Rate Eligibility Standards for Parcel Post

#### 3.1 Parcel Post and Parcel Select Rate Eligibility

There are five Parcel Post (including Parcel Select) rate categories: Intra-BMC, Inter-BMC, destination bulk mail center (DBMC), destination sectional center facility (DSCF), and destination delivery unit (DDU). Destination entry rates are named Parcel Select (see [456.2.0](#)). Intra-BMC and Inter-BMC Parcel Post rates and DBMC Parcel Select rates are calculated based on the zone to which the parcel is addressed and the weight of the parcel. DSCF and DDU Parcel Select rates are calculated based on the weight of the parcel. Requirements for Parcel Post rates and discounts are as follows:

- a. Intra-BMC rates apply to all Parcel Post that originates and destines in the service area of the same BMC or ASF. Intra-BMC rates also apply to Parcel Post that originates and destines in the same state for Alaska and Hawaii and in the same territory for Puerto Rico. See [Exhibit, 3.1 BMC/ASF Service Areas](#). Nonmachinable pieces ([401.2.3.2](#)) mailed at Intra-BMC rates are subject to a nonmachinable surcharge in addition to postage.
- b. Inter-BMC rates apply to all Parcel Post that originates in the service area of a BMC or ASF or in Alaska, Hawaii, or Puerto Rico and destines outside that area, state, or territory. Nonmachinable pieces ([401.2.3.2](#)) mailed at Inter-BMC rates are subject to a nonmachinable surcharge in addition to postage.
- c. Parcel Post for which OBMC Presort, BMC Presort, and barcoded discounts are claimed and Parcel Post that is mailed at a destination entry rate (Parcel Select-DBMC, -DSCF, -DDU ([456.2.0](#), [Parcel Select](#))) must be part of a mailing of 50 or more Parcel Post rate pieces. Eligibility for one of those rates or discounts does not require a separate 50 qualifying pieces per rate or per discount. Eligibility for more than one of those rates or discounts in the same Parcel Post mailing is possible, provided there are a total of at least 50 pieces of mail qualifying for any or all Parcel Post rates in the mailing and all other preparation and eligibility requirements for the rates or discounts are met.
- d. The BMC Presort per piece discount applies to pieces of Inter-BMC Parcel Post sorted to BMC destinations under [L601](#) for machinable pieces and sorted to BMC and ASF destinations for nonmachinable pieces under [L605](#). To qualify, machinable pieces must be placed in pallet boxes on pallets, and

nonmachinable pieces must be placed directly on pallets under [705.8.0](#). The mail must be entered at a postal facility that is not a BMC and must be part of a mailing containing 50 or more Parcel Post rate pieces.

- e. The origin bulk mail center (OBMC) Presort per piece discount applies to pieces of Inter-BMC Parcel Post sorted to BMC destinations under [L601](#) for machinable pieces and sorted to BMC and ASF destinations for nonmachinable pieces under [L605](#). To qualify, machinable pieces must be placed in pallet boxes on pallets; and nonmachinable pieces must be placed directly on pallets under [705.8.0](#). The mail must be entered at a BMC listed in [L601](#) and must be part of a mailing containing 50 or more Parcel Post rate pieces.
- f. The barcoded discount applies to Parcel Post (including Parcel Select) machinable parcels ([401.1.5](#)) that bear a correct, readable barcode under [705.5.0](#) for the ZIP Code of the delivery address; are part of a mailing of 50 or more Parcel Post (including Parcel Select) rate pieces; are not mailed at the DSCF or DDU rates; and, if claiming the DBMC rates, are not entered at an ASF. An exception is that properly prepared machinable pieces of DBMC rate mail entered at the Phoenix, AZ, ASF may claim the barcoded discount because that facility uses barcode scanning equipment.
- g. The oversized rate applies to pieces that measure over 108 inches but not more than 130 inches in combined length and girth.
- h. Items that weigh less than 15 pounds but measure more than 84 inches in combined length and girth are charged a minimum rate equal to that for a 15-pound parcel for the zone to which it is addressed (balloon rate). [[E711.2.2](#)]

### 3.2 Fees

Parcel Post mail is subject to these fees, as applicable:

- a. A mailing fee for Parcel Select must be paid once each 12-month period at each post office of mailing by or for any person or organization that mails at the destination entry rates, except as provided otherwise for plant-verified drop shipments. All destination entry rates are covered under the payment of a single annual fee. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.
- b. The Parcel Post pickup fee must be paid every time pickup service is provided, subject to the corresponding standards in [507.5.0](#). [[E711.2.3](#)]

### 3.3 Delivery and Return Addresses

All Parcel Post mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address. [[E710.3.1](#)]

### 3.4 Parcel Select

See [456.2.0](#) for Parcel Select eligibility, preparation, and deposit standards.

### Exhibit 3.1 BMC/ASF Service Areas

| SERVICE AREA         | ZIP CODE AREAS SERVED   |
|----------------------|---|
| <b>BMC</b>           |   |
| New Jersey           | 005, 068-079, 085-098, 100-119, 124-127   |
| Springfield          | 010-067, 120-123, 128, 129  |
| Philadelphia         | 080-084, 137-139, 169-199   |
| Pittsburgh           | 150-168, 260-266, 439-447   |
| Washington           | 200-212, 214-239, 244, 254, 267, 268  |
| Greensboro           | 240-243, 245-249, 270-297, 376  |
| Cincinnati           | 250-253, 255-259, 400-418, 421, 422, 425-427, 430-433, 437, 438, 448-462, 469-474 |
| Atlanta              | 298, 300-312, 317-319, 350-352, 354-368, 373, 374, 377-379, 398, 399.             |
| Jacksonville         | 299, 313-316, 320-342, 344, 346, 347, 349.  |
| Memphis              | 369-372, 375, 380-397, 700, 701, 703-705, 707, 708, 713, 714, 716, 717, 719-729   |
| St. Louis            | 420, 423, 424, 475-479, 614-620, 622-631, 633-639                                 |
| Detroit              | 434-436, 465-468, 480-497   |
| Chicago              | 463, 464, 530-532, 534, 535, 537-539, 600-611, 613                                |
| Minneapolis/St. Paul | 498, 499, 540-551, 553-564, 566   |
| Des Moines           | 500-516, 520-528, 612, 680, 681, 683-689  |
| Kansas City          | 640, 641, 644-658, 660-662, 664-679, 739  |
| Denver               | 690-693, 800-816, 820, 822-831, 856, 857  |
| Dallas               | 706, 710-712, 718, 733, 747, 750-799, 885   |
| Seattle              | 835, 838, 970-978, 980-986, 988-994   |
| Los Angeles          | 889-891, 893, 900-908, 910-928, 930-935   |
| San Francisco        | 894, 895, 897, 936-966  |
| <b>ASF</b>           |   |
| Buffalo              | 130-136, 140-149  |
| Fargo                | 565, 567, 580-588   |
| Sioux Falls          | 570-577   |
| Billings             | 590-599, 821  |
| Oklahoma City        | 730, 731, 734-738, 740, 741, 743-746, 748, 749                                    |
| Salt Lake City       | 832-834, 836, 837, 840-847, 898, 979  |
| Phoenix              | 850, 852, 853, 855, 859, 860, 863, 864  |
| Albuquerque          | 865, 870-875, 877-884   |
| <b>Other</b>         |   |
| Puerto Rico          | 006-009   |
| Hawaii               | 967-969   |
| Alaska               | 995-999   |

[Exhibit E711.2.2]

## 454 Postage Payment and Documentation

### Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

### 1.0 Basic Standards for Postage Payment

#### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Parcel Post mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone and same combination of rates (e.g., all are zone 4, Inter-BMC, with a BMC presort discount and a barcoded discount). Identical-weight permit imprint mail also may be mailed under [705.2.0](#) through [705.4.0](#) in *Advanced Preparation and Special Postage Payment Systems*. [P700.1.1]

#### 1.2 Postage Payment

Postage payment for Parcel Select DBMC, DSCF, and DDU rate mail is subject to the same standards that apply generally to Parcel Post. Except for plant-verified drop shipments (see [705.15.0](#)) or metered mail drop shipment (see [705.17.0](#)), the mailer must have a meter license or permit imprint authorization at the destination facility parent post office for mailings deposited for entry at a DBMC or ASF, at a destination sectional center facility, or at the parent post office of a destination delivery unit. Postage and fees are paid to the post office that verifies the mailings. The mailer must ensure that Form 8125 accompanies all plant-verified drop shipments. [E751.1.5]

### 2.0 Mailing Documentation

#### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 2.2 Documentation

Parcel Post mailings must be documented as follows:

- a. Postage Statement. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each bulk mailing (a mailing that includes pieces qualifying for rates that require a 50-piece minimum volume requirement).
- b. Other Documentation. When presented for acceptance, documentation of postage by entry office and presort level (e.g., by BMC for DBMC, OBMC Presort and BMC Presort mail and by 5-digit ZIP Code for DSCF and DDU rates) is required under [705.2.0](#) through [705.4.0](#) in *Advanced Preparation and Special Postage Payment Systems*. Except for DSCF rate mail palletized under the alternate preparation option that requires separate documentation, other documentation is not required when the correct rate is affixed to each piece, or when each piece is of identical weight and the pieces are separated by zone and within each zone are grouped by pieces subject to the same combination of rates. DSCF rate mail palletized under the alternate preparation option in [705.8.0](#) must submit the detailed documentation required in [705.8.19.2](#).  
[M710.1.5]

### 2.3 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

### 2.4 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

### 2.5 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

### 2.6 Providing Additional Information

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607](#). [P012.1.5]

**2.7 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

**2.8 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

# 455 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Sacks](#)
- [3.0 Sack Labels](#)
- [4.0 Preparation for Parcel Post](#)
- [5.0 Standards for Barcoded Discounts](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

A mailing is a group of pieces within the same class of mail and, except for certain parcel rates, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together. [M011.1.4]

### 1.3 Terms for Presort Level

Terms used for presort levels are defined as follows:

- a. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. *5-digit scheme (pallets and sacks) for Standard Mail parcels and Package Services parcels*: the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- c. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- d. *Mixed [BMC, etc.]*: the pieces are for delivery in the service area of more than one BMC, etc.
- e. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

#### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. A *5-digit scheme sort for Parcel Post parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for rate eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- e. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- g. An *overflow sack for Parcel Select (Parcel Post) DSCF rate mail* is a 5-digit scheme or 5-digit sack prepared with fewer than seven pieces after all other sacks for that same 5-digit scheme or 5-digit ZIP Code area are prepared with seven or more pieces per sack as required by [4.0, Preparation for Parcel Post](#). If all of the mail is sacked under [4.0](#), only one overflow sack is permitted for each 5-digit scheme or 5-digit ZIP Code. If a mailing is prepared on pallets, remaining pieces of Parcel Post mail may be prepared in one or more 5-digit scheme or 5-digit overflow sacks only after one or more 5-digit scheme or

5-digit pallets are prepared to meet the minimum pallet requirement specified in 705.8.0. Pieces in overflow sacks qualify for the Parcel Select (Parcel Post) DSCF rates.

- h. An *overflow pallet in a Parcel Select (Parcel Post) DSCF rate mailing* is a 5-digit scheme or 5-digit pallet containing pieces that remain after one or more 5-digit scheme or 5-digit pallets have been prepared to meet the minimum pallet requirement specified in 705.8.0. Only one overflow pallet per 5-digit scheme or 5-digit ZIP Code area is permitted for Parcel Select (Parcel Post) DSCF rate mail palletized under 705.8.0. Pieces on overflow pallets qualify for the DBMC rates.
- i. A *“logical” presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. [M011.1.3]

## 2.0 Sacks

### 2.1 Maximum Weight

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.1.1]

## 3.0 Sack Labels

### 3.1 Basic Standards

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 3.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 3.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.

### 455.3.4

- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 3.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE  |
|-------------------------|---|
| Carrier Route           | C (type of route)   |
| Carrier Routes          | CR-RT or CR-RTS   |
| Digit                   | D   |
| General Delivery Unit   | G   |
| Highway Contract Route  | H   |
| Irregular Parcels       | IRREG   |
| Machinable              | MACH  |
| Mixed                   | MXD   |
| Nonbarcoded             | NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under <a href="#">705.9.0</a> ) |
| Package Services        | PSVC  |
| Parcels                 | PARCELS   |
| Post Office Box Section | B   |
| Rural Route             | R   |
| Scheme                  | SCH   |
| Working                 | WKG   |

[M031.5.0]

**3.5 Line 3 (Office of mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**3.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**3.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**3.8 Barcoded Sack Labels****3.8.1 Basic Standards for Barcoded Sack Labels**

Barcoded labels are not required for Parcel Post. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

**3.8.2 Physical Characteristics of Barcoded Sack Labels**

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).

455.4.1

- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 4.0 Preparation for Parcel Post

### 4.1 Basic Standards

#### 4.1.1 General

All mailings at Parcel Post rates are subject to these general standards:

- a. Each mailing must meet the applicable standards in [401](#), [402](#), [453](#), [455](#) and [456](#).
- b. All pieces that are palletized must be prepared under [705.8.0](#).
- c. There are no presort, sacking, or labeling standards for single-piece rate Parcel Post. [M710.1.1]

#### 4.1.2 Parcel Post Marking

Marking requirements for Parcel Post are as follows:

- a. Destination Entry Rate Mail. Each piece mailed at a DBMC, DSCF, or DDU Parcel Post rate must bear the marking "Parcel Post" (or "PP") or "Parcel Select" in the postage area as described under [402.2.2.1](#). If "Parcel Select" is shown in the postage area, then no other marking is required. If "Parcel Post" (or "PP") is shown in the postage area, then the additional marking "Drop Ship" (or "D/S"), or "Parcel Select," or both, must be placed on each piece in either the postage area or the address area (as described under [402.1.3](#)) to indicate that the piece was entered at a destination entry rate.
- b. Other Parcel Post Mail. Pieces must bear the marking "Parcel Post" (or "PP") in the postage area as described under [402.2.2.1](#). [M710.1.2]

#### 4.1.3 Separation

Except for mail entered at DSCF or DDU rates (which are not zoned rates), Parcel Post pieces must be separated by zones when presented for acceptance unless either the correct postage is affixed to each piece or the mailing is prepared under [4.1.4, \*Commingled Zones\*](#), or the mailing is presented under a special postage payment system under [705.2.0, \*Manifest Mailing System \(MMS\)\*](#), [705.3.0, \*Optional Procedure \(OP\) Mailing System\*](#), or [705.4.0, \*Alternate Mailing System \(AMS\)\*](#). If DSCF sacks prepared under [4.5.2](#) are included in the same mailing as DSCF pallets prepared under [705.8.19.1e.](#), then at the time of acceptance the mailer must separate the sacks that are overflow from palletized mail from those sacks that were prepared under the provisions of [4.5.2](#). [M710.1.3]

#### 4.1.4 Commingled Zones

Zoned Parcel Post pieces need not be separated by zones when presented for verification, other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented under either of the following:

- a. [705.2.0, Manifest Mailing System \(MMS\)](#), or [705.4.0, Alternate Mailing System \(AMS\)](#); or
- b. All of these conditions:
  1. A unique number is assigned to each sack/pallet in the mailing and printed on a separate line at the top of the sack/pallet label (above the Line 1 information).
  2. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to sacks/pallets in the mailing, that shows the post office where the mail is to be entered (entry post office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement(s), the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each sack/pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for sacks/pallets containing mail for only one zone must show the sack/pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the sack/pallet. Entries for sacks/pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the sack/pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage. [M710.1.4]

#### 4.2 Basic Standards for BMC Presort

The BMC Presort per piece discount applies to pieces of Inter-BMC Parcel Post sorted to BMC destinations under [L601](#) for machinable pieces and sorted to BMC and ASF destinations for nonmachinable pieces under [L605](#). To qualify, machinable pieces must be placed in pallet boxes on pallets, and nonmachinable pieces must be placed directly on pallets under [705.8.0](#). The mail must be entered at a postal facility that is not a BMC and must be part of a mailing containing 50 or more Parcel Post rate pieces. [E711.2.2]

#### 4.3 Basic Standards for OBMC Presort

The origin bulk mail center (OBMC) Presort per piece discount applies to pieces of Inter-BMC Parcel Post sorted to BMC destinations under [L601](#) for machinable pieces and sorted to BMC and ASF destinations for nonmachinable pieces under [L605](#). To qualify, machinable pieces must be placed in pallet boxes on pallets; and nonmachinable pieces must be placed directly on pallets under [705.8.0](#). The mail must be entered at a BMC listed in [L601](#) and must be part of a mailing containing 50 or more Parcel Post rate pieces. [E711.2.2]

#### 4.4 Parcel Select—DBMC Rates

For DBMC rates, see [456.2.2.2, DBMC Rates](#). [E751.1.3]

### 4.5 Parcel Select—DSCF Rates

#### 4.5.1 General

To qualify for DSCF rates, pieces must be for the same SCF area under [L005](#) and must be prepared as follows:

- a. Sorted to optional 5-digit scheme destinations under [L606](#), Column B, and 5-digit destinations, either in sacks or directly on pallets or in pallet boxes. Pieces must be part of a mailing of at least 50 Parcel Post pieces. They must be entered at the designated SCF under [L005](#) that serves the 5-digit ZIP Code destinations of the pieces except when palletized and entry is required at a BMC (see [Exhibit 456.2.6, BMC Deposit of DSCF Rate Pallets](#)). The DSCF rate is not available for palletized mail for facilities that are unable to handle palletized mailings. Refer to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see [608.8.1](#)) and Exhibits [456.2.7, Delivery Facility Exceptions to the "Majority of City Carriers" Rule](#), and [456.2.8, Delivery Facilities Different From Those in the Drop Shipment Product](#), to determine if the facility serving the 5-digit destination can handle pallets. There is a charge for the Drop Shipment Product.
- b. Any remaining nonmachinable parcels (as defined in [401.2.3.2](#)) sorted to 3-digit ZIP Code prefixes in [L002](#), Column C. Machinable parcels may not be sorted to the 3-digit level. [[M710.2.1](#)]

#### 4.5.2 Sacking and Labeling

Sacking requirements for DSCF rates are as follows:

- a. Only 5-digit scheme and 5-digit sacks are permitted.
- b. Each 5-digit scheme and 5-digit sack must contain a minimum of seven pieces. Machinable and nonmachinable pieces may be combined in the same sack to meet this requirement. One overflow sack per 5-digit ZIP Code is permitted (no piece minimum).
- c. 5-digit scheme sack labeling: Line 1, use [L606](#), Column B; for Line 2, "PSVC PARCELS 5D SCH."
- d. 5-digit sack labeling: Line 1, use city, state, and 5-digit ZIP Code on mail (see [3.3](#) for overseas military mail); for Line 2, "PSVC PARCELS 5D."
- e. 3-digit nonmachinable sack labeling: Line 1, use [L002](#), Column A; for Line 2, "PSVC IRREG 3D."
- f. See [705.8.0](#) for option to place 5-digit scheme and 5-digit DSCF sacks and 3-digit nonmachinable sacks on an SCF pallet. [[M710.2.2](#)]

### 4.6 Parcel Select—DDU Rates

The requirements for DDU rates are as follows:

- a. For the DDU rate, pieces must be part of a mailing of at least 50 Parcel Post pieces.
- b. The pieces must be entered by the mailer at the postal facility where the carrier delivers the parcels (delivery unit) as defined in [456.2.1](#).

- c. There are no minimum sacking or pallet preparation standards. DDU rate mailings may be bedloaded, sacked, placed directly on pallets, or placed in pallet boxes on pallets. Machinable and nonmachinable pieces may be combined in the same sack or on the same pallet (including pallet boxes on pallets).
- d. If the delivery unit serves more than one 5-digit ZIP Code, the pieces must be separated by 5-digit ZIP Code when unloaded, unless prepared as optional 5-digit scheme sacks or pallets. Refer to the Drop Shipment Product available from the National Customer Support Center (see [608.8.1](#)) and [Exhibit 456.2.7, Delivery Facility Exceptions to the “Majority of City Carriers” Rule](#), and [Exhibit 456.2.8, Delivery Facilities Different From Those in the Drop Shipment Product](#), to determine the location of the delivery unit, whether it serves more than one 5-digit ZIP Code, and whether it can handle pallets. There is a charge for the Drop Shipment Product.
- e. Sacked mail must be labeled as follows:
  - 1. 5-digit scheme: Line 1, [L606](#); Line 2, “PSVC PARCELS 5D SCH.”
  - 2. 5-digit: Line 1, city, state, and 5-digit ZIP Code on mail (see [3.3c](#) for overseas military mail); Line 2, “PSVC PARCELS 5D.” [[M710.3.0](#)]

## 4.7 Optional Machinable Parcel Preparation

### 4.7.1 Basic Standards

Mailers may opt to prepare Parcel Post machinable parcels in sacks under [4.7.2](#) or on pallets under [705.8.0](#). Pieces must be separated by zones when presented to the USPS unless either the correct postage is affixed to each piece or the mailing is prepared under [4.1.4, Commingled Zones](#). [[M710.4.1](#)]

### 4.7.2 Sack Preparation

Sack size, preparation sequence, and Line 1 labeling:

- a. 5-digit scheme: optional (minimum of 10 pieces or 20 pounds); for Line 1, use [L606](#), Column B.
- b. 5-digit: required (minimum of 10 pieces or 20 pounds); for Line 1, use city, state and 5-digit ZIP Code destination of pieces (see [3.3c](#) for military mail).
- c. ASF: optional; allowed only for mail deposited at an ASF to claim the DBMC rate (minimum of 10 pieces or 20 pounds); for Line 1, use [L602](#), Column B. [Exhibit 456.2.2.2](#) determines DBMC rate eligibility.
- d. BMC: required (minimum of 10 pieces or 20 pounds); for Line 1, use [L601](#), Column B. [Exhibit 456.2.2.2](#) determines DBMC rate eligibility.
- e. Mixed BMC: required (no minimum); for Line 1, use “MXD” followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code prefix of the entry post office. [[M710.4.2](#)]

### 4.7.3 Sack Line 2

Line 2:

- a. 5-digit scheme: “PSVC MACH 5D SCHEME” or “PSVC MACH 5D SCH.”
- b. 5-digit: “PSVC MACH 5D.”

455.5.1

- c. ASF: "PSVC MACH ASF."
- d. BMC: "PSVC MACH BMC."
- e. Mixed BMC: "PSVC MACH WKG." [M710.4.3]

## 5.0 Standards for Barcoded Discounts

### 5.1 Standards for Barcoded Mail

The barcoded discount applies to Parcel Post (including Parcel Select) machinable parcels (401.1.5) that bear a correct, readable barcode under 708.5.0 for the ZIP Code of the delivery address; are part of a mailing of 50 or more Parcel Post (including Parcel Select) rate pieces; are not mailed at the DSCF or DDU rates; and, if claiming the DBMC rates, are not entered at an ASF. An exception is that properly prepared machinable pieces of DBMC rate mail entered at the Phoenix, AZ, ASF may claim the barcoded discount because that facility uses barcode scanning equipment. [E711.2.2]

# 456 Enter and Deposit

## Overview

- [1.0 Verification and Deposit](#)
- [2.0 Parcel Select](#)

## 1.0 Verification and Deposit

### 1.1 Verification and Entry

All presorted destination entry and barcoded discount mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#). Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). [D700.2.2]

### 1.2 Office of Mailing

Parcel Post must be mailed at the post office from which the zone rate postage was computed, except under [1.3](#) and [1.4](#). [E710.2.1]

### 1.3 Redirected Mailings

A mailer who presents large mailings of zoned Parcel Post mail may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original post office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage.
- c. Postage for pieces claimed at the Parcel Post Intra-BMC local zone rates must be recomputed at the applicable zone rate for the alternative postal facility. Postage also may be recomputed for other pieces that are ineligible for the Parcel Post Intra-BMC local zone rates but could become eligible at the postal facility to which the mailing is redirected. [E710.2.2]

### 1.4 BMC Acceptance

A mailer may present Parcel Post at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent post office, or permit imprint postage is paid through an advance deposit account at the BMC parent post office or another post office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent post office.

456.1.5

- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry post office. [E710.2.3]

### 1.5 Drop Shipment Information

Essential information for entering drop shipment Parcel Post mailings at specific postal facilities can be found in the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#) for address). There is a charge for the Drop Shipment Product. [D700.2.4]

## 2.0 Parcel Select

### 2.1 Definitions

Parcel Select is destination entry Parcel Post. Destination entry discounts apply to Parcel Post mailings prepared as specified in [705.8.0, Preparation for Pallets](#), and [455.4.0, Preparation for Parcel Post](#), and addressed for delivery within the service area of a destination bulk mail center, sectional center facility, or delivery unit where they are deposited by the mailer. For this standard, the following destination facility definitions apply:

- a. A destination bulk mail center (DBMC) includes all bulk mail centers (BMCs) and auxiliary service facilities (ASFs) under [L601](#) and [L602](#), and designated sectional center facilities (SCFs) under [2.5, Acceptance at Designated SCF](#).
- b. A destination sectional center facility (DSCF) includes all facilities listed under [L005](#). Mail that is prepared on pallets for 5-digit ZIP Codes listed in [Exhibit 2.6, BMC Deposit of DSCF Rate Pallets](#), must be entered at the BMC shown in the exhibit instead of at the SCF serving the 5-digit ZIP Codes of the delivery addresses appearing on mailpieces unless an exception has been granted under [2.2.3a, DSCF and DDU Rates](#). Those 5-digit machinable parcels not required to be entered at a BMC under [Exhibit 2.6, BMC Deposit of DSCF Rate Pallets](#), and all 3-digit nonmachinable parcels sorted to the 3-digit level and claimed at the DSCF rate must be deposited at an SCF listed in [L005](#).
- c. A destination delivery unit (DDU) is a facility that delivers to the addresses appearing on the deposited pieces in a destination entry rate Parcel Post mailing. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#) for address) to determine the location of a 5-digit delivery facility. There is a charge for the Drop Shipment Product. When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility from which the majority of city carrier routes are delivered as the facility at which the DDU mail must be entered, unless the 5-digit ZIP Code is listed in [Exhibit 2.7, Delivery Facility Exceptions to the "Majority of City Carriers" Rule](#), or [Exhibit 2.8, Delivery Facilities Different From Those in the Drop Shipment Product](#). [L606](#) is used only for mailings prepared using the optional 5-digit scheme sort. [E751.1.1]

## 2.2 Rate Eligibility for Parcel Select Rates

### 2.2.1 Basic Standards

For Parcel Select rates, pieces must meet the applicable standards in [2.0](#) and the following criteria:

- a. Pieces may be bedloaded, on pallets, in pallet boxes on pallets, in sacks, or in other authorized containers as specified in [2.3](#) through [2.6](#) in *Parcel Select*, depending on the facility at which the pieces are deposited.
- b. Pieces may not be plant-loaded.
- c. Pieces must be part of a single mailing of 50 or more pieces that are eligible for and claimed at any Parcel Post rate. When Parcel Post mailings are submitted under PVDS procedures, mailers may use the total of all line items for all destinations on a PVDS register or PVDS postage statement to meet the 50-piece minimum volume requirement for destination entry rate mailings. This means that a mailer may enter fewer than 50 pieces at an individual destination, provided there is a total of at least 50 Parcel Post pieces for all of the entry points for that single mailing job listed on the PVDS register or PVDS postage statement.
- d. Pieces must be deposited at a destination BMC or destination ASF or other equivalent facility, destination SCF, or destination delivery unit, as applicable for the rate claimed and as specified by the USPS.
- e. Pieces must be addressed for delivery within the ZIP Code ranges that the applicable entry facility serves. [E751.1.2]

### 2.2.2 DBMC Rates

For DBMC rates, pieces must meet the applicable standards in [2.1](#) through [2.6](#) and the following:

- a. Pieces must be part of a Parcel Post mailing that is deposited at a BMC or ASF under [L601](#) or [L602](#).
- b. Except as provided in [Exhibit 2.2.2, BMC/ASF—DBMC Rate Eligibility](#), pieces deposited at each BMC or ASF must be addressed for delivery within the ZIP Code range of that facility.
- c. Pieces must be within a ZIP Code eligible for DBMC rates under [Exhibit 2.2.2](#), and if sacked or palletized must be prepared in accordance with [455.4.0, Preparation for Parcel Post](#), and [705.8.0, Preparation for Pallets](#). Mail meeting the additional criteria in [2.5](#) may be deposited at an SCF. [E751.1.3]

[Exhibit E751.1.3]

### 2.2.3 DSCF and DDU Rates

For DSCF and DDU rates, pieces must meet the applicable standards in [2.1](#) through [2.6](#) and the following criteria:

- a. For DSCF rates, be part of a mailing of parcels sorted to 5-digit scheme or 5-digit destinations and deposited at a designated SCF under [L005](#) (or at a BMC under [Exhibit 2.6, BMC Deposit of DSCF Rate Pallets](#)); addressed for delivery within the ZIP Code service area of that SCF under [L005](#); and prepared under [455.4.0, Preparation for Parcel Post](#), or [705.8.0, Preparation for Pallets](#). Nonmachinable parcels sorted to 3-digit ZIP Code prefixes and claimed at a DSCF rate must be entered at a designated SCF under [L005](#) and are subject to the nonmachinable surcharge. For 5-digit ZIP Code areas listed under [Exhibit 2.6, BMC Deposit of DSCF Rate Pallets](#), mail prepared on pallets must be entered at the corresponding BMC facility shown in that Exhibit (not at the SCF) unless an exception is requested 15 days in advance of the mailing in writing and granted by the Area Manager, Operations Support, having jurisdiction over the BMC and SCF. Exceptions, if granted, will be for a limited time. Mailers must not prepare mail on pallets (including pallet boxes on pallets) for the DSCF rate if the 5-digit delivery facility is unable to handle pallets. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)) to determine which 5-digit delivery facilities can handle pallets (including pallet boxes on pallets). There is a charge for the Drop Shipment Product. When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility where the majority of city carrier routes are located for purposes of determining if the delivery facility can handle pallets, unless the 5-digit ZIP Code is listed in [Exhibit 2.7, Delivery Facility Exceptions to the "Majority of City Carriers" Rule](#), or [Exhibit 2.8, Delivery Facilities Different From Those in the Drop Shipment Product](#). For ZIP Codes in [Exhibit 2.7](#) and [Exhibit 2.8](#) use the name of the facility associated with the 5-digit ZIP Code on the respective exhibit along with the Drop Shipment Product to determine if pallets may be prepared for one of those 5-digit areas.
- b. For DDU rates, be part of a Parcel Post mailing prepared in accordance with [455.4.0, Preparation for Parcel Post](#), or [705.8.0, Preparation for Pallets](#), and deposited at a designated DDU facility that delivers parcels to the addresses appearing on the pieces. There is no required minimum number of pieces that must be deposited for the DDU rate and no specific preparation requirements; however, the pieces must be part of a mailing of at least 50 Parcel Post rate pieces and must be prepared by 5-digit scheme (optional) and 5-digit sorts. To determine the location for entry of 5-digit scheme sorted pieces, use Column B of [L606](#). To determine the location for entry of 5-digit sorted pieces or whether a 5-digit delivery facility can handle pallets (and pallet boxes), refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)). There is a charge for the Drop Shipment Product. When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility from which the majority of city carrier routes are delivered as the facility at which the DDU mail must be entered and to determine whether that facility can handle pallets,

### 456.2.2.4

unless the 5-digit ZIP Code is listed in [Exhibit 2.7, Delivery Facility Exceptions to the "Majority of City Carriers" Rule](#), or [Exhibit 2.8, Delivery Facilities Different From Those in the Drop Shipment Product](#). For ZIP Codes in [Exhibit 2.7](#) and [Exhibit 2.8](#) use the name of the facility associated with the 5-digit ZIP Code on the respective exhibit as the facility at which DDU mail must be entered for that 5-digit ZIP Code. This facility name should be used along with the Drop Shipment Product to determine if that facility can handle pallets. If a DDU facility cannot handle pallets, and a mailer transports mail to the DDU facility on pallets, the driver will have to unload the pallets into a container specified by the delivery unit. [E751.1.4]

#### **2.2.4 Postage Payment**

Postage payment for DBMC, DSCF, and DDU rate mail is subject to the same standards that apply generally to Parcel Post. Except for plant-verified drop shipments (see [705.15.0](#)) or metered mail drop shipment (see [705.17.0](#)), the mailer must have a meter license or permit imprint authorization at the destination facility parent post office for mailings deposited for entry at a DBMC or ASF, at a destination sectional center facility, or at the parent post office of a destination delivery unit. Postage and fees are paid to the post office that verifies the mailings. The mailer must ensure that Form 8125 accompanies all plant-verified drop shipments. [E751.1.5]

#### **2.2.5 BMC as Agent**

The DBMC may act as acceptance agent only for its parent post office (see [Exhibit 2.2.5](#)) and only if authorized by Form 4410 for each mailer depositing DBMC entry rate mail. [E751.1.6]

**Exhibit 2.2.5 BMC/ASF Parent Post Office**

| <b>FACILITY</b>        | <b>PARENT POST OFFICE</b>    | <b>ZONE CHART</b> |
|------------------------|------------------------------|-------------------|

[Exhibit E751.1.6]

**2.3 Preparation for Parcel Select****2.3.1 Bedloaded Parcels**

A mailer may present bedloaded DBMC parcels if the mailer's vehicle has a road-to-bed height of 50 ( $\pm 2$ ) inches. If applicable, the mail to be entered at different destinations must be separated to prevent mixing of mailings for deposit at different destinations. DBMC rate mailings may be bedloaded for deposit at BMCs/ASFs and

### 456.2.3.2

DDU rate mailings may be bedloaded for deposit at DDUs. Refer to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see [608.8.1](#) for address) to determine dock requirements for a DDU facility. (There is a charge for the drop shipment product.) [E751.2.1]

#### **2.3.2 Containers**

DBMC rate mailings (if not bedloaded), DDU rate mailings (if not bedloaded), and all DSCF rate mailings must be prepared as follows:

- a. Machinable parcels for which a DBMC, DSCF, or DDU rate is claimed must be sacked under [455.4.0, Preparation for Parcel Post](#), or prepared on pallets under [705.8.0](#).
- b. For DBMC rate, nonmachinable parcels that each weigh 35 pounds or less must be sacked under [455.4.0, Preparation for Parcel Post](#), if the parcels do not contain perishables and the size of the parcels allows a sack to hold at least two pieces. DBMC rate nonmachinable parcels that cannot be sacked in this manner or that weigh more than 35 pounds must be transported as outside (unsacked) pieces. If authorized in advance by the USPS, DBMC rate nonmachinable parcels may be palletized.
- c. For DSCF rate, if sacked under [455.4.0, Preparation for Parcel Post](#), must contain at least seven pieces per sack. If the sack is overflow from a 5-digit scheme, 5-digit, or 3-digit sack that contains at least seven pieces, then a sack may contain fewer than seven pieces. For DSCF rate, if sacked under [705.8.0](#) as overflow from a 5-digit scheme, 5-digit, or 3-digit pallet that meets the applicable pallet minimum, may contain any number of pieces. Machinable and nonmachinable pieces may be included in the same sack.
- d. For DSCF rate, 5-digit scheme, 5-digit, and 3-digit sacks may be bedloaded or be placed on SCF pallets that are labeled and otherwise prepared under [705.8.0](#).
- e. For DSCF rate and DDU rate, nonmachinable parcels may be palletized (including pallet boxes on pallets). Nonmachinable parcels may be combined with machinable parcels on 5-digit scheme, 5-digit, and 3-digit pallets (including pallet boxes on pallets) claimed at DSCF or DDU rates under [705.8.0](#).
- f. For DDU rate, there are no minimums for sacks, pallets, or pallet boxes on pallets. DDU rate mail must be separated by 5-digit scheme and 5-digit (even if bedloaded) and, if placed in sacks or on pallets (including boxes on pallets), it must be properly labeled to the 5-digit scheme or 5-digit destination. Machinable and nonmachinable pieces may be combined in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets (including pallet boxes). [E751.2.2]

## **2.4 Deposit for Parcel Select**

### **2.4.1 Mailer Transport**

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility (BMC, SCF, or delivery unit), appropriate to the mailing and the rate claimed. [E751.3.0]

### 2.4.2 Freight

Drop shipments are freight until deposited and accepted as mail at the destination facility. The mailer may request use of a numbered PVDS band seal to secure mailer vehicles transporting plant-verified drop shipments. [E751.4.1]

### 2.4.3 Mail Separation and Presentation

Destination entry rate mail must be verified under a PVDS system (705.15.0) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination sectional center facility, or other designated destination postal facility. Only PVDS mailings may be deposited at a destination delivery unit not co-located with a post office or other postal facility having a BMEU. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each piece of DBMC, DSCF, or DDU rate Parcel Post must be marked "Parcel Post" or "Parcel Select."
- b. Separation by zone for DBMC rate mailings is required only for permit imprint mailings of identical-weight pieces that are not mailed using a postage payment system under 705.2.0, *Manifest Mailing System (MMS)*, 705.3.0, *Optional Procedure (OP) Mailing System*, or 705.4.0, *Alternate Mailing System (AMS)*, or not mailed under 455.4.1.4, *Commingled Zones*.
- c. Each mailing must be separated from other mailings for verification. For PVDS, destination entry rate mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.
- d. Mail must be separated from freight transported on the same vehicle.
- e. If Periodicals mail is on the same vehicle as Parcel Post, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- f. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings. [E751.4.2]

### 2.4.4 BMC as Agent

The DBMC may verify and accept mail if authorized by Form 4410 to act as agent for the parent post office where the mailer's account or license is held. [E751.4.3]

### 2.4.5 Appointments

Appointments must be made for destination entry rate mail as follows:

- a. Except for local mailers, for mailings of perishable commodities (601.9.0) under 2.4.6, *Exception to Scheduling Standard*, appointments for deposit of destination entry rate mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one day in advance. Same day appointments may be granted by a control center on the basis of a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to thirty (30) calendar days prior to a desired appointment date. Mailers must comply with the scheduled mail deposit time

### 456.2.4.6

and location. The mailer must cancel any appointment by notifying the appropriate control center at least a day in advance of a scheduled appointment time.

- b. Electronic appointments may be made by mailers/agents using a USPS-issued computer logon ID. Electronic appointments or cancelations must be made at least 12 hours prior to the desired time and date. All information required by the USPS appointment system regarding a mailing must be furnished.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, a mailer must notify the DDU at least a day in advance of a scheduled appointment. Recurring (standing) appointments will be allowed if shipment frequency is weekly or more often. [E751.4.4]

#### **2.4.6 Exception to Scheduling Standard**

Exceptions are as follows:

- a. The scheduling standard in [2.4.5, Appointments](#), does not apply when a mailer deposits mailings for verification and acceptance at the local post office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment system authorization. Under this exception, the mailer may claim the DBMC rates for mailings or portions of such mailings deposited at the local post office if the local post office is the DBMC/ASF or designated SCF that meets the application standards.
- b. Exceptions to the scheduling standard are made for shipments of products recognized by the Postal Service as perishables under [601.9.0](#). While an appointment is not required for shipments of perishables, the destination facility must be notified at least 24 hours in advance of deposit to facilitate timely handling of the load.
- c. No appointment is required for shipments containing 100% Periodicals mail, nor is notification to the destination facility of their arrival required. An advance notice of 24 hours is recommended to facilitate the development of facility unloading schedules. [E751.4.5]

#### **2.4.7 Redirection by USPS**

A mailer may be directed to transport destination entry rate mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints. [E751.4.6]

#### **2.4.8 Advance Scheduling**

A mailer must schedule deposit of destination rate mailings at least 24 hours in advance by contacting the proper district, BMC control center, or destination delivery unit. Appointments at delivery units must be made by calling the delivery unit at least 24 hours in advance. Appointments for ASFs, SCFs, or for any multistop loads must be made through the USPS district control center. Appointments for BMC loads must be scheduled by the proper BMC control center. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared, and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.
- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type. [E751.4.7]

#### **2.4.9 Deposit Conditions**

Deposit of mail also is subject to these conditions:

- a. Destination facilities may refuse mailings that are unscheduled or late (i.e., if vehicles arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs and more than 20 minutes late at delivery units). If a mailing is refused, a mailer is permitted to make a new appointment.
- b. A mailer may request recurring appointments, renewable for a 6-month period, by writing to the BMC control center or the district control center that administers the service area in which the destination facility is located. The mailer must present comparable mailings (by product and volume) on a consistent frequency of at least once a week. Failure to adhere to scheduled appointment procedures can cause revocation of the recurring appointment.
- c. Drop and pick procedures may be approved by the BMC for Parcel Post mailers only. The BMC specifies the time limit for vehicle retrieval. [E751.4.8]

#### **2.4.10 Recurring Appointments**

*Recurring* refers to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (sacks/parcels).
- d. Containerization.

456.2.4.11

- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule. [E751.4.9]

### **2.4.11 Vehicle Unloading**

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. The driver must unload bedloaded shipments within 8 hours of arrival at BMCs, ASFs, and SCFs. Combination containerized and bedloaded drop shipment mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At delivery units, the driver must unload all mail, whether bedloaded, sacked, or palletized (including pallet boxes on pallets) within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver is required to unload, unstack, and unstrap them. If a DDU facility cannot handle pallets, and a mailer transports mail to the DDU facility on pallets, the driver must unload the pallets into a container specified by the delivery unit. The driver may be required to place bedloaded pieces in containers provided by the delivery unit in order to maintain separation by 5-digit ZIP Codes or to place containerized mail so as to maintain the separation of 5-digit ZIP Codes.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except the dock and designated driver rest area. [E751.4.10]

### **2.4.12 Demurrage**

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination rate mailings. [E751.4.11]

### **2.4.13 Appeals**

Mailers who believe that they are denied equitable treatment may appeal to the manager, Customer Service (district), responsible for the destination postal facility. [E751.4.12]

### **2.4.14 Documentation**

A postage statement must accompany each destination entry rate mailing. Any other documentation must be submitted as required by the standards for the rate claimed or the postage payment method used. [E751.4.13]

## **2.5 Acceptance at Designated SCF**

A mailing that is otherwise eligible for the DBMC rate may be deposited and accepted at an SCF designated by the USPS when it benefits the USPS and:

- a. The mailing contains only machinable parcels prepared in 5-digit scheme and 5-digit sacks, pallets, or containers and nonmachinable parcels prepared under [2.3.2, Containers](#).

- b. All DBMC rate parcels are for delivery within the service area of the SCF at which they are deposited by the mailer.
- c. Postage on all parcels deposited at the SCF is computed using the zone chart for that postal facility.
- d. The marking required by [455.4.0, Preparation for Parcel Post](#), contains the correct information.
- e. The mailer is directed to deposit the mailing at that SCF by the district control center in whose area is located the BMC or ASF where the DBMC parcels would otherwise be deposited. [E751.5.0]

**2.6 DSCF Mail Entered at a Designated BMC**

DSCF rate mail prepared on pallets (including pallet boxes on pallets) that is for a 5-digit ZIP Code listed in [Exhibit 2.6](#) must be entered at the corresponding BMC facility listed on that exhibit instead of at the DSCF unless an exception has been granted under [2.2.3a, DSCF and DDU Rates](#). Sacked DSCF rate mail for the 5-digit ZIP Codes in [Exhibit 2.6](#) must be entered at the DSCF. [E751.6.0]

456.2.6

[Exhibit E751.6.0]

**2.7 Delivery Facility Exceptions to the “Majority of City Carriers” Rule**

For ZIP Codes in [Exhibit 2.7](#) use the name of the facility associated with the 5-digit ZIP Code in that exhibit as the facility at which DDU rate mail for that 5-digit ZIP Code must be entered and, for both DDU and DSCF mail, to determine whether that 5-digit facility can handle pallets. See [2.1](#) and [2.2.2](#). This listing identifies 5-digit ZIP Codes that are exceptions to the “majority of city carriers rule” that is used to determine the parcel facility for a 5-digit ZIP Code in instances where a ZIP Code is served by multiple facilities. The name of the primary facility for parcel delivery is listed beside each 5-digit ZIP Code. Additional information about the facility including drop ship address and whether the facility can handle a pallet is included in the Drop Shipment Product. At a future date this list will be available in the Drop Shipment Product. [E751.7.0]

**2.8 Delivery Facilities Different from Those in the Drop Shipment Product**

For ZIP Codes in [Exhibit 2.8](#) use the name of the facility associated with the 5-digit ZIP Code in that exhibit as the facility at which DDU rate mail for that 5-digit ZIP Code must be entered and, for both DDU and DSCF mail, to determine whether that 5-digit facility can handle pallets. Parcel Post mailings for the ZIP Codes shown must be deposited at the facilities listed in order to qualify for destination delivery unit rates. The listing identifies 5-digit ZIP Codes and facilities that are different from the ones indicated in the Drop Shipment Product for letters and flats. At a future date this information will be available in the Drop Shipment Product. [E751.8.0]

## 463 Rates and Eligibility

### Overview

- 1.0 Bound Printed Matter Rates and Fees
- 2.0 Content Standards for Bound Printed Matter Parcels
- 3.0 Rate Eligibility for Bound Printed Matter Parcels
- 4.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Parcels

### 1.0 Bound Printed Matter Rates and Fees

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Bound Printed Matter Rate Application

The presorted Bound Printed Matter rate has a per piece charge and a per pound charge. Postage is based on the rate that applies to the weight (postage) increment of each addressed piece and on the zone to which the piece is addressed. The minimum postage rate for an addressed piece is one unit of the per piece charge plus the per pound charge for an addressed piece weighing 1 pound. [P013.5.1 and P013.5.6]

#### 1.3 Bound Printed Matter Presorted, Carrier Route, and Destination Entry Rates

| Each piece is subject to both a per piece rate and a pound rate. <sup>1</sup> |                          | Presorted <sup>2</sup> |   |                | Carrier Route  |   |                |
|---|--------------------------|------------------------|---|----------------|----------------|---|----------------|

| DBMC  | 1&2                      | 0.895                  | + | 0.073          | 0.795          | + | 0.073          |
|   | 3                        | 0.895                  | + | 0.102          | 0.795          | + | 0.102          |
|   | 4                        | 0.895                  | + | 0.139          | 0.795          | + | 0.139          |
|   | 5                        | 0.895                  | + | 0.187          | 0.795          | + | 0.187          |
| DSCF  |                          | 0.680                  | + | 0.060          | 0.580          | + | 0.060          |
| DDU   |                          | 0.609                  | + | 0.030          | 0.509          | + | 0.030          |

1. Multiply the number of pounds in the mailing by rate per pound. Multiply the number of pieces in the mailing by rate per piece. Add both totals.

2. Machinable presorted parcels may be eligible for barcoded discount of \$0.03 per parcel, except for parcels mailed at presorted DDU or DSCF rates.

[R700.2.4 and R700.2.6]

463.1.4

### 1.4 Destination Entry Mailing Fee

Destination entry mailing fee for Bound Printed Matter, per 12-month period: \$150.00. [R700.5.1]

### 1.5 Computing Postage for Bound Printed Matter

#### 1.5.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

#### 1.5.2 Computing Postage for Affixed Postage

Presorted and Carrier Route Bound Printed Matter mailings with postage affixed are charged a per pound rate and a per piece rate as follows:

- a. For each addressed piece, calculate the per pound rate:
  1. *If the piece weighs 1 pound or less*, the per pound rate is the rate listed in [1.3](#) and [1.4](#) for the rate category and zone.
  2. *If the piece weighs more than 1 pound*, compute the per pound rate by multiplying the unrounded weight of the piece by the pound rate for the category and zone. Do not round this result.
- b. Postage per piece. Compute the postage for each piece by adding the calculated per pound rate to the per piece rate for the category and zone. Round this number up to the next tenth of a cent. Affix this amount of postage to the piece.
- c. Total Postage for Mailing. Add all of the affixed postage amounts for each piece in the mailing. [P013.9.4]

#### 1.5.3 Computing Postage for Permit Imprint

Presorted and Carrier Route Bound Printed Matter mailings paid with permit imprint are charged a per pound rate and a per piece rate as follows:

- a. Per pound rate:
  1. *For pieces weighing 1 pound or less*, compute the per pound rate by multiplying the total number of addressed pieces by the 1-pound rate for the rate category and zone. Do not round this result.
  2. *For pieces weighing more than 1 pound*, compute the per pound rate by multiplying the unrounded total weight of the addressed pieces by the pound rate for the category and zone. Do not round this result.
- b. Per piece rate. Multiply the total number of addressed pieces by the applicable piece rate.
- c. Total Postage. Calculate total postage by adding the total per piece calculation to the total per pound calculation. Round off the total postage to the nearest whole cent. [P013.9.3]

## 2.0 Content Standards for Bound Printed Matter Parcels

### 2.1 Basic Content Standards

Bound Printed Matter (BPM) is a subclass of Package Services and must:

- a. Meet the basic standards in [2.0](#).
- b. Weigh no more than 15 pounds. Pieces might be subject to other minimum weights or dimensions based on the standards for specific rates.
- c. Consist of advertising, promotional, directory, or editorial material (or any combination of such material).
- d. Be securely bound by permanent fastenings such as staples, spiral binding, glue, or stitching. Loose-leaf binders and similar fastenings are not considered permanent.
- e. Consist of sheets of which at least 90% are imprinted by any process other than handwriting or typewriting with words, letters, characters, figures, or images (or any combination of them).
- f. Not have the nature of personal correspondence.
- g. Not be stationery, such as pads of blank printed forms. [E712.1.1]
- h. Consist of mailable matter that is neither mailed or required to be mailed as First-Class Mail or Customized MarketMail under [705.1.0](#) nor entered as Periodicals (except as permitted under [2.2](#) or permitted or required under [707.7.9](#)). [E710.1.1]

### 2.2 Attachments or Enclosures of Periodicals Sample Copies

Sample copies of authorized and pending Periodicals publications may be enclosed or attached with merchandise sent at BPM rates. Postage at BPM rates is based on the combined weight of the host piece and the sample copies enclosed.

### 2.3 Postal Inspection

Bound Printed Matter mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Bound Printed Matter rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### 2.4 Attachments and Enclosures

#### 2.4.1 Invoice

An invoice, whether it also serves as a bill, may be placed either inside a Bound Printed Matter piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **2.4.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Bound Printed Matter piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Bound Printed Matter rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

#### **2.4.3 Additional Enclosures**

Bound Printed Matter may have the following additions and enclosures:

- a. Any printed matter mailable as Standard Mail.
- b. Nonprint attachments and enclosures. The combined weight of all nonprint attachments and enclosures in the mailpiece must be less than or equal to 25% of the weight of the BPM in the mailpiece. The individual cost of each nonprint attachment or enclosure must be less than or equal to the cost of a “low cost” item as defined in 703.1.6.11. In addition, the combined cost of all nonprint attachments and enclosures must not exceed two times the cost of a “low cost” item as defined in 703.1.6.11. [E712.1.2]

### **2.5 Written Additions**

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender’s and the addressee’s names, occupations, and addresses, preceded by “From” or “To,” and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as “Do Not Open Until Christmas” and “Happy Birthday, Mother.”
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.

- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

## 3.0 Rate Eligibility for Bound Printed Matter Parcels

### 3.1 Rate Eligibility

BPM rates are based on the weight of a single addressed piece or 1 pound, whichever is higher, and the zone (where applicable) to which the piece is addressed. Rate categories are as follows:

- a. Presorted Rate. The Presorted rate applies to BPM prepared in a mailing of at least 300 pieces, prepared and presorted as specified in [465.5.0, Preparation for Presorted Parcels](#), or [705.8.0, Preparation for Pallets](#).
- b. Carrier Route Rate. The Carrier Route rate applies to BPM prepared in a mailing of at least 300 pieces presorted to carrier routes, prepared and presorted as specified in [465.6.0, Preparation for Carrier Route Parcels](#), or [705.8.0, Preparation for Pallets](#).
- c. Barcoded Discount—Machinable Parcels. The barcoded discount applies only to BPM machinable parcels (see [401.1.5](#)) that bear a correct, readable barcode under [708.5.0, Barcoding Standards for Parcels](#), for the ZIP Code of the delivery address. The pieces must be part of a single-piece rate mailing of 50 or more BPM parcels or part of a presort rate mailing of at least 300 BPM parcels prepared under [465.5.0, Preparation for Presorted Parcels](#), and [465.6.0, Preparation for Carrier Route Parcels](#), and [705.8.0, Preparation for Pallets](#). The barcoded discount is not available for parcels mailed at Presorted DDU or DSCF rates, or for Presorted DBMC rate mailings entered at an ASF other than the Phoenix, AZ, ASF. Carrier route rate mail is not eligible for the barcoded discount. [E712.2.0]

### 3.2 Nonidentical Weight Pieces

Mailings may contain nonidentical-weight pieces only if the correct postage is affixed to each piece or if Business Mailer Support (BMS) has authorized payment of postage by permit imprint under [705.2.0, Manifest Mailing System \(MMS\)](#), or [705.4.0, Alternate Mailing System \(AMS\)](#). [E712.1.3]

### 3.3 ZIP Code Accuracy

#### 3.3.1 Basic Standards

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates under [3.3.1d](#) that are subject to the ZIP Code accuracy standard must meet these requirements:

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [3.3.2](#).

### 463.3.3.2

- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addressees used on pieces claiming the Bound Printed Matter Presort and carrier route rates, regardless of any required surcharges, must meet the ZIP Code accuracy standard. [A030.2.2 and A030.2.3]

#### **3.3.2 USPS-Approved Methods**

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  - 1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
  - 2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
  - 3. Any mailing list service in [507.6.0](#).
  - 4. An authorized service provider.
  - 5. CASS-certified matching software.
  - 6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

#### **3.3.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

### **3.4 Delivery and Return Addresses**

All Bound Printed Matter must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address, except unendorsed Bound Printed Matter. [E710.3.1]

## 4.0 Additional Eligibility Standards for Presorted and Carrier Route Bound Printed Matter Parcels

### 4.1 Basic Standard

In addition to the standards in [2.0](#) and [3.0](#), all pieces in a Bound Printed Matter mailing must:

- a. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:
  1. The ZIP Code accuracy standard in [3.3](#).
  2. The carrier route accuracy standard in [4.2](#). [E712.3.2a1]
  3. If an alternative addressing format is used, the additional standards in [602.3.0](#).
  4. If pieces are prepared with detached address labels, the additional standards in [602.4.0](#).
- b. Meet the preparation standards under [465.5.0, Preparation for Presorted Parcels](#), or [705.8.0, Preparation for Pallets](#). [E712.3.1]

### 4.2 Carrier Route Accuracy

#### 4.2.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming carrier route rates under [4.2.1d](#) that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [4.2.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming the Bound Printed Matter carrier route rates must meet the ZIP Code accuracy standard. [A030.3.2]

#### 4.2.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0, Address Information System Products](#), and [708.3.0, Coding Accuracy Support System \(CASS\)](#).

[A030.3.4]

463.4.2.3

### **4.2.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

### **4.3 Destination Entry**

See [466.2.0](#) through [466.5.0](#) for destination entry eligibility, preparation, and deposit standards.

# 464 Postage Payment and Documentation

## Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

## 1.0 Basic Standards for Postage Payment

### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Bound Printed Matter mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces provided the mail can be separated at acceptance into groups that each contain pieces subject to the same zone and same combination of rates (e.g., all are zone 4 and presort rate). Identical-weight permit imprint mail also may be mailed under [705.2.0](#) through [705.4.0](#) in *Advanced Preparation and Special Postage Payment Systems*. [P700.1.1]

## 2.0 Mailing Documentation

### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

### 2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

464.2.4

### **2.4 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

### **2.5 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607](#). [P012.1.5]

### **2.6 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

### **2.7 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

# 465 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation for Presorted Parcels](#)
- [6.0 Preparation for Carrier Route Parcels](#)
- [7.0 Standards for Barcoded Discounts](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. [M011.1.1]

### 1.2 Definition of Mailings

A mailing is defined as a group of pieces within the same class of mail and, except for certain parcel rates, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- b. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- c. *3-digit*: the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.

- e. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- f. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- g. *ADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- h. *ASF/BMC*: all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).
- i. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- j. *Residual pieces/bundles/sacks* contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. A *5-digit scheme sort for Bound Printed Matter parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for rate eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. An *origin 3-digit* (or *origin 3-digit scheme*) tray/sack contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray/sack must be prepared for each.

- e. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- f. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- g. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs. *Entry BMC* includes subordinate ASFs unless otherwise specified.
- h. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- i. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [2.0](#).
- j. A “*logical presort destination*” represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Bound Printed Matter “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in 2.0. [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

Except as noted in 2.3, all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)

Bundles of pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).

- d. Except under [705.8.5.11, Bundles on Pallets](#), bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

## 2.5 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Bound Printed Matter must meet the applicable minimum and maximum bundle size standards in [5.0, Preparation for Presorted Parcels](#), and [705.8.0, Preparation for Pallets](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Except for mixed ADC bundles and for carrier route bundles prepared in sacks, each physical bundle of Bound Printed Matter must contain at least two pieces. For carrier route rate Bound Printed Matter prepared in sacks, the last physical bundle to an individual carrier route may consist of a single addressed piece, provided that all other bundles to that carrier route destination contain at least two addressed pieces, and that the total group of pieces to that carrier route (the logical bundle) meets the carrier route rate eligibility minimum in [463, Rates and Eligibility](#). Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#) and each physical bundle, including carrier route rate mail, must always contain at least two pieces. [M020.1.6]

## 2.6 Pieces With Simplified Addresses

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, and for Bound Printed Matter in sacks, specific weight limits in [5.0, Preparation for Presorted Parcels](#), and [6.0, Preparation for Carrier Route Parcels](#). [M020.2.3]

## 2.7 Labeling Bundles

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. The label may be

placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

### **2.8 Use of Optional Endorsement Lines (OEL)**

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under [708.7.0](#). [M013.1.1]

### **2.9 Use of Carrier Route Information Lines**

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [705.8.0, Preparation for Pallets](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Carrier Route Bound Printed Matter mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

### **2.10 Facing Slips—All Carrier Route Mail**

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “BPM IRR P CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

## **3.0 Sacks**

### **3.1 Preparation**

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

## **4.0 Sack Labels**

### **4.1 Basic Standards**

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable.

[M031.1.1]

**4.2 Physical Standards of a Sack Label**

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

**4.3 Line 1 (Destination Line)**

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

**4.4 Line 2 (Content Line)**

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE   |
|-------------------------|--|
| Carrier Route           | C (type of route)  |
| Carrier Routes          | CR-RT or CR-RTS  |
| Digit                   | D  |
| General Delivery Unit   | G  |
| Highway Contract Route  | H  |
| Irregular Parcels       | IRREG  |
| Machinable              | MACH   |
| Mixed                   | MXD  |
| Nonbarcoded             | NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0) |
| Package Services        | PSVC   |
| Parcels                 | PARCELS  |
| Post Office Box Section | B  |
| Rural Route             | R  |
| Scheme                  | SCH  |
| Working                 | WKG  |

[M031.5.0]

#### 4.5 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

#### 4.6 Abbreviations for Lines 1 and 3

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

#### 4.7 Placement of Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.

- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3. [M031.1.5]

## 4.8 Barcoded Sack Labels

### 4.8.1 Basic Standards for Barcoded Sack Labels

Barcoded labels are not required for Bound Printed Matter. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

### 4.8.2 Physical Standards for Barcoded Sack Labels

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation for Presorted Parcels

### 5.1 Basic Standards

#### 5.1.1 General Preparation Requirements

All mailings of Presorted Bound Printed Matter (BPM) are subject to these general standards:

- a. Each mailing must meet the applicable eligibility standards in [402.2.0](#), [Placement and Content of Markings](#), [463](#), [Rates and Eligibility](#), [465](#), [Mail Preparation](#), and [466](#), [Enter and Deposit](#),
- b. All pieces in a mailing must be within the same processing category as described in [401.1.1](#). A BPM irregular parcel is a piece that is not a machinable parcel as defined in [401.1.5.1](#). Irregular parcels also are pieces that meet the

### 465.5.1.2

size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under 601.7.0.

- c. All pieces must be sorted to the finest extent possible under 5.2, *Preparation for Irregular Parcels Weighing Less Than 10 Pounds*, and 5.3, *Preparation for Irregular Parcels Weighing 10 Pounds or More*, or palletized under 705.8.0.
- d. Subject to 402.2.0, pieces must be marked “Bound Printed Matter” (or “BPM”) and “Presorted” (or “PRSRT”). [M722.1.1]

#### 5.1.2 Separation

Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. *Exception:* Pieces for different zones may be sacked together and the sacks do not have to be separated by zone for verification if any of the following apply:

- a. Full (exact) postage is affixed to each piece in the mailing.
- b. The mailing is prepared under 705.2.0, *Manifest Mailing System (MMS)*, 705.4.0, *Alternate Mailing System (AMS)*, or 5.1.3, *Commingling Zones*. [M722.1.3]

#### 5.1.3 Commingling Zones

Zoned BPM need not be separated by zones when presented other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the BMS manager. The mail must be prepared and documented as follows:

- a. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).
- b. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the post office where the mail is to be entered (entry post office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number, the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage. [M722.1.4]

## 5.2 Preparation for Irregular Parcels Weighing Less Than 10 Pounds

### 5.2.1 Required Bundling

Bundling is required before sacking, except for pieces placed in 5-digit scheme and 5-digit sacks when such pieces are enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag and the minimum bundle size is met. Otherwise, a bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces or 10 pounds, whichever occurs first. Smaller volumes are not permitted (except mixed ADC bundles). The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit scheme and 5-digit sacks or prepared for and entered at DDU rates may weigh a maximum of 40 pounds each. Each physical bundle must contain at least two addressed pieces (except mixed ADC bundles). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies), or bundle by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count, weight, or both. [M722.3.1]

### 5.2.2 Bundling and Labeling

Preparation sequence and labeling:

- a. 5-digit (required); red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); green Label 3 or OEL.
- c. ADC (required); pink Label A or OEL.
- d. Mixed ADC (required); tan Label X or OEL. [M722.3.2]

### 5.2.3 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except mixed ADC sacks). Optional 5-digit scheme and optional SCF sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds, whichever occurs first. Sacking is not required for 5-digit bundles when prepared for and entered at DDU rates. Such bundles may be bedloaded and may weigh up to 40 pounds. Smaller volumes are not permitted. Sacking also is subject to these conditions:

- a. Identical-weight pieces weighing 2 pounds or less must be prepared using the 10-piece minimum, those that weigh more must be prepared using the 20-pound minimum.

- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternatively, sack by the actual piece count or mail weight for each bundle destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M722.3.3]

### 5.2.4 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme (optional); labeling:
  - 1. Line 1: [L606](#), Column B.
  - 2. Line 2: “PSVC IRREG 5D SCHEME” or “PSVC IRREG 5D SCH.”
- b. 5-digit (required); labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
  - 2. Line 2: “PSVC IRREG 5D.”
- c. 3-digit (required); labeling:
  - 1. Line 1: [L002](#), Column A.
  - 2. Line 2: “PSVC IRREG 3D.”
- d. SCF (optional); labeling:
  - 1. Line 1: [L005](#), Column B.
  - 2. Line 2: “PSVC IRREG SCF.”
- e. ADC (required); labeling:
  - 1. Line 1: [L004](#), Column B.
  - 2. Line 2: “PSVC IRREG ADC.”
- f. Mixed ADC (required); labeling:
  - 1. [\[03-17-05\]](#) [\[02-03-05\]](#) Line 1: “MXD” followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry post office, as shown in [L004](#), Column B. If placed on an ASF or BMC pallet under option in [705.8.10.2](#), use [L010](#).
  - 2. Line 2: “PSVC IRREG WKG.” [M722.3.4]

## 5.3 Preparation for Irregular Parcels Weighing 10 Pounds or More

### 5.3.1 Piece Preparation

Each piece must be enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag. Bundling is not permitted for pieces weighing 10 pounds or more except under [5.3.2, Required Sacking](#). [M722.4.1]

### 5.3.2 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 20 pounds. Smaller volumes are not permitted (except mixed ADC sacks). Optional 5-digit scheme and optional SCF sacks may be prepared only when there are at least 20 pounds. Smaller volumes are not permitted. Sacking is not required for 5-digit bundles when prepared for and entered at DDU rates. Such bundles may be bedloaded and may weigh up to 40 pounds. [M722.4.2]

### 5.3.3 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme (optional); labeling:
  1. Line 1: L606, Column B.
  2. Line 2: "PSVC IRREG 5D SCHEME" or "PSVC IRREG 5D SCH."
- b. 5-digit (required); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
  2. Line 2: "PSVC IRREG 5D."
- c. 3-digit (required); labeling:
  1. Line 1: L002, Column A.
  2. Line 2: "PSVC IRREG 3D."
- d. SCF (optional); labeling:
  1. Line 1: L005, Column B.
  2. Line 2: "PSVC IRREG SCF."
- e. ADC (required); labeling:
  1. Line 1: L004, Column B.
  2. Line 2: "PSVC IRREG ADC."
- f. Mixed ADC (required); labeling:
  1. [03-17-05] [02-03-05] Line 1: "MXD" followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry post office, as shown in L004, Column B. If placed on an ASF or BMC pallet under option in 705.8.10.2, use L010.
  2. Line 2: "PSVC IRREG WKG." [M722.4.3]

## 5.4 Preparation for Machinable Parcels Not Claiming DBMC Rates

### 5.4.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except origin (mixed) BMC sacks). Optional 5-digit scheme sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. Sacking also is subject to these conditions:

### 465.5.4.2

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies) or sack by the actual piece count or mail weight for each bundle destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M722.5.1]

#### 5.4.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme (optional); labeling:
  1. Line 1: L606, Column B.
  2. Line 2: "PSVC MACH 5D SCHEME" or "PSVC MACH 5D SCH."
- b. 5-digit (required); labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
  2. Line 2: "PSVC MACH 5D."
- c. BMC (required); labeling:
  1. Line 1: L601, Column B.
  2. Line 2: "PSVC MACH BMC."
- d. Mixed BMC (required); labeling:
  1. Line 1: "MXD" followed by the L601, Column B, information for the BMC serving the 3-digit ZIP Code prefix of entry post office.
  2. Line 2: "PSVC MACH WKG." [M722.5.2]

### 5.5 Preparation for Machinable Parcels Claiming DBMC Rates

#### 5.5.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches either 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted (except origin (mixed) BMC sacks). Optional 5-digit scheme and optional ASF sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. See 466.3.0 for DBMC rate eligibility. Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.

- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies) or sack by the actual piece count or mail weight for each sack destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M722.5.3]

### 5.5.2 DBMC Rates—Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme (optional); labeling:
  - 1. Line 1: [L606](#), Column B.
  - 2. Line 2: “PSVC MACH 5D SCHEME” or “PSVC MACH 5D SCH.”
- b. 5-digit (required); labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
  - 2. Line 2: “PSVC MACH 5D.”
- c. ASF (optional, allowed only for mail deposited at an ASF to claim DBMC rate); labeling:
  - 1. Line 1: [L602](#), Column B. DBMC rate eligibility determined by [466.3.0](#), [Destination Bulk Mail Center \(DBMC\) Entry](#), and [Exhibit 466.3.3](#), [BMC/ASF—DBMC Rate Eligibility](#).
  - 2. Line 2: “PSVC MACH ASF.”
- d. BMC (required); labeling:
  - 1. Line 1: [L601](#), Column B. DBMC rate eligibility determined by [466.3.0](#), [Destination Bulk Mail Center \(DBMC\) Entry](#), and [Exhibit 466.3.3](#), [BMC/ASF—DBMC Rate Eligibility](#).
  - 2. Line 2: “PSVC MACH BMC.”
- e. Mixed BMC (required); labeling:
  - 1. Line 1: “MXD” followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code prefix of entry post office.
  - 2. Line 2: “PSVC MACH WKG.” [M722.5.4]

## 6.0 Preparation for Carrier Route Parcels

### 6.1 Basic Standards

#### 6.1.1 General Standards for Carrier Route Preparation

All mailings of Carrier Route Bound Printed Matter (BPM) are subject to the standards in 6.2 through 6.4 in *Preparation for Carrier Route Parcels* and to these general standards:

- a. Each mailing must meet the applicable eligibility standards in 463, mail preparation standards in 2.0, through 4.0, and deposit and entry standards in 466.
- b. All pieces in a mailing must be within the same processing category as described in 401.1.0. A BPM irregular parcel is a piece that is not a machinable parcel as defined in 401.1.5.1. Irregular parcels also are pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under 601.7.0.
- c. All pieces must be sorted to the finest extent possible under 6.0, *Preparation for Carrier Route Parcels*, or palletized under 705.8.0, *Preparation for Pallets*.
- d. Subject to 402.2.0, pieces must be marked “Bound Printed Matter” (or “BPM”) and “Carrier Route Presort” (or “CAR-RT SORT”). [M723.1.1]

#### 6.1.2 Separation

Pieces for each zone must be sacked separately. When presented for verification, sacks must be separated by zone. *Exception:* Pieces for different zones may be sacked together and the sacks do not have to be separated for verification if any of the following apply:

- a. Full postage is affixed to each piece in the mailing.
- b. The mailing is prepared under 6.1.3, *Commingling Zones*. [M723.1.3]

#### 6.1.3 Commingling Zones

Zoned BPM need not be separated by zones when presented other than as individual pieces or with full correct postage affixed to each piece, subject to this section. Nonidentical-weight pieces not bearing the full correct postage may not be commingled unless authorized by the manager, Business Mailer Support, USPS Headquarters. The mail must be prepared and documented as follows:

- a. A unique number is assigned to each pallet in the mailing and printed on a separate line at the top of the pallet label (above the Line 1 information).
- b. A detailed list accompanies each mailing or mailing segment, sequenced numerically by the numbers assigned to the pallets in the mailing, that shows the post office where the mail is to be entered (entry post office), a unique identifier for the mailing or mailing segment that also appears on the corresponding postage statement, the name and address of the mailer, the permit number (if applicable), the date of mailing, individual line entries for each pallet, and the total number of pieces to each zone and in the entire mailing or mailing segment. Line entries for pallets containing mail for only one zone must show the pallet number, the sortation level, the zone for which the mail is

destined, and the total number of pieces for the pallet. Entries for pallets containing mail for more than one zone must also show (by zone) the number of pieces to each 3-digit ZIP Code area and the total number of pieces for that zone for the pallet. Mailings are not accepted if there are discrepancies between the information in the detailed listing or on the postage statement and the results of USPS random verification of piece counts and postage. [M723.1.4]

#### 6.1.4 Residual Pieces

Residual pieces not sorted under 6.2 and 6.3 may be prepared as a Presorted Bound Printed Matter mailing under 5.0, *Preparation for Presorted Parcels*, provided that they are part of the same mailing job and reported on the same postage statement. Residual pieces paid at the Presorted rate do not need to meet a separate 300 piece minimum. These pieces must be separated from the Carrier Route portion when presented to the USPS for verification. [M723.1.5]

## 6.2 Preparation for Irregular Parcels Weighing Less Than 10 Pounds

### 6.2.1 Bundle Preparation

Bundling is not required in direct carrier route sacks. Otherwise, a carrier route bundle (or bundles) must be prepared when the quantity of addressed pieces for a carrier route reaches a minimum of 10 pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. The maximum weight of each physical bundle is 40 pounds. Each bundle must contain at least two addressed pieces except for the last bundle for each carrier route destination under 2.0. Bundles must be labeled with a facing slip unless the bundle is labeled using a carrier route information line (708.6.0) or an optional endorsement line (708.7.0). Bundling also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies), or bundle by the actual piece count or mail weight for each bundle destination, provided that documentation can be provided with the mailing that shows (specifically for each bundle) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count, weight, or both. [M723.3.1]

### 6.2.2 Required Sacking

A direct carrier route sack must be prepared when the quantity of mail for an individual carrier route reaches a minimum of 10 addressed pieces or 20 pounds, whichever occurs first. Smaller volumes are not permitted. Remaining bundles must be placed in 5-digit scheme or 5-digit carrier routes sacks, which have no minimum sack size. Carrier route sacks also are subject to these conditions:

### 465.6.2.3

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M723.3.2]

#### **6.2.3 Sack Preparation**

Sack preparation sequence and Line 1 labeling:

- a. Carrier route: required; for Line 1, use city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
- b. 5-digit scheme carrier routes: optional (no minimum); for Line 1, use L606, Column B.
- c. 5-digit carrier routes: required (no minimum); for Line 1, use city, state, and 5-digit ZIP Code destination of bundles (for military mail, the ZIP Code is preceded by the prefixes under 4.3). [M723.3.3]

#### **6.2.4 Sack Label Line 2**

Line 2 information:

- a. Carrier route: "PSVC IRREG CR," followed by the route type and number.
- b. 5-digit scheme carrier routes: "PSVC IRREG CR-RTS SCH."
- c. 5-digit carrier routes: "PSVC IRREG CR-RTS." [M723.3.4]

#### **6.2.5 Exception to Sacking**

Sacking is not required for bundles when prepared for and entered at DDU rates; such bundles may be bedloaded and may weigh up to 40 pounds. [M723.3.5]

### **6.3 Preparation for Irregular Parcels Weighing 10 Pounds or More**

Irregular parcels must be prepared only in direct carrier route sacks. Each carrier route sack must contain a minimum of 20 pounds. Required preparation:

- a. Line 1: use city, state, and 5-digit ZIP Code destination of the pieces.
- b. Line 2: "PSVC IRREG CR," followed by the route type and number. [M723.4.0]

### **6.4 Preparation for Machinable Parcels**

#### **6.4.1 Required Carrier Route Sacking**

Machinable parcels may be prepared only in direct carrier route sacks. Each carrier route sack must contain a minimum of 10 addressed pieces or 20 pounds, whichever occurs first. Carrier route sacks also are subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 20-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies), or sack by the actual piece count or mail weight for each sack destination, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the accompanying postage statement whether they applied the piece count or weight. [M723.5.1]

#### 6.4.2 Sack Label

Required preparation:

- a. Line 1: Use city, state, and 5-digit ZIP Code destination of the pieces.
- b. Line 2: "PSVC MACH CR," followed by the route type and number. [M723.5.2]

## 7.0 Standards for Barcoded Discounts

### 7.1 Standards for Barcoded Mail

Barcoded Discount—Machinable Parcels. The barcoded discount applies only to BPM machinable parcels (see [401.1.5.1](#)) that bear a correct, readable barcode under [465.5.0](#) for the ZIP Code of the delivery address. The pieces must be part of a single-piece rate mailing of 50 or more BPM parcels or part of a presort rate mailing of at least 300 BPM parcels prepared under [5.0, Preparation for Presorted Parcels](#), or [6.0, Preparation for Carrier Route Parcels](#), and [705.8.0, Preparation for Pallets](#). The barcoded discount is not available for parcels mailed at Presorted DDU or DSCF rates, or for Presorted DBMC rate mailings entered at an ASF other than the Phoenix, AZ, ASF. Carrier route rate mail is not eligible for the barcoded discount. [E712.2.0d]

# 466 Enter and Deposit

## Overview

- [1.0 Presenting a Mailing](#)
- [2.0 Destination Entry](#)
- [3.0 Destination Bulk Mail Center \(DBMC\) Entry](#)
- [4.0 Destination Sectional Center Facility \(DSCF\) Entry](#)
- [5.0 Destination Delivery Unit \(DDU\) Entry](#)

## 1.0 Presenting a Mailing

### 1.1 Verification and Entry

All presorted, carrier route, destination entry, and barcoded discount mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-verified drop shipment (PVDS) mailings must be presented for verification, acceptance, and entry under [705.15.0](#). Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). [D700.2.2]

### 1.2 Office of Mailing

Bound Printed Matter must be mailed at the post office from which the zone rate postage was computed, except under [1.3](#) and [1.4](#). [E710.2.1]

### 1.3 Redirected Mailings

A mailer who presents large mailings of Bound Printed Matter may be authorized or directed to deposit such mailings at another postal facility when processing or logistics make such an alternative desirable for the USPS, subject to these conditions:

- a. Zoned postage need not be recomputed if both the original post office of mailing and the alternative facility use the same zone chart for computing zoned postage, based on the 3-digit prefix of their ZIP Codes.
- b. Postage *must* be recomputed on pieces in mailings redirected to a postal facility that uses a different zone chart for computing zoned postage. [E710.2.2]

### 1.4 BMC Acceptance

A mailer may present zoned Bound Printed Matter at a BMC for acceptance if:

- a. Metered postage is paid through a postage meter licensed at the BMC parent post office, or permit imprint postage is paid through an advance deposit account at the BMC parent post office or another post office in the BMC service area, unless otherwise permitted by standard.
- b. Zoned postage is computed from the BMC parent post office.
- c. The BMC is authorized by Form 4410 to act as acceptance agent for the entry post office. [E710.2.3]

466.1.5

### 1.5 Drop Shipment Information

Essential information for entering drop shipment Package Services mailings at specific postal facilities can be found in the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.1](#)). There is a charge for the Drop Shipment Product. [D700.2.4]

## 2.0 Destination Entry

### 2.1 General

Destination entry rates apply to Presorted and Carrier Route Bound Printed Matter (BPM) that is deposited at a destination bulk mail center (DBMC), destination sectional center facility (DSCF), or destination delivery unit (DDU) as specified below. Eligibility for a destination entry rate is determined by the sort level, processing category of the mail, and the type of container the mail is in (i.e., sacked or palletized). Each piece can claim only one destination entry rate; an individual pallet may contain pieces claimed at different destination entry rates. [E752.1.1]

### 2.2 Minimum Volume

A destination entry rate BPM mailing is subject to these minimum volume requirements:

- a. Each mailing must contain at least 300 Presorted addressed pieces or 300 Carrier Route addressed pieces.
- b. Except as provided in [2.2e](#), each group of pieces prepared for deposit at different destination entry post offices must be presented as a separate mailing meeting separate minimum volume requirements and be accompanied by the appropriate Form 3605 postage statement.
- c. Separate Presorted and Carrier Route mailings may be copalletized under [705.8.0](#).
- d. Pieces deposited at the same destination entry post office but claimed at different destination entry rates may be included in a single mailing and reported on the same postage statement (subject to one minimum volume requirement) if the destination entry post office is the proper facility for claiming each of the destination entry discounts.
- e. When Presorted or Carrier Route mailings are presented together under the plant-verified drop shipment (PVDS) procedures in [705.15.0](#), a mailer may use the total piece count from a single presort file (i.e., mailing job) for all line items to all destinations reported on a single Form 3605 and accompanied by a postage statement register to meet the separate 300-piece minimum volume requirement for each mailing. Under this alternative, a mailer may enter fewer than 300 pieces for a Presorted or Carrier Route mailing entered at a single destination entry post office if there is a total of at least 300 Presorted rate pieces and/or 300 Carrier Route pieces for all entry points combined for the single presort file listed on Form 3605 and the postage statement register. [E752.1.2]

**2.3 Postage Payment**

Postage payment for destination entry mailings is subject to the same standards that apply generally to BPM. Postage and fees are paid to the post office that verifies the mailings. [E752.1.3]

**2.4 Mailing Fee**

A destination entry mailing fee (463.1.4) must be paid once each 12-month period at each postal facility where the mailing(s) are verified. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. [E752.1.4]

**2.5 Documentation**

Each mailing must be accompanied by the appropriate Form 3605 and, if applicable, Form 8125. No additional documentation is required for destination entry rates. [E752.1.5]

**2.6 Plant Loads**

Plant load mailings, including expedited plant load shipments, are not eligible for destination entry discounts. [E752.1.6]

**2.7 Bedloaded Mailings**

Bedloaded BPM bundles are permitted only when prepared for and entered at DDU rates. These bundles must be prepared under the applicable sortation standards for flat-size mail and are not eligible for the barcoded discount. [E752.1.7]

**2.8 Verification****2.8.1 Place**

As directed by the postmaster, the mailer must present destination entry mailings to USPS employees for verification either:

- a. At the origin mailer's plant or the origin post office serving the mailer's plant under an authorized plant-verified drop shipment system.
- b. At the destination post office or business mail entry unit. [E752.5.1]

**2.8.2 Mail Separation and Presentation**

Destination entry rate mail must be verified under a PVDS system (705.15.0) or be presented for verification and acceptance at a BMEU located at a destination BMC, destination SCF, or other designated destination postal facility. Only plant-verified drop shipments may be deposited at a destination delivery unit not co-located with a post office or other postal facility having a business mail entry unit. When presented to the USPS, destination entry mailings must meet the following requirements:

- a. Each mailing must be separated from other mailings for verification. For PVDS, destination entry rate mailings for deposit at one destination postal facility must be separated from mailings for deposit at other facilities to allow for reconciliation with each accompanying Form 8125, 8125-C, or 8125-CD.
- b. Mail must be separated from freight transported on the same vehicle.

### 466.2.8.3

- c. If Periodicals mail is on the same vehicle as BPM, then the Periodicals mail should be loaded toward the tail of the vehicle so that, for each destination entry, Periodicals mail can be offloaded first.
- d. Form 8125, 8125-C, or 8125-CD must accompany all PVDS mailings. [E752.5.2]

#### **2.8.3 Form 8125**

When mailings are verified and paid for at a postal facility different from the one at which they are accepted as mail and deposited into the mailstream, the mailer must ensure that they are accompanied by a Form 8125 completed by the mailer and the verifying post office. [E752.5.3]

#### **2.8.4 At BMC**

For a mailing to be verified at a BMC, the post office where the mailer's account or license is held must be within the service area of that BMC. The post office must authorize the BMC to act as its agent by sending Form 4410 to the BMC. [E752.5.4]

#### **2.8.5 PVDS Seal**

The mailer may ask that a PVDS band seal secure the vehicle containing verified mailings before dispatch to the destination facility. [E752.5.5]

#### **2.8.6 Mailer Transport**

The mailer must transport the PVDS mailing from the place where it was verified to the destination postal facility. [E752.5.6]

#### **2.8.7 Volume Standards**

Except as permitted for a local mailer under [2.9.12](#), destination entry mailings are subject to these volume standards:

- a. Regardless of total volume, the pieces for which a destination rate is claimed must represent more than 50% of the mail (by weight or pieces, whichever is greater) presented by the same mailer within any 24-hour period. For this standard, mailer is the party presenting the material to the USPS (or for whom a transportation company has presented the material to the USPS).
- b. The same mailer may not in a 24-hour period present for verification and acceptance more than four destination rate mailings at the same destination postal facility (or at another acting as its agent). The mailer may ask for a waiver of this limit when scheduling the deposit of the mailings. There is no maximum for plant-verified drop shipments. [E752.5.7]

## **2.9 Deposit**

### **2.9.1 Time and Location of Deposit**

Each mailing claimed at a destination rate must be deposited at the time and location specified by the USPS. Mailings must be presented in vehicles that are compatible with dock, yard, and DDU operations, as applicable. [E752.6.1]

### **2.9.2 Freight**

Drop shipments are freight until deposited and accepted as mail at the destination facility. [E752.6.2]

### 2.9.3 Appointments

Appointments must be made for destination entry rate mail as follows:

- a. Except for a local mailer under [2.9.12](#) and mailings of perishable commodities, appointments for deposit of destination entry rate mail at BMCs, ASFs, and SCFs must be scheduled through the appropriate appointment control center at least one business day in advance. Same-day appointments may be granted by a control center only through a telephone request. All appointments for BMC loads must be scheduled by the appropriate BMC control center. Appointments for SCFs and ASFs must be scheduled through the appropriate district control center. Appointments may be made up to 30 calendar days before a desired appointment date. The mailer must adhere to the scheduled mail deposit time and location. The mailer must cancel any appointment by notifying the appropriate control center at least 24 hours in advance of a scheduled appointment.
- b. Electronic appointments may be made through the Dropship Appointment System (DSAS) by a mailer or agent using a USPS-issued computer logon ID. Electronic appointments or cancelations must be made at least 12 hours before the desired time and date. All information required by the USPS appointment system regarding a mailing must be provided.
- c. For deposit of DDU mailings, an appointment must be made by contacting the DDU at least 24 hours in advance. If the appointment must be canceled, the mailer must notify the DDU at least one business day in advance of a scheduled appointment. Recurring appointments are allowed if shipment frequency is once a week or more often.
- d. When Periodicals are transported together with BPM as a mixed load ([707.28.0, Destination Entry Rate Eligibility](#)), an appointment must be obtained for deposit at a destination entry facility. [E752.6.3]

### 2.9.4 Advance Scheduling

Except under [2.9.12](#), a mailer must schedule deposit of destination entry rate mailings at least 24 hours in advance by contacting the proper district or BMC control center or destination delivery unit. Appointments at delivery units must be made by calling the delivery unit at least 24 hours in advance. Appointments for ASFs, SCFs, or for any multistop loads must be made through the USPS district control center or DSAS in [2.9.3](#). Appointments for BMC loads must be scheduled by the proper BMC control center. When making an appointment, or as soon as available, the mailer must provide the control center or DDU with the following information:

- a. Mailer's name and address and, when applicable, the name and telephone number of the mailer's agent or local contact.
- b. Description of what is being mailed, product name, number of mailings, volume of mail, how prepared and whether containerized (e.g., pallets). For DDU entries, the mailer also must provide the 5-digit ZIP Code(s) of the mail being deposited.
- c. Where the mailing was verified.
- d. Postage payment method.

466.2.9.5

- e. Requested date and destination facility for mailing.
- f. Vehicle identification number, size, and type. [E752.6.4]

### **2.9.5 Adherence to Schedule**

The mailer must follow the scheduled deposit time or cancel the appointment by notifying the designated control center. Destination facilities may refuse acceptance or deposit of unscheduled mailings or shipments that arrive more than 2 hours after the scheduled appointment at ASFs, BMCs, or SCFs or more than 20 minutes at delivery units. [E752.6.5]

### **2.9.6 Redirection by USPS**

A mailer may be directed to transport destination entry rate mailings to a facility other than the designated DDU, SCF, or BMC due to facility restrictions, building expansions, peak season mail volumes, or emergency constraints. [E752.6.6]

### **2.9.7 Redirection at Mailer's Request**

For service reasons, a mailer may ask to transport destination SCF rate mail to a facility other than the designated SCF. This exception may be approved only by the district control center serving the destination facility. To qualify for the SCF rate in this situation, mail deposited at a facility other than the SCF must destinate for processing within that facility and must not require backhauling to the SCF. [E752.6.7]

### **2.9.8 Recurring Appointments**

Recurring appointments refer to a drop shipment that is delivered to a destination office with a frequency of at least once a week on the same time and day(s). Mailings must be of a comparable product in terms of mail class, size, volume, and containerization (pallets, pallet boxes, etc.). A request to establish recurring appointments must be written on company letterhead to the postal facility manager/postmaster. The drop shipment appointment control office/postmaster will respond to all requests within 10 days. Recurring appointments may be made for a period not to exceed 6 months. Thereafter, a new application must be submitted to ensure that up-to-date mailer information is on file. Written request for an additional 6 months may be made within 60 days prior to the expiration of a current arrangement. Failure to adhere to scheduled appointments or other abuse of the procedures will result in revocation of recurring appointment privileges. Requests for recurring appointments must include the following:

- a. Name, address, and telephone number of the mailer.
- b. Transportation agent's name (contact person) and telephone number(s).
- c. Mail volume and preparation (trays/sacks/parcels).
- d. Containerization.
- e. Size and type of trailer(s) transporting mail.
- f. Frequency/schedule. [E752.6.8]

### 2.9.9 Vehicle Unloading

Unloading of destination entry mailings is subject to these conditions:

- a. Properly prepared containerized loads (e.g., pallets) are unloaded by the USPS at BMCs, ASFs, and SCFs. The USPS does not unload or permit the mailer (or mailer's agent) to unload palletized loads that are unstable or severely leaning or that have otherwise not maintained their integrity in transit.
- b. At BMCs and ASFs, the driver must unload bedloaded shipments within 8 hours of arrival. Combination containerized and bedloaded mailings are classified as bedloaded shipments for unload times. The USPS may assist in unloading.
- c. At delivery units, the driver must unload all mail within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver is required to unload, unstack, and unstrap them. If a mailer transports palletized mail (including sacks on pallets) to a DDU facility that cannot handle pallets, then the driver must unload the pallets into a container specified by the delivery unit.
- d. When driver unloading is required, the driver or assistant must stay with and continue to unload the vehicle once at the dock.
- e. The driver must remove the vehicle from USPS property after unloading. The driver and assistant are not permitted in USPS facilities except for the dock and designated driver rest area. [E752.6.9]

### 2.9.10 Demurrage

The USPS is not responsible for demurrage or detention charges incurred by a mailer who presents destination entry rate mailings. [E752.6.10]

### 2.9.11 Appeals

Mailers who believe they are denied equitable treatment may appeal to the manager, Customer Service (district), responsible for the destination postal facility. [E752.6.11]

### 2.9.12 Exception for Local Mailer

The restrictions in [2.8.7, Volume Standards](#), and [2.9.3, Appointments](#), do not apply when a mailer deposits mailings for verification and acceptance at the local post office serving the facility where the mail was prepared, if the mailings are not verified under a plant load authorization or plant-verified drop shipment postage payment authorization. Under this exception, the mailer may claim the destination entry rates for mailings or portions of mailings deposited at the local post office that meet the standards in [3.0, Destination Bulk Mail Center \(DBMC\) Entry](#), [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), or [5.0, Destination Delivery Unit \(DDU\) Entry](#). [E752.7.0]

## 3.0 Destination Bulk Mail Center (DBMC) Entry

### 3.1 Eligibility

Pieces in a mailing meeting the standards in [2.0, Destination Entry](#), and [3.0](#) are eligible for the DBMC rate when they meet all of the following conditions:

### 466.3.2

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route rates, subject to the corresponding standards for those rates.
- b. Are deposited at a BMC or ASF.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the BMC or ASF where deposited that are listed in [Exhibit 3.3](#).
- d. Are placed in a sack or pallet that is labeled to the BMC or ASF where deposited, or labeled to a postal facility within that BMC's or ASF's service area (see [Exhibit 3.3](#)). [E752.2.1]

### 3.2 Presorted Machinable Parcels

Presorted machinable parcels in sacks or on pallets at all sort levels may claim DBMC rates. Machinable parcels sacked under [465.5.0, Preparation for Presorted Parcels](#), or palletized under [705.8.0](#) may be sorted to destination BMCs under [L601](#) or to destination BMCs and ASFs under [L601](#) and [L602](#). Except as provided in [Exhibit 3.3](#), sortation of machinable parcels to ASFs is optional but is required for the ASF mail to be eligible for DBMC rates. Mailers may opt to sort some or all machinable parcels for ASF service area ZIP Codes to ASFs only when the mail will be deposited at the respective ASFs where the DBMC rates are claimed, under applicable volume standards, using [L602](#). Mailers also may opt to sort machinable parcels only to destination BMCs under [L601](#). When machinable parcels are sorted under [L601](#), only mail for 3-digit ZIP Codes served by a BMC as listed in [Exhibit 3.3](#) is eligible for DBMC rates (i.e., mail for 3-digit ZIP Codes served by an ASF in [Exhibit 3.3](#) is *not* eligible for DBMC rates, nor are 3-digit ZIP Codes that do not appear on [Exhibit 3.3](#)). Machinable parcels prepared in mixed BMC sacks or on mixed BMC pallets that are sorted to the origin BMC under [465.5.0, Preparation for Presorted Parcels](#), or [705.8.0, Preparation for Pallets](#), are eligible for the DBMC rates if both of the following conditions are met:

- a. The mixed BMC sack or pallet is entered at the origin BMC facility to which it is labeled.
- b. The pieces are for 3-digit ZIP Codes listed as eligible destination ZIP Codes for that BMC in [Exhibit 3.3](#). [E752.2.3]

### 3.3 Presorted Irregular Parcels

Presorted irregular parcels in sacks or on pallets at all sort levels may claim DBMC rates. All pieces in an ADC sack or in a palletized ADC bundle are eligible for the DBMC discount if the ADC facility ZIP Code (as shown in Line 1 of the corresponding sack label or the ADC facility that is the destination of the palletized ADC bundle as would be shown on an ADC sack label for that facility using [L004](#), Column B) is within the service area of the BMC at which the sack is deposited under [Exhibit 3.3](#). Separate mixed ADC sacks must be prepared for pieces eligible for and claimed at the DBMC rate and for parcels not claimed at the DBMC rate. Use the "label to" ZIP Code for the ADC to assign ADC bundles to the respective mixed ADC sack. Use the address on the parcels to assign parcels to the respective mixed ADC bundle or sack, as appropriate. Mail must be entered at the appropriate facility under [3.1](#). [E752.2.4]

[Exhibit E751.1.3]

466.3.4

### **3.4 Carrier Route Machinable Parcels**

Carrier Route machinable parcels in individual carrier route sacks may claim DBMC rates. Mail must be entered at the appropriate facility under [3.1, Eligibility](#). [E752.2.6]

### **3.5 Carrier Route Irregular Parcels**

Carrier Route irregular parcels in sacks at all sort levels or on pallets at all sort levels may claim DBMC rates. Mail must be entered at the appropriate facility under [3.1, Eligibility](#). [E752.2.7]

## **4.0 Destination Sectional Center Facility (DSCF) Entry**

### **4.1 Eligibility**

Pieces in a mailing meeting the standards in [2.0, Destination Entry](#), and [4.0, Destination Sectional Center Facility \(DSCF\) Entry](#), are eligible for the DSCF rate when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route rates, subject to the corresponding standards for those rates.
- b. Are deposited at an SCF listed in [L005](#) or [L006](#), except that machinable parcels prepared on pallets for the 5-digit ZIP Codes listed in [Exhibit 4.1](#) must be entered at the corresponding BMC facility shown in that exhibit (not at the SCF) unless an exception is requested and granted. An exception to [Exhibit 4.1](#) must be requested at least 15 days in advance of the mailing in writing from the area manager, Operations Support, who has jurisdiction over the BMC and SCF. Exceptions, if granted, are for a limited time.
- c. Are addressed for delivery to one of the 3-digit ZIP Codes served by the facility where the mail is deposited.
- d. Are placed in a sack or pallet that is labeled to the facility where deposited or labeled to a postal facility within that facility's service area. [E752.3.1]

[Exhibit E751.6.0]

#### 4.2 Presorted Machinable Parcels

Presorted machinable parcels in sacks or on pallets at the 5-digit scheme and 5-digit sort levels may claim DSCF rates. For palletized mail, see [4.1d, Eligibility](#). Mail must be entered at the appropriate facility under [4.1, Eligibility](#). [E752.3.3]

#### 4.3 Presorted Irregular Parcels

Presorted irregular parcels in sacks at the 5-digit scheme, 5-digit, 3-digit, and SCF sort levels, or on pallets at the 5-digit scheme, 5-digit, 3-digit, SCF, and ASF sort levels may claim DSCF rates. Mail must be entered at the appropriate facility under [4.1, Eligibility](#). [E752.3.4]

#### 4.4 Carrier Route Machinable Parcels

Carrier Route machinable parcels in individual carrier route sacks may claim DSCF rates. Mail must be entered at the appropriate facility under [4.1, Eligibility](#). [E752.3.6]

#### 4.5 Carrier Route Irregular Parcels

Carrier Route irregular parcels in sacks at all sort levels or on pallets at the 5-digit scheme, 5-digit, 3-digit, SCF, and ASF sort levels may claim DSCF rates. Mail must be entered at the appropriate facility under [4.1, Eligibility](#). [E752.3.7]

## 5.0 Destination Delivery Unit (DDU) Entry

### 5.1 Eligibility

Pieces in a mailing meeting the standards in [2.0, Destination Entry](#), and [5.0, Destination Delivery Unit \(DDU\) Entry](#), are eligible for the DDU rate when they meet all of the following conditions:

- a. Are eligible for and prepared to qualify for Presorted or Carrier Route rates, subject to the corresponding standards for those rates.
- b. Are addressed for delivery within the ZIP Code(s) served by the destination delivery unit.
- c. For irregular and machinable parcels prepared using the optional 5-digit scheme sort, use Column B of [L606](#) to determine the 5-digit scheme destination. For irregular and machinable parcels prepared using the 5-digit sort, the Drop Shipment Product must be used to determine the 5-digit destination. When the Drop Shipment Product shows that mail for a single 5-digit ZIP Code area is delivered out of more than one postal facility, use the facility from which the majority of city carrier routes are delivered as the facility at which the DDU parcels must be entered and to determine whether that facility can handle pallets, unless the 5-digit ZIP Code is listed in [Exhibit 5.1c.1](#) or [Exhibit 5.1c.2](#). For ZIP Codes in [Exhibit 5.1c.1](#) or [Exhibit 5.1c.2](#), use the name of the facility associated with the 5-digit ZIP Code on the respective exhibit as the facility at which DDU mail must be entered for that 5-digit ZIP Code. This facility name should be used along with the Drop Shipment Product to determine if that facility can handle pallets. If a DDU facility cannot handle pallets and a mailer transports mail to the DDU facility on pallets, the driver must unload the pallets into a container specified by the delivery unit. [L606](#) is used only for mailings prepared using the 5-digit scheme sort. [E752.4.1]
  1. Delivery Facility Exceptions to the “Majority of City Carriers” Rule. For ZIP Codes in [Exhibit 5.1c.1](#) use the name of the facility associated with the 5-digit ZIP Code in that exhibit as the facility at which DDU rate mail for that 5-digit ZIP Code must be entered and, for both DDU and DSCF mail, to determine whether that 5-digit facility can handle pallets. This listing identifies 5-digit ZIP Codes that are exceptions to the “majority of city carriers rule” that is used to determine the parcel facility for a 5-digit ZIP Code in instances where a ZIP Code is served by multiple facilities. The name of the primary facility for parcel delivery is listed beside each 5-digit ZIP Code. Additional information about the facility including drop ship address and whether the facility can handle a pallet is included in the Drop Shipment Product. At a future date this list will be available in the Drop Shipment Product. [E751.7.0]

[Exhibit E751.7.0]

2. Delivery Facilities Different From Those in the Drop Shipment Product. For ZIP Codes in [Exhibit 5.1c.2](#) use the name of the facility associated with the 5-digit ZIP Code in that exhibit as the facility at which DDU rate mail for that 5-digit ZIP Code must be entered and, for both DDU and DSCF mail, to determine whether that 5-digit facility can handle pallets. Bound Printed Matter mailings for the ZIP Codes shown must be deposited at the facilities listed in order to qualify for destination delivery unit rates. The listing identifies 5-digit ZIP Codes and facilities that are different from the ones indicated in the Drop Shipment Product for letters and flats. At a future date this information will be available in the Drop Shipment Product. [E751.8.0]

## 473 Rates and Eligibility

### Overview

- [1.0 Media Mail Rates and Fees](#)
- [2.0 Content Standards for Media Mail Parcels](#)
- [3.0 Rate Eligibility for Media Mail Parcels](#)

### 1.0 Media Mail Rates and Fees

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Media Mail Rate Application

The Media Mail rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. (Rate application is identical for the single-piece and presort rates.) For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per piece is that for a piece weighing 1 pound. [P013.5.4]

#### 1.3 Media Mail Presorted Rates

See [Exhibit 1.3 Media Mail Presorted Rates](#) [R700.3.0]

#### 1.4 Mailing Fee

A mailing fee must be paid once each 12-month period at each post office of mailing by or for any person who mails at the Presorted Media Mail rates. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment. Presort mailing fees for Media Mail, per 12-month period: \$150.00. [E713.3.2 and R700.5.3]

#### 1.5 Computing Postage for Media Mail

##### 1.5.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

##### 1.5.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any discounts). To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece. [P013.9.2]

### Exhibit 1.3 Media Mail Presorted Rates

| Weight Not Over (pounds) | Basic <sup>1</sup> | 5-Digit | Weight Not Over (pounds) | Basic <sup>1</sup> | 5-Digit |

| 25                       | 9.04               | 8.72    | 60                       | 19.54              | 19.22   |
| 26                       | 9.34               | 9.02    | 61                       | 19.84              | 19.52   |
| 27                       | 9.64               | 9.32    | 62                       | 20.14              | 19.82   |
| 28                       | 9.94               | 9.62    | 63                       | 20.44              | 20.12   |
| 29                       | 10.24              | 9.92    | 64                       | 20.74              | 20.42   |
| 30                       | 10.54              | 10.22   | 65                       | 21.04              | 20.72   |
| 31                       | 10.84              | 10.52   | 66                       | 21.34              | 21.02   |
| 32                       | 11.14              | 10.82   | 67                       | 21.64              | 21.32   |
| 33                       | 11.44              | 11.12   | 68                       | 21.94              | 21.62   |
| 34                       | 11.74              | 11.42   | 69                       | 22.24              | 21.92   |
| 35                       | 12.04              | 11.72   | 70                       | 22.54              | 22.22   |

1. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50 piece minimum).

[R700.3.0]

**1.5.3 Computing Postage for Permit Imprint**

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent. [P013.9.1]

**2.0 Content Standards for Media Mail Parcels****2.1 General**

Mailable matter meeting one of the specific eligibility standards in 2.2, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Media Mail. [E710.1.1]

**2.2 Content Standards**

Only these items may be mailed at the Media Mail rates:

- a. Books, including books issued to supplement other books, of at least eight printed pages, consisting wholly of reading matter or scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising matter other than incidental announcements of books. Advertising includes paid advertising and the publishers' own advertising in display, classified, or editorial style.
- b. 16-millimeter or narrower width films, which must be positive prints in final form for viewing, and catalogs of such films of 24 pages or more (at least 22 of which are printed). Films and film catalogs sent to or from commercial theaters do not qualify for the Media Mail rate.
- c. Printed music, whether in bound or sheet form.
- d. Printed objective test materials and their accessories used by or on behalf of educational institutions to test ability, aptitude, achievement, interests, and other mental and personal qualities with or without answers, test scores, or identifying information recorded thereon in writing or by mark.
- e. Sound recordings, including incidental announcements of recordings and guides or scripts prepared solely for use with such recordings. Video recordings and player piano rolls are classified as sound recordings.
- f. Playscripts and manuscripts for books, periodicals, and music.
- g. Printed educational reference charts designed to instruct or train individuals for improving or developing their capabilities. Each chart must be a single printed sheet of information designed for educational reference. The information on the chart, which may be printed on one or both sides of the sheet, must be conveyed primarily by graphs, diagrams, tables, or other nonnarrative matter. An educational reference chart is normally but not necessarily devoted to one subject. A chart on which the information is conveyed primarily by textual matter in a narrative form does not qualify as a printed educational reference chart for mailing at the Media Mail rates even if it includes graphs, diagrams, or tables. Examples of qualifying charts include maps produced primarily for educational

reference, tables of mathematical or scientific equations, noun declensions or verb conjugations used in the study of languages, periodic table of elements, botanical or zoological tables, and other tables used in the study of science.

- h. Loose-leaf pages and their binders consisting of medical information for distribution to doctors, hospitals, medical schools, and medical students.
- i. Computer-readable media containing prerecorded information and guides or scripts prepared solely for use with such media. [E713.1.1]

### **2.3 Postal Inspection**

Media Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Media Mail rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### **2.4 Attachments and Enclosures**

#### **2.4.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Media Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **2.4.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Media Mail piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Media Mail rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

#### **2.4.3 Loose Enclosures**

Any printed matter that is mailable as Standard Mail may be included loose with any qualifying material mailed at the Media Mail rates. [E713.1.2]

#### **2.4.4 Enclosures in Books**

Enclosures in books mailed at Media Mail rates are subject to these additional standards:

- a. Either one envelope or one addressed postcard may be bound into the pages of a book. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.4.4b](#).

- b. One order form may be bound into the pages of a book. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.4.4a](#).
- c. Announcements of books may appear as book pages. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related or other materials or services. Announcements may fully describe the conditions and methods of ordering books and may contain ordering instructions for use with a separate order form. Up to three of these announcements may contain as part of their format a single order form, which may also serve as a postcard. The order forms permitted with these announcements are in addition to, and not in place of, order forms that may be enclosed under [2.4.4a](#) or [2.4.4b](#). [E713.1.3]

## 2.5 Written Additions

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

## 3.0 Rate Eligibility for Media Mail Parcels

### 3.1 Basic Weight Standards

There is no minimum weight for Media Mail. A single piece of Media Mail can weigh no more than 70 pounds. [E710.1.2]

### 3.2 Rate Eligibility Standards

A Presorted Media Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic rates. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort rate and those pieces that meet the basic presort requirements are eligible for the basic rates, subject to the preparation standards in [475.5.0, Preparation for Media Mail Parcels](#), or [705.8.0, Preparation for Pallets](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters. [E713.3.1]

### 3.3 Delivery and Return Addresses

All Media Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) or detached address labels under [602.4.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

### 3.4 Rate Categories for Media Mail

Media Mail rates are based on the weight of the piece without regard to zone. The rate categories and discounts are as follows:

- a. To qualify for the 5-digit rate, a piece must be prepared and sorted to either 5-digit scheme (machinable parcels only) and 5-digit sacks under [475.5.0, Preparation for Media Mail Parcels](#), or to 5-digit scheme (machinable parcels only) and 5-digit pallets under [705.8.0](#). All logical 5-digit bundles on pallets must contain at least 10 pieces. Nonmachinable parcels may qualify for the 5-digit rate if prepared to preserve sortation by 5-digit ZIP Code as prescribed by the postmaster of the mailing office. [E713.3.3]
- b. All pieces prepared and sorted under [475.5.0, Preparation for Media Mail Parcels](#), or [705.8.0, Preparation for Pallets](#), that are not eligible for the 5-digit rate qualify for the basic rate. Nonmachinable parcels may qualify for the basic rate if prepared to preserve sortation by BMC as prescribed by the postmaster of the mailing office. [E713.3.4]
- c. Barcoded Discount. The barcoded discount applies to Media Mail machinable parcels (see [401.1.5.1](#)) that are included in a mailing of at least 50 pieces of Media Mail. The pieces must be entered either at single-piece rates or basic rates and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [402.4.0](#). The barcoded discount is not available for pieces mailed at 5-digit rates. [E713.2.0]

# 474 Postage Payment and Documentation

## Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

## 1.0 Basic Standards for Postage Payment

### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Media Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces. [P700.1.1]

## 2.0 Mailing Documentation

### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the separation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

### 2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

### 2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

474.2.5

### **2.5 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#). [P012.1.5]

### **2.6 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

### **2.7 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

# 475 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation for Media Mail Parcels](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and, except for certain parcel rates, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Media Mail and any other type of mail may not be part of the same mailing even if in the same processing category. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. **5-digit:** the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. **5-digit scheme (pallets and sacks) for Media Mail parcels:** the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- c. **3-digit:** the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. **ADC:** all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- e. **ASF/BMC:** all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).

- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- g. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. A *5-digit scheme sort for Media Mail parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for rate eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- e. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry* facility. *Entry BMC* includes subordinate ASFs unless otherwise specified.

- g. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- h. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#).
- i. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#). [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

All pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counter-stacking”)

Bundles of pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.

- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.5 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Media Mail must meet the applicable minimum and maximum bundle size standards in [5.0, Preparation for Media Mail Parcels](#), and [705.8.0, Preparation for Pallets](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles.

Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#) and each physical bundle, including carrier route rate mail, must always contain at least two pieces. [M020.1.6]

### 2.6 Exception to Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

## 2.7 Labeling Bundles

The presort level of each bundle must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

## 2.8 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under 708.7.0. [M013.1.1]

## 3.0 Sacks

### 3.1 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

## 4.0 Sack Labels

### 4.1 Basic Standards for Labels

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE    |
|-------------------------|---------|
| Digit                   | D       |
| General Delivery Unit   | G       |
| Highway Contract Route  | H       |
| Irregular Parcels       | IRREG   |
| Machinable              | MACH    |
| Mixed                   | MXD     |
| Package Services        | PSVC    |
| Parcels                 | PARCELS |
| Post Office Box Section | B       |
| Rural Route             | R       |
| Working                 | WKG     |

[M031.5.0]

**4.5 Line 3 (Office of Mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**4.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**4.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**4.8 Barcoded Sack Labels****4.8.1 Basic Standards for Barcoded Sack Labels**

Barcoded sack labels are not required on Presorted Media Mail mailings. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

**4.8.2 Physical Characteristics of Barcoded Sack Labels**

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#), *Barcode*.
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).

- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation for Media Mail Parcels

### 5.1 Basic Standards

All mailings of Presorted Media Mail are subject to the standards in 5.0 and to these general requirements:

- a. Each mailing must meet the applicable rate and eligibility standards in 473 and 1.0 through 4.0 in *Mail Preparation*.
- b. All pieces in a mailing must be within the same processing category as described in 401.1.0. A Media Mail irregular parcel is a piece that is not a machinable parcel as defined in 401.1.5. Pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under 601.7.0 also are irregular parcels.
- c. All pieces must be sorted to the finest extent possible or palletized under 705.8.0.
- d. Each piece claimed at Media Mail rates must be marked "Media Mail." Each piece claimed at Presorted Media Mail rates also must be marked "Presorted" or "PRSRT" under 402.2.0. [M730.1.1]

### 5.2 Preparation for Machinable Parcels

#### 5.2.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer's option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed BMC sacks). Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternately, mailers may sack by the actual piece count, mail weight for each bundle destination, or 1,000 cubic inch minimum, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used. [M730.4.1]

### 5.2.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme: optional.
  1. Line 1: use [L606](#), Column B.
  2. Line 2: "PSVC MACH 5D SCHEME" or "PSVC MACH 5D SCH."
- b. 5-digit: optional, but required for 5-digit rate eligibility.
  1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).
  2. Line 2: "PSVC MACH 5D."
- c. BMC: required.
  1. Line 1: use [L601](#), Column B.
  2. Line 2: "PSVC MACH BMC."
- d. Mixed BMC: required (no minimum).
  1. Line 1: "MXD" followed by the [L601](#), Column B information for the BMC serving the 3-digit ZIP Code of entry post office.
  2. Line 2: "PSVC MACH WKG." [[M730.4.2](#)]

### 5.2.3 Standards for Barcoded Discount

The barcoded discount applies to Media Mail machinable parcels (see [401.1.5](#)) that are included in a mailing of at least 50 pieces of Media Mail. The pieces must be entered either at single-piece rates or basic rates and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0](#). The barcoded discount is not available for pieces mailed at 5-digit rates. [[E713.2.0](#)]

## 5.3 Preparation for Irregular Parcels

### 5.3.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Bundling is not required for pieces placed in 5-digit scheme sacks and 5-digit sacks when such pieces are enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag and the minimum bundle volume is met. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces. Bundling is also subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies), or

bundle by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces in each bundle and their total weight.

- c. Mailers must note on the postage statement which sacking method was used. [M730.3.1]

#### 5.3.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit rate eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M730.3.2]

#### 5.3.3 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer's option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks). Optional 5-digit scheme sacks may be prepared only when there are at least 10 addressed pieces or 20 pounds. Smaller volumes are not permitted (except in mixed ADC sacks). Sacking is also subject to these conditions:

- a. Identical-weight pieces weighing 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternatively, mailers may sack by the actual piece count, mail weight for each destination, or 1,000 cubic inch minimum, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces in each sack and their total weight.
- c. Mailers must note on the postage statement which sacking method was used. [M730.3.3]

#### 5.3.4 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme: optional.
  - 1. Line 1: use [L606](#), Column B.
  - 2. Line 2: "PSVC IRREG 5D SCHEME" or "PSVC IRREG 5D SCH."
- b. 5-digit: optional, but required for 5-digit rate eligibility.
  - 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [4.3](#) for overseas military mail).

- 2. Line 2: "PSVC IRREG 5D."
- c. 3-digit: required.
  - 1. Line 1: use [L002](#), Column A.
  - 2. Line 2: "PSVC IRREG 3D."
- d. ADC: required.
  - 1. Line 1: use [L004](#), Column B.
  - 2. Line 2: "PSVC IRREG ADC."
- e. Mixed ADC: required (no minimum).
  - 1. [\[02-03-05\]](#) Line 1: "MXD" followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry post office, as shown in [L004](#). If placed on an ASF or BMC pallet under option in [705.8.10.4](#), use [L010](#).
  - 2. Line 2: "PSVC IRREG WKG." [\[M730.3.4\]](#)

## 476 Enter and Deposit

### Overview

[1.0 Verification and Deposit](#)

### 1.0 Verification and Deposit

#### 1.1 Verification and Entry

All presorted and barcoded discount mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). [D700.2.2]

## **480 Discount Parcels Library Mail**

483 Rates and Eligibility

484 Postage Payment and Documentation

485 Mail Preparation

486 Enter and Deposit

## 483 Rates and Eligibility

### Overview

- [1.0 Library Mail Rates and Fees](#)
- [2.0 Content Standards for Library Mail Parcels](#)
- [3.0 Rate Eligibility for Library Mail Parcels](#)

### 1.0 Library Mail Rates and Fees

#### 1.1 Rate Application

Postage is based on the rate that applies to the weight (postage) increment of each addressed piece. [P013.2.1]

#### 1.2 Library Mail Rate Application

The Library Mail rate is charged per pound or fraction thereof; any fraction of a pound is considered a whole pound. For example, if an item weighs 4.225 pounds, the weight (postage) increment is 5 pounds. The minimum postage rate per addressed piece is that for an addressed piece weighing 1 pound. [P013.5.5]

#### 1.3 Library Mail Presorted Rates

See [Exhibit 1.3 Library Mail Presorted Rates](#) [R700.4.0]

#### 1.4 Mailing Fee

A mailing fee must be paid once each 12-month period at each post office of mailing by or for any person who mails at the Presorted Library Mail rates. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that in effect on the date of payment.

Presort mailing fees for Library Mail, per 12-month period: \$150.00.

[E714.3.2 and R700.5.3]

#### 1.5 Computing Postage for Library Mail

##### 1.5.1 Determining Single-Piece Weight

To determine single-piece weight in any mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in a mailing of identical-weight pieces, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places.

[P013.1.3]

##### 1.5.2 Computing Postage for Affixed Postage

For each piece, affix the postage for the weight increment (including any discounts).

To calculate the total postage for the mailing, add all of the affixed postage amounts for each piece. [P013.9.2]

##### 1.5.3 Computing Postage for Permit Imprint

To compute the total postage for a mailing, for each weight increment, multiply the number of pieces by the applicable rate per piece. Round each product off to four decimal places. Add the products and round up the total postage to the nearest whole cent. [P013.9.1]

### Exhibit 1.3 Library Mail Presorted Rates

| Weight Not Over (pounds) | Basic <sup>1</sup> | 5-Digit |
|--------------------------|--------------------|---------|
| 1                        | \$1.06             | \$0.76  |
| 2                        | 1.46               | 1.16    |
| 3                        | 1.86               | 1.56    |
| 4                        | 2.26               | 1.96    |
| 5                        | 2.66               | 2.36    |
| 6                        | 3.06               | 2.76    |
| 7                        | 3.46               | 3.16    |

| 57                       | 17.96              | 17.66   |
| 58                       | 18.25              | 17.95   |
| 59                       | 18.54              | 18.24   |
| 60                       | 18.83              | 18.53   |
| 61                       | 19.12              | 18.82   |
| 62                       | 19.41              | 19.11   |
| 63                       | 19.70              | 19.40   |
| 64                       | 19.99              | 19.69   |
| 65                       | 20.28              | 19.98   |
| 66                       | 20.57              | 20.27   |
| 67                       | 20.86              | 20.56   |
| 68                       | 21.15              | 20.85   |
| 69                       | 21.44              | 21.14   |
| 70                       | 21.73              | 21.43   |

1. Machinable parcels may be eligible for barcoded discount of \$0.03 per parcel (50 piece minimum).

[R700.4.0]

## 2.0 Content Standards for Library Mail Parcels

### 2.1 General

Mailable matter meeting one of the specific eligibility standards in 2.3 or 2.4, as applicable, and that is neither mailed or required to be mailed as First-Class Mail nor entered as Periodicals, may be mailed as Library Mail. [E710.1.1]

### 2.2 Sender and Recipient Qualifications

Each piece must show in the address or return address the name of a school, college, university, public library, museum, or herbarium or the name of a nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organization or association. For Library Mail standards, these nonprofit organizations are defined in 703.1.0. [E714.1.1]

### 2.3 Content Standards for Mailings Between Entities

The items described in this section may be mailed at the Library Mail rate when sent between: (1) schools, colleges, universities, public libraries, museums, and herbariums and nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, and fraternal organizations or associations; (2) any such institution, organization, or association and an individual who has no financial interest in the sale, promotion, or distribution of the materials; or (3) any such institution, organization, or association and a publisher, if such institution, organization, or association has placed an order to buy such materials for delivery to itself:

- a. Books, consisting wholly of reading matter, scholarly bibliography, or reading matter with incidental blank spaces for notations and containing no advertising, except for incidental announcements of books.
- b. Printed music, whether in bound or sheet form.
- c. Bound volumes of academic theses, whether in typewritten or duplicated form.
- d. Periodicals, whether bound or unbound.
- e. Sound recordings.
- f. Other library materials in printed, duplicated, or photographic form or in the form of unpublished manuscripts.
- g. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials for informing and furthering the educational work and interests of museums and herbariums. [E714.1.2]

### 2.4 Qualified Mailings “To” or “From”

The following specific items may be mailed at the Library Mail rate when sent to or from schools, colleges, universities, public libraries, museums, and herbariums and to or from nonprofit religious, educational, scientific, philanthropic (charitable), agricultural, labor, veterans, or fraternal organizations:

- a. 16-millimeter or narrower width films, filmstrips, transparencies, slides, and microfilms. All must be positive prints in final form for viewing.
- b. Sound recordings.

483.2.5

- c. Museum materials, specimens, collections, teaching aids, printed matter, and interpretive materials intended for informing and furthering the educational work and interests of museums and herbariums.
- d. Scientific or mathematical kits, instruments, or other devices.
- e. Catalogs of the materials in [2.4a.](#) through [2.4d](#) and guides or scripts prepared solely for use with such materials. [E714.1.3]

### **2.5 Postal Inspection**

Library Mail is not sealed against postal inspection. Regardless of physical closure, the mailing of articles at Library Mail rates constitutes consent by the mailer to postal inspection of the contents. [E710.1.3]

### **2.6 Attachments and Enclosures**

#### **2.6.1 Invoice**

An invoice, whether it also serves as a bill, may be placed either inside a Library Mail piece or in an envelope marked "Invoice Enclosed" and attached to the outside of the piece if the invoice relates solely to the matter with which it is mailed. The invoice may show this information:

- a. Names and addresses of the sender and addressee.
- b. Names and quantities of the articles enclosed, descriptions of each (e.g., price, tax, style, stock number, size, and quality, and, if defective, nature of defects).
- c. Order or file number, date of order, date and manner of shipment, shipping weight, postage paid, and initials or name of packer or checker. [E710.1.5]

#### **2.6.2 Incidental First-Class Attachments and Enclosures**

Incidental First-Class matter may be enclosed in or attached to any Library Mail piece without payment of First-Class postage. An incidental First-Class attachment or enclosure must be matter that, if mailed separately, would require First-Class postage, is closely associated with but secondary to the host piece, and is prepared so as not to interfere with postal processing. An incidental First-Class attachment or enclosure may be a bill for the product or publication, a statement of account for past products or publications, or a personal message or greeting included with a product, publication, or parcel. Postage at the Library Mail rate for the host piece is based on the combined weight of the host piece and the incidental First-Class attachment or enclosure. [E710.1.6]

#### **2.6.3 Enclosures in Books and Sound Recordings**

Books and sound recordings mailed at the Library Mail rate may contain these enclosures as well as the additions and enclosures permitted under [2.6.1](#), [2.6.2](#), and [2.7](#):

- a. Either one envelope or one addressed postcard. If also serving as an order form, the envelope or card may be in addition to the order form permitted by [2.6.3b](#).
- b. One order form. If also serving as an envelope or postcard, the order form may be in addition to the envelope or card permitted by [2.6.3a](#).

- c. With books, announcements of books in book pages or as loose enclosures. These announcements must be incidental and exclusively devoted to books, without extraneous advertising of book-related materials or services. Announcements may fully describe the conditions and methods of ordering books (such as by membership in book clubs) and may contain ordering instructions for use with the single order form.
- d. With sound recordings, announcements of sound recordings on title labels, on protective sleeves, on the carton or wrapper, or on loose enclosures. These announcements of sound recordings must be incidental and exclusively devoted to sound recordings. They may not contain extraneous advertising of recording-related materials or services. Announcements may fully describe the conditions and methods of ordering sound recordings (such as by membership in sound recording clubs) and may contain ordering instructions for use with the single order form. [E714.1.4]

#### **2.6.4 Other Enclosures**

Material mailed at the Library Mail rate other than books and sound recordings may contain only those additions and enclosures permitted under [2.6.1](#), [2.6.2](#), and [2.7](#). [E714.1.5]

### **2.7 Written Additions**

Markings that have the character of personal correspondence require, with certain exceptions, additional postage at the First-Class rates. The following written additions and enclosures do not require additional First-Class postage:

- a. The sender's and the addressee's names, occupations, and addresses, preceded by "From" or "To," and directions for handling.
- b. Marks, numbers, names, or letters describing the contents.
- c. Words or phrases such as "Do Not Open Until Christmas" and "Happy Birthday, Mother."
- d. Instructions and directions for the use of the item mailed.
- e. A manuscript dedication or inscription not having the nature of personal correspondence.
- f. Marks to call attention to words or passages in the text.
- g. Corrections of typographical errors in printed matter.
- h. Manuscripts accompanying related proof sheets and corrections of proof sheets including corrections of typographical and other errors, changes in the text, insertions of new text, marginal instructions to the printer, and corrective rewrites of parts.
- i. Handstamped imprints, unless the added material is in itself personal or converts the original matter to a personal communication.
- j. Matter mailable separately as Standard Mail printed on the wrapper, envelope, tag, or label. [E710.1.4]

483.3.1

### 3.0 Rate Eligibility for Library Mail Parcels

#### 3.1 Basic Weight Standards

There is no minimum weight for Library Mail. A single piece of Library Mail can weigh no more than 70 pounds. [E710.1.2]

#### 3.2 Rate Eligibility Standards

A Presorted Library Mail mailing must contain a minimum of 300 pieces claimed at any combination of 5-digit and basic rates. Those pieces in the mailing that meet the 5-digit presort requirements are eligible for the 5-digit presort rate, and those pieces that meet the basic presort requirements are eligible for the basic rate, subject to the preparation standards in [485.5.0, Preparation of Library Mail Parcels](#), or [705.8.0, Preparation for Pallets](#). Pieces in a mailing do not need to be identical in size and content. Such nonidentical pieces may be merged, sorted together, and presented as a single mailing either with the correct postage affixed to each piece in the mailing or with postage paid with a permit imprint if authorized by Business Mailer Support (BMS), USPS headquarters. [E714.3.1]

#### 3.3 Delivery and Return Addresses

All Library Mail must bear a delivery address. The delivery address on each piece must include the correct ZIP Code or ZIP+4 code. Alternative addressing formats under [602.3.0](#) may be used. Each piece must bear the sender's return address. [E710.3.1]

#### 3.4 Rate Categories for Library Mail

Library Mail rates are based on the weight of the piece without regard to zone. The rate categories and discounts are as follows:

- a. To qualify for the 5-digit rate, a piece must be prepared and sorted to either 5-digit scheme (machinable parcels only) and 5-digit sacks under [485.5.0, Preparation of Library Mail Parcels](#), or to 5-digit scheme (machinable parcels only) and 5-digit pallets under [705.8.0](#). All logical 5-digit bundles on pallets must contain at least 10 pieces. Nonmachinable parcels may qualify for the 5-digit rate if prepared to preserve sortation by 5-digit ZIP Code as prescribed by the postmaster of the mailing office. [E714.3.3]
- b. All pieces prepared and sorted under [485.5.0, Preparation of Library Mail Parcels](#), or [705.8.0, Preparation for Pallets](#), that are not eligible for the 5-digit rate qualify for the basic rate. Nonmachinable parcels may qualify for the basic rate if prepared to preserve sortation by BMC as prescribed by the postmaster. [E714.3.4]
- c. Barcoded Discount. The barcoded discount applies to Library Mail machinable parcels (see [401.1.5](#)) that are included in a mailing of at least 50 pieces of Library Mail. The pieces must be entered either at single-piece rates or basic rates and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0](#). The barcoded discount is not available for pieces mailed at 5-digit rates. [E714.2.0]

# 484 Postage Payment and Documentation

## Overview

- [1.0 Basic Standards for Postage Payment](#)
- [2.0 Mailing Documentation](#)

## 1.0 Basic Standards for Postage Payment

### 1.1 Postage Payment Options

The mailer is responsible for proper postage payment. Subject to the corresponding standards, postage for Library Mail may be paid by any method (see [604](#)) except precanceled stamps. Pieces with postage affixed must bear the correct postage. Permit imprint may be used for mailings that contain nonidentical-weight pieces only when authorized by Business Mailer Support. Permit imprint may be used for identical-weight pieces. [P700.1.1]

## 2.0 Mailing Documentation

### 2.1 Completing Postage Statements

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 2.2 Basic Documentation Standards

Generally, documentation is required from a mailer when a mailing is presented to the USPS. Supporting documentation of postage is required unless the correct rate is affixed to each piece or each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Documentation describes the preparation, rate levels, and content of the mailing; details the volume and postage data; and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

### 2.3 Preparing Documentation

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

### 2.4 Multiple Standards

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

484.2.5

### **2.5 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under [607.2.0](#). [P012.1.5]

### **2.6 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

### **2.7 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix optional). All parts, and line numbers within each part, must reflect those on the USPS form. In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the “Certification” and “USPS Use Only” fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. [P012.4.3]

# 485 Mail Preparation

## Overview

- [1.0 General Information for Mail Preparation](#)
- [2.0 Bundles](#)
- [3.0 Sacks](#)
- [4.0 Sack Labels](#)
- [5.0 Preparation of Library Mail Parcels](#)

## 1.0 General Information for Mail Preparation

### 1.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Not all presort levels are applicable in all situations. [M011.1.1]

### 1.2 Definition of Mailings

Mailings are defined as:

- a. **General.** A mailing is a group of pieces within the same class of mail and, except for certain parcel rates, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Library Mail and any other type of mail may not be part of the same mailing even if in the same processing category. [M011.1.4]

### 1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. **5-digit:** the delivery address on all pieces includes the same 5-digit ZIP Code.
- b. **5-digit scheme (pallets and sacks) for Library Mail parcels:** the ZIP Code in the delivery address on all pieces begins with one of the 5-digit ZIP Code zones processed by the USPS as a single scheme, as shown in [L606](#).
- c. **3-digit:** the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- d. **ADC:** all pieces are addressed for delivery in the service area of the same area distribution center (ADC) (see [L004](#)).
- e. **ASF/BMC:** all pieces are addressed for delivery in the service area of the same auxiliary service facility (ASF) or bulk mail center (BMC) (see [L601](#), [L602](#), or [L605](#)).

485.1.4

- f. *Mixed [BMC, ADC, etc.]*: the pieces are for delivery in the service area of more than one BMC, ADC, etc.
- g. *Residual* pieces/bundles/sacks contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [M011.1.2]

### 1.4 Preparation Definitions and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full sack* is defined in the standards for the class and rate claimed.
- c. A *5-digit scheme sort* for Library Mail *parcels* yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in [L606](#) and 5-digit sacks or pallets for other ZIP Codes. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is always optional, including when 5-digit sortation is required for rate eligibility. The 5-digit scheme sort need not be used for all possible 5-digit scheme sorts.
- d. The *required at [quantity]* instruction (e.g., “required at 10 pieces”) means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- e. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- f. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., “entry BMC”) that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer’s location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry* facility. *Entry BMC* includes subordinate ASFs unless otherwise specified.

- g. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- h. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#).
- i. A “*logical*” *presort destination* represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. [M011.1.3]

## 2.0 Bundles

### 2.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. Bundle preparation is described in [2.0](#). [M011.1.3z]

### 2.2 Arranging Pieces in a Bundle (“Facing”)

Except as noted in [2.3, Preparing Bundles of Pieces of Nonuniform Thickness \(“Counter-stacking”\)](#), all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

### 2.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counter-stacking”)

Bundles of pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.

485.2.4

- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

### 2.4 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 2.5 Bundle Sizes

Each logical bundle (the total group of pieces for a bundle destination) of Library Mail must meet the applicable minimum and maximum bundle size standards in [5.0, Preparation of Library Mail Parcels](#), or [705.8.0, Preparation for Pallets](#). The pieces in the logical bundle must then be secured in a physical bundle or bundles. Wherever possible, each physical bundle for a logical bundle destination should contain at least the minimum bundle size. The size of each physical bundle for a specific logical bundle destination may, however, contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum depending on the size of the pieces in the mailing or the total quantity of the pieces to that destination. Unless otherwise noted, the maximum weight for bundles in sacks is 20 pounds. Bundles prepared on pallets must meet the additional bundling requirements under [705.8.0](#) and each physical bundle, including carrier route rate mail, must always contain at least two pieces. [M020.1.6]

### 2.6 Exception to Bundle Sizes

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

## 2.7 Labeling Bundles

The presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. The label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Five-digit presort level, red Label 5.
- b. Three-digit presort level, green Label 3.
- c. ADC presort level, pink Label A.
- d. Mixed ADC presort level, tan Label X. [M020.1.3]

## 2.8 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece under 708.7.0. [M013.1.1]

## 3.0 Sacks

### 3.1 Sack Preparation

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

## 4.0 Sack Labels

### 4.1 Basic Standards

Only sack labels may be used for sacks. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. [M031.1.1]

### 4.2 Physical Characteristics of a Sack Label

A sack label must meet these specifications:

- a. Color: white or manila.
- b. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- c. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum. [M031.2.1]

### 4.3 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

### 4.4 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. [M031.1.3]
- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack labels.

| CONTENT TYPE            | CODE    |
|-------------------------|---------|

[M031.5.0]

**4.5 Line 3 (Office of mailing or Mailer Information Line)**

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

**4.6 Abbreviations for Lines 1 and 3**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

**4.7 Placement of Extraneous Information**

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- a. It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- b. It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as "Mailer," "From" (or "FR"), or "Entered at" may appear before the required information on Line 3.

[M031.1.5]

**4.8 Barcoded Sack Labels****4.8.1 Basic Standards for Barcoded Sack Labels**

Barcoded sack labels are not required on Presorted Library Mail mailings. If used, they must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [708.6.0](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

**4.8.2 Physical Characteristics of Barcoded Sack Labels**

A barcoded sack label must meet these specifications:

- a. Color: white or manila.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).

485.5.1

- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

## 5.0 Preparation of Library Mail Parcels

### 5.1 Basic Standards

All mailings of Presorted Library Mail are subject to the standards in [5.0, Preparation of Library Mail Parcels](#), and to these general standards:

- a. Each mailing must meet the rate and eligibility standards in [483](#) and [1.0](#) through [4.0 in Mail Preparation](#).
- b. All pieces in a mailing must be within the same processing category as described in [401.1.0](#). A Library Mail irregular parcel is a piece that is not a machinable parcel as defined in [401.1.5](#). Pieces that meet the size and weight standards for a machinable parcel but are not individually boxed or packaged to withstand processing on BMC parcel sorters under [601.7.0](#) are also considered irregular parcels.
- c. All pieces must be sorted to the finest extent possible or palletized under [705.8.0](#).
- d. Each piece claimed at Library Mail rates must be marked "Library Mail." Each piece claimed at Presorted Library Mail rates also must be marked "Presorted" or "PRSRT." (See [402.](#)) [M740.1.1]

### 5.2 Preparation for Machinable Parcels

#### 5.2.1 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer's option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed BMC sacks). Sacking also is subject to these conditions:

- a. Identical-weight pieces that weigh 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternately, mailers may sack by the actual piece count, mail weight for each bundle destination, or 1,000 cubic inch minimum, provided that documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used. [M740.4.1]

### 5.2.2 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme: optional.
  1. Line 1: use L606, Column B.
  2. Line 2: "PSVC MACH 5D SCHEME" or "PSVC MACH 5D SCH."
- b. 5-digit: optional, but required for 5-digit rate eligibility.
  1. Line 1: use city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
  2. Line 2: "PSVC MACH 5D."
- c. BMC: required.
  1. Line 1: use L601, Column B.
  2. Line 2: "PSVC MACH BMC."
- d. Mixed BMC: required (no minimum).
  1. Line 1: "MXD" followed by the L601, Column B information for the BMC serving the 3-digit ZIP Code of entry post office.
  2. Line 2: "PSVC MACH WKG." [M740.4.2]

## 5.3 Preparation for Irregular Parcels

### 5.3.1 Required Bundling

A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches a minimum of 10 pieces. Smaller volumes are not permitted except for mixed ADC bundles. Bundling is not required for pieces placed in 5-digit scheme sacks and 5-digit sacks when such pieces are enclosed in an envelope, full-length sleeve, full-length wrapper, or polybag and the minimum bundle volume is met. The maximum weight of each physical bundle is 20 pounds, except that 5-digit bundles placed in 5-digit sacks may weigh a maximum of 40 pounds. Each physical bundle must contain at least two addressed pieces. Bundling is also subject to these conditions:

- a. Identical-weight pieces that weigh 1 pound or less must be prepared using the 10-piece minimum; those that weigh more than 1 pound must be prepared using the 10-pound minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies) or bundle by the actual piece count or mail weight for each sack, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used. [M740.3.1]

### 5.3.2 Bundling and Labeling

Preparation sequence, bundle size, and labeling:

- a. 5-digit (optional, but required for 5-digit rate eligibility); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M740.3.2]

### 5.3.3 Required Sacking

A sack must be prepared when the quantity of mail for a required presort destination reaches 10 addressed pieces or 20 pounds, whichever occurs first. At the mailer's option, a sack may be prepared when the quantity of mail reaches 1,000 cubic inches. Smaller volumes are not permitted (except in mixed ADC sacks).

Sacking is also subject to these conditions:

- a. Identical-weight pieces weighing 2 pounds or less must be sacked using the 10-piece minimum; those that weigh more must be sacked using the 20-pound or 1,000 cubic inch minimum.
- b. For nonidentical-weight pieces, mailers must use either the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 20-pound minimum applies). Alternatively, mailers may sack by the actual piece count, mail weight for each bundle destination, or 1,000 cubic inch minimum, if documentation can be provided with the mailing that shows (specifically for each sack) the number of pieces and their total weight.
- c. Mailers must note on the postage statement which sacking method was used. [M740.3.3]

### 5.3.4 Sacking and Labeling

Preparation sequence and labeling:

- a. 5-digit scheme: optional.
  1. Line 1: use L606, Column B.
  2. Line 2: "PSVC IRREG 5D SCHEME" or "PSVC IRREG 5D SCH."
- b. 5-digit: optional, but required for 5-digit rate eligibility.
  1. Line 1: use city, state, and 5-digit ZIP Code on mail (see 4.3 for overseas military mail).
  2. Line 2: "PSVC IRREG 5D."
- c. 3-digit: required.
  1. Line 1: use L002, Column A.
  2. Line 2: "PSVC IRREG 3D."
- d. ADC: required.
  1. Line 1: use L004, Column B.

2. Line 2: "PSVC IRREG ADC."
- e. Mixed ADC: required (no minimum).
  1. [02-03-05] Line 1: "MXD" followed by city, state, and ZIP Code of ADC serving 3-digit ZIP Code prefix of entry post office, as shown in [L004](#). If placed on as ASF or BMC pallet under option in [705.8.10.4](#), use [L010](#).
  2. Line 2: "PSVC IRREG WKG." [M740.3.4]

**5.4 Standards for Barcoded Discount**

The barcoded discount applies to Library Mail machinable parcels (see [401.1.5](#)) that are included in a mailing of at least 50 pieces of Library Mail. The pieces must be entered either at single-piece rates or basic rates and bear a correct, readable barcode for the ZIP Code shown in the delivery address as required by [708.5.0](#). The barcoded discount is not available for pieces mailed at 5-digit rates. [E714.2.0]

## 486 Enter and Deposit

### Overview

[1.0 Verification and Deposit](#)

### 1.0 Verification and Deposit

#### 1.1 Verification and Entry

All presorted and barcoded discount mailings must be presented for verification and acceptance at the post office where the permit or license is held. All such mailings must be deposited at locations and times specified by the postmaster or designee at the office that verifies and accepts the mailing. Plant-loaded mailings must be presented as specified by the applicable standards and the plant load agreement. Metered mail may be deposited at other than the licensing post office only as permitted under [705.17.0](#). [D700.2.2]

- 12.0 Special Handling
- 13.0 Confirm
- 14.0 Money Orders

## 1.0 Extra Services for Express Mail

### 1.1 Available Services

#### 1.1.1 Mailing Receipt

A receipt showing the time and date of mailing must be provided to the mailer on acceptance of Express Mail by the USPS. This receipt is a copy of the multipart Express Mail label affixed to the mailpiece and serves as evidence of mailing. Mailers authorized to present Express Mail under Express Mail Manifesting procedures in [705.2.0](#) must use a one-ply label and retain the verification manifest as the mailing receipt. [S500.1.1]

#### 1.1.2 Proof of Delivery

Proof of delivery information for Express Mail is available as follows:

- a. Individual requests by article number can be retrieved at [www.usps.com](http://www.usps.com) or by calling 1-800-222-1811. A proof of delivery letter is provided via fax or mail.
- b. Bulk proof of delivery letters are available only to mailers using Express Mail Manifesting service and can be obtained in CD-ROM or Signature Extract File formats. For additional information see Publication 80, *Bulk Proof of Delivery Program*. [S500.1.2]

#### 1.1.3 Return Receipt

Return receipt service under [6.0](#) may be purchased for Express Mail. The return receipt serves as evidence of delivery. The fee paid for this service does not insure the mailpiece against loss or damage. If a return receipt is requested, the mailer must show a complete return address on the mailpiece. The return address on the Express Mail label meets this requirement. [S500.1.3]

503.1.1.4

**1.1.4 Restricted Delivery**

Restricted delivery service under 7.0 is not available for Express Mail. [S500.1.4]

**1.1.5 COD**

Collect on delivery (COD) service under 11.0 may be purchased with Express Mail next day and second day service only. [S500.1.5]

**1.1.6 Insurance and Indemnity**

Express Mail is insured against loss, damage, or rifling, subject to these standards:

- a. Insurance coverage for Express Mail drop shipment ends on receipt at the destination postal facility.
- b. All Express Mail signed for by the addressee, the addressee's agent, or the delivery employee constitutes a valid delivery, and no indemnity for loss is paid. A waiver of signature cannot be used for Express Mail Custom Designed Service, Express Mail COD, or Express Mail with additional insurance.
- c. Merchandise insurance coverage is provided against loss, damage, or rifling and is limited to a maximum liability of \$100. (Additional insurance under 1.1.7 may be purchased up to a maximum coverage of \$5,000.) Nonnegotiable documents are insured against loss, damage, or rifling, up to \$100 per piece, subject to the maximum limit per occurrence as defined in 609, *Filing Indemnity Claims for Loss or Damage*.
- d. Additional terms, coverage, and procedures of indemnity claims are in 609. [S500.1.6]

**1.1.7 Additional Insurance**

Additional insurance, up to a maximum coverage of \$5,000, may be purchased for merchandise valued at more than \$100 sent by Express Mail. The insurance fee is entered in the block marked "Insurance" on the mailing label. If the label does not contain this specific block, the mailer uses the "COD" block by crossing out "COD," writing "INS" to the right, and entering the fee for the applicable coverage. Coverage is limited to the actual value of the contents, regardless of the fee paid, or the highest insurance value increment for which the fee is fully paid, whichever is lower. If a waiver of signature is requested, additional insurance coverage is void.

[S500.1.7]

**1.1.8 Fees for Express Mail Insurance**

Fee, in addition to postage and other fees:

| <b>Express Mail Insurance</b>                       |   |
|---|---|
| (Amount for Merchandise Insurance Coverage Desired) |   |
|   | <b>Fee<sup>1</sup></b>  |
| \$0.01 to \$100.00                                  | \$0.00  |
| 100.01 to 5,000.00                                  | \$1.00 per \$100 or fraction thereof over \$100 in desired coverage |

1. Express Mail merchandise maximum coverage: \$5,000.00.  
Document reconstruction maximum liability: \$100.00.

[R900.11.0]

**1.2 Express Mail Drop Shipment**

For an Express Mail drop shipment, the content of each Express Mail pouch is considered one mailpiece for indemnity coverage, and the mail enclosed may receive only the following services:

- a. First-Class Mail pieces may be sent with Certified Mail service or special handling or, for First-Class Mail parcels only, electronic option Delivery Confirmation service or electronic option Signature Confirmation service.
- b. Priority Mail pieces may be sent with Certified Mail service, special handling, electronic option Delivery Confirmation, or electronic option Signature Confirmation.
- c. Standard Mail pieces subject to the residual shape surcharge (except Customized MarketMail) may be sent with electronic option Delivery Confirmation service.
- d. Package Services mail may be sent with special handling or, for Package Services parcels only, electronic option Delivery Confirmation service or electronic option Signature Confirmation service. [S500.2.0]

503.2.1

## 2.0 Registered Mail

### 2.1 Registered Mail Fees

Fees and charges are in addition to postage:

| Declared Value      | Fee (in addition to postage) | Declared Value                          | Fee (in addition to postage) <sup>1</sup> |                                     |
|---------------------|------------------------------|---|---|-------------------------------------|
| \$0.00              | \$7.50                       | \$25,000.01 to \$1,000,000              | \$30.10                                   |                                     |
| 0.01 to 100         | 8.00                         |   | + handling charge of                      |                                     |
| 100.01 to 500       | 8.85                         |   | \$0.85 per each \$1,000 or fraction       |                                     |
| 500.01 to 1,000     | 9.70                         |   | thereof over first \$25,000               |                                     |
| 1,000.01 to 2,000   | 10.55                        |   | \$1,000,000.01 to \$15,000,000            | \$858.85                            |
| 2,000.01 to 3,000   | 11.40                        |   |   | + handling charge of                |
| 3,000.01 to 4,000   | 12.25                        |   |   | \$0.85 per each \$1,000 or fraction |
| 4,000.01 to 5,000   | 13.10                        |   |   | thereof over first \$1,000,000      |
| 5,000.01 to 6,000   | 13.95                        |   |   | Over \$15,000,000                   |
| 6,000.01 to 7,000   | 14.80                        |   | + amount determined by USPS               |                                     |
| 7,000.01 to 8,000   | 15.65                        | based on weight, space, & value         |   |                                     |
| 8,000.01 to 9,000   | 16.50                        |   |   |                                     |
| 9,000.01 to 10,000  | 17.35                        |   |   |                                     |
| 10,000.01 to 11,000 | 18.20                        | <b>Additional Services</b>              | <b>Fee (in addition to postage)</b>       |                                     |
| 11,000.01 to 12,000 | 19.05                        | COD Collection Charge                   | \$4.00                                    |                                     |
| 12,000.01 to 13,000 | 19.90                        | (maximum amount collectible is \$1000)  |   |                                     |
| 13,000.01 to 14,000 | 20.75                        | Restricted Delivery                     | 3.50                                      |                                     |
| 14,000.01 to 15,000 | 21.60                        | Return Receipts,                        | 1.75                                      |                                     |
| 15,000.01 to 16,000 | 22.45                        | requested at time of mailing showing to |   |                                     |
| 16,000.01 to 17,000 | 23.30                        | whom, signature, date of delivery, and  |   |                                     |
| 17,000.01 to 18,000 | 24.15                        | addressee's address (if different)      |   |                                     |
| 18,000.01 to 19,000 | 25.00                        | Return Receipts,                        | 3.25                                      |                                     |
| 19,000.01 to 20,000 | 25.85                        | requested after mailing showing only to |   |                                     |
| 20,000.01 to 21,000 | 26.70                        | whom and date delivered                 |   |                                     |
| 21,000.01 to 22,000 | 27.55                        |   |   |                                     |
| 22,000.01 to 23,000 | 28.40                        |   |   |                                     |
| 23,000.01 to 24,000 | 29.25                        |   |   |                                     |
| 24,000.01 to 25,000 | 30.10                        |   |   |                                     |

1. Fees for articles valued over \$25,000 are for handling only. Maximum amount of insurance coverage available is \$25,000.

[R900.21.0]

## 2.2 Basic Information about Registered Mail

### 2.2.1 Description

Registered Mail is the most secure service that the USPS offers. It incorporates a system of receipts to monitor the movement of the mail from the point of acceptance to delivery. Registered Mail provides the sender with a mailing receipt and, upon request, electronic verification that an article was delivered or that a delivery attempt was made. Customers can retrieve the delivery status in three ways: (1) over the Internet at [www.usps.com](http://www.usps.com) by entering the article number shown on the mailing receipt; (2) by telephone at 1-800-222-1811; or (3) by bulk electronic file transfer for mailers who provide an electronic manifest to the Postal Service. The

Postal Service maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See [6.0](#) for details. [S911.1.1]

### 2.2.2 Eligible Matter

Only matter prepaid with postage at the First-Class Mail rates may be registered. The face (address side) of the registered article must be at least 5 inches long and 3-1/2 inches high, regardless of thickness. Items returned under merchandise return service ([507.9.0](#)) may be registered without prepayment of postage and fees. [S911.1.2]

### 2.2.3 Place of Mailing

Registration may be obtained by presenting mail to the following:

- a. A retail employee at a post office, station, or branch (including any contractor-operated unit). A postmaster may require that an article of unusually high value be presented only at the main office or at designated stations and branches.
- b. A rural carrier on a rural route. The article and sufficient cash for postage and required fees for mailing the article may be left in a rural mailbox. The carrier must hand any change to the sender or place it in an envelope and leave the envelope in the box on the carrier's next trip. Responsibility is not assumed for the article or cash until a receipt is issued. No responsibility is assumed for the change left in the box by the carrier.
- c. A rural carrier at a nonpersonnel rural unit. The sender must meet the rural carrier to have mail registered. [S911.1.3]

### 2.2.4 Ineligible Matter

Registration may not be obtained for mail that is handled as follows:

- a. Sent as business reply mail or in a business reply envelope.
- b. Placed in a street letterbox or post office maildrop.
- c. Addressed to a post office to which it cannot be transported safely.
- d. Prepared improperly or packed inadequately to withstand normal handling (see [2.4.7, Fragile Item](#)).
- e. Tied or fastened with one or more articles, unless enclosed in the same envelope or wrapper.
- f. Presented for mailing in a padded envelope; envelope or mailer manufactured of spun-bonded olefin, such as Tyvek; plastic envelope or mailer; or envelope or mailer made of glossy-coated paper. [S911.1.4]

### 2.2.5 Additional Services

Purchasing Registered Mail service allows customers to then purchase restricted delivery service or a return receipt. The following additional services may be combined with Registered Mail if the applicable standards for the services are met and the additional service fees are paid:

- a. Collect on delivery (COD) service.
- b. Delivery Confirmation.

c. Signature Confirmation. [S911.1.5]

## 2.3 Fees and Liability

### 2.3.1 Full Value

Regardless of any insurance that may cover the article, the mailer must always declare its full value to the USPS when presenting it for registration and mailing (see chart below). The mailer must tell the USPS clerk (or enter on the firm sheet if a firm mailer) the full value of mail matter presented for registration. Private insurance carried on Registered Mail does not modify the requirements for declaring the full value. The accepting USPS employee may ask the mailer to show that the full value of the matter presented is declared, and may refuse to accept the matter as Registered Mail if a satisfactory declaration of value is not provided. Only articles of no value may be mailed as Registered Mail without insurance.

| MAIL MATTER   | VALUE TO BE DECLARED   |
|---|--|
| Negotiable Instrument (instruments payable to bearer, including stock certificates endorsed in blank)   | Market value (value based on value at time of mailing)                         |
| Nonnegotiable Instrument [registered bonds, warehouse receipts, checks, drafts, deeds, wills, abstracts, and similar documents (certificates of stock considered nonnegotiable so far as declaration of value is concerned unless endorsed in blank)] | No value or replacement cost if postal insurance coverage desired <sup>1</sup> |
| Money   | Full value   |
| Jewelry, Gems, Precious Metal   | Market value or cost   |
| Merchandise   | Market value or cost   |
| Nonvaluable (matter without intrinsic value such as letters, files, records)  | No value or replacement cost if postal insurance coverage desired <sup>1</sup> |

1. A mailer who does not know replacement costs should contact a person or firm familiar with such documents and determine replacement costs before mailing the articles.

[S911.2.1]

### 2.3.2 Fee and Postage

The fee and postage may be paid with ordinary postage stamps, meter stamps, or permit imprints. If a permit imprint is used, the exact amount of postage and fees paid must be shown within the permit imprint. For pieces that are part of a manifest mailing, only the registry fee must be shown within the permit imprint. The fee and postage on official mail of authorized federal agencies may also be paid with penalty stamps, penalty meter stamps, or penalty permit imprints. The fees and postage on items registered with merchandise return service are paid through a postage due account under [507.9.0](#). [S911.2.2]

### 2.3.3 Postal Insurance

Postal insurance is provided for articles with a value of at least \$0.01 up to a maximum insured value of \$25,000. Insurance is included in the fee. Postal insurance is not available for articles with no value (\$0.00). [S911.2.3]

**2.3.4 Refund**

A fee for Registered Mail is not refunded after the USPS accepts the mail even if the sender later withdraws the mail under 2.4.10. A fee for return receipt service or restricted delivery service is not refunded unless the USPS fails to provide the service. The sender must present the Registered Mail receipt showing payment of these services. [S911.2.4]

**2.3.5 Official Mail**

Official mail of authorized government agencies, if prepared under applicable standards in 703.7.0 for transmission of mail without prepayment of postage, may be sent by Registered Mail without prepayment of a registration fee. [S911.2.5]

**2.3.6 Merchandise Return**

Matter registered with merchandise return service under 507.9.0 may be sent by Registered Mail without prepayment of postage and fees. [S911.2.6]

**2.3.7 Indemnity**

Except for matter registered with merchandise return service, no indemnity is paid for any matter registered without prepayment of postage and fees. If a government agency wants indemnity coverage, both the applicable postage and registry fee must be paid in full with stamps or meter stamps. [S911.2.7]

**2.4 Mailing****2.4.1 USPS**

USPS employees are not permitted to help customers prepare or seal mail to be registered. [S911.3.1]

**2.4.2 Addressing**

The mail must bear the complete names and addresses of both sender and addressee. [S911.3.2]

**2.4.3 Opened Envelope**

Any envelope or package that appears to have been opened and resealed, or otherwise improperly prepared, may not be registered. [S911.3.3]

503.2.4.4

**2.4.4 Label 200**

Registered Mail must bear a barcoded red Label 200 (see [Exhibit 2.4.4](#)). The label must be placed above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. A large-volume mailer can obtain Label 200 in rolls of 600. [S911.3.4]

**Exhibit 2.4.4 Label 200**

[Exhibit S911.3.4]

**2.4.5 Privately Printed Label 200**

If authorized, a mailer may use a privately printed Label 200 for domestic mail only. Privately printed labels must be nearly identical in design and color to the USPS form, with a barcode and human-readable numbers that meet USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109.

[S911.3.5]

**2.4.6 Sealing**

The mailer must securely seal envelopes. Paper or cellulose strips or wax or paper seals must not be placed over the intersections of flaps of letter-size envelopes where the postmark impressions are made. Packages must be sealed with mucilage or glue or with plain paper or cloth tape. Packages containing currency or securities may not be sealed exclusively by paper strips, but must first be sealed securely with mucilage or glue. Large envelopes (flats) that are completely sealed and that also have paper strips or paper tape across the intersections of the flaps may be considered packages for sealing requirements. To be used on Registered Mail, tape must visibly damage the envelope or wrapper if removed and must absorb the ink in a postmark impression. [S911.3.6]

**2.4.7 Fragile Item**

The mailer must tell the USPS employee whether the item is fragile and, if so, describe the interior packing. All articles presented for registration must be packed as specified in [601.2.0](#). The USPS may refuse packages not properly packed to withstand normal handling in the mail. Indemnity may be denied if articles are not properly packaged. [S911.3.7]

#### **2.4.8 Window Envelope**

A window envelope must have a transparent panel covering the opening to be eligible for registry. If the panel is glued to the envelope, the envelope may contain only matter without intrinsic value. If the panel is part of the envelope, the envelope may be used for all Registered Mail. [S911.3.8]

#### **2.4.9 Firm Sheet**

If three or more registered articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet) or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Registered Mail. The mailer submits the forms in duplicate and receives one copy as a mailing receipt after the entries are verified by the postal employee accepting the mailing. All entries made on firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line. [S911.3.9]

#### **2.4.10 Withdrawal or Recall**

The sender may withdraw or recall Registered Mail without charge before its delivery by writing on the receipt "Withdrawn before dispatch," and signing and surrendering the receipt; or filing a written request for its return after dispatch at the post office where the article was mailed, giving names and addresses of sender and addressee, the registry number, and date of mailing. The sender must pay for all telephone calls. If remailed, the article must be under new cover and bear new postage and fees. [S911.3.10]

### **2.5 Delivery**

#### **2.5.1 Basic Standards**

Delivery of Registered Mail is subject to [508.1.0, Recipient Options](#). The postmaster may require the addressee to call for Registered Mail at the post office if delivery by carrier would not be safe. [S911.4.1]

#### **2.5.2 Bad Condition**

If the addressee accepts a registered article in bad condition (i.e., one repaired with sealing stamps or reenclosed in a new envelope or wrapper), the addressee must open it without disturbing the seal, in the delivering employee's presence. If anything is missing, the envelope or wrapper must be given to the employee after it is endorsed to show what was missing. [S911.4.2]

### **2.6 Inquiry on Uninsured Article**

#### **2.6.1 Who May File**

If postal insurance was purchased, the claim procedures in [609](#) apply. The procedures in this section apply only to uninsured Registered Mail. Only the mailer may file an inquiry on uninsured Registered Mail. For matter registered without postal insurance with merchandise return service, only the permit holder may file an inquiry. [S911.5.1]

**2.6.2 When to File**

The mailer may not file any inquiry until 15 days after the mailing date of the article. An inquiry may be filed at any post office, classified station, or classified branch, except for an inquiry about matter registered with merchandise return service, which must be filed by the permit holder at the post office where the permit is held. Form 1000 must be used in processing an inquiry for uninsured Registered Mail. An inquiry may be filed in the following manner:

- a. Any mailer filing an inquiry for the alleged loss of Registered Mail must provide proof that a loss occurred before a post office may accept the inquiry.
- b. Proof may be provided by these methods:
  1. The mailer may obtain Form 1000 from any post office. The mailer must complete the form and send it to the addressee. USPS employees may not mail the inquiry for the mailer, but they may help a mailer complete the form if requested. The addressee must complete item 13 and items 17 through 19 on Form 1000 and return it to the mailer. If the addressee signs the claim form and indicates the article was not received 15 days or more after the mailing date, the mailer may then take the claim form, with the original mailing receipt, to a post office and file an inquiry.
  2. If the mailer has the addressee's written and signed documentation (such as a letter dated at least 15 days after the mailing date) stating the addressee did not receive the article, the mailer may take this documentation to a post office, with the original mailing receipt, and file an inquiry.
  3. If the mailer cannot obtain the addressee's cooperation in signing Form 1000 for a registered article or, if preferable, the mailer may send a check or money order for the "return receipt requested after mailing" fee in [6.1.1](#) to the post office of address and request a copy of the delivery record, if 15 days or more have passed since the mailing date. Any such request for a delivery record must contain the date the article was mailed, the registered number, and the complete names and addresses of the mailer and addressee. The response to this search of delivery records ends the inquiry process.
- c. A merchandise return permit holder must ask the addressee to complete items 1 through 12 and 14 through 16 of Form 1000 and return it, along with the original mailing receipt, to the permit holder. The permit holder must complete item 13 and items 17 through 19 and submit the completed form, along with the original mailing receipt, to the post office where the permit is held. An inquiry may be filed no sooner than 15 days after the mailing date. [S911.5.2]

**2.6.3 Duplicate Inquiry**

A duplicate inquiry may not be filed sooner than 30 days after the original inquiry. [S911.5.3]

## 3.0 Certified Mail

### 3.1 Certified Mail Fees

#### 3.1.1 Certified Fees

Fee, in addition to postage and other fees, per piece: \$2.30. [R900.7.0]

#### 3.1.2 Fee and Postage

The Certified Mail fee must be paid in addition to the correct postage. The fee and postage may be paid with ordinary postage stamps, meter stamps, or permit imprints. The fee and postage on official mail of federal government agencies and departments are collected under the applicable reimbursement procedures.

[S912.1.3]

### 3.2 Basic Information

#### 3.2.1 Description

Certified Mail service provides the sender with a mailing receipt and, upon request, electronic verification that an article was delivered or that a delivery attempt was made. Customers can retrieve the delivery status in three ways: (1) over the Internet at [www.usps.com](http://www.usps.com) by entering the article number shown on the mailing receipt; (2) by telephone at 1-800-222-1811; or (3) by bulk electronic file transfer for mailers who provide an electronic manifest to the Postal Service. Certified Mail is dispatched and handled in transit as ordinary mail. Delivery of Certified Mail is subject to [508.1.0](#) and [508.2.0](#). No insurance coverage is provided. The Postal Service maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See [6.0](#) for details. [S912.1.1]

#### 3.2.2 Eligible Matter

Only mailable matter on which postage is paid at a First-Class Mail rate (including Priority Mail) may be accepted as Certified Mail. [S912.1.2]

#### 3.2.3 Additional Services

Purchasing Certified Mail service allows customers to then purchase restricted delivery service or a return receipt. [S912.1.4]

#### 3.2.4 Delivery Record

Mailers may request a delivery record after mailing under [6.0, Return Receipt](#).

[S912.1.5]

### 3.3 Mailing

#### 3.3.1 Where to Mail

A mailer may mail Certified Mail at a post office, branch, or station or give it to a rural carrier. Certified Mail may also be deposited in a post office maildrop, a street letterbox, a nonpersonnel unit, or any other receptacle for First-Class Mail, subject to [3.3.5](#). [S912.2.1]

#### 3.3.2 Available Destinations

Certified Mail may be addressed for delivery only in the United States and its territories and possessions, through APOs and FPOs, or through the United Nations Post Office, New York. [S912.2.2]

### 3.3.3 Form 3800

Certified Mail must bear a barcoded green Form 3800 (see [Exhibit 3.3.3](#)). The label part of the form must be placed above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. [S912.2.3]

#### Exhibit 3.3.3 Form 3800

[Exhibit S912.2.3]

### 3.3.4 Privately Printed Form 3800

If authorized, a mailer may use a privately printed Form 3800. The privately printed form must be nearly identical in design, color, and fluorescent properties to the USPS form with a barcode and human readable numbers that meet the USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109. [S912.2.4]

### 3.3.5 Procedure

A mailer of Certified Mail must:

- a. Enter on Form 3800 the name and complete address of the person or firm to whom the mail is addressed.
- b. If a return receipt is requested, check the block on the mailing receipt to show the fee. Near the Certified Mail endorsement on the address side, add the endorsement "Return Receipt Requested." Enter the Certified Mail number on the return receipt card, address it to himself or herself, and attach it to the back of a small envelope or on the front of a package or large envelope, if the card does not cover the address. Enter the name and delivery address on the reverse of the return receipt to show where the receipt is to be sent. When a return receipt is requested, a complete return address (sender's name and delivery address) is required on the mailpiece. The name and delivery address entered on the reverse of the return receipt do not have to match the sender's name and return address on the mailpiece.
- c. Affix to the envelope enough postage to pay for the Certified Mail fee and First-Class Mail rate and, if requested, the return receipt fee.

- d. If a postmarked sender's receipt is requested, attach the Certified Mail sticker to the address side of the article and present the article and the completed receipt to the USPS employee, who then round-dates the receipt to show when the article was accepted. If asked to do so, the USPS employee also shows on the receipt the time the article was accepted. Otherwise, attach the "Certified Mail" sticker to the address side of the article, detach the receipt, and mail the article. Mark the receipt to show the date.
- e. If restricted delivery of Certified Mail to the addressee or someone named by the addressee in writing is requested, endorse the mail "Restricted Delivery." This service is available only for articles addressed to individuals by name. [S912.2.5]

### 3.3.6 Firm Sheet—Three or More Pieces

If three or more certified articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet) or privately printed firm sheets. Privately printed or computer-generated sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Certified Mail. If the mailer wants the firm sheets receipted by the USPS, the mailer must present the books with the articles to be mailed at a post office. The sheets of the books become the mailer's receipts. All entries made in firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line. [S912.2.6]

## 4.0 Insured Mail

### 4.1 Insured Mail Fees

#### 4.1.1 Insurance Fees

Fee, in addition to postage and other fees, for merchandise insurance liability, per piece:

| Insurance<br>(Amount for Merchandise<br>Insurance Coverage Desired) | Fee <sup>1</sup>   |
|---|--|
| \$0.01 to \$50  | \$1.30   |
| 50.01 to 100  | 2.20   |
| 100.01 to 200   | 3.20   |
| 200.01 to 300   | 4.20   |
| 300.01 to 400   | 5.20   |
| 400.01 to 500   | 6.20   |
| 500.01 to 600   | 7.20   |
| 600.01 to 5,000<br>(maximum liability is \$5000)                    | \$7.20 plus \$1.00 per \$100 or<br>fraction thereof over \$600 in<br>desired coverage. |

1. Bulk insurance discount \$0.01 to \$50.00: \$0.60 per piece.  
(See 503.4.4 for eligibility.)
- Bulk insurance discount \$50.01 to \$5,000.00: \$0.80 per piece.  
(See 503.4.4 for eligibility.)

[R900.12.0]

**4.1.2 Fee and Postage**

The applicable insurance fee must be prepaid in addition to the postage, except on official mail sent under applicable provisions. The fee and postage may be paid with postage stamps, meter stamps, or permit imprints. The mailer guarantees to pay return and forwarding postage, unless the mailer writes instructions on the wrapper or envelope not to forward or return the mail. [S913.1.4]

**4.2 Basic Information****4.2.1 Description**

Insured mail provides the following features:

- a. Insured mail purchased at a retail post office provides up to \$5,000 indemnity coverage for a lost, rifled, or damaged article, subject to the standards for the service and payment of the applicable fee.
- b. Insured mail purchased online provides up to \$200 indemnity coverage for lost, rifled, or damaged articles, subject to the standards for the service and payment of the applicable fee.
- c. A bulk insurance discount is available for insured articles entered by authorized mailers who meet the criteria in 4.4. This service is not available for insurance purchased online.
- d. Insured mail service provides the mailer with a mailing receipt. No record of insured mail is kept at the office of mailing. For mail insured for more than \$50, the Postal Service maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See 6.0 for details. [S913.1.1]

**4.2.2 Eligible Matter**

The following types of mail may be insured:

- a. First-Class Mail (including Priority Mail), if it contains matter that may be mailed as Standard Mail or Package Services.
- b. Standard Mail pieces subject to the residual shape surcharge (bulk insurance only).
- c. Package Services.
- d. Official government mail endorsed "Postage and Fees Paid." [S913.1.2]

**4.2.3 Ineligible Matter**

The following types of mail may not be insured:

- a. Parcels containing matter offered for sale, addressed to prospective purchasers who have not ordered or authorized their sending. If such matter is mailed, payment is not made for loss, rifling, or damage.
- b. Nonmailable matter.
- c. Articles so fragile that they cannot be carried safely in the mail regardless of packaging.
- d. Articles not adequately prepared to withstand normal handling in the mail. As a rule, any mailable package should be insurable.

- e. Mail not bearing the complete names and addresses of the sender and addressee.
- f. Standard Mail pieces that are not subject to the residual shape surcharge.
- g. Matter mailed at First-Class Mail rates (including Priority Mail) that consists of items described in [123.3.0, Content Standards](#); [133.3.0, Content Standards](#); [233.2.0, Content Standards for First-Class Mail Letters](#); [333.2.0, Content Standards for First-Class Mail Flats](#); and [433.2.0, Content Standards for First-Class Mail Parcels](#), and required to be mailed at First-Class Mail rates. [S913.1.3]

#### 4.2.4 Additional Services

Insuring an item for more than \$50 allows customers to purchase restricted delivery service or return receipt service at a retail post office. The following additional services may be purchased at a retail post office and combined with insurance if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation.
- b. Parcel airlift service (PAL).
- c. Return receipt for merchandise (for items insured for up to \$50).
- d. Signature Confirmation.
- e. Special handling. [S913.1.5]

#### 4.2.5 Delivery Record

Mailers may request a delivery record after mailing under [6.3.2](#). [S913.1.6]

### 4.3 Mailing

#### 4.3.1 Where to Mail

Insured mail may be mailed as follows:

- a. A mailer must mail insured mail at a post office, branch, or station or give the mail to a rural carrier. Such mail may be placed in, but not on, a rural box. Such mail must not be placed in a post office maildrop or in or on a street letterbox. A mailer may leave the mail in a rural box with a note showing the requested amount of insurance, if stamps are affixed for postage and fees, or money for postage and fees is left in the box. The USPS is not liable for any article or money left in a rural box until the carrier receipts the article. A mailer at a nonpersonnel rural unit must meet the rural carrier at the unit for insurance service.
- b. A mailer who purchases insurance online may mail at a post office, branch, station, give the mail to the carrier assigned to that delivery address, or place the mail in a post office maildrop or a collection box. A mailer may leave the mail in a rural box, schedule an on-demand pickup, or schedule a carrier pickup using [www.usps.com](http://www.usps.com). The USPS is not liable for any article or money left in a rural box until the carrier receipts the article. [S913.2.1]

### 4.3.2 USPS Inquiries

USPS employees are required to ask whether the mailpiece presented for insurance contains anything liquid, fragile, perishable, flammable, or potentially hazardous. [S913.2.2]

### 4.3.3 Markings and Forms

The treatment of pieces is determined by the insurance amount:

- a. Retail insured for \$50 or less: Each piece must be stamped on the address side with an elliptical insured marking as shown in Exhibit 4.3.3. This marking must be placed above the delivery address and to the right of the return address.
- b. Retail insured for more than \$50: Each piece must have barcoded Form 3813-P (see Exhibit 4.3.3) affixed above the delivery address and to the right of the return address. Form 3813-P must not be used for pieces insured for \$50 or less.
- c. Mail for which insurance is purchased online must include the text “Insured” in the indicia area of the online label; the markings in 4.3.3a and 4.3.3b are not required.
- d. All insured pieces, regardless of insurance amount, must be postmarked unless postage is paid by postage meter stamp, permit imprint, or PC Postage (when insurance is purchased online). [S913.2.3]

[Exhibit S913.2.3]

#### 4.3.4 Privately Printed Form 3813-P

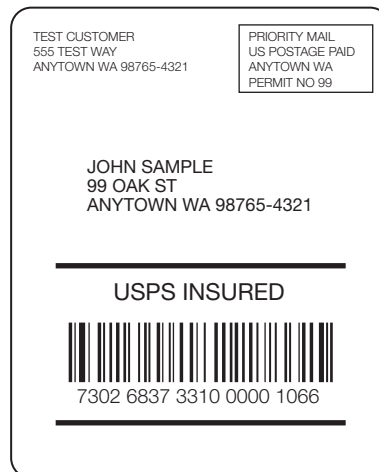

If authorized, a mailer may use a privately printed Form 3813-P for domestic mail only. The privately printed form must be nearly identical in design and color to the USPS form with a barcode and human readable numbers that meet the USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109. [S913.2.4]

#### 4.3.5 Integrated Barcodes

The following options are available for mailers who print their own labels:

- a. An integrated barcode may be used by Confirmation Services electronic option mailers who wish to combine insurance with Delivery Confirmation or insurance with Signature Confirmation into a single barcode on the shipping label to eliminate multiple labels and barcodes on packages. Additional information on the integrated barcode solution can be found in Publication 91, *Confirmation Services Technical Guide*.
- b. Mailers have another option for printing labels with insurance (see [Exhibit 4.3.5b](#)). The privately printed label must meet the specifications described in Publication 91. Applicable certification procedures must be followed, also as specified in Publication 91.

#### Exhibit 4.3.5b Mailer-Printed Label With Integrated Barcode

[Exhibit S913.2.5]

- c. An integrated barcode must be used when insurance is purchased online (see [Exhibit 4.3.5c](#)). This barcode combines the insurance and electronic option Delivery Confirmation or Signature Confirmation Services into a single barcode

503.4.3.6

on the shipping label and is available for Priority Mail and parcels mailed as Parcel Post, First-Class Mail, and Media Mail. Additional information on the integrated barcode can be found in Publication 91.

1. Insurance purchased online for \$50 or less with electronic option confirmation services; the human readable text above the integrated barcode must state “e/USPS DELIVERY CONFIRMATION.”
2. Insurance purchased online for more than \$50 up to \$200 with electronic option Confirmation Services; the human readable text above the integrated barcode must state “e/USPS INSURED.”

**Exhibit 4.3.5c Integrated Barcodes With Routing ZIP Code**

Click-N-Ship Insurance Label

Click-N-Ship Delivery Confirmation Label

[S913.2.5]

**4.3.6 Prohibited Markings**

Private insurance endorsements or markings may not appear on the address side of mail but may appear elsewhere, if they do not resemble official postal endorsements and are not confused with postal endorsements. [S913.2.6]

**4.3.7 Receipt**

Receipts are provided as follows:

- a. For each retail insured mail article, the mailer receives a USPS sales receipt and the appropriate postmarked (i.e., round-dated) insured mail form as follows:
  1. Form 3813 when the insurance coverage is \$50 or less.
  2. Form 3813-P when the insurance coverage is more than \$50.

- b. For each online mail article, the mailer has access to an electronic record of purchase and the option for a printed record of purchase as follows:
  1. A computer printout from the web-based application through which the label was printed and insurance was purchased. The printout must clearly identify the following information: the Delivery Confirmation or Signature Confirmation services number of the insured piece, total postage paid, insurance fee paid, declared value, declared mailing/shipping date, origin ZIP Code, and delivery ZIP Code.
  2. A printed online label record. [S913.2.7]

#### **4.3.8 USPS Records**

The USPS keeps no mailing records for insured pieces. The mailer must write the addressee's name and address on the receipt and keep it. The mailer must show the receipt when making a claim for loss or filing an inquiry. [S913.2.8]

#### **4.3.9 Firm Sheet—Three or More Pieces**

If three or more insured articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet) or privately printed firm mailing bills. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to insured mail. The mailer must present the books with the articles to be mailed at a post office. The sheets become the mailer's receipts. All entries made on firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line. [S913.2.9]

### **4.4 Bulk Insurance for Standard Mail**

#### **4.4.1 Eligibility**

To mail at the bulk insured service rates, mailers must obtain an authorization under 4.4.2 and must meet the following criteria:

- a. Enter mailings of insured articles under an approved manifest mailing system agreement.
- b. Mail a minimum of 10,000 insured articles annually. To meet the minimum volume requirement, mailers may total all insured articles mailed at multiple locations.
- c. Provide a printed Form 3877 or facsimile and a copy of Form 3877 on a disk or other electronic medium.
- d. Effective at a future date, provide a soft (electronic) copy of Form 3877 in a new, approved format. [S913.3.1]
- e. Mailings on which bulk insurance is requested must have postage and fees paid with permit imprint under a manifest mailing system (705.2.0). [P600.5.1]

#### **4.4.2 Authorization**

Mailers must apply for authorization to mail at the bulk insured service rates through their local postmaster or designee by completing the customer portion of the bulk insured service verification form. The postmaster or designee will verify on this form

## 503.4.5

that the mailer meets the requirements in 4.4.1. If the mailer does not meet the requirements, the application will be denied. If the mailer meets the requirements in 4.4.1, the postmaster or designee will certify on the bulk insured service verification form that the mailer qualifies and forward the form to the manager of Claims Processing at the St. Louis Accounting Service Center (ASC). After reviewing the information, the ASC will notify the postmaster of their concurrence of the application and provide a range of claim numbers to be used by the mailer for filing claims. The postmaster or designee will then provide the customer with the approval of the application and with information needed to file claims, including the assigned claim numbers. At a future date, electronic filing of indemnity claims will become mandatory. Prior to mandatory electronic claims filing, customers will be provided with the format instructions for the new electronic (soft copy) of Form 3877 and instructions for electronic filing of indemnity claims. [S913.3.2]

**4.5 Delivery**

An item insured for \$50 or less is delivered as ordinary mail. Delivery of insured mail is subject to 508.1.0, *Recipient Options*, and 508.2.0, *Conditions of Delivery*. [S913.4.0]

**5.0 Certificate of Mailing****5.1 Certificate of Mailing Fees****5.1.1 Individual**

Fee, in addition to postage:

- a. For each piece (Form 3817): \$0.90.
- b. For each piece listed (Form 3877): \$0.30 (minimum charge \$0.90).
- c. For duplicate copy of Form 3817 or Form 3877, per page: \$0.90. [R900.6.1]

**5.1.2 Bulk**

Fee, in addition to postage:

- a. For first 1,000 pieces or fraction thereof (Form 3606): \$4.50.
- b. For each additional 1,000 pieces or fraction thereof (Form 3606): \$0.50.
- c. For duplicate copy of Form 3606, per page: \$0.90. [R900.6.2]

**5.1.3 Fee and Postage**

In addition to the correct postage, the applicable certificate of mailing fee must be paid for each article on Form 3817 or for additional copies of either Form 3817 or Form 3877. The correct fee, based on the quantity mailed, must be paid in addition to postage for mailings of identical pieces of First-Class Mail (including Priority Mail) and Package Services. Mailers paying with ordinary stamps, precanceled stamps, or meter stamps reported on Form 3606 must affix stamps or meter stamps to pay the bulk certificate of mailing fees. Mailers using Form 3877 with a permit imprint mailing can pay certificate of mailing fees with permit imprint. [S914.1.6]

## 5.2 Basic Information

### 5.2.1 Description

Certificate of mailing service provides evidence that mail has been presented to the Postal Service for mailing. Certificate of mailing service does not provide a record of delivery. [S914.1.1]

### 5.2.2 Eligible Matter—Single Piece

Form 3817 is used for a certificate for a single piece of First-Class Mail (including Priority Mail) or Package Services. Facsimile forms also may be used. [S914.1.3]

### 5.2.3 Three or More Pieces

When requesting a certificate of mailing for three or more pieces presented at one time, a mailer may use Form 3877 (firm sheet) or a facsimile, subject to payment of the applicable fee for each item listed. Facsimile Forms 3877 must contain the same information as the postal-provided form. The sheets of the books become the sender's receipts. All entries made in firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated by drawing a diagonal line through them. [S914.1.4]

### 5.2.4 Eligible Matter—Bulk Quantities

Form 3606 is used for a bulk mailing as a certificate to specify the number of pieces mailed. This certificate is provided only for a mailing of identical pieces of First-Class Mail, Standard Mail, and Package Services. This certificate states only the total number of articles mailed and must not be used as an itemized list. A certificate of mailing cannot be issued for a bulk mailing paid with a permit imprint. [S914.1.2]

### 5.2.5 Mailer Preparation

A certificate of mailing must be completed by the mailer, using a typewriter, ink, or ballpoint pen. Individual and firm sheet certificates must show the names and addresses of the sender and addressee and may show the amount of postage paid. The mailer may also place identifying invoice or order numbers on the certificate. [S914.1.5]

### 5.2.6 Additional Services

The following services may be combined with certificate of mailing on single pieces if the applicable standards for the services are met and the additional service fees are paid:

- a. Parcel airlift service (PAL).
- b. Special handling. [S914.1.7]

## 5.3 Presentation

### 5.3.1 Rural Carriers

A mailer on a rural route or at a nonpersonnel rural unit may provide mail to the rural carrier with the fee for the certificate. The carrier obtains the certificate at the post office, attaches the stamps, cancels them by postmark, and delivers the certificate to the mailer on the next trip. [S914.2.1]

## 503.5.3.2

**5.3.2 Quantity Mailings**

When the number of articles ordinarily presented justifies such action, the mailer must comply with these standards:

- a. When the mailer wants individual certificates on Form 3817, the forms must be affixed by the stub to the pieces, or the forms must be numbered consecutively and fastened together.
- b. When the mailer describes and lists the pieces on firm sheets or approved forms, but does not present the pieces in the order shown on the sheets, the mailer must consecutively number each entry and lightly number each piece to show the sheet and line number on which described. [S914.2.2]

**5.3.3 After Mailing**

To obtain an additional certificate after mailing, the mailer must present the original certificate and an additional certificate endorsed "Duplicate" or a copy showing the original dates of mailing. The additional certificate must be postmarked to show the current date. [S914.2.3]

## 6.0 Return Receipt

**6.1 Return Receipt Fees****6.1.1 Fees**

Fee, in addition to postage and other fees, per piece:

| <b>Return Receipt</b><br>(Form 3811 in conjunction with<br>another service) | <b>Fee</b> |
|---|------------|
| Requested at time of mailing<br>(receive by mail)                           | \$1.75     |
| Requested at time of mailing<br>(receive electronically)                    | 1.30       |
| Requested after mailing (Form 3811A)<br>(receive by fax, mail, e-mail)      | 3.25       |

[R900.23.0]

**6.1.2 Fee and Postage**

The applicable fee for return receipt service must be paid in addition to postage and other fees. For purposes of computing postage, the weight of the return receipt is *excluded* from the weight of the mailpiece to which it is attached. [S915.1.4]

**6.1.3 Refund**

Return receipt fees are refunded only if the USPS fails to furnish a return receipt.

[S915.1.6]

**6.2 Basic Information****6.2.1 Description**

Return receipt service provides a mailer with evidence of delivery (to whom the mail was delivered and date of delivery), along with information about the recipient's actual delivery address. A mailer purchasing return receipt service at the time of

mailing may choose to receive the return receipt by mail or electronically. The electronic option is not available for items mailed to APO or FPO addresses or U.S. territories, possessions, and freely associated states. A mailer purchasing return receipt service after mailing may choose to receive the proof of delivery record by fax, mail, or electronically. Electronic return receipts requested at the time of mailing also are available in bulk to mailers using privately printed Certified Mail, Registered Mail, numbered insured mail, or COD labels. Bulk delivery information can be obtained in CD-ROM or signature extract file formats. For additional information, see Publication 80, *Bulk Proof of Delivery Program*. [S915.1.1]

### 6.2.2 Eligible Matter

Return receipt service is available for:

- a. Express Mail.
- b. First-Class Mail (including Priority Mail) when purchased at the time of mailing with Certified Mail, COD, insured mail (for more than \$50), or Registered Mail service.
- c. Standard Mail subject to the residual shape surcharge when bulk insurance (for more than \$50) is purchased at the time of mailing.
- d. Package Services when purchased at the time of mailing with COD or insured mail (for more than \$50) service. [S915.1.2]

### 6.2.3 Endorsement

Mail for which return receipt service is requested by mail (Form 3811) must be endorsed "Return Receipt Requested" above the delivery address and to the right of the return address. No endorsement is required on mail for which electronic return receipt service is requested or is provided in bulk via a signature extract file or a CD-ROM. [S915.1.3]

### 6.2.4 Additional Services

If return receipt service has already been purchased with one of the services listed in 6.2.2 then one or more of the following extra services may be combined with those services at the time of mailing if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation (First-Class Mail parcels, Priority Mail, and Package Services parcels).
- b. Parcel airlift service (PAL) (Priority Mail and Package Services).
- c. Restricted delivery.
- d. Signature Confirmation (Priority Mail and Package Services parcels).
- e. Special handling. [S915.1.7]

### 6.2.5 Privately Printed Form 3811

If authorized, a mailer may use a privately printed Form 3811. The privately printed form must be nearly identical in design and color to postal-provided forms. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review and approval by the mailpiece design analyst. [S915.1.5]

## 6.3 Obtaining Service

### 6.3.1 At Time of Mailing

The mailer may request the service at the time of mailing by using Form 3811 and marking the mail "Return Receipt Requested." A firm mailer must complete the mailer's entries on the form, including the article identification number; attach the form; and place the correct one on the article. The name and address of the person or organization to which the return receipt is to be returned must be that of the mailer or the mailer's agent. The mailpiece must bear the return address of either the mailer or mailer's agent. [S915.2.1]

### 6.3.2 After Mailing

The mailer may request a delivery record after mailing for Express Mail, Certified Mail, Registered Mail, COD mail, and mail insured for more than \$50. When a delivery record is available, the USPS provides the mailer information from that record, including to whom the mail was delivered and the date of delivery. The mailer requests a delivery record by completing Form 3811-A, paying the appropriate fee in 6.1.1, and submitting the request to the appropriate office as follows:

- a. For items mailed to an APO/FPO, U.S. territory or possession, or freely associated state (with the exception of Puerto Rico and the U.S. Virgin Islands), the form should be sent to the office of delivery.
- b. For all other items, send the form to any post office. [S915.2.2]

### 6.3.3 Time Limit

A request for a return receipt after mailing for Express Mail must be submitted within 90 days after the date of mailing. All other requests must be submitted within 2 years from the date of mailing. [S915.2.3]

## 6.4 Delivery

Delivery of mail for which a return receipt is requested is subject to 508.1.0, *Recipient Options*, and 508.2.0, *Conditions of Delivery*. [S915.3.0]

## 6.5 Requests for Delivery Information

### 6.5.1 Receipt Not Received

After a reasonable period, not longer than 2 years after the date of mailing, a mailer who did not receive return receipt service for which the mailer had paid may request information from the delivery record, using Form 3811-A. Any request for such information for Express Mail must be filed within 90 days after the date of mailing. [S915.4.1]

### 6.5.2 Form 3811-A

The mailer must complete Form 3811-A at any post office. The applicable fee is waived if the mailer can produce a receipt showing that the applicable return receipt fee was paid. [S915.4.2]

### 6.5.3 Fee Not Charged

The fee for a return receipt after mailing is not charged for a duplicate receipt for Certified Mail if the original Form 3800 was date-stamped by a post office at the time of mailing. [S915.4.3]

## 7.0 Restricted Delivery

### 7.1 Restricted Delivery Fee

#### 7.1.1 Fee

Fee, in addition to postage and other fees, per piece: \$3.50. [R900.22.0]

#### 7.1.2 Fee and Postage

The applicable fee for restricted delivery service must be paid in addition to postage and other fees. The fee and postage may be paid with postage stamps, meter stamps, or permit imprint. [S916.1.3]

#### 7.1.3 Refund

Restricted delivery fees are refunded only when the USPS fails to give restricted delivery service. [S916.1.6]

### 7.2 Basic Information

#### 7.2.1 Description

Restricted delivery service permits a mailer to direct delivery only to the addressee or addressee's authorized agent. The addressee must be an individual (or natural person) specified by name. [S916.1.1]

#### 7.2.2 Eligible Matter

Restricted Delivery service is available for:

- a. First-Class Mail (including Priority Mail) when purchased at the time of mailing with Certified Mail, COD, insured mail (for more than \$50), or Registered Mail service.
- b. Standard Mail subject to the residual shape surcharge when bulk insurance (for more than \$50) is purchased at the time of mailing.
- c. Package Services when purchased at the time of mailing with COD or insured mail (for more than \$50) service. [S916.1.2]

#### 7.2.3 Endorsement

Mail for which restricted delivery service is requested must be endorsed "Restricted Delivery." The endorsement must be placed above the address and to the right of the return address. [S916.1.5]

#### 7.2.4 Return Receipt

The mailer may obtain a return receipt by paying the applicable fees. [S916.1.4]

#### 7.2.5 Additional Services

In addition to the prerequisites listed in [7.2.2](#), the following services may be combined with restricted delivery if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation.
- b. Parcel airlift service (PAL).
- c. Signature Confirmation.
- d. Special handling. [S916.1.7]

## 7.3 Obtaining Service

### 7.3.1 At Time of Mailing

The mailer may request restricted delivery at the time of mailing by advising the USPS clerk or by marking the mail "Restricted Delivery." A firm mailer must enter the proper fee in the correct column of the firm sheet and place the required endorsement on the mail. If a return receipt is requested, the correct block on Form 3811 must be checked to show that restricted delivery is also required. [S916.2.1]

### 7.3.2 After Mailing

The mailer may request restricted delivery after mailing by notifying the mailing post office in writing. The mailer must identify the article, including item number and addressee, and pay the service fee and communication costs required to effect restricted delivery. USPS failure to provide the service because delivery was made before the delivery office received the request is not grounds for a refund of the fee or communication costs. [S916.2.2]

## 7.4 Delivery

### 7.4.1 Conditions

Mail marked "Restricted Delivery" is delivered only to the addressee or to the person authorized in writing as the addressee's agent to receive the mail, subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#), and these exceptions:

- a. Mail for famous personalities and executives of large organizations is normally delivered to an agent authorized to sign for such mail.
- b. Mail for officials of executive, legislative, and judicial branches of the government of the United States or of the states and possessions and their political subdivisions, or to members of the diplomatic corps, may be delivered to a person authorized by the addressee or by regulations or procedures of the agency or organization to receive the addressee's mail.
- c. Mail for the commander, staff sections, or other officials of military organizations by name and title, is delivered to the unit mail clerk, mail orderly, postal clerk, assistant postal clerk, or postal finance clerk, when such individuals are designated on DD (Department of Defense) Form 285 to receipt for all mail addressed to the units for which they are designated. If the person accepting mail is designated on DD Form 285 to receipt for ordinary mail only, then restricted delivery mail addressed to the commander, or other official by name and title, is delivered to the mail clerk only if the addressee authorizes under [7.4.3](#).
- d. Mail for an inmate of a city, state, or federal penal institution, in cases where a personal signature cannot be obtained, is delivered to the warden or designee.
- e. Mail for minors or persons under guardianship may be delivered to their parents or guardians. [S916.3.1]

### 7.4.2 Identification

The USPS may require proof of identification from the addressee (or agent). [S916.3.2]

### 7.4.3 Agent Authorization

An addressee who regularly receives restricted delivery mail may authorize an agent on Form 3801 or by letter to the postmaster. The addressee must make the notation “this authorization is extended to include restricted delivery mail” on Form 3801 (in the area for signatures of authorized agents) or in the letter to the postmaster. Form 3849 may be left for the authorization if the post office has no standing delivery order or letter on file. The addressee may enter the name of the agent on the back of Form 3849 in the space provided and sign the form. The agent must sign for receipt of the article on the back of the form. [S916.3.3]

### 7.4.4 Joint Addressees

When mail is addressed to two or more persons jointly (as shown by the word “and” or symbol “&” connecting their names), all addressees or their agents are notified to be present to accept delivery together. The delivery receipt obtained and the return receipt, if any, must be signed by all joint addressees or their agents. The mail may then be delivered to any of the addressees or their agents unless one or more addressees or their agents object, in which case delivery is not made until all the addressees or their agents sign a statement designating who is to receive the mail. [S916.3.4]

### 7.4.5 Addressed “In Care Of”

Either person may sign for mail addressed to one person in care of another. [S916.3.5]

## 8.0 Return Receipt for Merchandise

### 8.1 Return Receipt for Merchandise Fees

#### 8.1.1 Fees

Fee, in addition to postage and other fees, per piece: \$3.00. [R900.24.0]

#### 8.1.2 Fee and Postage

The applicable fee for return receipt for merchandise service must be paid in addition to the correct postage and the fees for any other service selected. The fees and postage may be paid with stamps, meter stamps, or permit imprint. The fees and postage on official mail of federal government agencies and departments are collected under applicable reimbursement procedures. [S917.1.4]

### 8.2 Basic Information

#### 8.2.1 Description

Return receipt for merchandise service is a form of return receipt service that provides the sender with a mailing receipt and a return receipt. After delivery, the return receipt is mailed back to the sender. A delivery record is maintained by the Postal Service, but no record is kept at the office of mailing. A return receipt for merchandise also supplies the recipient’s actual delivery address if it is different from the address used by the sender. Mail using this service is dispatched and handled in transit as ordinary mail. This service does not include insurance coverage. A return receipt for merchandise may not be requested after mailing, and restricted delivery service is not available. [S917.1.1]

## 503.8.2.2

**8.2.2 Eligible Matter**

Return receipt for merchandise is available for merchandise sent as Priority Mail, Standard Mail pieces subject to the residual shape surcharge, and Package Services. [S917.1.2]

**8.2.3 Return Receipt for Merchandise for Standard Mail**

If return receipt for merchandise is requested for all of the pieces in the mailing and the mailing consists of pieces of identical weight, then postage may be paid with metered postage or permit imprint under the applicable standards in 244.2.0 for letters, 344.2.0 for flats, and 444.2.0 for parcels. If return receipt for merchandise is not requested for all of the pieces in the mailing, or if the pieces are not identical weight, then either the exact metered postage must be affixed to each piece or postage must be paid with permit imprint under a manifest mailing system (705.2.0). Use of precanceled stamps is not permitted with return receipt for merchandise. [P600.5.3]

**8.2.4 Additional Services**

The following services may be combined with return receipt for merchandise if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation.
- b. Insurance (for up to \$50).
- c. Parcel airlift service (PAL).
- d. Special handling. [S917.1.3]

**8.3 Mailing****8.3.1 Where to Mail**

A mailer must mail articles at a post office, branch, or station or give them to a rural carrier. Articles must not be placed in post office maildrops or in or on street collection boxes. They may be placed in, but not on, rural mailboxes. [S917.2.1]

**8.3.2 How to Mail**

A mailer can obtain Form 3804 and Form 3811 (return receipt) at the post office or from any rural carrier. Observe these procedures:

- a. Enter on the receipt part of the return receipt for merchandise, the name and complete address of the person or firm to whom the mail is addressed.
- b. Affix the numbered part of the gummed label from Form 3804 to the mailpiece.
- c. Place the correct endorsement on the address side. Enter the return receipt for merchandise number on Form 3811. Address the form to yourself and attach it to the front of the mailpiece. If the Form 3811 would cover the address, attach it to the back of the mailpiece. The name of the person to whom the return receipt is to be returned must be the same as that of the sender. If the return receipt is to show the address where the article was delivered, check the block at the top of Form 3811.
- d. Attach to the article, enough postage to pay for the postage rate desired, the return receipt for merchandise fee, and the special handling fee.

- e. Attach the return receipt for merchandise label to the address side of the article and give the completed receipt to a USPS employee. If asked to do so, the USPS employee must show on the receipt the time the article is accepted for mailing. If given to a rural carrier, the carrier returns the postmarked receipt to the customer.
- f. By signing the waiver on Form 3804, customers may instruct the USPS to deliver without obtaining a signature. This option allows the delivery employee to sign for the article on the first delivery attempt to the listed address, if the addressee or the addressee’s agent is not available to accept the shipment. Customers who waive the signature requirement must accept the delivery employee’s signature and date of delivery as proof of delivery. To waive the signature, detach both parts of the gummed label and attach to the mailpiece. [S917.2.2]

**8.3.3 Available Destinations**

Return receipt for merchandise mail may be addressed for delivery only in the United States and its territories and possessions, through Army/Air Force (APO) and Navy (FPO) post offices, or through the United Nations Post Office, New York. [S917.2.3]

**8.3.4 Form 3804**

Return receipt for merchandise mail must bear a barcoded brown Form 3804 (see Exhibit 8.3.4). The label part of the form and the endorsement “Return Receipt Requested” must be placed above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. [S917.2.4]

**Exhibit 8.3.4 Form 3804**

[Exhibit S917.2.4]

**8.3.5 Privately Printed Form 3804**

If authorized, a mailer may use a privately printed Form 3804. The privately printed form must be nearly identical in design and color to the USPS form with a barcode and human readable numbers that meet the USPS specifications in Publication 109. A minimum of three preproduction samples must be submitted to the business mail

## 503.8.3.6

entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer must print sample labels with barcodes to be certified under the technical requirements in Publication 109. [S917.2.5]

**8.3.6 Firm Sheet—Three or More Pieces**

If three or more return receipt for merchandise articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet), provided by the USPS at no charge, or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to return receipt for merchandise mail. The mailer must present the books with the articles to be mailed at a post office. The sheets of the books become the mailer's receipts. All entries made in firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line. [S917.2.6]

**8.3.7 Receipt Not Received**

A mailer who does not receive return receipt for merchandise service for which the mailer has paid may request information from the delivery record, at no additional charge, by using Form 3811-A. Any request must be filed within 2 years after the date of mailing. Mailers cannot request a delivery record unless the item originally was sent with return receipt for merchandise. [S917.2.7]

**8.4 Delivery**

Delivery of return receipt for merchandise mail is subject to [508.1.0, Recipient Options](#), and [508.2.0, Conditions of Delivery](#). [S917.3.0]

**9.0 Delivery Confirmation****9.1 Delivery Confirmation Fee****9.1.1 Fee**

Fee, in addition to postage and other fees, per piece:

| <b>Delivery Confirmation</b>                 |            | <b>Fee</b> |
|--|------------|------------|
| First-Class Mail (parcels only)              | Retail     | \$0.55     |
|  | Electronic | 0.13       |
| Priority Mail                                | Retail     | 0.45       |
|  | Electronic | 0.00       |
| Package Services (parcels only) <sup>1</sup> | Retail     | 0.55       |
|  | Electronic | 0.13       |
| Standard Mail <sup>2</sup>                   | Electronic | 0.13       |

1. No charge for Parcel Select electronic option.

2. Available only for pieces subject to the residual shape surcharge.

[R900.10.0]

### 9.1.2 Fees and Postage

The applicable Delivery Confirmation fee in 9.1.1 must be paid in addition to the correct postage. The fee and postage may be paid with postage stamps, meter stamps, or permit imprint. Precanceled stamps are not permitted as postage payment. [S918.1.5]

## 9.2 Basic Information

### 9.2.1 Description

Delivery Confirmation service provides the mailer with information about the date and time an article was delivered and, if delivery was attempted but not successful, the date and time of the delivery attempt. Delivery Confirmation service is available only at the time of mailing. No record is kept at the office of mailing. Delivery Confirmation service does not include insurance, but insurance may be purchased as an additional service (see 9.2.6). Some statutes and regulations governing the mailing of documents with legal significance may require the use of Certified Mail or Registered Mail rather than Delivery Confirmation. [S918.1.1]

### 9.2.2 Eligible Matter

Delivery Confirmation is available for First-Class Mail parcels defined in 401.1.0 as machinable (with no minimum weight), irregular, or outside parcels; for all Priority Mail pieces; for Standard Mail pieces subject to the residual shape surcharge (electronic option only); and for Package Services parcels defined in 401.1.0 as machinable, irregular, or outside parcels. For the purposes of using Delivery Confirmation with a First-Class Mail parcel or a Package Services parcel, the parcel must meet these additional requirements:

- a. The surface area of the address side of the parcel must be large enough to contain completely and legibly the delivery address, return address, postage, and any applicable markings, endorsements, and extra service labels.
- b. Except as provided in 9.2.2c for machinable parcels, the parcel must be greater than 3/4 inch thick at its thickest point.
- c. If the mailpiece is a machinable parcel under 401.1.0 and no greater than 3/4 inch thick, the contents must be prepared in a strong and rigid fiberboard or similar container or in a container that becomes rigid after the contents are enclosed and the container is secured. The parcel must be able to maintain its shape, integrity, and rigidity throughout processing and handling without collapsing into a letter-size or flat-size piece. [S918.1.2]

### 9.2.3 Electronic Option Delivery Confirmation for Standard Mail

If electronic option Delivery Confirmation is requested for all of the pieces in the mailing and the mailing consists of pieces of identical weight, then postage may be paid with metered postage or permit imprint under the applicable standards in 244.2.0 for letters, 344.2.0 for flats, and 444.2.0 for parcels. If electronic option Delivery Confirmation is not requested for all of the pieces in the mailing, or if the pieces are not identical weight, then either the exact metered postage must be affixed to each piece or postage must be paid with permit imprint under a manifest mailing system (705.2.0). Use of precanceled stamps is not permitted with Delivery Confirmation. [P600.5.2]

503.9.2.4

**9.2.4 Ineligible Matter**

Delivery Confirmation is not available for the following:

- a. Express Mail and Periodicals pieces.
- b. First-Class Mail letter-size and flat-size pieces.
- c. Standard Mail pieces not subject to the residual shape surcharge and all Enhanced Carrier Route Standard Mail pieces.
- d. Package Services flat-size pieces.
- e. Mail paid with precanceled stamps.
- f. Mail addressed to APO/FPO destinations.
- g. Mail addressed to any U.S. territory, possession, or Freely Associated State listed in [608.2.0](#), with the exception of Puerto Rico and the U.S. Virgin Islands. [S918.1.3]

**9.2.5 Service Options**

The two Delivery Confirmation service options are:

- a. Retail option: Available at post offices at the time of mailing. A mailing receipt is provided. Mailers can access delivery information over the Internet at [www.usps.com](http://www.usps.com) or by calling 1-800-222-1811 toll-free and providing the article number.
- b. Electronic option: Available to mailers who establish an electronic link with the USPS to exchange acceptance and delivery data. No mailing receipt is provided. [S918.1.4]

**9.2.6 Additional Services**

Delivery Confirmation may be combined with:

- a. Collect on delivery (COD).
- b. Insured mail.
- c. Registered Mail.
- d. Restricted delivery, if purchased with insurance for more than \$50, COD, or registry service.
- e. Return receipt, if purchased with insurance for more than \$50, COD, or registry service.
- f. Return receipt for merchandise.
- g. Special handling. [S918.1.6]

**9.2.7 Where to Mail**

A mailer may mail articles with retail option Delivery Confirmation at a post office, branch, or station, or give articles to a rural carrier. [S918.1.7]

**9.2.8 Firm Sheets—Three or More Pieces**

If three or more articles are presented for mailing at one time, the mailer may use Form 3877 provided by the USPS at no charge, or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be used if approved by the local postmaster. The

mailer may omit columns from Form 3877 that are not applicable to Delivery Confirmation mail. Required elements are the package identification code (PIC), 5-digit destination ZIP Code, and applicable fees. If the mailer wants the firm sheets receipted by the USPS, the mailer must present the books with the articles to be mailed at a post office. The sheets of the books are the mailer's receipts. All entries made in firm sheets must be made by typewriter or ink. Alterations must be initialed by the mailer and accepting postal employee. All unused portions of the addressee column must be obliterated with a diagonal line. A receipt is required for refund requests. [S918.1.8]

### 9.3 Labels

#### 9.3.1 Types of Labels

Mailers must use one of the label options shown below (for additional information see Publication 91, *Confirmation Services Technical Guide*):

- a. Form 152, obtained from the post office at no charge. This form may be used only with the retail option (see [Exhibit 9.3.1a, Form 152](#)).

#### Exhibit 9.3.1a Form 152

[Exhibit S918.2.1a]

503.9.3.1

- b. Label 314, available at no charge to electronic option mailers (see [Exhibit 9.3.1b, Label 314](#)).

**Exhibit 9.3.1b Label 314**

[Exhibit S918.2.1b]

- c. Privately printed barcoded labels that meet the requirements in 9.3 and 9.4 (see [Exhibit 9.3.1c](#)). On the Priority Mail label, mailers must use the registered trademark symbol following the Priority Mail text or add the following statement at the bottom of the label in at least 6-point Helvetica type: "Priority Mail is a registered trademark of the U.S. Postal Service." [S918.2.1]

**Exhibit 9.3.1c Privately Printed Label**

[Exhibit S918.2.1c]

### 9.3.2 Label Placement

The barcoded label section of Label 314 or Form 152 must be placed either above the delivery address and to the right of the return address or to the left of the delivery address. A privately printed Delivery Confirmation label that is separate from the address label must be placed in close proximity to the address label. In all cases, the entire Delivery Confirmation label must be placed on the address side and not overlap any adjacent item. [S918.2.2]

## 9.4 Barcodes

### 9.4.1 Symbology

Labels printed by mailers must meet the following barcode symbology requirements:

- a. Mailers printing their own barcodes and using the retail service option (9.2.5a) must use the Automatic Identification Manufacturers' (AIM) Uniform Specifications for USS Code Interleaved 2 of 5 barcode symbology. Each barcode must contain a unique Package Identification Code (PIC) as specified in 9.4.2. Barcodes also must meet the specifications in Publication 91.
- b. Effective January 31, 2005, mailers printing their own barcodes and using the electronic service option (9.2.5b) must use the UCC/EAN Code 128 barcode symbology. All new mailers must use this symbology. Through January 30, 2005, mailers printing their own barcodes and using the electronic service option may use one of the following barcode symbologies: UCC/EAN Code 128, USS Code Interleaved 2 of 5, USS Code 39, or USS Code 128. Each barcode must contain a unique PIC as specified in 9.4.2. Barcodes also must meet the specifications in Publication 91. Refer to 507.9.0 for Delivery Confirmation with Merchandise Return Service. [S918.3.1]

### 9.4.2 Package Identification Code (PIC)

Each barcode symbology must contain a unique PIC:

- a. For UCC/EAN 128, each barcode must contain a unique PIC and be made up of five fields totaling 22 characters. Additional information and specifications can be found in Publication 91. The five required data fields are:
  1. Application Identifier (AI): two characters; identifies the article as a Delivery Confirmation piece.
  2. Service Type Code (STC): two characters; identifies the type of product or service used for each item.
  3. Customer ID: nine characters; DUNS® number that uniquely identifies the customer.
  4. Package Sequence Number (PSN): eight characters; fixed sequential number.
  5. Modulus 10 Check digit: one character.
- b. For USS Code Interleaved 2 of 5, USS Code 39, and USS Code 128, each barcode must contain a unique PIC and be made up of four fields totaling 20 characters. The four required data fields are fields 2 through 5 above. Additional information and specifications can be found in Publication 91. These symbologies do not use an Application Identifier (AI). [S918.3.2]

**9.4.3 Printing**

Labels printed by mailers must meet the following specifications:

- a. Each barcoded label must bear a unique Delivery Confirmation PIC barcode as specified in [9.4.2](#). The text “USPS DELIVERY CONFIRMATION” (if using retail service option, as specified in [9.2.5](#)) or “e/USPS DELIVERY CONFIRMATION” (if using electronic service option, as specified in [9.2.5](#), and the postage is evident on the mailpiece) must be printed between 1/8 inch and 1/2 inch above the barcode in minimum 12-point bold sans serif type. Additionally, mailers approved for the electronic service option, at their discretion, may print the text “ELECTRONIC RATE APPROVED #[DUNS® NUMBER]” in minimum 8-point bold sans serif type directly below the bottom horizontal identification bar (see [Exhibit 9.4.3](#)). Human-readable characters that represent the barcode ID must be printed between 1/8 inch and 1/2 inch under the barcode in minimum 10-point bold sans serif type. These characters must be parsed in accordance with Publication 91. A minimum 1/8-inch clearance must be between the barcode and any printing. The preferred range of widths of narrow bars and spaces is 0.015 inch to 0.017 inch. The width of the narrow bars or spaces must be at least 0.013 inch but no more than 0.021 inch. All bars must be at least 3/4 inch high. Minimum 1/16-inch bold bars must appear between 1/8 inch and 1/2 inch above and below the human-readable endorsements to segregate the Delivery Confirmation barcode from other areas of the shipping label. The line length should extend across the width of the label but must extend the length of the barcode at a minimum (see [Exhibit 9.3.1c](#)). Only information relating to Delivery Confirmation and other extra services must be placed between these lines.
- b. Each barcode must meet the requirements in [9.4.1](#) for the type of service requested.
- c. Mailers must obtain USPS certification for each printer used to print barcoded Delivery Confirmation labels. For certification, a mailer must forward for evaluation and approval 20 barcoded labels/forms generated by each printer to the National Customer Service Center (NCSC), Attention Barcode Certification (see [608.8.0](#) for address). The USPS will issue the mailer a Form 3152 for each printer certified. All barcodes must be in accordance with [9.3](#) and [9.4](#). Further certification instructions are included in Publication 91.

- d. Barcodes that do not meet specifications will not be accepted by the USPS. The USPS will contact the mailer if problems with the barcodes are found and will try to resolve the problem. The USPS may suspend a mailer's certification if electronic file quality does not meet specifications. [S918.3.3]

#### Exhibit 9.4.3 Electronic Service Option Identification

[Exhibit S918.3.3]

#### 9.4.4 Integrated Barcodes

An integrated barcode may be used by mailers printing their own barcodes and using the electronic service option. Mailers may combine Delivery Confirmation and insurance services into a single barcode on the shipping label and eliminate multiple labels and barcodes on packages. Mailers must still meet existing specifications in 9.4.1 and 9.4.2. Minor modifications allow users to request multiple extra services on Priority Mail and Package Services. Two required changes are:

- a. Change the text above the barcode to identify the service requested. Exhibits are included in Publication 91.
- b. Change the service type code in the barcode to identify the class of mail and/or type of extra services combined with Delivery Confirmation. Additional information on the Service Type Code Matrix can be found in Publication 91.

[S918.3.4]

### 9.5 Electronic File Transmission

Mailers must meet the following standards for electronic file transmission:

- a. Publication 91 contains specifications for electronic file transmission. A test file transmission must be uploaded and approved before mailings begin. Upon certification, the USPS will issue the mailer Form 3152.
- b. Mailers using the electronic option must transmit a file with a unique record for each article mailed. The USPS will contact the mailer if problems with the file are found and will try to resolve those problems. The USPS may suspend a mailer's certification if the electronic file quality does not meet specifications. In addition, USPS acceptance units will be notified to charge the customer the retail Delivery Confirmation fee.
- c. Mailers using the electronic option must include additional fields in the electronic file when planning to use the integrated barcode. For more information consult Publication 91. [S918.4.0]

503.9.6

**9.6 Acceptance**

Customers must meet the following requirements when presenting electronic option Delivery Confirmation mail for acceptance:

- a. Presorted or permit imprint mailings containing pieces for which fees are paid for Delivery Confirmation service must be presented to a post office business mail entry unit (BMEU), detached mail unit (DMU) at the mailer's plant, bulk mail center or auxiliary service facility business mail entry unit, or other postal facility capable of properly verifying the mailing and at which the mailer has obtained the necessary permits or license and paid any applicable mailing fee.
- b. Mailers who use the electronic option or print their own labels must submit a copy of the original Form 3152 with their first mailing using Confirmation Services (see exception in 9.6c). The business mail or detached mail entry unit office will retain a copy of the form. However, mailers who wish to obtain an electronic entry scan must submit Form 3152 with each mailing to include the electronic file number associated with that mailing. The electronic file number on the form must be in either a barcode format (preferred) or written on the form. All barcode formats must comply with the standards in Publication 91. Mailers should keep the certification form on file while using Confirmation Services. If requested by the Postal Service, the form must be presented within 24 hours.
- c. Mailers of single-piece rate mail with postage affixed using the electronic option rate are not required to submit Form 3152 with their initial mailing. This includes mailings generated from the Postal Service online shipping label application at [www.usps.com](http://www.usps.com) or labels generated from a third-party vendor or system that supports the electronic option rates. All labels must meet USPS format and design requirements, including the "e" (electronic rate) endorsement in the barcode text line. [S918.5.0]

**10.0 Signature Confirmation****10.1 Signature Confirmation Fees****10.1.1 Fee**

Available for First-Class Mail parcels, Priority Mail, and Package Services parcels. Fee, in addition to postage and other fees, per piece:

| Signature Confirmation          |            | Fee    |
|---------------------------------|------------|--------|
| First-Class Mail (parcels only) | Retail     | \$1.80 |
|                                 | Electronic | 1.30   |
| Priority Mail                   | Retail     | 1.80   |
|                                 | Electronic | 1.30   |
| Package Services (parcels only) | Retail     | 1.80   |
|                                 | Electronic | 1.30   |

[R900.26.0]

**10.1.2 Fees and Postage**

The applicable Signature Confirmation fee in [10.1.1](#) must be paid in addition to the correct postage. The fee and postage may be paid with postage stamps, meter stamps, or permit imprint. Precanceled stamps are not permitted as postage payment. [S919.1.6]

**10.2 Basic Information****10.2.1 Description**

Signature Confirmation service provides the mailer with information about the date and time an article was delivered and, if delivery was attempted but not successful, the date and time of the delivery attempt. A delivery record, including the recipient's signature, is maintained by the USPS and is available, via fax or mail, upon request. No acceptance record is kept at the office of mailing. Signature Confirmation service is available only at the time of mailing. Signature Confirmation service does not include insurance, but insurance may be purchased as an additional service (see [10.2.6](#)). Some statutes and regulations governing the mailing of documents with legal significance may require the use of Certified Mail or Registered Mail rather than Signature Confirmation. [S919.1.1]

**10.2.2 Eligible Matter**

Signature Confirmation is available for First-Class Mail parcels defined in [401.1.0](#) as machinable (with no minimum weight), irregular, or outside parcels; for all Priority Mail pieces; and for Package Services parcels defined in [401.1.0](#) as machinable, irregular, or outside parcels. For the purposes of using Signature Confirmation with a First-Class Mail parcel or a Package Services parcel, the parcel must meet these additional requirements:

- a. The surface area of the address side of the parcel must be large enough to contain completely and legibly the delivery address, return address, postage, and any applicable markings, endorsements, and extra service labels.
- b. Except as provided in [10.2.2c](#) for machinable parcels, the parcel must be greater than 3/4 inch thick at its thickest point.
- c. If the mailpiece is a machinable parcel under [401.1.0](#) and no greater than 3/4 inch thick, the contents must be prepared in a strong and rigid fiberboard or similar container or in a container that becomes rigid after the contents are enclosed and the container is secured. The parcel must be able to maintain its shape, integrity, and rigidity throughout processing and handling without collapsing into a letter-size or flat-size piece. [S919.1.2]

**10.2.3 Ineligible Matter**

Signature Confirmation is not available for the following:

- a. Express Mail, Periodicals, and Standard Mail pieces.
- b. First-Class Mail letter-size and flat-size pieces.
- c. Package Services flat-size pieces.
- d. Mail paid with precanceled stamps.
- e. Mail addressed to APO/FPO destinations.

## 503.10.2.4

- f. Mail addressed to any U.S. territory, possession, or Freely Associated State listed in 608, with the exception of Puerto Rico and the U.S. Virgin Islands.

[S919.1.3]

**10.2.4 Service Options**

The two Signature Confirmation service options are:

- a. Retail option: Available at post offices at the time of mailing. A mailing receipt is provided. Mailers can access delivery information over the Internet at [www.usps.com](http://www.usps.com) or by calling 1-800-222-1811 toll-free and providing the article number.
- b. Electronic option: Available to mailers who establish an electronic link with the USPS to exchange acceptance and delivery data. No mailing receipt is provided. [S919.1.4]

**10.2.5 Proof of Delivery**

Proof of delivery information for Signature Confirmation is available as follows:

- a. Individual requests by article number can be retrieved at [www.usps.com](http://www.usps.com) or by calling 1-800-222-1811. A proof of delivery letter is provided via fax or mail.
- b. Bulk proof of delivery letters are available only to mailers using Signature Confirmation service electronic option or privately printed labels. Bulk proof of delivery letters can be obtained in CD-ROM or Signature Extract File formats. For additional information see Publication 80, *Bulk Proof of Delivery Program*.

[S919.1.5]

**10.2.6 Additional Services**

Signature Confirmation may be combined with:

- a. Collect on delivery (COD).
- b. Insured mail.
- c. Registered Mail.
- d. Restricted delivery, if purchased with insurance for more than \$50, COD, or registry service.
- e. Special handling. [S919.1.7]

**10.2.7 Where to Mail**

A mailer may mail articles with retail option Signature Confirmation at a post office, branch, or station, or give articles to a rural carrier. [S919.1.8]

**10.2.8 Firm Sheets—Three or More Pieces**

If three or more articles are presented for mailing at one time, the mailer may use Form 3877 provided by the USPS at no charge, or privately printed firm sheets. Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be used if approved by the local postmaster. The mailer may omit columns from Form 3877 that are not applicable to Signature Confirmation mail. Required elements are the package identification code (PIC), 5-digit destination ZIP Code, and applicable fees. If the mailer wants the firm sheets receipted by the USPS, the mailer must present the books with the articles to be mailed at a post office. The sheets of the books are the mailer's receipts. All entries

made in firm sheets must be made by typewriter or ink. Alterations must be initiated by the mailer and accepting postal employee. All unused portions of the addressee column must be obliterated with a diagonal line. A receipt is required for refund requests. [S919.1.9]

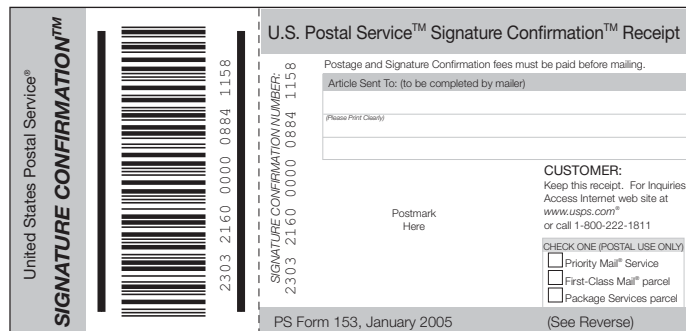

**10.3 Labels**

**10.3.1 Types of Labels**

Mailers must use one of the label options shown below (for additional information see Publication 91, *Confirmation Services Technical Guide*):

- a. Form 153, obtained from the post office at no charge. This form may be used only with the retail option (see [Exhibit 10.3.1a](#)).

**Exhibit 10.3.1a Form 153**

[Exhibit S919.2.1a]

503.10.3.1

- b. Label 315, available at no charge to electronic option mailers (see [Exhibit 10.3.1b](#)).

**Exhibit 10.3.1b Label 315**

[Exhibit S919.2.1b]

- c. Privately printed barcoded labels that meet the requirements in [10.3, Labels](#), and [10.4](#) (see [Exhibit 10.3.1c](#)). On the Priority Mail label, mailers must use the registered trademark symbol following the Priority Mail text or add the following statement at the bottom of the label in at least 6-point Helvetica type: “Priority Mail is a registered trademark of the U.S. Postal Service.” [S919.2.1]

**Exhibit 10.3.1c Privately Printed Label**

[Exhibit S919.2.1c]

### 10.3.2 Label Placement

The barcoded label section of Label 315 or Form 153 must be placed either above the delivery address and to the right of the return address or to the left of the delivery address. A privately printed Signature Confirmation label that is separate from a privately printed address label must be placed in close proximity to the address label. In all cases, the entire Signature Confirmation label must be placed on the address side of the mailpiece and not overlap any adjacent item. [S919.2.2]

## 10.4 Barcodes

### 10.4.1 Symbology

Labels printed by mailers must meet the following barcode symbology requirements:

- a. Mailers printing their own barcodes and using the retail service option (10.2.4a) must use the Automatic Identification Manufacturers' (AIM) Uniform Specifications for USS Code Interleaved 2 of 5 barcode symbology. Each barcode must contain a unique Package Identification Code (PIC) as specified in 10.4.2. Barcodes also must meet the specifications in Publication 91.
- b. Effective January 31, 2005, mailers printing their own barcodes and using the electronic service option (10.2.4b) must use the UCC/EAN Code 128 barcode symbology. All new mailers must use this symbology. Through January 30, 2005, mailers printing their own barcodes and using the electronic service option may use one of the following barcode symbologies: UCC/EAN Code 128, USS Code Interleaved 2 of 5, USS Code 39, or USS Code 128. Each barcode must contain a unique PIC as specified in 10.4.2. Barcodes also must meet the specifications in Publication 91. [S919.3.1]

### 10.4.2 Package Identification Code (PIC)

Each barcode symbology must contain a unique PIC:

- a. For UCC/EAN 128, each barcode must contain a unique PIC and be made up of five fields totaling from 16 to 22 characters. Additional information and specifications can be found in Publication 91. The five required data fields are:
  1. Application Identifier (AI): two characters; identifies the barcode as a postal barcode.
  2. Service Type Code (STC): two characters; identifies the type of product or service used for each item.
  3. Customer ID: nine characters; DUNS® number that uniquely identifies the customer.
  4. Package Sequence Number (PSN): variable from two to eight numbers.
  5. Modulus 10 Check digit: one character. See Publication 91 for use of the concatenated barcode for routing purposes.
- b. For USS Code Interleaved 2 of 5, USS Code 39, and USS Code 128, each barcode must contain a unique PIC and be made up of four fields totaling 20 characters. The four required data fields are fields 2 through 5 above with a fixed sequential number of 8 digits. Additional information and specifications can be found in Publication 91. These symbologies do not use an Application Identifier (AI). [S919.3.2]

### 10.4.3 Printing

Labels printed by mailers must meet the following specifications:

- a. Each barcoded label must bear a return address and a unique Signature Confirmation PIC barcode as specified in 10.4.2. The text “USPS SIGNATURE CONFIRMATION” (if using retail service option, as specified in 10.2.4) or “e/USPS SIGNATURE CONFIRMATION” (if using electronic service option, as specified in 10.2.4, and the postage is evident on the mailpiece) must be printed between 1/8 inch and 1/2 inch above the barcode in minimum 12-point bold sans serif type. Additionally, mailers approved for the electronic service option, at their discretion, may print the text “ELECTRONIC RATE APPROVED #[DUNS<sup>®</sup> NUMBER]” in minimum 8-point bold sans-serif type directly below the bottom horizontal identification bar (see Exhibit 10.4.3c). Human-readable characters that represent the barcode ID must be printed between 1/8 inch and 1/2 inch under the barcode in minimum 10-point bold sans serif type. These characters must be parsed in accordance with Publication 91. A minimum 1/8-inch clearance must be maintained between the barcode and any printing. The preferred range of widths of narrow bars and spaces is 0.015 inch to 0.017 inch. The width of the narrow bars or spaces must be at least 0.013 inch but no more than 0.021 inch. All bars must be at least 3/4 inch high. Minimum 1/16-inch bold bars must appear between 1/8 inch and 1/2 inch above and below the human-readable endorsements to segregate the Signature Confirmation barcode from other areas of the shipping label. The line length should extend across the width of the label but must extend the length of the barcode at a minimum (see Exhibit 10.3.1c). Only information relating to Signature Confirmation and other extra services must be placed between these lines.
- b. Each barcode must meet the requirements in 10.4.1 for the type of service requested.
- c. Mailers must obtain USPS certification for each printer used to print barcoded Signature Confirmation labels. For certification, a mailer must forward for evaluation and approval 20 barcoded labels/forms generated by each printer to the National Customer Support Center (NCSC), Attention Barcode Certification (see 608.8.0 for address). The USPS will issue the mailer a Form 3152 for each printer certified. All barcodes must be in accordance with 10.3, *Labels*, and 10.4. Further certification instructions are included in Publication 91.

#### Exhibit 10.4.3c Electronic Service Option Identification

[Exhibit S919.3.3]

- d. Barcodes that do not meet specifications will not be accepted by the USPS. The USPS will contact the mailer if problems with the barcodes are found and will try to resolve the problem. The USPS may suspend a mailer's certification if electronic file quality does not meet specifications.
- e. Mailers who have previously received certification for label printing under the Delivery Confirmation program are not required to obtain any additional certification to use Signature Confirmation. [S919.3.3]

#### 10.4.4 Integrated Barcodes

An integrated barcode may be used by mailers printing their own barcodes and using the electronic service option. Mailers may combine Signature Confirmation and insurance services into a single barcode on the shipping label and eliminate multiple labels and barcodes on packages. Mailers must still meet existing specifications in 10.4.1 and 10.4.2. Minor modifications allow users to request multiple extra services on Priority Mail and Package Services. Two required changes are:

- a. Change the text above the barcode to identify the service requested. Exhibits are included in Publication 91.
- b. Change the service type code in the barcode to identify the class of mail and/or type of extra services combined with Signature Confirmation. Additional information on the Service Type Code Matrix can be found in Publication 91. [S919.3.4]

### 10.5 Electronic File Transmission

Mailers must meet the following standards for electronic file transmission:

- a. Publication 91 contains specifications for electronic file transmission. A test file transmission must be uploaded and approved before mailings begin. Upon certification, USPS will issue the mailer Form 3152.
- b. Mailers using the electronic option must transmit a file with a unique record for each article mailed. The USPS may suspend a mailer's certification if the electronic file quality does not meet specifications. In addition, USPS acceptance units will be notified to charge the customer the retail option Signature Confirmation fee.
- c. Mailers who previously received certification for electronic file transmission under the Delivery Confirmation program are not required to obtain an additional certification for Signature Confirmation use.
- d. Mailers using the electronic option must include additional fields in the electronic file when planning to use the integrated barcode. For more information see Publication 91. [S919.4.0]

### 10.6 Acceptance

Customers must meet the following requirements when presenting electronic option Signature Confirmation mail for acceptance:

- a. Presorted or permit imprint mailings containing pieces for which fees are paid for Signature Confirmation service must be presented to a post office business mail entry unit (BMEU), detached mail unit (DMU) at the mailer's plant, bulk mail

## 503.10.6

center or auxiliary service facility business mail entry unit, or other postal facility capable of properly verifying the mailing and at which the mailer has obtained the necessary permits or license and paid any applicable mailing fee.

- b. Mailers who use the electronic option or print their own labels must submit a copy of their original Form 3152 with their first mailing using Confirmation Services (see exception in 10.6c). The business mail or detached mail entry unit office will retain a copy of the form. However, mailers who wish to obtain an electronic entry scan must submit Form 3152 with each mailing to include the electronic file number associated with that mailing. The electronic file number on the form must be in either a barcode format (preferred) or written on the form. All barcode formats must comply with standards in Publication 91. Mailers should keep the certification form on file while using Confirmation Services. If requested by the USPS, the form must be presented within 24 hours.
- c. Mailers of single-piece rate mail with postage affixed using the electronic option rate are not required to submit Form 3152 with their initial mailing. This includes mailings generated from the Postal Service online shipping label application at [www.usps.com](http://www.usps.com) or labels generated from a third-party vendor or system that supports the electronic option rates. All labels must meet USPS format and design requirements, including the “e” (electronic rate) endorsement in the barcode text line. [S919.5.0]

11.0 Collect on Delivery (COD)

11.1 Collect on Delivery Fees

11.1.1 Fee

Fee, in addition to postage and other fees, per piece:

| <b>Amount to be collected or insurance coverage desired, whichever is higher<sup>1</sup></b> | <b>Fee</b> |
|--|------------|
| \$0.00 to \$50   | \$4.50     |
| 50.01 to 100   | 5.50       |
| 100.01 to 200  | 6.50       |
| 200.01 to 300  | 7.50       |
| 300.01 to 400  | 8.50       |
| 400.01 to 500  | 9.50       |
| 500.01 to 600  | 10.50      |
| 600.01 to 700  | 11.50      |
| 700.01 to 800  | 12.50      |
| 800.01 to 900  | 13.50      |
| 900.01 to 1,000  | 14.50      |
| <b>Additional COD Services</b>   | <b>Fee</b> |
| Restricted delivery <sup>2</sup>   | \$3.50     |
| Notice of nondelivery  | 3.00       |
| Alteration of COD charges or designation of new addressee                                    | 3.00       |
| Registered COD <sup>3</sup>  | 4.00       |

1. For Express Mail COD shipments valued at \$100 or less, the COD fee charged is based on the amount to be collected. Express Mail insurance automatically provides up to \$100 merchandise insurance.
2. Not available with Express Mail COD.
3. Regardless of amount to be collected or insurance value.

[R900.8.0]

11.1.2 Fee and Postage

The applicable COD fee must be paid in addition to the correct postage and the fees for other services requested. The amount to be collected or the amount of insurance coverage desired, whichever is higher, determines the COD fee. The fees for COD service include insurance against loss, rifling, or damage to the article or failure to receive a postal money order or the recipient's check. Postal liability for failure to receive the recipient's check or a postal money order is limited to loss in transit.

[S921.1.5]

11.2 Basic Information

11.2.1 Description

Any mailer may use collect on delivery (COD) service to mail an article for which the mailer has not been paid and have its price and the cost of the postage collected from the recipient. The recipient has the option to pay the COD charges using either cash or personal check. Only one form of payment may be used for a single mailpiece. If the recipient pays the amount due by check payable to the mailer, the USPS forwards the check to the mailer. If the recipient pays the amount due in cash,

## 503.11.2.2

the USPS collects the money order fee(s) from the recipient and sends a postal money order(s) to the mailer. The amount collected from the recipient may not exceed \$1,000. COD service provides the mailer with a mailing receipt. The Postal Service maintains a record of delivery (which includes the recipient's signature) for a specified period of time. Customers may obtain a delivery record by purchasing return receipt service. See 6.0 for details. [S921.1.1]

**11.2.2 Eligible Matter**

COD service may be used for Express Mail, First-Class Mail, Priority Mail, and any Package Services subclass if:

- a. The mail has the complete names and addresses of the mailer and addressee.
- b. The mailer guarantees to pay any return postage, unless otherwise specified on the mail.
- c. The goods shipped are ordered by the addressee. [S921.1.2]

**11.2.3 Additional Services**

Purchasing COD service allows customers to then purchase restricted delivery service or a return receipt. The following additional services may be combined with COD if the applicable standards for the services are met and the additional service fees are paid:

- a. Delivery Confirmation (not available with Express Mail COD).
- b. Registered Mail.
- c. Signature Confirmation (not available with Express Mail COD).
- d. Special handling. [S921.1.4]

**11.2.4 Registered COD Mail**

Sealed domestic mail of any class bearing First-Class postage may be sent as registered COD mail. Such mail is handled the same as other Registered Mail. The maximum amount collectible from the recipient on an individual parcel is \$1,000. Indemnity may be purchased up to the registry limit of \$25,000 by paying the applicable registry fee for the value declared. The total fees charged for registered COD service include the proper registry fee for the value declared plus the registered COD fee. The mailer must declare the full value of the article being mailed, regardless of the amount to be collected from the recipient. The registered label and the COD form must be affixed to each article. The registration number is used for delivery receipt and indemnity claims. [S921.1.8]

**11.2.5 Express Mail COD**

Any article sent COD also may be sent by Express Mail next day and second day service. Such mail is handled in the same manner as other Express Mail. The maximum amount collectible from the addressee on an individual article is \$1,000, and indemnity for failure to collect or issue payment is limited to \$1,000. Express Mail postage and the proper COD fees must be paid. Both the Express Mail label and COD form must be affixed to each article. The Express Mail article number is used for delivery receipt and indemnity claims. [S921.1.9]

**11.2.6 Ineligible Matter**

COD service may not be used for:

- a. Collection agency purposes.
- b. The return of merchandise about which some dissatisfaction arises, unless the new addressee consents in advance to such return.
- c. The mailing of only bills or statements of account, even with the addressee's consent. If a legitimate COD shipment of merchandise is mailed, the balance due on a past or expected transaction may be included in the charges on a COD article, if the addressee consents in advance to such action. In such a case, USPS indemnity is limited to the value of the article lost or damaged, not the full COD charges to be collected.
- d. Moving-picture films mailed by exhibitors to moving-picture manufacturers, distributors, or exchanges. Such films may be sent as insured mail or, if sealed, as registered First-Class Mail.
- e. Articles sent to or from an APO or FPO address, including official mail and shipments to Armed Forces agencies. [S921.1.3]

#### **11.2.7 Altering COD Charges or Address**

The mailer of a COD package may alter the COD charges or direct delivery to a new addressee by filing a request with the postmaster at the office of address and paying the applicable fee. The request must show the post office and date of mailing, the COD number, the name and address of addressee shown on form, the name and address of new addressee if applicable, and the new COD charges or delivery to be made without collecting COD charges. [S921.1.6]

#### **11.2.8 Notice to Mailer**

A mailer wanting a notice of undelivered COD mail must request Form 3849-D by checking the proper box on the COD form. The request may also be placed on the address label. It must appear conspicuously, directly under the return name and address of the mailer and separate from other instructions, as follows: "Form 3849-D Requested." A mailer's request may include directions to send the notice to the mailer or designated representative. When the mailer's representative is designated, the representative's name and local or nearby address must be shown in a bordered space with instructions, reading: "Do not deliver to mailer's designated representative without collecting COD charges," or "Deliver without collecting COD charges to mailer's designated representative." [S921.1.7]

**11.3 Forms**

**11.3.1 Form 3816**

Mailers must complete barcoded Form 3816 (see [Exhibit 11.3.1](#)) and attach it either above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. If more than three articles are sent at a time, the mailer may use Form 3816-AS. [S921.2.1]

**Exhibit 11.3.1 Form 3816**

| <b>DELIVERY EMPLOYEE - Remove Copies 1 &amp; 2 at Time of Delivery</b>   |   |  |                       |
|--|---|--|-----------------------|
| Collect the amount shown below if customer pays by CHECK made payable to the mailer.   |   | Collect the amount shown below if customer pays in CASH (includes MO fee). |                       |
| Check Amount \$  |   | Cash Amount \$   |                       |

| <b>FROM:</b>   |   | <b>TO:</b>   |                       |
| Delivered By   | Date Delivered  | Received By: <i>(Print Name and Sign)</i>                                  |                       |
| Check Number   | MO Number   | Date Payment Sent to Mailer  | Date Form 3849-D Sent |
| PS Form 3816, December 2004  |   | <b>Copy 1 - Delivery Unit</b>  |                       |
| 1. DO NOT allow the recipient (addressee or agent) to examine the contents before payment.<br>2. DO NOT deliver this article until payment is collected. |   | 3. If payment is by check, enter check number above                        |                       |

[Exhibit S921.2.1]

**11.3.2 Privately Printed Form 3816-AS**

If authorized, a mailer may use a privately printed Form 3816-AS. The privately printed form must be nearly identical in design and color to postal-provided forms, with COD article numbers that can be read by automated postal equipment. A minimum of three preproduction samples must be submitted to the business mail entry manager serving the mailer's location for review by the mailpiece design analyst. Once approved, the mailer is provided a block of COD numbers to be used. [S921.2.2]

**11.3.3 Nursery Stock**

A firm that mails nursery stock (the sender) may print special COD forms if the forms have instructions for disposing of shipments not delivered immediately, include a remittance coupon to be returned with the money order or recipient's check, and meet these conditions:

- a. If the firm does not want the undeliverable parcel disposed of to the highest bidder, the firm's instructions on the back of the delivery office part of the COD form (1), and on the remittance coupon (2), should read as follows:

1. "If recipient refuses to pay charges for any reason, deliver at once without collecting the charges. Notify sender at once if parcel is not delivered and, if no reply is received in 30 days, destroy parcel. See remittance coupon for further instructions."
  2. "Return this coupon with money order. If parcel is delivered without collection of charges, or is destroyed after 30 days, check disposition and send coupon to sender in penalty envelope."
    - Delivered to addressee without collecting charges.
    - Destroyed after 30 days.
- b. If the firm wants the undeliverable parcel disposed of to the highest bidder, the firm's instructions on the back of the delivery office part of the COD form (1), and on the remittance coupon (2), should read as follows:
1. "If addressee refuses to pay charges for any reason, deliver at once without collecting the charges. Notify sender at once if parcel is not delivered and if no reply is received in 30 days, sell to highest bidder and remit proceeds, less commission. If sale cannot be made, destroy parcel. See remittance coupon for further instructions."
  2. "Return this coupon with money order or addressee's check. If parcel is delivered without collection of charges, is destroyed after 30 days, or is sold, check disposition and send coupon to sender in penalty envelope."
    - Delivered to addressee without collecting charges.
    - Destroyed after 30 days.
    - Sold for \$\_\_\_\_ remittance, less commission, herewith.

[S921.2.3]

## 11.4 Mailing

### 11.4.1 Identifying Number

COD articles are identified by a number that appears on each section of the COD form. When Express Mail COD service is used, the mailer must place the completed Express Mail label and the COD form on the front of the article. The Express Mail article number is used for delivery receipt and indemnity claims. When registered COD mail service is used, the mailer must place the completed registered label and the COD form on the front of the article. The registration number is used for delivery receipt and indemnity claims. [S921.3.1]

### 11.4.2 Numbering for Large Volumes

A mailer who regularly mails a large volume of COD mail must ensure that a unique COD number is used for each article mailed. [S921.3.2]

### 11.4.3 Completing COD Forms

The mailer must securely affix a COD form to each COD article. The form must show article number, names and addresses of mailer and recipient, amount due mailer, and amount of money order fee necessary to make remittance. The USPS is not responsible for errors that a mailer makes in stating the charges to be collected. The mailer may use USPS forms or privately printed forms approved by the USPS. The

## 503.11.4.4

information required on the COD form must be handwritten with ink, typewritten, or computer printed. The mailer may not stipulate “Cash Only” on the COD form.

[S921.3.3 and S921.3.4]

**11.4.4 Addressing Forms**

The name and address of the person to whom the remittance is to be sent must appear in the proper spaces on the COD form and in the return address area on the COD article itself, with the postal endorsements for return if undeliverable. The return address on the COD form must be the same as the return address on the COD article, except that a mailer using a privately printed COD form may print a different address on the remittance coupon where payments are to be sent. The mailer's address where undeliverable articles are to be returned must appear on the other parts of the form. Only domestic addresses may be used. [S921.3.5]

**11.4.5 Receipt**

A mailer of one or two parcels per mailing receives a section of Form 3816 as a receipt. If three or more COD articles are presented for mailing at one time, the mailer may use Form 3877 (firm sheet), provided by the USPS at no charge, or privately printed firm sheets. (Privately printed or computer-generated firm sheets that contain the same information as Form 3877 may be approved by the local postmaster; the mailer may omit columns from Form 3877 that are not applicable to COD mail.) The mailer submits the forms in duplicate and receives one copy of the postmarked form as a mailing receipt after the entries are verified by the postal employee accepting the mailing. All entries made on firm sheets must be made by typewriter, ink, or ballpoint pen. Alterations must be initialed by the mailer and accepting employee. All unused portions of the addressee column must be obliterated with a diagonal line. [S921.3.6]

**11.4.6 Where to Mail**

COD mail must be mailed at a post office, station, or branch or through a rural carrier or a nonpersonnel rural unit. It may not be placed in a post office maildrop or in or on a street letterbox. It may be placed in, but not on, a rural mailbox. [S921.3.7]

**11.4.7 Rural Carriers**

COD articles may be given to rural carriers for mailing. The articles must be prepared properly and stamps for the required postage and fees affixed. If the mailer wants insurance for an amount more than the COD amount to be collected, that amount must be shown. The USPS assumes no responsibility for any article or money left in a rural mailbox until the carrier issues a receipt. Customers at nonpersonnel rural units must meet the rural carrier at the unit for COD service. [S921.3.8]

**11.4.8 Delays**

Mailers may report delays in remittance (more than 60 days for domestic mailings) to the Postal Inspection Service, giving all necessary particulars. [S921.3.9]

**11.5 Delivery**

Delivery of COD mail is subject to [508.1.0](#), [Recipient Options](#), and [508.2.0](#), [Conditions of Delivery](#). Except for Express Mail COD, a postmaster may restrict delivery of COD mail if the amount to be collected makes the carrier a potential target for theft or if previous experience indicates that the addressee will be

unavailable to receive the article at the time of delivery. If payment is by check, the recipient's check, made payable to the mailer, may be accepted by the USPS employee upon the recipient's presentation of adequate identification. If payment is made by cash, in addition to the COD amount a money order fee is collected from the recipient. [S921.4.0]

## 12.0 Special Handling

### 12.1 Fees for Special Handling

#### 12.1.1 Fees

Fee, in addition to postage and other fees, per piece:

| Weight                  | Fee    |
|-------------------------|--------|
| Not more than 10 pounds | \$5.95 |
| More than 10 pounds     | 8.25   |

[R900.27.0]

#### 12.1.2 Fee and Postage

The applicable special handling fee must be paid in addition to postage for each addressed piece for which special handling service is desired. Except for official mail, the special handling fee must be paid at the time of mailing. For official mail, the special handling fee is collected under established reimbursement procedures.

[S930.1.5]

### 12.2 Basic Information

#### 12.2.1 Description

Special handling service provides preferential handling, but not preferential delivery, to the extent practicable in dispatch and transportation. The service does not itself insure the article against loss or damage. Special handling service is mandatory for material that requires extra care in handling, transportation, and delivery. [S930.1.1]

#### 12.2.2 Availability

Special handling service is available only for First-Class Mail, Priority Mail, and Package Services. [S930.1.2]

#### 12.2.3 Additional Services

The following extra services may be combined with special handling if the applicable standards for the services are met and the additional service fees are paid:

- a. COD.
- b. Delivery Confirmation.
- c. Insurance.
- d. PAL (for Package Services only).
- e. Return receipt for merchandise.
- f. Signature Confirmation. [S930.1.3]

503.12.2.4

**12.2.4 Bees and Poultry**

Unless sent at the First-Class Mail or Priority Mail rates, special handling is required for parcels containing honeybees or baby poultry. Under 601.9.3.8, only queen honeybees may be shipped by aircraft. Check with your local post office for mailability prior to mailing honeybees other than queen honeybees at First-Class Mail or Priority Mail rates. [S930.1.4]

**12.2.5 Marking**

The marking “Special Handling” must appear prominently above the address and to the right of the return address on each piece for which special handling service is requested. [S930.1.6]

**12.2.6 Nonmachinable Parcel Post**

The Parcel Post nonmachinable surcharge is not charged on parcels sent special handling. [S930.1.7]

13.0 Confirm

**13.1 Confirm Fees**

**13.1.1 Fee**

Fee, in addition to postage and other fees:

| Subscription Level | Subscription Fee and Term | Additional ID Code Fee and Term | Additional Scans Fee and Number      |
|--------------------|---------------------------|---------------------------------|--------------------------------------|
| Silver             | \$2,000<br>3 months       | \$500 each<br>3 months          | \$500<br>block of<br>2 million scans |
| Gold               | \$4,500<br>12 months      | \$500 each<br>3 months          | \$750<br>block of<br>6 million scans |
| Platinum           | \$10,000<br>12 months     | \$500 each<br>3 months          | NA                                   |

[R900.9.0]

**13.1.2 Fees and Postage**

The Confirm subscription fees as defined in 13.2.7 and shown in 13.1.1 must be paid in advance. These subscription fees are in addition to other postage and fees. [S941.1.8]

**13.1.3 Deposit**

The class of mail and rate claimed and the postage payment method used determine the point of deposit or entry. [S941.1.9]

**13.2 Basic Information**

**13.2.1 Description**

Confirm is a service that provides an authorized subscriber with data electronically collected from the optical scanning of specially barcoded mailpieces as they pass through certain automated mail processing operations. Scanned data can include the postal facility where such pieces are processed, the postal operation used to

process the pieces, the date and time when the pieces are processed, and the numeric equivalent of two barcodes that help to identify the specific pieces. Any piece intended to generate scanned data must meet the appropriate physical characteristics and standards in 13.0, although not every properly prepared piece is guaranteed such data or complete data. Confirm does not provide proof of delivery. [S941.1.1]

### 13.2.2 Available Service and Handling

Confirm is available only to authorized subscribers as described in 13.2.3. Service applications are described in 13.2.6 and subscription levels in 13.2.7. Confirm may be used for one or more pieces in a mailing. Mail prepared for Confirm is dispatched and handled in transit as ordinary mail unless combined with a service available for the class of mail and rate claimed that requires different handling. [S941.1.2]

### 13.2.3 Authorization

Confirm requires USPS authorization after applicable fees are paid and technical requirements for certification are met. For certification, a mailer must submit for evaluation and approval mailpieces bearing both PLANET Code barcodes and POSTNET barcodes to the National Customer Support Center (see 608.8.0 for address). Certification also includes, if applicable, evaluation and approval of the electronic format and uploading of the Advance Shipping Notice (ASN) file and the associated shipment identification barcode printed on required documentation accompanying mailings. Confirm may be used only after authorization is received, and information generated from the service is provided only if the standards for participation are met. [S941.1.3]

### 13.2.4 Availability

Confirm is available to authorized subscribers for tracking automation-compatible letter-size or flat-size mail in the following classes:

- a. First-Class Mail (including Priority Mail).
- b. Periodicals.
- c. Standard Mail.
- d. Package Services. [S941.1.4]

### 13.2.5 Additional Services

Confirm does not preclude or require the use of any extra service available for the class of mail and rate claimed. [S941.1.5]

### 13.2.6 Service Applications

Two service applications are available:

- a. Origin Confirm for incoming mail. This use notifies the subscribing mailer of various movements of individual reply pieces, such as business reply mail being returned by customers, before delivery to the Confirm subscriber.
- b. Destination Confirm for outgoing mail. This use notifies the subscribing mailer of various movements of individual pieces, such as letter-size or flat-size pieces in a specific mailing, from the entry of the mailing to final automated processing steps of the pieces before delivery to the destination address. [S941.1.6]

### **13.2.7 Subscription Levels**

Confirm is available in three distinct subscription levels as defined below. A mailer may subscribe to one or more of these levels at the same time, at different times, or at overlapping times:

- a. *Silver Subscription.* The Silver subscription level has a term of 3 consecutive months, includes one five-digit identification code assigned by the USPS, and provides up to 15 million scans. A mailer subscribing to this level may also:
  1. License additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.
  2. License additional scans in blocks of 2 million scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.
- b. *Gold Subscription.* The Gold subscription level has a term of 12 consecutive months, includes one five-digit identification code assigned by the USPS, and provides up to 50 million scans. A mailer subscribing to this level may also:
  1. License additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first.
  2. License additional scans in blocks of 6 million scans at any time before the underlying subscription expires. Unused scans expire at the end of the subscription term.
  3. Raise the subscription level to a Platinum subscription level at any time before the expiration of the Gold subscription by paying the difference of the respective subscription fees. This change in service level does not extend the term of the underlying initial subscription.
- c. *Platinum Subscription.* The Platinum subscription level has a term of 12 consecutive months, includes three five-digit identification numbers assigned by the USPS, and provides an unlimited number of scans. A mailer subscribing to this level may also license additional identification codes for a term of 3 consecutive months or until the expiration of the underlying subscription, whichever occurs first. [S941.1.7]

## **13.3 Barcodes**

### **13.3.1 General Barcode Requirement**

At the time of mailing, each piece in a mailing that is intended to generate Confirm information must bear a PLANET Code barcode. The USPS does not apply subscriber PLANET Code barcodes to mail after deposit by the subscriber. The use of POSTNET barcodes, which must meet the applicable specifications in [708.4.0](#), is as follows:

- a. Origin Confirm pieces must bear both a PLANET Code barcode and a POSTNET barcode at the time of mailing. For business reply mail, the POSTNET barcode must correspond to the subscriber's business reply mail

ZIP+4 codes assigned by the USPS under [507.8.0](#). For all other reply mail, the POSTNET barcode must correspond to the appropriate 5-digit ZIP Code, ZIP+4 code, or delivery point code for the delivery address.

- b. Destination Confirm pieces must bear a PLANET Code barcode and, if required by the rate claimed at the time of mailing, an appropriate POSTNET barcode that corresponds to the delivery address. If a POSTNET barcode is not required by the rate claimed, the mailer has the option to apply the POSTNET barcode to such pieces for optimal Confirm information if the barcode correctly corresponds to the delivery address. [S941.2.1]

### 13.3.2 POSTNET Barcode

The type of POSTNET barcode (e.g., ZIP+4 barcode or delivery point barcode) and the placement of the barcode on a Confirm piece must meet the standards for the rate claimed. If two POSTNET barcodes are applied to the same piece, they must meet these standards:

- a. Only one POSTNET barcode may be used in the address block as provided in [13.3.6](#).
- b. The second POSTNET barcode must be placed outside the address block in a position meeting the applicable standards in [708.4.0](#) for letter-size mail or flat-size mail. [S941.2.2]

### 13.3.3 PLANET Code Barcode Use

Only one PLANET Code barcode may appear on a Confirm piece. For letter-size mail, the PLANET Code barcode may be placed in any position permitted in [708.4.0](#) for a POSTNET barcode except the lower right corner barcode clear zone. For flat-size mail, the PLANET Code barcode may appear in any position of the piece permitted for a POSTNET barcode in [708.4.0](#). Any PLANET Code barcode printed on mail for Confirm information must:

- a. Be generated by the method used to receive USPS barcode certification during the application process in [13.2.3](#).
- b. Meet the barcode specifications in [13.3.4](#).
- c. Meet the format specifications in [13.3.5](#). [S941.2.3]

### 13.3.4 PLANET Code Barcode Specifications

The PLANET Code barcode symbology, which is the inverse of the POSTNET barcode symbology, uses a unique combination of three tall and two short bars to define each digit from 0 to 9. PLANET Code barcodes must meet the same dimensional specifications (including pitch, tilt, and baseline positioning) and print specifications (including reflectance) as required in [708.4.0](#) for POSTNET barcodes and in Publication 197, *Customer Guide to Confirm Service*. Publication 197 is available from the National Customer Support Center (see [608.8.0](#) for address). [S941.2.4]

### 13.3.5 PLANET Code Barcode Format

PLANET Code barcodes must meet the following format standards required in Publication 197 for service type:

- a. Origin Confirm mailpieces (incoming reply mail) require these data fields in the following order from left to right:
  1. Mailpiece type identification: two digits; identifies type of reply mail (courtesy reply mail, business reply mail (BRM), or Qualified BRM) and physical characteristic of piece (letter, card, or flat); defined by USPS.
  2. Customer identification: nine or eleven digits; identifies mailpiece; defined by subscriber.
  3. Check digit: one digit; defined as the number which, when added to the sum of the other digits in the barcode, results in a total that is a multiple of 10.
- b. Destination Confirm mailpieces (outgoing mail) require these data fields in the following order from left to right:
  1. Mailpiece type identification: two digits; identifies class of mail and physical characteristic of piece (letter, card, or flat); defined by USPS.
  2. Identification code: five digits; identifies mailer; assigned by USPS.
  3. Mailing: four (or six) digits; identifies specific mailing; defined by subscriber.
  4. Check digit: one digit; defined as the number which, when added to the sum of the other digits in the barcode, results in a total that is a multiple of 10. [S941.2.5]

### **13.3.6 Address Block Barcoding**

If both a PLANET Code barcode and a POSTNET barcode are used as part of the delivery address block, the following standards must be met:

- a. One barcode must be placed in the upper part of the address block in one of two positions:
  1. Between the top address line (the first line of the delivery address block usually containing the recipient's name or attention line) and any keyline, optional endorsement line, or carrier route information line directly above the top address line.
  2. Directly above any keyline, optional endorsement line, or carrier route information line that is directly above the top address line.
- b. The other barcode must always be placed directly below the bottom address line (the city, state, and ZIP Code line).
- c. Both barcodes must maintain a minimum clearance of 1/25 inch directly above and below the barcodes.
- d. The entire address block must be placed on the piece under the applicable standards in [708.4.0](#). The barcodes and address block, along with any keyline, optional endorsement line, or carrier route information line, must maintain the other applicable minimum clearances under [708.4.0](#), including clearances for inserts in window envelopes. [S941.2.6]

### **13.3.7 Reply Mail Barcodes**

Reply pieces prepared for the Origin Confirm service application under [13.2.6](#) must meet any applicable format and barcode standards as follows:

- a. For business reply mail (BRM), [507.8.0](#).
- b. For Qualified BRM, [507.8.0](#).
- c. For courtesy reply mail (CRM), [202](#) for letters, [302](#) for flats. [S941.2.7]

## 13.4 Advance Shipping Notice

### 13.4.1 Purpose

Every mailing for which Destination Confirm information is desired requires the electronic submission of an Advance Shipping Notice (ASN), in a specific file format, before or at the time of the mailing. This electronic notice enables the USPS to match mailing data provided by the mailer with actual scans taken on Confirm pieces in the mailing and to generate various reports for analysis from the matched data. A test file transmission must be uploaded and approved before Confirm mailings may be made as provided in [13.2.3](#). [S941.3.1]

### 13.4.2 Data Format

The ASN data file is a single data file in comma-delimited flat file format. Each record is made up of a single row of data consisting of 16 data elements (fields) as defined in Publication 197. ASN data include specific mailer-generated information about each Destination Confirm mailing, such as drop location, drop date, mailer identification, volume, presort level, and number of pieces bearing PLANET Code barcodes. [S941.3.2]

### 13.4.3 Shipment ID Barcode

In addition to an electronic ASN transmission for each mailing, an ASN Shipment ID barcode (used as a shipment identification) must be printed on the documentation accompanying the mailing. This documentation is either Form 8125 for mail prepared as a plant-verified drop shipment or Form 3152-A for mail entered and verified at a business mail entry unit. The USPS scans the ASN Shipment ID barcode to “start the clock” for the Destination Confirm mailing and to provide the base point for recording the actual processing time used for the mail. ASN Shipment ID barcode symbology is USS Code 128 Subset B and must meet the technical specifications in Publication 197. [S941.3.3]

## 13.5 Delivery

Any mailpiece prepared for Confirm is delivered as ordinary mail unless combined with any available service subject to [508.1.0](#), [Recipient Options](#), and [508.2.0](#), [Conditions of Delivery](#). [S941.4.0]

503.14.1

## 14.0 Money Orders

### 14.1 Fees for Money Orders

Fee, each:

- a. Domestic money order:

| Service  | Fee    |
|--|--------|
| Domestic money order,<br>\$0.01 to \$500                               | \$0.90 |
| Domestic money order,<br>\$500.01 to \$1000                            | 1.25   |
| Postal military money order<br>(issued by military facilities)         | 0.25   |
| Inquiry fee (includes the issuance of<br>a copy of a paid money order) | 3.00   |
| Maximum amount per money order—\$1000                                  |        |

- b. APO/FPO money order (\$0.01 to \$1,000.00): \$0.25.
- c. Inquiry (includes the issuance of a copy of a paid money order): \$3.00.  
[R900.16.0]

### 14.2 Issuing Money Orders

#### 14.2.1 Availability

Domestic money orders may be purchased from:

- All post offices, branches, and stations in the United States and its territories and possessions.
- Money order facilities for members of the U.S. Armed Forces.
- Rural route carriers and authorized highway contract route carriers. A customer fills out Form 6387 (available from the carrier) and gives it and the payment to the carrier. Unless the customer provides a preaddressed envelope and pays postage and any required fees for mailing, the carrier delivers the money order on the next trip. [S020.1.1]

#### 14.2.2 Purchase Restrictions

A postal customer may buy multiple money orders at the same time, in the same or differing amounts, subject to these restrictions:

- The maximum amount of any single money order is \$1,000.
- Without exception*, no customer may buy money orders on any 1 day whose total value exceeds \$10,000. This daily limit applies regardless of the number of visits made by a customer to one or more postal facilities.
- Any customer whose daily total of purchased money orders is from \$3,000 to \$10,000 must also complete Form 8105-A and show identification bearing the purchaser's photograph, name, and address. [S020.1.2]

#### 14.2.3 Purchase Method

Money orders must be paid for in one of these ways:

- In U.S. currency and coins (in any amount).

- b. With established traveler's checks payable in U.S. dollars if the purchase is for at least 50% of the value of the traveler's checks.
- c. With ATM/debit cards at locations approved by USPS Corporate Treasury where the customer's personal identification number must be entered on a keypad connected to a credit/debit terminal. [S020.1.3]

#### **14.2.4 Purchaser**

The purchaser must complete the money order and customer's receipt by filling in the names and addresses of the payee and purchaser. Money orders must be made payable to a single identifiable party, which can be the purchaser. The USPS does not guarantee a 100% refund on a stolen money order if the customer's receipt is not presented with the claim for refund. [S020.1.4]

#### **14.2.5 Replacement**

The USPS replaces without charge a defective money order or one that is spoiled during imprinting or customer completion if the customer returns the negotiable portion of the money order and the matching customer receipt. [S020.1.5]

### **14.3 Cashing Money Orders**

#### **14.3.1 Validity and Value**

Domestic money orders are paid regardless of the time passed since their issue. Money orders are not interest-bearing instruments; they are paid only in the exact amount imprinted up to the authorized maximum amount. USPS records serve as the basis for adjudicating claims for payment of money orders. [S020.2.1]

#### **14.3.2 Redemption**

All U.S. money orders, including military, may be cashed at any U.S. post office or bank. Subject to funds availability, money orders may be cashed by rural carriers. [S020.2.2]

#### **14.3.3 Identification**

When presenting a money order for payment, the customer seeking payment must sign in the presence of a USPS employee. If the customer is not known to the employee, suitable identification can be required. The USPS may refuse payment on any money order when the identity of the customer seeking payment is not proved to the satisfaction of the employee. [S020.2.3]

#### **14.3.4 Acceptable Signature**

The paying post office may accept any signature of the payee, purchaser, or endorsee that is not different from the name shown on the money order, subject to these conditions:

- a. A customer who cannot write may sign by using a mark, if a witness (who may not be a USPS employee) is present at the time of cashing.
- b. All money orders payable to a business firm, an organization, society, institution, or government agency must be signed in the name of the organization by an authorized representative (who must also sign with his or her own name and organizational title). Evidence of the representative's authority may be required.

## 503.14.3.5

- c. If the money order is drawn in favor of an official by name and presented by a successor, the successor must sign accordingly (e.g., “William Jones, treasurer, successor to George Thompson”).
- d. Use of a title (e.g., Mrs., M.D.) is not required in signing a money order for payment, whether such title is used on the face of the money order.
- e. A stamped signature is an acceptable endorsement on a money order drawn in favor of a firm, corporation, association, society, or individual, when the money order is presented to a bank for payment. A post office accepts a stamped signature only if an agreement is on file specifying the individual responsible for the correctness of such payments. [S020.2.4]

**14.3.5 More Than One Payee**

A money order completed by the purchaser to show more than one firm or person as payee is paid to either payee if the conjunction “or” is used to connect the payees. If no conjunction is used, or if the conjunction “and” is used to connect the payees, then all the listed payees must endorse the money order. [S020.2.5]

**14.3.6 Payment to Another Party**

Money orders may be paid to another party under these conditions:

- a. Only the payee of a money order may endorse it to any other person or firm. A person with power of attorney may cash money orders for a payee who gave the person that authority. A copy of the power of attorney must be filed at the office of payment. A payee may file a separate written order with the post office authorizing payment to another person. The person must be designated by name as the one to receive payment.
- b. When a payee (e.g., an individual or firm) makes an assignment and intends that money orders be paid to the assigned person, the payee must file a copy of a power of attorney or a written order with the USPS. The person who is designated to receive payment must sign the money order and write below the signature the capacity in which he or she acts.
- c. A money order may be paid to an executor or court-appointed administrator of the estate of the deceased person who was entitled to payment, provided that a copy of the appointment as executor or administrator is filed with the local postmaster. Such payments are made pursuant to the law of the state in which the deceased was a resident.
- d. Money orders are paid to the legal representative of a firm, association, or company that has ceased to exist. Appropriate documents proving legal representation must be provided to the USPS.
- e. Money orders are not issued or paid to a ward when declared incompetent by a court. They are paid only to the committee, guardian, or other duly authorized person responsible for the ward. Appropriate proof of authority must be provided to the USPS.
- f. A money order payable to a minor may be paid to the father or mother as natural guardian, unless prohibited by court order. Proof of parenthood may be required. [S020.2.6]

**14.3.7 Second Endorsement**

A money order with more than one endorsement is invalid, except under [14.3.5](#). [S020.2.7]

**14.3.8 COD Parcel**

No payment is made when a money order is issued in return for a COD parcel, and is presented by the addressee (purchaser), and the money order is not endorsed by the payee (shipper) or the payee has not authorized payment to the purchaser by written approval. [S020.2.8]

**14.3.9 Payment Inquiry**

A purchaser, payee, or endorsee may, at any time, inquire about payment of a domestic money order by completing, signing, and filing Form 6401 and paying the appropriate fee; a separate form and fee are required for each money order. The fee is not required if Form 6401 is filed by a bank, other financial institution, government agency that processes money orders directly with the Federal Reserve Bank, or postal official engaged in official USPS business. [S020.2.9]

**14.4 Federal Reserve System****14.4.1 General**

All money orders are forwarded through the Federal Reserve Banking System, to which commercial banks have access. For this standard:

- a. *Money order* means a U.S. Postal Money Order.
- b. *Federal Reserve Bank* means a Federal Reserve Bank or branch thereof that presents a money order for payment by the postmaster general.
- c. *Presenting bank* means a bank that presents a money order to and receives credit for the money order from a Federal Reserve Bank.
- d. *Reclamation* means the action taken by the postmaster general to obtain refund of the amounts of paid money orders.
- e. *Examination* includes examination of money orders for indicia of theft, forged endorsements, forged signatures or initials of issuing employees, raised amounts, and other material defects by electronic methods and visual inspection for defects that cannot be discovered electronically.
- f. *Stolen money order* means a U.S. Postal Money Order stolen from a post office, classified or contract station or branch, or USPS employee before it is officially issued by the post office, classified or contract station or branch, or by a USPS employee discharging his or her official duties. [S020.3.1]

**14.4.2 Payment**

The postmaster general has the usual right of a drawee to examine money orders presented for payment by banks through the Federal Reserve System and to refuse payment of money orders, and has a reasonable time after presentation to make each examination. Provisional credit is given to the Federal Reserve Bank when it furnishes the money orders for payment by the postmaster general. Money orders are deemed paid only after examination is completed, subject to the postmaster general's right to make reclamation under [14.4.4](#). [S020.3.2]

503.14.4.3

**14.4.3 Endorsement**

The presenting bank and the endorser of a money order presented for payment are deemed to guarantee to the postmaster general that all prior endorsements are genuine, whether an express guarantee to that effect is placed on the money order. When an endorsement is made by a person other than the payee personally, the presenting bank and the endorser are deemed to guarantee to the postmaster general, in addition to other warranties, that the person who so endorsed had capacity and authority to endorse the money order for the payee. [S020.3.3]

**14.4.4 Reclamation**

The postmaster general has the right to demand refund from the presenting bank of the amount of a paid money order if, after payment, the money order is found to be stolen, or to have a forged or unauthorized endorsement, or to contain any material defect or alteration not discovered on examination. Such right includes, but is not limited to, the right to make reclamation of the amount by which a genuine money order with a proper and authorized endorsement has been raised. Such right must be exercised within a reasonable time after the postmaster general discovers that the money order is stolen, bears a forged or unauthorized endorsement, or is otherwise defective. If refund is not made by the presenting bank within 60 days after demand, the postmaster general takes such actions as may be necessary to protect the interests of the United States. [S020.3.4]

# 507 Mailer Services

## Overview

- 1.0 Treatment of Mail
- 2.0 Forwarding
- 3.0 Address Correction Services
- 4.0 Recall of Mail
- 5.0 Pickup Service
- 6.0 Mailing List Services
- 7.0 Address Sequencing Services
- 8.0 Business Reply Mail (BRM)
- 9.0 Merchandise Return Service
- 10.0 Bulk Parcel Return Service

## 1.0 Treatment of Mail

### 1.1 Nondelivery of Mail

Mail can be undeliverable for these reasons:

- a. No postage.
- b. Incomplete, illegible, or incorrect address.
- c. Addressee not at address (unknown, moved, or deceased).
- d. Mail unclaimed.
- e. Mail refused by the addressee at time of delivery.
- f. Mail refused by the addressee after delivery when permitted.
- g. Minimum criteria for mailability not met. [F010.1.0]

### 1.2 USPS Address Adjustments

#### 1.2.1 Types of Adjustments

Mail can be undeliverable because of USPS adjustments such as the following:

- a. Renumbering of houses.
- b. Renaming of streets.
- c. Conversion from rural-style addresses (rural route and box number or highway contract route and box number) to city-style addresses (house number and street name).
- d. Realignment of rural or highway contract routes.
- e. Conversion from rural or highway contract service to city delivery service.
- f. Consolidation of routes.
- g. Consolidation of post offices or adjustment of delivery districts. [F010.2.1]

## 507.1.2.2

**1.2.2 Charges**

For 3 years after the date when the new address information appears in Address Information System (AIS) products, a mailer who regularly sends bulk mailings into an area affected by USPS adjustments is not charged for requested corrections to galley lists when such corrections relate to those adjustments. [F010.2.2]

**1.2.3 Disposal**

Mail that is undeliverable because of USPS adjustments is redirected and delivered to the destination without an additional postage charge as follows:

- a. For an adjustment under [1.2.1a](#) through [1.2.1c](#), for 1 year from the date when the new address appears in the AIS bimonthly products released in February, April, June, August, October, and December.
- b. For an adjustment under [1.2.1d](#) through [1.2.1g](#), for 1 year from the end of the month in which the adjustment occurs.
- c. For mail bearing the simplified address “Rural Route Box Customer,” “Highway Contract Route Box Customer,” or “Post Office Box Customer,” either for 90 days or until the next June 30, whichever is later. [F010.2.3]

**1.2.4 Records**

Records of address changes caused by USPS adjustments are kept by the local post office for 3 years. [F010.2.4]

**1.3 Directory Service**

USPS letter carrier offices give directory service to the types of mail listed below that have an insufficient address or cannot be delivered at the address given (the USPS does not compile a directory of any kind):

- a. Mail with extra services (certified, COD, registered, special handling).
- b. Foreign, except circulars. (Foreign mail received in quantities with letter-class postage but the general characteristics of circular mail is not given directory service.)
- c. Mail from overseas Armed Forces.
- d. Parcels mailed at any Package Services rate or endorsed by the mailer.
- e. Perishable matter.
- f. Official USPS mail.
- g. Express Mail Next Day Service (Post Office to Addressee only). [F010.3.0]

**1.4 Basic Treatment****1.4.1 General**

Mail that is undeliverable as addressed is forwarded, returned to the sender, or treated as dead mail, as authorized for the particular class of mail. Undeliverable-as-addressed mail is endorsed by the USPS with the reason for nondelivery as shown in [Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed](#). All nonmailable pieces are returned to the sender. [F010.4.1]

**Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed**

| <b>ENDORSEMENT</b>  | <b>REASON FOR NONDELIVERY</b>   |
|---|---|
| Attempted—Not Known   | Delivery attempted, addressee not known at place of address.  |
| Box Closed—No Order*  | Post office box closed for nonpayment of rent.  |
| Deceased  | Used only when known that addressee is deceased and mail is not properly deliverable to another person. This endorsement must be made personally by delivery employee and under no circumstance may it be rubber-stamped. Mail addressed in care of another is marked to show which person is deceased. |
| Delivery Suspended to Commercial Mail Receiving Agency  | Failure to comply with <a href="#">508.1.8.1</a> through <a href="#">508.1.8.3</a> .  |
| Illegible*  | Address not readable.   |
| In Dispute*   | Mail returned to sender by order of chief field counsel (or under <a href="#">508.1.0</a> and <a href="#">508.2.0</a> ) because of dispute about right to delivery of mail and cannot be determined which disputing party has better right to mail.   |
| Insufficient Address*   | Mail without number, street, box number, route number, or geographical section of city or city and state omitted and correct address not known.   |
| Moved, Left No Address  | Addressee moved and filed no change-of-address order.   |
| No Mail Receptacle*   | Addressee failed to provide a receptacle for receipt of mail.   |
| No Such Number*   | Addressed to nonexistent number and correct number not known.   |
| No Such Office in State*  | Addressed to nonexistent post office.   |
| No Such Street*   | Addressed to nonexistent street and correct street not known.   |
| Not Deliverable as Addressed—Unable to Forward  | Mail undeliverable at address given; no change-of-address order on file; forwarding order expired.  |
| Outside Delivery Limits*  | Addressed to location outside delivery limits of post office of address. Hold mail for out-of-bounds customers in general delivery for specified period unless addressee filed order.   |
| Refused*  | Addressee refused to accept mail or pay postage charges on it.  |
| Returned for Better Address*  | Mail of local origin incompletely addressed for distribution or delivery.   |
| Returned for Postage  | Mail without postage or indication that postage fell off.   |
| Returned to Sender Due to Addressee's Violation of Postal False Representation and Lottery Law* | Mail returned to sender under false representation order and lottery order.   |
| Returned to Sender Due to Addressee's Violation of Postal False Representation Law*             | Mail returned to sender under false representation order.   |
| Returned to Sender Due to Addressee's Violation of Postal Lottery Law*                          | Mail returned to sender under lottery order   |
| Temporarily Away*   | Addressee temporarily away and period for holding mail expired.   |
| Unclaimed*  | Addressee abandoned or failed to call for mail.   |
| Undeliverable as Addressed, Missing PMB or # Sign   | Failure to comply with <a href="#">508.1.8.2e</a> .   |
| Vacant*   | House, apartment, office, or building not occupied. (Use only if mail addressed "Occupant.")  |

\* Alternative addressing formats may not be used on the following: Express Mail pieces; mail with any special service; mail sent with any ancillary service endorsement; mail sent to any overseas military post office. When an alternative addressing format is used on Periodicals pieces, the publisher is notified of nondelivery only for those reasons marked with an asterisk (\*).

[Exhibit F010.4.1]

507.1.4.2

**1.4.2 Official Mail**

Official mail is treated the same as mail for the general public. All fees and services must be paid or collected on delivery of mail or address correction notices.

[F010.4.2]

**1.4.3 Mailer Endorsement**

A mailer endorsement is used to request forwarding, return, or address correction service. This endorsement (and other marking) must be prepared under [102](#), [202](#), [302](#), or [402](#). The endorsements authorized for each class of mail and the required wording are listed in the charts according to class of mail. [F010.4.3]

**1.4.4 Order**

The information in the charts in this unit is associated with a customer's change-of-address order. Information on temporary changes of address is not provided.

[F010.4.4]

**1.4.5 Extra Services**

Mail with extra services is treated according to the charts for each class of mail in [1.5](#), except that:

- a. Undeliverable-as-addressed Certified Mail is treated as First-Class Mail.
- b. All insured First-Class Mail is forwarded and returned at no additional cost. All insured Standard Mail and Package Services is forwarded or returned.
- c. Parcels with special handling that are undeliverable as originally addressed and forwarded to the addressee continue to receive special handling service without an additional special handling fee.
- d. Undeliverable-as-addressed return receipt for merchandise mail receives the treatment appropriate for the class of mail of the host piece.
- e. All Registered Mail items are treated as registered while they are being forwarded or returned. [F010.4.5]

**1.4.6 Metered Pieces**

Mail paid by postage meter that does not have a delivery address and a return address is returned to the post office of mailing. The reason for nondelivery is attached but the address correction fee is not charged. The piece is returned to the meter licensee upon payment of the applicable return postage. [F010.4.6]

**1.4.7 Mailgrams**

Undeliverable-as-addressed Mailgrams are treated as First-Class Mail. [F010.4.7]

## 1.5 Treatment for Ancillary Services by Class of Mail

### 1.5.1 First-Class Mail and Priority Mail

Undeliverable-as-addressed (UAA) First-Class Mail (including stamped cards and postcards) and Priority Mail are treated as described in [Exhibit 1.5.1](#), with these additional conditions:

- a. First-Class Mail and Priority Mail cards and unregistered letters that do not appear to contain merchandise and do not bear “Return Service Requested” or “Change Service Requested” (Option 1 only) may be forwarded to international addresses.
- b. Alternative addressing formats under [602.3.0](#) may not be used on mail with any ancillary service endorsement or mail with any extra service. Forwarding service is not provided for such mail. Undeliverable First-Class Mail with any alternative addressing format is returned with the reason for nondelivery attached only if the address is incorrect or incomplete or the mail is undeliverable for another reason as shown in [Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed](#).
- c. The Priority Mail portion of a Priority Mail drop shipment receives the forwarding, return, and address correction services described in [Exhibit 1.5.1](#). The mail enclosed within the drop shipment receives the services appropriate for its class.
- d. First-Class Mail or Priority Mail bearing Standard Mail markings and endorsements permitted by [202](#) for letters, [302](#) for flats, and [402](#) for parcels and [244.5.1](#) for letters, [344.5.1](#) for flats, and [444.4.1](#) for parcels receives forwarding, return, and address correction services for Standard Mail under [1.5.3](#).
- e. “Change Service Requested” is not permitted for the following:
  1. Priority Mail, other than Priority Mail containing perishable matter under [601.9.0](#) (except for live animals).
  2. First-Class Mail or Priority Mail containing hazardous materials under [601.10.0](#).
  3. First-Class Mail or Priority Mail with an extra service other than Delivery Confirmation or Signature Confirmation.
- f. Address Change Service (ACS) as described in [3.0](#) is available for First-Class Mail and Priority Mail displaying the appropriate ACS participant code for an authorized ACS participant in conjunction with a permitted ancillary service endorsement. The only endorsements permitted for use on valid First-Class Mail and Priority Mail ACS pieces are “Address Service Requested” and “Change Service Requested” subject to the following:
  1. “Address Service Requested” (Option 1) is valid for use on all mailpieces, including ACS participating pieces. “Address Service Requested” (Option 2) is valid for use only on ACS participating pieces.
  2. “Change Service Requested” (Options 1 and 2) are valid for use only on ACS participating pieces.

507.1.5.1

3. The words "Option 1" or "Option 2" must not be part of the "Address Service Requested" or "Change Service Requested" endorsement on mailpieces.
4. Participating ACS mailers are limited to selecting only one of the two options available for "Address Service Requested" and one of the two options available for "Change Service Requested." The option(s) selected along with the mailer's ACS participant code will be programmed at the CFS unit to facilitate processing of valid ACS pieces within the conditions that apply to ACS. [F010.5.1]

|   | <p><i>RESTRICTIONS (FOR OPTIONS 1 AND 2)</i> The following restrictions apply:</p> <p>(1) This endorsement is limited to use on valid mailpieces bearing a proper ACS participant code and only for: (a) Priority Mail containing perishable matter (other than live animals) and the marking "Perishable" and; (b) First-Class Mail (excluding hazardous materials).</p> <p>(2) Delivery Confirmation and Signature Confirmation are the only extra services permitted with this endorsement.</p>   |
| <b>"Temp—Return Service Requested"</b>  | <p><b>If no change-of-address order on file:</b><br/>                     Piece returned with reason for nondelivery attached (no charge).<br/> <b>If permanent change-of-address order on file:</b><br/>                     Piece returned with new address or reason for nondelivery attached (in either case, no charge).<br/> <b>If temporary change-of-address order on file:</b><br/>                     Piece forwarded to temporary address (no charge); no separate notice of temporary address provided.</p>   |

1. Valid for all pieces, including Address Change Service (ACS) participating pieces subject to 507.3.0.  
 2. Valid only for ACS participating pieces subject to 507.3.0 other than pieces containing hazardous materials.

## 507.1.5.2

**1.5.2 Periodicals**

Undeliverable-as-addressed (UAA) Periodicals publications (including publications pending Periodicals authorization) are treated as described in [Exhibit 1.5.2](#), with these additional conditions:

- a. Periodicals matter is forwarded only to domestic addresses.
- b. Publications with an alternative addressing format under [602.3.0](#) are delivered to the address when possible. Forwarding service is not provided for such mail. Periodicals publishers are notified only when mailpieces with the occupant or exceptional address formats are undeliverable for solely address-related reasons.
- c. When a change of address is filed, copies of Periodicals publications bearing the old address are forwarded to the new address even if the copies show the sender's request for return.
- d. Address correction service is mandatory for all Periodicals publications, and the address correction service fee must be paid for each notice issued.
- e. Address correction service (including Address Change Service (ACS)) is provided for the first issue after 60 days for all publications, unless copies are to be returned at the publisher's request. ACS participants may receive the change notice before day 60, if so requested. Copies received after the address correction notice is mailed are disposed of by the USPS. When copies of the publication cannot be forwarded, the address correction notice is prepared for the first undeliverable issue of the publication received. Forms 3579 are mailed to publishers at least once a week.
- f. The publisher may request the return of copies of undelivered Periodicals by printing the endorsement "Address Service Requested" on the envelopes or wrappers, or on one of the outside covers of unwrapped copies, immediately preceded by the sender's name, address, and ZIP+4 or 5-digit ZIP Code. This endorsement obligates the publisher to pay return postage. Each returned piece is charged the single-piece First-Class Mail or Priority Mail rate applicable for the weight of the piece, plus the nonmachinable surcharge if it applies (see [201](#), [301](#), or [401](#)). When the address correction is provided incidental to the return of the piece, there is no charge for the correction.
- g. A publisher of Periodicals publications may request a refund of the fees paid for duplicate address correction notices on Forms 3579 provided by the USPS if the customer submitted a change-of-address order and the first and duplicate notices are provided on magnetic tape by ACS or on printed copy by a Computerized Forwarding System (CFS) unit. The refund request must be supported by documentation showing the number of duplicate notices received. The USPS does not process refunds for duplicate notices if:
  1. The customer did not submit a change-of-address order.
  2. The original and duplicate notices are not provided both by ACS or both by CFS.
  3. The publisher does not submit documentation to support the refund amount. [F010.5.2]

**Exhibit 1.5.2 Treatment of Undeliverable Periodicals**

1. Valid for all pieces, including Address Change Service (ACS) participating pieces.

[Exhibit F010.5.2]

**1.5.3 Standard Mail**

Undeliverable-as-addressed (UAA) Standard Mail is treated as described in [Exhibit 1.5.3a](#) and [Exhibit 1.5.3k](#), with these additional conditions:

- a. Standard Mail is forwarded only to domestic addresses.

**Exhibit 1.5.3a Treatment of Undeliverable Standard Mail**

| <b>MAILER ENDORSEMENT</b>                         | <b>USPS TREATMENT OF UAA PIECES</b>   |
|---|---|
| <b>No endorsement</b> <sup>1</sup>                | <p><b>In all cases:</b><br/>Piece disposed of by USPS.</p> <p><i>RESTRICTIONS:</i><br/>Standard Mail containing hazardous materials must bear a permissible endorsement (see <a href="#">507.1.5.3e</a>).</p>   |
| <b>“Address Service Requested”</b> <sup>2</sup>   | <p><b>If no change-of-address order on file:</b><br/>Piece returned with reason for nondelivery attached (only weighted fee charged).</p> <p><b>If change-of-address order on file:</b></p> <ul style="list-style-type: none"> <li>• <i>Months 1 through 12:</i> Piece forwarded (no charge); separate notice of new address provided (address correction fee charged).</li> <li>• <i>Months 13 through 18:</i> Piece returned with new address attached (only weighted fee charged).</li> <li>• <i>After month 18:</i> Piece returned with reason for nondelivery attached (only weighted fee charged).</li> </ul> |
| <b>“Forwarding Service Requested”</b>             | <p><b>If no change-of-address order on file:</b><br/>Piece returned with reason for nondelivery attached (only weighted fee charged).</p> <p><b>If change-of-address order on file:</b></p> <ul style="list-style-type: none"> <li>• <i>Months 1 through 12:</i> Piece forwarded (no charge).</li> <li>• <i>Months 13 through 18:</i> Piece returned with new address attached (only weighted fee charged).</li> <li>• <i>After month 18:</i> Piece returned with reason for nondelivery attached (only weighted fee charged).</li> </ul>   |
| <b>“Return Service Requested”</b>                 | <p><b>In all cases:</b><br/>Piece returned with new address or reason for nondelivery attached (in either case, only return postage charged at First-Class Mail single-piece rate or Priority Mail single-piece rate, as appropriate for weight of piece).</p>  |
| <b>“Change Service Requested”</b> <sup>1, 3</sup> | <p><b>In all cases:</b><br/>Separate notice of new address or reason for nondelivery provided (in either case, address correction fee charged); piece disposed of by USPS.</p> <p><i>RESTRICTIONS:</i><br/>The following restrictions apply:<br/>(1) Delivery Confirmation is the only extra service permitted with this endorsement.<br/>(2) This endorsement is not permitted for Standard Mail containing hazardous materials.</p>   |

1. Not valid for pieces containing hazardous materials.

2. Valid for all pieces, including Address Change Service (ACS) participating pieces.

3. Not valid for pieces containing hazardous materials. Valid for all other pieces, including ACS participating pieces.

[F010.5.3a]

- b. The exceptional address format under [602.3.0](#) may not be used on mail with any ancillary service endorsement or mail with any extra service. Forwarding service and address correction service are not provided for undeliverable Standard Mail with this address format.
- c. The endorsement “Change Service Requested” is not permitted for Standard Mail containing hazardous materials under [601.10.0](#). Standard Mail containing hazardous materials must bear the endorsement “Address Service Requested,” “Forwarding Service Requested,” or “Return Service Requested.”
- d. Standard Mail can be forwarded or returned at the appropriate Media Mail or Library Mail rate if the content of the mail qualifies as Media Mail under [173](#), [Rates and Eligibility, 373](#), or [473](#) or Library Mail under [183](#), [383](#), or [483](#) and the mail is marked “Media Mail” or “Library Mail” directly below the ancillary service endorsement.
- e. Mail that can qualify for Shipper Paid Forwarding under the applicable standards in [2.3.5](#) is forwarded or returned at the First-Class Mail single-piece rate or Priority Mail single-piece rate applicable for the weight of the piece.
- f. If a Standard Mail piece and any attachment to that piece are not opened by the addressee and the sender has guaranteed forwarding and return postage, the addressee may refuse delivery of the piece and have it returned to the sender without affixing postage. If a Standard Mail piece or any attachment to that piece is opened by the addressee, the addressee must affix the required postage to return the piece to the sender.
- g. Standard Mail with insurance or return receipt for merchandise must be endorsed “Address Service Requested,” “Forwarding Service Requested,” or “Return Service Requested.” Standard Mail with Delivery Confirmation must be endorsed “Address Service Requested,” “Forwarding Service Requested,” “Return Service Requested,” or “Change Service Requested.”
- h. When a large volume of identical-weight pieces originates from a single mailer and is endorsed “Return Service Requested,” the USPS may weigh a sample of at least 25 pieces and divide that weight by the number of pieces to determine the weight of a single piece. After the per piece weight is determined, all the pieces are weighed in bulk and divided by the per piece weight to determine the total number of pieces. The return postage is calculated using these numbers. Pieces of identical weight counted in this manner are returned to the sender with the new address or the reason for nondelivery endorsed on the piece.
- i. A weighted fee is charged when an unforwardable or undeliverable piece is returned to the sender and the piece is endorsed “Address Service Requested” or “Forwarding Service Requested.” The weighted fee is the First-Class Mail or Priority Mail single-piece rate and, if applicable, the nonmachinable surcharge (see [123.1.0](#) or [133.1.0](#)), multiplied by 2.472 and rounded up to the next whole cent (if the computation yields a fraction of a cent). The weighted fee is computed (and rounded if necessary) for each piece individually. Using “Address Service Requested” or “Forwarding Service Requested” obligates the sender to pay the weighted fee on all returned pieces.

507.1.5.4

- j. Returned pieces endorsed “Return Service Requested” are charged the First-Class Mail single-piece rate or Priority Mail single-piece rate and, if applicable, the nonmachinable surcharge (see [123.1.0](#) or [133.1.0](#)).
- k. Mail sent as Bulk Parcel Return Service (BPRS) under [10.0](#) is returned at the BPRS per piece fee if one of the endorsements includes “— BPRS” as shown in [Exhibit 1.5.3k](#).

**Exhibit 1.5.3k Treatment of Undeliverable BPRS Standard Mail**

| MAILER ENDORSEMENT                | USPS TREATMENT OF UAA PIECES  |
|-----------------------------------|---|
| “Return Service Requested— BPRS”  | <p><b>In all cases:</b><br/>                     Piece returned with new address or reason for nondelivery attached (in either case, only Bulk Parcel Return Service fee charged).</p>  |
| “Address Service Requested— BPRS” | <p><b>If no change-of-address order on file:</b><br/>                     Piece returned with reason for nondelivery attached (only Bulk Parcel Return Service fee charged).</p> <p><b>If change-of-address order on file:</b></p> <ul style="list-style-type: none"> <li>• <i>Months 1 through 12:</i> piece forwarded (no charge to addressee); separate ACS notice of new address provided (ACS address correction fee and forwarding postage charged at First-Class Mail single-piece rate or Priority Mail single-piece rate, as appropriate for weight of piece, via ACS participant code).</li> <li>• <i>Months 13 through 18:</i> piece returned with new address attached (only Bulk Parcel Return Service fee charged).</li> <li>• <i>After month 18:</i> piece returned with reason for nondelivery attached (only Bulk Parcel Return Service fee charged).</li> </ul> |

[F010.5.3b]

- l. Customized MarketMail under [705.1.0](#) is not eligible to use ancillary service endorsements. [F010.5.3]

**1.5.4 Package Services**

Undeliverable-as-addressed (UAA) Package Services mail is treated as described in [Exhibit 1.5.4](#), with these additional conditions:

- a. Package Services mail is forwarded only to domestic addresses.
- b. The exceptional address format under [602.3.0](#) may not be used on mail with any ancillary service endorsement or mail with any extra service. Forwarding service is not provided for such mail. Undeliverable Parcel Post, Media Mail, and Library Mail with this address format are returned with the reason for nondelivery attached only if the address is incorrect or incomplete or the mail is undeliverable for another reason as shown in [Exhibit 1.4.1 USPS Endorsements for Mail Undeliverable as Addressed](#). Undeliverable Bound Printed Matter with this address format is disposed of by the USPS.
- c. The endorsement “Change Service Requested” is not permitted for Package Services mail containing hazardous materials under [601.10.0](#).
- d. If a Package Services piece and any attachment to that piece are not opened by the addressee and the sender has guaranteed forwarding and return postage, the addressee may refuse delivery of the piece and have it returned to the sender without affixing postage and still have other Package Services pieces forwarded to the addressee. If a Package Services piece or any attachment to that piece is opened by the addressee, the addressee must affix

the required postage to return the piece to the sender. If the addressee does not want to pay forwarding postage for all Package Services mail, the postmaster of the new address must use Form 3546 to notify the postmaster of the old address to discontinue the forwarding of Package Services mail.

- e. Package Services mail bearing a postage meter indicia from a customer meter that is unaddressed and without a return address (undeliverable) is returned to the post office of mailing. The reason for nondelivery is attached without charging the address correction fee. The piece is returned to the meter licensee on payment of the return postage.
- f. Bound Printed Matter with no ancillary service endorsement and:
  - 1. With Delivery Confirmation, with Signature Confirmation, or with no other extra service, is disposed of by USPS.
  - 2. With an extra service other than Delivery Confirmation or Signature Confirmation is treated as though endorsed "Forwarding Service Requested." [F010.5.4]

**Exhibit 1.5.4 Treatment of Undeliverable Package Services Mail**

2. Not valid for pieces containing hazardous materials. Valid for all other pieces, including ACS participating pieces.

[Exhibit F010.5.4]

**1.5.5 Express Mail**

Undeliverable-as-addressed (UAA) Express Mail is treated as described in [Exhibit 1.5.5](#), with these additional conditions:

- a. Express Mail is forwarded only to domestic addresses.
- b. Directory service is provided for Express Mail that cannot be delivered because of an incorrect or incomplete address.
- c. The Express Mail portion of an Express Mail drop shipment receives the forwarding, return, and address correction services described in [Exhibit 1.5.5](#). The mail enclosed within the drop shipment receives the services appropriate for its class.
- d. Undeliverable or unclaimed Express Mail is held by the USPS for 5 workdays before it is returned to the sender at no additional postage, unless either of the following applies:
  1. The mail is refused before the end of the 5 workdays.
  2. The mail is not refused and the sender has specified in the return address a longer holding period (not to exceed 30 days). The sender may also place an instruction above the return address, subject to [202.4.0](#), [302.3.0](#), or [402.3.0](#), directing the return of undeliverable mail after fewer than 5 workdays. [F010.5.5]

[Exhibit F010.5.5]

## 1.6 Attachments and Enclosures

### 1.6.1 Periodicals

Undeliverable Periodicals (including publications pending Periodicals authorization) with a nonincidental First-Class Mail attachment or enclosure are returned at the single-piece First-Class Mail or Priority Mail rate applicable for the weight of the piece, plus the nonmachinable surcharge if it applies. The weight of the attachment

## 507.1.6.2

or enclosure is not included when computing the charges for return of the mailpiece. Undeliverable Periodicals (including publications pending Periodicals authorization) with an incidental First-Class Mail attachment or enclosure are treated as dead mail unless endorsed "Address Service Requested." [F010.6.1]

**1.6.2 Standard Mail**

Undeliverable, unendorsed Standard Mail with a nonincidental First-Class Mail attachment or enclosure is returned at the single-piece First-Class Mail or Priority Mail rate applicable for the weight of the piece, plus the nonmachinable surcharge if it applies. The weight of the First-Class Mail attachment or enclosure is not included when computing the charges for return of the mailpiece. Undeliverable, unendorsed Standard Mail with an incidental First-Class Mail attachment or enclosure is treated as dead mail. [F010.6.2]

**1.6.3 Package Services**

Undeliverable, unendorsed Package Services with a nonincidental First-Class Mail attachment or enclosure is either forwarded or returned at the single-piece Package Services rate. The weight of the First-Class attachment or enclosure is not included when computing the charges for return of the mailpiece. Undeliverable, unendorsed Package Services with incidental First-Class attachments or enclosures is returned at the single-piece Package Services rate. [F010.6.3]

**1.7 Mixed Classes****1.7.1 Combination With First-Class**

Combination mailings of First-Class Mail with Standard Mail or Package Services are provided the forwarding and return service of Standard Mail, as appropriate:

- a. An undeliverable combination mailpiece, including a piece that cannot be forwarded, one part of which is First-Class Mail (other than an incidental First-Class attachment or enclosure), must be returned to the sender, subject to the charge for return according to its class. The weight of the First-Class piece is not included when computing the charge for return of the Periodicals, Standard Mail, or Package Services part.
- b. Items with incidental First-Class enclosures or attachments are returned according to the class of the host piece.
- c. An undeliverable combination mailpiece *that is not returnable to the sender*, of which one part is First-Class Mail, is given the treatment that applies to the class of the other part. [F010.7.1]

**1.7.2 Other Combinations**

Pieces of Periodicals, Standard Mail, or Package Services with other classes of mail attached or enclosed (other than incidental First-Class attachments or enclosures) must be forwarded as specified for the host piece by the applicable standards. Neither the enclosures nor the host piece are provided the forwarding service of First-Class Mail. [F010.7.2]

**1.7.3 Host Piece**

Any undeliverable combination mailpiece that does not include First-Class matter is given the treatment applicable to the host piece. [F010.7.3]

**1.7.4 Parcel**

A combination parcel containing Media Mail and Bound Printed Matter is charged postage at the Parcel Post Inter-BMC rate when forwarded or returned. [F010.7.4]

**1.8 Returning Mail**

**1.8.1 Nonmailable**

Nonmailable matter is returned to the sender immediately. [F030.5.1]

**1.8.2 Refused Mail**

Returnable mail is returned if refused by the addressee. [F030.5.2]

**1.8.3 Express Mail, Priority Mail, First-Class Mail**

Mailpieces sent as Express Mail, Priority Mail, or First-Class Mail that cannot be delivered as addressed or forwarded to a new address, unless otherwise requested by the sender, are returned when possible to the sender at no additional charge. Excluding pieces containing live animals, the following are disposed of by the USPS:

- a. Priority Mail bearing the appropriate Address Change Service (ACS) participant code and marked "Perishable" and endorsed "Change Service Requested."
- b. First-Class Mail bearing the appropriate ACS participant code and endorsed "Change Service Requested." [F030.5.3]

**1.8.4 Other Classes**

Other returnable mail is treated as appropriate for the class of mail and the sender's instructions except as noted below. [F030.5.4]

**1.8.5 Extra Services**

If a return receipt is attached to a certified, collect on delivery (COD), numbered insured, registered, return receipt for merchandise, or Express Mail piece to be returned, the reason for nondelivery is shown on the face of the piece. The receipt stays attached to the piece and is returned to the sender. Registered Mail is returned through the registry system. The sender must sign a delivery receipt for returned Express Mail and for certified, COD, numbered insured, registered, and return receipt for merchandise mail. [F030.5.5]

**1.8.6 No Sender Instructions**

Mail without a specific address or instructions from the sender is held:

- a. For 5 days if for delivery by rural or highway contract route carrier.
- b. For 10 days if for general delivery at an office with city carrier service. If the addressee notifies the postmaster of a delay in claiming the mail, the postmaster may hold such mail up to 30 days.
- c. For 15 days if for general delivery at an office without city carrier service. [F030.5.6]

**1.8.7 Post Office Box**

Deliverable mail addressed to a post office box is not returned until after the box is declared vacant, except for certified, collect on delivery (COD), insured, registered, postage due, and perishable mail. [F030.5.7]

507.1.8.8

**1.8.8 Franked Mail**

Unclaimed franked mail from a Member of Congress is returned to the origin post office (if known) or the Washington, DC, Post Office. [F030.5.8]

**1.9 Dead Mail****1.9.1 Basic Information**

Dead mail is matter deposited in the mail that is or becomes undeliverable and cannot be returned to the sender from the last office of address. Every reasonable effort is made to match articles found loose in the mail with the envelope or wrapper from which lost and to return or forward the articles.

- a. Nonmail matter (e.g., wallets and bank deposits) found in collection boxes or at other points within USPS jurisdiction is returned postage due at the single-piece First-Class Mail or Priority Mail rate for keys and identification devices that is applicable based on the weight of the matter.
- b. Undeliverable, unendorsed Standard Mail, printed matter, circulars, newspapers, magazines, and other publications, and unidentified articles that have no value are disposed of as waste.
- c. Undeliverable articles of \$10 or more in value are treated as dead mail.
- d. Dead letters are opened at mail recovery centers to determine the name and address of the addressee or sender to permit delivery or return.
- e. Except for unendorsed Standard Mail, all undeliverable Standard Mail and Package Services, and insured First-Class Mail containing Standard Mail or Package Services enclosures, that cannot be returned because of an incorrect, incomplete, illegible, or missing return address is opened and examined to identify the sender or addressee.
- f. Dead parcels are opened at mail recovery centers to determine name and address of the addressee or sender to permit delivery or return. Dead parcels returned to the sender or delivered to the addressee are rated postage due at the zone rate from the dead parcel branch. If parcels are endorsed to show that they are USPS property, or that the sender refused to pay postage due on return as undelivered, the parcels are considered USPS property. [F010.8.1]

**1.9.2 Books and Sound Recordings**

Books and sound recordings are disposed of by the USPS under 1.9.1 and 1.9.3, unless the publisher or distributor requests that books and sound recordings bearing specific trade names, company names, or other organizational identifications be released to the requester or its representative. The requester must submit a written application to the Manager, Policy and Program Development, Office of the Consumer Advocate, USPS Headquarters. The application must state that the requester is the publisher or distributor of the books and sound recordings listed. The request may specify only one location where the books and sound recordings are to be picked up. If the request is approved, instructions and conditions for release are established. The approval stays in effect for 5 years or until canceled in writing by the requester or the USPS. [F010.8.2]

**1.9.3 USPS Policy and Procedures**

The *Postal Operations Manual* contains USPS policy and procedures for handling and disposing of dead mail (including through sale at auction or by donation to institutions). [F010.8.3]

**2.0 Forwarding**

**2.1 Change-of-Address Order**

**2.1.1 Normal Time Limit**

Records of permanent change-of-address orders are kept by city delivery post offices for 18 months, for forwarding and for address correction purposes, from the end of the month when the change takes effect. A record of change-of-address orders from general delivery to a permanent local address without time limit is kept 6 months. A record of change-of-address orders to other than a permanent local address is kept 30 days. [F020.1.1]

**2.1.2 Time Limit Extension**

When a customer notifies the post office of a permanent change in mailing address or the USPS changes a customer's mailing address, the postmaster may extend the forwarding period for 1 additional year if mail is regularly received addressed to the old address. To qualify for this extension, the customer must show that a financial hardship will ensue if extended forwarding is not granted. The customer must also show that reasonable effort is being made to notify correspondents of the new address. [F020.1.2]

**2.1.3 Temporary Forwarding**

A customer temporarily moving away may have mail forwarded for a specific time, but not to exceed 12 months. The customer must show beginning and ending dates in the change-of-address order. [F020.1.3]

**2.1.4 Individual at Business Address**

A customer may inform the post office of a change of address by using Form 3575 or other written or personal notice. A change of address may not be filed with the USPS for an individual's mail addressed to an organization, or to the individual at his or her place of employment, business, or other affiliation either during or after the termination of the employment, business, or other relationship. The organization may change the address (but not the name) on mail to redirect it to such individuals; obliteration of any barcode on the piece prevents missorting on automated equipment. [F020.1.4]

**2.2 Forwardable Mail**

**2.2.1 Classes**

Forwarding is available for all classes of mail, subject to the corresponding conditions described in 1.0. [F020.2.1]

**2.2.2 Reforwarding**

The address (but not the name) may be changed and the mail reforwarded as many times as necessary to reach the addressee. [F020.2.2]

## 507.2.2.3

**2.2.3 Discontinued Post Office**

All Express Mail, First-Class Mail, Periodicals, and Package Services addressed to a discontinued post office may be forwarded without added charge to a post office that the addressee designates as more convenient than the office to which the USPS ordered the mail sent. [F020.2.3]

**2.2.4 Rural Delivery**

When rural delivery service is established or changed, a customer of any office receiving mail from the rural carrier of another office may have all Express Mail, First-Class Mail, Periodicals, and Package Services forwarded to the latter office for delivery by the rural carrier without added charge, if the customer files a written request with the postmaster at the former office. [F020.2.4]

**2.2.5 Converted Service**

Mail addressed to post office, rural, or highway contract route boxholders is delivered to customers residing in the affected area until June 30 following establishment of, or conversion to, city delivery service or for 90 days, whichever is later. [F020.2.5]

**2.2.6 Mail for Military Personnel**

All Express Mail, First-Class Mail, Periodicals, and Package Services addressed to persons in the U.S. Armed Forces (including civilian employees) serving where U.S. mail service operates is forwarded at no added charge when the change of address is caused by official orders. This free forwarding also applies to mail for household members whose change of address is caused by official orders to persons serving in or who are civilian employees of the U.S. Armed Forces. If the official permanent change of station order is to an overseas APO/FPO address, military authorities forward mail between the United States and those addresses; forwarding is limited to 60 days. [F020.2.6]

**2.2.7 Mail Addressed to CMRA Customers**

Mail addressed to an addressee at a commercial mail receiving agency (CMRA) is not forwarded through the USPS. The CMRA customer may make special arrangements for the CMRA operator to remail the mail with payment of new postage. A CMRA must accept and remail mail to former customers for at least 6 months after termination of the agency relationship. After the 6-month period, the CMRA may refuse mail addressed to a former customer. [F020.2.7]

**2.3 Postage for Forwarding****2.3.1 Origin**

Forwarding postage is computed by using the forwarding office as the origin office. [F020.3.1]

**2.3.2 Express Mail**

Express Mail is forwarded without charge. [F020.3.2]

**2.3.3 First-Class Mail**

First-Class Mail (including postcards and stamped cards) and Priority Mail are forwarded without charge when postage is fully prepaid by the sender. [F020.3.3]

**2.3.4 Periodicals**

Periodicals publications (including publications pending Periodicals authorization) are forwarded without charge for 60 days when postage is fully prepaid by the sender. [F020.3.4]

**2.3.5 Standard Mail**

Generally, Standard Mail is subject to collection of additional postage from the mailer when forwarding service is provided by charging the Standard Mail weighted fee on all returns. Shipper Paid Forwarding, used in conjunction with Address Change Service (3.0), provides mailers of Standard Mail machinable parcels an option of paying forwarding postage at the single-piece First-Class or Priority Mail rate as applicable for the weight of the piece. Mail that qualifies for Bulk Parcel Return Service (BPRS) is returned at the BPRS per piece charge if the mailer uses one of the ancillary service endorsements that specifies BPRS (e.g., “Return Service Requested—BPRS”). [F020.3.5]

**2.3.6 Package Services**

Package Services is subject to the collection of additional postage at the applicable rate for nonlocal forwarding. Unless endorsed “Change Service Requested,” all Package Services is delivered as directed without additional postage charge when the old and new addresses are served by the same post office. The addressee may refuse any piece of Package Services that has been forwarded. This refusal does not revoke the right to have other Package Services forwarded. If the addressee does not want to pay forwarding postage for all Package Services, the addressee must ask the postmaster of the new address to use Form 3546 to notify the postmaster of the old address to discontinue the forwarding of Package Services. [F020.3.6]

**2.3.7 Extra Services**

Certified, collect on delivery (COD), Delivery Confirmation, insured, registered, Signature Confirmation, and special handling mail is forwarded without additional extra service fees, subject to the applicable postage charge (to a domestic address only). [F020.3.7]

**3.0 Address Correction Services**

**3.1 Address Correction Service**

**3.1.1 Address Correction Service Fee**

For all classes of mail:

- a. Manual notice, each: \$0.70.
- b. Electronic notice, each: \$0.20. [R900.1.0]

**3.1.2 Purpose**

If mail cannot be delivered as addressed, address correction service allows the sender on request, using the appropriate ancillary service endorsement under 1.0, to obtain the addressee’s new (forwarding) address (if the addressee filed a change-of-address order with the USPS) or the reason for nondelivery. Address corrections

## 507.3.1.3

and notices are not provided for customers who file a temporary change of address or for individuals at a business address (see 2.1). Address correction service is available alone or in combination with forwarding and return service. [F030.1.1]

**3.1.3 Invalid Endorsement**

Any obsolete ancillary service endorsement or similar sender endorsement not shown in 1.0 is considered invalid. Material bearing invalid or conflicting ancillary service endorsements will not be accepted for mailing. If discovered in the mailstream, pieces bearing an invalid ancillary service endorsement or conflicting endorsements are treated as unendorsed mail. *Exception:* Undeliverable Parcel Post, Media Mail, and Library Mail pieces that bear invalid or conflicting ancillary service endorsements are treated as if endorsed "Forwarding Service Requested." [F030.1.2]

**3.1.4 Periodicals**

Address correction service is provided automatically for all Periodicals publications (including publications pending Periodicals authorization) and begins 60 days after the effective date of the addressee's change of address. Address corrections are provided as separate notices or, at the mailer's request, on the returned pieces. [F030.1.3]

**3.1.5 Other Classes**

When possible, "on-piece" address correction is provided for First-Class Mail, Express Mail, Priority Mail, Standard Mail, and Package Services. If the piece cannot be forwarded, it is returned with the address information or reason for nondelivery attached. Generally, when separate corrections are necessary, Form 3547 is returned to the sender with the address correction fee charged and the mail is forwarded. This service is not available for Express Mail, First-Class Mail, or Standard Mail addressed for delivery to the addressee by military personnel at any military installation, including APOs and FPOs. [F030.1.4]

**3.1.6 Fee and Return Postage**

Unless excepted, the applicable fee for address correction service is charged for each separate notification of address correction or the reason for nondelivery. When "on-piece" address correction is provided, no address correction fee is charged but return postage can be charged, depending on mail class. [F030.1.5]

**3.2 Address Change Service (ACS)****3.2.1 Description**

Address Change Service (ACS) is an automated electronic enhancement to the manual method that centralizes, automates, and improves the process of providing address correction or reason for nondelivery notices. ACS is designed to reduce the volume of manual notifications provided for valid participating ACS mailpieces, but it does not completely eliminate manual notifications. ACS involves transmitting address correction information to a central point where the changes are consolidated electronically by unique publication or mailer identifier. The records are sequentially organized by USPS-assigned codes and distributed to each participating mailer. Mailers must keep their address records in electronic format and mark their mailpieces with the ACS symbols under 708.7.0 and the correct endorsement under 1.0 to obtain address correction. To obtain nondelivery

information under [1.4.1, General](#), in addition to address correction service, mailers must also use an ACS keyline on mailpieces. ACS also can be used to pay forwarding postage on most Standard Mail and Package Services pieces using Shipper Paid Forwarding under [3.2.7](#). Additional information for using ACS is contained in Publication 8, *Address Change Service*. [F030.2.1]

### 3.2.2 Availability

ACS is available monthly, weekly, or more frequently, depending on the needs and ACS volume of the mailer. Because ACS is associated with USPS computerized forwarding operations, the service is not available at all post offices. Therefore, ACS is not a guaranteed service and the USPS makes no assurance that any minimum percentage of a mailer's address correction notifications will be provided electronically rather than manually. The use of an authorized ACS participant code and the required endorsement on mailpieces does not guarantee the return of all notifications in an electronic format. To participate in ACS, write to the National Customer Support Center (see [608.8.0](#) for address). [F030.2.2]

### 3.2.3 Participant Code

The Address Change Service (ACS) participant code is provided to authorized mailers by the National Customer Support Center (NCSC) (see [608.8.0](#) for address). The participant code consists of seven alpha characters, aligned left, and must be preceded by a single pound sign (#) delimiter. [M013.3.1]

### 3.2.4 Placement

The ACS participant code may be placed in one of two positions:

- a. In the optional endorsement line. The participant code must occupy the first eight positions on the left side of the OEL and be formatted as provided in [708.7.2.3](#).
- b. On the mailpiece or an address label directly below the ancillary service endorsement, left-justified, when the endorsement is placed directly above the address block, if these additional standards are met:
  1. The mailpiece must be letter-size and machinable or automation-compatible with or without a barcode, or flat-size with or without a barcode.
  2. If mailer keyline information is used, it must be the top line of the address block. A barcode may not be placed above a mailer keyline.
  3. If a window envelope is used, the clearance between the top line (mailer keyline) of the address block and the top edge of the address window must be at least 1/25 inch. This clearance must be maintained during the range of movement of the insert in the envelope.
  4. If an address label is used, the clearance between the top line (mailer keyline) of the address block and the top edge of the address label must be at least 1/25 inch.
  5. The ACS participant code and ancillary service endorsement must be printed in a non-narrow variant of Helvetica or Arial sans serif font in the range of 10 to 12 points. [M013.3.2]

## 507.3.2.5

**3.2.5 Periodicals**

Address correction by ACS is provided automatically for 60 days after the effective date of the addressee's change of address for participating Periodicals publications (including publications pending Periodicals authorization). [F030.2.3]

**3.2.6 Address Correction Service Fee**

Unless excepted, the applicable fee for address correction is charged for each separate notification of address correction or the reason for nondelivery provided. [F030.2.4]

**3.2.7 Shipper Paid Forwarding**

Shipper Paid Forwarding is an ACS fulfillment vehicle. It allows mailers of Standard Mail machinable parcels and most Package Services to pay forwarding charges via approved ACS participant code(s). For information about Shipper Paid Forwarding, contact the National Customer Support Center (see [608.8.0](#) for address). Mailers have the option of paying forwarding charges through a postage due advance deposit account. Mailers who choose to do so must pay an annual accounting fee. [F030.2.5]

**3.2.8 Shipper Paid Forwarding Fee**

Annual accounting fee for (optional) advance deposit account: \$475.00. [R900.25.0]

**3.3 FASTforward****3.3.1 Purpose**

*FASTforward* is an automated system that interfaces with addressing and automation systems, such as computer-based mailing list correction processes, multiline optical character reader (MLOCR), or remote video encoding (RVE) technologies, to identify names and addresses for which current change-of-address orders are on file with the USPS. The *FASTforward* Mailing List Correction application updates name and address mailing lists before pieces are prepared for mailing. Approved *FASTforward* MLOCR and RVE systems print an on-piece address correction (text and delivery point barcode of the new address) for identified pieces before entry in the mailstream. Technical and licensing information is available from the National Customer Support Center (see [608.8.0](#) for address). [F030.3.1]

**3.3.2 Addressing**

When MLOCR and/or video image technologies are used with *FASTforward*, all name lines and lines of the delivery address as defined in [602.1.0](#) on each mailpiece must have a uniform left margin and be entirely within the OCR read area defined in [202.2.1](#). The term name lines includes recipient's name, firm name, and building name. An optional information line (e.g., keyline or optional endorsement line) is permitted if placed above the top line of the address block. Any alternative addressing format under [602.3.0](#) is not permitted. [F030.3.2]

**3.3.3 Barcoding**

When MLOCR and/or video image technologies are used with *FASTforward*, each letter-size piece must have a barcode clear zone meeting the standards in [202.5.1](#), free of any printing and barcode. If a *FASTforward* match is made, the new address and barcode representing the new address are printed in the barcode clear zone

and, for mail processing, take precedence over the old address and any barcode in the address block. The new barcode must meet the barcoding standards in [708.4.0](#). An envelope containing a window that intrudes into the barcode clear zone is not eligible for *FASTforward*. [F030.3.3]

### 3.4 Sender Instruction

#### 3.4.1 Mail Not Forwarded

The following types of mail are not forwarded:

- a. Mail addressed to “Occupant” or “Postal Customer.”
- b. Mail with exceptional address format.
- c. Mail showing specific instructions of the sender (e.g., “Return Service Requested” or “Change Service Requested”).
- d. Perishable items not marked to abandon that cannot be delivered before spoiling, or day-old poultry that cannot be delivered within 72 hours after hatching. These items are returned to the sender immediately, if the return can be made before spoilage or within the 72-hour period. [F030.4.1]

#### 3.4.2 Extra Services

A change-of-address order covers certified, collect on delivery (COD), insured, registered, and return receipt for merchandise mail unless the sender gives other instructions or the addressee moves outside the United States. This mail is treated as follows:

- a. COD mail is not forwarded to overseas military post offices.
- b. Ordinary, insured, and COD parcels marked on the envelope or wrapper with the mailer’s instructions to abandon or sell perishable items are treated following the instructions, such as:
  1. “Do not forward or return. If not accepted within \_\_\_\_ days, treat as abandoned. Notify mailer of disposition.”
  2. “Do not forward or return. If undelivered after \_\_\_\_ days, sell contents to highest bidder and remit proceeds, less commission, to mailer.” (A commission of 10%, but not less than \$0.25, is kept by the USPS from the amount for which perishable items are sold.)
- c. When the mailer so requests, Form 3849-D is sent to the mailer. The mailer then may designate a new addressee or alter the amount of COD charges by submitting a written request to the postmaster and paying the proper fee. The USPS returns the article to the mailer after the holding period if no response is received. The postage charge, if any, is collected from the mailer for returning the mail (but not registration or COD fees). When COD mail is addressed to a person who moved and left no forwarding address, Form 3849-D is not sent, and the mail is returned to the mailer.
- d. Insured Standard Mail is forwarded and returned.

## 507.3.4.3

- e. Insured Package Services without any other endorsement is forwarded at no charge locally and postage due nonlocally. (For forwarding, local means within the same post office.) If the mailpiece is undeliverable, the USPS returns it to the sender with the new address or the reason for nondelivery. The sender is charged for the return of the piece only and the attempted forwarding, when appropriate.
- f. The USPS holds undeliverable certified, insured, registered, and return receipt for merchandise mail for no fewer than 3 days nor more than 15 days (unless the sender specifies fewer).
- g. The USPS holds undeliverable collect on delivery (COD) mail for no fewer than 3 nor more than 30 days (unless the sender specifies fewer). [F030.4.2]

**3.4.3 Express Mail Pouch**

The USPS opens an undeliverable-as-addressed Express Mail pouch to find a delivery address on any envelope or article inside. The USPS does not open the wrappers or envelopes or break the seals of any Express Mail article in the pouch. If no address information is found, the pouch is treated as dead mail. Express Mail is held no more than 5 workdays unless the sender sets a shorter period. [F030.4.3]

**3.4.4 Holding Mail**

At the sender's request, the delivery post office holds mail, other than registered, insured, certified, COD, and return receipt for merchandise, for no fewer than 3 days nor more than 30 days. A specific retention time of not less than 3 nor more than 30 days, if requested, must be included by the sender in the return address on the mailpiece (e.g., "Return in 30 days to" followed by sender's return address). [F030.4.4]

**4.0 Recall of Mail****4.1 Who May Recall Mail****4.1.1 Sender**

Mail deposited in a collection box or at a post office may be recalled, with proper identification, by the sender or the sender's representative. Form 1509 must be submitted to the postmaster at the office of mailing. [D030.1.1]

**4.1.2 Federal Agency**

A federal agency may recall any mailpiece sent as official mail by submitting to any post office a Mailgram or an Express Mail letter identifying the piece. This provision excepts a federal agency only from the requirement to file recall orders at the office of mailing and does not authorize an agency to recall mail that it did not send. [D030.1.2]

**4.1.3 Expenses and Postage**

The mailer must pay all expenses of recalling mail (including return postage for other than First-Class Mail). If mail recalled before dispatch is again presented for mailing, the original stamps are accepted for postage at face value. This provision does not apply to stamps paying for registry, insurance, or COD fees. [D030.1.3]

#### 4.1.4 Registered Mail

For recalled Registered Mail, the sender must write or stamp “Withdrawn Before Dispatch” on the customer’s copy of the Registered Mail receipt, sign it, and surrender it. The same words must be written or stamped on the face of the article.

[D030.1.4]

## 4.2 Mailer Request for Withdrawal and Disposal of Mail

### 4.2.1 Mail Without Scheduled Delivery Date

The mailer may request the USPS to withdraw and dispose of mail without a scheduled delivery date before its delivery if:

- a. The mailing contains at least 200 pieces.
- b. The mailer gives the USPS a written and signed request, describing the mail by size, color, weight, identifying markings, number of pieces, class of mail, and type of postage payment. The request must include the authorization to withdraw and dispose of the mail.
- c. The mailer sends the request to the postmaster of the accepting post office (if the mailing has been deposited but not accepted) or to the postmaster of each destination office (if the mailing has been accepted). [D030.2.1]

### 4.2.2 Mail With Scheduled Delivery Date

The mailer may request the USPS to withdraw and dispose of mail with a scheduled delivery date (time-dated) before its delivery if:

- a. The mailing contains at least 200 pieces.
- b. The mailer entered the mailing early enough so that delivery can be expected on or before the scheduled delivery date.
- c. The mailer sends the request to the postmaster of the accepting post office (if the mailing has been deposited but not accepted) or, if the mailing has been accepted, the mailer either:
  1. Attaches a facing slip to each bundle of mail showing the company name, person to contact, telephone number (where collect calls are accepted), and the scheduled delivery date after which the mailer does not want the mail delivered. The mailer also authorizes the withdrawal but not the disposal of the mail.
  2. Sends a written request to the postmasters of destination post offices before depositing the mail, stating that time-dated mail is to be received at their offices and describing the mail by size, color, weight, identifying markings, number of pieces, class of mail, and type of postage payment. The mailer also authorizes the withdrawal and disposal of time-dated mail if received after the scheduled dates. [D030.2.2]

### 4.2.3 No Guarantee

The USPS does not guarantee success in preventing delivery of all pieces in a withdrawn mailing. [D030.2.3]

**4.2.4 Mail Disposal**

Disposal of mail at the mailer's request creates no obligation of the USPS to refund postage. The mailer must pay all expenses that the USPS incurred in disposing of the mail. [D030.2.4]

**5.0 Pickup Service****5.1 Pickup Service Fee**

Available for Express Mail, Priority Mail, and Parcel Post, per pickup: \$12.50. [R900.19.0]

**5.2 Basic Standards****5.2.1 Availability**

Pickup service is available from designated post offices for:

- a. Express Mail.
- b. Priority Mail.
- c. Single-piece rate Parcel Post. [D010.1.1]

**5.2.2 Extra Services**

Certified Mail, Delivery Confirmation, and Signature Confirmation are the only extra postal services that may be used with pieces that are picked up. [D010.1.2]

**5.2.3 Volume**

There are no limitations on the number of pieces that may be picked up. The USPS may defer pickup or make multiple pickups at no additional charge to the customer if the volume to be picked up exceeds available vehicle capacity. The USPS may establish plant load service if warranted. [D010.1.3]

**5.2.4 Standards**

Each piece of Express Mail, Priority Mail, or Parcel Post must meet all applicable eligibility and preparation standards. Material prepared for Express Mail or Priority Mail drop shipment must meet the applicable standards in [705.16.0](#). [D010.1.4]

**5.2.5 Form 5541**

When paying the fee, a customer must sign Form 5541. The USPS employee completes the information required on the form. [D010.1.5]

**5.2.6 Collecting Other Mail**

Incidental amounts of other postage-affixed, full-rate mail also may be collected when pickup service is provided. [D010.1.6]

**5.2.7 Service Changes**

The USPS may suspend or refuse pickup service due to exceptional or unsafe situations (e.g., hazardous weather or road conditions, facility emergencies on customer or USPS property, unforeseen employee or vehicle shortages, or unsafe or inadequate mailer facilities). [D010.1.7]

### 5.2.8 International Mail

Certain types of international mail that meet all eligibility and preparation standards required in the *International Mail Manual* may be collected when pickup service is provided. [D010.1.8]

## 5.3 Postage and Fees

### 5.3.1 Postage

The correct amount of postage must be affixed to each piece. *Exception:* Express Mail paid with a corporate account, Priority Mail or Parcel Post with a merchandise return service permit label (9.0), and manifest mailings approved by Business Mailer Support (BMS) do not need to have postage affixed. [D010.2.1]

### 5.3.2 Fee Charged

Pickup fees are listed in 113.1.5, 123.1.8, and 153.1.6, *Pickup Fees*. The customer is charged the required fee:

- a. Every time pickup service is provided, regardless of the number of pieces or combination of classes of mail.
- b. For additional trips to pick up exceptional volume of which the serving post office was not notified. [D010.2.2]

### 5.3.3 Fee Not Charged

The customer is not charged the applicable fee for:

- a. A scheduled pickup that is canceled as required.
- b. An on-call pickup that is canceled before the USPS employee is dispatched for the pickup.
- c. Express Mail, Priority Mail, or Parcel Post that is collected during a regular delivery stop or a scheduled stop to collect mail not subject to a pickup fee.
- d. Priority Mail or Parcel Post using a merchandise return service label that indicates that the permit holder will pay for pickup service.
- e. Priority Mail reshipment service (9.2.8). [D010.2.3]

### 5.3.4 Fee Payment Method

The pickup fee must be paid by one of these methods:

- a. Meter, precanceled, or adhesive stamps affixed to Form 5541.
- b. Federal agency number or Express Mail Corporate Account Number written on Form 5541.
- c. Check payable to the postmaster of the serving post office.
- d. Advance deposit account used by the merchandise return service permit holder to pay other applicable postage and fees (9.4.4).
- e. Regular postage due account maintained by the mailer at the serving post office. [D010.2.4]

507.5.4

## 5.4 On-Call Service

### 5.4.1 Availability

On-call pickup service is available only from designated post offices with city delivery. [D010.3.1]

### 5.4.2 Requesting a Pickup

A customer may obtain information about the availability of pickup service and schedule a pickup by calling 1-800-222-1811. Pickups are made within 2 hours of the request. A pickup can be made later than 2 hours after the request if the customer and the serving post office agree and service is not adversely affected. Depending on the time of the request and the delivery schedule of the serving post office, the pickup may be deferred to the next business day. When scheduling a pickup, the customer must indicate the quantity of mail to be picked up. [D010.3.2]

## 5.5 Scheduled Service

### 5.5.1 Availability

Scheduled pickup service is available from post offices with city delivery and from other post offices where the customer's address is along the line of travel and within the regular delivery period of a rural route or highway contract route. [D010.4.1]

### 5.5.2 Service Agreement

A customer requesting scheduled pickup service must enter into a service agreement with the USPS. The agreement specifies the time, place, day or date, frequency of service, and approximate volume per pickup. [D010.4.2]

### 5.5.3 Service hours

Scheduled pickup service may be requested during the regular business hours of the serving post office. Scheduled pickup service begins the day after the service agreement is finalized and continues until the customer cancels it. [D010.4.3]

### 5.5.4 Customer Changes

The customer must notify the serving post office at least 24 hours before a scheduled pickup if the pickup is to be canceled or the volume of mail to be picked up is more than 20% higher than the volume specified in the service agreement. The customer may:

- a. Amend the service agreement, effective 5 business days after the USPS receives the customer's written notice to the serving post office.
- b. Terminate scheduled pickup service, effective 24 hours after the USPS receives the customer's written notice to the serving post office. The customer must pay all fees for pickup service provided before termination of service. [D010.4.4]

### 5.5.5 USPS Changes

The USPS may:

- a. Change the service agreement, effective 5 business days after the customer receives written notice from the serving post office. The customer may appeal this notice to the district manager but must pay all fees for pickup service provided during the appeal period.

- b. Terminate scheduled pickup service, effective 24 hours after the customer receives written notice from the serving post office. Termination must be based on the customer's failure to pay postage and fees or to meet the standards for pickup service or Express Mail, Priority Mail, or Parcel Post. The customer may appeal this notice to the district manager but must pay for all fees for pickup service provided during the appeal period. [D010.4.5]

**5.6 Express Mail Reship Service**

**5.6.1 Reship Service**

The USPS picks up shipments made up of mail addressed to post office boxes and dispatches it as a Custom Designed or Next Day Service shipment under a service agreement (on Form 5631) between the USPS and the mailer, subject to these standards:

- a. Service frequency is scheduled.
- b. For each pickup stop, the mailer is charged the applicable pickup fee no matter how many of the same mailer's post office boxes are checked in the same post office box unit at the same time.
- c. Express Mail postage and fees are paid by Express Mail Corporate Account or federal agency "Postage and Fees Paid" indicia.
- d. The mailer must keep a postage-due or business reply account at the postal facility where the post office box is located for any shortpaid or business reply mail. The service agreement must state that such an account exists.
- e. Express Mail reship service is not available for registered, certified, COD, insured, or Express Mail items addressed to the post office box. The mailer must give instructions for redirecting such items on Form 1093.
- f. The service agreement must: (1) list the Expedited Mail analyst at the originating office as the "Firm Representative"; (2) show the pickup time is when the USPS employee picks up the mail from the post office boxes and prepares it for dispatch as Express Mail.
- g. Commencement and termination of service agreements are subject to the standards for Express Mail Custom Designed Service. [D500.3.0]

**5.6.2 Delivery**

Delivery of Express Mail is subject to [508.1.1.7](#). [D500.4.0]

**6.0 Mailing List Services**

**6.1 Mailing List Service Fees**

**6.1.1 List Correction**

Minimum charge per list (30 items): \$9.00.  
For each address on list: \$0.30. [R900.13.1]

**6.1.2 5-Digit ZIP Code Sortation**

For sortation of mailing lists on cards into groups labeled by 5-digit ZIP Code, per 1,000 addresses or fraction: \$100.00. [R900.13.2]

507.6.1.3

**6.1.3 Election Boards**

For address changes provided to election boards and voter registration commissions, per Form 3575: \$0.27. [R900.13.3]

**6.2 General Information****6.2.1 Definition**

A *mailing list* is a listing of names and addresses, or addresses only, produced on individual cards or in sheet form. [A910.1.1]

**6.2.2 Carrier Route File**

The official city delivery scheme, called the Carrier Route File, is available to mailers. [A910.1.2]

**6.2.3 Purpose**

To improve address quality, the USPS offers (for a designated fee) mailing list services to correct name and address lists; correct occupant lists; and sort mailing lists on cards by 5-digit ZIP Code (available only for multi-ZIP Code post offices). These services are available for mailing lists submitted by members of Congress; federal agencies; departments of state governments; municipalities; religious, fraternal, and recognized charitable organizations; and concerns or persons who solicit business by mail. For the designated fee, the USPS also provides address changes to election boards and voter registration commissions. [A910.1.3]

**6.2.4 Lists**

In providing services, the USPS does not compile any mailing list, including an occupant list. All corrections are marked on the list submitted by the customer. [A910.1.4]

**6.2.5 Prohibitions**

Persons other than USPS employees may not copy, or record by any means, names or addresses from carrier cases. Labels, wrappers, envelopes, stamped cards, or postcards indicating one-time use are not accepted as mailing lists. [A910.1.5]

**6.3 Fee Assessment****6.3.1 Corrections**

The fee for correcting name and address lists or occupant lists is assessed for each name or street address on the list. Individual apartments are considered separate addresses. The minimum fee in 6.1.1 applies to lists with fewer than 30 names or addresses. For assessing the fee, the USPS considers a list to be all the addresses sent at one time to the appropriate postal facility. [A910.2.1]

**6.3.2 Rural Route Consolidation**

No fee is charged for correcting name and address lists or occupant lists where rural routes are consolidated or changed to another post office, or where rural route and box number addresses are changed to city-style addresses. The lists must contain only names and/or addresses of persons residing on the routes involved, and the lists must be submitted for correction during the time when the local post office is required to keep the address conversion information. [A910.2.2]

### 6.3.3 Cards

The fee for sorting mailing lists on cards by 5-digit ZIP Code is assessed per 1,000 addresses or fraction thereof. [A910.2.3]

### 6.3.4 Election Board and Voter Commissions

The fee for address changes provided to election boards and voter registration commissions is assessed for each Form 3575 submitted. The fee is collected on a per card basis regardless of the number of changes made on the card and whether the change concerns a person on the board's or commission's list of registrants. Instead of the actual forms, the USPS may supply facsimiles of the forms or copies of the information they contain at no additional fee. [A910.2.4]

### 6.3.5 Payment

The post office providing the correction service annotates the total fee due on the outside of the package containing the corrected cards or lists. Payment must be made to the postal installation to which the list was submitted. Payment must be in cash or by check or money order made payable to the postmaster. Payment for correcting a list submitted by a federal agency or a person authorized to send matter as official mail may be made under the official mail reimbursement program. Payment may be made when the list is submitted or when the corrected list is delivered. [A910.2.5]

### 6.3.6 Time Limit

The USPS corrects and returns a mailing list to the owner within 15 workdays after receipt. This time limit does not apply to mailing lists received for correction between November 16 and January 1; they are returned as soon as possible. [A910.2.6]

## 6.4 Name and Address List Correction

### 6.4.1 Preparation

If addresses are submitted in list form, the list must be typewritten, printed, or computer-prepared and in sheet form, with enough space between or next to each address to permit entry of corrections. The list owner's name must appear in the upper left corner of each page or sheet. Lists must be separated by post office. A separate list must be presented for each carrier route served by a post office with 190 or more revenue units. Each post office can advise customers in this regard. [A910.3.1]

### 6.4.2 Card Size

If the addresses are submitted on cards, the cards must be about the size (3-1/2 by 5-1/2 inches) and quality of a stamped card; data processing cards are acceptable. Information on the cards must be typewritten, printed, or computer-prepared, having only one name and address per card, and with enough space to permit entry of corrections. The list owner's name must appear in the upper left corner of each card. Lists (groups of cards) must be separated by individual post office. [A910.3.2]

507.6.4.3

**6.4.3 Submission**

The customer must submit the address cards or mailing lists to the district manager of Address Management Systems for addresses within the district. (The address of each district and the ZIP Codes each serves may be found in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.) Unless directed otherwise by the district, the customer must address the submission as follows:

MANAGER  
ADDRESS MANAGEMENT SYSTEMS  
[STREET ADDRESS]  
[CITY STATE ZIP CODE]

[A910.3.3]

**6.4.4 Postage**

Cards or lists may be mailed by their owners to the designated district, but the list owner must prepay the postage for such items at the applicable rate. The submitted items are returned free of postage. [A910.3.4]

**6.4.5 Elements Corrected**

USPS employees:

- a. Cross off names to which mail cannot be delivered or forwarded.
- b. Correct initials and/or last names when the name apparently is known to the owner of the list.
- c. Correct the house, rural, or post office box number; correct the last line (post office name, state abbreviation, and 5-digit ZIP Code); and, in multiple-unit buildings, add apartment, suite, or room numbers if known by the USPS employee.
- d. Correct spelling of street names, suffixes, and placement of directionals to conform to the Carrier Route File scheme.
- e. Provide new addresses, including ZIP Codes, for customers who have moved and filed permanent forwarding orders that are still active, and for addresses, if known, that are undeliverable because of USPS adjustments.
- f. Mark an "X" in the upper right corner of the card or next to each entry on the sheet where no change is necessary. [A910.3.5]

**6.4.6 No Additions**

In making list corrections, USPS employees do not add a new name or address to a card or list. [A910.3.6]

**6.5 Occupant Lists****6.5.1 Submission**

Customers must submit occupant lists of street addresses in the same way as for name and address corrections. Customers must not submit lists that include more than 110% of the possible deliveries for a specific 5-digit ZIP Code delivery area. [A910.4.1]

### 6.5.2 Elements Corrected

USPS employees:

- a. Provide new addresses, if known, for addresses that are undeliverable because of USPS adjustments.
- b. Correct last lines (post office names, state abbreviations, and 5-digit ZIP Codes), spelling of street names, suffixes, and placement of directionals to conform to the Carrier Route File scheme.
- c. Cross off numbers representing incorrect or nonexistent street addresses, but do not change or add numbers.
- d. Indicate business addresses with a “B” in the upper right corner of the card, or opposite the street number as printed on the sheet, as applicable.
- e. Indicate rural route addresses with an “R” in the upper right corner of the card, or opposite the street number as printed on the sheet, as applicable.
- f. Enter the number of separate family units opposite addresses of multiple-unit dwellings.
- g. Mark an “X” in the upper right corner of the card or next to each entry on the sheet where no change is necessary.
- h. Group the corrected cards or sheets by carrier route for return to the list owner. [A910.4.2]

## 6.6 Sortation of Lists on Cards by 5-Digit ZIP Code

### 6.6.1 Coding

The customer must code mailing lists by 5-digit ZIP Code for single 5-digit ZIP Code post offices. [A910.5.1]

### 6.6.2 Preparation

To allow the USPS to sort a mailing list to 5-digit ZIP Codes, a mailing list of addresses only for multi-ZIP Code post offices must be prepared on cards about the size (3-1/2 by 5-1/2 inches) and quality of a stamped card; data processing cards are acceptable. Only one address may appear on each card. The owner must separate the cards by post office of address and submit each group to the district manager of Address Management Systems serving that post office. The list owner must wrap mailing lists (cards) for mailing when practicable. The owner’s name and address must appear on the outside of the wrap or container. [A910.5.2]

### 6.6.3 USPS Sortation

USPS employees sort cards by 5-digit ZIP Code and securely package them with a facing slip marked “All for ZIP Code Area (00000).” ZIP Codes are not written on individual cards. [A910.5.3]

## 6.7 Election Boards and Voter Registration Commissions

### 6.7.1 General

[02-03-05] Election boards or voter registration commissions may use the “Return Service Requested” endorsement and/or the National Change of Address Linkage System (NCOA<sup>Link</sup>) to maintain current address lists. [A910.6.1]

507.6.7.2

**6.7.2 Procedure**

Election boards or voter registration commissions using permanent registration also may obtain residential change-of-address information from Forms 3575:

- a. An authorized official of the board or commission must sign and submit to the manager, address management systems (district), a written request that lists the post offices for which change-of-address information is desired.
- b. If the request is approved, an agreement must be obtained from and signed by an authorized official of the board or commission detailing the terms under which the change-of-address information is to be released.
- c. The board or commission receives the requested information from the postmasters of the listed post offices and pays those postmasters the applicable fees. [A910.6.2]

**7.0 Address Sequencing Services****7.1 Address Sequencing Service Fees****7.1.1 Basic Service**

Each card or address removed because of an incorrect or undeliverable address: \$0.30. [R900.2.1]

**7.1.2 Blanks for Missing Addresses**

Each card or address removed because of an incorrect or undeliverable address: \$0.30.

Insertion of each blank card for missing or new address: no charge. [R900.2.2]

**7.1.3 Missing or New Addresses Added**

Insertion of each addressed card for missing or new address: \$0.30. [R900.2.3]

**7.2 Service Levels**

The USPS provides the following levels of manual or electronic address sequencing service for city carrier routes, rural routes, highway contract routes, and post office box sections:

- a. Sequencing of address cards or electronic address files.
- b. Sequencing of address cards or electronic address files, plus inserting only blank cards for missing addresses or missing sequence numbers for the addresses missing from the electronic files.
- c. Sequencing of address cards or electronic address files, plus inserting cards with addresses for missing or new addresses, or inserting addresses into electronic files for missing or new addresses.
- d. For address cards or electronic files, if qualification is met, the USPS will provide seeded addresses to the list owners for inclusion in their address files for file protection.

- e. If a request for sequencing contains a seeded address, the owner of the seeded address will be notified within 30 days of detection. If all known possibilities of fraud cannot be ruled out, the request will be denied and the Postal Inspection Service will be notified. [A920.1.0]

**7.3 Card Preparation and Submission**

**7.3.1 Color, Size, and Quantity**

When submitting cards, all address cards must be made of white or buff-colored card stock and of an identical size (5 to 8-5/16 inches long and 2-1/4 to 4-1/4 inches high). Blank cards for missing and/or new addresses must be of the same size as the submitted address cards but of a different color. A customer must provide enough blank cards to equal at least 10% of the number of address cards submitted. [A920.2.1]

**7.3.2 Limitation**

The customer must not submit address cards or an address file in excess of 110% of the possible deliveries for a specific 5-digit ZIP Code delivery area. Customers requesting the service level in 7.2c will be allowed three attempts to qualify a ZIP Code for the service within a 12-month period. Failure to qualify within three attempts within 12 months will result in a suspension of 1 year for any additional attempts to qualify the ZIP Code. [A920.2.2]

**7.3.3 Addressing Format**

Addressing format is specific to the media being used.

- a. Card Processing. Cards must be faced in the same direction and bear only one address each. The customer's current address information must be computer-generated, typed, or printed along the top of the card. The address must be within 1 inch from the top edge of the card in about the same location on each card submitted. Each card must include a complete address, but the ZIP Code is optional. Street designators may be abbreviated as shown in Publication 28, *Postal Addressing Standards*. When sequence cards are used to obtain address sequencing information for post office boxes, the box section number must be substituted for the carrier route number (if shown).
- b. Electronic Processing. The customer must submit address files on electronic media, as described by the Postal Service. Call the National Customer Support Center at 1-800-331-5747 for a copy of the required format. [A920.2.3]

**7.3.4 Header Cards**

When submitting address cards, customers must provide carrier route header cards prepared with standard 80-column computer card stock (or another size as described in 7.3.1). The header cards must be typed, computer-generated, or printed by the customer. A route header card of the same size as the address cards must be placed in front of the cards for each route. All columns must be provided on the header cards, regardless of the service level requested. Column headings may be abbreviated. Examples of the required format for the route header card can be obtained from the National Customer Support Center (see 608.8.0 for address). [A920.2.4]

**7.3.5 Delivery Unit Summary**

A Delivery Unit Summary must be typed, computer-generated, or printed and provided by the customer for card processing. A printed copy or electronic file will be acceptable for address file submissions. When submitting address cards, an original and two copies must be submitted for each 5-digit ZIP Code. When submitting an address file, an original and two copies of a printed form or one electronic file must be submitted for each 5-digit ZIP Code. This form, used by the USPS to provide summary information to the customer, is necessary for calculating total charges for the service level provided. For address card submissions, the original is returned to the customer with the cards as the customer's bill. For electronic address file submissions, a computer-generated Delivery Unit Summary is returned as the customer's bill. Upon receipt of payment, the ZIP Code will be qualified for Computerized Delivery Sequence (CDS), and product fulfillment will begin. Examples of the required printed or electronic format of the Delivery Unit Summary can be obtained from the National Customer Support Center (see [608.8.0](#) for address). [A920.2.5]

**7.3.6 5-Digit ZIP Codes**

When submitting address cards, the cards for each 5-digit ZIP Code must be placed in separate containers, each with an envelope affixed containing a packing list and Delivery Unit Summary sheets for that 5-digit ZIP Code. For each 5-digit ZIP Code, the customer must also show the number of containers submitted on the Delivery Unit Summary and number those containers sequentially (e.g., "1 of 3," "2 of 3," and "3 of 3"). If there is more than one container for the 5-digit ZIP Code, the Delivery Unit Summary must be affixed to the first container. [A920.2.6]

**7.3.7 Submitting Cards or Electronic Files**

The designated place for submission of addresses for sequencing depends on the type of media used.

- a. Card Processing. The customer must submit the containers of address cards to the district manager of Address Management Systems for carrier routes within the corresponding district. (Exception: Address cards only for addresses in the city where the customer is located may be submitted to the postmaster of that city.) Unless directed otherwise, the customer must address containers of address cards to:

MANAGER ADDRESS MANAGEMENT SYSTEMS  
UNITED STATES POSTAL SERVICE  
[STREET ADDRESS]  
[CITY/STATE/ZIP+4]

- b. Electronic Processing. The customer must submit address files on electronic media to:

COMPUTERIZED DELIVERY SEQUENCING DEPARTMENT  
NATIONAL CUSTOMER SUPPORT CENTER  
UNITED STATES POSTAL SERVICE  
6060 PRIMACY PKWY STE 201  
MEMPHIS TN 38188-0001 [A920.2.7]

**7.3.8 Postage**

Containers of cards mailed to the post office must have postage paid at the applicable rate. Address files can be mailed at the appropriate rate or be electronically transmitted, as determined by the USPS, to the National Customer Support Center. They are returned to the customer free of postage. [A920.2.8]

**7.3.9 USPS Sequencing**

Unsequenced address cards received at post offices or unsequenced address files received at the National Customer Support Center will be arranged in sequence of carrier route delivery without charge. Cards with incorrect or undeliverable addresses are removed from carrier route bundles, bundled separately, and returned to the customer. When address files are submitted, incorrect or undeliverable addresses are removed from the original file and returned as a separate file. [A920.2.9]

**7.3.10 USPS Time Limits and Billing**

The post office or the National Customer Support Center, whichever performs the service, returns the cards or address file and the bill for applicable charges to the customer within 15 working days after receiving a properly prepared request for address sequencing. This time limit does not apply to cards received between November 16 and January 1; they are returned as soon as possible. [A920.2.10]

**7.3.11 Seasonal Addresses**

Under all service levels, correct addresses subject to seasonal occupancy, but which do not indicate seasonal treatment, will be identified with an “S” on cards or a flag on address files. If the address is included in a series, such as those used for apartment buildings, trailer parks, and seasonal delivery areas in general, the appropriate “seasonal” indicator box is checked on the card or flagged on the address file. When correct address cards or address files that are not subject to seasonal occupancy but that include seasonal treatment notations are submitted, the seasonal indicator is marked out on cards or left blank on address files. For cards, a rubber band is placed around the card to identify it before it is put in carrier route sequence order in the returned deck of cards. No charge is assessed for this service. [A920.2.11]

**7.4 Sequencing Cards With Blanks for Missing Addresses or Sequencing Address Files With Missing Sequence Numbers**

USPS employees at post offices (for cards) or the National Customer Support Center (for address files) arrange unsequenced addresses in sequence of carrier route delivery without charge, remove incorrect or undeliverable addresses, and, if cards, package separately for return to the customer, and insert a blank card or missing sequence number for address files for each existing address that is not included in the customer’s cards or address file. (If several addresses in a series are missing, a single blank card is inserted for the series showing the number of missing addresses, or for address files a series of missing sequence numbers will be omitted identifying the number of missing addresses.) [A920.3.0]

## **7.5 Sequencing With Address Cards or Address File Sequencing With Addresses Added for Missing and New Addresses**

### **7.5.1 USPS Sequencing**

USPS employees at post offices (for cards) or the National Customer Support Center (for address files) arrange unsequenced addresses in sequence of carrier route delivery without charge, remove incorrect or undeliverable addresses, and, if cards, package separately for return to the customer or, if an address file, return as a separate file, and add new or missing addresses (including rural address conversions to city delivery) for each existing address that is not included in the customer's cards or address file. [A920.4.1]

### **7.5.2 Separate Address Groups**

Separate groups of address cards must be submitted for the addresses in each 5-digit ZIP Code delivery area: city carrier (residential addresses only); city carrier (business addresses only); city carrier (combination of residential and business addresses); rural and highway contract route addresses; or post office box addresses (whether business, residential, or a combination). If submitting an electronic address file, a single file meeting the same requirements is acceptable. Each group must be accompanied by a statement showing:

- a. Types of addresses (i.e., residential, business, or a combination).
- b. Number of addresses on the cards or in the address file.
- c. Name, mailing address, and telephone number of the list owner or agent.

[A920.4.2]

### **7.5.3 Post Office Boxes**

Within a 5-digit ZIP Code, post office box addresses must be placed in separate groups from city carrier, rural, and highway contract route addresses and separately identified on the customer's statement. [A920.4.3]

### **7.5.4 Address Percentage**

For the 5-digit ZIP Code, the mailing list that the cards or address file represents must contain 90% of all possible residential or business city carrier addresses in the respective address group, 90% of all city carrier addresses in a combination residential/business address group, or 90% of all possible deliveries in rural/highway contract route and post office box groups. [A920.4.4]

### **7.5.5 Calculating Percentage**

In calculating the total number of addresses within a 5-digit ZIP Code, each apartment unit in an apartment building or each office in an office building that is a deliverable address is treated as a separate address. [A920.4.5]

### **7.5.6 Resubmitting Cards or Address File**

Customers must monitor community growth and determine when address cards or address files need to be submitted for resequencing to maintain the 90% eligibility level of address coverage. Such a determination is not supplied by the USPS. See [509.1.0, Address Information System Products](#), for information on obtaining delivery statistics. [A920.4.6]

## 7.6 Service Charges

### 7.6.1 Basic Service

For sequencing of address cards or address files, the fee in 7.1.1, *Basic Service*, is charged for each address card or address that is removed because of an incorrect or undeliverable address. All cards removed are packaged separately and returned to the customer. [A920.5.1]

### 7.6.2 Blanks for Missing Addresses

For sequencing of address cards or address files with total possible deliveries shown, the fee in 7.1.2 is charged for each address card or address that is removed because it is incorrect or undeliverable. No charge is assessed for the insertion of blank cards or missing sequence numbers (for address files) showing the range of missing addresses in a submitted list. [A920.5.2]

### 7.6.3 Missing or New Addresses

For sequencing of address cards or address files with missing or new addresses added, the fee in 7.1.3 is charged for each address card or address that is removed because it is incorrect or undeliverable, and for each address (possible delivery) that is added to the customer's list. For apartment or office buildings with a series of addresses for which the USPS provides a range of addresses, the charge is for each address (possible delivery) in the range or series. [A920.5.3]

### 7.6.4 Customer's Bill

For all services, the original of the Delivery Unit Summary is returned to the customer after completion by USPS employees and serves as the customer's bill. The customer must submit payment for the amount due to the local post office or as instructed. [A920.5.4]

### 7.6.5 Free Services

These services are provided at no charge for all three levels of service:

- a. If the customer includes a rural address (box number) in a deck of cards or address file submitted for sequencing, and a street address is assigned to that box number so it can be served on a city delivery route, a correct address card or address is included at no charge.
- b. The USPS attempts, but does not guarantee, to make simple corrections to addresses (e.g., obvious spelling errors) that can be identified as a specific delivery address and are not undeliverable as addressed or nonexistent. Corrections are noted on the cards placed in proper carrier route sequence in the returned cards and identified by a rubber band around the card. [A920.5.5]

## 7.7 Submitting Properly Sequenced Mailings

### 7.7.1 Customer Responsibility

The customer must ensure that mailings are prepared in correct carrier route delivery sequence and resequence cards or an address file when necessary. The USPS does not provide list-sequencing service for mailings not prepared in correct carrier route delivery sequence if the customer is so notified but fails to take corrective action. [A920.6.1]

## 507.7.7.2

**7.7.2 Changes**

When delivery changes affect delivery sequence but do not cause scheme changes, card customers will be notified in writing and must then submit cards for the affected routes or the complete ZIP Code for resequencing. Computerized Delivery Sequence (CDS) customers will automatically receive an updated electronic file from the USPS. [A920.6.2]

**7.7.3 Out-of-Sequence Mailing**

If a mailing is found to be out of sequence, the customer is informed in writing both of the error and that, unless the situation is corrected, the USPS will not provide carrier route sequencing service. If the customer does not take corrective action, the USPS gives written notice that the customer is no longer allowed to submit address cards to the post office or address files to the National Customer Support Center for sequencing. Within 30 days, the customer may file a written appeal with the postmaster who gave notice. [A920.6.3]

**7.7.4 Reinstatement**

Generally, a customer denied address card or address file sequencing service for a specific ZIP Code may not submit address cards (to the post office) or address files (to the National Customer Support Center) for sequencing where that sequencing service was terminated for 1 year after the effective date of termination. After that time, the customer is again authorized to submit the ZIP Code address cards (to the post office) or address files (to the National Customer Support Center) for sequencing. At any time during the year after termination of service, the customer may renew the submission if the postmaster (for address cards) or the National Customer Support Center (for address files) is convinced that the customer has taken all necessary action to correct the past errors. [A920.6.4]

**8.0 Business Reply Mail (BRM)****8.1 Business Reply Mail (BRM) Rates and Fees****8.1.1 Basic BRM**

Annual permit fee: \$150.00.

Per piece fee: \$0.60 (in addition to the applicable First-Class Mail or Priority Mail postage ([123.1.0, Priority Mail Rates and Fees](#), or [133.1.0, First-Class Mail Rates and Fees](#))). [R900.4.1]

**8.1.2 High-Volume BRM**

Annual permit fee: \$150.00.

Annual accounting fee (for advanced deposit account): \$475.00.

Per piece fee: \$0.10 (in addition to the applicable First-Class Mail or Priority Mail postage ([123.1.0, Priority Mail Rates and Fees](#), or [133.1.0, First-Class Mail Rates and Fees](#))). [R900.4.2]

**8.1.3 Basic Qualified BRM**

Annual permit fee: \$150.00.

Annual accounting fee (for advanced deposit account): \$475.00.

Per piece fee: \$0.06 (in addition to the automation First-Class Mail QBRM postage (in [507.8.2](#))). [R900.4.3]

**8.1.4 High-Volume Qualified BRM**

Annual permit fee: \$150.00.  
 Annual accounting fee (for advanced deposit account): \$475.00.  
 Quarterly fee: \$1,800.00.  
 Per piece fee: \$0.008 (in addition to the automation First-Class Mail QBRM postage (in [123.1.0, Priority Mail Rates and Fees](#), or [133.1.0, First-Class Mail Rates and Fees](#))). [R900.4.4]

**8.1.5 Bulk Weight Averaged Nonletter-Size BRM**

Annual permit fee: \$150.00.  
 Annual accounting fee (for advanced deposit account): \$475.00.  
 Monthly maintenance fee: \$750.00.  
 Per piece fee: \$0.01 (in addition to the applicable First-Class Mail or Priority Mail postage ([123.1.0, Priority Mail Rates and Fees](#), or [133.1.0, First-Class Mail Rates and Fees](#))). [R900.4.5]

**8.2 Qualified Business Reply Mail (QBRM) Rates**

**8.2.1 Cards**

Cards meeting the standards in [8.3](#) through [8.12](#), in addition to the fees in [8.1](#): \$0.200 each. [R100.3.1]

**8.2.2 Letters**

Letter-size single pieces meeting the standards in [8.3](#) through [8.12](#), in addition to the fees in [8.1](#):

| WEIGHT INCREMENT                    | RATE    |
|-------------------------------------|---------|
| First ounce or fraction of an ounce | \$0.340 |
| Each additional ounce or fraction   | 0.230   |

[R100.3.2]

**8.3 Qualified Business Reply Mail (QBRM) Basic Standards**

**8.3.1 Description**

Qualified Business Reply Mail (QBRM) is First-Class Mail that:

- a. Is letter-size and is prepared to meet the automation compatibility requirements in [201.3.0](#) (except [201.3.14.1, Paper Weights for Mailpieces Sealed on All Sides](#) ).
- b. Meets all the Business Reply Mail (BRM) standards in [8.4](#) through [8.12](#).
- c. Has postage and per piece charges deducted from a BRM advance deposit account.
- d. Is authorized to mail at QBRM rates and fees under [8.3.2](#). During the authorization process, the mailer is assigned a unique ZIP+4 code for each rate category of QBRM to be returned under the system (one for card-rate pieces, one for letter-size pieces weighing 1 ounce or less, and one for letter-size pieces weighing over 1 ounce up to and including 2 ounces).

## 507.8.3.2

- e. Bears the unique ZIP+4 code assigned during the application process in the address of each piece distributed. The ZIP+4 code on each piece must be the proper one assigned to the rate category of the piece on its return. The ZIP+4 codes assigned for this program must be used only on the organization's appropriate QBRM pieces.
- f. Bears the correct barcode that corresponds to the unique ZIP+4 code in the address on each piece distributed. The barcode must be correctly prepared under [708.4.0](#) and [8.9](#).
- g. Bears a properly prepared facing identification mark (FIM) C on each piece distributed (see [708.9.0](#)). [E150.1.1]

**8.3.2 Authorization**

To participate in QBRM, a mailer must have a valid BRM permit and pay the annual accounting fee. The following conditions also apply:

- a. Any mailer who applies for a BRM permit on Form 3615 must submit Form 6805 to the postmaster or business mail entry manager at the post office to which the QBRM pieces are to be returned. The USPS reviews the Form 6805 and preproduction samples provided by the mailer for compliance with relevant standards. If the mailer's request is approved, the USPS issues the mailer an authorization on the approved Form 6805.
- b. Any mailer who applies for a BRM permit online (see [8.0](#)) completes an electronic version of Form 6805 as part of the online application approval process in place of a printed Form 6805. The mailer is not required to submit preproduction samples when the BRM permit is approved and issued online. [E150.2.0]

**8.3.3 QBRM Postage**

The single-piece postage rates for QBRM First-Class Mail are applied to each returned piece as follows:

- a. The QBRM rate for cards in [8.2.1](#) applies to a card meeting the applicable standards in [8.3.1](#) and [201.1.0](#).
- b. The QBRM rate for letters in [8.2.2](#) applies to a letter meeting the applicable standards in [8.3.1](#) that is not eligible for and claimed at the QBRM rate for cards. [E150.3.1]

**8.3.4 QBRM Per Piece Charges**

Each piece of returned QBRM is charged the per piece charge in [8.1](#). [E150.3.2]

**8.3.5 QBRM Fees**

The following fees apply to QBRM First-Class Mail:

- a. The annual BRM permit fee.
- b. The annual BRM accounting fee.
- c. At the mailer's option, a quarterly fee. [E150.3.3]

## 8.4 General Information

### 8.4.1 Description

Business reply mail (BRM) service enables a permit holder to receive First-Class Mail and Priority Mail back from customers and pay postage and a per piece fee only for the pieces returned. BRM cards, envelopes, self-mailers, cartons, and labels may be distributed by a BRM permit holder in any quantity for return to any post office in the United States and its territories and possessions, including military post offices overseas. Qualified Business Reply Mail (QBRM) is a subset of BRM available for specific automation-compatible letter-size pieces that qualify for an automation postage rate and a reduced per piece fee (see 8.10). Domestic BRM may not be distributed to foreign countries. Standards for International Business Reply Service (IBRS) are in the *International Mail Manual*. [S922.1.1]

### 8.4.2 Payment Guarantee

The permit holder guarantees payment of the applicable First-Class Mail or Priority Mail postage, plus a per piece fee, on all returned BRM. This includes any incomplete, blank, or empty BRM cards and envelopes and any mailable matter with a BRM label affixed. [S922.1.2]

### 8.4.3 Services

No extra services (e.g., certified, insured, registered) are permitted with BRM. [S922.1.3]

### 8.4.4 Address

The delivery address on a piece of BRM may not be altered to redirect the mailpiece to any address other than the one preprinted on the piece. [S922.1.4]

### 8.4.5 Official Mail

Authorized users of official (penalty) mail may distribute BRM subject to the additional standards in 703.7.0, which supersede any conflicting standards in 8.0. [S922.1.5]

### 8.4.6 Intentions of the Permit Holder

BRM may not be used for any purpose other than that intended by the permit holder, even when postage is affixed. In cases where a BRM card or letter is used improperly as a label, the USPS treats the item as waste. [S922.1.6]

### 8.4.7 Samples

Prior to printing, permit holders are encouraged, but not required, to submit preproduction samples of BRM to the USPS for approval. QBRM pieces require USPS approval (8.3). [S922.1.7]

### 8.4.8 Error Notification

If the USPS discovers a BRM format error, the responsible permit holder or authorized agent receives written notification of the error. The permit holder must correct the error and make sure that all future BRM pieces meet appropriate specifications. The repeated distribution of BRM with format errors is grounds for revoking a BRM permit (8.5.6). [S922.1.8]

## 8.5 Permits

### 8.5.1 Required

Any mailer who wants to distribute BRM must apply for and receive a permit. The permit number, city, and state where the permit is held must appear on all pieces of BRM. [S922.2.1]

### 8.5.2 Application Process

The mailer may apply for a BRM permit using one of the following processes:

- a. Form 3615. The mailer submits a completed Form 3615 to the Post Office issuing the permit and pays the annual permit fee. If a completed Form 3615 is already on file for the mailer at that office for other permits, then the mailer must submit the annual permit fee and the USPS amends Form 3615 by adding the BRM authorization.
- b. Online. The mailer applies online at [www.usps.com](http://www.usps.com). Online application is available only for BRM permits issued for certain Post Offices, determined by logging on to [www.usps.com/replymail](http://www.usps.com/replymail) and entering the 5-digit ZIP Code of the post office where the mailer wants the BRM permit issued. If the online application option is not available for a 5-digit Zip Code, the applicant must apply using Form 3615. [S922.2.2]

### 8.5.3 Annual Permit Fee

A permit fee must be paid once each 12-month period at each post office where a BRM permit is held. Payment of the permit fee is based on the anniversary date of the permit's issuance. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. Agents authorized by a permit holder under 8.11 are not required to pay an annual permit fee at the post office where their BRM is received. [S922.2.3]

### 8.5.4 Renewal of Annual Permit Fee

An annual renewal notice is provided to each BRM permit holder by the USPS. The notice and the payment for the next 12 months must be returned by the expiration date to the post office that issued the permit. After the expiration date, if the permit holder has not paid the annual permit fee, then returned BRM pieces are treated as follows:

- a. Postcards of no obvious value are treated as waste and disposed of at the delivery unit.
- b. Pieces (excluding postcards) with a return address are endorsed "Business Reply Permit Canceled" and are returned to the sender.
- c. Pieces without a return address are endorsed "Business Reply Permit Canceled" and forwarded to the mail recovery center for handling. [S922.2.4]

### 8.5.5 Other Post Offices

A permit holder may distribute BRM through any post office for delivery at any post office under 8.11. [S922.2.5]

### 8.5.6 Revocation of a Permit

The USPS may revoke a BRM permit because of format errors or for refusal to pay permit fees (i.e., annual, accounting, quarterly, monthly), postage, or per piece fees. If the permit was revoked due to format errors, then a former permit holder may obtain a new permit and permit number by completing and submitting a new Form 3615, paying the required BRM annual permit fee, paying a new annual accounting fee (if applicable), and, for the next 2 years, submitting two samples of each BRM format to the appropriate post office for approval. [S922.2.6]

## 8.6 Postage, Per Piece Fees, and Accounting Fees

### 8.6.1 Postage

Each piece of returned BRM is charged the applicable single-piece First-Class Mail or Priority Mail postage (123.1.0, *Priority Mail Rates and Fees*, and 133.1.0, *First-Class Mail Rates and Fees*). Cards must meet the standards in 201.1.0 to qualify for card rate postage. Any card larger than those dimensions is charged the applicable First-Class Mail letter rate. For Priority Mail over 1 pound, if the zone cannot be determined from a return address or cancelation, then the permit holder is charged zone 4 postage for the weight of the piece. For QBRM, see 8.10. [S922.3.1]

### 8.6.2 Per Piece Fees

Per piece fees listed in 8.1 are charged for each piece of returned BRM (in addition to postage in 8.6.1). If a permit holder has not paid an annual accounting fee and established a BRM advance deposit account, then the basic (higher) BRM per piece fee must be paid. If a permit holder has paid the annual accounting fee and has established a BRM advance deposit account, then the high-volume (lower) BRM per piece fee is paid. For QBRM, see 8.10. [S922.3.2]

### 8.6.3 Advance Deposit Account and Annual Accounting Fee

A permit holder may choose to pay an annual accounting fee and establish an advance deposit account, which qualifies returned BRM pieces for the high-volume per piece fee. The accounting fee must be paid once each 12-month period at each post office where a permit holder holds an advance deposit account. Payment of the accounting fee is based on the anniversary date of the initial payment. The fee may be paid in advance only for the next 12-month period and only during the last 60 days of the current 12-month period. The fee charged is that which is in effect on the date of payment. A separate advance deposit account solely for BRM is not required. An advance deposit account can be used for BRM under these conditions:

- a. For each withdrawal, only one statement is provided for each annual accounting fee paid.
- b. If a permit holder distributes BRM with different addresses (including post office box numbers) under the same permit number going to the same delivery unit and has only one business reply account, then the BRM is separated by each different address but only one statement is provided and only one annual accounting fee is paid.
- c. The permit holder must pay an annual accounting fee for each separate statement (accounting) requested. If only one annual accounting fee is paid, then the permit holder receives only one statement.

507.8.6.4

- d. The permit holder must maintain a balance in the BRM advance deposit account that is sufficient to cover postage and per piece fees for returned mailpieces. The permit holder is notified if funds are insufficient. After 3 calendar days, if no funds are deposited, then BRM on hand is charged the basic BRM per piece fee and postage and charges are collected from the permit holder (e.g., in cash) prior to delivery.
- e. BRM addressed to several different firms at the same delivery unit may be delivered to an agent authorized by a valid BRM permit holder. The agent pays one annual accounting fee for all the firms represented by the agent in the same delivery unit. If the agent, or any of the firms represented by the agent, wants a separation of charges, then separate (additional) accounting fees must be paid. [S922.3.3]

#### **8.6.4 Renewal of Annual Accounting Fee**

An annual renewal notice is provided to each BRM permit holder with a BRM advance deposit account. The notice and the payment for the next 12 months must be returned by the expiration date to the post office that holds the advance deposit account. After the expiration date, if the permit holder has not paid the annual accounting fee but still has a valid BRM permit, returned BRM pieces no longer qualify for the high-volume BRM per piece fee and are charged the basic BRM per piece fee in [8.1.1](#). [S922.3.4]

#### **8.6.5 Combined Pieces as a Single Item**

Two or more BRM pieces may be mailed as a single piece if the BRM pieces are identically addressed and prepared for mailing in accordance with [201.1.0](#). The permit holder is charged postage based on the total weight of the combined piece plus one per piece fee. If the combined pieces become separated, then the permit holder must pay postage and a per piece fee for each individual piece. Combined pieces are not eligible for QBRM postage rates or per piece fees. [S922.3.5]

#### **8.6.6 With Postage Affixed**

BRM with postage affixed is handled the same as other BRM. No effort is made to identify or separate BRM pieces with postage affixed. The amount of affixed postage is not deducted from the postage or per piece fees owed. The permit holder may request a refund or credit for postage affixed to BRM under [604.10.2.10](#). [S922.3.6]

#### **8.6.7 Payment Options**

Permit holders may pay for postage and per piece fees on returned pieces by cash or check upon delivery, through a regular postage due account ([604.7.3](#)), or through a BRM advance deposit account. A regular postage due account does not qualify the permit holder for high-volume BRM per piece fees, and no annual accounting fee is charged to maintain the account. [S922.3.7]

### **8.7 Mailpiece Characteristics**

#### **8.7.1 Paper Weight**

BRM paper envelopes must have a minimum basis weight of 20 pounds (500 17-by 22-inch sheets). Other pieces (i.e., cards and self-mailers) must meet the basis weight requirements in [201.3.0](#). [S922.4.1]

### 8.7.2 Nonpaper Envelopes

USPS Engineering must approve nonpaper envelopes for mailability. See [201.3.0](#). [S922.4.2]

### 8.7.3 Envelope Reflectance

Envelope material must not have a red fluorescence exceeding 4.0 phosphor meter units. [S922.4.3]

### 8.7.4 Sealing and Edges

All BRM pieces must meet the general mailability standards in [601.1.0](#) through [601.7.0](#) and must have straight (90 degree) edges. BRM pieces are not mailable if they are sealed with wax, clasps, string, staples, or buttons. [S922.4.4]

### 8.7.5 Window Envelopes

The following standards apply to BRM prepared in an open-panel or a covered window envelope:

- a. Open panel window envelopes:
  1. The mailpiece must meet the applicable standards in [233.5.6, Address Standards for Barcoded Pieces](#), for letters or [333.5.5, Address Standards for Barcoded Pieces](#), for flats for address/window clearance, or [202.5.0, Barcode Placement](#), for letters or [302.4.0, Barcode Placement](#), for flats for barcode/window clearance for envelopes with an address window.
  2. The “No Postage Necessary” imprint, the business reply legend, horizontal bars, and the facing identification mark (FIM) (see [708.9.0](#)) must be printed directly on the envelope. Other required and optional elements in [8.8](#) may be printed on the insert appearing through the address window.
  3. The address showing through the window must be that of the permit holder or an authorized representative.
- b. Covered window envelopes:
  1. The “No Postage Necessary” imprint, the business reply legend, and the horizontal bars must be printed either directly on the envelope or on the insert appearing through the covered window. The minimum size of the information appearing in the covered window is 2 inches high and 4-1/4 inches long. The FIM must be printed on the envelope as specified in [708.9.0](#). A clear space of at least 1/8 inch is required between any BRM format requirement and the top, bottom, and side edges of the window, and must remain when the insert is moved to its full limits in each direction within the envelope.
  2. The window cover must be of a nontinted clear or transparent material (e.g., cellophane or polystyrene) that permits the barcode and its background, as viewed through the window material, to meet the reflectance standards in [708.4.3](#). The edges of the window cover must be securely glued to the envelope.
  3. The address on the insert showing through the window must be that of the permit holder or an authorized representative. [S922.4.5]

507.8.7.6

**8.7.6 Self-Mailers and Reusable Mailpieces**

In addition to the standards in [8.7](#) and [8.8](#), self-mailers and reusable mailpieces must meet the standards in [201.3.14](#) and [601.6.4](#). Permit holders must provide instructions to the user for re-folding and sealing (see [601.4.0](#)) so that upon return the piece meets sealing and folding requirements in [201.3.0](#). [S922.4.6]

**8.7.7 Cards**

Cards must meet the standards in [201.1.2](#). [S922.4.7]

**8.7.8 Labels**

For general use, the minimum size of a BRM label is 2 inches high and 3 inches long. BRM labels are not required to have a FIM or a ZIP+4 barcode, but all other format standards in [8.8](#) must be met. In cases where a BRM card or letter is used improperly as a label, the USPS treats the item as waste. See [8.7.9](#) for labels for letter-size pieces. [S922.4.8]

**8.7.9 Labels for Letter-Size Pieces**

The following standards apply to BRM labels for use on letter-size pieces:

- a. The minimum size of a BRM label is 2-5/8 inches high and 4-1/4 inches long. All format elements, including a FIM, must be printed on the label. BRM labels cannot include a barcode. *Exception:* The vertical series of horizontal bars must be at least 3/4-inch high. The back of the label must be coated with a permanent adhesive strong enough to firmly attach the label to an envelope.
- b. The permit holder must provide instructions to the user describing how the label should be applied to a mailpiece and what precautions must be observed when applying the label (see [Exhibit 8.7.9](#)). A pictorial diagram showing proper placement of the label must be included with the instructions. At a minimum, the instructions must include the following directions:
  1. Place the label squarely in the upper right corner of the envelope.
  2. Do not write on the envelope or label.
  3. Do not use a window envelope, an envelope that is less than 1 inch higher than the label an envelope that is more than 4-1/2 inches high, or an envelope with any printing other than a return address.
  4. Do not use tape to affix the label.
- c. When the label is affixed to an envelope, the address must be placed within the OCR read area (see [202.2.1](#)).
- d. Pieces with business reply labels cannot qualify for QBRM rates. [S922.4.9]

**Exhibit 8.7.9 Instructions for Affixing Business Reply Label**

How to use your business reply label:  
Affix label to upper right corner of envelope. Be sure the label is at the edge of the right corner. Do not use tape. Do not write on the envelope or use an envelope with printing other than a return address.

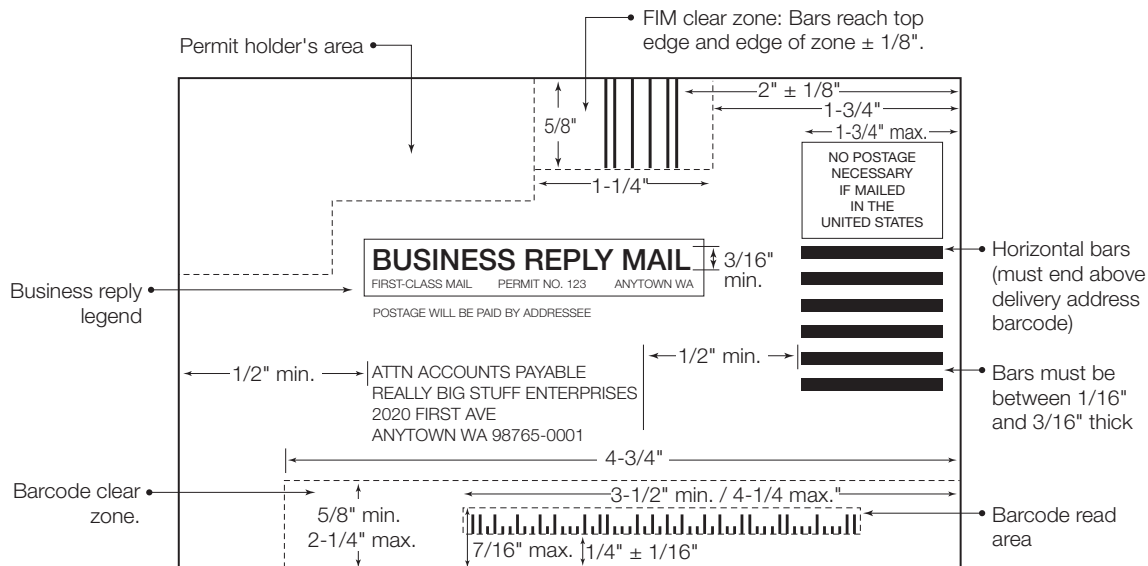

[Exhibit S922.4.9]

**8.8 Format Elements**

**8.8.1 General**

All pieces of BRM are subject to these format elements. Pieces of QBRM and bulk weight averaged nonletter-size BRM are subject to additional format standards listed in 8.10 and 8.12, respectively. BRM format elements are shown in Exhibit 8.8.1. [S922.5.1]

**Exhibit 8.8.1 Business Reply Mail Format**

[Exhibit S922.5.1]

**8.8.2 Printing and Print Reflectance**

All forms of printing are permissible if legible to the satisfaction of the USPS. Handwriting, typewriting, and handstamping may not be used to prepare BRM. Printed borders are not permitted on letter-size BRM, but are permitted on business reply labels and cartons and envelopes greater than 6-1/8 inches high or 11-1/2 inches long or 1/4 inch thick. All ink colors are acceptable if the piece meets the appropriate reflectance standards in 708.4.3. [S922.5.2]

**8.8.3 "No Postage Necessary" Imprint**

The imprint "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES" must be printed in the upper right corner of the address side of the piece. The imprint must not extend more than 1-3/4 inches from the right edge of the piece. [S922.5.3]

**8.8.4 Business Reply Legend**

The legend "BUSINESS REPLY MAIL" or "BUSINESS REPLY LABEL," as appropriate, must appear on all pieces. This legend must appear above the address in capital letters at least 3/16 inch high. At the permit holder's discretion, the business reply legend may be surrounded by a rule or border. [S922.5.4]

**8.8.5 Permit Number and Postage Endorsement**

Directly below the business reply legend, the words "FIRST-CLASS MAIL PERMIT NO. [NO., CITY, STATE]" (representing the permit holder's number and post office that issued the permit) must appear in capital letters. Directly below that, the endorsement "POSTAGE WILL BE PAID BY ADDRESSEE" must appear in capital letters. At the permit holder's discretion, the permit number and postage endorsement may be surrounded by a rule or border. [S922.5.5]

### 8.8.6 Delivery Address

The complete address (including the permit holder's name, delivery address, city, state, and BRM ZIP Code) must be printed directly on the piece, subject to these conditions:

- a. Preprinted labels with only delivery address information (including a ZIP+4 barcode under 8.9) are permitted, but the permit holder's name and other required elements must be printed directly on the BRM piece.
- b. On letter-size pieces, the complete delivery address must appear within the OCR read area (see 202.2.1).
- c. There must be at least a 1/2-inch clearance between the ZIP Code and the horizontal bars.
- d. A unique ZIP Code (i.e., firm ZIP Code) must not be used for BRM unless the ZIP Code has been assigned specifically for BRM. A unique 4-digit add-on to denote BRM may not be used with a unique 5-digit ZIP Code not specifically assigned to BRM. [S922.5.6]

### 8.8.7 Horizontal Bars

A vertical series of horizontal bars parallel to the length of the piece must be printed directly below the imprint "NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES." The bars must be uniform in length, at least 1 inch long and 1/16 inch to 3/16 inch thick, and evenly spaced. On letter-size nonbarcoded BRM, the bars must not extend below the delivery address line (the line above the line containing the ZIP Code). On barcoded BRM, the bars must not extend lower than 5/8 inch from the bottom edge of the piece. [S922.5.7]

### 8.8.8 Facing Identification Mark (FIM)

A FIM must be printed on all letter-size BRM and on business reply labels affixed to letter-size mail (see 8.7.9). FIM B must be used with BRM without a barcode. FIM C must be used with any BRM printed with a barcode. The FIM must meet the physical standards in 708.9.0. [S922.5.8]

### 8.8.9 Company Logo

A company logo is permitted:

- a. On nonbarcoded BRM, if it is placed outside the OCR read area (see 202.2.1).
- b. On letter-size barcoded BRM, if it is placed no lower than 5/8 inch from the bottom edge of the piece.
- c. On any piece, if the logo does not interfere with any required format elements. [S922.5.9]

## 8.9 Additional Standards for Letter-Size Barcoded BRM

In addition to the format standards in 8.8, letter-size BRM enclosed in automation rate mailings and all QBRM must be ZIP+4 barcoded. Other BRM may be barcoded at the permit holder's option. Barcoded BRM must meet the barcode standards in 708.4.0, the envelope basis weight standards in 8.7.1, all other mailpiece design standards in 201.3.0 (including thickness), and these standards:

- a. Permit holders must use the ZIP+4 codes and equivalent barcodes assigned by the USPS. Delivery point barcodes are not permitted on BRM.

507.8.10

- b. The ZIP+4 barcode must be placed on the address side of the piece and positioned in either of these two locations:
  1. As part of the delivery address block under [202.5.7, Barcode in Address Block](#), if printed on an insert appearing through a window envelope or on an address label affixed directly to the piece.
  2. Within the barcode clear zone in the lower right corner of the piece if printed directly on the piece. [S922.6.0]

## **8.10 Additional Standards for Qualified Business Reply Mail (QBRM)**

### **8.10.1 Description**

Qualified business reply mail (QBRM) is a subset of business reply mail. Permit holders distribute automation-compatible letter-size pieces that qualify for automation postage rates and reduced per piece fees. QBRM postage and per piece fees must be deducted from a BRM advance deposit account. [S922.7.1]

### **8.10.2 Eligibility**

To qualify for QBRM, pieces must meet the eligibility requirements in [8.3](#). [S922.7.2]

### **8.10.3 Authorization**

BRM permit holders must apply for authorization to participate in QBRM under [8.3](#). [S922.7.3]

### **8.10.4 Postage**

Each piece of returned QBRM is charged the automation postage rate for QBRM pieces in [8.2](#). Pieces that do not meet the format requirements for QBRM cannot qualify for automation postage rates and are charged First-Class Mail postage according to [8.6.1, Postage](#). [S922.7.4]

### **8.10.5 Per Piece Fees**

Per piece fees listed in [8.1.3](#) are charged for each piece of returned QBRM (in addition to postage in [8.10.4](#)). Pieces that do not meet the format requirements for QBRM cannot qualify for QBRM per piece fees and are charged the high-volume BRM per piece fees in [8.1.2](#). [S922.7.5]

### **8.10.6 Annual Accounting Fee and Advance Deposit Account**

Permit holders are required to pay QBRM postage and per piece fees through a BRM advance deposit account, which requires payment of an annual accounting fee (see [8.6.3](#)). [S922.7.6]

### **8.10.7 Quarterly Fee for High-Volume QBRM**

Mailers may choose to pay a quarterly fee in addition to the annual accounting fee. Payment of the quarterly fee entitles mailers to a lower per piece fee (the high-volume QBRM per piece fee listed in [8.1.4](#)). The quarterly fee and annual accounting fee must be paid at each post office where mail is returned and for each separate billing desired. Mailers are eligible for the high-volume QBRM rates and per piece fees only for the time they pay the quarterly fee (i.e., mailers can opt out of the quarterly fee and related high-volume QBRM per piece fees simply by not paying the fee for the next quarter). The quarterly fee cannot be paid or renewed

retroactively to receive a lower per piece fee on pieces already paid for and delivered. The quarterly fee can be paid for any three consecutive calendar months. [S922.7.7]

**8.10.8 Payment Period for Quarterly Fee**

The quarterly fee must be paid in advance for at least one but no more than four quarterly periods. A quarterly period begins on either the first day of the month (if a mailer pays on or before the 15th of the month) or the first day of the following month (if a mailer pays after the 15th of the month) and continues for three consecutive calendar months. A mailer who pays the quarterly fee is entitled to the high-volume QBRM per piece fee from the date of payment through the end of the quarterly period. The fee paid is that which is in effect on the date of payment. [S922.7.8]

**8.11 BRM Distributed and Received by Agents of a Permit Holder**

**8.11.1 Description**

Permit holders may give permission to subsidiary offices, agents, or authorized representatives to distribute and receive BRM using a single (corporate) permit number. BRM pieces are distributed by and returned to agents, who pay postage and per piece fees on those returned pieces. Agents may use any type of BRM service. [S922.8.1]

**8.11.2 Permit**

The main permit holder or “corporate” office applies for the permit number and pays the permit fee. The agent must present a letter of authorization from the permit holder showing the name, address, and telephone number of the local agent authorized to receive the BRM to the post office where the BRM is to be returned. Any time there is a change to the original permit application or the authorization letter, each agent must provide an amended letter of authorization to their local post office. [S922.8.2]

**8.11.3 Annual Permit Fee**

The annual permit fee must be paid by the permit holder (8.6.3). Agents do not pay a separate annual permit fee but must submit evidence (usually a copy of Form 3544) to the local office once each 12-month period to show that the annual permit fee has been paid. This evidence is not required if the permit holder has a centralized account processing system (CAPS) account through which the local post office can determine that the permit fee has been paid. [S922.8.3]

**8.11.4 Postage, Per Piece Fees, and Annual Accounting Fees**

Agents receiving BRM or QBRM pay the postage, per piece fees, and annual accounting fees listed in 8.1 for the type of service received. The agent may choose to pay an annual accounting fee and establish a BRM advance deposit account. The agent receiving BRM is responsible for paying all postage and per piece fees. [S922.8.4]

**8.11.5 Payment Guarantee**

The permit holder is ultimately responsible for postage and per piece fees for all pieces returned under that permit number. If a local agent refuses or neglects to pay postage or per piece fees on returned pieces, then those pieces are forwarded to

507.8.11.6

the post office that issued the original permit for collection of postage and per piece fees from the permit holder. Once forwarded to the permit holder, these pieces cannot qualify for QBRM postage and per piece fees. The permit holder's refusal to accept and pay the required postage and per piece fees for BRM offered for delivery is grounds for immediate revocation of the BRM permit (8.5.6). [S922.8.5]

#### **8.11.6 Format**

BRM distributed by agents must meet all required format standards in 8.7 and 8.8. Authorized representatives distributing BRM on behalf of a permit holder must have the permit holder's name and permit number printed on the BRM and their own names and addresses printed below the permit holder's name, except:

- a. When the agent is a branch of an authorized business.
- b. The permit holder notifies a post office that authorized representatives may use the permit holder's permit number without printing the permit holder's name.

[S922.8.6]

### **8.12 Bulk Weight Averaged Nonletter-size BRM**

#### **8.12.1 Description**

Bulk weight averaging is a method of counting, rating, and billing incoming nonletter-size BRM based on principles of mathematical statistics. Probability sampling techniques are used to measure the characteristics of the total BRM volume by examining a fraction of the volume. Statistically valid samples that are drawn from the incoming BRM volume each postal accounting period are used by post offices to compute average postage due per pound and average piece count per pound factors. The net bulk weight of mail received is multiplied by these conversion factors to get the estimated volume received and postage and fee amounts. [S922.9.1]

#### **8.12.2 Eligibility**

BRM pieces rated by the weight averaging method must:

- a. Meet the basic standards for BRM in 8.0.
- b. Not be letter-size (201.1.0) or card-size (201.1.2).
- c. Not exceed 5 pounds. [S922.9.2]

#### **8.12.3 Postage, Per Piece Fees, and Other Fees**

Returned pieces of bulk weight averaged nonletter-size BRM are charged postage and per piece fees according to 8.1.5. Permit holders participating in bulk weight averaged nonletter-size BRM must pay an annual accounting fee (see 8.6.3) and a monthly maintenance fee (8.3). [S922.9.3]

#### **8.12.4 Application Procedures**

A permit holder who wants to use bulk weight averaged BRM for nonletter-size pieces must submit a written request to the postmaster of the office where the BRM permit is held. The postmaster forwards this information to the manager, Customer Service Support, USPS Headquarters (see 608.8.0 for address). The request must include the following information:

- a. Permit holder's name and address.

- b. Name and location of the post office at which BRM will be received and a CAPS account number, if available.
- c. Information about the number of pieces expected to be returned over a 24-hour period and a 30-day period, and a breakdown of the weight distribution of those pieces (in nearest ounces or pounds) (e.g., X number of 3-ounce pieces, Y number of 4-ounce pieces, and Z number of 5-ounce pieces).
- d. Based on the estimated volume in 8.12.4c, a 24-hour estimate and a 30-day estimate of postage and per piece fees using the postage and charges listed in 8.1.5, *Bulk Weight Averaged Nonletter-Size BRM*.
- e. A statement indicating whether the piece volume has seasonal variation and, if applicable, estimates of monthly volumes for a 12-month period. [S922.9.4]

#### 8.12.5 Authorization

The permit holder's request will be reviewed and approved by the manager, Customer Service Support, USPS Headquarters. If the request is approved, then a letter of authorization is sent to the permit holder from the post office where the BRM permit is held. The permit holder signs a service agreement and, if necessary, is assigned a post office box address. [S922.9.5]

#### 8.12.6 Denial of Authorization

If the permit holder's request is not approved, then the post office sends a written notice, giving reasons for the denial. The permit holder has 15 days following receipt of the notice to file a written appeal of the decision with the postmaster and to furnish further information. If the postmaster still finds that the application should be denied, then the postmaster forwards the file to the manager, Customer Service Support, USPS Headquarters, who issues a final written decision to the permit holder. [S922.9.6]

#### 8.12.7 Revoking Authorization

To revoke authorization for bulk weight averaging, the postmaster sends written notice to the permit holder. A postmaster may terminate authorization for bulk weight averaged BRM for any of the following reasons:

- a. The permit holder provided incorrect or incomplete information on the request for authorization.
- b. The permit holder's BRM pieces no longer meet the eligibility requirements in 8.0.
- c. The USPS finds that bulk weight averaging no longer provides adequate revenue protection.
- d. The permit holder no longer desires to participate in bulk weight averaging. [S922.9.7]

#### 8.12.8 Notice and Appeal

Termination takes effect 15 days from the permit holder's receipt of the notice unless the permit holder files a written appeal within that period with the postmaster. The postmaster forwards the permit holder's appeal together with all pertinent information to the manager, Customer Service Support, USPS Headquarters, who

507.9.1

issues a final agency decision to the permit holder. The permit holder may continue to use the bulk weight averaging method until a final decision is made on the appeal. [S922.9.8]

## 9.0 Merchandise Return Service

### 9.1 Merchandise Return Service Fees

#### 9.1.1 Permit Fee

Annual permit fee: \$150.00. [R900.14.1]

#### 9.1.2 Accounting Fee

Annual accounting fee (for advance deposit account): \$475.00. [R900.14.2]

### 9.2 Basic Information

#### 9.2.1 Description

Merchandise return service allows an authorized permit holder to pay the postage and extra service fees on single-piece rate First-Class Mail, Priority Mail, and Package Services parcels that are returned to the permit holder by the permit holder's customers via a special label produced by the permit holder. [S923.1.1]

#### 9.2.2 Availability

Merchandise return service is available to the permit holder for mailing to the postage due unit at any post office where authorized by an approved application. [S923.1.2]

#### 9.2.3 Payment Guarantee

The permit holder guarantees payment of the proper postage and extra service fees (except for insurance purchased by the sender) on all parcels returned via a special label produced by the permit holder. [S923.1.3]

#### 9.2.4 Where Service Established

Merchandise return service may be established at any post office in the United States and its territories and possessions or at any U.S. military post office overseas (APO/FPO). It is not available for any foreign country. [S923.1.4]

#### 9.2.5 Distribution

Merchandise return service labels may be distributed to customers as an enclosure with merchandise, as a separate item, as part of a double postcard (see 9.6.4), as a facsimile transmission (fax), as an electronic transmission for customer downloading and printing, or through one of the permit holder's designated pickup facilities. Any such label distributed to a customer must meet the format standards in 9.6, including the requirement to furnish instructions. [S923.1.5]

#### 9.2.6 Official Mail

Any authorized user of official (penalty) mail may use merchandise return service subject to the standards in 703.7.0, which supersede conflicting standards below. [S923.1.6]

### 9.2.7 Customer Mailing Options

The permit holder's customers must mail the parcel within the service area of the post office shown in the return address on the label by depositing it at the main post office or any associated office, station, or branch; in any collection box (except an Express Mail box); with any rural carrier; on business routes during regular mail delivery if prior arrangements are made with the carrier; as part of a collection run for other mail (special arrangements might be required); or at any place designated by the postmaster for the receipt of mail. Parcels requiring insurance, Registered Mail, return receipt for merchandise, special handling, or mailing acknowledgement must be mailed either with the rural carrier or at the main post office or any associated office, station, or branch. Any such parcels deposited in collection boxes are returned to the sender or, if there is no return address, treated as undeliverable mail. [S923.1.7]

### 9.2.8 Priority Mail Reshipment

An authorized permit holder may use merchandise return service to have mail (previously sent at First-Class Mail and Package Services rates to designated post office box addresses) reshipped by Priority Mail to the post office where the permit is held. The permit holder must make a written request for reshipment and send the request to the postmaster where the merchandise return permit is authorized, specifying how often the reshipments are to be made from each affected postal facility. Reshipment is activated by the use of tags provided by the permit holder to those designated postal facilities that the permit holder authorizes to reship the mail by Priority Mail. [S923.1.8]

### 9.2.9 Reshipment Restrictions

Reshipment is not available for articles with any extra service (503.2.0). The customer must arrange to have mail with extra services redirected to an address shown in block 17 of Form 1093. [S923.1.9]

### 9.2.10 Labels and Tags

The label or tag used for merchandise return service must have the delivery address of the postage due unit at the post office where the permit is held, the permit holder's address, a space for the customer's return address, and otherwise meet the format standards in 9.6. If sacks are used as mail containers for Priority Mail reshipment, the permit holder must provide a tag containing this information to each affected postal facility. [S923.1.10]

### 9.2.11 Mailer Markings and Endorsements

It is recommended but not required that permit holders preprint a rate marking on the merchandise return service labels they distribute. Preprinting a rate marking guarantees that returned parcels will be given service and charged postage according to the wishes of the permit holder. Regardless of weight, all unmarked parcels will be treated as Parcel Post and charged Parcel Post rates. [S923.1.11]

## 9.3 Permits

### 9.3.1 Application Process

The applicant must submit a completed Form 3615 and the annual permit fee to the post office issuing the permit. If the applicant already has a completed Form 3615 on file at that office, the form may be amended by adding the merchandise return

## 507.9.3.2

service authorization to existing permit authorizations. Except for MRS labels generated by the USPS Application Program Interface (API), the Form 3615 must be accompanied by copies of the MRS labels (including printed copies of labels intended to be faxed to customers or transmitted to customers electronically) and the instructions provided to the permit holder's customers. All MRS labels that have preprinted Delivery Confirmation barcodes must be approved by the Postal Service (503.9.0). If articles are to be returned from customers as Registered Mail, the applicant must write "Registered Mail" on the application. After a permit is obtained, any change to label formats or customer instructions must be approved by the post office where the permit is held. The permit is valid for 12 months after the approval date of the application. [S923.2.1]

**9.3.2 Procedure**

An approved merchandise return permit on Form 3615 must be on file at every post office to which parcels are returned. A permit holder with several return points may set up a centralized advance deposit account at the post office where the permit is approved (requiring payment of a single annual permit fee). [S923.2.2]

**9.3.3 Multiple Accounts**

When an advance deposit account is kept at each entry location, a separate permit is needed and the annual merchandise return service permit and annual accounting fees must be paid at each post office. [S923.2.3]

**9.3.4 Annual Fee**

To renew the permit, the permit holder must send the annual fee to the issuing post office by the expiration date of the permit or authorize the postmaster to deduct the fee from the advance deposit account. Written authorization is not needed for permit renewal if there is no change to the authorization on file at the delivery unit. [S923.2.5]

**9.3.5 Nonrenewed Permit**

If the permit is not renewed, merchandise return mail is returned to the sender if a return address is provided. Merchandise return mail that does not contain the sender's return address is treated as dead mail. [S923.2.6]

**9.3.6 Permit Cancellation**

The USPS may cancel a permit if the permit holder refuses to accept and pay postage and fees on merchandise return service parcels, fails to keep sufficient funds in the advance deposit account to cover postage and fees, or distributes merchandise return labels or tags that do not meet USPS standards. [S923.2.7]

**9.3.7 Reapplying After Cancellation**

To receive a new permit at the same post office after a merchandise return permit is canceled, the applicant must amend the Form 3615 on file at that office to reflect the new application date; pay a new permit fee; submit for approval two samples of any label format to be used; provide evidence that the reasons for the permit cancellation are corrected; and provide and keep funds in an advance deposit account to cover normal returns for at least 2 weeks. [S923.2.8]

**9.3.8 Using Other Post Offices**

A permit holder may distribute merchandise return labels for return through other post offices without paying an additional permit fee if the permit holder opens and keeps a centralized advance deposit account at the post office where the permit is issued and supplies the postmaster of the post office where the application is submitted the name, address, and telephone number of a representative in each additional location if different from the information on the application. [S923.2.9]

**9.4 Postage and Fees**

**9.4.1 Postage**

Merchandise return service parcels are charged single-piece rate postage and extra service fees based on the class or subclass marking on the label. If a parcel is unmarked, then it is charged Parcel Post rates. If the postage for the returned parcel is zoned and there is no way to determine its zone of origin (i.e., no postmark or return address), then postage is calculated at zone 4 (for Priority Mail) or zone 4 Inter-BMC/ASF rates (for Parcel Post). Postage is deducted from an advance deposit account. [S923.3.1]

**9.4.2 Per Piece Fee**

There is no per piece fee for returned parcels. [S923.3.2]

**9.4.3 Annual Permit Fee**

An annual permit fee must be paid once each 12-month period at each post office where an MRS permit is held. Payment of the annual permit fee is based on the anniversary date of the permit's issuance. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [S923.3.3]

**9.4.4 Advance Deposit Account and Annual Accounting Fee**

The permit holder must pay postage and extra service fees through an advance deposit account and must pay an annual accounting fee (see 9.1). The accounting fee is charged once each 12-month period on the anniversary date of the initial accounting fee payment. The fee may be paid in advance only for the next year and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. A separate advance deposit account for MRS is not required; the annual accounting fee is charged if MRS postage and fees are paid from an existing account:

- a. For each withdrawal, only one statement is provided for each annual accounting fee paid.
- b. The permit holder must pay an annual accounting fee for each separate statement (accounting) requested. If only one annual account fee is paid, then the permit holder receives only one statement. [S923.3.4]

**9.4.5 Existing Advance Deposit Account**

A separate advance deposit account for MRS is not required; the annual accounting fee is charged if MRS postage and fees are paid from an existing account. [S923.3.5]

## 9.5 Additional Features

### 9.5.1 Insurance Indicated by Permit Holder

The permit holder may obtain insured mail service with MRS. Only Package Services matter (i.e., matter not required to be mailed at First-Class Mail rates under [133.3.0, Content Standards](#)) may be insured. Insured mail may be combined with Delivery Confirmation and special handling, or both. To request insured mail service, the permit holder must preprint or rubber-stamp “Insurance Desired by Permit Holder for \$\_\_\_\_\_ (value)” to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. The value part of the endorsement, showing the dollar amount of insurance for the article, may be handwritten by the permit holder. If insurance is paid for by the MRS permit holder, then only the MRS permit holder may file a claim ([609](#)). [S923.4.1]

### 9.5.2 Insurance Added by Sender

If the permit holder has not indicated insured mail service on the MRS label, then the sender has the option of adding insurance and paying the applicable insured fee. If insurance is paid by the sender, then only the sender may file a claim ([609](#)). The permit holder pays postage upon receipt, but does not pay the insured fee when insurance is added by the sender. [S923.4.2]

### 9.5.3 Insured Markings

The permit holder must either leave a clear space on the merchandise return label to the right of the return address for the numbered insured label or insured elliptical stamp, or instruct the customer to affix the merchandise return label to the article so that the USPS acceptance employee can place the insured label or marking on the article directly above the merchandise return label. [S923.4.3]

### 9.5.4 Registered Mail

A permit holder:

- a. May obtain Registered Mail service with MRS. The customer using an MRS label to return an article that does not have the appropriate postage due computation markings in [9.6.6](#) or the endorsement specified in [9.5.5](#) cannot add Registered Mail service. The customer using the MRS label must declare the full value of the article to be registered when presented at the post office. Registered Mail service may be obtained only on articles returned at First-Class Mail or Priority Mail rates and may not be combined with any other extra service. [S923.4.4]
- b. Wanting to add Registered Mail service under an existing permit must submit a written request to the post office where the permit is held, with samples of the merchandise return labels and a copy of the instructions to be provided to the permit holder’s customers. The permit holder must not distribute labels that request Registered Mail service before receiving USPS written approval. [S923.2.4]

### 9.5.5 Registered Mail Endorsement

To request Registered Mail service, the permit holder must preprint or rubber-stamp “Registered Mail Service without Postal Insurance Desired by Permit Holder” or “Registered Mail Service with Postal Insurance Desired by Permit Holder,” as

applicable, to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. The First-Class or Priority Mail marking must also be preprinted or hand-stamped on the labels. [S923.4.5]

**9.5.6 Placement of Registered Mail Label**

The permit holder must either leave a clear space on the merchandise return label to the right of the return address for the placement of Label 200 or instruct the customer to affix the merchandise return label to the article so that the USPS acceptance employee can place the Registered Mail label on the article directly above the merchandise return label. [S923.4.6]

**9.5.7 Delivery Confirmation**

The permit holder may obtain Delivery Confirmation service with MRS. The customer using a MRS label to return an article that does not have the appropriate postage due computation markings in 9.6 cannot add Delivery Confirmation service. If the permit holder chooses to preprint the Delivery Confirmation barcode on labels, then those labels must be approved by the USPS. MRS labels with Delivery Confirmation barcodes must meet the standards in 503.9.0 as shown in Exhibit 9.6.6d. Delivery Confirmation may be combined with insurance and special handling, or both. Delivery Confirmation is always charged at the retail rate (503.9.1). [S923.4.7]

**9.5.8 Return Receipt for Merchandise**

The permit holder may obtain return receipt for merchandise (503.6.0) with MRS. The customer returning an article using an MRS label receives return receipt for merchandise service only if the label has the appropriate postage due computation markings in 9.6, *Format*. [S923.4.8]

**9.5.9 Placement of Return Receipt for Merchandise Label**

The permit holder must either leave a clear space on the MRS label to the right of the return address for the placement of Label 3804 or instruct the customer to affix the MRS label to the article so that the USPS acceptance employee can place Label 3804 on the article directly above the MRS label. [S923.4.9]

**9.5.10 Special Handling**

The permit holder may obtain special handling service with MRS. The customer using an MRS label to return an article that does not have the appropriate postage due computation markings in 9.6 or the endorsement specified in 9.5.11 may not obtain special handling service. [S923.4.10]

**9.5.11 Special Handling Endorsement**

To request special handling, the permit holder must preprint or rubber-stamp “Special Handling Desired by Permit Holder” to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. [S923.4.11]

**9.5.12 Special Handling Label**

The permit holder must provide “Special Handling” labels with instructions to customers about their placement on the parcel, leave a clear space on the merchandise return label to the right of the return address for the placement of the “Special Handling” marking, or instruct the customer to affix the merchandise return

507.9.5.13

label to the article so that the USPS acceptance employee can place the “Special Handling” marking on the article directly above the merchandise return label.

[S923.4.12]

#### **9.5.13 Certificate of Mailing**

A customer mailing merchandise return service articles may obtain a certificate of mailing at the customer’s own expense at the time of mailing by presenting the certificate at a post office to obtain the receipt. [S923.4.13]

#### **9.5.14 Mailing Acknowledgment**

The permit holder may allow a customer to obtain a mailing acknowledgment if the permit holder prepares a detachable mailing acknowledgment form, subject to these conditions:

- a. The acknowledgment establishes no USPS liability for the parcel if damaged, lost, or stolen.
- b. The acknowledgment provides documentation for account management between the mailing customer and the permit holder. The USPS charges no fee, keeps no records, and does not provide copies of or further information about the acknowledgment.
- c. A merchandise return service parcel containing the detachable mailing acknowledgment form must be presented to the USPS acceptance employee at the time of mailing to be executed.
- d. Each mailing acknowledgment part of the label must include a unique parcel identification number assigned by the permit holder; the return address of the customer mailing the parcel, in the upper part of the detachable form; the permit holder’s address, in the lower part of the form; an initials section in the acknowledgment portion for use by the USPS acceptance employee; and space in the acknowledgment part where the USPS acceptance employee places the date stamp. [S923.4.14]

#### **9.5.15 Pickup Service**

The permit holder may obtain pickup service with MRS. Pickup service may be combined with Certified Mail (Priority Mail only), Delivery Confirmation, and special handling. Customers may request pickup service at their own expense for MRS items that do not have “Pickup Service Fee” specified on the label (5.0). [S923.4.15]
