Any photographic, mechanical, or electronic process or any combination of such processes other than typewriting or handwriting may be used to prepare the MRS label or tag and detachable acknowledgment form. The background may be any light color that allows the address, postmark, and other endorsements to be readily discerned. Brilliant colors may not be used for the background. If labels are faxed to customers or electronically transmitted to customers for their local printing, the permit holder must advise customers of these preparation requirements as part of the instructions required by 9.6.5. All MRS labels that include Delivery Confirmation barcodes must be certified for use by the USPS prior to distribution. Labels with Delivery Confirmation barcodes cannot be faxed to customers. [S923.5.1]

**9.6.2 Labeling Methods**

If all applicable content and format standards are met (including the written instructions required by 9.6.5), a merchandise return service label may be produced by any of the following methods:

- a. As an impression printed by the permit holder directly onto the mailpiece to be returned.
- b. As a separate label preprinted by the permit holder for affixing by the customer onto the mailpiece to be returned. The reverse side of the label must bear an adhesive strong enough to bond the label securely to the mailpiece.
- c. As a facsimile transmission (fax) of a preprinted label sent by the permit holder to the customer. The facsimile transmission must include instructions that explain how to affix the label securely to the mailpiece to be returned and that caution against covering with tape or other material any part of the label where postage and fee information is to be recorded.
- d. As an electronic file created by the permit holder for local output and printing by the customer. The electronic file must include instructions that explain how to affix the label securely to the mailpiece to be returned and that caution against covering with tape or other material any part of the label where postage and fee information is to be recorded. [S923.5.2]

**9.6.3 Acknowledgment Form**

If the permit holder includes a mailing acknowledgment as described in 9.5.14, that acknowledgment must not bear adhesive but must be attached to the label and perforated or designed for easy separation at the time of mailing. [S923.5.3]

**9.6.4 Double Postcard**

The permit holder may distribute labels using a double postcard subject to 201.1.2.8 and the approval of the PCSC. [S923.5.4]

**9.6.5 Instructions**

Written instructions must be provided with the label that, at a minimum, direct the customer:

- a. To affix the label squarely onto the address side of the parcel, covering up any previous delivery address and barcode without overlapping any adjacent side. If tape or similar material is used, it must not cover any part of the label where postage and fee information is to be recorded.
- b. To obliterate any other addresses and barcodes on the outside of the parcel.
- c. To take the parcel to a post office, drop it in a collection box, or give it to a postal carrier. If insurance, return receipt for merchandise, or special handling is marked on the label, the parcel must be taken to a post office. [S923.5.5]

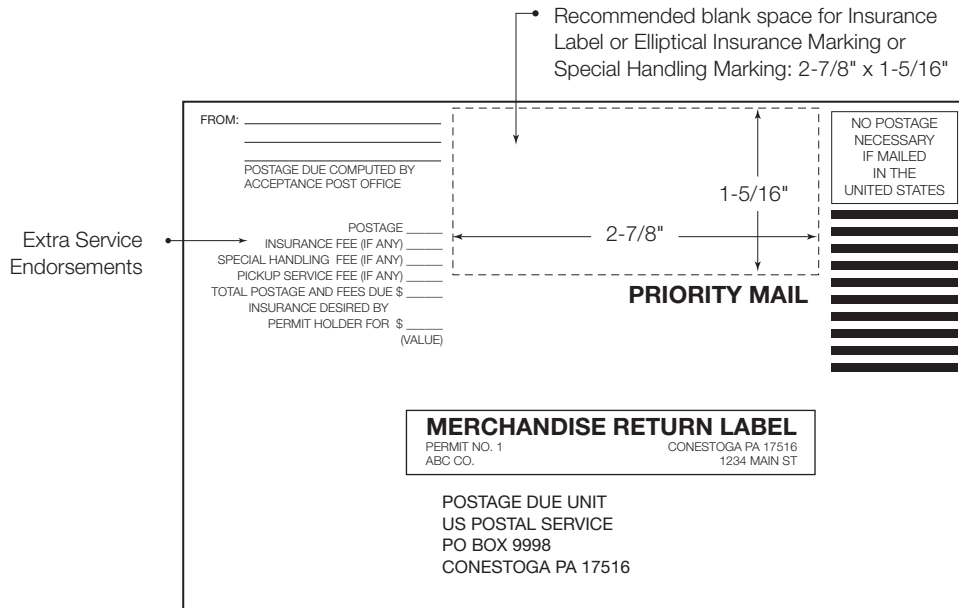

507.9.6.6

**9.6.6 Format Elements**

Format standards required for the merchandise return label are shown in [Exhibit 9.6.6a](#) through [Exhibit 9.6.6d](#), and described as follows:

- a. Postage Guarantee. The endorsement “No Postage Necessary if Mailed in the United States” must be printed in the upper right corner on the face of the label. The left edge of the endorsement must not extend more than 1-3/4 inches from the right edge of the label.

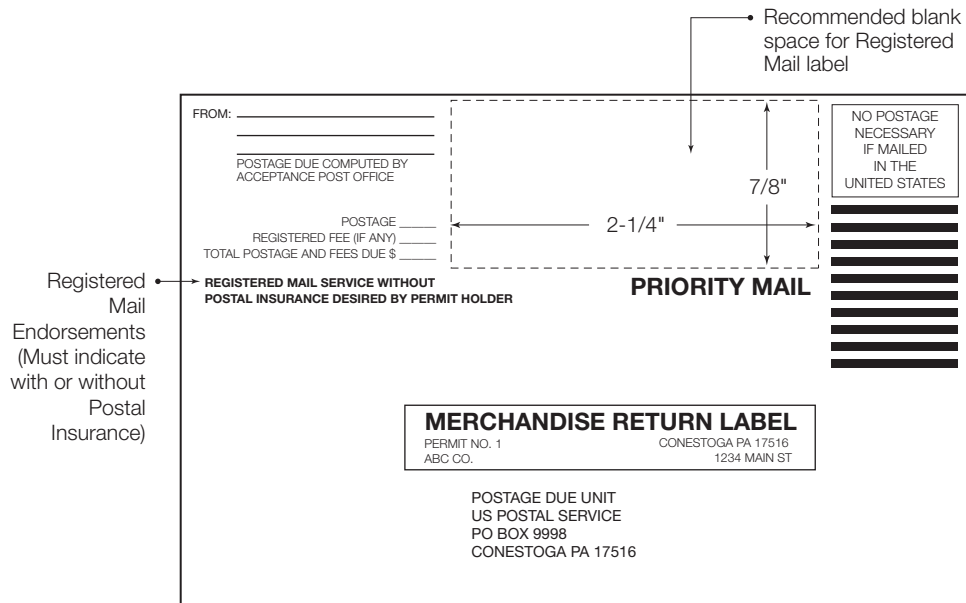

**Exhibit 9.6.6a Merchandise Return Label With No Extra Services or With Insurance, Special Handling, or Pickup Service (\*see 9.6.6d)**

[Exhibit S923.5.6a]

- b. "Merchandise Return Label" Rectangle. The "Merchandise Return Label" rectangle must be placed above the return delivery address and must enclose these lines:
1. Line 1: The words "MERCHANDISE RETURN LABEL" (the "Merchandise Return Label" legend) must be shown in capital letters at least 3/16 inch high.
  2. Line 2: The words "PERMIT NUMBER" or "PERMIT NO.," followed by the permit number, and the name of the issuing post office (city and state), followed by the ZIP Code, must be shown in capital letters.
  3. Line 3: The name and delivery address (street or post office box number) of the permit holder at that post office must be placed directly below the permit number line. Alternatively, a permit holder may use a name other than the permit holder's own name on this line if a written notification of the change is provided to the issuing post office. A separate permit or fee is not required for using this alternative name.

**Exhibit 9.6.6b Merchandise Return Label With Registered Mail Service**

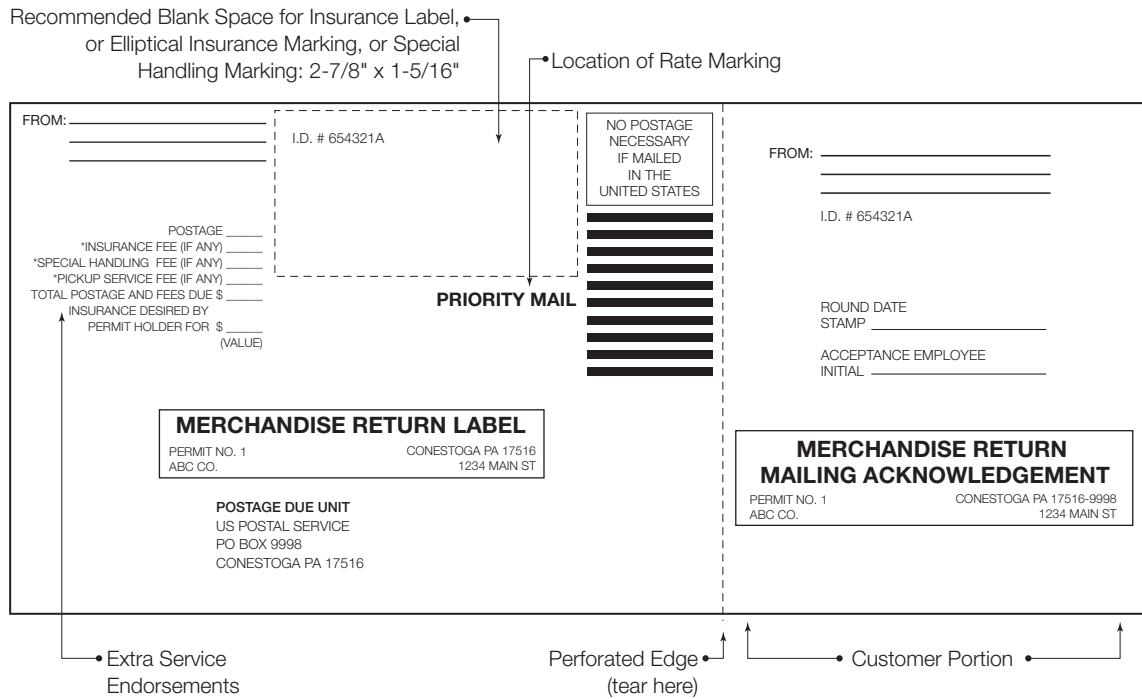

[Exhibit S923.5.6b]

507.9.6.6

- c. Rate Marking. If a rate marking is used, it must be placed in the space to the right and above the "Merchandise Return Label" legend. The marking must be at least 3/16 inch high and printed or rubber-stamped. Only the permit holder may apply this marking.

**Exhibit 9.6.6c Merchandise Return Label With Mailing Acknowledgment (\*see 9.6.6d)**

[Exhibit S923.5.6c]

- d. Extra Services Except Registry. If no extra service is requested, or if extra services other than registry service are requested, the applicable entries below must be shown in capital letters above the "Merchandise Return Label" legend rectangle and to the left of the space reserved for any class marking:
  - 1. If no extra service is requested, "POSTAGE DUE COMPUTED BY DELIVERY UNIT" must appear; if any available extra service other than registry is requested, "POSTAGE DUE COMPUTED BY ACCEPTANCE POST OFFICE" must appear.
  - 2. As marked with an asterisk below, insurance, special handling, Delivery Confirmation, return receipt for merchandise, and pickup service fee entries may not appear if the permit holder does not choose the corresponding service(s). As appropriate, these postage and fee markings must appear:

- e. Registry Service. If registry service is requested, the appropriate class marking must appear for First-Class Mail (“First-Class” or “First-Class Mail”) or Priority Mail (“Priority” or “Priority Mail”). In addition, the following applicable endorsements must appear in capital letters above the “Merchandise Return Label” legend rectangle and to the left of the space reserved for the class marking:
1. “ACCEPTANCE POST OFFICE COMPUTE POSTAGE DUE.”
  2. The following postage and fee entries:  

|                               |  |
|-------------------------------|--|
| POSTAGE                       |  |
| REGISTERED FEE                |  |
| TOTAL POSTAGE AND FEES DUE \$ |  |
  3. The appropriate insurance endorsement, below the “TOTAL POSTAGE AND FEES DUE” entry: if matter returned has value (\$0.01 or greater), “REGISTERED MAIL SERVICE WITH POSTAL INSURANCE DESIRED BY PERMIT HOLDER”; if matter returned has no value (\$0.00), “REGISTERED MAIL SERVICE WITHOUT POSTAL INSURANCE DESIRED BY PERMIT HOLDER.”
- f. Customer’s Return Address. The return address of the customer mailing the article back to the permit holder must be shown in the upper left corner. Space must be provided for the customer’s return address if it is not preprinted by the permit holder.
- g. Delivery Address. The lines “POSTAGE DUE UNIT” and “US POSTAL SERVICE,” followed by the delivery address line and by the city, state, and ZIP Code line of the postage due unit at the post office where the permit is authorized, must be printed on the front of the mailpiece, at least 1 inch from the left edge of the piece, in capital letters at least 1/8 inch high.
- h. Horizontal Bars. Horizontal bars must be placed on the label below the postage endorsement that appears in the upper right corner. The bars must be uniform in length, at least 1 inch long, 1/16 inch thick, and evenly spaced. The vertical column of horizontal bars must not extend below the delivery address line, which is the line above the line containing the ZIP Code. A facing identification mark (FIM) must not be used on this label.
- i. Additional information. Additional information (e.g., company logo, return authorization number, inventory barcode) is permitted if it does not interfere with any required format elements. Inventory barcodes must not resemble the barcodes described in [402.4.0](#). [S923.5.6]

## 10.0 Bulk Parcel Return Service

### 10.1 Bulk Parcel Return Service (BPRS) Fees

#### 10.1.1 Permit Fee

Annual permit fee: \$150.00. [R900.3.1]

#### 10.1.2 Accounting Fee

Annual accounting fee: \$475.00. [R900.3.2]

#### 10.1.3 Per Piece Charge

For each piece returned, regardless of weight: \$1.80. [R900.3.3]

### 10.2 Charges and Fees

#### 10.2.1 Permit Fee

An annual permit fee must be paid once each 12-month period at each post office where a BPRS permit is held. Payment of the annual permit fee is based on the anniversary date of the permit's issuance. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [S924.3.1]

#### 10.2.2 Per Piece Fee

Each piece returned through BPRS is charged only the per piece fee in 10.1. Postage is not charged for pieces returned through BPRS. [S924.3.2]

#### 10.2.3 Advance Deposit Account and Annual Accounting Fee

The permit holder must pay BPRS fees through an advance deposit account and must pay an annual accounting fee (see 10.1). This fee covers the administrative cost of maintaining the account and provides the mailer with a single accounting of all charges deducted from that account. The accounting fee is charged once each 12-month period on the anniversary date of the initial accounting fee payment. The fee may be paid in advance only for the next year and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [S924.3.3]

#### 10.2.4 Existing Advance Deposit Account

A separate advance deposit account for BPRS is not required; the annual accounting fee is charged if BPRS fees are paid from an existing account. [S924.3.4]

#### 10.2.5 Payment Guarantee

The permit holder guarantees payment of all applicable fees. The post office returns BPRS items to the permit holder only when there are sufficient funds in the advance deposit account to pay the fees on returned pieces. [S924.3.5]

### 10.3 General Information

#### 10.3.1 Description

Bulk parcel return service (BPRS) allows mailers of large quantities of Standard Mail machinable parcels that are either undeliverable-as-addressed or opened and remailed by addressees to be returned to designated postal facilities. The mailer has the option of picking up all returned parcels from a designated postal facility at a predetermined frequency specified by the USPS or having them delivered by the

## 507.10.3.2

USPS in a manner and frequency specified by the USPS. For this service a mailer pays an annual permit fee and a per piece charge for each parcel returned. Payment for the returned pieces is deducted from an advance deposit account. [S924.1.1]

**10.3.2 Availability**

A mailer may be authorized to use BPRS when the following conditions apply:

- a. All returned parcels are initially prepared as Regular or Nonprofit Standard Mail and are machinable parcels as defined in [401.1.0](#).
- b. At least 10,000 Standard Mail machinable parcels will be returned to a designated postal facility during a 12-month period.
- c. Parcels are returned to the mailer either because they are undeliverable-as-addressed or because they have been opened, resealed, and redeposited in the mail by the recipient and it is impractical or inefficient for the USPS to return them.
- d. Parcels bear one of the following BPRS endorsements ([2.0, Forwarding](#)):
  - “Return Service Requested — BPRS”
  - “Address Service Requested — BPRS”
- e. Parcels have a return address that is in the delivery area of the post office that issued the BPRS permit.
- f. The postal facility designated for returned parcels is located in the United States, its territories or possessions, or is a U.S. military post office overseas (APO or FPO).
- g. The mailer has a valid postage due advance deposit account and pays the annual BPRS permit fee.
- h. BPRS parcels may be combined with the shipper paid forwarding service ([3.2.7](#)).
- i. Standard Mail parcels that qualify for a single-piece Package Services rate under the applicable standards and that contain the name of the Package Services rate in the mailer’s ancillary service endorsement are not eligible for BPRS. [S924.1.2]

**10.3.3 Optional Label**

An authorized BPRS permit holder has the option to use a label to identify BPRS parcels for return to a designated postal facility. The label is prepared at the mailer’s expense and must meet all format requirements described in [10.5](#) and [10.6](#) and specifications in [402.4.0, General Barcode Placement for Parcels](#), for a postal routing barcode symbology used to produce a correct, readable barcode for the return address. Each label must be accompanied by complete instructions for its use. [S924.1.3]

**10.3.4 Extra Services**

Extra services cannot be added to pieces returned via bulk parcel return service. [S924.1.4]

## 10.4 Permits

### 10.4.1 Application Procedures

To obtain a BPRS permit, a mailer must send a written request to the postmaster at each post office where parcels are to be returned. The request must include the following:

- a. Payment for the annual BPRS permit fee.
- b. Information pertinent to each requested delivery point that documents either the receipt of at least 10,000 machinable parcels originally mailed at Standard Mail rates during the past 12 months, or that there are reasonable grounds to expect at least 10,000 machinable parcels originally mailed at Standard Mail rates will be returned during the next 12-month period.
- c. A description of the returned parcels (e.g., piece size and packaging).
- d. A statement of the desired frequency and location of the parcel pickup or delivery point.
- e. Sample documentation that will be used to substantiate the number of parcels returned daily to each location.
- f. If labels will be furnished for returning opened parcels, sample labels prepared in accordance with 10.5 along with instructions for their use.
- g. A written statement agreeing to pay the per piece fee for each returned parcel from a centralized advance deposit account. [S924.2.1]

### 10.4.2 Authorization

Upon approval of a mailer's request, the post office issues an authorization letter and provides a postage due service agreement with a BPRS permit number. The permit number is used for account administration only and is not for use on mail. [S924.2.2]

### 10.4.3 Postage Due Service Agreement

A BPRS mailer will be required to sign a postage due service agreement with each post office that issues a permit for the return of BPRS parcels. [S924.2.3]

### 10.4.4 Permit Renewal

A post office provides BPRS permit holders with annual renewal notices advising that their permits are due to expire. A notice must be returned to the issuing post office with the fee payment or authorization for the postmaster to deduct the fee from the advance deposit account by the permit expiration date. Written authorization is not necessary for renewal of a permit if there is no change to the authorization on file at the post office where the parcels are returned. If a permit holder does not renew a BPRS permit after having been given notice, the USPS will endorse the mail "Bulk Parcel Return Service Canceled" and will charge postage due at the single-piece First-Class Mail or Priority Mail rate as appropriate for the weight of the piece. If the single-piece First-Class Mail or Priority Mail rate is not paid, the mail is forwarded to the nearest mail recovery center. [S924.2.4]

507.10.4.5

**10.4.5 Permit Cancellation**

A BPRS permit may be canceled by the USPS for any of the following reasons:

- a. Failure to meet the minimum volume requirement of 10,000 parcels returned during a 12-month period to each postal facility.
- b. Failure of the mailer to pay the required postage and fees for returned parcels.
- c. Insufficient funds in an advance deposit account to cover postage and fees that are due for returned parcels.
- d. Failure to fulfill the terms and conditions of the BPRS permit authorization.
- e. Failure to conform return labels to the specifications in sections 10.5 and 10.6. [S924.2.5]

**10.4.6 Reapplying After Cancellation**

A mailer must do the following to receive a new BPRS permit at the same post office where a permit was previously canceled:

- a. Submit a letter to that office requesting a permit and new agreement.
- b. Pay a new permit fee.
- c. Provide evidence showing that the reasons for cancellation of the previous permit no longer exist.
- d. Maintain adequate funds in an advance deposit account to cover the number of returns expected over at least a 2-week period. [S924.2.6]

**10.5 Label Requirements****10.5.1 Production Methods**

Any photographic, mechanical, or electronic process, or any combination of such processes other than typewriting or handwriting may be used to prepare the BPRS label. The background may be any light color that allows the address, postmark, and other endorsements to be easily read. Brilliant colors may not be used for the background. If a label is prepared with adhesive on its reverse side, the adhesive must be capable of securely bonding the label to the parcel. [S924.4.1]

**10.5.2 Label Instructions**

Written instructions must be provided with the label that, at a minimum, advise the user to do the following:

- a. Obliterate all other delivery addresses and barcodes on the outside of the parcel.
- b. Print a complete return address in the location provided in the upper left corner of the label.
- c. Place the label with the delivery address and barcode on the side of the mailpiece with the largest surface area. If tape or similar material is used, it must not cover any part of the label where the mailer's return address and postal routing barcode are located. The barcode should be at least 1 inch from the edge of the parcel. If the shape of the parcel requires specific orientation for stability, the label must be placed on the top surface.

- d. Take the parcel to a post office, drop it in a collection box, or give it to a postal carrier. [S924.4.2]

**10.5.3 Distribution**

BPRS return labels may be distributed to customers as an enclosure with merchandise, as a separate item, as a facsimile transmission (fax), or as an electronic transmission for customer downloading and printing. Regardless of distribution method, all standards in 10.5.2 and 10.6 must be met. An electronic file must include instructions that explain how to affix the label securely to the parcel as required in 10.5.2. [S924.4.3]

**10.6 Format**

**10.6.1 General**

The BPRS label contents and format must meet all applicable standards before the label may be distributed for use. Format requirements are shown in Exhibit 10.6.9. [S924.5.1]

**10.6.2 Postage Guarantee**

The endorsement “NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES” must be printed in the upper right corner of the face of the piece. The endorsement must not extend more than 1-3/4 inches (1.75 inches) from the right edge of the label. [S924.5.2]

**10.6.3 Horizontal Bars**

To facilitate recognition of BPRS parcels, a series of horizontal bars parallel to the label length must be printed directly below the endorsement “NO POSTAGE NECESSARY IF MAILED IN THE UNITED STATES:”

- a. The bars must be uniform in length, at least 1 inch long and 1/16 inch (0.0625 inch) to 3/16 inch (0.1875 inch) thick, and evenly spaced.
- b. There must be at least a 1/2 inch (0.500 inch) clearance between the right edge of the ZIP Code in the delivery address and the left edge of the horizontal bars.
- c. The bottom bar in the series must be above (not on or below) the top of the delivery address line (the next-to-last line in the address, just above the line with the city, state, and ZIP Code).
- d. Do not use a facing identification mark (FIM) on this label. [S924.5.3]

**10.6.4 Class Endorsement**

The “STANDARD MAIL” class endorsement must be at least 1/4-inch (.25 inch) high and shown in capital letters to the left of the postage guarantee endorsement. [S924.5.4]

**10.6.5 Bulk Parcel Return Service Legend**

The “BULK PARCEL RETURN SERVICE” legend must be placed above the return delivery address on all BPRS parcels. The legend means that the BPRS permit holder guarantees payment of postage and fees on all returned Standard Mail parcels. The following information must be enclosed in a rectangle:

- a. Line 1: Show the words “BULK PARCEL RETURN SERVICE” in capital letters at least 3/16 inch (0.1875 inch) high, enclosed in a rectangle.

## 507.10.6.6

- b. Line 2: The name of the BPRS permit holder must also be printed in capital letters in the rectangle directly below the words “BULK PARCEL RETURN SERVICE.”
- c. The permit holder's city, state, and ZIP Code must appear in capital letters and must be located on the same line as the company name.
- d. The post office box number and/or street address must appear in capital letters on the line beneath this information. [S924.5.5]

**10.6.6 Delivery Address**

A complete delivery address (city, state, ZIP Code) specified by the post office that issued the BPRS permit and to which parcels are returned must be printed in capital letters at least 3/16 inch (0.1875) high below the “BULK PARCEL RETURN SERVICE” rectangle and at least 1 inch from the left edge of the label. There must be at least a 1/2-inch (0.50 inch) clearance between the ZIP Code and the horizontal bars. [S924.5.6]

**10.6.7 Customer's Return Address**

The complete return address (street, city, state, ZIP Code) of the customer mailing the article back to the permit holder must be shown in the upper left corner of the label. Space must be provided for the customer's return address if it is not preprinted by the permit holder. [S924.5.7]

**10.6.8 Optional Information**

At the option of the permit holder, a single line above the top line of the customer return address may be used for customer account or other information. [S924.5.8]

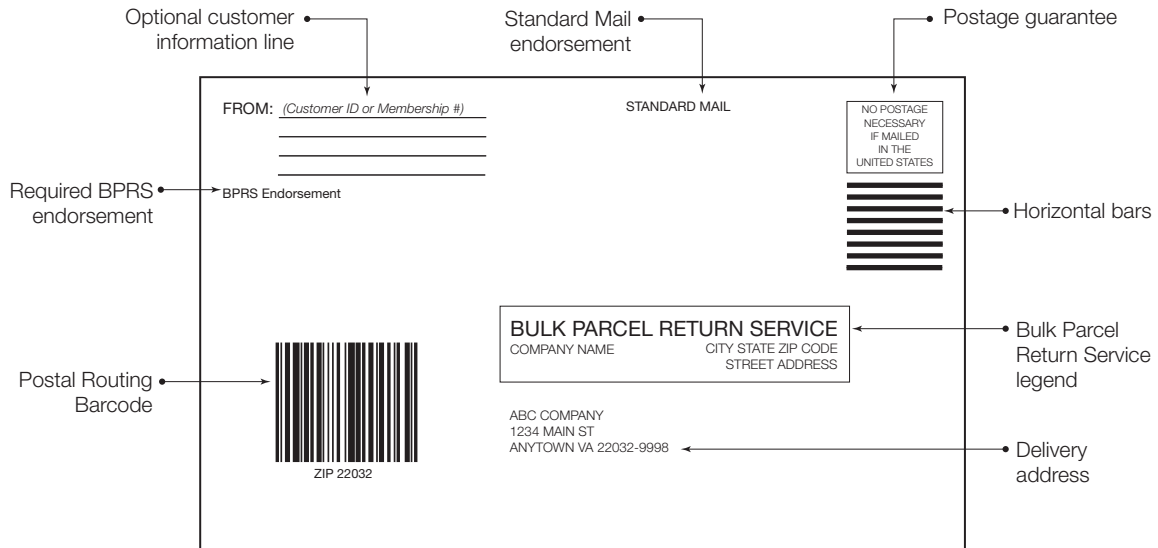

### 10.6.9 Postal Routing Barcode

Every BPRS label must include a properly prepared barcode that represents the correct ZIP Code information for the delivery address of the returned parcel plus the appropriate verifier character suffix or application identifier prefix characters appropriate for the barcode symbology as described in 402.4.0, *General Barcode Placement for Parcels*, for machinable parcels. In addition to the barcode requirements in 402.4.0, the following requirements must be met in preparing BPRS labels:

- a. **Barcode Location.** The barcode must be placed on the label immediately adjacent to the address and the label must be located on the parcel so the barcode is at least 1 inch from the parcel edge.
- b. **Barcode Clear Zone.** No printing may appear in the area 1/8 inch (0.125 inch) above and below the barcode regardless of location on the label. A minimum clear zone equal to 10 times the average measured narrow element (bars or space) width must be maintained to the left and right of the barcode.
- c. **Human-Readable Barcode Information.** The human-readable equivalent of the ZIP Code or ZIP+4 code encoded in the barcode as referenced in 402.4.0 may be omitted. [S924.5.9]

#### Exhibit 10.6.9 Bulk Parcel Return Service Label

[Exhibit S924.5.0]

# 508 Recipient Services

## Overview

- 1.0 Recipient Options
- 2.0 Conditions of Delivery
- 3.0 Customer Mail Receptacles
- 4.0 Post Office Box Service
- 5.0 Caller Service
- 6.0 General Delivery
- 7.0 Firm Holdout
- 8.0 Pandering Advertisements
- 9.0 Sexually Oriented Advertisements

## 1.0 Recipient Options

### 1.1 Basic Recipient Concerns

#### 1.1.1 Delivery to Addressee

Addressees may control delivery of their mail. Without a contrary order, the mail is delivered as addressed. Mail addressed to several persons may be delivered to any one of them. [D042.1.1]

#### 1.1.2 Refusal at Delivery

The addressee may refuse to accept a mailpiece when it is offered for delivery. [D042.1.2]

#### 1.1.3 Refusal After Delivery

After delivery, an addressee may mark a mailpiece “Refused” and return it within a reasonable time, if the piece or any attachment is not opened. Mail that may not be refused and returned unopened under this provision may be returned to the sender only if it is enclosed in a new envelope or wrapper with a correct address and new postage. The following may not be refused and returned postage-free after delivery:

- a. Pieces sent as registered, insured, certified, collect on delivery (COD), and return receipt for merchandise mail.
- b. Response mail to the addressee’s sales promotion, solicitation, announcement, or other advertisement that was not refused when offered to the addressee.

[D042.1.3]

#### 1.1.4 Mail Withheld From Delivery

An addressee may request the postmaster, in writing, to withhold from delivery for a period not to exceed 2 years any foreign letter or printed matter with a specified name or address on the outside. [D042.1.4]

#### 1.1.5 Addressee Identification

If a person claiming to be the addressee of certain mail is unknown to the delivery employee, the mail may be withheld pending identification of the claimant.

[D042.1.5]

508.1.1.6

**1.1.6 Remailing Returned Mail**

Generally, a returned mailpiece that was undeliverable-as-addressed or refused by the addressee may not be remailed unless it is placed in a new envelope or wrapper with a correct address and new postage. A returned shortpaid mailpiece can have the necessary additional postage affixed to the original piece and does not have to be placed in a new envelope or wrapper. [D042.1.6]

**1.1.7 Express Mail and Accountable Mail**

The following specific conditions also apply to the delivery of Express Mail and accountable mail (registered, certified, insured for more than \$50, or COD, as well as mail for which a return receipt or a return receipt for merchandise is requested or for which the sender has specified restricted delivery):

- a. The recipient (addressee or addressee's representative) may obtain the sender's name and address and may look at the mailpiece while held by the USPS employee before accepting delivery and endorsing the delivery receipt.
- b. The mailpiece may not be opened or given to the recipient before the recipient signs and legibly prints his or her name on the delivery receipt (and return receipt, if applicable) and returns the receipt(s) to the USPS employee.
- c. Suitable identification can be required of the recipient (if not known to the USPS employee) before delivery of the mailpiece.
- d. When delivery is not restricted at the sender's request, mail addressed to a person at a hotel, apartment house, etc., may be delivered to any person in a position to whom mail for that location is usually delivered.
- e. USPS responsibility ends when the mailpiece is delivered to the recipient (or another party, subject to 1.1.7d and 1.0).
- f. A notice is left for a mailpiece that cannot be delivered. If the piece is not called for or redelivery is not requested, the piece is returned to the sender after 15 days (5 days for Express Mail, 30 days for COD) unless the sender specifies fewer days on the piece.
- g. A hand stamp approved by the postmaster may be used to provide the signature and name of the individual or organization receiving the mailpiece. In accordance with the electronic signature capture process, the hand stamp must be sized to fit within the Signature and Printed Name blocks on Form 3849. The stamp must not overlap into the delivery office information section or the Delivery Address block of the form. To obtain approval for such a stamp, the company must submit a written statement to the postmaster that the person whose name appears on the stamp is the person authorized to accept accountable mail, accompanied by a sample of the authorized employee's signature that can be verified against the signature on the stamp. After approval, the stamped signature and name are acceptable only if a clean, legible impression is provided within the Signature and Printed Name blocks on Form 3849. On mail addressed to a federal or state official, the stamp need show only the name and location of the accepting organization. In these cases, the stamp should fit within the Printed Name and Delivery Address block of Form 3849 but must not overlap into the Signature block or barcode sections.

[D042.1.7]

**1.2 Carrier Release for Uninsured Parcels**

An uninsured parcel may not be left in an unprotected place, such as a porch or stairway, unless the addressee has filed a written order, or the mailer has endorsed the parcel “Carrier—Leave If No Response.” The endorsement must appear directly below the return address as specified in [402.2.0](#) and [402.3.0](#). [D042.7.1]

**1.3 Jointly Addressed**

For mail that is jointly addressed:

- a. Such as “Mr. and Mrs. John Doe,” or “John and Jim Doe,” neither party is entitled to control delivery of such mail over the objection of the other. [D042.3.1]
- b. To husbands or wives, neither party may control delivery of mail addressed to the other. [D042.3.2]

**1.4 Delivery to Addressee’s Agent****1.4.1 Basic Standard**

Unless otherwise directed, an addressee’s mail may be delivered to an employee, to a competent member of the addressee’s family, or to any person authorized to represent the addressee. A person or several persons may designate another to receive their mail. [D042.2.1]

**1.4.2 Minor**

A minor’s guardian may control delivery of mail addressed to the minor. If there is no guardian and the minor is unmarried, either parent may receive delivery of the minor’s mail. [D042.2.2]

**1.4.3 Incompetent Person**

Mail may be delivered under the order of the guardian or conservator for a person legally declared incompetent. If there is no legal representative, the mail is delivered as addressed. [D042.2.3]

**1.4.4 Deceased Person**

Mail addressed to a deceased person may be received at the address of the deceased by anyone who would normally receive the addressee’s mail at that address. The mail may also be forwarded to a different address, such as that of an appointed executor or administrator, if an order of request is filed at the post office. [D042.2.4]

**1.5 Delivery to Individual at Organization****1.5.1 To Address**

All mail addressed to a governmental or nongovernmental organization or to an individual by name or title at the address of the organization is delivered to the organization, as is similarly addressed mail for former officials, employees, contractors, agents, etc. If disagreement arises where any such mail should be delivered, it must be delivered under the order of the organization’s president or equivalent official. [D042.4.1]

508.1.5.2

**1.5.2 Not to Address**

Mail addressed to a governmental or nongovernmental official by title or by organization name, but not to the address of the organization, is delivered to the organization if the organization so directs. [D042.4.2]

**1.6 Delivery at Hotels, Institutions, Schools, and Similar Places****1.6.1 Patient or Inmate**

Mail addressed to a patient or inmate at an institution is delivered to the institution authorities. If the addressee is no longer at that address, the mail must be redirected to the current address, if known, or endorsed appropriately and returned by the institution to the post office. [D042.5.1]

**1.6.2 Hotel or School**

Mail addressed to a person at a hotel, school, or similar place is delivered to the hotel, school, etc. If the addressee is no longer at that address, the mail must be redirected to the current address, if known, or endorsed appropriately and returned by the institution to the post office. [D042.5.2]

**1.6.3 Prisoner**

Mail addressed to a prisoner is subject to the mail security standards in the *Administrative Support Manual*. [D042.5.3]

**1.6.4 Registered Mail Addressed to Hotel or Apartment House**

Registered Mail addressed to a person at a hotel or apartment house is delivered to the persons designated by the management of the hotel or apartment house in a written agreement with the USPS (Form 3801-A). If the sender restricts delivery of the Registered Mail, it may not be delivered to that designated person, unless the addressee authorized that person in writing to receive restricted-delivery mail. [D042.5.4]

**1.7 Conflicting Delivery Orders****1.7.1 Delivery to Third Party**

If persons make conflicting orders for delivery of the same mail, and they cannot agree among themselves who should receive the mail, the mail may be delivered to a named receiver or third party unanimously agreed to by the disputing parties. [D042.6.1]

**1.7.2 Receiver in Dispute**

If the disputing parties are unable to select a receiver, they must furnish the postmaster all available evidence on which they rely to exercise control over the disputed mail. The USPS may hold or return mail pending resolution of the dispute. [D042.6.2]

**1.7.3 Court Order**

Mail is delivered under a court order issued for mail claimed by different persons. [D042.6.3]

## 1.8 Commercial Mail Receiving Agencies

### 1.8.1 Procedures

The procedures for establishing a commercial mail receiving agency (CMRA) are as follows:

- a. An addressee may request mail delivery to a CMRA. The CMRA accepts delivery of the mail and holds it for pickup or remails it to the addressee, prepaid with new postage.
- b. Each CMRA must register with the post office responsible for delivery to the CMRA. Any person who establishes, owns, or manages a CMRA must provide Form 1583-A to the postmaster (or designee) responsible for the delivery address. The CMRA owner or manager must complete all entries and sign the Form 1583-A. The CMRA owner or manager must furnish two items of valid identification; one item must contain a photograph of the CMRA owner or manager. The identification presented must be current. It must contain sufficient information to confirm that the applicant is who he or she claims to be and is traceable to the bearer. The postmaster (or designee) may retain a photocopy of the identification for verification purposes and must list and record sufficient information to identify the two types of identification on Form 1583-A (block 10). Furnishing false information on the application or refusing to give required information is reason for denying the application. When any information required on Form 1583-A changes, the CMRA owner or manager must file a revised application (write "revised" on the form) with the postmaster. Social Security cards or credit cards and birth certificates are unacceptable as identification. The following are acceptable identification:
  1. Valid driver's license or state non-driver's identification card.
  2. Armed forces, government, university, or recognized corporate identification card.
  3. Passport, alien registration card, or certificate of naturalization.
  4. Current lease, mortgage, or deed of trust.
  5. Voter or vehicle registration card.
  6. Home or vehicle insurance policy.
- c. The postmaster (or designee) must verify the documentation to confirm that the CMRA owner or manager resides at the permanent home address shown on Form 1583-A; witness the signature of the CMRA owner or manager; and sign Form 1583-A. The postmaster must provide the CMRA with a copy of the DMM regulations relevant to the operation of a CMRA. The CMRA owner or manager must sign the Form 1583-A acknowledging receipt of the regulations. The postmaster must file the original of the completed Form 1583-A at the post office and provide the CMRA with a duplicate copy.
- d. A CMRA is authorized to accept the following accountable mail from their customers for mailing at the post office: insured, COD, Express Mail, Certified Mail, Delivery Confirmation, and Signature Confirmation mail. The sender (CMRA customer) must present accountable mail items not listed to the post office for mailing. [D042.2.5]

**1.8.2 Delivery to CMRA**

Procedures for delivery to a CMRA are as follows:

- a. Mail delivery to a CMRA requires that the CMRA owner or manager and each addressee complete and sign Form 1583. Spouses may complete and sign one Form 1583. Each spouse must furnish two items of valid identification. If any information that is required on Form 1583 is different for either spouse it must be entered in the appropriate box. A parent or guardian may receive delivery of a minor's mail by listing the name(s) of each minor on Form 1583 (block 12). The CMRA owner or manager, authorized employee, or a notary public must witness the signature of the addressee. The addressee must complete all entries on Form 1583. The CMRA owner or manager must verify the documentation to confirm that the addressee resides or conducts business at the permanent address shown on Form 1583. The address is verified if there is no discrepancy between information on the application and the identification presented. If the information on the application does not match the identification, the applicant must substantiate to the CMRA that the applicant resides or conducts business at the address shown. A document from a governmental entity or recognized financial institution or a utility bill with the applicant's name and current permanent address may be used for such purpose. If the applicant is unable to substantiate the address, the CMRA must deny the application. Furnishing false information on the application or refusing to give required information is reason for withholding the addressee's mail from delivery to the agent and returning it to the sender. When any information required on Form 1583 changes, the addressee must file a revised application (write "revised" on the form) with the CMRA. The addressee must furnish two items of valid identification; one item must contain a photograph of the addressee. The identification presented must be current. It must contain sufficient information to confirm that the applicant is who he or she claims to be and is traceable to the bearer. The CMRA owner or manager may retain a photocopy of the identification for verification purposes. The CMRA owner or manager must list and record sufficient information to identify the two types of identification on Form 1583 (block 8) and write the complete CMRA delivery address used to deliver mail to the addressee on Form 1583 (block 3). Social Security cards or credit cards and birth certificates are unacceptable as identification. The following are acceptable identification:
  1. Valid driver's license or state non-driver's identification card.
  2. Armed forces, government, university, or recognized corporate identification card.
  3. Passport, alien registration card, or certificate of naturalization.
  4. Current lease, mortgage, or deed of trust.
  5. Voter or vehicle registration card.
  6. Home or vehicle insurance policy.
- b. A CMRA must not modify or alter Form 1583 or Form 1583-A. Modified or altered forms are invalid and the addressee's mail must be returned to sender in accordance with USPS regulations.

- c. The CMRA must provide the original of completed Forms 1583 to the postmaster. This includes revised Forms 1583 submitted by an addressee based on information changes to the original Form 1583 (write “revised” on form). The CMRA must maintain duplicate copies of completed Forms 1583 on file at the CMRA business location. The Forms 1583 must be available at all times for examination by postal representatives and postal inspectors. The postmaster must file the original Forms 1583 first by CMRA and then alphabetically by the addressee’s last name at the station, branch, or post office. The postmaster files the original Forms 1583 without verifying the address of residence or firm shown on Forms 1583. The postmaster is required to verify only when the postmaster receives a request by the Postal Inspector in Charge, or when there is reason to believe that the addressee’s mail may be, or is being, used for unlawful purposes.
- d. When the agency relationship between the CMRA and the addressee terminates, the CMRA must write the date of termination on its duplicate copy of Form 1583. The CMRA must notify the post office of termination dates through the quarterly updates (due January 15th, April 15th, July 15th, and October 15th) of the alphabetical list of customers cross-referenced to the CMRA addressee delivery designations. The alphabetical list must contain all new customers, current customers, and those customers who terminated within the past 6 months, including the date of termination. The CMRA must retain the endorsed duplicate copies of Forms 1583 for at least 6 months after the termination date. Forms 1583 filed at the CMRA business location must be available at all times for examination by postal representatives.
- e. A CMRA must represent its delivery address designation for the intended addressees by the use of “PMB” (private mailbox) or the alternative “#” sign. Mailpieces must bear a delivery address that contains at least the following elements, preferably in the following format:
  1. Line 1: Intended addressee’s name or other identification. *Examples: JOE DOE or ABC CO.*
  2. Line 2: “PMB” and number or the alternative “#” (pound sign) and number. *Examples: PMB 234 or #234.*
  3. Line 3: Street number and name or post office box number or rural route designation and number. *Examples: 10 MAIN ST STE 11 or PO BOX 34 or RR 1 BOX 12.*
  4. Line 4: City, state, and ZIP Code (5-digit or ZIP+4). *Example: HERNDON VA 22071-2716.*
- f. As an alternate to the format presented in e., the following format may be used:
  1. Line 1: Intended addressee’s name or other identification. *Examples: JOE DOE or ABC CO.*
  2. Line 2: Street number and name or post office box number and “PMB” and number or the alternative “#” (pound sign) and number. *Examples: 10 MAIN ST PMB 234 or #234 or PO BOX 34 PMB 234 or #234.*

## 508.1.8.3

3. Line 3: City, state, and ZIP Code (5-digit or ZIP+4). *Example: HERNDON VA 22071-2716.*
- g. As an exception to the formats presented in e. and f., when the CMRA's physical address contains a secondary address element (e.g., rural route box number, "suite," "#," or other term), the CMRA customer must use "PMB" in the three-line format. It is not permissible to combine the secondary address element of the physical location of the CMRA address and the CMRA customer private mailbox number, e.g., 10 MAIN ST STE 11-234. The CMRA must write the complete CMRA delivery address used to deliver mail to each individual addressee or firm on the Form 1583 (block 3). The USPS may return mail without a proper address to the sender endorsed "Undeliverable as Addressed, Missing PMB or # Sign." The three-line format must be as follows:
  1. JOE DOE  
10 MAIN ST STE 11 PMB 234  
HERNDON VA 22071-2716
  2. JOE DOE  
RR 12 BOX 512 PMB 234  
HERNDON VA 22071-2716
- h. The CMRA must be in full compliance with 1.8.1 through 1.8.3 and other applicable postal requirements to receive delivery of mail from the post office.
- i. The postmaster may, with the next higher level approval and notification to the Postal Inspector-In-Charge, suspend delivery to a CMRA that, after proper notification, fails to comply with 1.8.1 through 1.8.3 or other applicable postal requirements. The proper notification must be in writing outlining the specific violation(s) with a reasonable time to comply.
- j. With the approval of suspension of delivery, the postmaster must provide the CMRA with written notification of the effective date and the reason(s). If the CMRA fails to comply by the effective date, return mail to the sender endorsed "Delivery Suspended to Commercial Mail Receiving Agency." [D042.2.6]

**1.8.3 Addressee and CMRA Agreement**

In delivery of the mail to the CMRA, the addressee and the CMRA agree that:

- a. When the agency relationship between the CMRA and the addressee terminates, neither the addressee nor the CMRA will file a change-of-address order with the post office.
- b. The CMRA must remail mail intended for the addressee (customer) for at least 6 months after the termination date of the agency relationship between the CMRA and addressee. Mail that is remailed by the CMRA requires new postage. This remailing obligation need not be fulfilled if the CMRA customer provides written instructions to the CMRA that the mail (or specific types of mail) not be remailed upon termination of the relationship. This instruction may be provided in an internal service agreement between the customer and CMRA or by a separate document. Written instructions from the customer regarding the handling of this mail must not stipulate that the CMRA refuse mail or return it to sender, or hold the mail during the 6-month remail period and return it to the post office, or redeposit mail in the mails without new postage. At the end

of the 6-month remail period the CMRA may return to the post office only First-Class Mail, Priority Mail, Express Mail, accountable mail, or Parcel Post received for the former addressee (customer). The CMRA must return this mail to the post office the next business day after receipt with this endorsement: "Undeliverable, Commercial Mail Receiving Agency, No Authorization to Receive Mail for this Addressee." This mail is returned to the post office without new postage. The CMRA must not deposit return mail in a collection box. The CMRA must give the return mail to the letter carrier or return it to the post office responsible for delivery to the CMRA. Upon request, the agent must provide to the USPS all addresses to which the CMRA remails mail.

- c. If mail is remailed by the CMRA to the address of a former customer during the 6-month remail period and returned by the USPS endorsed "Moved, Left No Address," then the CMRA may return that mail to the post office with the approval of the postmaster or station manager. The approval is subject to evidence that the mail was remailed with new postage to the former customer at the address provided when the relationship was terminated and/or the verified home or business permanent address provided on the customer's Form 1583. Upon approval, the CMRA may return to the post office only First-Class Mail, Priority Mail, Express Mail, accountable mail, and Parcel Post received for the former customer. The CMRA must return this mail to the post office the next business day after receipt without new postage.
- d. The CMRA must provide to the postmaster a quarterly list (due January 15th, April 15th, July 15th, and October 15th) of its customers in alphabetical order cross-referenced to the CMRA addressee delivery designation. The alphabetical list must contain all new customers, current customers, and those customers who terminated within the past 6 months, including the date of termination.
- e. A CMRA may not refuse delivery of mail if the mail is for an addressee who is a customer or former customer (within the past 6 months). The agreement between the addressee and the CMRA obligates the CMRA to receive all mail, except restricted delivery, for the addressee. The addressee may authorize the CMRA in writing on Form 1583 (block 5) to receive restricted delivery mail for the addressee.
- f. If the CMRA has no Form 1583 on file for the intended addressee, the CMRA must return that mail to the post office responsible for delivery with this endorsement: "Undeliverable, Commercial Mail Receiving Agency, No Authorization to Receive Mail for this Addressee." This mail is returned to the post office without new postage. The CMRA must return misdelivered mail the next business day after receipt.
- g. The CMRA must not deposit return mail in a collection box. The CMRA must give the return mail to the letter carrier or return it to the post office responsible for delivery to the CMRA. [D042.2.7]

#### **1.8.4 Office Business Center Acting as a CMRA**

The procedures for an office business center (OBC) or part of its operation acting as a CMRA for postal purposes are as follows:

## 508.2.1

- a. An OBC is a business that operates primarily to provide private office facilities and other business support services to individuals or firms (customers). OBCs receive single-point delivery. OBC customers that receive mail at the OBC address will be considered CMRA customers for postal purposes under the standards set forth in 1.8.4b. Parties considered CMRA customers under this provision must comply with the standards set forth in 1.8.1 through 1.8.3. An OBC must register as a CMRA on Form 1583-A and comply with all other CMRA standards if one or more customers receiving mail through its address is considered a CMRA customer.
- b. An OBC customer is considered to be a CMRA customer for postal purposes if its written agreement with the OBC provides for mail service only or mail and other business support services (without regard for occupancy or other services that the OBC might provide). Additionally, an OBC customer receiving mail at the OBC address is considered to be a CMRA customer for postal purposes if each of the following is true:
  1. The customer's written agreement with the OBC does not provide for the full-time use of one or more of the private offices within the OBC facility.
  2. The customer's written agreement with the OBC does not provide all of the following: (a) the use of one or more of the private offices within the facility for at least 16 hours per month at market rate for the location; (b) full-time receptionist service and live personal telephone answering service during normal business hours and voicemail service after hours; (c) a listing in the office directory in the building in which the OBC is located; (d) use of conference rooms and other business services on demand, such as secretarial services, word processing, administrative services, meeting planning, travel arrangements, and video conferencing.
- c. Notwithstanding any other standards, a customer whose written agreement provides for mail services only or mail and other business support services will not be considered an OBC customer (without regard for occupancy or other services that an OBC may provide and bill for on demand).
- d. The USPS may request from the OBC copies of written agreements or any other documents or information needed to determine compliance with these standards. Failure to provide requested documents or information might be basis for suspending delivery service to the OBC under the procedures set forth in 1.8.2. [D042.2.8]

## 2.0 Conditions of Delivery

### 2.1 City Delivery Service

#### 2.1.1 Establishment

City delivery is provided according to USPS policies and procedures, the characteristics of the area to be served, and the methods needed to provide adequate service. Requests or petitions to establish, change, or extend city delivery service must be made to the local postmaster. [D042.9.1]

**2.1.2 Accommodating Customer Hardship**

Changes in the type of delivery authorized for a delivery point may be considered if service by existing methods imposes an extreme physical hardship on the customer.

[D042.9.2]

**2.1.3 Customer Maintenance of Receptacles**

Customers must provide authorized mail receptacles or door slots, except for mail receptacles authorized by the USPS to be owned and maintained by the USPS. The purchase, installation, maintenance, and replacement of mail receptacles used by customers for mail delivery are not the responsibility of the USPS. However, the USPS may authorize neighborhood delivery and collection boxes and parcel lockers to be purchased, installed, maintained, or replaced by the USPS. [D042.9.3]

**2.1.4 Businesses**

Mail receptacles or door slots are not required at businesses and offices that are open and have someone on hand to receive the mail when the carrier calls.

[D042.9.4]

**2.1.5 Receptacles With Locks**

If a lock is used on a mail receptacle, the receptacle must have a slot large enough to accommodate the normal daily mail volume. [D042.9.5]

**2.1.6 Door Slot**

A door slot for mail must meet specific criteria:

- a. The clear rectangular opening in the outside slot plate must be at least 1-1/2 inches wide and 7 inches long.
- b. The slot must have a flap, hinged at the top if placed horizontally, or hinged on the side away from the hinge side of the door if placed vertically.
- c. When an inside hood is used to provide greater privacy, the hooded portion must not be below the bottom line of the slot in the outside plate if placed horizontally, or beyond the side line of the slot in the outside plate nearest the hinge edge of the door if placed vertically.
- d. The hood at its greatest projection must not be less than 2-1/16 inches beyond the inside face of the door.
- e. The bottom of the slot must be at least 30 inches above the finished floor line.

[D042.9.6]

**2.1.7 Apartment Mail Receptacles**

Apartment house mail receptacles must be approved by the USPS. The purchase, installation, maintenance, and replacement of mail receptacles, boxes, or parcel lockers are not the responsibility of the USPS except for neighborhood delivery and collection boxes and parcel lockers authorized by the USPS to be owned and maintained by the USPS. When apartment buildings are substantially renovated or remodeled to provide additional apartments, or a material change is made in the location of boxes, obsolete receptacles must be replaced by currently approved receptacles. [D042.9.7]

## **2.2 Rural Delivery Service**

### **2.2.1 Establishment**

Rural stations and branches are established, and rural delivery is provided, according to USPS policies and procedures, the characteristics of the area to be served, and the methods needed to provide adequate service. Requests or petitions to establish, change, or extend rural delivery service, signed by the heads of families wanting this service, must be given to the postmaster of the post office from which delivery service is desired, or from which the route operates, as applicable. [D042.10.1]

### **2.2.2 Accommodating Customer Hardship**

On the customer's written request, the postmaster may approve an exception to the currently authorized method of delivery, if the type of rural delivery authorized imposes an extreme physical hardship. [D042.10.2]

### **2.2.3 Parcel Delivery**

An ordinary parcel too large to fit into a customer's mailbox is not left unless the customer has filed a written order with the postmaster relieving the USPS and carriers of all responsibility in case of loss or deprecation of any such parcel left outside the box. [D042.10.3]

### **2.2.4 Delivery to Recipient With Contagious Disease**

Mail is delivered to a customer's mailbox if a quarantined disease exists, provided that delivery can be made without exposure to contagion. No mail is collected from such box while the quarantine is in force. [D042.10.4]

### **2.2.5 Insufficient Postage/ Mailable Matter**

Generally, mailable matter is collected from a rural mailbox if postage is fully prepaid or money equal to the required postage is left in the mailbox. Money in a rural box is left at the customer's risk. When postage or money is insufficient to cover postage, the mail is not collected, or if the sender cannot be identified, the mail is treated as unpaid mail. Mailable matter not bearing postage found in, placed on, attached to, supported by, or hanging from rural boxes is handled under the applicable standards. [D042.10.5]

## **2.3 Highway Contract Delivery Service**

### **2.3.1 Establishment**

Highway contract routes are established, and delivery service on such routes is provided, according to USPS policies and procedures, the characteristics of the area to be served, and the methods needed to provide adequate service. Requests or petitions for new routes, or for extensions of service or changes in the line of travel or schedule of highway contract service, must be directed to the USPS distribution networks office with supervision over the transportation of mail in the area involved. [D042.11.1]

### **2.3.2 Parcel Delivery**

An ordinary parcel too large to fit into a customer's mailbox is not left unless the customer has filed a written order with the postmaster relieving the USPS and carriers of all responsibility in case of loss or deprecation of any such parcel left outside the box. [D042.11.2]

### 2.3.3 Mail Collection

Generally, mailable matter is collected from a mailbox if postage is fully prepaid or money equal to the required postage is left in the mailbox. Money in a mailbox is left at the customer's risk. When postage or money is insufficient to cover postage, the mail is not collected, or if the sender cannot be identified, the mail is treated as unpaid mail. Mailable matter not bearing postage found in, placed on, attached to, supported by, or hanging from boxes is handled under the applicable standards.

[D042.11.3]

### 2.3.4 Mailbox Location

Curbside mailboxes meeting the applicable standards in 3.0 must be placed where they protect the mail and can be conveniently served by carriers without leaving their vehicles. These boxes must be on the right side of the road in the direction of travel when required by traffic conditions or when driving to the left to reach the boxes would violate traffic laws by the carrier. [D042.11.4]

## 3.0 Customer Mail Receptacles

### 3.1 Basic Information for Customer Mail Receptacles

#### 3.1.1 Authorized Depository

Except as excluded by 3.1.2, every letterbox or other receptacle intended or used for the receipt or delivery of mail on any city delivery route, rural delivery route, highway contract route, or other mail route is designated an authorized depository for mail within the meaning of 18 USC 1702, 1705, 1708, and 1725. [D041.1.1]

#### 3.1.2 Exclusions

Door slots and nonlockable bins or troughs used with apartment house mailboxes are *not* letterboxes within the meaning of 18 USC 1725 and are *not* private mail receptacles for the standards for mailable matter not bearing postage found in or on private mail receptacles. The post or other support is *not* part of the receptacle.

[D041.1.2]

#### 3.1.3 Use for Mail

Except under 3.2.11, *Newspaper Receptacle*, the receptacles described in 3.1.1 may be used only for matter bearing postage. Other than as permitted by 3.2.10, *Delivery of Unstamped Newspapers*, or 3.2.11, no part of a mail receptacle may be used to deliver any matter not bearing postage, including items or matter placed upon, supported by, attached to, hung from, or inserted into a mail receptacle. Any mailable matter not bearing postage and found as described above is subject to the same postage as would be paid if it were carried by mail. [D041.1.3]

#### 3.1.4 Clear Approach

Customers must keep the approach to their mailboxes clear of obstructions to allow safe access for delivery. If USPS employees are impeded in reaching a mail receptacle, the postmaster may withdraw delivery service. [D041.1.4]

## 3.2 Curbside Mailboxes

### 3.2.1 Manufacturer Specifications

Manufacturers of all mailboxes designed and made to be erected at the edge of a roadway or curbside of a street and to be served by a carrier from a vehicle on any city route, rural route, or highway contract route must obtain approval of their products under USPS Standard 7, *Mailboxes, City and Rural Curbside*. To receive these construction standards and drawings or other information about the manufacture of curbside mailboxes, write to USPS Engineering (see [608.8.0](#) for address). [D041.2.1]

### 3.2.2 Custom-Built Mailbox

The local postmaster may approve a curbside mailbox constructed by a customer who, for aesthetic or other reasons, does not want to use an approved manufactured box. The custom-built box must generally meet the same standards as approved manufactured boxes for flag, size, strength, and quality of construction. [D041.2.2]

### 3.2.3 Locked Box

A mailbox with a lock must have a slot that is large enough to accommodate the customer's normal daily mail volume. The USPS neither opens a locked box nor accepts a key for this purpose. [D041.2.9]

### 3.2.4 Mailbox Post

The post or other support for a curbside mailbox must be neat and of adequate strength and size. The post may not represent effigies or caricatures that tend to disparage or ridicule any person. The box may be attached to a fixed or movable arm. [D041.2.6]

### 3.2.5 Advertising

Any advertising on a mailbox or its support is prohibited. [D041.2.5]

### 3.2.6 Location

Subject to state laws and regulations, a curbside mailbox must be placed to allow safe and convenient delivery by carriers without leaving their vehicles. The box must be on the right-hand side of the road in the direction of travel of the carriers on any new rural route or highway contract route, in all cases where traffic conditions are dangerous for the carriers to drive to the left to reach the box, or where their doing so would violate traffic laws and regulations. [D041.2.7]

### 3.2.7 Address Identification

Every curbside mailbox must bear the following address information:

- a. A box number, if used, inscribed in contrasting color in neat letters and numerals at least 1 inch high on the side of the box visible to the carrier's regular approach, or on the door if boxes are grouped.
- b. A house number if street names and house numbers have been assigned by local authorities, and the postmaster authorizes their use as a postal address. If the box is on a different street from the customer's residence, the street name and house number must be inscribed on the box. [D041.2.3]

**3.2.8 Owner's Name**

The mailbox may bear the owner's name. [D041.2.4]

**3.2.9 More Than One Family Sharing a Receptacle**

If more than one family wishes to share a mail receptacle, the following standards apply:

- a. Route and Box Number Addressing. On rural and highway contract routes authorized to use a route and box numbering system (e.g., RR 1 BOX 155), up to five families may share a single mail receptacle and use a common route and box designation. A written notice of agreement, signed by the heads of the families or individuals who want to join in the use of such box, must be filed with the postmaster at the delivery office.
- b. Conversion to Street Name and Number Addressing. When street name and numbering systems are adopted, those addresses reflect distinct customer locations and sequences. Rural and highway contract route customers who are assigned different primary addresses (e.g., 123 APPLE WAY vs. 136 APPLE WAY) should erect individual mail receptacles in locations recommended by their postmasters and begin using their new addresses. Customers having different primary addresses who wish to continue sharing a common receptacle must use the address of the receptacle's owner and the "care of" address format:

JOHN DOE  
 C/O ROBERT SMITH  
 123 APPLE WAY

Customers having a common primary address (e.g., 800 MAIN ST) but different secondary addresses (e.g., APT 101, APT 102, etc.) may continue to share a common receptacle if single-point delivery is authorized for the primary address. Secondary addresses should still be included in all correspondence.

[D041.2.8]

**3.2.10 Delivery of Unstamped Newspapers**

Generally, curbside mailboxes are to be used for mail only. However, publishers of newspapers regularly mailed as Periodicals may, on Sundays and national holidays only, place copies of the Sunday or holiday issues in the rural route and highway contract route boxes of subscribers if those copies are removed from the boxes before the next scheduled day of mail delivery. [D041.2.10]

**3.2.11 Newspaper Receptacle**

A receptacle for newspaper delivery by private carriers may be attached to the post of a curbside mailbox used by the USPS if the receptacle:

- a. Does not touch the mailbox or use any part of the mailbox for support.
- b. Does not interfere with the delivery of mail, obstruct the view of the mailbox flag, or present a hazard to carrier or vehicle.
- c. Does not extend beyond the front of the mailbox when the box door is closed.
- d. Does not display advertising, except the publication title. [D041.2.11]

508.3.3

**3.3 Wall-Mounted Centralized Mail Receptacles****3.3.1 Manufacturer Requirements**

Manufacturers of wall-mounted centralized mail receptacles used for mail delivery must receive approval under the specifications and procedures in USPS Standard 4. The specifications and other information can be obtained by writing to USPS Engineering (see [608.8.0](#) for address). [D041.3.1]

**3.3.2 Customer Requirements**

The installation of proper equipment is required for delivery service. The type of equipment must be approved by the USPS under [3.3.1](#) and must be appropriate for the structure. Customers should discuss the types of approved equipment permitted for their structures with their postmaster before purchasing and installing delivery equipment. [D041.3.2]

**4.0 Post Office Box Service****4.1 Fees for Post Office Box Service**

For service provided:

- a. Deposit per key issued: \$1.00.
- b. Additional keys, key duplication, or replacement, each: \$4.40.
- c. Post office box lock replacement, each: \$11.00.
- d. Post office box fees for each 6-month period are listed in [4.1e](#). Each box customer is charged a refundable deposit for post office box keys. Customers also are charged fees for duplicate and replacement post office box keys and for initiating lock changes on post office boxes. [D910.1.8]

e. Box fee per semiannual (6-month) period:

| Fee Group      | Box Size and Fee per Semiannual (6-month) Period |         |          |          |          |
|----------------|--|---------|----------|----------|----------|
|                | 1  | 2       | 3        | 4        | 5        |
| 1              | \$35.00  | \$50.00 | \$100.00 | \$205.00 | \$330.00 |
| 2              | 29.00  | 45.00   | 80.00    | 170.00   | 315.00   |
| 3              | 24.00  | 38.00   | 68.00    | 118.00   | 209.00   |
| 4              | 19.00  | 34.00   | 63.00    | 110.00   | 175.00   |
| 5              | 13.00  | 22.00   | 34.00    | 65.00    | 125.00   |
| 6              | 12.00  | 18.00   | 33.00    | 60.00    | 97.00    |
| 7              | 9.00   | 13.00   | 23.00    | 40.00    | 70.00    |
| E <sup>1</sup> | 0  | 0       | 0        | 0        | 0        |

**Additional Fees and Services**

|   |        |
|---|--------|
| Deposit per key issued                                    | \$1.00 |
| Key duplication or replacement (after first 2 keys), each | 4.40   |
| Post office box lock replacement, each                    | 11.00  |

1. A customer ineligible for carrier delivery may obtain one post office box at the Group E fee, subject to administrative decisions regarding the customer's proximity to post office.

[R900.20.0]

**4.2 Basic Information for Post Office Box Service**

**4.2.1 Purpose**

Post office box service is a premium service offered for a fee to any customer requiring more than free carrier delivery or general delivery and for no fee to customers who are not eligible for carrier delivery. The service allows a customer to obtain mail during the hours the box lobby is open or access is otherwise available. Post office box service is provided only through receptacles owned or operated by the USPS or its agents. Post office box service does not include alternate means of delivery established to replace, simplify, or extend carrier delivery service. A postmaster and a box customer may not make any agreement that contravenes the regulations on post office box service or its fees. [D910.1.1]

**4.2.2 Definition**

The term *post office box* (or its address abbreviation *PO BOX*) designates this service in an address. The term *box customer* applies only to the person who signs the application as an individual or to the organization on whose behalf an individual signs the application. [D910.1.2]

**4.2.3 Box Size**

There are five box sizes. A facility might not have each size. A customer is assigned a box size based on the customer's needs and the availability of boxes. The postmaster may require a customer to use a larger size box if the customer's mail volume increases beyond the capacity of the present box. [D910.1.4]

508.4.2.4

**4.2.4 Number Assignment**

A number is assigned to each post office box. Mail intended for delivery through a box must show the assigned post office box number in the address immediately above the city, state, and ZIP Code. [D910.1.3]

**4.2.5 Box Availability**

When no box of the appropriate size is available, an application for box service may be handled, at the postmaster's discretion, in any one or more of the following ways: by referring the customer to another postal facility with available capacity; by placing the customer's name on a waiting list for box service; by providing general delivery service until an appropriate size box becomes available; by offering a smaller or larger box at its fee; or by offering caller service. Regardless of the box size applied for, customers must pay the correct fee for the service they receive. [D910.1.5]

**4.2.6 Service Period**

Post office box service is provided in 6-month increments. [D910.1.7]

**4.2.7 Limitation on Service**

The postmaster may require a box customer to use caller service under [5.0, Caller Service](#), based on the volume of mail received by the customer, the level of service requested by the customer, or the availability of boxes to meet demand. Existing box customers will not be allowed to use additional boxes at post offices having a waiting list for post office boxes. Not more than once per semiannual payment period, a customer who was required to use caller service based on the volume of mail may submit a written request to the postmaster for a new determination of whether sufficient volume remains to require caller service. [D910.1.6]

**4.3 Service****4.3.1 Application**

Procedures for applying for post office box service are as follows:

- a. The applicant must complete all required items on Form 1093, *Application for Post Office Box or Caller Service*, and submit it to any postal facility that provides window service to the public. The facility need not be the one where box service is desired. Furnishing false information on the application or refusing to furnish required information may be sufficient reason for denial of the application or discontinuance of service.
- b. Spouses may complete and sign one Form 1093. Each spouse must present two items of valid identification. A parent or guardian may receive delivery of a minor's mail by listing the name(s) of each minor on Form 1093. Other adult persons who receive mail in the post office box of an individual box customer must be listed on Form 1093 and must present two items of valid identification to the post office.
- c. Employees or members who receive mail in the post office box of an organization box customer must be listed on Form 1093. Each person must have verifiable identification and, upon request, present this identification to the Postal Service.
- d. When any information required on Form 1093 changes, the box customer must update the application on file at the post office. [D910.2.1]

#### 4.3.2 Verification

An application for post office box service may not be approved until the applicant's identity and current permanent physical address where he or she resides or conducts business is verified. Verification criteria are as follows:

- a. At the time of application, applicants must present two items of valid identification; one item must contain a photograph of the applicant. Social Security cards or credit cards and birth certificates are unacceptable as identification. The following are acceptable identification:
  1. Valid driver's license or state non-driver's identification card.
  2. Armed forces, government, university, or recognized corporate identification card.
  3. Passport, alien registration card, or certificate of naturalization.
  4. Current lease, mortgage, or deed of trust.
  5. Voter or vehicle registration card.
  6. Home or vehicle insurance policy.
- b. The identification presented must be current. It must contain sufficient information to confirm that the applicant is who he or she claims to be and must be traceable to the bearer. [D910.2.2]

#### 4.3.3 Transferring Service

Post office box service may be transferred, without payment of an additional fee, to any box of the same size and fee group at a different facility of the same post office. To transfer service, the box customer must submit a new application either to the facility where service is currently provided or to the facility where service is desired. A box customer may transfer service no more than once in any semiannual payment period and must submit a completed Form 3575 at the time of transfer. [D910.2.3]

#### 4.3.4 Minor

Post office box service may be provided to a minor (a person under 18 years of age) unless the minor's parent or guardian submits a written objection to the appropriate postmaster. [D910.2.4]

### 4.4 Conditions of Use

#### 4.4.1 Mail Receipt

In accordance with the application and verification standards in 4.3, any individual box customer or organization may receive through the box any mail properly addressed to the box number. [D910.3.1]

#### 4.4.2 Mail Only

Only mail and official USPS notices may be placed into a post office box. [D910.3.2]

#### 4.4.3 Accumulation of Mail

A box customer must remove mail promptly from the box. If mail will not be removed from the box for more than 30 days and an overflow condition is probable, the customer must make prior arrangements with the postmaster. [D910.3.3]

**4.4.4 Overflow**

When mail for a customer's post office box(es) exceeds the capacity of the box(es) on 12 of any 20 consecutive business days (excluding Saturdays, Sundays, and national holidays), the customer must use caller service, change to a larger box, or use one or more additional boxes (subject to availability) to which mail will be addressed. [D910.3.4]

**4.4.5 Unlawful Activity**

A post office box may not be used for, or in connection with, a scheme or enterprise that violates any federal, state, or local law; breaches an agreement with a federal, state, or local agency whereby the box customer has agreed to discontinue a specified activity; or violates or attempts to evade any order of a court or administrative body. [D910.3.5]

**4.4.6 Forwarding**

A post office box may not be used when the primary purpose is to have the USPS forward or transfer mail to another address free of charge. [D910.3.6]

**4.4.7 Address Change**

Only the box customer or authorized representatives of the organization listed on the Form 1093 may file change-of-address orders. Forwarding of mail for other persons is the responsibility of the box customer. [D910.3.7]

**4.5 Basis of Fees and Payment****4.5.1 General**

Post office box fees are based on the size of the box provided and the fee group to which the box's 5-digit ZIP Code is assigned. [D910.4.1]

**4.5.2 Box Size**

Box sizes are standardized and the fees for boxes increase with box size. The following chart describes approximate box capacities and frontal dimensions.

| <b>BOX SIZE</b> | <b>CAPACITY<br/>(Cubic Inches)</b> | <b>WIDTH AND HEIGHT<br/>(Inches)</b> |
|-----------------|------------------------------------|--------------------------------------|
| <b>1</b>        | Under 296                          | 3 by 5.5                             |
| <b>2</b>        | 296 through 499                    | 5 by 5.5                             |
| <b>3</b>        | 500 through 999                    | 11 by 5.5                            |
| <b>4</b>        | 1,000 through 1,999                | 11 by 11                             |
| <b>5</b>        | 2,000 or more                      | 22.5 by 12                           |

[D910.4.2]

**4.5.3 Fee Changes**

A change in post office box service fees applicable to a given 5-digit ZIP Code can arise from a general fee change. In addition, the Manager, Special Services, can assign a fee group to a new ZIP Code, and may authorize the reassignment of one or more 5-digit ZIP Codes to the next higher or lower fee group if the past fee group assignments were in error. The USPS also may regroup 5-digit ZIP Codes. No ZIP Code may be moved more than once a calendar year and a ZIP Code may be moved only into the next higher or lower fee group. Any change in post office box service fees takes effect on the date of the action that caused the change unless an

official announcement specifies another date. If post office box service fees are increased, no customer must pay the new rate until the end of the current service period, and no retroactive adjustment is to be made for a payment received before the date of the change. The fee charged is that in effect on the date of payment.

[D910.4.3]

#### **4.5.4 Payment**

All fees for post office box service are for a 6-month period. Except under 4.5.6, 4.5.7, and 4.5.10, fees must be paid in advance for each 6-month period. The fee may be paid for two periods at a time (i.e., up to one year in advance), but not more. The fee that must be paid is the one that is in effect on the day that the fee is paid. Fees may be paid using cash, credit or debit card, or check or money order payable to the postmaster. A mailed payment must be received by the postmaster on or before the due date. [D910.4.4]

#### **4.5.5 Payment Period**

Except under 4.5.7, the beginning date for a box fee payment period is determined by the approval date of the application. The period begins on the first day of either the same month if the application is approved on or before the 15th of the month, or the next month if approved after the 15th of the month. After that, box fees for service renewal may be paid any time during the last 30 days of the service period, but no later than the last day of the service period. [D910.4.5]

#### **4.5.6 U.S. Agencies**

Federal agencies whose payment period coincides with the federal fiscal year may pay their box fees during the first quarter rather than in advance. [D910.4.6]

#### **4.5.7 Exception**

Postmasters at offices with fewer than 500 post office boxes may set April 1 and October 1 as the beginning of payment periods for box customers in their offices. Payment periods beginning other than April 1 or October 1 are brought into alignment with these respective dates by adjusting fees as follows:

- a. New service, one-sixth of the semiannual fee is charged for each remaining month between the beginning of the new payment period and the next April 1 or October 1.
- b. Existing service, one-sixth of the semiannual fee is charged for each remaining month between the end of all currently paid periods and the next April 1 or October 1.
- c. Next one or two semiannual payment periods, an adjustment may be accepted in addition to fees. [D910.4.7]

#### **4.5.8 Change of Payment Period**

Except for customers at post offices subject to 4.5.7, a box customer of record may change the payment period by submitting a new application noting the month to be used as the start of the revised payment period. The date selected must be before the end of the current payment period. The unused fee for the period being discontinued may be refunded under 4.7, and the fee for the new payment period must be fully paid in advance. A change of payment period date may not be used to circumvent a change in box fees. [D910.4.8]

#### 4.5.9 Academic Institutions

The USPS does not set or collect fees for boxes owned by an academic institution if the boxes are separate from designated USPS areas and serviced by employees or agents of the institution. [D910.4.9]

#### 4.5.10 Adjusting Fees

In postal facilities primarily serving academic institutions or their students, box fees may be adjusted to fit the semester schedules, using the matrix below. Charges are rounded up to the next multiple of \$0.10. No refund is made for discontinued service when a box is obtained under this standard.

| SERVICE PERIOD        | ADJUSTED FEE         |
|-----------------------|----------------------|
| 95 days or less       | 1/2 semiannual fee   |
| 96 to 140 days        | 3/4 semiannual fee   |
| 141 to 190 days       | Full semiannual fee  |
| 191 to 230 days       | 1-1/4 semiannual fee |
| 231 to 270 days       | 1-1/2 semiannual fee |
| 271 days to full year | 2 semiannual fees    |

[D910.4.10]

### 4.6 Fee Group Assignments

#### 4.6.1 Regular Fee Groups

Post office boxes are assigned to fee groups listed in 4.1 based upon cost estimates of the facility space for post office boxes in each 5-digit ZIP Code. Local post offices can provide information about fees for a particular ZIP Code. [D910.5.1]

#### 4.6.2 Free Box Service (Group E)

Customers may qualify for free (Group E) post office box service if their physical address or business location meets all of the following criteria:

- a. The physical address or business location is within the geographic delivery ZIP Code boundaries administered by a post office.
- b. The physical address or business location constitutes a potential carrier delivery point of service.
- c. The USPS chooses not to provide carrier delivery to the physical address or business location.
- d. The customer does not receive carrier delivery via an out-of-bounds delivery receptacle. [D910.5.2]

#### 4.6.3 Additional Standards for Free Box Service

Only one free (Group E) post office box may be obtained for each potential carrier delivery point of service. Group E customers are assigned the smallest available box that will reasonably accommodate their daily mail volume. Eligibility for Group E boxes does not extend to individual tenants, contractors, employees, or other individuals receiving or eligible to receive single-point delivery such as delivery to a hotel, college, military installation, or transient trailer park. A customer must pay the applicable fee for each additional box requested beyond the initial box obtained at the Group E fee. [D910.5.3]

## 4.7 Fee Refund

### 4.7.1 Calculation

When post office box service is terminated or surrendered by the customer, the unused portion of the fee may be refunded as follows:

- a. If service is discontinued any time within the first 3 months of the service period, then one-half of the fee is refunded.
- b. If service is discontinued after the beginning of the fourth month of the service period, then none of the fee is refunded.
- c. If service is discontinued and the customer has prepaid for the next semiannual service period, then the entire fee for that next period is refunded. [D910.6.1]

### 4.7.2 Discontinued Postal Facility

When a postal facility is discontinued or relocated, a box customer at that facility may obtain a refund of unused box fees if box service at that location is discontinued and additional travel of 1/4 mile or more (from the physical address on the customer's Form 1093) is required to obtain equivalent service. For this purpose, one-sixth of a semiannual fee is refunded for each month left in the payment period. The refund is computed from the first day of that month (if the effective date of the facility discontinuance is on or before the 15th of the month) or from the first day of the next month (if the effective date is after the 15th of the month). [D910.6.2]

## 4.8 Keys and Locks

### 4.8.1 Key Deposit

Two post office box keys are initially issued to each new box customer. Box customers must pay a refundable key deposit on each of these keys. The refundable key deposit must be paid on each additional key requested under 4.8.2. When box service is terminated, the key deposit is refunded to the customer for each key (including additional or replacement keys in 4.8.2) that is returned to the post office where the box was issued. [D910.7.1]

### 4.8.2 Additional Key Fee

A box customer may obtain additional or replacement keys by submitting Form 1094 and paying the refundable key deposit (see 4.8.1) and the key fee in 4.1b. The key fee for additional or replacement keys is not refundable. Worn or broken keys are replaced without charge when returned to the post office where the box is located. [D910.7.2]

### 4.8.3 Restrictions

A customer using a post office box may not obtain or use keys other than those issued by the USPS. [D910.7.3]

### 4.8.4 Lock Replacement

The primary box customer (box applicant) may request that the post office box lock be changed. To change the lock, the customer must first pay the applicable lock fee in 4.1c. Lock fees are charged for replacing keyed locks and combination locks and for re-setting combination locks. Lock fees are not refundable. Customers may turn in post office box keys for the old lock and get a refund of the key deposit. Two keys

508.4.9

are provided with the new lock, with a refundable deposit for each key charged under 4.8.1. Customers may obtain additional keys for the new lock under 4.8.2. [D910.7.4]

## **4.9 Service Refusal or Termination**

### **4.9.1 Refusal**

A postmaster may refuse to approve post office box service if: the applicant submits a falsified or incomplete application for box service; within the 2 years immediately before submitting the application, the applicant physically abused a box or violated a standard on the care or use of a box; or there is substantial reason to believe that the box is to be used for activities as described in 4.4.5, *Unlawful Activity*, or 4.4.6, *Forwarding*. [D910.8.1]

### **4.9.2 Termination**

A postmaster may terminate post office box service, including that of a customer paying a Group E fee, if the box customer or its representative falsifies the application for the box; physically abuses the box; refuses to update information on the box application; violates any standard on the care or use of the box; conducts himself or herself in a violent, threatening, or otherwise abusive manner on postal premises; or uses it for any unlawful activity as described in 4.4.5. The customer is notified of the postmaster's determination to refuse or terminate service and of the appeal procedures for that determination. [D910.8.2]

### **4.9.3 Customer Appeal**

The applicant or box customer may file a petition appealing the postmaster's determination to refuse or terminate service within 20 calendar days after notice, as specified in the postmaster's determination and 39 CFR 958. The filing of a petition prevents the postmaster's determination from taking effect and transfers the case to the USPS Judicial Officer. The Administrative Law Judge's or the Judicial Officer's decision under 39 CFR 958 constitutes the final USPS decision. [D910.8.3]

### **4.9.4 Surrendered Box**

A post office box is surrendered if:

- a. A box customer refuses or fails to pay the proper fees by the due date.
- b. A box customer submits a written notice to discontinue service.
- c. Any person other than the box customer attempts to renew service at the end of the period for which the box is issued.
- d. A box customer, or an appointed executor or administrator of a deceased box customer, submits a permanent change-of-address order. [D910.8.4]

### **4.9.5 Boxes Not Surrendered**

A post office box is not surrendered if:

- a. A box customer dies or disappears before the end of the period for which the box is issued.
- b. A box customer submits a temporary change-of-address order.

- c. A change-of-address order is submitted by any person other than the box customer, or an appointed executor or administrator of a deceased box customer, for mail going to the box. [D910.8.5]

## 5.0 Caller Service

### 5.1 Caller Service Fees

Fees are charged as follows:

- a. For each separation provided, per semiannual period (all post offices): \$412.00.
- b. For each reserved call number, per calendar year (all post offices): \$32.00.  
[R900.5.0]

### 5.2 Basic Information

#### 5.2.1 Purpose

Caller service is a premium service available for a fee to any customer requiring more than free carrier service or the largest installed box size, or to any customer who is required to use caller service by standard. The service allows a customer to pick up mail at a post office call window or loading dock when the office is open. Caller service does not include general delivery service. A customer may obtain caller service for receiving the mail of a client, subject to [1.0, Recipient Options](#), and [2.0, Conditions of Delivery](#). A postmaster and a caller may not make any agreement that contravenes the regulations on caller service or its fees. [D920.1.1]

#### 5.2.2 Caller

A caller is the person signing the application as an individual, or the organization represented by the individual signing the application. [D920.1.2]

#### 5.2.3 Service Types

Destination caller service is caller service provided at the postal facility to which the caller's mail is addressed. Origin caller service (accelerated reply mail) is described in [5.8](#). [D920.1.3]

#### 5.2.4 Caller Service Number

Except for origin caller service, the customer (including a customer using a post office box number) is assigned a caller service number before caller service may begin. A caller number is assigned for each separation used. Except under [5.2.6, Exemption](#), mail addressed to a caller service customer must include "Post Office Box" or "PO BOX" followed by the assigned number in the mailing address immediately above the city, state, and ZIP Code. [D920.1.4]

#### 5.2.5 Reserving a Caller Number

Customers may reserve a caller number for future use by paying the caller number reservation fee in [5.1b](#). The postmaster determines the reserved numbers and may restrict the availability of this service. [D920.1.5]

#### 5.2.6 Exemption

A postmaster may exempt any customer continuously receiving firm holdout service since July 3, 1994, from the standard in [5.2.4](#) that correspondents must use the assigned post office box (caller service) number in the address. [D920.1.6]

508.5.2.7

**5.2.7 Restriction**

The USPS may restrict caller service if such service adversely affects postal operations. [D920.1.7]

**5.2.8 Required Use**

When mail for a customer's post office box(es) exceeds the capacity of the box(es) on 12 of any 20 consecutive business days (excluding Saturdays, Sundays, and national holidays), or when the customer seeks multiple caller service separations, the postmaster can require the customer to use caller service, change to a larger box, or use one or more additional boxes (subject to availability) to which mail will be addressed. A customer required to use caller service because of the mail volume received may, once per semiannual payment period, make a written request to the postmaster for a new determination of whether current mail volume requires continued use of caller service. [D920.1.8]

**5.2.9 U.S. Agencies and Schools**

Federal agencies and the various schools and departments within educational institutions are considered separate customers for 5.2.8. [D920.1.9]

**5.2.10 Eligible Customers**

Caller service may be provided to the following:

- a. A new customer planning to receive an incoming volume of mail that cannot fit into the largest available post office box.
- b. A customer wanting a post office box when a box is unavailable, and the postmaster determines that such service does not adversely affect postal operations.
- c. A customer formerly receiving firm holdout service. [D920.1.10]

**5.3 Service****5.3.1 Application**

To apply for caller service, the applicant must complete all relevant spaces on Form 1093 and submit it to any postal facility that provides public window service. The facility need not be the one where destination caller service is desired. An incomplete or falsified application is sufficient reason to deny or discontinue service. An application is not considered approved until the USPS verifies the applicant's identity. [D920.2.1]

**5.3.2 Transferring Service**

Caller service may be transferred, without payment of an additional fee, to a different facility of the same post office if that facility has caller service. To transfer service, the caller must submit a new application either to the facility where service is currently provided or to the facility where service is desired. A caller may transfer service no more than once in any semiannual payment period and must submit a completed Form 3575 at the time of transfer. [D920.2.2]

**5.3.3 Minor**

Caller service may be provided to a minor (a person under 18 years of age) unless the minor's parent or guardian submits a written objection to the postmaster. [D920.2.3]

## 5.4 Conditions of Use

### 5.4.1 Mail Receipt

An individual caller or organization may receive mail properly addressed to the caller number. Mail addressed only to a caller number is delivered to the caller so long as no improper or unlawful business is conducted. A caller who, as a regular practice, wants to call for mail at a postal facility more than once in any 24-hour period must obtain the postmaster's approval of the pickup schedule. [D920.3.1]

### 5.4.2 Updating

When any information required to be provided by the caller on Form 1093 changes, the caller must notify the post office of such changes. [D920.3.2]

### 5.4.3 Unlawful Activity

Caller service may not be used for, or in connection with, a scheme or enterprise that violates any federal, state, or local law; breaches an agreement between the caller and a federal, state, or local agency for the caller to discontinue a specified activity; or violates or attempts to evade any order of a court or administrative body. [D920.3.3]

### 5.4.4 Forwarding

Caller service may not be used when the primary purpose is to have the USPS forward or transfer mail to another address free of charge. [D920.3.4]

## 5.5 Basis of Fees and Payment

### 5.5.1 Caller Service Fee

Customers must pay the caller service fee listed in 5.1b. The fee must be paid for each caller number or separation used, with the following exceptions:

- a. If a caller uses many caller numbers but receives only a bulk delivery of mail not separated to those numbers, either because this mail is sorted to the customer's unique 5-digit ZIP Code or because sortation is made by caller name or other identification, then the caller service fee is charged only for each separation actually made. The reserved number fee is charged for each of the caller numbers to which mail received by the caller is addressed.
- b. When a post office box service applicant is provided a single caller service separation because of a shortage of available post office boxes, then the fee charged is the fee for the largest installed post office box. In this instance, neither the caller service fee nor the reserved number fee is charged. [D920.4.1]

### 5.5.2 Reserved Number

The reserved caller number fee in 5.1b is charged per calendar year or any part of a calendar year for each number reserved by a customer. Reserved caller number fees are not prorated. [D920.4.2]

### 5.5.3 Fee Changes

A change in caller service fees (including reserved number fees) can arise from a general fee change. Any change in caller service fees takes effect on the date of the action that caused the change unless an official announcement specifies another date. If a caller service fee is increased, no customer must pay at the new rate until

## 508.5.5.4

the end of the current service period, and no retroactive adjustment is to be made for a payment received before the date of the change. The fee charged is that in effect on the date of payment. [D920.4.3]

**5.5.4 Box Number**

If a caller uses a physical post office box to obtain a caller number, the applicable fees for both post office box service and caller service must be paid. [D920.4.4]

**5.5.5 Payment**

The basic caller service fee is for a 6-month period. The fee must be paid in advance for each 6-month period. The fee may be paid for two periods at a time (i.e., up to 1 year in advance), but not more. The fee that must be paid is the one that is in effect on the day that the fee is paid. Fees may be paid using cash, credit or debit card, or check or money order payable to the postmaster. A mailed payment must be received by the postmaster on or before the due date. [D920.4.5]

**5.5.6 Payment Period**

Except under 5.5.8, the beginning date for a caller fee payment period is determined by the approval date of the application. The period begins on the first day of either the same month if the application is approved on or before the 15th of the month, or the next month if approved after the 15th of the month. After that, caller fees for renewal of service may be paid any time during the last 30 days of the service period, but no later than the last day of the service period. [D920.4.6]

**5.5.7 Change of Payment Period**

A caller of record may change the payment period by submitting a new application noting the month to be used as the start of the revised payment period. The date selected must be before the end of the current payment period. The unused fee for the period being discontinued may be refunded under 5.6, and the fee for the new payment period must be fully paid in advance. A change of payment period date may not be used to circumvent a change in caller service fees. [D920.4.7]

**5.5.8 Exception**

Postmasters at offices with fewer than 500 post office boxes may set April 1 and October 1 as the beginning of payment periods for caller service customers in their offices. Payment periods beginning other than April 1 or October 1 are brought into alignment with these respective dates by adjusting fees as follows:

- a. New service, one-sixth of the semiannual fee is charged for each remaining month between the beginning of the new payment period and the next April 1 or October 1.
- b. Existing service, one-sixth of the semiannual fee is charged for each remaining month between the end of all currently paid periods and the next April 1 or October 1.
- c. Next one or two semiannual payment periods, an adjustment may be accepted in addition to fees. [D920.4.8]

## 5.6 Fee Refund

### 5.6.1 Discontinued Number

When caller service is terminated or surrendered by the customer, the unused portion of the fee may be refunded as follows:

- a. If service is discontinued any time within the first 3 months of the service period, then one-half of the fee is refunded.
- b. If service is discontinued after the beginning of the fourth month of the service period, then none of the fee is refunded.
- c. If service is discontinued and the customer has prepaid for the next semiannual service period, then the entire fee for that next period is refunded. [D920.5.1]

### 5.6.2 Discontinued Postal Facility

When a postal facility is discontinued or relocated, a caller service customer at that facility may obtain a refund of unused caller service fees if caller service at that location is discontinued and additional travel of 1/4 mile or more (from the physical address on the caller's Form 1093) is required to obtain equivalent service. For this purpose, one-sixth of a semiannual fee is refunded for each month left in the payment period. The refund is computed from the first day of that month (if the effective date of the facility discontinuance is on or before the 15th of the month) or from the first day of the next month (if the effective date is after the 15th of the month). [D920.5.2]

### 5.6.3 Reserved Number Fee

The reserved number fee is not refundable. [D920.5.3]

## 5.7 Service Refusal or Termination

### 5.7.1 Refusal

A postmaster may refuse to approve caller service if the applicant submits a falsified or incomplete application for caller service; within the 2 years immediately before submitting the application, the applicant violated a standard on the use of the service; or there is substantial reason to believe that the service is to be used for activities described in [5.4.3, Unlawful Activity](#), or [5.4.4, Forwarding](#). [D920.6.1]

### 5.7.2 Termination

A postmaster may terminate caller service if the caller or its representative falsifies the application for the service; refuses to update information on the application; violates any standard on the use of the service; conducts himself or herself in a violent, threatening, or otherwise abusive manner on postal premises; or uses it for any unlawful activity as described in [5.4.3](#). The caller is notified of the postmaster's determination to refuse or terminate service and of the appeal procedures to that determination. [D920.6.2]

### 5.7.3 Customer Appeal

The applicant or caller may file a petition opposing the postmaster's determination to refuse or terminate service within 20 calendar days after notice, as specified in the postmaster's determination and 39 CFR 958. The filing of a petition prevents the

## 508.5.7.4

postmaster's determination from taking effect and transfers the case to the USPS Judicial Officer. The Administrative Law Judge's or Judicial Officer's decision under 39 CFR 958 constitutes the final USPS decision. [D920.6.3]

**5.7.4 Surrendered Service**

Caller service is deemed surrendered if the caller submits a permanent change-of-address order, fails or refuses to pay the appropriate fees by the due date, or submits a written notice to discontinue service. [D920.6.4]

**5.8 Accelerated Reply Mail (ARM)****5.8.1 Purpose**

Accelerated reply mail (ARM) is *origin caller service* provided at a postal facility other than the one to which the caller's mail is addressed. ARM is subject to the applicable standards for caller service and the additional standards in [5.8](#). [D920.7.1]

**5.8.2 Applicability**

ARM must be obtained at an originating mail processing facility that is fully automated to process prebarcoded mail. [D920.7.2]

**5.8.3 Barcoding**

The caller's mail must meet the standards for barcoded First-Class Mail and must be certified by the mailpiece design analyst at the origin facility where ARM service is requested. The barcode on the mailpiece must represent the ZIP+4 code or the mailer's unique 5-digit ZIP Code printed on the mailpiece. [D920.7.3]

**5.8.4 FIM A**

The caller's mail must bear facing identification mark (FIM) A. [D920.7.4]

**5.8.5 Caller Service**

Caller service must also be obtained at the destinating postal facility. The address on all mailpieces to be received through ARM must be the post office box address assigned where destination caller service is authorized. Mailpieces that show a dual address must show only the post office box on the line immediately above the city, state, and ZIP Code line. [D920.7.5]

**5.8.6 Mailer Receipt**

The mailer may either pick up ARM at the origin facility caller service window or have it reshipped, through Express Mail Custom Designed Service, to the destination caller service address or to another address specified by the mailer in the Custom Designed Service Agreement. To change the destination address on the Custom Designed Service Agreement, the mailer must provide a 30-day advance notice and submit an amended ARM application, completing only the "Applicant Information" and "Express Mail Reship." [D920.7.6]

**5.8.7 CMRA**

An applicant who is a commercial mail receiving agent (CMRA) must also meet the applicable standards in [1.0, Recipient Options](#), and [2.0, Conditions of Delivery](#). [D920.7.7]

**5.8.8 Mailer Compliance**

An applicant for ARM must meet the application procedures in 5.3. Besides completing Form 1093, an applicant for ARM must also complete Form 8061 and submit both forms to the facility where ARM service is desired. [D920.7.8]

**5.8.9 USPS Actions**

ARM service is not provided until the USPS verifies the applicant's identity and service availability at the requested facility, and makes scheme preparations. [D920.7.9]

**5.8.10 ARM Assignment**

When the application is approved and the caller service fee received, an ARM number is assigned. A separate basic fee must be paid for each facility where ARM service is provided. [D920.7.10]

**5.8.11 Transfer**

An ARM authorization may not be transferred to another facility. [D920.7.11]

**5.8.12 Past-Due Caller Fee**

Payments for ARM service must be received at least 45 days before the applicable semiannual period. Payment of the renewal fee is due at least 45 days before the last day of the last month of the current period. Payment may be made for the next semiannual or annual period, as appropriate. If, on notice, the customer does not pay the fee by the 30th day before the end of the current payment period, the barcode sortation scheme is revised to remove the separation for the caller. Once that change is made, the caller must reapply to obtain further ARM service. [D920.7.12]

**5.8.13 Refund**

A refund is made only for future prepaid periods if a caller discontinues ARM service. No refund is made for the remaining part of the current fee period. [D920.7.13]

**6.0 General Delivery****6.1 Purpose**

General delivery is intended primarily as a temporary means of delivery:

- a. For transients and customers not permanently located.
- b. For customers who want post office box service when boxes are unavailable. [D930.1.1]

**6.2 Service Restrictions**

General delivery is available at only one facility under the administration of a multifacility post office. A postmaster may refuse or restrict general delivery:

- a. To a customer who is unable to present suitable identification.
- b. To a customer whose mail volume or service level (e.g., mail accumulation) cannot reasonably be accommodated. [D930.1.2]

508.6.3

**6.3 Delivery to Addressee**

A general delivery customer can be required to present suitable identification before mail is given to the customer. [D930.1.3]

**6.4 Holding Mail**

General delivery mail is held for no more than 30 days, unless a shorter period is requested by the sender. Subject to 6.2, general delivery mail may be held for longer periods if requested by the sender or addressee. [D930.1.4]

**7.0 Firm Holdout****7.1 Purpose**

Firm holdout service allows a customer to obtain street-addressed mail from the post office when the customer normally receives 50 letters or more on the first delivery trip, or when the customer is a news agent or publisher's representative and receives publications that qualify for newspaper treatment. [D930.2.1]

**7.2 Obtaining and Using Service**

To obtain firm holdout service, a customer must fill out Form 3801. The form must include the signature of each employee or agent authorized to pick up the mail. There is no fee for firm holdout service. On the postmaster's approval, based on the availability of resources, the customer may pick up mail at a postal unit once each delivery day at the time and place of delivery specified by the postmaster. [D930.2.2]

**7.3 Service Cancellation**

A customer may cancel a firm holdout at any time. The postmaster may cancel firm holdout service when the mail volume falls below the 50-piece requirement on each delivery day over a 30-day period. The postmaster may also cancel the service when the mail is not picked up for 10 consecutive days and the customer does not arrange with the postmaster to hold the mail. A customer may not request restoration of the service for 1 year after its cancellation. [D930.2.3]

**8.0 Pandering Advertisements****8.1 Prohibitory Order****8.1.1 Initiation by Addressee**

Pursuant to 39 USC 3008, an addressee who receives a solicited or unsolicited advertisement offering for sale matter that, in the addressee's sole discretion, is "erotically arousing or sexually provocative," may, by completing Form 1500, obtain a prohibitory order directing the mailer of the advertisement to refrain from making further mailings to that addressee. Using this form is not mandatory if the information that the form solicits is in a signed written statement. [C033.1.1]

**8.1.2 Deceased**

A person entitled to receive mail addressed to a deceased person is regarded as the addressee of such mail for obtaining a prohibitory order in the name of the deceased. [C033.1.4]

**8.1.3 Addressed to Job Title**

A person authorized to receive mail addressed to a job title (e.g., sales manager) of any business, government agency, or institution, is regarded as the addressee of such mail for obtaining a prohibitory order covering such job title. [C033.1.5]

**8.1.4 Apparent Authority**

Any person with apparent authority to act for a business, governmental, or institutional addressee is regarded as the addressee of such organization's mail for obtaining a prohibitory order in the name of such organization. [C033.1.6]

**8.1.5 Applying for Order**

The application for prohibitory order may be submitted at any post office and must be accompanied by the advertisement on which the application is based, and its opened envelope or other cover or wrapper. When applying for a prohibitory order, if the addressee receives mail at more than one address, the addressee should complete an additional Form 1500 for each address. [C033.1.2]

**8.1.6 Applying for Order On Behalf of Children**

An addressee who is the parent of one or more children less than 19 years of age residing with that parent may request an order on behalf of any or all such children. If the parent of any such child determines that matter offered for sale in an advertisement addressed to the child is "erotically arousing or sexually provocative," the parent may request issuance of an order prohibiting further mailings to such child. This order is not enforced for mailings received by such person after that person reaches 19 years of age. Such person, however, may ratify the order by giving written notice to the manager of the Prohibitory Order Processing Center (see [608.8.0](#) for address) that the order is to continue in effect for himself or herself. [C033.1.3]

**8.1.7 Effects of Prohibitory Order**

The prohibitory order forbids the mailer, his or her agents, or assigns from making further mailings to the designated addressees, effective on the 30th calendar day after the mailer's receipt of the order; directs immediate deletion of such addressees from all mailing lists owned or controlled by the mailer, his or her agents, or assigns; and prohibits any sale, rental, exchange, or other transaction by the mailer, his or her agents, or assigns, involving mailing lists bearing the names of the designated addressees. [C033.1.7]

**8.1.8 Continuing Order With Address Change**

An addressee protected by a prohibitory order who has a permanent change of mailing address may continue the protection provided by the order by notifying the mailer of his or her change of address and desire to have the order honored for the new address. The notification must be sent by Certified Mail, return receipt requested. To enforce any violation of the order at the new address, a copy of the notification and return receipt must be submitted to the manager of the Prohibitory Order Processing Center (POPC) (see [608.8.0](#) for address). Such written notification must modify the order by substituting the new address for the address designated in the original or previously modified order. An order thus modified takes effect in the same manner as the original order. [C033.1.11]

508.8.1.9

**8.1.9 Denying Application**

A prohibitory order is not issued when the application is based on any of these:

- a. The request of a person who the USPS finds does not qualify under any of the foregoing paragraphs of this section.
- b. A mailpiece that the USPS finds does not offer matter for sale.
- c. A mailpiece not originating with the person against whom the order is sought (e.g., a newspaper or magazine not mailed by the person on whose advertisement the application is based).
- d. A mailpiece received by a foreign addressee who has no regular mailing address at which mail is delivered directly by the USPS.
- e. A mailpiece sent by a mailer not subject to U.S. jurisdiction.
- f. A basis in any other way insufficient under the statute. [C033.1.8]

**8.1.10 Abandoned Applications**

An applicant for a prohibitory order or its enforcement is deemed to have abandoned the application if the applicant fails to comply, within 60 days, with any USPS request to supplement, correct, or complete the application. The USPS does not keep abandoned applications. [C033.1.9]

**8.1.11 Voiding Orders**

A prohibitory order is considered void on expiration of 5 years from the date of issuance, except that, when application for enforcing a prohibitory order is made, it is not considered void until expiration of 5 years from the last application for enforcement. USPS files on such void orders may be disposed of, if a record is kept of the disposal of each such file and the reason for the disposal. [C033.1.10]

**8.1.12 Availability of Remedies**

The fact that a name and address is on the USPS list of persons not wanting to receive sexually oriented advertisements through the mail does not limit or affect the authority of the USPS to issue a prohibitory order protecting such name and address. The issuance of a prohibitory order also does not limit or affect the authority of the USPS to list, under 9.0, the name and address protected by such prohibitory order. [C033.2.0]

**8.2 Taking Action Against Violations****8.2.1 Requesting Enforcement**

If a person protected by a prohibitory order who receives a mailpiece apparently in violation of such order opens the envelope or other outside cover of such piece and writes on it the identifying number of the prohibitory order (if known) and a statement indicating receipt by mail and the date of receipt (for example, "I received this mailpiece on [date]."), followed by the person's signature. The person submits the piece directly, or through a post office, to the Prohibitory Order Processing Center. Such submission constitutes an application for enforcing the order. [C033.3.1]

### 8.2.2 Enforcement

When the USPS finds, after appropriate administrative proceedings under POPC Standard Operation Procedures (formerly Notice 241) and 39 CFR 963, that enforcement is warranted, it requests the U.S. Department of Justice to seek a court order directing compliance with the prohibitory order. [C033.3.2]

## 9.0 Sexually Oriented Advertisements

### 9.1 Basic Information for Sexually Oriented Advertisements

#### 9.1.1 Definition

39 USC 3010(d) defines *sexually oriented advertisement* as “any advertisement that depicts, in actual or simulated form, or explicitly describes, in a predominantly sexual context, human genitalia, any act of natural or unnatural sexual intercourse, any act of sadism or masochism, or any other erotic subject directly related to the foregoing.” It also provides that “material otherwise within the definition of this subsection shall be deemed not to constitute a sexually oriented advertisement if it constitutes only a small and insignificant part of the whole of a single catalog, book, periodical, or other work the remainder of which is not primarily devoted to sexual matters.” [C032.1.2]

#### 9.1.2 Legal Means

Section 3010 of Title 39 USC provides members of the public with a means to protect themselves and their minor children from receiving unsolicited sexually oriented advertisements through the mail. This section permits any person served by the USPS to file with the USPS a statement that he or she does not want to receive such advertisements through the mail. Any mailer who sends that person an unsolicited sexually oriented advertisement more than 30 days after the date when the USPS adds that person’s name to its reference list of those who want this protection may be subject to civil and criminal sanctions, under 39 USC 3011 and in 18 USC 1735-37. [C032.1.1]

#### 9.1.3 Mailer Responsibility

The responsibility for ensuring that no unsolicited sexually oriented advertisement is sent through the mail to any person in violation of section 3010 is placed by that section on the mailer of such advertisements. No USPS regulations may be used to place this responsibility on the USPS. [C032.1.3]

#### 9.1.4 Complying With Law

A person who mails sexually oriented advertisements only to persons who request to receive them does not violate the statute or regulations, if otherwise in compliance with the law whether buying and using the USPS list. [C032.6.2]

### 9.2 Applying for Listing

#### 9.2.1 USPS Form

A person may invoke the protection of section 3010 by completing and filing, with any postmaster or designated USPS representative, Form 1500, available at post offices. [C032.2.1]

## 508.9.2.2

**9.2.2 Authorized Filers**

A person may file in his or her own behalf and in behalf of any of that person's children under the age of 19 years who reside with that person or are under his or her care, custody, or supervision. An authorized officer, agent, fiduciary, surviving spouse, or other representative, may file in behalf of a corporation, firm, association, estate, or deceased or incompetent addressee. [C032.2.2]

**9.2.3 Five-Year Retention on List**

A person's name and address are kept on the list for 5 years, unless a request for revocation is filed sooner by that person. A person must file a new application at the end of the 5-year period to keep his or her name on the list. The names and addresses of minor children are removed from the list after the 5-year period or when they reach 19 years of age, whichever comes first. A minor must file an original application in his or her own behalf if the minor wants his or her name to remain on the list after reaching 19 years of age. [C032.2.3]

**9.2.4 Applications for Different Addresses**

The filing of a single application results in the listing of a single address for the person filing. A person who moves must file a new Form 1500 to receive the protection of section 3010 at his or her new address. Form 3575 may not be used for this purpose. [C032.2.4]

**9.2.5 Using Listed Addresses**

It is not a violation of section 3010 to mail a sexually oriented advertisement to a person at an address other than that which is shown for that person on the list. It is a violation to mail such an advertisement to that person at the address shown for that person even though he or she has moved from that address. [C032.2.5]

**9.3 Requesting Removal From List****9.3.1 Removal**

A person, at any time, may request the removal of his or her name and address, or that of one or more of his or her minor children, from the list by notifying the manager of the Prohibitory Order Processing Center (POPC) (see [608.8.0](#) for address). [C032.3.1]

**9.3.2 Receipt After Removal**

It is not evidence of a violation of section 3010 if a person (or that person's minor child) receives a sexually oriented advertisement in the mail on or after the date he or she requests the removal of his or her name from the list or his or her minor child's name. [C032.3.2]

**9.4 Availability of USPS Lists****9.4.1 General**

Copies of the list and/or periodic amendments to the list are available to any person paying the annual service fee. The list is provided on a CD-ROM. Information about or requests for the list must be submitted to the manager of the Prohibitory Order Processing Center (see [608.8.0](#) for address). A certified or cashier's check made payable to the USPS must be received in payment before the list is provided to the buyer. More information on CD-ROM format can be obtained from the manager. [C032.4.1]

**9.4.2 Annual Service Fee**

The annual service fee is determined by dividing the number of buyers for the previous calendar year into the total cost to the USPS of compiling, processing, printing, and distributing the list. [C032.4.2]

**9.4.3 Using Lists**

This list may be used by a mailer only to protect persons whose names appear on it from receiving unwanted sexually oriented advertisements through the mail. No person, including a subscriber to the list, may use the list for any other purpose, and no person may sell, lease, rent, lend, exchange, or license another to use this list for any other purpose, including its use by another to remove names from a list of persons to whom sexually oriented advertisements are to be sent. No person may use the list or a copy of the list for preparing mailings or other lists for sale, lease, rent, loan, exchange, or use by another. Violators are subject to criminal prosecution. [C032.4.3]

**9.5 Envelope Marking**

Section 3010(a) authorizes and directs the USPS to provide a mark or notice that must be placed on the envelope or cover of any sexually oriented advertisement sent through the mail, with the sender's name and address. The following provisions implement this authority and direction:

- a. Any person who mails or causes to be mailed any sexually oriented advertisement must place in the upper left corner of the exterior face of the mailpiece, whereon appear the address designation and postmarks, postage stamps, or indicia thereof, the sender's name and address. In the right portion below the postage stamp, or indicia thereof, and above the addressee designation, there must be placed "Sexually Oriented Ad." The words "Sexually Oriented Ad," however, need not be placed on the exterior envelope or cover of a mailpiece containing such an advertisement, if the contents of the mailpiece are enclosed in a sealed envelope or cover, inside the exterior envelope or cover, and the sealed envelope or cover bears conspicuously the words "Sexually Oriented Ad."
- b. The name and address of the sender and the required legend, if it is placed on the exterior face of the mailpiece, must be printed in a type size no smaller than that used for any other word on the envelope or other cover, and never smaller than 12-point type. Such type must be no less conspicuous than the boldest type used to print other words on the exterior face of the mailpiece.
- c. The contrast between the background and printing of the sender's name and address and the contrast between the background and the printing of the required notice must be no less than the contrast between the background and printing of any other word on the envelope or other wrapper.
- d. A clear space no less than 1/4 inch wide must surround the sender's name and address and the required notice, separating each from any other matter on the same envelope or cover. [C032.5.0]

**9.6 Violations**

This is a partial list of conduct that may violate 39 USC 3010 or 18 USC 1735:

508.9.7

- a. The mailing of a sexually oriented advertisement in an envelope or other wrapper that does not bear the name and address of the sender and the legend "Sexually Oriented Ad," under [9.5](#).
- b. The mailing directly or indirectly of a sexually oriented advertisement to a person whose name and address are on the list for more than 30 days.
- c. The sale, loan, lease, or licensing of the use of the list or a copy thereof in whole or in part.
- d. The use of the list or a copy of it in whole or in part for any purpose other than to ensure that no mailings of sexually oriented advertisements are made to persons on the list. [C032.6.1]

## **9.7 Reporting Unsolicited Advertisements**

### **9.7.1 Submitting a Report**

Anyone who wants to report receipt of an unsolicited sexually oriented advertisement after an addressee's name and address are on the list for more than 30 days should submit to any postmaster, or directly to the POPC manager, the entire mailpiece, including the envelope or other wrapper. The piece must have been opened by the addressee. When submitting the piece, the addressee must endorse the envelope or other wrapper and also the inside contents in substance as follows: "I received this mailpiece on [date]," and sign the statement. If received by the postmaster, the piece must be forwarded promptly to the POPC manager. The manager then forwards the piece to the appropriate Inspection Service Field Division Office. [C032.6.3]

### **9.7.2 Verifying Inclusion on List**

A customer wanting to verify inclusion on the list should write to the Prohibitory Order Processing Center (see [608.8.0](#) for address). [C032.6.4]

## 509 Other Services

### Overview

- [1.0 Address Information System Products](#)
- [2.0 Nonpostal Services](#)

### 1.0 Address Information System Products

#### 1.1 Delivery Statistics File

Delivery statistics for all city carrier routes, rural routes, highway contract routes, general delivery units, and post office box sections are included in the Delivery Statistics File. This database is available on CD-ROM or cartridge for the entire nation. Information by states also is available on CD-ROM. The information is updated monthly through transaction files and can be ordered either with a single base file in the initial shipment or with a base file provided bimonthly. For information on charges and an order form, call 1-800-238-3150. To order the products, send a written request and appropriate payment to the USPS Delivery Statistics File, National Customer Support Center (see [608.8.0](#) for address). [A930.1.0]

#### 1.2 AIS Database Products

Customers may use USPS Address Information System (AIS) products to obtain correct 5-digit ZIP Codes for the addresses on their mailing lists. These products generally are more economical than mailing list services. Customers with computerized address lists may obtain the City State Product, Five-Digit ZIP Code File, enhanced Line of Travel (eLOT) information, Z4CHANGE File, ZIPMOVE File, Carrier Route File, and ZIP+4 tapes. Information about ordering and using these products is available by calling 1-800-238-3150. [A930.2.0]

#### 1.3 AIS Database Products

##### 1.3.1 Descriptions

The following products may be ordered from the USPS:

- a. Database Cartridge and Bimonthly Cumulative Updates, which contain a master copy plus bimonthly updates of all add, change, or delete actions that have occurred within the database since the last release date.
- b. Database Cartridge and Monthly Transactions, which contain a master copy plus monthly updates of all add, change, or delete actions that have occurred within the database since the last release date.
- c. Technical Guide, a printed (paper) document that provides data formats and field definitions of the records in AIS products. The guide accompanies any product ordered, but may also be ordered separately or accessed at [www.usps.com](http://www.usps.com). [A930.3.1]

##### 1.3.2 Ordering

The products in [1.3.1](#) may be obtained by sending a written request and appropriate payment to the National Customer Support Center. For information on charges, call 1-800-238-3150. [A930.3.2]

**1.3.3 Specifications**

In the written request, mailers must specify the name of the product needed. The request must specify CD-ROM, ASCII, or EBCDIC cartridge at 38K BPI. [A930.3.3]

**1.4 Carrier Route Schemes**

Under [507.6.0, Mailing List Services](#), a mailer may ask for a copy of the city scheme used by clerks for sorting mail. The mailer may also ask that the USPS sort address cards, plates, or stencils by carrier routes. However, the mailer is responsible for sorting under the latest bimonthly Carrier Route File scheme. The mailer is considered to have made a sorting error only if the mail was not sorted according to the latest bimonthly Carrier Route File scheme. [A930.4.0]

**1.5 Delivery Statistics**

In post offices with rural delivery, highway contract box delivery, and post office box delivery, postmasters must provide, at no charge, the following information for their respective offices:

- a. Number of post office boxes rented.
- b. Route numbers, number of boxes, and number of families on each rural and highway contract box delivery route (including seasonal data, if applicable).
- c. Number of families served or number of business places served by rural or highway contract box delivery routes within the total delivery area. [A930.5.0]

**1.6 Computerized Delivery Sequence (CDS)**

The Computerized Delivery Sequence (CDS) file is a 5-digit ZIP Code-based electronic customer product that provides and updates delivery sequence address information by carrier route for qualified mailers. Mailers must first qualify for CDS information through the sequencing described in [507.7.0](#). Once a mailer has qualified for a 5-digit ZIP Code area, delivery sequence information is made available via electronic media. The CDS file is updated bimonthly. [A930.6.0]

**1.7 Delivery Sequence File<sup>2</sup> (DSF<sup>2</sup>)**

The Delivery Sequence File<sup>2</sup> (DSF<sup>2</sup>) is a computerized file that contains information on all delivery point addresses serviced by the USPS, with the exception of general delivery. Each matching address record is assigned the ZIP+4 code, carrier route code, delivery sequence, delivery type, and seasonal delivery information. The DSF<sup>2</sup> is updated monthly and is available through licensees approved by the USPS. A list of licensees is available at [www.ribbs.gov](http://www.ribbs.gov) or by contacting the National Customer Support Center (see [608.8.0](#) for address). [A930.7.0]

**1.8 Enhanced Line-of-Travel (eLOT) Product**

The USPS provides an electronic product called "eLOT." The USPS requires address lists to be processed through CASS-certified ZIP+4 address-matching software before being processed against an eLOT product. Records that are not ZIP+4-coded may not be used with this product. eLOT products are updated bimonthly and are available for purchase from the National Customer Support Center (see [608.8.0](#) for address). [A930.8.0]

## 2.0 Nonpostal Services

### 2.1 **Bird Hunting Stamps**

Migratory bird hunting and conservation stamps (“bird stamps”) are required by federal law for the hunting of migratory birds, such as ducks and geese. As a public convenience, these stamps are sold at all post offices in CAGs A through J and, based on demand, at designated offices in CAGs K and L. These post offices act as agents of the federal government for this function. Migratory bird stamps are nonredeemable and all sales are final. [S020.4.1]

### 2.2 **U.S. Savings Stamps**

Post offices no longer redeem U.S. savings stamps posted in albums, previously acceptable as postal funds. Customers should contact a Federal Reserve Bank or branch, or mail albums at their own risk to the Bureau of the Public Debt, U.S. Department of the Treasury. [S020.4.2]

### 2.3 **U.S. Savings Bonds**

The USPS discontinued over-the-counter sales of U.S. savings bonds on March 26, 1977, at the request of the Treasury Department. Inquiries should be made to local financial institutions or the Treasury Department. [S020.4.3]

### 2.4 **Postal Savings**

The Postal Savings System was discontinued by Public Law 89-377, approved March 28, 1966. The effective date for closing the system was April 27, 1966. The final expiration date was July 13, 1985, for inquiries that could lead to recovery of money invested in Postal Savings Accounts and/or Postal Savings Certificates. [S020.4.4]

# 601 Mailability

**Overview**

- 1.0 General Standards
- 2.0 Packaging
- 3.0 Acceptable Containers
- 4.0 Cushioning, Closure, Sealing, and Reinforcements
- 5.0 Content and Extra Service Markings
- 6.0 Special Mailing Containers
- 7.0 Packaging Standards for BMCs
- 8.0 Nonmailable and Restricted Articles and Substances Generally
- 9.0 Perishables
- 10.0 Hazardous Materials
- 11.0 Other Restricted and Nonmailable Matter
- 12.0 Written, Printed, and Graphic Matter Generally

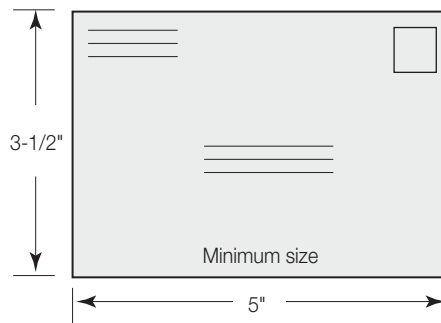

## 1.0 General Standards

### 1.1 Minimum Dimensions

For mailability, the following standards apply:

- a. All mailpieces must be at least 0.007 inch thick.
- b. All mailpieces (except keys and identification devices) that are 1/4 inch thick or less must be:
  1. At least 3-1/2 inches high and at least 5 inches long.
  2. Rectangular, with four square corners and parallel opposite sides (see [Exhibit 1.1](#)), unless prepared as Customized MarketMail under [705.1.0](#).  
[C010.1.1]

**Exhibit 1.1 Minimum Dimensions, Pieces 1/4" Thick or Less**

Minimum thickness = 0.007"

[C010.1.1]

**1.2 Maximum Dimensions and Weight**

No mailpiece may weigh more than 70 pounds. Except for Parcel Post, no mailpiece may measure more than 108 inches in length and girth combined. For parcels, length is the distance of the longest dimension and girth is the distance around the thickest part. [C010.1.2]

**1.3 Length and Height**

The location and orientation of the delivery address on a mailpiece generally establish which dimensions of the piece are the length and the height. The *length* is the dimension parallel to the address as read; the *height* is the dimension perpendicular to the length; the *top* and *bottom* of the piece are the upper and lower edges, respectively, when the address is positioned for normal reading. This general rule does not apply to:

- a. Automation rate flats.
- b. Standard Mail Enhanced Carrier Route flats.
- c. Standard Mail Customized MarketMail.
- d. Pieces thicker than 1/4 inch that are not prepared and mailed as a flat. [C010.1.3]

**1.4 Nonmailable, Nonmachinable Placement**

The location of the delivery address on a letter-size mailpiece determines which dimensions are the length and height of the piece. Consequently, the placement of the address may render a piece nonmailable or nonmachinable. [A010.1.4]

**1.5 General Mailability and Right of Refusal**

Articles presented for mailing must be prepared under the general and specific standards in this document. The USPS accepts properly packaged and marked parcels but reserves the right to refuse nonmailable or improperly packaged articles or substances. Additional or other standards can apply to overseas military post offices and international mail. [C010.2.1]

**1.6 Mailer's Responsibility**

It is the mailer's responsibility to refrain from depositing nonmailable matter in the mail. The mailer must comply with applicable postal laws and regulations governing mailability and preparation for mailing, as well as nonpostal laws and regulations on the possession, treatment, transmission, or transfer of particular matter. Information about USPS standards is available from postmasters, business mail entry managers, and the PCSC manager (see [608.8.0, USPS Contact Information](#)). [C010.9.3]

**2.0 Packaging**

**2.1 Preservation**

The mailer must package the contents of a shipment to prevent deterioration or degradation. [C010.2.9]

**2.2 Harmful, Fragile, and Heavy Items**

No item may be packaged so that its contents could harm employees, equipment, or other mail. Fragile items must be packaged to withstand mail processing and transportation. Heavy items must be braced and cushioned to prevent damage to other mail. [C010.2.2]

**2.3 Stationery**

Stationery-type items thicker than 1 inch or heavier than 1 pound are not accepted in letter-style envelopes. The contents of these packages must be unitized by tying, banding, or using partitions on close-fitting interior containers to prevent shifting. [C010.2.3]

**2.4 Liquids**

Containers of liquid with only friction-top closures are generally not acceptable; screw caps, soldering, clips, or other means must be used for closure. Glass and other breakable containers of liquid with a capacity of more than 4 fluid ounces must be cushioned, with material sufficient to absorb all leakage in case of breakage, inside a sealed, waterproof container. Containers of liquid with a capacity of more than 32 fluid ounces are acceptable for mailing if cushioned as above and packaged within another sealed, waterproof container such as a can or plastic bag. The outer shipping container must be strong enough to protect the contents and must be marked to show the liquid nature of the contents. Steel pails and drums with carrying handles and positive closures, such as locking rings or recessed spouts under screw-cap closures, may be accepted without additional packing. [C010.2.4]

**2.5 Aerosols**

Aerosols (i.e., containers under pressure) are hazardous materials and must be constructed to prevent accidental discharge of the contents during postal handling. Mailable aerosol containers must be packaged under [10.0, Hazardous Materials](#). [C010.2.5]

**2.6 Infectious Substances**

Infectious substances (etiologic agents), clinical specimens, and biological products must be packaged and marked as specified in [10.0](#). [C010.2.7]

**2.7 High-Density Items**

High-density items are defined as packages of solid objects other than books whose weight is comparatively high for their volume (e.g., hardware, machine and auto parts, tools). Such items weighing more than 15 pounds and packaged so that they exert no more than 60 pounds per square foot (0.4167 pound per square inch) pressure on the smallest side of the container are machinable. [C010.2.6]

**3.0 Acceptable Containers****3.1 Load Type**

The following three terms describe types of loads, based on the content, degree of protection, and strength of the package used:

## 601.3.2

- a. An *easy load* is one that contains items of moderate density that either completely fill the container or are packaged in interior containers that completely fill the outer mailing container. This load type is not readily damaged by puncture or shock and does not move within the package or present a hazard to other parcels.
- b. An *average load* is one that contains moderately concentrated items packed directly into a shipping container or that are subjected to an intermediate stage of packing and providing partial support to all surfaces of the container. This load type can be prepackaged by nesting items within partitions or in separate paperboard boxes to stabilize items and prevent shifting and damage.
- c. A *difficult load* is one that contains items that require a high degree of protection to prevent puncture, shock, or distortion to the items or the package. Fragile items, delicate instruments, and high-density, small-bulk items that do not support the mailing container are not acceptable in paperboard boxes, bags, or wraps. [C010.2.8]

**3.2 Envelopes**

Envelopes may be used as containers for articles if the package can reasonably be expected to be processed and delivered without damage to the contents or other mail. Letter-style (nongusseted flat) envelopes are acceptable as containers for nonrigid stationery and similar material, up to 1 pound and 1 inch thick. Larger or heavier envelopes are acceptable for easy loads up to 5 pounds if made from envelope paper equivalent to 28 substance weight or greater, or made from extra-strength materials with a Mullen strength of more than 90 pounds per square inch. Envelopes for photographic film mailers or gusseted (three dimensional) envelopes are acceptable if made from envelope paper equivalent to 24 substance weight or greater. Envelopes may be used as containers for odd-shaped items mailed at nonautomation Standard Mail rates, if the piece meets the standards for that class of mail. [C010.3.8]

**3.3 Boxes**

Boxes are acceptable, subject to these standards:

- a. Paperboard boxes may be used for easy and average loads to 10 pounds.
- b. Metal-stayed paperboard boxes may be used for easy and average loads to 20 pounds.

- c. Solid and corrugated fiberboard boxes may be used according to the limits in the following chart, unless otherwise specified. *The first maximum reached governs the grade of the box used.*

| <b>MAXIMUM WEIGHT OF BOX AND CONTENT (pounds)</b> |                       |  |                  |
|---|-----------------------|--|------------------|
| <b>Easy or Average Load</b>                       | <b>Difficult Load</b> | <b>MAXIMUM LENGTH AND GIRTH (inches)</b> | <b>BOX GRADE</b> |
| 20  | —                     | 67                                       | 125              |
| 40  | 20                    | 100                                      | 175              |
| 65  | 45                    | 108                                      | 200              |
| 70  | 65                    | 108                                      | 275              |
| —   | 70                    | 108                                      | 350              |

- d. Wood, metal, or plastic boxes may be used for all types of loads, assuming adequate construction.
- e. The size of the box must be adequate to contain the items and provide enough space for cushioning material.
- f. Good, rigid, used boxes with all flaps intact are acceptable.
- g. Boxes with difficult loads to out-of-town destinations must be reinforced with banding about every 8 inches in each direction around the package. [C010.3.1]

### 3.4 Fiberboard Tubes and Similar Long Packages

Fiberboard tubes and similar long packages are acceptable if their length does not exceed 10 times their girth. The strength of the tube ends must be at least equal to the tube sidewall strength, unless the contents are lightweight, rolled items. Sidewall strength is always equal to solid fiberboard 1/16 inch thick for tubes less than 18 inches long, 3/32 inch thick for tubes 18 to 32 inches long, and 5/32 inch thick for tubes more than 32 inches long. Crimped or taped end closures are not acceptable for other than lightweight rolled items. Tape must completely encircle the seams on friction slide closures of mailing tubes. [C010.3.9]

### 3.5 Paper Bags and Wraps

For easy loads of up to 5 pounds, paper bags and wraps are acceptable when at least of a 50-pound basis weight (the strength of an average large grocery bag) and the items are immune from impact or pressure damage. A combination of plies adding up to or exceeding 50-pound basis weight is not acceptable. For easy and average loads of up to 20 pounds, reinforced bags or bags with a minimum of 70-pound basis weight are acceptable. Nonreinforced loose-fill padded bags are not acceptable as exterior containers, unless the exterior ply is at least 60-pound basis weight. [C010.3.3]

### 3.6 Plastic Bags

Plastic bags must be at least 2 mil thick polyethylene or equivalent for easy loads up to 5 pounds; 4 mil thick for easy loads up to 10 pounds. [C010.3.4]

601.3.7

**3.7 Plastic Film**

Heat-shrinkable plastic film—either irradiated polyethylene, linear low-density polyolefin, or copolymer—must be at least 3/4 mil thick for an easy load up to 5 pounds, and 1-1/4 mil thick for an average load up to 5 pounds. When requested, mailers must provide documentation that these types of film are being used for mailing. [C010.3.5]

**3.8 Cloth Bags**

Cloth bags are acceptable for easy and average loads of up to 10 pounds, if the seams of the bags equal the strength of the basic material. [C010.3.6]

**3.9 Difficult Load**

The USPS does not accept bags, bales, or wraps with difficult loads. The contents in bags, bales, and wraps must be compressed when possible. [C010.3.2]

**3.10 Bales**

Bales are acceptable within postal weight limits, if adequately compressed and reinforced to contain the material. [C010.3.7]

**3.11 Cans and Drums**

Cans and drums with positive closures are acceptable. Generally, friction closures alone are not acceptable. Protruding devices, such as locking rings, must be shielded by padding to prevent injury to USPS employees, equipment, or other mail. [C010.3.10]

**4.0 Cushioning, Closure, Sealing, and Reinforcements****4.1 Volume**

Loose-fill cushioning must overfill the container before closure to hold the item and prevent its movement to an outside surface of the container or to other items in the package. Shock and pressure forces must be dissipated over as much of the surface of the item as possible. [C010.4.1]

**4.2 Several Items Within Container**

When several items are inside a package, they must be protected from each other as well as from external forces. Concentrated heavy items must not be packaged with fragile items unless extreme care is exercised to separate them from each other. Heavy items must be adequately stabilized. [C010.4.2]

**4.3 Tape**

Cellophane and masking tape may not be used for closure or reinforcement of packages but may be used to augment adhesive closures on envelopes or to cover staples on bags. [C010.5.1]

**4.4 Paper Tape**

Paper tape must be at least 60-pound basis weight kraft. The adhesives on gummed tapes must be adequately activated before application and firmly applied with the tape extending at least 3 inches over the adjoining side of the box. [C010.5.2]

**4.5 Tape Size**

Except for pressure-sensitive filament tape, tapes used for closure and reinforcement may not be less than 2 inches (or 48 mm metric) wide. Nonreinforced plastic tapes must be at least as strong in the cross direction as in the machine (long) direction. [C010.5.3]

**4.6 Adhesive**

Adhesives for closure on box flaps or on tapes must remain serviceable from -20 degrees to +160 degrees Fahrenheit. Hot-melt adhesive may be used if at least four strips are applied on each part of the box flap where the outer flap overlays the inner flap; each strip is 3/16 inch wide after compression; the strips are not more than 1-1/2 inches apart, with the first strip no more than 1/2 inch from the center seam; and all strips are the full width of the inner flap, unless hot-melt adhesive is applied to 25% of the area where the outer flap lies over the inner flap. [C010.5.4]

**4.7 Banding**

When banding is used for closure and reinforcement, it must encircle the length and girth of the package at least once. If twine or cord is used for closure and reinforcement, it must be at least 20-pound tensile strength and secured at an intersection at least once on each side. Loose strapping and metal strapping are not acceptable. [C010.5.5]

**4.8 Staples and Steel Stitching**

Staples and steel stitching are acceptable if spaced not more than 5 inches apart for easy and average loads (or 2-1/2 inches apart for difficult loads) and not more than 1-1/4 inches from the ends of the box. Boxes not meeting these requirements may be made acceptable by applying a strip of 3-inch-wide reinforced tape in the gap between the staples or by strapping to compensate for the gap in the staple closure. Improperly clinched staples in flats, envelopes, and cards are not acceptable. [C010.5.6]

**5.0 Content and Extra Service Markings****5.1 Handling, Content, and Extra Service**

Certain markings may be used to identify handling, content, and extra service. Unauthorized markings not designating rate, class, address, handling, content, or extra service are not permitted. Extraneous information, which can be confused with ZIP Codes, may not be placed next to or directly under the last line of the delivery address. Any obsolete marking on a container to be reused for mailing must be obliterated. The following markings must be placed in an area below the postage and above the addressee's name in the delivery address and to the right of the return address:

- a. Handling markings such as "Fragile" must be applied only to packages containing delicate items such as glass and electrical appliances. Markings such as "Do Not Bend" must be used only when the content is protected with stiffeners.

## 601.5.2

- b. Content markings such as “Perishable” must be applied to any package containing items or substances that can degrade or decompose rapidly such as meat, produce, plants, or certain chemical and hazardous materials samples. Restricted and hazardous articles must be marked and labeled under applicable standards. A container improperly identified by content is not acceptable for mailing (e.g., a box marked “Art Supplies” that contains flammable liquid or a box marked “Bleach” that contains clothing).
- c. Extra service markings such as “Return Receipt Requested” must use the wording or label required by the applicable extra service standards. [C010.8.2]

**5.2 Method**

The mailer must mark the package using material that is not readily water soluble or easily smeared or rubbed off. The marking must be readable at a distance of 30 inches. Marking methods or surfaces must permit application and retention of adhesive stamps, postage meter impressions, and postal endorsements made with hand stamp, ballpoint pen, or Number 2 pencil. Any address label or envelope must be firmly affixed to the mailing container, with no more than an 1/8-inch separation between the ends of the label or envelope and the container. [C010.8.1]

**6.0 Special Mailing Containers****6.1 Express Mail and Priority Mail Packaging**

Express Mail and Priority Mail packaging provided by the USPS must be used only for Express Mail or Priority Mail, as applicable. Regardless of how the packaging is reconfigured or how markings may be obliterated, any matter mailed in USPS-provided Express Mail or Priority Mail packaging is charged the appropriate Express Mail or Priority Mail rate. [C010.6.2]

**6.2 Green Diamond Border Envelope**

An envelope or card bearing a green diamond border must be used only for First-Class Mail. Any envelope or card bearing a green diamond border is charged the appropriate First-Class Mail rate, regardless of mail content or of requested class or service. When printed on letter-size mail, the border must not enter the OCR read area or barcode clear zone unless a delivery point barcode appears in the address block as described in [202.5.7](#). [C010.6.3]

**6.3 Window Envelope**

For all letter-size and flat-size mail in window envelopes, every character in the delivery address, including any postal barcode, marking, or endorsement, must be completely visible through the window throughout the full range of movement of the insert bearing the delivery address. Any window envelope used for letter-size or flat-size mail claimed at automation rates or for letter-size mail claimed at Enhanced Carrier Route high density or saturation rates must also meet the barcoding standards for letters and flats in [708.4.0](#). Any window envelope used for letter-size or flat-size mail claimed at any other rate must meet the following additional standards:

- a. The address and any barcode visible through the window must be printed on white paper or paper of a very light color.

- b. A clear space of at least 1/8 inch is required between the address block, which includes any optional endorsement line and any barcode, and the top, bottom, and left and right edges of the address window, and must remain when the insert is moved to its full limits in each direction within the envelope to ensure efficient processing and delivery. For nonautomation rate mail, the bottom edge of the address window must not extend more than 1/8 inch into the barcode clear zone as defined in [202.5.1](#). Any letter-size envelope containing a window that intrudes into the barcode clear zone is not eligible for MLOCR or RVE *FASTforward* processing options for the Move Update standard in [233.3.3](#).
- c. Window cover material, if used over the address window, must be made of a nontinted clear or transparent material (e.g., cellophane or polystyrene) and must permit the address, as viewed through the window material, to meet the print-contrast ratio standards in [708.4.0](#) to ensure efficient processing and delivery. Glassine may be used for window cover material. All edges of the window cover material must be glued securely to the envelope. The bottom edge of an address window must be at least 1/2 inch from the bottom edge of the envelope.
- d. For letter-size mail, the delivery address window must be parallel with the longest edge of the envelope. For flat-size mail, the address window may be parallel with any edge of the envelope.
- e. For Registered Mail, the opening on a window envelope must be covered as described in [503.2.4.8](#). [C010.6.1]

#### 6.4 Reusable Mailpiece

A reusable mailpiece is an envelope, self-mailer, or similar mailpiece designed for two-way mailing. The recipient removes part of the original mailpiece or refolds the piece to cover the delivery address of the recipient and reveal the delivery address of the originator (sender) for return. Except for reusable mailpieces that originate as permit imprint mailings, the piece must meet these standards:

- a. **Basic Design.** The piece must be designed and constructed to allow the recipient to reconfigure or modify the piece to remove or obscure the address, POSTNET barcode, postage, and any marking or endorsement that applied to the piece when it was originally mailed so that these elements are not mistaken by USPS employees or mail processing equipment as applying to the returned piece. The instructions on the piece must ensure that the recipient can prepare the piece correctly for remailing. If a reusable mailpiece does not meet the applicable standards, the piece must be reenvveloped and new postage affixed before distribution by the originator.
- b. **Distribution.** When the piece is mailed by the originator, the piece must show only one complete delivery address and, if used, the corresponding barcode; the appropriate postage; and any required marking or endorsement. The originator's address and barcode for returning the piece and any postage, marking, endorsement, and facing identification mark (FIM) provided for that purpose must be obscured so that they are not mistaken by USPS employees or postal mail processing equipment as applying to the originating piece.

## 601.6.5

- c. Return. When the piece is reconfigured for return from the recipient to the originator, the piece must show only one complete delivery address and, if used, the corresponding barcode; the appropriate postage; and any required marking, endorsement, and FIM. If a reusable mailpiece does not meet the applicable standards, the piece must be reenvloped and new postage affixed before return by the recipient. [C010.6.4]

**6.5 Reusable Mailpieces That Originate as Permit Imprint Mailings**

As an alternative to the standards in 6.4, reusable mailpieces that originate as permit imprint mailings may meet these standards:

- a. Basic Design. The piece must be designed and constructed so that the recipient may reconfigure or modify it to remove or obscure the address that applied to the piece when it was originally mailed. The instructions on the piece must ensure that the recipient can prepare the piece correctly for remailing. If a reusable piece does not meet the applicable standards, the piece must be reenvloped and new postage affixed before distribution by the originator.
- b. Distribution. When reusable mailpieces are originally mailed, postage must be paid with permit imprint and a complete address and corresponding barcode must be located in the address block. Reusable pieces must be entered at a postal facility as part of a permit imprint mailing. On mailpieces other than window envelopes, the address block for return of the piece (including the delivery address and a corresponding barcode) and FIM A will be located on the reverse side. If included, prepaid reply postage must be located or obscured so that it is not mistaken by postal mail processing equipment or employees as applying to the originating piece.
- c. Return. When the piece is reconfigured for return from the recipient to the originator, only one complete address with a corresponding barcode located in the address block and a FIM must be visible on the piece. If a reusable mailpiece does not meet the applicable standards, the piece must be reenvloped and new postage affixed before return by the recipient. [C010.6.5]

**7.0 Packaging Standards for BMCs****7.1 High-Density Items**

High-density items (see 2.7) weighing from 20 to 45 pounds must be packaged in fiberboard boxes constructed of a minimum 200-pound test board or equivalent wood, metal, or plastic containers. Plastic, metal, and similar hard containers must be packaged, treated, or otherwise prepared so that their coefficient of friction or ability to slide on a smooth, hard surface is similar to that of a domestic-class fiberboard box of the same approximate size and weight. Closure must be done by staples, heat-shrinking, adhesives, or tape. Boxes without inner packing or containing loose material must be reinforced or banded with reinforced paper or plastic tape, pressure-sensitive filament tape, or firmly applied nonmetallic banding. Internal blocking and bracing, including the use of interior containers, cut forms, partitions, dunnage, and liners, must be used as required so that packages are capable of maintaining their integrity without damage to the contents if dropped once on one of their smallest sides on a solid surface from a height of 3 feet. These

items from 45 to 70 pounds must be similarly packaged, closed, and reinforced, except that exterior containers must be a minimum of 275-pound test fiberboard or equivalent. [C010.7.2]

## 7.2 Books

Books with 24 pages or more, fastened together along one edge between hardback, paperback, or self-covers, and more than 1 inch thick or 1 pound must not be accepted in letter-style nongusseted, flat envelopes. Other envelopes meeting the standards above must be used. Void spaces within multiple book containers must be filled with dunnage or otherwise stabilized to prevent shifting or damage to the contents or container. Shipments of books are packaged according to these weight categories:

- a. Up to 5 pounds, closure must be by multiple friction closures, completely clinched staples, heat-sealing, adhesives, tape, or nonmetallic banding. Although shrinkwrap is not acceptable as the only packaging for hardback books exceeding 1 pound or 1 inch thick, it may be used on the exterior of otherwise acceptable containers. Shrinkwrap may be used as the only method of packaging for paperback books up to 3 pounds.
- b. From 5 to 10 pounds, closure must be by tape, nonmetallic banding, or adhesives. Reinforced tape or nonmetallic banding is adequate for both closure and reinforcement. Nonmetallic banding must be firmly applied to the point that the straps must be tightened until they depress the carton at the edges.
- c. From 10 to 25 pounds, reinforced tape or nonmetallic banding is adequate for closure and reinforcement. Nonmetallic banding must be firmly applied to the point that the straps tighten until they depress the carton at the edges.
- d. From 25 to 50 pounds, hardbound books must be packaged in 275-pound test fiberboard boxes and paperback books must be packaged in 200-pound test fiberboard boxes.
- e. From 50 to 70 pounds, hardbound books must be packaged in 350-pound test fiberboard boxes and paperback books must be packaged in 275-pound test fiberboard boxes. [C010.7.1]

## 7.3 Soft Goods

Boxes containing soft goods (e.g., textiles, clothing, sheets, blankets, pillows and pillowcases, draperies, cloth, and any wearing apparel) weighing up to 5 pounds must be filled to capacity. Soft goods between the weight range of 5 to 20 pounds must be packaged in material with a minimum 70-pound outer ply basis weight. Closure of bags must be by completely clinched staples, heat-sealing, adhesives, sewing, or tape. Improperly clinched staples must be removed. Shrinkwrapping is not acceptable as the only packaging. Fiberboard containers must be made of at least 200-pound test board for soft goods weighing from 20 to 45 pounds and at least 275-pound test board for soft goods weighing from 45 to 70 pounds. [C010.7.3]

## 7.4 Sound Recordings

Shipments of recordings (e.g., records and cassette tapes in paper sleeves, paperboard, or chipboard shells) weighing up to 10 pounds must be packed in 70-pound basis weight envelopes for weights up to 3 pounds, or outer corrugated,

## 601.7.5

fiberboard containers for weights up to 10 pounds. When shipments weigh from 20 to 40 pounds, multiple shell containers must be packaged in 175-pound test fiberboard containers or equivalent and closed and reinforced by adhesives, kraft paper tape, equivalent plastic tape, or staples. When shipments weigh from 40 to 65 pounds, multiple shell containers up to 65 pounds must be packaged in 200-pound test fiberboard containers or equivalent and closed and reinforced as described for 20- to 40-pound containers, except that containers must be reinforced about every 8 inches around the package. Shipments weighing more than 65 pounds must be packaged in 275-pound test fiberboard containers or equivalent. [C010.7.4]

**7.5 Magnetic Tapes**

Shipments of multiple magnetic tapes and cartridges up to 5 pounds must be packed in outer fiberboard containers or chipboard containers (minimum 0.022 mil). Closure must be by multiple friction closures, completely clinched staples, heat-shrinking or adhesives, or by tape. Paper tape must be a minimum of 60-pound basis weight kraft. Shrinkwrapping is acceptable on the exterior of otherwise acceptable boxes of multiple tape shipments. Standards for shipments weighing from 5 to 20 pounds are similar, except that closure must be only by the use of adhesives, tape, or staples. Standards are also similar for shipments weighing from 20 to 40 pounds, except that the contents must be placed in 175-pound test containers that are banded or reinforced at two points with reinforced paper or plastic tape, pressure-sensitive filament tape, or firmly applied nonmetallic banding. Shipments from 40 to 65 pounds must be similarly packaged, except that fiberboard containers of at least 200-pound test board or equivalent must be used. Shipments weighing more than 65 pounds must be packaged in 275-pound test fiberboard containers or equivalent. [C010.7.5]

**8.0 Nonmailable and Restricted Articles and Substances Generally****8.1 Nonmailable Matter—General**

Certain potentially undesirable, harmful, or dangerous matter is nonmailable by statute or regulation. The standards for nonmailable articles and substances and the special conditions under which certain of these articles and substances may be mailed are in 8.0 through 10.0 and 11.0. The standards in 12.0, *Written, Printed, and Graphic Matter Generally*, 508.8.0, *Pandering Advertisements*, and 508.9.0, *Sexually Oriented Advertisements*, apply to nonmailable matter in written, printed, or graphic form and contain the rules on advising mailers of matter covered in 8.0 through 12.0, 508.8.0, and 508.9.0. The standards in 8.0 through 10.0 and 11.0 apply to the military postal system, its employees, and undelivered mail that is or has been in the official custody of this system and its employees. References to Inspection Service apply to the Postal Inspection Service and authorized employees, not military investigative services. [C010.9.1]

**8.2 Basic Premise**

The basic premise of the postal mailability statutes is that anything “which may kill or injure another, or injure the mails or other property...” is nonmailable. Several statutory exceptions to this rule permit mailings of otherwise nonmailable matter under specified conditions. Statutory exceptions apply to live scorpions, poisonous drugs and medicines, poisons for scientific use, switchblade knives, firearms, motor vehicle master keys, locksmithing devices, and abortive and contraceptive devices. The statutes also provide that the USPS may, by regulation, permit the mailing, under required conditions of preparation and packing, of potentially harmful matter not “outwardly or of [its] own force dangerous or injurious to life, health, or property.” The standards in 8.0 summarize the statutory prohibitions and exceptions. The mailability standards that apply to perishable, hazardous, and restricted matter are detailed in 9.0, 10.0, and 11.0, respectively. Publication 52, *Hazardous, Restricted, and Perishable Mail*, contains additional clarification and further describes the conditions of preparation and packaging under which the USPS accepts for mailing potentially harmful matter that is otherwise nonmailable. Publication 52 also contains detailed information on the mailability of specific hazardous materials. [C021.2.1]

**8.3 Other Nonmailable Matter**

Matter is nonmailable also when it cannot be delivered because of an illegible, incorrect, or insufficient address, or when it does not meet USPS standards for mail preparation, classification, postage rates, size, or weight. [C010.9.2]

**8.4 Restricted Matter—General**

Restricted matter is an article or substance prohibited or limited by Title 18, U.S. Code (liquors, abortive and contraceptive devices, odd-shaped items in envelopes, motor vehicle master keys, and locksmithing devices). It also includes matter not otherwise described in 8.0 through 10.0 and 11.0 that is restricted by 18 USC 1716(a) because it may, under conditions encountered in the mail, be injurious to life, health, or property (obnoxious odors, liquids, powders, and battery-powered devices). [C021.1.0]

**8.5 Harmful Matter—General**

Except as provided in this document, any article, composition, or material is nonmailable if it can kill or injure another or injure the mail or other property. Harmful matter includes, but is not limited to:

- a. All types and classes of poisons, including controlled substances.
- b. All poisonous animals except scorpions mailed for medical research purposes or for the manufacture of antivenom; all poisonous insects; all poisonous reptiles; and all types of snakes, turtles, and spiders.
- c. All disease germs or scabs.
- d. All explosives, flammable material, infernal machines, and mechanical, chemical, or other devices or compositions that may ignite or explode.

[C021.3.1]

601.8.6

**8.6 Hazardous Materials**

Harmful matter also includes regulated hazardous materials as defined in 10.0 that are likely to harm USPS employees or to destroy, deface, or otherwise damage mail or postal equipment. This includes materials such as caustic poisons (acids and alkalies), oxidizers, or highly flammable liquids, gases, or solids; or materials that are likely, under conditions incident to transportation, to cause fires through friction, absorption of moisture, or spontaneous chemical changes or from retained heat from manufacturing or processing, including explosives or containers previously used for shipping high explosives with a liquid ingredient (such as dynamite), ammunition, fireworks, radioactive materials, matches, or articles emitting obnoxious odors. [C021.3.2]

**8.7 Marking of Restricted Articles or Substances****8.7.1 Content**

Except for firearms and switchblade knives, controlled substances, radioactive materials, and motor vehicle master keys and locksmithing devices, the identity of the content of anything mailed under 8.0 through 10.0 and 11.0 must be plainly and durably marked on the address side of each mailpiece as a condition of mailing. When the content is a hazardous material as defined in 49 CFR, each mailpiece must be marked as required in 10.0. [C021.4.1]

**8.7.2 Addressing**

For any matter mailed under the provisions in 8.0 through 10.0 and 11.0, the recipient's name and address must be affixed or applied directly to the mailpiece using a material or method that is not water-soluble and not easily smeared or rubbed off. Except for diagnostic specimen mailpieces using a business reply mail format and nonregulated materials, a return address that includes the sender's name and address must appear on all matter mailed under 8.0 through 10.0 and 11.0. The return address, when required, must be applied using a material or method that is not water-soluble and not easily smeared or rubbed off. [C021.4.2]

**8.7.3 Warning Label**

Except for controlled substances mailed under 11.0, any label or other marking required by federal law or the regulation of any federal agency must be securely affixed or applied to the address side of each mailpiece. See 10.0 for the warning label requirements that apply to the mailing of hazardous materials. [C021.4.3]

**8.8 Mailer Responsibility**

The mailer must comply with applicable postal laws and regulations governing mailability and preparation for mailing, as well as nonpostal laws and regulations on the shipment of particular matter. [C021.2.2]

**8.9 Statutory System**

18 USC 2510, et seq., constitutes a statutory system of regulating interception of wire, oral, or electronic communications. Any person contemplating the mailing of a device primarily useful for surreptitiously effecting such interception should consider the provisions of 18 USC 2510, et seq., particularly section 2512. This statute makes it a crime, except as otherwise provided in 18 USC 2510, et seq., for a person intentionally to send through the mail any device whose design that person knows, or has reason to know, renders the device primarily useful for surreptitious

interception of wire, oral, or electronic communications. The statute does not declare that such a device in itself constitutes nonmailable matter but, as indicated, provides criminal penalties for the act of intentionally mailing it. [C021.2.5]

#### **8.10 Other Laws and Regulations**

Particular matter may be mailable under postal statutes and regulations, but customers may have responsibilities under nonpostal statutes and regulations concerned with possession, treatment, transmission, or transfer of such matter (e.g., 49 CFR 100-185 (Department of Transportation Regulations); the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513), 21 USC 801, et seq.; and the Gun Control Act of 1968 (Public Law 90-618), 18 USC 921, et seq.). [C021.2.4]

#### **8.11 Refusal of Nonmailable Matter**

USPS employees may refuse an article for mailing if the content of the article is described by the mailer or otherwise revealed to be nonmailable. [C021.2.3]

#### **8.12 Authorizing Mailability**

A postmaster may decide whether articles and substances other than written, printed, or graphic matter are nonmailable and, where appropriate, is authorized to refuse to accept for mailing such matter determined to be nonmailable. The mailer may seek a review of the postmaster's decision by the PCSC. The mailer may file a written appeal of the PCSC ruling with the USPS Recorder, Judicial Officer, with a copy or description of the determination or ruling. The rules of procedure for the determination of such appeals are in 39 CFR 953. [C021.2.6]

#### **8.13 Protecting Employees**

A postmaster may take any step reasonable and necessary to protect USPS employees and equipment from potentially dangerous or injurious materials or substances found in the mail. [C021.2.7]

#### **8.14 Applicability to Military Postal System**

8.0 through 10.0 and 11.0 applies to the military postal system, its personnel, and undelivered mail that is or has been in the official custody of that system and its personnel. References to the Inspection Service refer to the Postal Inspection Service and its authorized employees, not to military investigative services. [C021.2.8]

### **9.0 Perishables**

#### **9.1 Time Factor**

Mailable perishable matter may be sent through the mail only if it can reach its destination in good condition in the normal transit time between the mailing and address points. Mailable perishable foods that do not rapidly decay or generate obnoxious odors in the mail may be sent at the mailer's risk. [C022.1.0]

## **9.2 Preparation of Perishables**

### **9.2.1 Container**

Any container used to mail perishable matter must be constructed to protect and securely contain the contents. [C022.2.1]

### **9.2.2 Produce**

Fruits and vegetables are not mailable unless presented in dry condition. [C022.2.2]

### **9.2.3 Water Ice**

Water ice used as a refrigerant must be packed under 2.4 as though it were a liquid. [C022.2.3]

### **9.2.4 Dry Ice**

A parcel containing dry ice (carbon dioxide solid) must be packed in a container that allows the release of carbon dioxide gas. If a fiberboard box is used, enough insulation is necessary to prevent condensation and wetting of the mailing carton. [C022.2.4]

## **9.3 Live Animals**

### **9.3.1 Animal Fighting Prohibition**

Under 7 USC 2156, the mailing of a live animal for the purpose of participating in an animal fighting venture is prohibited (regardless of whether such venture is permitted under the laws of the state in which it is conducted). The term *state* means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any U.S. territory or possession. Violators can be subject to the criminal penalties in 7 USC 2156. [C022.3.1]

### **9.3.2 Day-Old Poultry**

Day-old poultry vaccinated with Newcastle disease (live virus) is nonmailable. Live day-old chickens, ducks, geese, partridges, pheasants (pheasants may be mailed only from April through August), guinea fowl, quail, and turkeys are acceptable in the mail only if:

- a. They are not more than 24 hours old and are presented for mailing in the original unopened hatchery box from the hatchery of origin.
- b. The date and hour of hatching is noted on the box by a representative of the hatchery who has personal knowledge thereof. (For COD shipments made by a hatchery for the account of others, the name or initials and address of the hatchery or the post office box number and address of the hatchery must be prominently shown for this standard.)
- c. The box is properly ventilated, of proper construction and strength to bear safe transmission in the mail, and not stacked more than 10 units high.
- d. They are mailed early enough in the week to avoid receipt at the office of address, in case of missed connections, on a Sunday, on a national holiday, or on the afternoon before a Sunday or holiday.
- e. They can be delivered to the addressee within 72 hours of the time of hatching, whether the addressee resides in town or on a rural route or highway contract route.

- f. The shipment bears special handling postage in addition to regular postage, unless sent at the First-Class Mail or Priority Mail rate.
- g. When live, day-old poultry is to be transported by aircraft, all provisions of the airline tariffs are met and air carriers have equipment available to safely deliver shipments within the specified time limits, allowing for delays en route in air and ground transportation.
- h. Day-old poultry, originally shipped by air express or air cargo and then presented for mailing, must be in First-Class condition and prepared as specified in [9.3.2a.](#) through [9.3.2e.](#)
- i. Boxes of day-old poultry of about identical size, securely fastened together to prevent separation in transit, may be accepted for mailing as a single parcel, if such parcel is not more than 100 inches in length and girth combined.

[C022.3.2]

### 9.3.3 Small Cold-Blooded Animals

Small, harmless, cold-blooded animals (except snakes and turtles) that do not require food or water or attention during handling in the mail and that do not create sanitary problems or obnoxious odors are mailable (e.g., baby alligators and caimans not more than 20 inches long, bloodworms, earthworms, mealworms, salamanders, leeches, lizards, snails, and tadpoles). [C022.3.3]

### 9.3.4 Adult Fowl

Adult turkeys, guinea fowl, doves, pigeons, pheasants, partridges, and quail, as well as ducks, geese, and swans sent by Express Mail in biologically secure containers approved by the manager of Mailing Standards (see [608.8.0](#) for address) are mailable if the number of birds per parcel follows the container manufacturer limits, and if each bird weighs more than 6 ounces. Under the applicable standards, indemnity may be paid only for loss, damage, or rifling, and not for death of the birds in transit if there is no visible damage to the mailing container. [C022.3.4]

### 9.3.5 Adult Chickens

Adult chickens must be sent by Express Mail. The Express Mail containers used must pass the standards in International Safe Transit Association (ISTA) Test Procedure 1A (detailed in Publication 2, *Packaging for Mailing*); be designed to remain intact during normal handling; be constructed to *totally* confine the chickens; contain shavings or other material to prevent damage to the bottom of the container; and be ventilated properly to ensure humane treatment in transit. The number of birds in each parcel must not exceed the container manufacturer's limit. Under the applicable standards, indemnity may be paid only for loss, damage, or rifling, and not for death of the chickens in transit if there is no visible damage to the container. The mailing of chickens for animal fighting purposes is prohibited under [9.3.1.](#) [C022.3.5]

### 9.3.6 Warm-Blooded Animals

Warm-blooded animals, except the specified birds under specific conditions in this section, are not mailable (e.g., hamsters, mice, rats, guinea pigs, rabbits, cats, dogs, squirrels, parakeets, and canaries). [C022.3.6]

**9.3.7 Mailed to Pacific Islands**

Animals mailed to the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia require a permit issued by the government of the destination country. [C022.3.7]

**9.3.8 Bees**

Bees are acceptable in the continental surface mail when shipped under federal and state regulations to ensure that they are free of disease. Packages of honeybees must bear special handling postage, except those sent at a First-Class Mail rate. Only queen honeybees may be shipped via air transportation. Each queen honeybee shipped via air transportation may be accompanied by up to eight attendant honeybees. [C022.3.8]

**9.3.9 Other Insects**

Other live, nonpoisonous, and nondisease-conveying insects may be sent through the mail when properly prepared for mailing and when shipped under regulations of the U.S. Department of Agriculture. Such insects mailed to the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia are also subject to the regulations of the destination country. [C022.3.9]

**9.3.10 Live Scorpions**

Live scorpions that are to be used for medical research or the manufacture of antivenin are accepted only in the continental surface mail when packaged in a double mailing container, both parts of which are closed or fastened to prevent escape of the scorpions. The inner container must be of material that cannot be punctured by the scorpions and must be plainly marked "Live Scorpions." Cushioning material must be used when necessary to prevent shifting of the inner container. The outer container must be strong enough to prevent crushing of the package or exposure of the contents during normal handling in the mail. The outer container must be plainly marked "Live Scorpions." [C022.3.10]

**9.3.11 Packaging**

Any mailing container used for mailable animals must be made of at least 275-pound test, double wall, corrugated, weather-resistant fiberboard (W5c) or equivalent and must be adequately ventilated. The container must be constructed to prevent escape of the animals while in the mail and to preclude the container and its contents from being crushed in normal handling. The outside of the container must include a return address and a description of the contents. A container marked "If Undeliverable, Abandon" is not accepted. [C022.3.11]

**9.3.12 Acceptance**

The USPS does not accept any shipment of animals that the USPS reasonably believes cannot reach its destination in a viable condition. Such a determination is based on factors including the expected temperatures (weather conditions) while the shipment is in the mail; the types of vehicles on which the shipment is to be transported; the expected transit time; and the types of packaging used for protection against suffocation, crushing, and handling. [C022.3.12]

**9.3.13 Disposal**

Any parcel of live animals that cannot be delivered to the addressee or returned to the sender within 72 hours (for live day-old poultry) or within the delivery period marked on the parcel (for other animals) is immediately disposed of under the relevant standards. A parcel not marked with the delivery period is disposed of immediately if it reasonably appears that the animals cannot be returned to the sender in a viable condition. [C022.3.13]

**9.4 Dead Wild Animals**

The dead bodies, or parts thereof, of any wild animals, wild birds, or eggs are acceptable for mailing only when they are lawfully killed or taken, and their shipment is not prohibited by law of the United States or of the state, territory, district, or foreign country or subdivision thereof in which killed or taken or offered for shipment. Mailing of fresh game is also subject to these standards. [C022.4.0]

**9.5 Furs, Hides, Skins, And Pelts**

A parcel containing the fur, hide, skin, or pelt of a wild animal is mailable only if the matter is properly dried or cured and has no offensive odor, and only if the parcel is plainly marked, labeled, or tagged on the outside with the names and addresses of the shipper and addressee. The parcel must bear any endorsement required by state laws. Hides and pelts must be wrapped when necessary to prevent damage to other mail. [C022.5.1 and C022.5.2]

**9.6 Mailing Plants****9.6.1 Mailability**

In general, plants and plant products are mailable within the United States and its territories and possessions, subject to certain prohibitions imposed under U.S. agriculture and conservation statutes. To the extent specified below, when such prohibitions make shipment of plants or plant products unlawful, those articles constitute nonmailable matter. More detailed information is in Publication 14, *Prohibitions and Restrictions on Mailing Animals, Plants, and Related Matter*. [C022.6.1]

**9.6.2 Nonmailable Quarantined Matter**

Under 39 USC 3014(b), any plant, plant product, or other article capable of carrying a dangerous plant disease or insect infestation is nonmailable from a quarantined area, if shipping such item by common carrier is prohibited by a U.S. Department of Agriculture (USDA) quarantine issued under 7 USC 161, except, any such item is mailable from a quarantined area if:

- a. Its movement by common carrier is allowed under conditions prescribed in the quarantine notice or in other USDA regulations, issued under 7 USC 161, governing its inspection, disinfection, certification, and other conditions for its movement.
- b. Its movement by mail complies with all such conditions. [C022.6.2]

601.9.6.3

**9.6.3 Additional Quarantined Matter**

Any plant, article, or matter, the importation or interstate shipment of which is prohibited under the Act of August 20, 1912 (37 Stat. 315, chapter 308; 7 USC 151 et seq.), commonly known as the Plant Quarantine Act, is made nonmailable by 39 USC 3015(c). [C022.6.3]

**9.6.4 Illegally Taken Plants**

Any plant, the conveyance of which is prohibited under section 3 of the Lacey Act Amendments of 1981 (16 USC 3372), is made nonmailable by 39 USC 3015(d). [C022.6.4]

**9.6.5 Criminal Penalties**

18 USC 1716B provides criminal penalties for mailing anything nonmailable under 39 USC 3014(b), unless the item is excepted under USPS regulations. 18 USC 1716D provides criminal penalties for mailing anything nonmailable under 39 USC 3015(c) and (d). [C022.6.5]

**9.6.6 USDA Notices and Regulations**

USDA quarantine notices, issued under 7 USC 161, are published in the *Federal Register* and codified in 7 CFR (e.g., 7 CFR 301 and 318). Details on these and other USDA regulations may be obtained by writing to the USDA Animal and Plant Health Inspection Service (APHIS) Plant Protection and Quarantine (PPQ) Programs (see [608.8.0](#) for address). [C022.6.6]

**9.7 Nonmailable Plant Pests, Injurious Animals, and Illegally Taken Fish or Wildlife****9.7.1 Nonmailable Matter**

More detailed information is in Publication 14. Under the respective provisions of 39 USC 3015(a), (b), and (d), the following items are nonmailable:

- a. Any injurious animal, the importation or interstate shipment of which is prohibited under 18 USC 42.
- b. Any plant pest, the movement of which is prohibited under section 103 or 104 of the Federal Plant Pest Act (7 USC 150bb or 150cc).
- c. Any fish or wildlife, the conveyance of which is prohibited under section 3 of the Lacey Act Amendments of 1981 (16 USC 3372). [C022.7.1]

**9.7.2 Criminal Penalties**

18 USC 1716D provides criminal penalties for mailing anything nonmailable under 39 USC 3015(a), (b), or (d). [C022.7.2]

## 10.0 Hazardous Materials

### 10.1 Definitions

The following definitions apply:

- a. *Hazardous material* is any article or substance designated by the U.S. Department of Transportation (DOT) as being capable of posing an unreasonable risk to health, safety, and property during transportation. In international commerce, hazardous materials are known as “dangerous goods.”
- b. *Limited quantity* is the maximum amount of a specific hazardous material that is exempted from the labeling or packaging requirements in 49 CFR. Not every hazardous material is eligible to be shipped as a limited quantity. Almost all limited quantity materials are nonmailable.
- c. *ORM-D (Other Regulated Material) material* is a limited quantity of a hazardous material that presents a limited hazard during transportation due to its form, quantity, and packaging. In almost all instances, the proper shipping name for an ORM-D material is consumer commodity. Not all hazardous material permitted to be shipped as a limited quantity can qualify as an ORM-D material. ORM-D materials having the proper shipping name of “consumer commodity” are mailable subject to USPS quantity and packaging standards.
- d. *Consumer commodity* is a hazardous material that is packaged and distributed in a quantity and form intended or suitable for retail sale and designed for consumption by individuals for their personal care or household use purposes. This term can also include certain drugs or medicines. Not all hazardous material permitted to be shipped as a limited quantity can qualify as a consumer commodity.
- e. *Air transportation requirements*, for the purposes of 10.0 only, apply to all mailable hazardous materials sent at the First-Class Mail, Priority Mail, or Express Mail rates. All mailable hazardous materials sent at those rates must meet the requirements that apply to air transportation. Mailable hazardous materials sent at any of those rates may or may not be transported via air depending on the distance between the point of origination and the point of destination, and the ability of the USPS to obtain an air carrier between those points.
- f. *Surface transportation requirements*, for the purposes of 10.0 only, apply to all mailable hazardous materials sent at the Standard Mail or Package Services rates. All mailable hazardous materials sent at the Standard Mail or Package Services rates must meet the requirements that apply to surface transportation.
- g. *Primary receptacle* is the container (e.g., tube, vial, bottle) that holds the hazardous material.
- h. *Secondary container* is the packaging component into which the primary receptacle(s) and any required absorbent and cushioning material is securely placed. The packaging of certain mailable hazardous materials does not require the use of a secondary container.

## 601.10.2

- i. *Outer shipping container* is the exterior packaging component into which a primary receptacle, along with any required absorbent and cushioning material, and the secondary container (if required) are securely placed. The outer shipping container bears the addressing information along with all required markings. [C023.1.1]

**10.2 U.S. Department of Transportation Regulations of Hazardous Material**

The U.S. Department of Transportation (DOT) regulates the surface and air carriage of hazardous materials within the United States via any means of transportation. The DOT regulations for the transport of hazardous materials are codified in Title 49, Code of Federal Regulations (49 CFR) 100–185. USPS mailing standards for hazardous materials generally adhere to 49 CFR, but also include many additional limitations and prohibitions. [C023.1.2]

**10.3 USPS Standards for Hazardous Material**

The USPS standards generally restrict the mailing of hazardous materials to ORM-D materials with the proper shipping name of “consumer commodity” that meet USPS quantity limitations and packaging requirements. The few non-ORM-D materials permitted to be mailed are subject to the standards in [10.0](#). Detailed information on the mailability of specific hazardous materials is contained in Publication 52, *Hazardous, Restricted, and Perishable Mail*. [C023.1.3]

**10.4 Hazard Class**

Every hazardous material is assigned to one of nine hazard classes identified in 49 CFR 172.101 and 173. Some hazard classes are further separated into divisions based on their physical or chemical properties. For postal purposes, [Exhibit 10.4](#) generally summarizes the mailability of hazardous materials by hazard class.

**Exhibit 10.4 DOT Hazard Classes and Mailability Summary**

| CLASS    | HAZARD CLASS NAME AND DIVISION  | TRANSPORTATION METHOD   |   |  |
|----------|---|---|---|--|
|          |   | Domestic Mail Air Transportation  | Domestic Mail Surface Transportation  | International Mail   |
| <b>1</b> | <b>Explosives</b><br>Division -<br>1.1 Mass Explosive Hazard<br>1.2 Projection Hazard<br>1.3 Fire Hazard and/or Minor Blast/Minor Projection Hazard<br>1.4 Minor Blast Hazard<br>1.5 Very Insensitive With Mass Explosion Hazard<br>1.6 Extremely Insensitive With No Mass Explosion Hazard | Prohibited  | Prohibited except with written permission as allowed in <a href="#">10.11.2</a>   | Prohibited   |

[C023.1.4]

601.10.5

**10.5 Mailer Responsibility for Mailing Hazardous Materials**

Full responsibility rests with the mailer to comply with all postal and nonpostal laws and regulations regarding the mailing of hazardous materials. Anyone who mails, or causes to be mailed, a nonmailable or improperly packaged hazardous material can be subject to legal penalties, including but not limited to those specified in 18 USC. [C023.1.5]

**10.6 Mailability Rulings for Hazardous Materials**

Generally, the acceptability for mailing chemicals and other types of hazardous materials depends on container fluid/vapor capacities, the ability of the complete mailpiece to contain the material, and the method of absorbing and containing the product in case of accidental leakage of the primary receptacle. To determine mailability of a specific material, a mailer must submit a material safety data sheet (MSDS) and the following information to the appropriate Pricing and Classification Service Center (PCSC):

- a. Name of material, hazard class, and assigned United Nations (UN) or North America (NA) identification number.
- b. Chemical composition by percentage of ingredient.
- c. Flashpoint.
- d. Toxic properties.
- e. Irritant action when inhaled, swallowed, or contacted by eyes or skin.
- f. Special precautions necessary to permit handling without harm to USPS employees or damage to property or other mail.
- g. Explanation of warning labels and shipping papers required by state or federal regulations.
- h. Proposed packaging method, including the addressing and required markings.
- i. Proposed number of pieces to be mailed, class of mail, and post office(s) of mailing. [C023.1.6]

**10.7 Warning Labels for Hazardous Materials**

With few exceptions as noted in these standards, most hazardous materials acceptable for mailing fall within the Other Regulated Materials (ORM-D) regulations of CFR 49 173.144, which do not require DOT hazard class warning labels. Except for Division 6.2 materials under 10.17.5 and dry ice under 10.20.4, any hazardous material bearing or required to bear a DOT hazard class warning label under the requirements in 49 CFR is prohibited from mailing. Mailable ORM-D material must be marked as required in 10.8. Mailable hazardous material must bear DOT handling labels (e.g., orientation arrows, magnetized materials) when applicable. [C023.1.7]

**10.8 Package Markings for Hazardous Materials**

Each mailpiece containing a mailable hazardous material must be plainly and durably marked on the address side with the required shipping name and UN identification number. The UN identification number is not required on a mailpiece that contains an ORM-D material. A mailable ORM-D material must be marked on the address side with "ORM-D" or "ORM-D AIR," as applicable, immediately

following or below the proper shipping name. The proper shipping name for a mailable ORM-D material is “consumer commodity.” The designation “ORM-D” or “ORM-D AIR”, as required, must be placed within a rectangle that is approximately 6.3 mm (1/4 inch) larger on each side than the designation. Mailable ORM-D materials sent as Standard Mail or Package Services must also be marked on the address side as “Surface Only” or “Surface Mail Only.” [C023.1.8]

#### **10.9 Shipping Papers for Hazardous Materials**

A shipper’s declaration for dangerous goods (i.e., shipping paper) prepared under 49 CFR 172.200 through 172.205 is required for certain types of hazardous materials when mailed. The shipping paper must be completed and signed in triplicate by the mailer. It must be affixed to the outside of the mailpiece within an envelope or similar carrier that can be easily opened and resealed to allow viewing of the document. Shipping papers are required as follows:

- a. *Air transportation requirements.* Except for nonregulated materials sent under [10.17.3](#) or [10.17.10](#) and diagnostic specimens sent under [10.17.6](#), mailpieces containing mailable hazardous materials sent at the First-Class Mail, Priority Mail, or Express Mail rates must include a shipping paper.
- b. *Surface transportation requirements.* Except for nonregulated materials sent under [10.17.3](#) or [10.17.10](#) and mailable ORM-D materials, mailpieces containing mailable hazardous materials sent at the Standard Mail or Package Services rates must include a shipping paper. [C023.1.9]

#### **10.10 Air Transportation Prohibitions for Hazardous Materials**

All mailable hazardous materials sent at the First-Class Mail, Priority Mail, or Express Mail rates must meet the requirements for air transportation. The following types of hazardous materials that are prohibited from carriage on air transportation must not be sent at the First-Class Mail, Priority Mail, or Express Mail rates:

- a. Anything susceptible to damage or that can become harmful because of changes in temperature or atmospheric pressures unless protected against the effects of such changes.
- b. Magnetic materials that have a field strength sufficient to cause a compass deviation at a distance of 15 feet (4.6 meters) or more from any point on the outer packaging.
- c. Flammable materials (gases, liquids, and solids).
- d. Radioactive materials.
- e. Materials excluded from air shipment by DOT regulations (49 CFR 100-185) or of the applicable state (country) or air carrier operator variations. Certain restricted articles, as described in 49 CFR 100-185 and the operator variations of the air carriers, may be accepted for air transportation if properly packaged. These articles must be labeled and bear a shipper's declaration in triplicate, as required by 49 CFR 172.204, or must be marked according to the air carrier's operator variations. Refer to the technical instruction of the International Civil Aviation Organization (ICAO) for air carrier operator variations. [C023.1.10]

601.10.11

**10.11 Explosives (Hazard Class 1)****10.11.1 Definition**

An *explosive* is any substance, article, or device that is designed to function by explosion (i.e., an extremely rapid release of gas and heat) or that, by chemical reaction within itself, is able to function in a similar manner even if not designed to function by explosion, unless the substance or article is otherwise classed under the provisions in 49 CFR. Hazard class 1 has six divisions as shown in [Exhibit 10.4](#). No further explanation of the six divisions is provided in these standards because explosives are prohibited in the mail except as permitted in [10.11.2](#). [C023.2.1]

**10.11.2 Mailability**

Explosives are prohibited in international mail. Explosives are prohibited in the domestic mail via air transportation. For domestic surface transportation, explosives are prohibited except for certain Division 1.4S toy propellant devices and safety fuses specifically approved by the manager of Mailing Standards (see [608.8.0](#) for address) before mailing. A mailable explosive must meet the packaging and marking requirements provided with the manager's approval. A shipping paper is required. [C023.2.2]

**10.12 Gases (Hazard Class 2)****10.12.1 Definition**

Hazard class 2 consists of three divisions:

- a. Division 2.1, Flammable Gases. A material that is a gas at 68°F (20°C) or less and 14.7 psi (101.3 kPa) of pressure. Flammable gases also include materials that have a boiling point of 68°F (20°C) or less at 14.7 psi (101.3 kPa) and that are ignitable at 14.7 psi (101.3 kPa) when in a mixture of 13% or less by volume with air or that have a flammable range at 14.7 psi (101.3 kPa) with air of at least 12% regardless of the lower limit. These conditions must be established in accordance with ASTM E681-85, Standard Test Method for Concentration Limits of Flammability of Chemicals, or other approved equivalent method. The flammability of aerosols must be determined using the tests specified in 49 CFR 173.306(j).
- b. Division 2.2, Nonflammable, Nontoxic Gases. A material that does not meet the definition of Division 2.1 or 2.3 and exerts in its packaging an absolute pressure of 40.6 psi (280 kPa) or greater at 68°F (20°C).
- c. Division 2.3, Toxic Gases. A material that is poisonous by inhalation and is a gas at 68°F (20°C) or less and a pressure of 14.7 psi (101.3 kPa) or a material that has a boiling point of 68°F (20°C) or less at 14.7 psi (101.3 kPa). [C023.3.1]

**10.12.2 Mailability**

Gases are prohibited in international mail. Toxic gases in Division 2.3 are prohibited in domestic mail. Flammable gases in Division 2.1 are prohibited in domestic mail via air transportation, but are permitted via surface transportation if the material can qualify as an ORM-D material and meet the standards in [10.12.3](#) and [10.12.4](#). Nonflammable gases in Division 2.2 are generally permitted in the domestic mail via air or surface transportation if the material can qualify as an ORM-D material and meet the standards in [10.12.3](#) and [10.12.4](#). [C023.3.2]

**10.12.3 Container**

An other-than-metal primary receptacle containing a mailable gas may be acceptable if the water capacity of the primary receptacle is 4 fluid ounces (7.22 cubic inches) or less per mailpiece and the primary receptacle meets 49 CFR requirements. Mailable nonflammable and flammable compressed gases are acceptable in metal primary receptacles that have a water capacity up to 33.8 fluid ounces (1 liter or 61.0 cubic inches), depending on their internal pressure. A DOT 2P container must be used as the primary receptacle if the internal pressure is from 140 to 160 psi at 130°F (55°C). A DOT 2Q container must be used as the primary receptacle if the pressure is from 161 to 180 psi at 130°F (55°C). A container with an internal pressure over 180 psi at 130°F (55°C) is prohibited from mailing. Mailable flammable compressed gases are restricted to 33.8 fluid ounces (1 liter) per mailpiece. Mailable nonflammable compressed gases are permitted in individual 33.8 fluid ounce (1 liter) containers that must be securely packed within an outer shipping container. Each mailpiece must not exceed a total weight of 25 pounds. [C023.3.3]

**10.12.4 Marking**

For surface transportation, packages of mailable gases must be clearly marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name (consumer commodity). For air transportation, packages must be plainly and durably marked on the address side with “ORM-D AIR” immediately following or below the proper shipping name and must also bear a shipper’s declaration for dangerous goods. [C023.3.4]

**10.13 Flammable and Combustible Liquids (Hazard Class 3)****10.13.1 Definitions**

The terms used in the standards that apply to hazard class 3 are defined as follows:

- a. *Flammable liquid* means a liquid that has a flashpoint of not more than 141°F (60.5°C), or any material in a liquid phase that has a flashpoint at or above 100°F (38°C).
- b. *Combustible liquid* means any liquid that does not meet the definition of any other hazard class and has a flashpoint above 141°F (60.5°C) and below 200°F (93°C). Note: A flammable liquid with a flashpoint at or above 100°F (38°C) that does not meet the definition of any other hazard class may be reclassified as a combustible liquid per 49 CFR 173.120(b). [C023.4.1]

**10.13.2 Flammable Liquid Mailability**

Flammable liquid is prohibited in international mail. Flammable liquid with a flashpoint of 20°F (-7°C) or below is prohibited in domestic mail. Other flammable liquid is prohibited in domestic mail via air transportation but is permitted via surface transportation if the material can qualify as an ORM-D material and meet the following conditions as applicable:

- a. The flashpoint is above 20°F (-7°C) but no more than 73°F (23°C); the liquid is in a metal primary receptacle not exceeding 1 quart, or in another type of primary receptacle not exceeding 1 pint, per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are packed within a securely sealed secondary container

## 601.10.13.3

that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.

- b. The flashpoint is above 73°F (23°C) but less than 100°F (38°C); the liquid is in a metal primary receptacle not exceeding 1 gallon, or in another type of primary receptacle not exceeding 1 quart, per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are placed within a securely sealed secondary container that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.

[C023.4.2]

### 10.13.3 Combustible Liquid Mailability

Combustible liquid is prohibited in international mail. Combustible liquid is permitted in domestic mail if the material can qualify as an ORM-D material and meet the following conditions as applicable:

- a. For surface transportation, if the flashpoint is 100°F (38°C) but no more than 141°F (60.5°C); the liquid is in a metal primary receptacle not exceeding 1 gallon, or in another type of primary receptacle not exceeding 1 quart, per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are packed in a securely sealed secondary container that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name.
- b. For surface or air transportation, if the flashpoint is above 141°F (60.5°C) but no more than 200°F (93°C); the liquid is in a primary receptacle not exceeding 1 gallon per mailpiece; enough cushioning surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle are packed in a securely sealed secondary container that is placed within a strong outer shipping container; and each mailpiece is plainly and durably marked on the address side with “ORM-D” or “ORM-D AIR,” as applicable, immediately following or below the proper shipping name. Mailable material sent via surface transportation must be marked on the address side as “Surface Only” or “Surface Mail Only.” For air transportation, each mailpiece must bear a shipper’s declaration for dangerous goods.
- c. For air or surface transportation, if the flashpoint is above 200°F (93°C) the material is not regulated as a hazardous material. Such nonregulated materials must be properly and securely packaged to prevent leakage under the general packaging requirements in [2.0, Packaging](#). [C023.4.3]

**10.13.4 Cigarette Lighters**

A cigarette lighter equipped with an ignition element and containing fuel is a Class 3 flammable liquid. A cigarette lighter that contains a flammable gas is classed as a Division 2.1 flammable gas. A cigarette lighter containing either flammable liquid or flammable gas is permitted only in domestic mail via surface transportation when all of the following conditions are met:

- a. The design of the lighter and its packaging are approved by the DOT Associate Administrator for Hazardous Material Safety, per 49 CFR 173.21(i) and 173.308; and a DOT Approval Number (T-Number) is issued.
- b. The prospective mailer of the lighter submits to the appropriate PCSC manager a written request for authorization to mail the lighter, accompanied by a legible photocopy of the official DOT notice conveying the approval described in [10.13.4a](#) and a specimen of the actual lighter, the packaging materials in which each lighter is to be mailed, the number of mailpieces and mailing location; and the mailer receives from the PCSC manager a letter approving the requested authorization for mailing.
- c. When presented for mailing, the address side of the mailpiece containing the lighter prominently displays the T-Number, the proper shipping name "Lighter(s)" or "Lighter(s) for Cigarette," and the marking "Surface Only" or "Surface Mail Only"; all preparation and packaging requirements in the PCSC manager's approval letter are met; and a legible photocopy of the PCSC manager's approval letter accompanies the mailing. [C023.4.4]

**10.14 Flammable Solids (Hazard Class 4)****10.14.1 Definitions**

Hazard class 4 consists of three divisions:

- a. Division 4.1, Flammable Solids. Any solid material other than one classed as an explosive that, under conditions normally incident to transportation, is likely to cause fires through friction or retained heat from manufacturing or processing, or that can be ignited readily and, when ignited, burns so vigorously and persistently as to create a serious transportation hazard.
- b. Division 4.2, Spontaneously Combustible. A liquid or solid pyrophoric material that even in small amounts and without an external ignition source can ignite within 5 minutes after coming in contact with air, or a self-heating material that, when in contact with air and without an energy supply, is liable to self-heat.
- c. Division 4.3, Dangerous When Wet. A material that, by contact with water, is likely to become spontaneously flammable or to give off flammable or toxic gas at a rate greater than 1 liter per kilogram of the material per hour. [C023.5.1]

**10.14.2 Mailability**

Flammable solids are prohibited in international mail. Flammable solids are prohibited in domestic mail via air transportation. A flammable solid that can qualify as an ORM-D material is permitted in domestic mail via surface transportation if the material is contained in a secure primary receptacle having a weight of 1 pound or less; the primary receptacle(s) is packed in a strong outer shipping container with a

## 601.10.14.3

total weight of 25 pounds or less per mailpiece; and each mailpiece is plainly and durably marked on the address side with "Surface Only" or "Surface Mail Only" and "ORM-D" immediately following or below the proper shipping name. [C023.5.2]

**10.14.3 Matches**

Matches are classified as flammable solids. Strike-anywhere matches are prohibited in international and domestic mail. Safety matches (book, card, or strike-on-box) are prohibited in international mail, and in domestic mail via air transportation, but are permitted in domestic mail via surface transportation if:

- a. They do not ignite spontaneously under conditions normally incident to transportation or when subjected for 8 consecutive hours to a temperature of 200°F (93°C).
- b. They cannot be readily ignited by friction unless struck on their own or a similar box, card, or book.
- c. They are tightly packed in a securely sealed primary receptacle to prevent any shifting or movement that could cause accidental ignition by rubbing against adjoining items. The primary receptacle(s) is placed securely within an outer shipping container made of fiberboard, wood, or other equivalent material. Multiple primary receptacles may be placed in a single outer shipping container. The address side of the mailpiece must be marked "Surface Only" or "Surface Mail Only" and "Book Matches," "Strike-on-Card Matches," or "Card Matches," as appropriate. A shipping paper is not required.
- d. The gross weight of each mailpiece is not more than 25 pounds. [C023.5.3]

**10.15 Oxidizing Substances, Organic Peroxides (Hazard Class 5)****10.15.1 Definition**

Hazard class 5 consists of two divisions:

- a. Division 5.1, Oxidizing Substances. A material that may, generally by yielding oxygen, cause or enhance the combustion of other materials.
- b. Division 5.2, Organic Peroxides. Any organic compound that contains oxygen in the bivalent structure and that may be considered a derivative of hydrogen peroxide, where one or more of the hydrogen atoms have been replaced by organic radicals. [C023.6.1]

**10.15.2 Mailability**

Oxidizing substances and organic peroxides are prohibited in international mail. For domestic mail, a material that can qualify as an ORM-D material is permitted via air or surface transportation. Liquid materials must be enclosed within a primary receptacle having a capacity of 1 pint or less; the primary receptacle(s) must be surrounded by absorbent cushioning material and held within a leak-resistant secondary container that is packed within a strong outer shipping container. Solid materials must be contained within a primary receptacle having a weight capacity of 1 pound or less; the primary receptacle(s) must be surrounded with cushioning material and packed within a strong outer shipping container. Each mailpiece may not exceed a total weight of 25 pounds. The address side of each mailpiece must be plainly and durably marked with "ORM-D AIR" or "ORM-D," as applicable, immediately following or below the proper shipping name. A mailable Class 5

material sent via surface transportation must be marked "Surface Mail" or "Surface Mail Only" on the address side. A mailable material sent via air transportation must bear a shipper's declaration for dangerous goods. [C023.6.2]

## 10.16 Toxic Substances (Hazard Class 6, Division 6.1)

### 10.16.1 Definitions

The terms used in the standards for Division 6.1 material are:

- a. *Toxic substance* is a poisonous material, other than a gas, that is known to be so toxic to humans as to cause death, injury, or harm to human health if swallowed, inhaled, or contacted by the skin.
- b. *Oral toxicity* applies to a liquid with a lethal dose (LD<sub>50</sub>) for acute oral toxicity of not more than 500 mg/kg or a solid with an LD<sub>50</sub> for acute oral toxicity of not more than 200 mg/kg that when administered by mouth is likely to cause death within 14 days in half of the test animals.
- c. *Dermal toxicity* applies to a material with an LD<sub>50</sub> for acute dermal toxicity of not more than 1,000 mg/kg that when administered by continuous contact with bare skin is likely to cause death within 14 days in half of the test animals.
- d. *Inhalation toxicity* applies to a dust or mist with a lethal concentration (LC<sub>50</sub>) for acute inhalation toxicity of not more than 10 mg/L; or a saturated vapor concentration in air at 68°F (20°C) of more than one-fifth of the LC<sub>50</sub> for acute toxicity on inhalation of vapors and with an LC<sub>50</sub> for acute inhalation toxicity of vapors of not more than 5,000 ml/m<sup>3</sup>; that when administered by continuous inhalation for 1 hour is likely to cause death within 14 days in half of the test animals.
- e. *Irritating material* is any liquid or solid substance (e.g., tear gas) that gives off intense fumes and causes extreme irritation and impairment to a person's ability to function. [C023.7.1]

### 10.16.2 Mailability

Toxic substances or poisons are prohibited in international mail. For domestic mail, a Division 6.1 toxic substance or poison that can qualify as an ORM-D material is permitted when packaged under the applicable requirements in 10.16.4. Certain other poisonous materials are permitted to be mailed only between the authorized parties and under the conditions in 10.16.3. [C023.7.2]

### 10.16.3 Authorized Parties

A Division 6.1 toxic substance having an LD<sub>50</sub> for oral toxicity of greater than 5mg/kg but less than or equal to 50 mg/kg is mailable only if packaged under the applicable requirements in 10.16.4 and when sent between authorized parties and under specified conditions, as follows:

- a. Toxic substances for scientific use (not outwardly or of their own force dangerous or injurious to life, health, or property) may be sent only between manufacturers, dealers, bona fide research or experimental scientific laboratories, and employees of federal, state, or local governments who have official use for such poisons and are designated by the agency head to receive or send such poisons. For air transportation, a shipper's declaration for dangerous goods is required.

## 601.10.16.4

- b. Poisonous drugs and medicines may be sent only from the manufacturer or dealer of the drugs and medicines to licensed physicians, surgeons, dentists, pharmacists, druggists, cosmetologists, barbers, and veterinarians (18 USC 1716). [C023.7.3]

**10.16.4 Packaging and Marking**

The following requirements must be met, as applicable:

- a. A toxic substance that can qualify as an ORM-D material and does not exceed a total capacity of 8 ounces per mailpiece is permitted if: the material is held in a primary receptacle(s); enough cushioning material surrounds the primary receptacle to absorb all potential leakage; the cushioning and primary receptacle(s) are packed in another securely sealed secondary container that is placed within a strong outer shipping container. Each mailpiece must be plainly and durably marked on the address side with "ORM-D" or "ORM-D AIR," as applicable, immediately following or below the proper shipping name. Mailable material sent via surface transportation must be marked on the address side as "Surface Only" or "Surface Mail Only."
- b. Other toxic substances and poisons are permitted to be sent between the authorized parties and under the conditions in 10.16.3 when they do not exceed 8 ounces per mailpiece and if: the material is held in a leak-resistant primary receptacle(s); sufficient absorbent and cushioning material completely surround each primary receptacle; the primary receptacle(s) and the absorbent and cushioning materials are firmly held within a leakproof (for liquids) or siftproof (for solids) secondary container; the secondary container is firmly and securely held within a strong outer shipping container of 200-pound grade corrugated fiberboard or equivalent strength. The address side of each mailpiece must be marked with the proper shipping name and UN (or NA) identification number of the material (unless exempted by 11.11.2). Mailable materials sent via surface transportation must be marked on the address side as "Surface Only" or "Surface Mail Only." Each mailpiece must bear a shipping paper. [C023.7.4]

**10.16.5 Irritants**

Irritants are prohibited in international mail and domestic mail. [C023.7.5]

**10.17 Infectious Substances (Hazard Class 6, Division 6.2)****10.17.1 General**

The materials covered under Division 6.2 include infectious substances (i.e., etiologic agents), biological products, cultures and stocks, diagnostic (clinical) specimens, regulated medical waste, sharps waste, toxins, and used health care products. Division 6.2 materials are not permitted in international mail or domestic mail, except when they are intended for medical or veterinary use, research, or laboratory certification related to the public health; and only when such materials are properly prepared for mailing to withstand shocks, pressure changes, and other conditions related to ordinary handling in transit. Mailable Division 6.2 materials sent as international mail must meet the standards in *International Mail Manual* 135. For

domestic mail, mailable Division 6.2 materials must meet the applicable standards in 10.17. Unless otherwise noted, all mailable Division 6.2 materials in Risk Groups 2, 3, or 4 must be prepared to meet the requirements for air transportation. [C023.8.1]

### 10.17.2 Definitions

The terms used in the standards for Division 6.2 materials are defined as follows:

- a. *Division 6.2 (infectious substance)* means a material known to contain or suspected of containing a pathogen. A pathogen is a virus or microorganism (including its viruses, plasmids, or other genetic elements, if any) or a proteinaceous infectious particle (prion) that has the potential to cause disease in humans or animals. A Division 6.2 material must be assigned to a risk group as defined in 10.17.2f. Assignment to a risk group is based on the known medical condition and history of the source patient or animal, endemic local conditions, symptoms of the source patient or animal, or professional judgment concerning individual circumstances of the source patient or animal. Infectious substances are subject to applicable requirements in 42 CFR 72 (Interstate Shipment of Etiologic Agents).
- b. *Biological product* means a virus, therapeutic serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product, or analogous product used in the prevention, diagnosis, treatment, or cure of diseases in humans or animals. A biological product includes a material manufactured and distributed in accordance with one of the following provisions: 9 CFR 102 (Licenses for Biological Products); 9 CFR 103 (Experimental Products, Distribution, and Evaluation of Biological Products Prior to Licensing); 9 CFR 104 (Permits for Biological Products); 21 CFR 312 (Investigational New Drug Application); 21 CFR 314 (Applications for FDA Approval to Market a New Drug); 21 CFR 600–680 (Biologics); or 21 CFR 812 (Investigational Device Exemptions). A biological product known to contain or suspected of containing a pathogen in Risk Group 2, 3, or 4 must be classed as Division 6.2, described as an infectious substance, and assigned to UN 2814 or UN 2900, as appropriate, unless otherwise excepted by standard.
- c. *Cultures and stocks* means a material prepared and maintained for growth and storage and containing a Risk Group 2, 3, or 4 infectious substance.
- d. *Diagnostic (clinical) specimen* means any human or animal material, including excreta, secretions, blood and its components, tissue, and tissue fluids being transported for diagnostic or investigational purposes, but excluding live infected animals. A diagnostic specimen is not assigned a UN identification number unless the source patient or animal has or may have a serious human or animal disease from a Risk Group 4 pathogen, in which case it must be classed as Division 6.2, described as an infectious substance, and assigned to UN 2814 or UN 2900, as appropriate. Assignment to UN 2814 or UN 2900 is based on known medical condition and history of the patient or animal, endemic local conditions, symptoms of the source patient or animal, or professional judgment concerning individual circumstances of the source patient or animal.

## 601.10.17.2

- e. *Regulated medical waste*, for USPS purposes, means a soft waste material (other than a sharp) known to contain or suspected of containing an infectious substance in Risk Group 2 or 3 and generated in the diagnosis, treatment, or immunization of human beings or animals; research on the diagnosis, treatment, or immunization of human beings or animals; or the production or testing of biological products. Soft medical waste includes items such as used rubber gloves, swabs, gauze, tongue depressors, etc. Regulated medical waste classified in Risk Group 4 is nonmailable.
- f. *Risk group* means a ranking of a microorganism's ability to cause injury through disease. A risk group is defined by criteria developed by the World Health Organization (WHO) that are based on the severity of the disease caused by the organism, the mode and relative ease of transmission, the degree of risk to both an individual and a community, and the reversibility of the disease through the availability of known and effective preventive agents and treatment. There is no relationship between a risk group and a DOT packing group. Assignment to a risk group is based on the known medical condition and history of the source patient or animal, endemic local conditions, symptoms of the source patient or animal, or professional judgment concerning individual circumstances of the source patient or animal. The sender is responsible for accurately ranking a mailable material within the correct risk group. [Exhibit 10.17.2f](#) details the criteria for each risk group according to the level of risk.

**Exhibit 10.17.2f Risk Group Criteria**

| <b>RISK GROUP</b> | <b>PATHOGEN</b>   | <b>RISK TO INDIVIDUALS</b> | <b>RISK TO COMMUNITY</b> |
|-------------------|---|----------------------------|--------------------------|
| <b>4</b>          | A pathogen that usually causes serious human or animal disease and that can be readily transmitted from one individual to another, directly or indirectly, and for which effective treatments and preventive measures are not usually available.  | High                       | High                     |
| <b>3</b>          | A pathogen that usually causes serious human or animal disease but does not ordinarily spread from one infected individual to another, and for which effective treatments and preventive measures are available.  | High                       | Low                      |
| <b>2</b>          | A pathogen that can cause human or animal disease but is unlikely to be a serious hazard, and, while capable of causing serious infection on exposure, for which there are effective treatments and preventive measures available and the risk of spread of infection is limited.                               | Moderate                   | Low                      |
| <b>1</b>          | A microorganism that is unlikely to cause human or animal disease. A material containing only such microorganisms is not subject to regulation as a hazardous material, but it is subject to the packaging requirements in <a href="#">601.10.17.10</a> , unless otherwise noted in <a href="#">601.10.17</a> . | None or Very Low           | None or Very Low         |

[C023.8.2f]

- g. *Sharps*, for USPS purposes, means any object contaminated with a pathogen or that may become contaminated with a pathogen through handling or during transportation and that is also capable of cutting or penetrating skin or a packaging material. Sharps include used medical waste such as needles, syringes, scalpels, broken glass, culture slides, culture dishes, broken capillary tubes, broken rigid plastic, and exposed ends of dental wires. Sharps waste classified in Risk Group 4 is nonmailable.
- h. *Toxin* means a Division 6.1 material from a plant, animal, or bacterial source. A toxin containing an infectious substance or a toxin contained in an infectious substance must be classed as Division 6.2, described as an infectious substance, and assigned to UN 2814 or UN 2900, as appropriate.
- i. *Used health care product* means a medical, diagnostic, or research device or piece of equipment, or a personal care product used by consumers, medical professionals, or pharmaceutical providers that does not meet the definition of a diagnostic specimen, biological product, regulated medical waste, or sharps waste, is contaminated with potentially infectious body fluids or materials, and is not decontaminated or disinfected to remove or mitigate the infectious hazard prior to transportation. A used health care product classified in Risk Group 4 is nonmailable. [C023.8.2]

### 10.17.3 Nonregulated Materials

The following materials are not subject to regulation as Division 6.2 hazardous materials and are mailable when the packaging requirements in [10.17.10](#) are met:

- a. A diagnostic (clinical) specimen known to contain or suspected of containing a microorganism in Risk Group 1, or that does not contain a pathogen. Also, a diagnostic specimen in which the pathogen has been neutralized or inactivated so that exposure to it cannot cause disease.
- b. A biological product known to contain or suspected of containing a microorganism in Risk Group 1, or that does not contain a pathogen. Also any biological product, including an experimental product or component of a product, subject to Federal approval, permit, or licensing requirements, such as those required by the Food and Drug Administration (FDA) of the Department of Health and Human Services (HHS) or the U.S. Department of Agriculture (USDA).
- c. Blood collected for blood transfusion or the preparation of blood products; blood products; tissues intended for use in surgical procedures; and human cell, tissues, and cellular and tissue-based products regulated under authority of the Public Health Service Act and/or the Food, Drug, and Cosmetic Act. Also, blood collected for blood transfusion or the preparation of blood products and sent for testing as part of the collection process, except where the person collecting the blood has reason to believe it contains a pathogen in Risk Group 2 or 3, in which case the test sample must be packaged under [10.17.6](#).
- d. A material, including a Division 6.2 waste, that previously contained an infectious substance that has been treated by steam sterilization, chemical disinfection, or other appropriate method, so it no longer meets the definition of an infectious substance in Risk Group 2, 3, or 4.

## 601.10.17.4

- e. Forensic material in Risk Group 1 transported on behalf of a U.S. government, state, local, or Indian tribal government agency.
- f. Environmental microbiological samples, such as samples of dust from a ventilation system or mold from a wallboard, collected to evaluate occupational and residential exposure risks. [C023.8.3]

**10.17.4 Packaging—General**

All materials mailable under the provisions in 10.17 must be properly packaged. Exhibit 10.17.4 lists the specific reference in 10.17 under which each type of mailable material must be packaged. [C023.8.4]

**Exhibit 10.17.4 Packaging References for Materials Mailable Under 10.17, Infectious Substances (Hazard Class 6, Division 6.2)**

| MATERIAL                            | RISK GROUP |         |         |         |
|-------------------------------------|------------|---------|---------|---------|
|                                     | 1          | 2       | 3       | 4       |
| Blood for Transfusion               | 10.17.10   | 10.17.6 | 10.17.6 | nm      |
| Biological Product                  | 10.17.10   | 10.17.5 | 10.17.5 | 10.17.5 |
| Culture or Stock                    | 10.17.10   | 10.17.5 | 10.17.5 | 10.17.5 |
| Diagnostic Specimen                 | 10.17.10   | 10.17.6 | 10.17.6 | 10.17.5 |
| Infectious Substance (Division 6.2) | 10.17.10   | 10.17.5 | 10.17.5 | 10.17.5 |
| Forensic Material                   | 10.17.10   | 10.17.9 | 10.17.9 | 10.17.5 |
| Regulated Medical Waste             | 10.17.7    | 10.17.7 | 10.17.7 | nm      |
| Sharps Waste                        | 10.17.7    | 10.17.7 | 10.17.7 | nm      |
| Toxin (Division 6.2)                | 10.17.10   | 10.17.5 | 10.17.5 | 10.17.5 |
| Treated Medical Waste               | 10.17.10   | n/a     | n/a     | n/a     |
| Used Health Care Product            | 10.17.8    | 10.17.8 | 10.17.8 | nm      |

nm = Not mailable.

n/a = Not applicable.

[Exhibit C023.8.4]

**10.17.5 Packaging of Division 6.2 Infectious Substances**

Division 6.2 materials include infectious substances (etiologic agents), biological products, cultures or stocks, and toxins known or suspected to contain a Risk Group 2, 3, or 4 pathogen. Division 6.2 also includes diagnostic specimens known or suspected to contain a Risk Group 4 pathogen. The packaging of Division 6.2 infectious substances is subject to these standards:

- a. All Division 6.2 materials must meet the packaging requirements in 49 CFR 173.196. Either the primary receptacle or the secondary container must be capable of withstanding, without leakage, an internal pressure that produces a pressure differential of not less than 0.95 bar, 14 psi (95 kPa), and temperatures in the range of -40°F to 131°F (-40°C to 55°C) as required by 49 CFR 173.196.
- b. The material must be packaged in a securely sealed and watertight primary receptacle (test tube, vial, etc.) that is enclosed in another watertight and durable secondary container that is securely sealed. Several primary

receptacles may be enclosed in the secondary container if there is adequate cushioning material between them to prevent breakage during normal handling, and if the total volume of the material in all enclosed primary receptacles does not exceed 50 ml for liquids or 50 g for solids. The primary receptacle(s) and the secondary container must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).

- c. The space between the primary receptacle(s) and the secondary container at the top, bottom, and sides must contain enough absorbent material to take up the entire contents of the primary receptacle(s) in case of breakage or leakage.
- d. The primary receptacle(s) and the secondary container must be securely enclosed in an outer shipping container constructed of fiberboard or other equivalent material. No external surface of the outer shipping container may be less than 3.9 inches (100 mm) as required by 49 CFR 173.196. An itemized list of the contents of the primary receptacle(s) must be enclosed between the secondary container and the outer shipping container.
- e. Each mailpiece must be designed and constructed so that, if it were subject to the environmental and test conditions in 49 CFR 178.609, there would be no release of the contents to the environment and no significant reduction in the effectiveness of the packaging.
- f. All mailpieces sent under [10.17.5](#) must be sent First-Class Mail or Priority Mail and must be marked on the address side with the proper shipping name and UN number of the material (e.g., “UN 2814, Infectious Substances, Affecting Humans” or “UN 2900, Infectious Substances, Affecting Animals”). Each mailpiece must bear a DOT Class 6 label for infectious substances (etiologic agents), proper UN package specification markings, and orientation markings. A shipping paper is required. Any mailpiece classified as a Risk Group 4 material and that contains any of the select agents or toxins listed in 42 CFR 73.4 or 73.5 must meet all requirements in 42 CFR 72 and must also be sent using Registered Mail service.
- g. Articles that include dry ice as a refrigerant for the infectious substance must meet the requirements in 49 CFR 173.196(b)(2)(ii). [\[C023.8.5\]](#)

### **10.17.6 Packaging for Diagnostic Specimens in Risk Group 2 or 3**

A diagnostic (clinical) specimen known or suspected to contain a Risk Group 4 pathogen must be packaged under [10.17.5](#). A diagnostic specimen classified in Risk Group 1 must be packaged under [10.17.10](#). A diagnostic specimen classified in Risk Group 2 or 3 and that meets the definition in [10.17.2d](#) must be sent as First-Class Mail, Priority Mail, or Express Mail. Such materials must be packaged in a triple packaging, consisting of a primary receptacle, secondary container, and outer shipping container, subject to the following specific requirements:

- a. *Liquid Diagnostic (Clinical) Specimens.*
  1. The specimen must be contained in a leakproof and securely sealed primary receptacle. A single primary receptacle may not contain more than 500 ml of a specimen. Multiple primary receptacles are permitted in a single mailpiece if the mailpiece does not contain more than 4,000 ml. The primary receptacle(s) must be surrounded with sufficient

601.10.17.7

cushioning material to withstand shock and pressure changes and with absorbent material capable of taking up the entire liquid contents should the primary receptacle(s) leak.

2. The primary receptacle(s) and the absorbent material must be securely packed within a secondary container in such a way that, under normal conditions of transport, the primary receptacle cannot break, be punctured, or leak its contents into the secondary container.
3. The secondary container must be leakproof, securely sealed, and placed within a strong outer shipping container having suitable cushioning material such that any leakage of the contents does not impair the protective properties of the cushioning material or the outer shipping container. The secondary container must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).
4. The primary receptacle(s) or the secondary container must be capable of withstanding, without leakage, an internal pressure producing a pressure differential of not less than 0.95 bar, 14 psi (95 kPA). The completed mailpiece must be capable of successfully passing the drop test in 49 CFR 178.603 at a drop height of at least 1.2 meters (3.9 feet). The address side of the outer shipping container must be clearly and durably marked "Diagnostic Specimen." A shipping paper is not required.

*b. Solid (or Dried) Diagnostic Specimens.*

1. The primary receptacle must be siftproof with a capacity of not more than 500 g (1.1 pounds).
2. If several fragile primary receptacles are placed in a single secondary container, they must be individually wrapped or separated with sufficient cushioning material to prevent contact between them. The secondary container must be siftproof to contain the contents should the primary receptacle(s) leak. The secondary container must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).
3. The outer shipping container may not exceed 4 kg (8.8 pounds) capacity. The outer shipping container must be clearly and durably marked "Diagnostic Specimen." A shipping paper is not required. [C023.8.6]

**10.17.7 Sharps Waste and Other Mailable Regulated Medical Waste**

Regulated medical waste and sharps waste known to contain or suspected of containing an infectious substance in Risk Group 4 are nonmailable. Regulated medical waste and sharps waste as defined in [10.17.2e](#) and [10.17.2g](#), respectively, and classified in Risk Group 1, 2, or 3 are permitted for mailing only using merchandise return service (see [507.9.0](#)) with First-Class Mail or Priority Mail, subject to the following requirements:

- a. *Authorization.* Each distributor or manufacturer of a complete regulated medical waste or sharps waste mailing container system (including all component parts required to safely mail such waste to a storage or disposal facility) must obtain authorization from the USPS prior to mailing. Before applying for authorization, each type of mailing container system must be tested and certified under the standards in [10.17.7d](#) by an independent testing facility. The manufacturer or

distributor in whose name the authorization is being sought must submit a written request to the manager, Mailing Standards, USPS Headquarters (see [608.8.0, USPS Contact Information](#), for address). The request for authorization must contain the following:

1. An irrevocable \$50,000 surety bond or letter of credit as proof of sufficient financial responsibility to cover disposal costs if the manufacturer (or distributor) ceases doing business before all its waste container systems are disposed of or to cover cleanup costs if spills occur while the containers are in USPS possession. The surety bond or letter of credit must be issued in the name of the manufacturer or distributor seeking the authorization and must name the USPS as the beneficiary or obligee, as appropriate.
  2. Address of the headquarters or general business office of the distributor or manufacturer seeking the authorization.
  3. Address of each disposal and storage site.
  4. List of all types of mailing container systems to be covered by the request, a complete sample of each mailing container system, and proof of package testing certifications performed by the independent testing facility that subjected the packaging materials to the testing requirements in [10.17.7d](#).
  5. Copy of the proposed waste manifest (i.e., shipping paper) to be used with each mailing container system.
  6. 24-hour toll free telephone number for emergencies.
  7. List of the types of waste to be mailed for disposal in each mailing container system.
  8. Copy of the merchandise return service label to be used with each mailing container system.
- b. *Packaging*. Regulated medical waste and sharps waste in Risk Group 4 are nonmailable. A waste material treated by steam sterilization, chemical disinfection, or other appropriate method, so it no longer meets the definition of an infectious substance in Risk Group 2, 3, or 4, must be packaged under [10.17.10](#). The packaging for regulated medical waste and sharps waste in Risk Group 1, 2, or 3 is subject to these standards:
1. Regulated medical waste and sharps waste meeting the definitions in [10.17.2e](#) and [10.17.2g](#), respectively, must be collected in a rigid, securely sealed, and leakproof primary receptacle. For sharps waste, the primary receptacle must also be puncture-resistant and may not have a maximum capacity that exceeds 3 gallons in volume. For regulated medical waste, the primary receptacle may not have a maximum capacity that exceeds 5 gallons in volume. Each primary receptacle may not contain more than 50 ml (1.66 ounces) of residual waste liquid. Each primary receptacle must display the international biohazard symbol shown in [Exhibit 10.17.7c.2](#). Each primary receptacle must maintain its integrity when exposed to temperatures between 0° and 120°F.

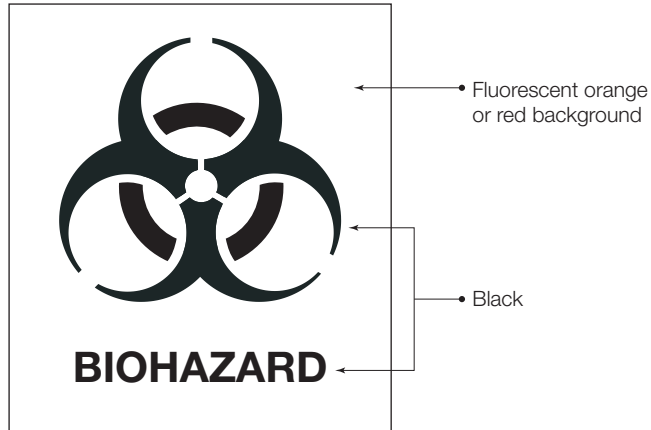

## 601.10.17.7

2. The primary receptacle must be packaged within a watertight secondary container or containment system. The secondary container may consist of more than one component. If one of the components is a plastic bag, it must be at least 3 mil in thickness and be used in conjunction with a strong fiberboard box. A plastic bag by itself does not meet the requirement for a secondary container. Several primary receptacles may be enclosed in a secondary container. The primary receptacle(s) must fit securely and snugly within the secondary container to prevent breakage during ordinary processing.
  3. The secondary container must be enclosed in a strong outer shipping container constructed of 200-pound grade corrugated fiberboard. The joints and flaps of the outer shipping container must be securely taped, glued, or stitched to maintain the integrity of the container. When tape or glue is used to secure an outer shipping container, the material must be water-resistant. Fiberboard boxes with interlock bottom flaps (i.e., easy-fold) are not permitted as outer shipping containers unless reinforced with water-resistant tape. The secondary container must fit securely and snugly within the outer shipping container to prevent breakage during ordinary processing.
  4. There must be enough material within a watertight barrier to absorb and retain three times the total liquid allowed within the primary receptacle (150 ml per primary receptacle) in case of leakage.
  5. Each mailpiece must not weigh more than 25 pounds.
  6. In each mailing container system, the authorized manufacturer or distributor must include a step-by-step instruction sheet that clearly details the proper sequence and method of container system assembly prior to mailing to prevent package failure during transport due to improper assembly. The instruction sheet must also include a customer service telephone number, or provide specific information on where such a telephone number is located elsewhere on the container system, for third-party end users to contact if they have assembly questions or find a component part is missing.
- c. *Mailpiece Labeling, Marking, and Documentation.* Regulated medical waste and sharps waste must meet the following requirements:
1. Each primary receptacle and outer shipping container must bear a label, which cannot be detached intact, showing: (a) the company name of the manufacturer or the distributor to which the mailing authorization is issued; (b) the USPS Authorization Number, and; (c) the container ID number (or unique model number) signifying that the packaging material is certified and that the manufacturer or distributor obtained the authorization required by [10.17.7a](#).

2. The primary receptacle(s) and the outer shipping container must bear the international biohazard symbol in black with either a fluorescent orange or fluorescent red background as shown in [Exhibit 10.17.7c.2](#).

**Exhibit 10.17.7c2 International Biohazard Symbol**

[Exhibit C023.8.7c.2]

3. Each mailpiece must have a four-part waste manifest, which also serves as the shipping paper. The manifest must be affixed to the outside of the mailpiece in an envelope or similar carrier that can be easily opened and resealed to allow review of the document. The manifest must comply with all applicable requirements imposed by the laws of the state from which the container system is mailed. At a minimum, the information in [Exhibit 10.17.7c3, Manifest for Regulated Medical Waste and Sharps Waste Containers](#), must be on the manifest.

601.10.17.7

### Exhibit 10.17.7c3 Manifest for Regulated Medical Waste and Sharps Waste Containers

| SECTION  | INFORMATION REQUIRED   |
|--|--|
| 1. Generator (Mailer)  | a. Name.<br>b. Complete address (not a Post Office box).<br>c. Telephone number.<br>d. Description of contents of mailing container. "Regulated Medical Waste" or "Regulated Medical Waste-Sharps" is required as appropriate.<br>e. Date container was mailed.<br>f. State permit number of approved facility in which contents are to be disposed of.  |
| 2. Destination Facility (Disposal Site)  | Complete address (not a Post Office box)   |
| 3. Generator's (Mailer's) Certification  | The following certification statement must be printed on manifest:<br><br>"I certify that this container has been approved for the mailing of [insert either "regulated medical waste" or "sharps waste," as appropriate], has been prepared for mailing in accordance with the directions for that purpose, and does not contain excess liquid or nonmailable material in violation of the applicable Postal Service regulations. I AM AWARE THAT FULL RESPONSIBILITY RESTS WITH THE GENERATOR (MAILER) FOR ANY VIOLATION OF 18 USC 1716 WHICH MAY RESULT FROM PLACING IMPROPERLY PACKAGED ITEMS IN THE MAIL. I also certify that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and in proper condition for carriage by air according to the national governmental regulations."<br><br>This statement must be followed by printed or typewritten name of generator (mailer), signature of generator, and date signed. |
| 4. Destination Facility (Storage or Disposal Site)   | The following certification statement of receipt, treatment, and disposal must be printed on manifest:<br><br>"I certify that the contents of this container have been received, treated, and disposed of in accordance with all local, state, and federal regulations."<br><br>This statement must be followed by printed or typewritten name of an authorized recipient at destination facility, signature of authorized recipient, and date signed.   |
| 5. Transporter Intermediate Handler Other Than the Postal Service (If Different From Destination Facility) | a. Name.<br>b. Complete address (not a Post Office box).<br>c. Printed or typewritten name of transporter or intermediate handler.<br>d. Signature of transporter or intermediate handler and date signed.   |
| 6. Serialized Waste Manifests  | Each waste manifest or mail disposal service shipping record must be serialized using a unique numbering system for identification purposes.   |
| 7. Comment Area  | Each manifest must contain an area designated for entering comments or noting discrepancies.   |
| 8. Completion and Distribution of Waste Manifest   | Each manifest must contain instructions for properly completing the four-part form.<br><br>Copies of the form must be distributed as follows:<br>a. One copy must be kept by generator (mailer).<br>b. One copy must be kept by transporter or intermediate handler for 90 days.<br>c. One copy must be kept by destination facility for 90 days.<br>d. One copy must be mailed to generator by destination facility.  |
| 9. Emergency Telephone Number  | Each manifest must bear the following statement with appropriate information:<br><br>"IN CASE OF EMERGENCY, OR THE DISCOVERY OF DAMAGE OR LEAKAGE, CALL 1-800-###-####."   |

[Exhibit C023.8.7c.3]

4. The outer shipping container must bear a properly prepared merchandise return service label (see [507.9.0](#)). The merchandise return service permit must be held in the same name as that of the authorized medical waste manufacturer or distributor.
  5. The outer shipping container must be marked on two opposite side walls with the package orientation marking in 49 CFR 173.312 to identify the proper upright position of the mailpiece during handling.
  6. Mailpieces containing regulated medical waste or sharps waste must be marked on the address side with the correct UN number and proper shipping name (e.g., “Regulated Medical Waste, UN 3291” or “Regulated Medical Waste–Sharps, UN 3291”).
- d. *Package Testing.* Testing must be performed by an independent testing facility on one sample of each type of mailing container system to prove compliance with [10.17.7a](#). The sample mailing container system must withstand the tests in 49 CFR 178.604 (leakproof test), 178.606 (stacking test), 178.608 (vibration standard), and 178.609(e), (f), and (h) (test requirements for packaging for infectious substances). In addition, the absorbent material must withstand an absorbency test that satisfies the requirements in [10.17.7b4](#). The test results must show that if every container system prepared for mailing were to be subject to the environmental and test conditions in 49 CFR, there would be no release of the contents to the environment and no significant reduction in the effectiveness of the packaging. Periodic retesting must be performed whenever a change is made to the design of the container system or every 24 months, whichever occurs first. [[C023.8.7](#)]

### **10.17.8 Packaging of Used Health Care Products**

A used health care product known or suspected to contain a Risk Group 4 pathogen is nonmailable. A used health care product meeting the definition in [10.17.2i](#), classified in Risk Group 1, 2, or 3, and being returned to the manufacturer or manufacturer's designee is mailable as First-Class Mail, Priority Mail, or Express Mail subject to the following packaging requirements:

- a. Each used health care product must be drained of liquid to the extent possible and placed in a watertight primary receptacle designed and constructed to ensure that it remains intact under normal conditions of transport. For a used health care product capable of cutting or penetrating skin or packaging material, the primary receptacle must be capable of retaining the product without puncture of the packaging under normal conditions of transport. The primary receptacle must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).
- b. Each primary receptacle must be placed inside a watertight secondary container designed and constructed to ensure that it remains intact under normal conditions of transport. The secondary container must also be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).
- c. The secondary container must be placed inside an outer shipping container with sufficient cushioning material to prevent movement between the secondary container and the outer shipping container. An itemized list of the contents of

601.10.17.9

the primary receptacle and information concerning possible contamination with a Division 6.2 material, including its possible location on the product, must be placed between the secondary container and the outer shipping container. A shipping paper and a content marking on the outer shipping container are not required. [C023.8.8]

**10.17.9 Packaging of Forensic Material in Risk Groups 2 and 3**

Forensic material in Risk Group 1 sent on behalf of a U.S. government, state, local, or Indian tribal government agency must be packaged under [10.17.10](#). Forensic material known or suspected to contain a Risk Group 4 infectious substance must be packaged under [10.17.5](#). Forensic material known or suspected to contain a Risk Group 2 or 3 pathogen is mailable as First-Class Mail, Priority Mail, or Express Mail when packaged in a triple packaging consisting of a primary receptacle, secondary container, and outer shipping container as follows:

- a. The forensic material must be held within a securely sealed primary receptacle. The primary receptacle must be surrounded by sufficient absorbent material (for liquids) and cushioning material to protect the primary container from breakage. The absorbent material must be capable of taking up the entire liquid contents of the primary receptacle in case of leakage. The primary receptacle must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).
- b. The primary receptacle and the absorbent and cushioning material must be enclosed in a watertight and securely sealed secondary container. The secondary container must also display the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#).
- c. The secondary container must be firmly and snugly packed within a strong outer shipping container that is securely sealed. A shipping paper and a content marking on the outer shipping container are not required. [C023.8.9]

**10.17.10 Packaging for Risk Group 1 Materials**

Division 6.2 materials in Risk Group 1 are not subject to regulation as hazardous materials (see [10.17.3](#)), but when presented for mailing they must be properly packaged. Regulated medical waste, sharps waste, and used health care products classified in Risk Group 1 must be packaged and mailed under the applicable requirements in [10.17.7](#) or [10.17.8](#). All other Risk Group 1 materials are mailable as First-Class Mail, Priority Mail, Express Mail, or Package Services. Such materials must be held within a securely sealed primary receptacle. The primary receptacle must be surrounded by sufficient absorbent material (for liquids) and cushioning material to protect the primary receptacle from breakage. The absorbent material must be capable of taking up the entire liquid contents of the primary receptacle in case of leakage. Either the primary receptacle or the inner packaging must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#). The primary receptacle and the absorbent and cushioning material must be snugly enclosed in a strong outer shipping container that is securely sealed. A shipping paper and a content marking on the outer shipping container are not required. Risk Group 1 diagnostic specimens and biological products are subject to the following packaging standards:

- a. *Liquid Diagnostic (Clinical) Specimens and Biological Products.* A diagnostic (clinical) specimen in Risk Group 4 or a biological product in Risk Group 2, 3, or 4 must be packaged under [10.17.5](#). A diagnostic specimen in Risk Group 2 or 3 must be packaged under [10.17.6](#). The packaging of a diagnostic specimen in Risk Group 1 (e.g., a urine specimen or blood specimen used in drug testing programs or for insurance purposes) or a biological product (e.g., polio vaccine) in Risk Group 1 is subject to the following standards:
1. *Not Exceeding 50 ml.* A diagnostic specimen or biological product consisting of 50 ml or less per mailpiece must be packaged in a securely sealed primary receptacle. Two or more primary receptacles whose combined volume does not exceed 50 ml may be enclosed within a single mailpiece. Sufficient absorbent material and cushioning material to withstand shock and pressure changes must surround the primary receptacle(s), or be otherwise configured to take up the entire liquid contents in case of leakage. The primary receptacle(s) and the absorbent cushioning must be enclosed in a secondary container having a leakproof barrier that can prevent failure of the secondary container if the primary receptacle(s) should leak during transport. The secondary container must be securely sealed and it may serve as the outer shipping container provided it has sufficient strength to withstand ordinary postal processing. The secondary container must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#), except when the secondary container also serves as the outer shipping container. In that case, the biohazard symbol must appear either on the inner packaging or on the primary container. A shipping paper and a content marking on the outer shipping container are not required.
  2. *Exceeding 50 ml.* A clinical specimen or biological product that exceeds 50 ml must be packaged in a securely sealed primary receptacle. A single primary receptacle must not contain more than 500 ml of specimen. Two or more primary receptacles whose combined volume does not exceed 500 ml may be enclosed in a single secondary container. Sufficient absorbent material and cushioning material to withstand shock and pressure changes must surround the primary receptacle(s), or be otherwise configured to take up the entire liquid contents in case of leakage. The primary receptacle(s) and the absorbent cushioning must be enclosed in a secondary container having a leakproof barrier that can prevent failure of the secondary container if the primary receptacle(s) should leak during transport. The secondary container cannot serve as the outer shipping container. The secondary container must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#). The secondary container must be securely and snugly enclosed in a fiberboard box or container of equivalent strength that serves as the outer shipping container. The maximum amount of a specimen that may be enclosed in a single mailpiece must not exceed 4,000 ml. A shipping paper and a content marking on the outer shipping container are not required.

601.10.18

- b. *Solid (or Dried) Specimens*. A solid or dry specimen, such as a saliva swab, blood spot, or fecal smear in Risk Group 1 must be completely dried prior to placing it in or on a secure primary receptacle. Cushioning material to withstand shock and pressure changes is required only if the dry specimen is held in a breakable primary receptacle. When required, the cushioning material must surround the primary receptacle to prevent breakage or damage to the primary receptacle. The primary receptacle (and cushioning material, if required) must be enclosed in a secondary container having a leakproof barrier that can prevent failure of the secondary container if the primary receptacle breaks during shipment. The secondary container must be securely sealed and it may serve as the outer shipping container provided it has sufficient strength to withstand ordinary postal processing. The secondary container must be marked with the international biohazard symbol as shown in [Exhibit 10.17.7c.2](#), except when the secondary container also serves as the outer shipping container. In that case, the biohazard symbol must appear either on the inner packaging or on the primary container. A shipping paper and a content marking on the outer shipping container are not required. [C023.8.10]

#### **10.18 Radioactive Materials (Hazard Class 7)**

Radioactive materials are prohibited in international mail and domestic mail if required to bear the DOT Radioactive White-I, Radioactive Yellow-II, or Radioactive Yellow-III label (49 CFR 172.436, 172.438, or 172.440, respectively) or if it contains quantities of radioactive material in excess of those authorized in Publication 52, *Hazardous, Restricted, or Perishable Mail*. Radioactive materials are prohibited in domestic mail via air transportation. For international mail, the standards in IMM 135 apply. [C023.9.0]

#### **10.19 Corrosives (Hazard Class 8)**

##### **10.19.1 Definition**

A *corrosive* is any liquid or solid that causes visible destruction or irreversible alteration in human skin tissue at the site of contact or a liquid that has a severe corrosion rate on steel. [C023.10.1]

##### **10.19.2 Mailability**

Corrosives are prohibited in international mail. A corrosive that can qualify as an ORM-D material is permitted in domestic mail via air or surface transportation subject to these limitations:

- a. *Liquid Corrosive*. A liquid mixture must be 1 pint or less and must contain 15% or less corrosive material with the remainder of the mixture not being a hazardous material, unless otherwise specified for a specific corrosive material. Primary receptacles must be securely sealed compatible glass bottles that are enclosed within securely sealed metal or plastic secondary containers. The secondary container must be packed within a strong outer shipping container that does not exceed 25 pounds per mailpiece.
- b. *Solid Corrosive*. A solid mixture must be 10 pounds or less per primary receptacle and must contain 10% or less corrosive material with the remainder of the mixture not being a hazardous material, unless otherwise specified for a specific corrosive solid. The primary receptacle(s) and secondary container

must be securely sealed compatible siftproof containers packed in strong outer shipping container. The total weight of a mailable solid corrosive cannot exceed 25 pounds per mailpiece. [C023.10.2]

### 10.19.3 Marking

For surface transportation, the mailpiece must be plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name. For air transportation, the mailpiece must be plainly and durably marked on the address side with “ORM-D AIR” immediately following or below the proper shipping name and must bear a shipper's declaration for dangerous goods. [C023.10.3]

### 10.19.4 Nonspillable Wet Electric Storage Batteries

A battery containing liquid electrolyte is prohibited from mailing unless the battery casing is completely sealed to prevent the liquid corrosive from spilling during handling. Nonspillable batteries with UN2800 are prohibited in international mail, but may be sent as domestic mail via air or surface transportation under the following conditions:

- a. The nonspillable battery must be protected from short circuits, surrounded with sufficient cushioning material, and securely packaged in a strong fiberboard box that serves as the outer shipping container.
- b. The outer shipping container must be marked “NONSPILLABLE BATTERY, UN2800” on the address side.
- c. The nonspillable battery must be capable of withstanding the vibration and pressure differential tests cited in 49 CFR 173.159(d)(i) and (ii).
- d. Only one nonspillable battery is allowed per mailpiece and the weight of the mailpiece cannot exceed 25 pounds. [C023.10.4]

## 10.20 Miscellaneous Hazardous Materials (Hazard Class 9)

### 10.20.1 Definition

A *miscellaneous hazardous material* is a substance or article that presents a hazard during transportation but does not meet the definition of any other hazard class. Examples of miscellaneous hazardous materials (not all of which are mailable) include solid dry ice, elevated temperature substances, environmentally hazardous substances, life-saving appliances, and asbestos. [C023.11.1]

### 10.20.2 Mailability

A miscellaneous hazardous material is prohibited in international mail. A miscellaneous hazardous material that can qualify as an ORM-D material is permitted for domestic mail via air or surface transportation, subject to the applicable 49 CFR requirements. [C023.11.2]

### 10.20.3 Marking

For surface transportation, the mailpiece must be plainly and durably marked on the address side with “Surface Only” or “Surface Mail Only” and “ORM-D” immediately following or below the proper shipping name. For air transportation, a mailable

## 601.10.20.4

material must be plainly and durably marked on the address side with “ORM-D AIR” immediately following or below the proper shipping name and bear a shipper’s declaration for dangerous goods. [C023.11.3]

**10.20.4 Dry Ice**

Dry ice (carbon dioxide solid) is prohibited in international mail. Dry ice is permitted in the domestic mail via air or surface transportation when used as a refrigerant to cool the contents of a mailpiece. A mailpiece containing dry ice must be packed in a container that is designed to permit the release of carbon dioxide gas and prevent a build-up of pressure that could rupture the parcel. Containers must conform to 49 CFR 173.217 and 175.10(a)(13). Additionally, the following applies:

- a. Air Transportation Requirements. Each mailpiece may not contain more than 5 pounds of dry ice. The address side of each mailpiece must be clearly marked “Carbon Dioxide Solid, UN1845” or “Dry Ice, UN1845” along with the net weight of the dry ice and the identity of the contents being cooled. A shipper’s declaration prepared in triplicate and a DOT Class 9 warning label for miscellaneous hazardous materials must be affixed to the outside of the mailpiece.
- b. Surface Transportation Requirements. The amount of dry ice per mailpiece may exceed 5 pounds. The address side of each mailpiece must be clearly marked “Carbon Dioxide Solid” or “Dry Ice” and “Surface Only” or “Surface Mail Only” along with the net weight of the dry ice and the identity of the contents being cooled. A shipper’s declaration and a DOT Class 9 warning label are not required for the dry ice. [C023.11.4]

**10.21 Other Regulated Materials—Magnetized Materials**

A magnetized material is not classified within any of the nine hazard classes. Such material is regulated as a hazardous material only if offered for carriage on air transportation and when it has a magnetic field strength capable of causing the deviation of aircraft instruments. Regulated magnetized materials are mailable subject to the following limitations:

- a. Definition. A magnetized material is any article that has a magnetic field strength capable of causing the deviation of aircraft instruments. A magnetized material is regulated as a hazardous material when it is presented for air transportation and has a measurable magnetic field strength greater than 0.00525 gauss at 15 feet. Magnetized materials include magnets and magnetized devices such as magnetrons and light meters of sufficient strength to possibly cause erroneous aircraft compass readings. If the maximum field strength observed at a distance of 7 feet is less than 0.002 gauss or there is no significant compass deflection (less than 0.5 degree), the article is not restricted as a magnetized material.
- b. Mailability. Regulated magnetized material is prohibited in international mail. A material with a measurable magnetic field strength greater than 0.00525 gauss at 15 feet is prohibited from domestic mail via air transportation. Mailable materials must be packaged and marked as specified in Publication 52, *Hazardous, Restricted, and Perishable Mail*. Mailable material permitted via air

transportation must bear a shipper's declaration for dangerous goods. Magnetized material is not regulated as a hazardous material when transported via surface transportation. [C023.12.0]

## 11.0 Other Restricted and Nonmailable Matter

### 11.1 Pistols, Revolvers, and Other Concealable Firearms

#### 11.1.1 Definitions

The terms used in this standard are defined as follows:

- a. *Handgun* means any pistol, revolver, or other firearm or device the mailing of which is regulated by this standard.
- b. *Pistol or revolver* means a handgun styled to be fired by the use of a single hand and to fire or otherwise expel a projectile by the action of an explosion, spring, or other mechanical action, or air or gas pressure with enough force to be used as a weapon.
- c. *Firearm* means any device, including a starter gun, designed to, or that may readily be converted to, expel a projectile by the action of an explosion, spring, or other mechanical action, or air or gas pressure with enough force to be used as a weapon.
- d. *Other firearms capable of being concealed on the person* include, but are not limited to, short-barreled shotguns and short-barreled rifles.
- e. *Short-barreled shotgun* means a shotgun that has one or more barrels less than 18 inches long. The term *short-barreled rifle* means a rifle that has one or more barrels less than 16 inches long. These definitions include any weapon made from a shotgun or rifle, whether by alteration, modification, or otherwise, if such weapon as modified has an overall length of less than 26 inches. A short-barreled shotgun or rifle of greater dimension may be regarded as nonmailable when it has characteristics to allow concealment on the person.
- f. *Licensed manufacturer* and *licensed dealer* mean, respectively, a manufacturer of firearms or a bona fide dealer of firearms, duly licensed by the Bureau of Alcohol, Tobacco and Firearms of the Department of the Treasury, under the Gun Control Act of 1968 (Public Law 90-618), 18 USC 921, et seq.
- g. *Antique firearm* means any firearm (including those with a matchlock, flintlock, percussion cap, or similar type of ignition system) manufactured in or before 1898, or any replica thereof, if such replica:
  1. Is not designed or redesigned for using rimfire or conventional centerfire fixed ammunition.
  2. Uses rimfire or conventional centerfire fixed ammunition that is no longer manufactured in the United States and that is not readily available in the ordinary channels of commercial trade. [C024.1.1]

601.11.1.2

**11.1.2 Handguns**

Pistols, revolvers, and other firearms capable of being concealed on the person (referred to as *handguns*) are nonmailable unless mailed between the parties listed in [11.1.3](#) and [11.1.5](#) after the filing of an affidavit or statement required by [11.1.4](#) and [11.1.6](#). [C024.1.2]

**11.1.3 Authorized Persons**

Subject to [11.1.4](#), handguns may be mailed by a licensed manufacturer of firearms, a licensed dealer of firearms, or an authorized agent of the federal government or the government of a state, territory, or district, only when addressed to a person in one of the following categories for use in the person's official duties:

- a. Officers of the Army, Coast Guard, Air Force, Navy, Marine Corps, or Organized Reserve Corps.
- b. Officers of the National Guard or militia of a state, territory, or district.
- c. Officers of the United States or of a state, territory, or district, whose official duty is to serve warrants of arrest or commitment.
- d. USPS employees authorized by the Chief Postal Inspector.
- e. Officers and employees of enforcement agencies of the United States.
- f. Watchmen engaged in guarding the property of the United States, a state, territory, or district.
- g. Purchasing agent or other designated member of agencies employing officers and employees included in [11.1.3c.](#) through [11.1.3e.](#) [C024.1.3]

**11.1.4 Affidavit of Addressee**

Any person proposing to mail a handgun under [11.1.3](#) must file with the postmaster, at the time of mailing, an affidavit signed by the addressee setting forth that the addressee is qualified to receive the firearm under a particular category of [11.1.3a.](#) through [11.1.3g.](#) and that the firearm is intended for the addressee's official use. The affidavit must also bear a certificate stating that the firearm is for the official duty use of the addressee, signed by one of the following, as appropriate:

- a. For officers of Armed Forces, by the commanding officer.
- b. For officers and employees of enforcement agencies, by the head of the agency employing the addressee to perform the official duty with which the firearm is to be used.
- c. For watchmen, by the chief clerk of the department, bureau, or independent branch of the government of the United States, the state, the territory, or the district by which the watchman is employed.
- d. For the purchasing agent or other designated member of enforcement agencies, by the head of such agency, that the firearm is to be used by an officer or employee included in [11.1.3c.](#) through [11.1.3e.](#) *Authorized Persons.* [C024.1.4]

**11.1.5 Manufacturers and Dealers**

Handguns may also be mailed between licensed manufacturers of firearms and licensed dealers of firearms in customary trade shipments, or for repairing or replacing parts. [C024.1.5]

**11.1.6 Certificate of Manufacturers and Dealers**

A licensed manufacturer or dealer need not file the affidavit under 11.1.4, but must file with the postmaster a statement on Form 1508 signed by the mailer that he or she is a licensed manufacturer or dealer of firearms, that the parcels containing handguns (or major component parts thereof) are customary trade shipments or contain such articles for repairing or replacing parts, and that to the best of his or her knowledge or belief the addressees are licensed manufacturers or dealers of firearms. [C024.1.6]

**11.1.7 FBI Crime Detection Bureaus**

Handguns may be mailed without regard to 11.1.3 through 11.1.6 if:

- a. Addressed to the Federal Bureau of Investigation (FBI), or its director, or to the scientific laboratory or crime detection bureau of any agency whose members are federal law enforcement officers or officers of a state, territory, or district authorized to serve warrants of arrest or commitment; or
- b. Offered by an authorized agent of the federal government as an official shipment to any qualified addressee in categories 11.1.3a. through 11.1.3g, or to a licensed manufacturer or dealer of firearms or to a federal agency.

[C024.1.7]

**11.2 Antique Firearms**

Antique firearms sent as curios or museum pieces may be accepted for mailing without regard to 11.1.3 through 11.1.6. [C024.2.0]

**11.3 Rifles and Shotguns**

Although unloaded rifles and shotguns not precluded by 11.1.1e and 11.1.2 are mailable, mailers must comply with the Gun Control Act of 1968, Public Law 90-618, 18 USC 921, et seq., and the rules and regulations promulgated thereunder, 27 CFR 178, as well as state and local laws. The mailer may be required by the USPS to establish, by opening the parcel or by written certification, that the gun is unloaded and not precluded by 11.1.1e. [C024.3.0]

**11.4 Legal Opinions on Mailing Firearms**

Postmasters are not authorized to give opinions on the legality of any shipment of rifles or shotguns. Contact the nearest office of the Bureau of Alcohol, Tobacco and Firearms for further advice. [C024.4.0]

**11.5 Knives and Sharp Instruments****11.5.1 Mailability**

Knives (including sharp-pointed instruments such as stiletos that lack cutting edges) with a blade that opens automatically by hand pressure applied to a button or other device in the handle, or by operations of inertia, gravity, or both, or with a detachable blade propelled by a spring-operated mechanism, are mailable only when sent to:

## 601.11.5.2

- a. The respective government's or organization's designated supply or procurement officers and employees ordering, procuring, or buying such knives for use with the activities of the federal government; the National Guard, the Air National Guard, or the militia of a state, territory, or the District of Columbia; or the municipal government of the District of Columbia or of the government of any state or territory, or of any county, city, or other political subdivision of a state or territory.
- b. Manufacturers of such knives, or bona fide dealers of such knives, in connection with a shipment made under an order from any person designated in [11.5.1a](#). [C024.5.1]

**11.5.2 Addressee Identification**

Before delivering a shipment (or parcel) that contains an article or articles described in [11.5.1](#), a USPS employee may require that the recipient identify himself or herself as in one of the categories in [11.5.1a](#). [C024.5.2]

**11.5.3 Wrapping**

Sharp-pointed or sharp-edged instruments such as knives, tools, ice picks, and razor blades, that are otherwise mailable, must be wrapped to protect their points and edges from cutting through the outer carton in which they are mailed.

[C024.5.3]

**11.6 Prohibited Parcel Marking**

For any parcel containing a firearm or a ballistic or switchblade knife, any marking that indicates the contents is not permitted on the outside wrapper or container.

[C024.6.0]

**11.7 Intoxicating Liquor**

A potable beverage is nonmailable if it is of 0.5% or more alcoholic content by weight, which is taxable under Chapter 51, Internal Revenue Service Code. The product may be mailed if it conforms to applicable requirements of the Internal Revenue Service and Food and Drug Administration and is not an alcoholic beverage, poisonous, or flammable. [C024.7.0]

**11.8 Matter Emitting Obnoxious Odor**

Any matter that is a source of an obnoxious odor is nonmailable. [C024.8.0]

**11.9 Liquids and Powders****11.9.1 Liquids and Semisolids**

Liquids and semisolids that may liquefy under normal conditions and are otherwise mailable must be adequately prepared for mailing under [1.0](#) through [8.0](#).

[C024.9.1]

**11.9.2 Powders**

Powders that, if allowed to escape from their containers, could cause damage, discomfort, destruction, or soiling, must either be packed in siftproof containers or in other containers sealed in durable siftproof outer containers. [C024.9.2]

**11.10 Motor Vehicle Master Keys and Locksmithing Devices****11.10.1 Motor Vehicle Master Key—Definition**

A *motor vehicle master key* is any key (other than the key furnished by the manufacturer with the motor vehicle, or the key furnished with a replacement lock, or an exact duplicate of such keys) designed to operate two or more motor vehicle ignition, door, or trunk locks of different combinations, including any pattern, impression, or mold from which such a master key can be made (18 USC 1716A; 39 USC 3002). [C024.10.1]

**11.10.2 Nonmailable**

Any motor vehicle master key, as defined in 11.10.1, and any advertisement for the sale of such item, are nonmailable, unless sent to any of the following:

- a. Lock manufacturer.
- b. Professional locksmith.
- c. Motor vehicle manufacturer or dealer.
- d. Federal, state, or local government agency. [C024.10.2]

**11.10.3 Marking**

Any marking identifying the contents is not permitted on the outside wrapper or container of any parcel containing motor vehicle master keys. [C024.10.3]

**11.10.4 Locksmithing Device—Definition**

A *locksmithing device* is:

- a. A device or tool (other than a key) designed to manipulate the tumblers in a lock into the unlocked position through the keyway of such lock.
- b. A device or tool (other than a key or a device or tool under 11.10.4a) designed for bypassing a lock or similar security device, or for opening it by a method normally not used by consumers to open such locks or security devices.
- c. A device or tool designed for making an impression of a key or similar security device to duplicate such key or device. [C024.10.4]

**11.10.5 Nonmailable**

Any locksmithing device, as defined in 11.10.4, is nonmailable, unless sent to any of the following:

- a. Lock manufacturer or distributor.
- b. Bona fide locksmith.
- c. Bona fide reposessor.
- d. Motor vehicle manufacturer or dealer.
- e. Bona fide automotive repair shops or businesses. [C024.10.5]

**11.11 Controlled Substances****11.11.1 Definition**

A *controlled substance* means any anabolic steroid, narcotic, hallucinogenic, stimulant, or depressant drug in Schedules I through V of the Controlled Substances Act, 21 USC 801, et seq., and 21 CFR 1300, et seq. If distribution of a controlled

601.11.11.2

substance is unlawful under 21 USC 801, et seq., and any implementing regulation in 21 CFR 1300, et seq., then distribution of such matter by mail also is unlawful under 18 USC 1716. [C024.11.1]

#### **11.11.2 Mailing Standards**

If distribution of a controlled substance is lawful under 21 USC 801, et seq., and any implementing regulation in 21 CFR 1300, et seq., the USPS considers such distribution by mail to constitute the mailing of matter not outwardly or of its own force dangerous or injurious to a person's life or health and accordingly mailable, subject to these standards:

- a. The inner container of any package containing controlled substances is marked and sealed under the applicable provisions of the Controlled Substances Act (21 USC 801, et seq., and any implementing regulation in 21 CFR 1300, et seq.) and placed in a plain outer mailing container or securely overwrapped in plain paper.
- b. If the mailing includes prescription drugs containing controlled substances, the inner container is also labeled to show the prescription number and the name and address of the pharmacy, practitioner, or other person dispensing the prescription.
- c. The outer mailing wrapper or container is free of markings that indicate the nature of the content. [C024.11.2]

### **11.12 Drug Paraphernalia**

#### **11.12.1 Definition and Examples**

It is unlawful to use domestic or international mail to transport drug paraphernalia. The term *drug paraphernalia* refers to any equipment, product, or material of any kind primarily intended or designed for use in manufacturing, compounding, converting, concealing, producing, processing, preparing, injecting, ingesting, inhaling, or otherwise introducing into the human body a controlled substance, possession of which is unlawful under the Controlled Substances Act. Examples of drug paraphernalia are items primarily intended or designed for use in ingesting, inhaling, or otherwise introducing marijuana, cocaine, hashish, hashish oil, PCP, or amphetamines into the human body, such as metal, wooden, acrylic, glass, stone, plastic, or ceramic pipes with or without screens, permanent screens, hashish heads, or punctured metal bowls; water pipes, chamber pipes, carburetor pipes, electric pipes, ice pipes or chillers, and air-driven pipes; carburetion tubes and devices; smoking and carburetion masks; roach clips (i.e., objects used to hold burning material that is too small or short to be held in the hand); miniature spoons with level capacities of 1/10 cubic centimeter or less; chillums; bongs; wired cigarette papers; and cocaine freebase kits. [C024.12.1]

#### **11.12.2 Determination**

In determining whether an item constitutes drug paraphernalia, in addition to all other logically relevant factors, these factors may be considered:

- a. Oral or written instructions or other descriptive materials provided with the item that explain or depict its use.
- b. National and local advertising on its use.

- c. The manner in which the item is displayed for sale.
- d. Whether the owner, or anyone in control of the item, is a legitimate supplier of like or related items to the community, such as a licensed distributor or dealer of tobacco products.
- e. Direct or circumstantial evidence of the ratio of sales of the items to the total sales of the business enterprise.
- f. The existence and scope of legitimate uses of the item in the community.
- g. Expert testimony on its use. [C024.12.2]

### 11.12.3 Exceptions

The standards in 11.12.1 and 11.12.2 apply neither to any person authorized by local, state, or federal law to manufacture, possess, or distribute items described in 11.12.1 and 11.12.2; nor to any item that, in the normal lawful course of business, is sold through the mail and traditionally intended for use with tobacco products, including any pipe, paper, or accessory. [C024.12.3]

### 11.13 Household Substance

A household substance (39 USC 3001(f)), i.e., any matter unsolicited by the addressee, that contains a substance as defined by section 2 of the Poison Prevention Packaging Act of 1970 (15 USC 1471(2)), is permitted in the mail only if it complies with the requirements for special child-resistant packaging established for that substance by the Consumer Product Safety Commission (16 CFR 1700). [C024.13.0]

### 11.14 Pesticide

A pesticide (18 USC 1716), i.e., any matter that contains a pesticide as defined by section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 USC 136(u)), is permitted in the mail only if it complies with child-resistant packaging standards established by the Environmental Protection Agency applicable to that particular matter (40 CFR 157) and meets the applicable standards in 10.0, *Hazardous Materials*. [C024.14.0]

### 11.15 Fragrance Advertising Sample

A fragrance advertising sample (39 USC 3001(g)), i.e., any matter normally acceptable in the mail but containing a fragrance advertising sample, is permitted in the mail only if it is sealed, wrapped, treated, or otherwise prepared in a manner reasonably designed to prevent individuals from being unknowingly or involuntarily exposed to the sample. A sample meets this requirement if it uses paper stocks with a maximum porosity of 20 Sheffield units or 172 Gurley-Hill units treated exclusively with microencapsulated oils, and if the sample is produced so that it cannot be activated except by opening a glued flap or binder or by removing an overlying ply of paper. [C024.15.0]

### 11.16 Compliance Certificate

A mailer who presents matter that is generally permitted in the mail under 11.13, 11.14, and 11.15 but for compliance with the specified packaging and preparation requirements may submit an accompanying written statement certifying that the matter is packaged or prepared under the applicable federal laws and postal

601.11.17

standards. The certifying statement may be made on the mailer's letterhead, on a postage statement, or as a notice on the exterior of each item presented for mailing.

[C024.16.0]

**11.17 Battery-Powered Devices**

Any device powered by dry-cell batteries must have the batteries removed or deactivated to prevent activating the device in the mail. A battery with liquid electrolyte is not permitted in the mail unless it is a nonspillable type battery that meets the standards in [10.0, \*Hazardous Materials\*](#). [C024.17.0]

**11.18 Odd-Shaped Items in Paper Envelopes**

Pens, pencils, key rings, bottle caps, and other similar odd-shaped items are not permitted in letter-size or flat-size paper envelopes unless they are wrapped within the other contents of the envelope to streamline the shape of the mailpiece and prevent damage during postal processing. If an odd-shaped item is not properly wrapped, it could burst through the envelope and cause injury to employees and damage to USPS processing equipment. Odd-shaped items that are properly wrapped within paper envelopes and sent at the First-Class Mail or Standard Mail nonautomation rates may be subject to the nonmachinable surcharge under [133.1.10](#), [233.4.3](#), [333.4.3](#), and [433.3.2](#) or [243.5.6](#), as applicable. Certain types of odd-shaped items, when properly wrapped, are permitted as automation rate letter-size mail subject to the standards in [201.3.0](#). Flat-size automation rate mail is subject to the uniform thickness requirement in [301.3.0](#). [C024.18.0]

**11.19 Abortive and Contraceptive Devices**

**11.19.1 Abortion Devices**

Any article or thing designed, adapted, or intended for producing abortion is not permitted in the mail (18 USC 1461). [C024.19.1]

**11.19.2 Contraceptives**

Unsolicited samples of an article or thing designed, adapted, or intended for preventing conception is permitted in the mail only when sent to a manufacturer or a dealer of such an article or things, to a licensed physician or surgeon, or to a nurse, pharmacist, druggist, hospital, or clinic (39 USC 3001; 18 USC 1461). [C024.19.2]

**11.20 Building Construction Material**

Building construction material is not permitted in the mail if the acceptance and processing is likely to harm or injure USPS employees, mail, or equipment. Factors considered include but are not limited to whether the material may pose potential storage problems at the postal facilities that may process the material; whether the volume of material may impede the flow of mail in USPS transportation or mail distribution systems; whether the volume of material may lead to security problems; and whether processing the material may create safety hazards for USPS employees. [C024.20.0]

## 12.0 Written, Printed, and Graphic Matter Generally

### 12.1 **Solicitations in Guise of Bills, Invoices, or Statements of Account (39 USC 3001(D); 39 USC 3005)**

#### 12.1.1 **General**

Any otherwise mailable matter that reasonably could be considered a bill, invoice, or statement of account due, but is in fact a solicitation for an order, is nonmailable unless it conforms to [12.1.2](#) through [12.1.5](#) in *Solicitations in Guise of Bills, Invoices, or Statements of Account (39 USC 3001(D); 39 USC 3005)*. A nonconforming solicitation constitutes prima facie evidence of violation of 39 USC 3005.

Compliance with this section does not avoid violation of Section 3005 if any part of the solicitation or any information with it misrepresents a material fact to the addressee (e.g., misleading the addressee about the identity of the sender of the solicitation or about the nature or extent of the goods or services offered may be a violation of Section 3005). [C031.1.1]

#### 12.1.2 **Required Disclaimer**

The solicitation must bear on its face either the disclaimer required by 39 USC 3001(d)(2)(A) or the notice: "THIS IS NOT A BILL. THIS IS A SOLICITATION. YOU ARE UNDER NO OBLIGATION TO PAY THE AMOUNT STATED ABOVE UNLESS YOU ACCEPT THIS OFFER." The statutory disclaimer or the alternative notice must be displayed in conspicuous boldface capital letters of a color prominently contrasting with the background against which it appears, including all other print on the face of the solicitation and that are at least as large, bold, and conspicuous as any other print on the face of the solicitation, but not smaller than 30-point type (see [Exhibit 12.1.2](#)). The notice or disclaimer required by this section must be displayed conspicuously apart from other print on the page immediately below each portion of the solicitation that reasonably could be construed to specify a monetary amount due and payable by the recipient. It must not be preceded, followed, or surrounded by words, symbols, or other matter that reduces its conspicuousness or that introduces, modifies, qualifies, or explains the required text, such as "Legal Notice Required by Law." [C031.1.2 and C031.1.3]

[Exhibit C031.1.2]

**12.1.3 Intelligibility**

The notice or disclaimer must not, by folding or any other device, be made unintelligible or less prominent than any other information on the face of the solicitation. [C031.1.4]

**12.1.4 Separable Pages**

If a solicitation consists of more than one page or if any page is designed to be separated into portions (e.g., by tearing along a perforated line), the notice or disclaimer required by 12.1.2 must be displayed in its entirety on the face of each page or portion of a page that might be reasonably considered a bill, invoice, or statement of account due as required by 12.1.2. [C031.1.5]

**12.1.5 Definitions**

For this standard, *color prominently contrasting* excludes any color, or any intensity of an otherwise included color, that does not permit legible reproduction by ordinary office photocopying equipment used under normal operating conditions, and which is not at least as vivid as any other color on the face of the solicitation; and *color* includes black. [C031.1.6]

**12.2 Solicitations Deceptively Implying Federal Connection, Approval, or Endorsement (39 USC 3001(H) and 3001(I); 39USC3005)**

**12.2.1 USPS Endorsement**

Any solicitation stating that it is approved by the USPS or the Postmaster General or that it conforms to any postal law or regulation is nonmailable. [C031.2.1]

**12.2.2 Nonmailable by Government Misrepresentation**

A solicitation that misrepresents a government entity is nonmailable subject to these conditions:

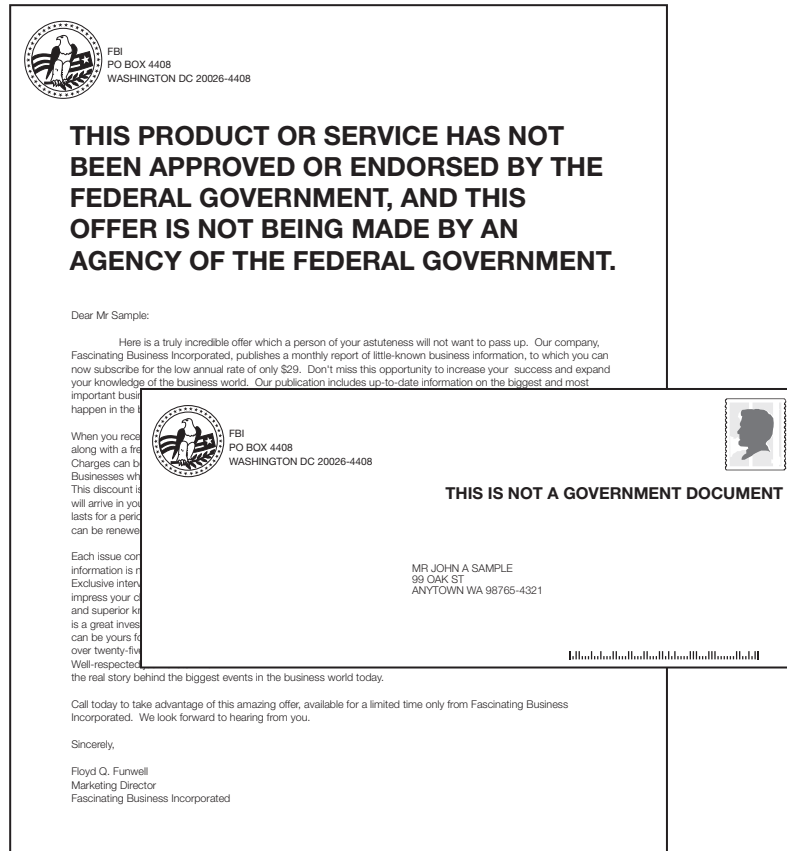

- a. Matter that contains a solicitation for products, services, information, or funds that implies any federal government connection, approval, or endorsement through the use of a seal, insignia, reference to the Postmaster General, citation to a federal statute, name of a federal agency, department, or commission, or program, trade, or brand name, or any other term or symbol; or contains any reference to the Postmaster General or a citation to a federal statute that misrepresents either the identity of the mailer or the protection or status afforded such matter by the federal government is nonmailable unless it conforms to [12.2.3](#). A nonconforming solicitation constitutes prima facie evidence of violation of 39 USC 3005. Compliance with [12.2.3](#) does not avoid violation of 39 USC 3005 if the solicitation or accompanying information misrepresents material fact such as the nature, value, quantity, quality, or efficacy of the products or services offered for sale, or of the activities of an organization asking for information or monetary contributions.
- b. Such solicitations must not contain a false representation that federal government benefits or services will be affected by whether or not the recipient makes a purchase or contribution.
- c. Solicitations for payment for services otherwise available to the recipient free of charge from the federal government are nonmailable unless they contain a clear and conspicuous statement giving notice of that fact. [\[C031.2.2\]](#)

**12.2.3 Permitted Solicitations**

A solicitation described in [12.2.2a](#) may be mailable if it meets at least one of these conditions (see [Exhibit 12.2.3b](#)):

- a. The solicitation is by a nongovernmental entity that actually has the federal government connection, approval, or endorsement implied by the solicitation's terms or symbols.
- b. The solicitation appears in a publication for which the addressee has paid or promised to pay a consideration or which the addressee has otherwise indicated he or she wants to receive, and the solicitation is not on behalf of the publisher of the publication.

## Exhibit 12.2.3b Disclaimers for Solicitations Implying Federal Connection

[C031.2.3]

- c. The solicitation displays the notice required by 12.2.3c1 on the envelope or outside cover or wrapper in which the solicitation is mailed, and one of the two notices required by 12.2.3c2 on the contents. These notices must be printed in boldface capital letters of a color prominently contrasting with the background against which they appear. "Color prominently contrasting" excludes any color or intensity that ordinary photocopying cannot reproduce legibly. The color, which can include black, must be at least as vivid as any other color on the face of the solicitation and its envelope or outside cover or wrapper. The required wording, type size and style, and placement for the notices are as follows:
1. On the Envelope, Cover, or Wrapper. The face of the envelope or outside cover or wrapper must bear the notice: "THIS IS NOT A GOVERNMENT DOCUMENT." The letters for printing this notice must be as large, bold, and conspicuous as any other letters on the face of such envelope, cover, or wrapper, but never smaller than 12-point type. The notice must appear in the upper right quadrant, below the postage stamp or other postage indicia and above the address, and it must be surrounded by a clear space not less than 1/4 inch wide.

2. On the Contents. The solicitation mailed within the envelope, cover, or wrapper must bear at the outset on its face one of these two headlines, depending on its purpose as indicated in parentheses: (a) "THIS PRODUCT OR SERVICE HAS NOT BEEN APPROVED OR ENDORSED BY THE FEDERAL GOVERNMENT, AND THIS OFFER IS NOT BEING MADE BY AN AGENCY OF THE FEDERAL GOVERNMENT" (for the purchase of or payment for a product or service); (b) "THIS ORGANIZATION HAS NOT BEEN APPROVED OR ENDORSED BY THE FEDERAL GOVERNMENT, AND THIS OFFER IS NOT BEING MADE BY AN AGENCY OF THE FEDERAL GOVERNMENT" (for information or the contribution of funds or membership fees). The letters for printing these notices must be as large, bold, and conspicuous as any other letters on the face of the solicitation, but never smaller than 30-point type. The notice must be surrounded by a clear space at least 1/2 inch wide. The notice must not be preceded, followed, or surrounded by words, symbols, or other matter that reduces its conspicuousness or introduces, modifies, qualifies, or explains the required text, such as "Notice Required by Law." The notice must not, by folding or any other device, be made unintelligible or less prominent than any other information on the face of the solicitation. [C031.2.3]

## 12.3 Lottery Matter (18 USC 1302)

### 12.3.1 Definition

For this standard, *lottery* is any scheme or promotion, whether lawful under the laws of any state, which, on paying a consideration, offers a prize dependent in whole or in part on lot or chance. [C031.3.1]

### 12.3.2 Unlawful Mail Matter

Unlawful matter includes any letter, newspaper, periodical, parcel, stamped card or postcard, circular, or other matter permitting or facilitating participation in a lottery; any lottery ticket or part thereof or substitute; and any form of payment for a lottery ticket or share. [C031.3.2]

### 12.3.3 Fishing Contests, Indian Gaming Regulatory Act, Lotteries

This standard does not apply to:

- a. Any fishing contest not conducted for profit, in which prizes are awarded for the species, size, weight, or quality of fish caught by contestants in any bona fide fishing or recreational event (18 USC 1305).
- b. Mailings, to addresses within a state, of tickets or other material on a lottery conducted by that state under its laws (18 USC 1307).
- c. Any gaming conducted by an Indian tribe under the Indian Gaming Regulatory Act (25 USC 2720).
- d. An advertisement, list of prizes, or other information on a lottery not prohibited by the state where it is conducted. [C031.3.3]

601.12.4

**12.4 Advertising Matter****12.4.1 Restrictions**

Any advertising, promotional, or sales matter that solicits or induces the mailing of any article described in 8.0, 9.0, or 10.0 is nonmailable except that such matter relating to controlled substances, radioactive materials, restricted liquids and powders, battery-powered devices, odd-shaped items in envelopes, and switchblade and ballistic knives, as described in 8.0, 9.0, or 10.0, is mailable if it contains packaging instructions and any other mailing limitations under 8.0 through 12.0, 508.8.0, *Pandering Advertisements*, and 508.9.0, *Sexually Oriented Advertisements*, (18 USC 1716). [C031.4.1]

**12.4.2 Master Keys**

Advertisements for motor vehicle master keys are nonmailable (18 USC 1716A, 39 USC 3002), except to lock manufacturers, professional locksmiths, motor vehicle manufacturers or dealers; and federal, state, or local government agencies. [C031.4.2]

**12.5 Other Nonmailable Matter****12.5.1 Fictitious Name**

Matter addressed to a person using a fictitious name, title, or address in conducting, through the mail, any scheme or device in violation of law is nonmailable if:

- a. After notification, the addressee fails to appear at the post office and be identified.
- b. The fictitious character of such mail is established to the Judicial Officer's satisfaction in consequence of a proceeding initiated under 39 CFR 953 (18 USC 1342). [C031.5.1]

**12.5.2 Foreign Origin**

Mail of foreign origin is nonmailable if it contains matter determined by a court of competent jurisdiction or by the International Trade Commission to violate the Semiconductor Chip Protection Act of 1984 (17 USC 901-914) or to violate the copyright laws of the United States or any copyright convention or treaty to which the United States is a party (17 USC 601-603). [C031.5.2]

**12.5.3 Foreign Destination**

Matter addressed to foreign countries posted in violation of law or treaty stipulation is nonmailable. [C031.5.3]

**12.5.4 Lewd or Filthy Matter**

Obscene, lewd, lascivious, or filthy publications or writings, or mail containing information on where, how, or from whom such matter may be obtained, and matter that is otherwise mailable but that has on its wrapper or envelope any indecent, lewd, lascivious, or obscene writing or printing, and any mail containing any filthy, vile, or indecent thing is nonmailable (18 USC 1461, 1463). [C031.5.4]

**12.5.5 Matter Inciting Violence**

Any matter of a character tending to incite arson, murder, assassination, treason, insurrection, or forcible resistance to any law of the United States, or containing any threat to take the life of, or to inflict harm upon, the President of the United States is nonmailable (18 USC 1461, 1717). [C031.5.5]

**12.5.6 Other Matter**

Other matter that is nonmailable (18 USC 1717) includes every letter, writing, circular, stamped card or postcard, picture, print, engraving, photograph, newspaper, pamphlet, book, publication, or thing as described in these statutes:

- a. Forged or altered military or official passes (18 USC 499).
- b. Matter bearing forged or altered seals of government departments or agencies (18 USC 506).
- c. Defense information (18 USC 793, 794).
- d. Documents obtained by persons falsely assuming to be foreign diplomats (18 USC 915).
- e. False statements influencing foreign governments (18 USC 954).
- f. Matter relating to a conspiracy to injure property of a foreign government (18 USC 956).
- g. Matter unlawfully in aid of a foreign government (18 USC 957).
- h. Matter relating to an expedition against a friendly nation (18 USC 960).
- i. Matter relating to delivery of an armed vessel to a belligerent nation (18 USC 964).
- j. Matter wrongfully bearing the seal of a government department or agency (18 USC 1017).
- k. Forged, altered, or misused passports (18 USC 1543, 1544). Passport applications containing false statements, and passports falsely obtained (18 USC 1542).
- l. Matter bearing false statements intended to injure Armed Forces during war (18 USC 2388). [C031.5.6]

**12.5.7 Animal Fighting Matter**

Written, printed, or graphic matter (e.g., advertisements) promoting or furthering an animal fighting venture conducted in any state (except a venture involving live birds permitted under the laws of the state in which the fight is conducted) is nonmailable under 7 USC 2156. Violators can be subject to the criminal penalties in 7 USC 2156. For this standard:

- a. *Animal* means any live bird, or any live dog or other mammal, except man.
- b. *Animal fighting venture* means any event involving a fight between at least two animals that is conducted for sport, wagering, or entertainment. The term does not include any activity whose primary purpose involves using one or more animals in hunting other animals.

601.12.5.8

- c. *State* means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any U.S. territory or possession. [C031.5.7]

### 12.5.8 Private Identification Without Disclaimer

A private identification document without a disclaimer is nonmailable (18 USC 1738; 39 USC 3001(a)). This group includes any document that:

- a. Is of a type intended or commonly accepted for the identification of individuals;
- b. Bears a birth date or age purported to be that of the person named in it;
- c. Is not issued by or under the authority of a government;
- d. Is deposited in the mail by someone in the business of furnishing, for valuable consideration, documents that meet criteria in [12.5.8a](#) and [12.5.8c](#);
- e. Is deposited in the mail to further that business; and
- f. Is deposited by someone who knows that it fails to carry diagonally printed, clearly and indelibly on both the front and back, "NOT A GOVERNMENT DOCUMENT" in capital letters no smaller than 12-point type. [C031.5.8]

## 12.6 Sweepstakes Matter (39 USC § 3001(K)(3)(A))

### 12.6.1 Definition

The term *sweepstakes* means a game of chance for which no consideration is required to enter. [C031.6.1]

### 12.6.2 Mailable Matter

Sweepstakes matter is mailable only if it discloses all of the following:

- a. In the body, in the rules, and on the order or entry form that no purchase is necessary.
- b. In the body, in the rules, and on the order or entry form that a purchase will not increase the odds of winning.
- c. All terms and conditions, including rules and entry procedures of the sweepstakes.
- d. The sponsor or mailer, with the principal place of business or address at which the sponsor or mailer may be contacted.
- e. Sweepstakes rules, including the odds of winning, quantity, value, and nature of the prize and the schedule of any payments over time. [C031.6.2]

### 12.6.3 Nonmailable Matter

Sweepstakes matter is nonmailable if it does any of the following:

- a. Represents that individuals not making a purchase may be disqualified from receiving future solicitations.
- b. Requires that the entry be accompanied by an order or payment for a product or service previously ordered.
- c. Represents that the recipient has won a prize unless that individual has won such prize.
- d. Otherwise contradicts or is inconsistent with any disclosure required by [12.6.2, Mailable Matter](#), or [12.6.3, Nonmailable Matter](#). [C031.6.3]

**12.7 Skill Contests (39 USC 3001(K)(3)(B))****12.7.1 Definition**

The term *skill contest* means a puzzle, game, competition, or other contest in which a prize is awarded, the outcome depends upon the skill of the contestant, and for which a payment, purchase, or donation is required to enter. [C031.7.1]

**12.7.2 Mailable Matter**

Skill contests are mailable only if they include all of the following:

- a. Disclose the terms and conditions of the contest, including the rules and entry procedures.
- b. Disclose the sponsor or mailer, with the principal place of business or address at which the sponsor or mailer may be contacted.
- c. Contain rules that state all of the following:
  1. Number of rounds or levels and the cost to enter each round.
  2. If subsequent rounds will be more difficult.
  3. Maximum cost to enter all rounds.
  4. Number of entrants or percentage expected to correctly solve the contest.
  5. Identity or qualifications of the judges, if judged by other than the sponsor.
  6. Method of judging.
  7. Dates the winners will be determined and the prizes awarded.
  8. Quantity, value, and nature of the prize.
  9. Schedule of any payments over time. [C031.7.2]

**12.8 Facsimile Check (39 USC § 3001(K)(3)(C))**

A facsimile check is nonmailable unless it states on the face of the check that it is not a negotiable instrument and has no cash value. [C031.8.0]

**12.9 Exclusions and Disclosures (39 USC §§ 3001(K)(4) & 3001(K)(5))****12.9.1 Mailable Matter**

Matter described in 12.6, 12.7, and 12.8 is mailable if it appears in a magazine, newspaper, or other periodical if the promotions are not directed to a named individual, or the promotions do not include the opportunity to make a payment or order a product or service. [C031.9.1]

**12.9.2 Notices and Disclaimers**

Any notice or disclaimer required under 12.6, 12.7, and 12.8 shall be clearly and conspicuously displayed. Disclaimers required by 12.6.2a and 12.6.2b must be more conspicuously displayed than any other disclaimer. [C031.9.2]

**12.10 Removal of Names from Mailing Lists (39 USC § 3001(L))****12.10.1 Lists**

In general, any person who uses the mails for any mailing falling under 12.2, 12.6, 12.7, and 12.8 shall adopt reasonable practices or procedures to prevent the mailing of such matter to any person who, personally or through their legal

601.12.10.2

representative, submits a written request that no such matter shall be mailed to that person. Such request may be made either to the mailer, or the Attorney General, or their representative, of the appropriate state. Such requests shall be honored for a period of five years from the date of the request. The mailer shall maintain a record of all such written requests. [C031.10.1]

**12.10.2 Special Requirements for Sweepstakes and Skill Contests**

Any promoter of sweepstakes or skill contests must make a clear and conspicuous disclosure of the address or toll-free telephone number by which an individual, or their duly authorized representative, may notify a promoter to have that individual's name and address removed from all lists of names and addresses used by that promoter to mail any skill contest or sweepstakes. Promoters have 60 days from the date of receipt of the removal request to effect the removal of the name and address from all mailing lists used by that promoter for any skill contest or sweepstakes. [C031.10.2]

**12.11 Unauthorized Decisions by Postmasters**

Postmasters are not authorized to decide whether written, printed, or graphic matter is nonmailable based on its content or to deny entry to such matter or exclude it from the mail. [C010.9.4]

**12.12 Refusal Due to Improper Preparation**

Written, printed, or graphic matter not properly prepared for mailing can be refused. [C010.9.5]

# 602 Addressing

## Overview

- [1.0 Elements of Addressing](#)
- [2.0 Restrictions](#)
- [3.0 Use of Alternative Addressing](#)
- [4.0 Detached Address Labels \(DAL\)](#)

## 1.0 Elements of Addressing

### 1.1 Clear Space

A clear space must be available on all mail for the address, postage (permit imprint, postage stamp, or meter stamp), postmarks, and postal endorsements. [A010.1.5]

### 1.2 Delivery Address

The delivery address specifies the location to which the USPS is to deliver a mailpiece. Except for mail prepared with detached address labels under 4.0, the piece must have the address of the intended recipient, visible and legible, only on the side of the piece bearing postage. [A010.1.1]

### 1.3 Address Elements

All mail not bearing a simplified address under 3.0, *Use of Alternative Addressing*, must bear a delivery address that contains at least the following elements in this order from the top line:

- a. Intended recipient's name or other identification.
- b. Private mailbox designator ("PMB" or alternative "#") and number if the mailpiece is addressed to a commercial mail receiving agency (CMRA) address.
- c. Street and number. (Include the apartment number, or use the post office box number, or general delivery, or rural route or highway contract route designation and box number, as applicable.)
- d. City and state (or state abbreviation). The city is any acceptable mailing name for the 5-digit ZIP Code serving the intended recipient as shown in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*, and the USPS City State Product.
- e. ZIP Code (5-digit or ZIP + 4) where required:
  1. ZIP Codes are required on Express Mail, Presorted and automation rate First-Class Mail, Periodicals mail, Standard Mail, Package Services mail (except single-piece rate Parcel Post), all mail sent to military addresses within the United States and to APO and FPO addresses, all official mail (penalty mail), all business reply mail, and all merchandise return service mail.
  2. Unless required above, ZIP Codes may be omitted from single-piece rate First-Class Mail (including Priority Mail), single-piece rate Parcel Post, and pieces bearing a simplified address. [A010.1.2]

## 1.4 Complete Addresses

### 1.4.1 Complete Address Definition

A complete address has all the address elements necessary to allow an exact match with the current USPS ZIP+4 Product to obtain the finest level of ZIP+4 code for the delivery address. A complete address may be required on mail at some automation rates. [A010.3.1]

### 1.4.2 Complete Address Elements

A complete delivery address includes:

- a. Addressee name or other identifier and/or firm name where applicable.
- b. Private mail box designator and number (PMB 300 or #300).
- c. Urbanization name (Puerto Rico only, ZIP Code prefixes 006 to 009, if area is so designated).
- d. Street number and name (including predirectional, suffix, and postdirectional as shown in USPS ZIP+4 Product for the delivery address or rural route and box number (RR 5 BOX 10), highway contract route and box number (HC 4 BOX 45), or post office box number (PO BOX 458), as shown in USPS ZIP+4 Product for the delivery address). (“PO Box” is used incorrectly if preceding a private box number, e.g., a college mailroom.)
- e. Secondary address unit designator and number (such as an apartment or suite number (APT 202, STE 100)).
- f. City and state (or authorized two-letter state abbreviation). Use only city names and city and state name abbreviations as shown in USPS City State Product. Contact the National Customer Support Center (see [509.1.0](#)) for more information about the City State Product.
- g. Correct 5-digit ZIP Code or ZIP+4 code. If a firm name is assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used in the delivery address. [A010.3.2]

## 1.5 Return Addresses

### 1.5.1 Purpose for Return Address

The return address tells the USPS where the sender of a mailpiece wants it returned if the piece cannot be delivered. [A010.4.1]

### 1.5.2 Return Address Elements

The return address contains elements corresponding to those for the delivery address. A return address is required in specific circumstances (see [1.5.3](#)). If the sender's name is not included in the return address, another clear designation (apartment, suite, or room number) is required to ensure proper handling of ancillary services and/or return of the piece. ZIP Codes (5-digit or ZIP+4) are required in the return address of all mail on which postage is paid with precanceled stamps or company permit imprint, and in the sender's return address on Periodicals mail when “Address Service Requested” is specified. Official mail (penalty mail) also requires a ZIP Code in the return address. [A010.4.2]

### 1.5.3 Required Use of Return Addresses

The sender's domestic return address must appear legibly on:

- a. Mail of any class, when its return and/or an address correction service is requested.
- b. Official mail.
- c. Mail paid with precanceled stamps.
- d. Matter bearing a company permit imprint.
- e. Priority Mail.
- f. Periodicals in envelopes or wrappers.
- g. Package Services (except unendorsed Bound Printed Matter).
- h. Registered Mail.
- i. Insured mail.
- j. Collect on delivery (COD) mail.
- k. Certified Mail if a return receipt is requested.
- l. Express Mail if a return receipt is requested. The return address on the Express Mail label meets this standard. [A010.4.4]

### 1.5.4 Postmark

An endorsement directing return to point of mailing (postmark) is not honored. [A010.4.5]

## 1.6 Ancillary Services

The USPS uses the return address to provide ancillary services requested by the mailer (e.g., "Return Service Requested"). The return address on any mailpiece endorsed for an ancillary service must identify where the piece is to be returned and where the mailer is prepared to pay applicable postage and fees for pieces returned or for ancillary service provided at the mailer's request. A domestic return address must be placed in the upper left corner of the address side of the piece or the upper left corner of the addressing area. [A010.4.3]

## 1.7 Attachment of Different Class

If the names and addresses of the sender and intended recipient do not appear on both the host and attachment, the sender's name and address must be placed on one piece and the recipient's name and address on the other. Combination containers that have inseparable parts or compartments are mailable with the names and addresses on only one. [A010.1.6]

## 1.8 ZIP Codes

### 1.8.1 Purpose of ZIP Code

The ZIP (Zone Improvement Plan) Code system is a numbered coding system that facilitates efficient mail processing. The USPS assigns ZIP Codes. All post offices are assigned at least one unique 5-digit ZIP Code. Larger post offices may be assigned two or more 5-digit ZIP Codes (multi-5-digit ZIP Code offices). Separate 5-digit ZIP

## 602.1.8.2

Codes are assigned to each delivery unit at these offices. Unique 3-digit and multi-5-digit ZIP Code post offices have street listings in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [A010.2.1]

**1.8.2 ZIP+4 - A Complete ZIP Code**

The most complete ZIP Code is a nine-digit number consisting of five digits, a hyphen, and four digits, which the USPS describes by its trademark ZIP+4. The correct format for a numeric ZIP+4 code is five digits, a hyphen, and four digits. The first five digits represent the 5-digit ZIP Code; the sixth and seventh digits (the first two after the hyphen) identify an area known as a sector; the eighth and ninth digits identify a smaller area known as a segment. Together, the final four digits identify geographic units such as a side of a street between intersections, both sides of a street between intersections, a building, a floor or group of floors in a building, a firm within a building, a span of boxes on a rural route, or a group of post office boxes to which a single USPS employee makes delivery. [A010.2.2]

**1.8.3 Numeric Delivery Point Barcode**

A numeric equivalent of a delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in 708.4.1.4. The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A010.2.3]

**1.9 Additional Addressing Standards by Class**

Basic addressing standards for First-Class Mail, Express Mail, Standard Mail, and Package Services are in the Rates and Eligibility section for each class of mail. Additional standards for Periodicals are in 707.3.2, *Addressing Standards for Periodicals*. Standards apply to overseas military mail, Department of State mail, mail in window envelopes, international mail, and mail claimed at any automation rate. [A010.1.7]

**2.0 Restrictions****2.1 Dual Address**

Mail with a dual address, i.e., both a street address and a post office box number, is delivered to the address immediately above the city and state (or to the post office box if both the street address and post office box are on the same line). If a ZIP+4 code or 5-digit ZIP Code is used, it must correspond to the address element immediately above the city and state (or with the post office box number in the address if both the street address and post office box are on the same line). These restrictions also apply to return addresses on mail (for more information, see Publication 28, *Postal Addressing Standards*). [A010.5.1]

**2.2 More Than One Post Office**

Mail with the name of more than one post office in the delivery address or return address is not acceptable for mailing. [A010.5.2]

**2.3 Mail Addressed to CMRAs**

Mail sent to an addressee at a commercial mail receiving agency (CMRA) must be addressed to their private mailbox ("PMB" or "#") number at the CMRA mailing address. [A010.5.3]

## 3.0 Use of Alternative Addressing

### 3.1 General Information

#### 3.1.1 Use

Alternative addressing formats may be used as described in [3.2](#) through [3.4](#) in *Use of Alternative Addressing*. [A020.1.1]

#### 3.1.2 Prohibited Use

Alternative addressing formats may not be used on:

- a. Express Mail pieces.
- b. Mail with any extra service under [503](#).
- c. Mail with any ancillary service endorsement under [507.1.1](#) through [507.1.8](#).
- d. Periodicals intended to count as subscriber or requester copies to meet the applicable circulation standards.
- e. Mail addressed to an overseas military post office under [703.2.2](#). [A020.1.2]

#### 3.1.3 Treatment

Mail with an occupant or an exceptional address format is delivered as addressed and is not forwarded. Such mail is treated as undeliverable only when the address is incorrect or incomplete or when the mail cannot be delivered for another reason related solely to the address (e.g., a vacant building), as shown in [Exhibit 507.USPS Endorsements for Mail Undeliverable as Addressed](#). Periodicals publishers are notified when mailpieces with the occupant or exceptional address formats are undeliverable for solely address-related reasons. Mail with a simplified address format is distributed to all deliveries on a route or to post office boxholders. Undeliverable mail with any alternative addressing format is disposed of as waste under [507.1.9.1](#). [A020.1.3]

### 3.2 Simplified Address

#### 3.2.1 Use—Rural and Highway Contract Routes, P.O. Boxholders

The simplified address format (i.e., “Postal Customer”) may be used on mail only when complete distribution (except as provided for congressional mail under [703.6.0](#)) is made to each family or boxholder on a rural or highway contract route at any post office and/or to all post office boxholders at a post office without city carrier service. A more specific address such as “Rural Route Boxholder” for mail intended to all boxholders on a rural route, followed by the name of the post office and state, may be used. The word “Local,” instead of the post office and state name, is optional. [A020.2.1]

#### 3.2.2 Use—City Routes, P.O. Boxholders

When distribution is to be made to each active possible delivery on city carrier routes or to each post office boxholder at a post office with city carrier service, the addressee’s name; mailing address; and city, state, and ZIP Code may be omitted from the address only on pieces mailed as official matter by agencies of the federal government (including mail with the congressional frank prepared under [703.6.0](#)); any state, county, or municipal government; and the governments of the District of Columbia, the Commonwealth of Puerto Rico, and any U.S. territory or possession

## 602.3.2.3

listed in [608.2.0](#). The requirement for distribution to each stop or post office boxholder may be modified for congressional mail under [703.6.0](#). The following also applies:

- a. Only these forms of address may be used instead of the addressee's name and address:
  1. "Postal Customer" (delivery desired at all addresses).
  2. "Residential Customer" (delivery desired at residential addresses only).
  3. "Business Customer" (delivery desired at business addresses only).
- b. At least 10 days before the mailing date, the mailer must submit a sample mailpiece and the following information to the entry office postmaster (in response, the mailer receives a mailing schedule that must be followed):
  1. Proposed mailing date.
  2. Total number of pieces being mailed.
  3. Method of postage payment.
  4. Names of all city delivery post offices to receive any of the mailing and the number of pieces for each. [A020.2.2]

### 3.2.3 Mail Preparation

All pieces must be prepared in carrier route or 5-digit carrier route or carrier routes containers; 3-digit carrier route or carrier routes containers are not allowed. All flat-size pieces must be prepared in carrier route or 5-digit carrier route sacks. All pieces for the same carrier route must be tied in bundles of 50, so far as practicable, and each bundle must bear a facing slip showing desired distribution (e.g., 5-digit ZIP Code and route number). If the pieces are tied in quantities other than 50 each, the actual number must be shown on the facing slip. Delivery statistics for routes may be obtained as described in [509.1.0](#). Pieces in such mailings also must meet the following standards:

- a. All pieces must be in the same processing category.
- b. Pieces must be marked according to [102](#), [202](#), [302](#), or [402](#).
- c. Letter-size pieces must be prepared in trays, and flat-size pieces must be prepared in sacks under [707.23.0](#), *Preparation of Carrier Route Periodicals*, or, for Carrier Route Standard Mail, see [245.6.0](#) for letters, [345.6.0](#) for flats, or [445.6.0](#) for parcels.
- d. If selective distribution is desired, enough pieces must be presented to cover the route or routes selected. [A020.2.3]

### 3.2.4 Postage

Postage must be paid with permit imprint, meter indicia, precanceled stamps, or other authorized methods not requiring cancelation, according to the standards for the class of mail. [A020.2.4]

### 3.2.5 Address Designation

Only the address designations in [3.2.1](#) or [3.2.2](#) may be used. Other designations (e.g., "Food Buyer," "Voter") are not permitted. [A020.2.5]

### 3.3 Occupant Address

#### 3.3.1 Use of Occupant Address

The occupant address format (i.e., “Postal Customer” or “Occupant,” “Householder,” or “Resident”) may be used to address mail selectively to a rural route and box number, a specific street number, or a specific post office box number without using the addressee’s name:

Example  
POSTAL CUSTOMER  
2711 ORDWAY ST NW APT 204  
WASHINGTON DC 20008-5036

[A020.3.0]

### 3.4 Exceptional Address

#### 3.4.1 Use of Exceptional Address

The exceptional address format (i.e., “Jane Doe or Current Resident” or “Jane Doe or Current Occupant”) may be used on any mail except mail types listed in 3.1.2. The word “Current” is optional. The order of the words may be reversed (e.g., “Current Resident or Jane Doe” rather than “Jane Doe or Current Resident”).

[A020.4.1]

#### 3.4.2 Placement

The exceptional address format must be placed in the address block, with the following exceptions:

- a. If all the current resident/occupant information cannot be placed on the first or second line of the address, the exceptional address format may be placed no more than 3/4 inch above the address block.
- b. If an optional endorsement line (OEL) is used, the mailer may elect to place the exceptional address format above the OEL. In these cases, the exceptional address format must be at least 1/2 inch, but not more than 3/4 inch, above the optional endorsement line. If a window envelope is used with an OEL, the exceptional address information may be printed either in the area on the insert showing through the window or on the envelope above the window. [A020.4.2]

## 4.0 Detached Address Labels (DAL)

### 4.1 DAL Use

#### 4.1.1 Definition

For these standards, *item(s)* refers inclusively to the types of mail described in 4.1.2 through 4.1.4. [A060.1.1]

#### 4.1.2 Periodicals or Standard Mail Flats

Saturation mailings of unaddressed Periodicals or Standard Mail flats may be mailed with detached address labels (DALs). For this standard, saturation mailing means a mailing sent to at least 75% of the total addresses on a carrier route or 90% of the residential addresses on a route, whichever is less. Deliveries are not required to every carrier route of a delivery unit. [A060.1.2]

#### 4.1.3 Standard Mail Merchandise Samples

Merchandise samples more than 5 inches wide (high) or 1/4 inch thick, or nonuniform in thickness, mailed at Standard Mail rates, must be mailed with DALs when prepared for general distribution on city delivery routes. Merchandise samples may be mailed with DALs for general distribution on other (e.g., rural) routes and for the residual portion of a general distribution mailing. For this standard, *general distribution* means distribution in a single mailing to at least 25% of the addresses in any 5-digit ZIP Code delivery area regardless of the number of samples addressed to a single route or the number of 5-digit areas to which samples are addressed. If the same mailing includes a general distribution to one or more 5-digit areas and a secondary distribution of lesser quantities to one or more other 5-digit areas, pieces in the secondary distribution are considered residual. [A060.1.3]

#### 4.1.4 Bound Printed Matter

Unaddressed pieces of Bound Printed Matter may be mailed with DALs when:

- a. The mail is prepared on 5-digit pallets meeting the standards in 705.8.0, except that for flat-size mail, separate 5-digit pallets of carrier route and Presorted rate mail are not required. The destination delivery unit (DDU) is determined using the Drop Shipment Product under the provisions for the DDU rate in 366.2.0 through 366.5.0 or 466.2.0 through 466.5.0. The mail may not be prepared on pallets when the Drop Shipment Product indicates that the delivery unit that serves the 5-digit pallet destination cannot handle pallets. For such delivery units, mail with DALs must be prepared in sacks. The trays or cartons of DALs must be prepared under 4.3, placed on the same pallet as the pieces, and must be stretch-wrapped together as one unit.
- b. The mail is prepared in 5-digit sacks and entered at the destination delivery unit. The destination delivery unit is determined by using the Drop Shipment Product under the provisions for the DDU rate in 366.2.0 through 366.5.0 or 466.2.0 through 466.5.0. DALs must be bundled under 4.3 and presented to the destination delivery unit with the accompanying items to be distributed with the DALs. [A060.1.4]

#### 4.1.5 Alternative Addressing Formats

The addresses on DALs may be prepared using an alternative addressing format under 3.0, subject to the applicable eligibility, volume, density, and preparation standards. [A060.1.5]

#### 4.1.6 Documentation

When requested by the USPS, DAL mailers must provide documentation to establish that the applicable distribution standards in 4.1.2 through 4.1.4 are met. [A060.1.6]

#### 4.1.7 Extra Services

Items mailed with DALs may not be combined with any extra services. [A060.1.7]

### 4.2 Label Preparation

#### 4.2.1 Label Construction

Each DAL must be made of paper or cardboard stock that is not folded, perforated, or creased, and that meets these measurements:

- a. Between 3-1/2 and 5 inches high (perpendicular to the address label).
- b. Between 5 and 9 inches long (parallel to the address label).
- c. At least 0.007 inch thick. [A060.2.1]

#### 4.2.2 Addressing

The address for each item must be placed on a DAL, parallel to the longest dimension of the DAL, and may not appear on the item it accompanies. The DAL must contain the recipient's delivery address and the mailer's return address. A ZIP+4 code or 5-digit ZIP Code is required unless a simplified address format is used. The delivery address may include the correct delivery point barcode.

[A060.2.2]

#### 4.2.3 Ratio

Only one DAL may be prepared for each accompanying item, and only one item may be identified for delivery per DAL (i.e., a single DAL may not be prepared to deliver one each of different accompanying items or multiples of the same item).

[A060.2.3]

#### 4.2.4 Required Information

The following words must appear in bold type at least 1/8 inch high on the front of each DAL: "USPS regulations require that this address label be delivered with its accompanying postage-paid mail. If you should receive this label without its accompanying mail, please notify your local postmaster." The title or brand name of the item (which may include an illustration of the item) must also appear on the front or back of the DAL to associate it with the accompanying item. [A060.2.4]

#### 4.2.5 Other Information

Nothing may appear on the front of a DAL except the information described in 4.2.2 and 4.2.4, an indicium of postage payment, and official pictures and data circulated by the National Center for Missing and Exploited Children. Ancillary service endorsements are not permitted. Undeliverable material is treated under 4.4.

[A060.2.5]

### 4.3 Mail Preparation

#### 4.3.1 Notice to Delivery Office

Each delivery office to receive a DAL mailing must be notified in writing at least 10 days before the requested delivery period. To ensure that the delivery office can readily relate the notice to the cartons containing the corresponding items, a copy of that letter must be enclosed with the DALs unless the initial notice and the cartons used for the DALs and items each conspicuously bears a mailing identification number. The letter must contain the following information:

## 602.4.3.2

- a. Name and telephone number of mailer or representative.
- b. Origin post office of mailing.
- c. Expected mailing date.
- d. Description of mailing.
- e. Number of addressees for each 5-digit ZIP Code.
- f. Number of DALs per carton or bundle.
- g. Number of items per carton or bundle.
- h. Expected delivery period (range of dates).
- i. Requested action for excess or undeliverable DALs or items (see 4.4).

[A060.3.1]

**4.3.2 DALs**

The DALs must be presorted, counted, and packed by 5-digit ZIP Code delivery area. Only DALs for the same 5-digit area may be placed in the same carton. DAL mailings claimed at carrier route or walk-sequence rates must be further prepared under the corresponding standards. Different size cartons may be used in the same mailing, but each must be filled with dunnage as necessary to ensure that the DALs retain their integrity while in transit. Each carton of DALs must bear a label showing the information in 4.3.5 unless a mailing identification number is used (see 4.3.1). Multiple containers of DALs must be numbered sequentially (“1 of \_\_,” “2 of \_\_,” etc.). [A060.3.2]

**4.3.3 Items**

The items to be distributed with the DALs must be placed in cartons or prepared in bundles placed in sacks, as appropriate for the type of item and subject to the standards for the rate claimed. A label bearing the content description information in 4.3.5 must be affixed to each carton, sacked bundle, or pallet unless a mailing identification number is used (see 4.3.1). Cartons of items (including those on pallets) may be of different sizes but must be filled with dunnage as necessary to ensure the integrity of the items while in transit. The gross weight of each carton or sack must not be more than 40 pounds. [A060.3.3]

**4.3.4 Combined Cartons**

Both the DALs and the accompanying items may be enclosed in the same carton when sent to a small volume 5-digit ZIP Code area. If packed together, these standards apply:

- a. The DALs must be bundled and labeled under 4.3.2 and placed on top of the items.
- b. The carton must be packed with dunnage to ensure the integrity of the contents while in transit.
- c. The gross weight of the carton must not exceed 40 pounds.
- d. The exterior of the carton must be labeled under 4.3.5 and marked “DALs ENCLOSED” in letters not less than 1/2 inch high. [A060.3.4]

#### 4.3.5 Label Information

Sacks, cartons, and pallets of DAL mail must be labeled under the preparation standards for the rate claimed. A second label must be affixed to each carton or sacked bundle to provide the following information (unless a mailing identification number is used under [4.3.1](#)):

- a. Delivery post office name and 5-digit ZIP Code delivery area.
- b. Title, brand name, or other description of the items.
- c. Name and telephone number of the mailer or representative.
- d. Number of labels or items in the carton, as applicable.
- e. Instructions to open and distribute either the DALs with matching items or the items with matching DALs, as appropriate. [A060.3.5]

#### 4.3.6 Use of Equipment

Cartons, bundles of flats, and sacks of items may be palletized under the applicable standards; cartons of DALs must be palletized with the corresponding items under the same standards. The USPS plant manager at whose facility a DAL mailing is deposited may authorize other types of equipment for the portion of the mailing to be delivered in that plant's service area. [A060.3.6]

### 4.4 Disposition of Excess or Undeliverable Material

#### 4.4.1 Excess Material

The letter required under [4.3.1](#) must either request that the delivery office contact the mailer (or representative) about excess DALs or items, or provide instructions for their treatment. (If the mailer does not provide information about excess DALs or items, such material is disposed of as waste by the USPS.) The mailer must choose one of the following options for each DAL mailing and the items:

- a. Disposal of any excess material as waste.
- b. Return of the excess material to the mailer, postage due at the applicable single-piece rate under [4.5](#).
- c. Holding of the excess material for pickup by the mailer (or representative). If pickup is not made within 15 calendar days of the notice to the mailer, the material is returned to the mailer postage due.
- d. Holding of the excess material while additional DALs or items are supplied (as applicable). If additional material is not supplied within 15 days of the notice to the mailer, the excess material is returned to the mailer postage due. Additional material must be sent prepaid to the delivery post office as First-Class Mail, Priority Mail, or Express Mail. [A060.4.1]

#### 4.4.2 Undeliverable DAL

A DAL that is undeliverable as addressed (UAA) is handled under [507.1.1](#) through [507.1.9](#) for the applicable class of mail. The accompanying item is treated as specified by the mailer under [4.4.1](#). [A060.4.2]

## 4.5 Postage

### 4.5.1 Available Rates

DAL mailings are not eligible for any automation rate, but they may qualify for a carrier route rate, subject to the applicable standards. [A060.5.1]

### 4.5.2 Initial Distribution

Postage is computed based on the weight of the entire mailpiece (i.e., the combined weight of the item and the accompanying DAL). If the number of DALs and items mailed is not identical, the number of pieces used to determine postage is the greater of the two. No postage refund is allowed in these situations. The total weight of the mailing excludes the weight of the cartons used to carry the DALs or items, dunnage, and carton labels. In addition, these methods of postage payment apply:

- a. Periodicals flats must be prepaid. A notice of entry must appear in the upper right corner of the DAL.
- b. Standard Mail flats and samples and Bound Printed Matter must be paid by permit imprint, which must appear on each DAL. Standard Mail postage is computed at the applicable nonletter rates. [A060.5.2]

### 4.5.3 Returns

Postage for excess or undeliverable DALs that are properly endorsed or for items being returned is computed at the single-piece rate (First-Class Mail, Priority Mail, or Package Services) applicable to the combined weight of the DAL and the accompanying item, regardless of whether both are returned. The total amount due for returned material, which includes the return postage and the applicable address correction fee for each DAL or item returned, is collected when the material is returned to the mailer. [A060.5.3]

### 4.5.4 Additional Items

Postage for additional material (DALs or items) mailed to the USPS under [4.4.1d](#) must be prepaid as First-Class Mail, Priority Mail, or Express Mail, subject to the eligibility standards for the rate claimed and the conditions in [4.5.2](#). [A060.5.4]

# 604 Postage Payment Methods

**Overview**

- 1.0 Stamps
- 2.0 Stamped Stationery
- 3.0 Precanceled Stamps

## 1.0 Stamps

### 1.1 Postage Stamp Denominations

Postage stamps are available in the following denominations:

| TYPE AND FORMAT  |   | DENOMINATION  |
|--|---|---|
| <b>Regular Postage</b>   | Panes of up to 100                          | \$0.01, .02, .03, .04, .05, .08, .09, .10, .14, .15, .17, .19, .20, .21, .22, .23, .25, .29, .30, .32, .33, .34, .35, .39, .40, .45, .46, .48, .50, .52, .55, .57, .60, .65, .75, .76, .77, .78, .80, .83, \$1, \$2, \$3.85, \$5, \$13.65 |
|  | Booklets                                    | \$0.23 (\$2.30 booklet)<br>\$0.37 (\$3.70 and \$7.40 booklets)  |
|  | Coils of 100                                | \$.21, .22, .23, .34, .37   |
|  | Coils of 3,000                              | \$0.01, .02, .03, .05, .10, .34, .37  |
|  | Coils of 10,000                             | \$0.01, .02, .03, .05, .10, .34, .37  |
| <b>Precanceled Presorted Rate Postage – First-Class Mail and Standard Mail</b> | Coils of 500, 3,000, and 10,000             | Various nondenominated (available only to permit holders)   |
| <b>Commemorative</b>   | Panes of up to 50                           | \$0.37 and other denominations  |
|  | 20-Stamp Booklets                           | \$0.37 (\$7.40 booklets)  |
| <b>Semipostal</b>  | Breast Cancer Research<br>Panes of up to 20 | Purchase price of \$0.45; postage value equivalent to First-Class Mail nonautomation single-piece rate (\$0.37); remainder is contribution to fund breast cancer research.  |
|  | Stop Family Violence<br>Panes of up to 20   | Purchase price of \$0.45; postage value equivalent to First-Class Mail nonautomation single-piece rate (\$0.37); remainder is contribution to fund domestic violence programs.  |

[R000.4.0]

604.1.2

**1.2 Postage Stamps Valid for Use**

All postage stamps issued by the United States since 1860, unless listed in 1.3, are valid for postage from any point in the United States or from any other place where U.S. Mail service operates. Precanceled stamps may be used to pay regular postage and fees for extra services if the mailpiece is endorsed under the standards for the class of mail and service requested. Precanceled postage may be used only by permit holders authorized under 3.0. Unless excepted by standard, the total postage affixed must equal at least the postage charge for the class of the mail and, if applicable, the fee for the extra service requested. All nondenominated postage and makeup rate stamps, including official mail stamps, are valid at the original rates of issue. [P022.2.1]

**1.3 Postage Stamps Invalid for Use**

The following are not valid to pay postage for U.S. domestic or U.S.-originated international mail:

- a. Postage due, special delivery, special handling, and Certified Mail stamps.
- b. Stamps of other countries.
- c. United Nations stamps, unless on mail deposited at the United Nations, NY.
- d. U.S. stamps that are mutilated or defaced; cut from stamped envelopes, aerogrammes, or stamped cards; covered or coated in such a manner that canceling or defacing marks cannot be printed onto the stamps; or overprinted with an unauthorized design, message, or other marking.
- e. Nonpostage stamps, such as migratory-bird hunting and conservation stamps, U.S. saving and thrift stamps. [P022.2.2]

**1.4 Imitations of Stamps**

Matter bearing imitations of postage stamps, in adhesive or printed form, or private seals or stickers resembling a postage stamp in form and design, is not acceptable for mailing. [P022.4.1]

**1.5 Imitations of Markings**

Matter bearing decorative markings and designs, in adhesive or printed form, resembling the markings and designs of official postal services, is not accepted for mailing (see [Exhibit 1.5](#)). [P022.4.2]

**Exhibit 1.5 Prohibited Imitations**

[Exhibit P022.4.2]

**1.6 Stamp Reproduction**

Postmasters may not advise the public about the reproduction of foreign or domestic postage stamps. Such information is available from Stamp Development, USPS Headquarters (see [608.8.0](#) for address). [P022.3.0]

**1.7 Position of Stamp on Mailpiece**

Stamps must be affixed firmly in the upper right corner of the address side of the mail cover. Any stamp partly concealed by an overlapping stamp may not be counted as postage. [P022.1.3]

**1.8 Reuse of Stamps**

Reuse of stamps with intent to cause loss to the government or the USPS is punishable by fine and imprisonment. [P022.1.4]

**1.9 Perforating Stamps**

Postage stamps may be marked with perforation holes. The mark may not cover more than 1/4 square inch (1/2 inch by 1/2 inch) of the stamp, and the diameter of the holes may not exceed 1/32 inch. [P022.1.5]

**1.10 Special Standards for Semipostal Stamps**

Semipostal stamps are subject to the following special conditions:

- a. Semipostal stamps are stamps sold for a price that exceeds the postage value of the stamp. The difference between the price and postage value (also known as the "differential") less an offset for reasonable USPS costs, as determined by the USPS, is contributed to a specific cause. Semipostal stamps are offered for sale for a limited time as provided by law or by the USPS.

604.1.11

- b. The following semipostal stamps are available:
  1. The Breast Cancer Research semipostal stamp. The difference between the purchase price and the First-Class Mail nonautomation single-piece first-ounce letter rate in effect at the time of purchase constitutes a contribution to breast cancer research and cannot be used to pay postage. Funds (net of reasonable USPS costs) raised in connection with the Breast Cancer Research semipostal stamp are transferred to the Department of Defense and the National Institutes of Health.
  2. The Stop Family Violence semipostal stamp. The difference between the purchase price and the First-Class Mail nonautomation single-piece first-ounce letter rate in effect at the time of purchase constitutes a contribution to domestic violence programs and cannot be used to pay postage. Funds (net of reasonable USPS costs) raised in connection with the Stop Family Violence semipostal stamp are transferred to the Department of Health and Human Services.
- c. The postage value of each semipostal stamp is the First-Class Mail nonautomation single-piece first-ounce letter rate in [133.1.5, Rates for Letters, Flats, and Parcels](#), that is in effect at the time of purchase. Additional postage must be affixed to pieces weighing in excess of 1 ounce, pieces subject to the nonmachinable surcharge, or pieces for which extra services have been elected. The postage value of semipostal stamps purchased before any subsequent change in the First-Class Mail nonautomation single-piece first-ounce letter rate is unaffected by any subsequent change in that rate. The purchase price of each semipostal stamp is listed in [1.1](#). [P022.1.6]

### **1.11 Paying for Stamps**

Payment may be made in U.S. currency. Foreign or mutilated money is not acceptable. The USPS may require payment of the exact amount of the purchase. Checks are acceptable subject to USPS check-acceptance policy and the assessment of charges to the customer for an uncollectible check returned by the bank. The customer must use a money order or certified check if the amount due is sent by mail. [P022.1.1]

### **1.12 Seals and Stickers**

The nonaddress side of mail may have seals or stickers, if they do not imitate postage stamps and do not have words, numerals, or other markings indicating a value. [P022.4.3]

## 2.0 Stamped Stationery

### 2.1 Plain Stamped Envelope

#### 2.1.1 Fee

Fee, in addition to the postage value preprinted on the envelope:

| TYPE       | FEE    |         |
|------------|--------|---------|
|            | Each   | 500     |
| Size 6-3/4 | \$0.08 | \$12.00 |
| Size 10    | 0.08   | 14.00   |

[R000.1.0]

#### 2.1.2 Availability

Plain stamped envelopes are available at all post offices, except that:

- Only sizes 6-3/4 and 10 regular and window envelopes are sold in less than full box lots (a full box contains 500 envelopes).
- Only nonprofit organizations and political committees authorized to use the Nonprofit Standard Mail rates may buy Nonprofit (precanceled) envelopes. Only full boxes are sold at post offices; only less than box lots are sold at philatelic outlets. [P021.1.1]

#### 2.1.3 Envelope Dimensions

Envelope dimensions, which can vary 1/16 inch, are as follows:

- Size 6-3/4: 3-5/8 by 6-1/2 inches.
- Size 10: 4-1/8 by 9-1/2 inches.
- Intermediate sizes (between 6-3/4 and 10, as determined by surface area in square inches) are not less than 6-1/2 or more than 9-1/2 inches long, not less than 3-5/8 or more than 5 inches high, have a surface area of not more than 39 square inches, and have an aspect ratio (length divided by height) not less than 1.3 or more than 2.5. [P021.1.3]

#### 2.1.4 Window Sizes

Window envelopes are available with these window sizes:

- The standard window is 1-1/8 inches high and 4-3/4 inches wide, and is placed 5/8 inch from the bottom edge of the envelope.
- In size 6-3/4 envelopes, the window is 7/8 inch from the left edge; in size 10 envelopes, 1 inch from the left edge.
- On double window envelopes, the second window (designed for a return address) is 1/2 inch from the top and left edges, and measures 3/4 inch high and 2-1/2 inches wide.
- Other window sizes and locations can be produced, if the window size is not more than 1-1/2 inches high and 5 inches wide, and the window is not less than 3/8 inch from any envelope edge. Windows must allow compliance with general USPS addressing guidelines. [P021.1.2]

604.2.1.5

**2.1.5 Imprinting**

Stamped envelopes may be privately imprinted in any style, if at least 3-1/2 inches of clear space remains at the right end of the address side. [P021.1.4]

**2.2 Personalized Stamped Envelopes****2.2.1 Fee**

Fee, in addition to the postage value preprinted on the envelope:

| TYPE       | FEE    |         |
|------------|--------|---------|
|            | Each   | 500     |
| Size 6-3/4 | \$3.50 | \$17.00 |
| Size 10    | 3.50   | 20.00   |

[R000.2.0]

**2.2.2 Availability**

Personalized envelopes (stamped envelopes imprinted with a return address) are available by mail order only. Customers mail Form 3203, with the full payment (by check or money order) for the envelopes ordered, to Stamp Fulfillment Services (see [608.8.0](#) for address). [P021.2.1]

**2.2.3 Printing Specifications**

All printing on personalized envelopes is subject to these specifications:

- a. Any line of printing is limited to 47 characters and spaces.
- b. The total number of lines is limited to seven.
- c. The last two lines of printing must be reserved for the street address or post office box number where mail is to be delivered, and the city, state, and ZIP Code.
- d. Stamp Development, USPS Headquarters, must approve any printing not permitted under [2.2.4](#) through [2.2.6](#). Requests for nonstandard printing are considered on orders of one million or more identical envelopes. Stamp Development's decision is final.
- e. Each envelope must bear a return address printed in uppercase and lowercase letters, with flush left margin, using 8-point Helvetica type. The firm name or main lines are in bold type. [P021.2.2]

**2.2.4 Printed Return Address Standards**

The printed return address must include the local address that includes a street address; a post office box number; a rural route and box number; a building name, room number, and street address; or both a street address and post office box number; and the name of the post office or branch post office, state, and either the ZIP+4 or the 5-digit ZIP Code. The ZIP Code must be correct for the address on the line immediately preceding the city and state. The postmaster determines whether the address is adequate to ensure return of undeliverable mail. [P021.2.3]

### 2.2.5 Printed Return Address Options

The printed return address may include:

- a. The name and title of an individual, or the name of a firm, corporation, institution, association, or society.
- b. Descriptive words that represent business or professional names.
- c. The branch or department name of a business if necessary to ensure return of undeliverable mail.
- d. The telephone number of an individual or group if printed immediately preceding the local address.
- e. A brief advertising statement or descriptive phrase following the name or on up to two separate lines. Indecent matter may not appear on wrappers or envelopes (18 USC 1463). [P021.2.4]

### 2.2.6 Optional Information

The following endorsements and instructions printed in at least 8-point type may be included as part of the return address:

- a. Any ancillary service endorsement under [507.1.1](#) through [507.1.9](#) that requests address correction, forwarding, or return appropriate for the intended class of mail (e.g., "Address Service Requested"). The endorsement must appear directly below the return address, separated with a minimum clear space of 1/4 inch.
- b. Any sender instruction under [507.1.8, Returning Mail](#), and [507.3.0, Address Correction Services](#), that specifies a period for holding mail, not fewer than 3 and not more than 30 days (e.g., "AFTER 5 days RETURN TO"). The instruction must appear directly above the return address. If such an instruction is printed on envelopes at Standard Mail rates, those envelopes must also bear an authorized ancillary service endorsement that provides for return postage. [P021.2.5]

### 2.2.7 Rejected Envelopes

A customer may reject personalized envelope orders for defective manufacture or mistakes in printing, denomination, size, etc.:

- a. If the purchaser's error, only the value of the postage is refunded. Such a refund may be made at a post office or by returning the envelopes to Stamp Fulfillment Services (see [608.8.0](#) for address). If the customer wants the envelopes replaced instead, the customer must pay the difference between the full selling price of the envelopes and the postage value. The customer must include an explanation for rejecting the envelopes in a request for replacement or refund.
- b. If an error is made by the USPS, Stamp Fulfillment Services refunds the total cost of the envelopes. The envelopes must be returned to Stamp Fulfillment Services (see [608.8.0](#) for address) with an explanation of the error. Only the customer whose name is in the return address, or the customer's representative, may submit rejected personalized envelopes for a refund. Rather than seeking a refund, the customer may request that the envelopes be replaced. [P021.2.6]

## 2.3 Other Stationery

### 2.3.1 Stamped Cards

Stamped cards are available as single stamped cards, double (reply) stamped cards, and in sheets of 40 for customer imprinting. Single and double stamped cards are 3-1/2 inches high by 5-1/2 inches long. Sheets must be cut to this size so that the stamp is in the upper right corner of each card. The USPS does not offer personalized stamped cards (cards imprinted with a return address). [P021.3.1]

### 2.3.2 Fee for Stamped Cards

Fee, in addition to the postage value preprinted on the card:

| TYPE                      | FEE    |
|---------------------------|--------|
| Single Card               | \$0.02 |
| Double Card               | 0.04   |
| Sheet of 40 cards (uncut) | 0.80   |

[R000.3.0]

### 2.3.3 Aerogramme

Aerogrammes (airletter sheets) are available for use in international mail. [P021.3.2]

### 2.3.4 Validity of Postal Stationery

All stamped envelopes, stamped cards (formerly called postal cards), and aerogrammes issued by the United States since 1873 are valid for postage from any point in the United States or from any other place where U.S. domestic mail service operates, under the same conditions as for postage stamps in 1.0. [P021.4.0]

## 3.0 Precanceled Stamps

### 3.1 General Information

#### 3.1.1 Definition

Precanceling is the cancelation of adhesive postage stamps, stamped envelopes, or stamped cards before mailing. Precanceling may be done by the USPS or by the mailer under a postal permit. Precanceled commemorative stamps are not available. [P023.1.1]

#### 3.1.2 Use of Precanceled Stamps

Precanceled postage is an optional postage payment method for mailings at Presorted and automation First-Class Mail rates and at all Standard Mail rates.

[P023.1.2]

#### 3.1.3 Prohibited Use of Precanceled Stamps

Precanceled postage stamps may not be used on matter mailed in boxes, cases, bags, or other reusable mailing containers. [P023.1.4]

**3.1.4 Documentation**

Unless excepted by standard, a precanceled stamp mailing must be accompanied by documentation subject to the standards for documentation for each class of mail if the mailing contains nonidentical-weight pieces or pieces without the full postage at the applicable rate. [P023.1.6]

**3.1.5 Amount of Postage**

The value of precanceled stamps affixed to each piece in a mailing must be either the exact amount due or another amount permitted by standard. Refunds for overpayment must meet the standards in [10.0, Refunds and Exchanges](#). [P023.1.5]

**3.1.6 Depositing Precanceled Stamp Mailings**

Mail bearing precanceled postage must be presented to the post office where the permit is held, at the times and places designated by the postmaster. Mail bearing precanceled postage must not be deposited in street collection boxes. [P023.1.9]

**3.1.7 Combining Precanceled Stamps With Other Postage Payment Methods**

Precanceled mail may be combined in a mailing with mail paid with other means only if authorized by the USPS. [P023.1.10]

**3.1.8 Return Address**

Mailpieces with any precanceled imprint must have a complete domestic return address. If the return address is outside the delivery area of the post office of mailing, the mailer must put a cancellation endorsement to the left of the postage showing city, two-letter state abbreviation, and ZIP Code of the office of mailing; or submit, at the time of mailing, a duplicate of the postage statement and a sample mailpiece, both in an envelope stamped and addressed to the postmaster at the post office shown in the return address; or use the cancellation endorsement "Mailed From ZIP Code" followed by the 5-digit ZIP Code assigned to the postmaster at the office of mailing. [P023.1.8]

**3.1.9 Markings and Endorsements**

Whether the mailer or the USPS precanceled the stamps, each mailpiece with precanceled postage must bear markings and endorsements required for the rate claimed or services requested. [P023.1.7]

**3.2 Permit to Use Precanceled Stamps****3.2.1 Authorization to Use Precanceled Stamps**

A mailer who wants to use USPS-precanceled stamps and stamped envelopes must complete Form 3615 and file it at the post office where mailings are to be deposited. If an applicant has a completed Form 3615 on file for other services, precanceled authorization is annotated on the existing application. There is no fee for this permit. [P023.2.1]

**3.2.2 Revocation of Precanceled Stamp Permit**

A permit may be revoked if used in operating any unlawful scheme or enterprise, or for buying or acquiring stamps or mailer's precancel postmarks for other than mailing, or for failing to comply with the format requirement or instructions on Form

3615. The permit holder has 10 days to file a written statement showing why the permit should not be revoked. The manager, customer service support (district), issues the decision on such appeals. [P023.2.2]

### **3.3 Precancellation of Stamps by USPS**

#### **3.3.1 Stamps Precanceled by USPS**

Stamps ordered with a precancel imprint have one visible line across their faces. Endorsement stamps precanceled by post offices have two visible parallel lines across the face of each stamp between which the name of the post office of mailing and its two-letter state abbreviation appear. [P023.1.11]

#### **3.3.2 Using Precanceled Stamps With Rate Designation**

Precanceled stamps can be ordered with the rate category preprinted as the precancellation device. These stamps are for matter mailed as part of a qualifying mailing of the rate category shown on the stamps. Mailpieces bearing a rate category precancellation legend must include the return address. If the return address is not within the delivery area of the post office of mailing, the mailer must place a cancellation endorsement on the piece or provide information to the post office shown in the return address. Precanceled stamps with a preprinted rate marking may be used to pay single-piece postage if the piece bearing the stamps has the correct marking (e.g., "First-Class MAIL") immediately under the postage. [P023.1.12]

### **3.4 Precancellation of Stamps by Mailer**

#### **3.4.1 Definition of Stamps Precanceled by Mailer**

A mailer meeting the standards in 3.4 may precancel adhesive stamps, stamped cards, and stamped envelopes with a mailer's precancel postmark. Stamped cards are precanceled at the time of printing and do not require a mailer's precancel postmark. [P023.1.3]

#### **3.4.2 Authorization to Precancel Stamps**

A mailer must request authorization to preprint rate markings on precanceled stamps or to use a precancel postmark on adhesive stamps, stamped cards, and stamped envelopes. The applicant must submit a specimen mailpiece showing the preprinting method or proposed precancel postmark. If more than one preprinted marking is prepared or more than one format is used, a specimen for each must be submitted. Form 3615 must be endorsed "Preprinting of Rate Markings," or "Mailer's Precancel Postmark," or both, as appropriate. The application and format samples must be submitted to the postmaster of the office where the precanceled mailings are to be deposited for approval by the district Business Mail Entry manager. If the application and samples are approved, the applicant receives written notice of approval from the postmaster and a unique permit number assigned by the postmaster. [P023.3.1]

#### **3.4.3 Authorization Conditions**

Mailer precancellation is authorized only for the specimen mailpieces submitted and approved. After that, a specimen must be submitted and approved for each new precancel postmark format or preprinted marking to be used. [P023.3.3]

#### 3.4.4 Denial of Authorization to Precancel Stamps

If the application and format samples are not approved by the district Business Mail Entry manager, the applicant receives written notice from the postmaster stating the reasons for the denial and the applicant's appeal rights. The applicant may file a written appeal with the Pricing and Classification Service Center (PCSC). (See [608.8.4, PCSC and District Business Mail Entry Offices Contact Information](#).)

[P023.3.2]

#### 3.4.5 Revocation of Authorization to Precancel Stamps

A permit may be revoked for operating any unlawful scheme or enterprise, for buying or acquiring stamps for other than mailing, or for failing to comply with the required format standards. Within 10 days of receipt of the revocation notice, the permit holder may file a written appeal with the PCSC. (See [608.8.4, PCSC and District Business Mail Entry Offices Contact Information](#).) The PCSC issues the final agency decision. [P023.3.4]

#### 3.4.6 Design and Content of Mailer's Postmark

The mailer's precancel postmark must contain specific elements:

- a. The mailing date (day, month, and year) if used on First-Class Mail; the month and year of mailing may be shown on Standard Mail.
- b. The words "Mailer's Postmark" followed by the permit number and enough lines to deface (cancel) the postage.
- c. Either the city, state, and 5-digit ZIP Code of the post office where the precancel permit is held and the mailing is to be deposited, or the words "Mailed From ZIP Code" followed by the 5-digit ZIP Code of the mailing office. (If that post office is assigned more than one 5-digit ZIP Code, the precancel postmark must show the 5-digit ZIP Code assigned to the postmaster.) [P023.3.5]

#### 3.4.7 Rate Marking

The precancel postmark may include the words or authorized abbreviations of the rate marking required for the rate claimed. Alternatively, if authorized under [3.4.2](#), the mailer may preprint rate markings required by other standards on adhesive stamps to be used for mailings at the corresponding rates. Such preprinted markings must be in uppercase letters of at least 6-point type, printed in black indelible ink on the stamp where optimum contrast is possible. A preprinted rate marking applied by the mailer, by itself or with a precancel postmark, must not obscure other printing on the stamp that is part of the USPS design (e.g., "USA").

[P023.3.6]

#### 3.4.8 Cancellation of Stamps

Black ink must be used for cancellation. It must provide enough indelibility and contrast to prevent reuse of the stamps. The precancel permit number must not be obscured by the cancellation. [P023.3.7]

#### 3.4.9 Required Format

A mailer must use one of the Format A designs in [Exhibit 3.4.9](#). Format B may be used only by a mailer previously authorized to do so and who has the necessary die. The only permissible alternative or modification to any format is the addition of a rate marking permitted by [3.4.7](#). [P023.3.8]

**Exhibit 3.4.9 Format for Mailer's Precancel Postmarks**

Format A

Format B

[Exhibit P023.3.8]

**3.5 Stamp Collectors**

Subject to USPS policy in 608.4.0, precanceled postage may be bought for philatelic purposes as well as postage payment. A stamp collector may mail matter bearing precanceled postage if the collector has a permit to use precanceled postage at the post office where the mail is presented. Creating philatelic oddities or precanceling issues or denominations that would not otherwise see legitimate mail use is not permitted. Mail orders must include a stamped, self-addressed envelope. [P023.4.0]

**3.6 Using High Value Stamps**

If precanceled postage on a single piece is more than \$1, the precanceled stamps must be overprinted or handstamped in black ink with the mailer's initials and the numerical abbreviations of the month and year for use (e.g., "A. B. Co. 9-78"). These stamps are acceptable on mail during the month shown and through the 10th of the following month. [P023.1.13]

**4.0 Postage Meters (Postage Evidencing Systems)****4.1 Basic Information****4.1.1 Definition of Postage Evidencing Systems**

Postage evidencing systems are secure postage metering systems that generate indicia imprinted on or affixed to a mailpiece to evidence prepayment of postage. The USPS regulates these systems and their use to protect postal revenue. Only USPS-authorized manufacturers or product service providers may design, produce, and distribute the systems. Misuse of a postage evidencing system to avoid payment of postage is punishable by law. The major components of a postage evidencing system are:

- a. Funds registers and accounting functions to store and maintain financial data. Two funds registers are required:

1. The descending register that records the postage value remaining in the postage evidencing system.
  2. The ascending register that increases as postage is printed. This register records the total value of all postage printed during the life of the postage evidencing system unless it is reset to zero by the provider during servicing between customers or when it reaches its maximum limit.
- b. Indicia generated by the system to show evidence of postage prepayment on the mailpiece. Indicia are also called “meter stamps” or “metered postage.”
  - c. USPS and provider infrastructure to support user licensing and customer information, ensure proper payment for postage, set and reset the system with postage value, and provide for inventory management. Provider and USPS interface to accomplish these functions. [P030.1.1]

#### 4.1.2 Types of Postal Evidencing Systems

Generation 1 postage evidencing systems use industry-standard electronic components for managing the registers and accounting for postal funds. Generation 2 postage evidencing systems use a USPS-approved electronic component called a “postal security device” (PSD) for managing the registers and accounting for postal funds. All PSDs must meet USPS performance criteria and must have a self-disabling feature that prohibits the printing of postage when specific programmed requirements are not met. For all Generation 2 postage evidencing systems the provider and the USPS infrastructure must interface to support licensing and customer information, ensure proper payment for postage, and provide for inventory management. The systems are categorized as follows:

- a. Traditional postage meter—a Generation 1 postage evidencing system:
  1. The industry-standard electronic components used for managing registers and accounting for postal funds may or may not include a self-disabling feature that prohibits the printing of postage when specific programmed requirements are not met.
  2. Indicia are printed either by a letterpress or digital printing process. Letterpress indicia are generated by the impact of a hard, inked printing die on the print surface. Digital indicia are generated electronically and produced on the print surface by a nonimpact technology, such as an ink jet, thermal, or laser printing process.
  3. The provider and USPS infrastructure systems for all Generation 1 postage evidencing systems interface to support licensing and customer information and to provide for inventory management. Generation 1 postage meters can be either manually reset (the meter must be physically taken to the USPS) or remotely reset. Remotely reset meters are replacing manually reset meters in accordance with a phased USPS retirement plan. The USPS infrastructure currently supports payment for postage for all Generation 1 postage evidencing systems, both manually reset and remotely reset. The provider infrastructure supports payment for postage for remotely reset meters but does not support payment for postage for manually reset meters.

## 604.4.1.3

- b. PSD meter—a Generation 2 postage evidencing system:
  - 1. A PSD meter must use a USPS-approved PSD.
  - 2. The indicia generated by a PSD meter must be digital indicia approved by the USPS.
  - 3. A PSD meter must be reset using an electronic connection between the provider's postage resetting system and the postal registers in the PSD.
- c. Information-based indicia (IBI) meter—a Generation 2 postage evidencing system:
  - 1. An IBI meter must use a USPS-approved PSD.
  - 2. An IBI meter must generate information-based indicia. IBI are digital indicia that include human-readable information and a USPS-approved two-dimensional barcode or other USPS-approved symbology, with a digital signature and other required data fields.
  - 3. An IBI meter must be reset with an electronic connection between the provider's postage resetting system and the postal registers in the PSD.
- d. PC Postage system—a Generation 2 postage evidencing system:
  - 1. A PC Postage system must use a USPS-approved PSD.
  - 2. The indicia generated by a PC Postage system must be IBI.
  - 3. A PC Postage system must be reset with postage value using a personal computer to establish an electronic connection between the provider's postage resetting system and the postal registers in the PSD. The user must employ a personal computer to access critical infrastructure functions. [P030.1.2]

**4.1.3 Authorized Providers of Meters**

Postage evidencing systems are available only from authorized providers. All postage evidencing systems and PSDs remain the property of the USPS-authorized provider and are available only through a lease or rental agreement with the provider or its authorized agent. The USPS holds providers responsible for the control, secure operation, distribution, maintenance, inspection, and replacement of postage evidencing systems and PSDs throughout their entire life cycle. The provider is also responsible for the secure disposal or destruction of postage evidencing systems and PSDs at the end of their useful life. The following providers are authorized:

FRANCOTYP-POSTALIA INC  
140 N MITCHELL CT STE 200  
ADDISON IL 60101-5629

#### **4.1.4 Licensee Agreement**

The licensee of a postage evidencing system is the person or entity authorized by the USPS to lease or rent a system. The licensee cannot own a postage evidencing system or PSD and may possess a postage evidencing system only under a valid lease or rental agreement with an approved provider or its agent. The licensee is responsible for the control, maintenance, and use of the postage evidencing system in accordance with USPS regulations. The base or host component of the mailing equipment that supports the postage evidencing system or PSD may be sold, leased, or rented at the discretion of the provider and the customer, in accordance with the product approval as granted by the USPS. [P030.1.4]

#### **4.1.5 Possession of a Postage Evidencing System**

No person or entity other than an authorized provider, its authorized agent, the USPS, or a licensee may have a postage evidencing system or PSD in their possession. Any person or entity must immediately surrender a postage evidencing system or PSD to the provider, the provider's agent, or to the USPS upon termination of a lease or rental agreement. [P030.1.5]

**4.1.6 Use of a Postage Evidencing System**

No person or entity other than an authorized provider may use a postage evidencing system until the provider initializes the system or, where applicable, the USPS sets and seals the system, performs the required validations, and checks the system into service. Once the postage evidencing system is properly in service, it may be used by the licensee or others authorized by the licensee. The licensee is responsible for control and use of the system. [P030.1.6]

**4.1.7 Mail Classes Eligible to Use Postage Meters**

Postage may be paid by imprinting or affixing indicia generated by a USPS-approved postage evidencing system on any class of mail except Periodicals. Such mail is called “metered mail” and is entitled to all privileges and subject to all conditions applying to the various classes of mail. [P030.1.7]

**4.2 Licensing****4.2.1 Applying for a Meter License**

To possess and use a postage evidencing system, the user must apply for and be granted a license by the USPS. A single license allows the licensee to use multiple postage evidencing systems for metered mail deposited in the licensing post office in accordance with 4.10. A postage evidencing system can be licensed to only one post office. The user must submit a separate application, be granted a separate license authorization, and have a separate postage evidencing system for each licensing post office where the user intends to deposit mail. The procedures are as follows:

- a. The applicant submits to the provider all data required for the license, including the city, state, and ZIP Code of the licensing post office where the user intends to deposit the metered mail.
- b. The provider submits the required information to the USPS electronically.
- c. The USPS notifies the provider after granting the license.
- d. The USPS can cancel the licensee's authorization to rent or lease postage evidencing systems if an active system is not associated with the license for 60 days or more. The customer must reapply for a license to resume the use of a postage evidencing system. Exceptions may be granted to seasonal users.

[P030.2.1]

**4.2.2 Licensee Agreement**

By applying for a USPS license to rent or lease a postage evidencing system, the applicant agrees that the license may be revoked immediately and the provider notified by the USPS to withdraw the postage evidencing system from service for the following reasons:

- a. The postage evidencing system is used in any fraudulent or unlawful scheme or enterprise.
- b. The postage evidencing system is not used for 12 consecutive months.
- c. The licensee fails to exercise sufficient control of the postage evidencing system or PSD or fails to comply with the regulations for its care or use.

- d. The licensee fails to abide by the terms and conditions of the authorized provider's lease or rental agreement.
- e. The postage evidencing system or PSD is taken or used outside the United States, its territories or possessions, except as specifically authorized under these regulations by the manager of Postage Technology Management, USPS Headquarters.
- f. Mail is deposited at other than the licensing post office (except as permitted under [4.10, Mailings](#)). [P030.2.2]

#### 4.2.3 Refusal to License a User

The USPS notifies both the applicant and the provider in writing when authorization for a license is refused. Any applicant refused authorization may appeal the decision under [4.2.5](#). The USPS may refuse authorization for a license for the following reasons:

- a. The applicant submitted false information on the license application.
- b. The applicant violated any regulation regarding the care or use of a PSD, postage evidencing system, or the indicia generated by a system that resulted in the revocation of the applicant's postage meter or postage evidencing system license within 5 years before the date the applicant submitted the application.
- c. There is sufficient reason to believe that the applicant will use the postage evidencing system or PSD in violation of USPS regulations. [P030.2.3]

#### 4.2.4 Revocation of a License

The USPS can revoke the user's license when the user does not fulfill the responsibilities for the care and use of a PSD, postage evidencing system, or the indicia generated by a system. The USPS notifies the licensee's provider(s) of the revocation so that the provider(s) can notify the licensee, cancel the lease or rental agreement(s), and withdraw all postage evidencing systems from service. The notification is sent by Certified Mail. Revocation takes effect 10 calendar days after the licensee receives the revocation notice unless, within that time, the licensee appeals the decision under [4.2.5](#). A license is subject to revocation for the reasons listed in [4.2.2](#), or if there is probable cause to believe that it will be used in violation of USPS regulations. [P030.2.4]

#### 4.2.5 Appeal Process

An applicant who is refused a license, or a licensee whose license is revoked, may file a written appeal with the manager of Postage Technology Management, USPS Headquarters (see [608.8.0](#) for address), within 10 calendar days after receiving notification of the decision. [P030.2.5]

### 4.3 Licensed User's Responsibilities

#### 4.3.1 Signed Lease or Rental Agreement With Financial Agreement for Resetting

The licensee must enter into a lease or rental agreement with the provider that includes provisions for resetting the postage evidencing system with postage and an authorized postage payment process under which the licensee agrees to make payment for postage using a payment method approved by the USPS. The USPS is

## 604.4.3.2

not a party to the lease or rental agreement but use of a postage evidencing system is subject to the regulations of the USPS and the terms and conditions of the lease or rental agreement and the payment process. [P030.3.1]

**4.3.2 Custody of Meter**

A postage evidencing system or PSD that is in the possession or custody of a licensee must remain in that user's custody until it is returned to the authorized provider, to its authorized agent, or to the USPS, or is seized by the Postal Inspection Service for violation of federal law. [P030.3.2]

**4.3.3 Updating Licensee Information**

The licensee must update required license application information with the provider whenever there is any change in the licensee's name, address, telephone number, licensing post office, location of the postage evidencing system, or location of the PSD. The USPS will update the license information based on the receipt of updated information submitted by the provider. [P030.3.3]

**4.3.4 Relocation of Licensee**

When a licensee notifies the provider of a change of the licensing post office in accordance with 4.3.3, the provider will perform the appropriate accounting functions to withdraw the postage evidencing system from service at the original licensing post office and install it and then reauthorize it for use at the new licensing post office, or issue another postage evidencing system for use at the new location. [P030.3.4]

**4.3.5 Required Resetting**

All postage evidencing systems must be reset at least once every 3 months. A zero value reset will meet this requirement. [P030.3.5]

**4.3.6 Maintaining Records of Transactions**

Some postage evidencing systems generate records of transactions relating to indicia creation, funds transfer (including postage value downloads), and system or PSD audits. For postage evidencing systems that do not maintain automated transaction records, licensees are strongly encouraged to maintain their own records of the readings of the ascending and descending registers for each day of operation. Transaction records are important in the validation of requests for refunds in the case of system malfunction. [P030.3.6]

### 4.3.7 Inspection and Examination of Transaction Records

The licensee must, upon request, make immediately available for examination and audit by the provider or by the USPS any postage evidencing system or PSD in the licensee's possession and any corresponding transaction records. The USPS can perform physical or remote examination of any postage evidencing system or PSD. The licensee must meet the requirements for provider inspections and USPS examinations. All postage evidencing systems are inspected in accordance with the Postage Evidencing Systems Inspection and Examination Schedule below.

| SECURITY LEVEL | POSTAGE EVIDENCING SYSTEM  | PROVIDER INSPECTION   | USPS EXAMINATION REQUIREMENTS  |
|----------------|--|---|--|
| 1              | Manually reset postage meter   | Every 6 months  | Must bring to post office for examination when not reset within 3 months |
| 2              | Remotely reset postage meter with letterpress or digital indicia, but without self-disabling feature | Annually or every 6 months when there is no setting activity in 6 months      | Examinations in special circumstances                                    |
| 3              | Remotely reset meter with letterpress indicia and self-disabling feature                             | Every 2 years or every 6 months when there is no setting activity in 6 months | Examinations in special circumstances                                    |
| 4              | Remotely reset postage meter with digital indicia and self-disabling feature                         | Every 2 years or enhanced inspection process when approved by USPS            | Examinations in special circumstances                                    |
| 5              | PSD meter, IBI meter, or a PC Postage system   | Inspections in special circumstances  | Examinations in special circumstances                                    |

[P030.3.7]

### 4.3.8 Quality Assurance of PC Postage Indicia

Some PC Postage systems print indicia with a printer that may also be used for nonpostal applications. Users of such systems must forward a mailpiece bearing an indicium produced by the postage evidencing system and associated printer to the provider for quality assurance evaluation. The licensee must forward a quality assurance mailpiece to the provider when the system is installed, when there is a change to the printer connected to the system, and at least once every 12 months thereafter, in accordance with provider directions. [P030.3.8]

### 4.3.9 Labels With Fraud Warning and Serial Number

The licensee must ensure that the fraud warning label placed by the provider on the postage evidencing system or its housing is not removed or destroyed while the postage evidencing system is in the licensee's possession. The fraud warning contains basic reminders on leasing or rental and use of the postage evidencing system, warnings against system tampering or misuse resulting in nonpayment of postage owed, and the penalties for such system misuse. The USPS does not authorize postage evidencing systems for use without this fraud warning. When the postage evidencing system has a serial number or barcode equivalent on the system housing, the user must ensure that neither the serial number nor the barcode is removed or destroyed while the postage evidencing system is in the licensee's possession. [P030.3.9]

**4.3.10 USPS Examination of Suspect Postage Evidencing Systems or Postal Security Devices (PSDs)**

The USPS may conduct unannounced, on-site examinations of postage evidencing systems or PSDs reasonably suspected of being manipulated or defective. A postal inspector may immediately withdraw a suspect postage evidencing system or PSD from service for physical and/or laboratory examination. The inspector withdrawing a suspect postage evidencing system or PSD issues the licensee a written acknowledgement of receipt of the item; forwards a copy to the provider; and, if appropriate, assists in obtaining a replacement postage evidencing system or PSD. Unless there is reason to believe that the postage evidencing system or PSD is fraudulently set with postage, existing postage in the postage evidencing system or PSD is refunded to the licensee, in accordance with established refund procedures, when it is withdrawn from service. [P030.3.10]

**4.3.11 Defective Postage Evidencing System or Postal Security Device (PSD)**

A defective postage evidencing system or PSD is one that is inoperable or inaccurately reflects its proper status. A faulty postage evidencing system or PSD may not be used under any circumstance. The procedures for dealing with a defective system are as follows:

- a. The licensee must immediately report any defective postage evidencing system or PSD to the provider.
- b. The provider must begin the retrieval process for any defective postage evidencing system or PSD within 2 business days of notification by the licensee.
- c. The provider may supply the licensee with a replacement postage evidencing system or PSD unless there is a reasonable basis for suspecting actual or attempted tampering.
- d. The provider may not authorize or issue a refund for monies remaining on the faulty postage evidencing system or PSD until the faulty system is in the possession of the provider and has been carefully inspected, and the refund amount has been approved by the manager of Postage Technology Management, USPS Headquarters. [P030.3.11]

**4.3.12 Missing Postage Evidencing Systems or PSDs**

The licensee must immediately report to the provider the loss or theft of any postage evidencing system or PSD or the recovery of any missing postage evidencing system or PSD. The report must include the system identification number and the date, location, and details of the loss, theft, or recovery. In the case of suspected theft, the licensee must submit a copy of the police report to the provider upon request. The provider will report all details of the incident to the manager of Postage Technology Management, USPS Headquarters, in accordance with established procedures. [P030.3.12]

**4.3.13 Returning a Postage Evidencing System or Postal Security Device (PSD)**

A licensee in possession of a faulty or retired postage evidencing system or PSD, or a licensed user who no longer plans to keep a postage evidencing system or PSD in their possession for any reason, must return it within 3 business days to the provider to be withdrawn from service. Postage evidencing systems and PSDs must be shipped by Priority Mail with Delivery Confirmation unless the manager of Postage Technology Management, USPS Headquarters, gives written permission to ship by another means or service. [P030.3.13]

**4.3.14 Approval for Use of Postage Evidencing Systems at Military Post Offices**

A person authorized by the Department of Defense to use the services of an overseas military post office, such as an APO or FPO, can use a USPS-approved postage evidencing system. For such users, the APO or FPO will be designated as the licensing post office on their user license. These users must deposit the mail prepared with their system at the licensing post office. All USPS policies and regulations regarding postage evidencing systems apply. [P030.3.14]

**4.3.15 Approval for Use of Postage Evidencing Systems Outside the United States**

The manager of Postage Technology Management, USPS Headquarters (see [608.8.0](#) for address), must give approval to the provider before the provider may place a postage evidencing system with a licensee who plans to use the system outside the customs territory of the United States to print evidence of U.S. postage. The procedures and conditions are as follows:

- a. Licensees must maintain a permanent, established business address in the United States.
- b. Postage evidencing systems used in foreign locations may be leased or rented only from those providers who have an authorized dealer or representative in the country where the postage evidencing system is to be located. The only exception is for those PC Postage systems for which the PSD remains in the custody and possession of the provider rather than the licensee.
- c. Licensees are subject to all USPS regulations and U.S. statutes pertaining to mail, mail fraud, and misuse of postage evidencing systems.
- d. All postage evidencing systems authorized by the USPS for use in foreign locations must have enhanced security features that include remote reset and a self-disabling feature that prevents printing of postage when specific programmed requirements are not met. Only those systems specifically approved in writing by the manager of Postage Technology Management, USPS Headquarters, may be used outside the customs territory of the United States.
- e. Potential users must submit to the provider all data required for a license to lease or rent postage evidencing systems outside the country. The provider will annotate the application to state that it is for the foreign use of a U.S. postage evidencing system and show where the system is to be located. The provider must submit the application to the manager of Postage Technology

Management, USPS Headquarters, for review and approval. Once an application is approved and the license authorized, Postage Technology Management will designate the licensing post office and notify the provider and the licensee. The license can be used for multiple postage evidencing systems as long as they all belong to the same user and are licensed at the same post office. Mailers who already have a USPS license to lease or rent postage evidencing systems must apply separately to participate in this program.

- f. The provider selected by the licensee must agree in writing to all terms and conditions established by the USPS pertaining to the distribution of U.S. postage evidencing systems outside of the United States. Once the postage evidencing system is installed, the provider must provide the information on system placement directly to the manager of Postage Technology Management, USPS Headquarters.
- g. Mail to be metered must be metered with U.S. postage and must be entered at the domestic licensing post office.
- h. Postage evidencing systems located outside the United States must be remotely reset at least once every 3 months. A reset for zero postage satisfies this requirement. The Postage Evidencing System Inspection and Examination Schedule in 4.3.7 applies to all systems; however, special circumstances may be invoked to inspect systems placed outside the country more frequently. Failure to make the postage evidencing system available for inspection may result in the revocation of the foreign use license. [P030.3.15]

#### **4.3.16 Updating Address Management System CD-ROM**

For postage evidencing systems designed to access the USPS Address Management System (AMS) CD-ROM, the licensed user must maintain address quality by ensuring the CD-ROM is updated at least once every 6 months.

[P030.3.16]

### **4.4 Manually Reset Generation 1 Postage Meters**

#### **4.4.1 Initial Setting, Check In, and Installation**

All manually reset meters will be taken out of service and replaced by remotely reset meters in accordance with a phased USPS retirement plan. No manually reset meters may be installed. [P030.4.1]

#### **4.4.2 Check Out and Withdrawal**

When a manually reset meter is withdrawn from a user, the provider must present the meter and a completed Form 3601-C to the licensing post office to have the meter checked out of service by the post office where it was regularly set or examined, unless the meter was serviced through the on-site meter service program described in 4.4.5. The manager of Postage Technology Management, USPS Headquarters, may allow the provider to check out a specifically designated manually reset meter model from service without USPS participation when the provider uses a USPS-approved process to transfer the postage remaining on the meter directly to a remotely reset meter. The withdrawal process for manually reset meters is completed when the data from Form 3601-C is transmitted to the appropriate postal information systems. [P030.4.2]

**4.4.3 Location of Setting**

Except under 4.4.5, a manually reset meter must be set at the licensing post office. Alternative meter setting locations are not allowed. A meter may not be set at a contract postal unit. [P030.4.3]

**4.4.4 Paying for Postage Settings**

Payment must be made for postage at the time of resetting. Payment may be in cash or by check, USPS-approved debit card, or money order. Payment is subject to USPS standards and procedures. [P030.4.4]

**4.4.5 On-Site Meter Service Program**

The on-site meter service program, where available, allows qualified USPS employees to set or examine manually reset meters and check them into or out of service at a licensee's place of business within the area served by the licensing post office, or at a facility of the provider or their agent. Only the licensee's meters participating in the on-site meter service program may be serviced at that location. A fee is charged for each meter set, examined, or checked into or out of service at a licensee's place of business, unless a USPS employee qualified to service meters is regularly assigned to that licensee's location for other postal administrative duties. The licensee must pay applicable postage and on-site meter service fees in 4.5.7 by check at the time of the meter service for manually reset meters. A fee is charged for each meter examined or checked into or out of service at a facility of the provider or their agent. The provider must pay applicable postage and on-site meter service fees by check at the time of the meter service. Fees are charged in accordance with 4.5.7. [P030.4.5]

**4.4.6 Transfer or Refund of Unused Postage**

After USPS verification, unused postage in a manually reset meter checked out of service may be transferred to another of the licensee's meters licensed at the same post office, or the licensee may request a refund. Refunds are granted in accordance with 10.0. [P030.4.6]

**4.4.7 Postage Adjustment for a Faulty Meter**

To request a postage adjustment for a faulty manually reset meter, the licensee must present to the provider the meter and the licensee's transaction records, if any. After examining a meter to be checked out of service for apparent faulty operation affecting the ascending or descending registers, the provider must report the malfunction to the manager of Postage Technology Management, USPS Headquarters. The report must contain all applicable meter documentation (including the setting history and transaction records, if any) and a recommendation about the appropriate postage adjustment, if any. When the electronic redundant memory data, as examined by the provider, is inconclusive with respect to the appropriate postage adjustment, the provider must include an analysis of the licensee's recent mailing history supporting the recommended postage adjustment, the reason for the memory failure, and the method used to determine the lost register values. At the same time the report is made to the USPS, the provider must notify the licensee of the proposed postage adjustment. A licensee may appeal a postage adjustment to the manager of Postage Technology Management, USPS

Headquarters (see [608.8.0](#) for address), within 60 calendar days of the date that the provider submitted the postage adjustment recommendation to the USPS and notified the user. [P030.4.7]

## **4.5 Remote Reset Generation 1 Postage Meters**

### **4.5.1 Initial Setting, Check In, and Installation**

A remote reset Generation 1 postage meter is checked into service in the presence of a postal employee qualified to check in postage evidencing systems. The meter is checked into service at the licensing post office unless the on-site meter service program in [4.5.6](#) is used. The provider must furnish the postal employee with the meter and a completed Form 3601-C. The check in process for a remote reset Generation 1 postage meter is completed when the required data is transmitted to the appropriate postal information systems, and may be completed concurrently with or prior to installation of the meter at the licensee's location. The manager of Postage Technology Management, USPS Headquarters, may allow the provider to check in a specifically designated meter model without USPS participation when the provider uses a USPS-approved process in which the information to complete the check in process is captured directly from the postage evidencing system. The installation process for these meters is completed when the provider transmits required data to the appropriate postal information systems. [P030.5.1]

### **4.5.2 Check Out and Withdrawal**

A remote reset Generation 1 postage meter is checked out of service in the presence of a postal employee qualified to check out postage evidencing systems. The meter is checked out of service at the licensing post office unless the on-site meter service program in [4.5.6](#) is used. The provider must furnish the postal employee with the meter and a completed Form 3601-C. The check out process for a remote reset Generation 1 postage meter is completed when the required data is transmitted to the appropriate postal information systems. The manager of Postage Technology Management, USPS Headquarters, may allow the provider to check out a specifically designated meter model from service without USPS participation when the provider uses a USPS-approved process in which the information to complete the check out process is captured directly from the postage evidencing system. In this instance, the provider must examine the meter before a refund can be issued for the postage remaining in the meter. The withdrawal process for remote reset meters is completed when the provider transmits required data to the appropriate postal information systems. [P030.5.2]

### **4.5.3 Location of Setting**

A remote reset Generation 1 postage meter is reset via telephone at the location of the meter. [P030.5.3]

### **4.5.4 Paying for Postage Settings**

For a remote reset Generation 1 postage meter, the licensee may deposit funds only by check, electronic funds transfer, or automated clearing house transfer, in accordance with USPS standards and procedures. [P030.5.4]

### **4.5.5 Resetting a Remote Reset Generation 1 Postage Meter**

To reset a remote reset Generation 1 postage meter, the following conditions must be met:

- a. The licensee's account must have sufficient funds to cover the desired postage increment, or the provider must have agreed to advance funds to the licensee.
- b. The licensee must give the provider identifying information and system audit data as required by the USPS and in accordance with the provider's resetting specifications. Before completing the resetting, the provider must verify the identifying data, authenticate the user's license, conduct the postage evidencing system audit, and ascertain whether the user's account contains sufficient funds to cover the desired postage increment.
- c. After the resetting transaction is completed, the provider must document the transaction for the licensee, including the balance remaining in the licensee's account, unless the provider gives the user a monthly statement documenting all transactions for the period and the balance after each transaction. [P030.5.5]

#### **4.5.6 On-Site Meter Service Program**

The on-site meter service program, where available, allows qualified USPS employees to check remote reset Generation 1 meters into or out of service at a facility of the provider or their agent. Meters to be serviced are accompanied by Form 3601-C. A fee is charged for each meter examined or checked into or out of service at a facility of the provider or their agent. The provider must pay applicable postage and on-site meter service fees by check at the time of the meter service for remote reset Generation 1 meters. Fees are charged in accordance with 4.5.7. [P030.5.6]

#### **4.5.7 On-Site Meter Service Fee**

Fees for on-site meter service:

- a. Meter service (per employee, per visit): \$35.00.
- b. Meters reset/examined (per meter): \$5.00.
- c. Checking meters in/out of service (per meter; fee does not apply to secured postage meters that use a USPS-approved automated process for checking in and out): \$4.00. [R900.15.0]

#### **4.5.8 Transfer or Refund of Unused Postage**

After USPS verification, unused postage in a remote reset Generation 1 postage meter checked out of service may be transferred by the USPS to another of the licensee's postage evidencing systems licensed at the same post office, or to the customer's meter resetting account, or the licensee may request a refund. Refunds for unused postage in the meter and for any unused balance in the licensee's account are granted in accordance with 10.0. [P030.5.7]

#### **4.5.9 Postage Adjustment for Faulty Meters**

To request a postage adjustment for a faulty remote reset Generation 1 postage meter, the licensee must present to the provider the meter and the licensee's transaction records, if any. After examining a meter checked out of service for apparent faulty operation affecting the ascending or descending registers, the provider must report the malfunction to the manager of Postage Technology Management, USPS Headquarters. The report must contain all applicable meter documentation and a recommendation regarding the appropriate postage adjustment, if any. When the electronic redundant memory data, as examined by the

provider, is inconclusive as to the need for a postage adjustment, the provider must include an analysis of the licensee's recent mailing history supporting the recommended postage adjustment, the reason for the memory failure, and the method used to determine the lost register values. At the same time the report is made to the USPS, the provider must notify the licensee of the proposed postage adjustment. A licensee may appeal a postage adjustment to the manager of Postage Technology Management, USPS Headquarters (see 608.8.0 for address), within 60 calendar days of the date that the provider submitted the postage adjustment recommendation to the USPS and notified the user. [P030.5.8]

## **4.6 PSD Meters and IBI Meters**

### **4.6.1 Initialization, Authorization, Check In, and Installation**

All PSD meters and IBI meters use a PSD to maintain postal registers and authorize the printing of evidence of postage. Before the licensee can print evidence of postage, these postage evidencing systems must be initialized and authorized by the provider. The initialization process installs PSD-specific information that does not change over the life cycle of the PSD. The authorization process sets user-specific information. The provider reauthorizes the PSD when certain user-specific information changes. PSD meters and IBI meters are checked into service by the provider. The information necessary to complete the check in process is captured directly from the postage evidencing system. The installation process for these meters is completed when the required data is transmitted to the appropriate postal information systems. [P030.6.1]

### **4.6.2 Check Out and Withdrawal**

When a PSD meter or IBI meter is no longer used, the licensee notifies the provider and arranges to return the meter to the provider. The provider checks the meter out of service. The provider must examine the meter before a refund can be issued for any postage remaining on the meter. The information to complete the check out process is captured directly from the postage evidencing system. The withdrawal process for a PSD meter or IBI meter is completed when the required data is transmitted to the appropriate postal information systems. [P030.6.2]

### **4.6.3 Location of Setting**

A PSD meter or IBI meter is reset remotely at the location of the meter by means of a connection between the provider's resetting system and the postal registers in the PSD. [P030.6.3]

### **4.6.4 Paying for Postage Settings**

For PSD meters and IBI meters the licensee may deposit funds only by check, electronic funds transfer, or automated clearing house transfer, in accordance with USPS standards and procedures. [P030.6.4]

### **4.6.5 Resetting a Postal Security Device (PSD) or Information Based Indicia (IBI) Meter**

To reset a PSD meter or IBI meter the following conditions must be met:

- a. The licensee's account must have sufficient funds to cover the desired postage increment, or the provider must have agreed to advance funds to the licensee.

- b. The licensee must provide identifying information and system audit data as required by the USPS and in accordance with the provider's resetting specifications. Before completing the resetting, the provider must verify the identifying data, authenticate the user's license, conduct a remote postage evidencing system audit, and ascertain whether the user's account contains sufficient funds to cover the desired postage increment.
- c. After the resetting transaction is completed, the provider must document the transaction for the licensee, including the balance remaining in the licensee's account, unless the provider gives the user a monthly statement documenting all transactions for the period and the balance after each transaction. [P030.6.5]

#### **4.6.6 Refund of Unused Postage**

Unused postage in a PSD meter or IBI meter will be refunded to the licensed user along with any unused balance in their account under [10.0](#). [P030.6.6]

#### **4.6.7 Postage Adjustment for Faulty Postage Security Device (PSD) Meters and Information Based Indicia (IBI) Meters**

When the licensee requests a postage adjustment for a faulty PSD meter or IBI meter, the meter must first be withdrawn from service and physically examined by the provider. The provider will compare the data in the PSD registers with the data from the system transaction records. After examining a PSD meter or IBI meter withdrawn from service for apparent faulty operation affecting the ascending or descending registers, the provider must notify the licensee of the proposed postage adjustment, if any. At the same time the user is notified, the provider must report the malfunction to the manager of Postage Technology Management, USPS Headquarters. The report must contain all applicable documentation (including a copy of the transaction records) and a recommendation for any appropriate postage adjustment. The licensee may appeal a postage adjustment to the manager of Postage Technology Management, USPS Headquarters (see [608.8.0](#) for address), within 60 calendar days of the date that the user is notified of the proposed postage adjustment recommendation. [P030.6.7]

### **4.7 Indicia—General Information**

#### **4.7.1 Amount of Postage**

The value of the indicia affixed to each mailpiece must be either the exact amount due or another amount permitted by standard. Refunds for overpayment must meet the standards in [10.0](#). [P030.8.1]

#### **4.7.2 Refunds for Unused Indicia**

Refunds for indicia amounts already printed on an envelope or label but not mailed are made in accordance with [10.0](#). [P030.8.2]

#### **4.7.3 Use of Indicia**

Valid indicia produced by a postage evidencing system can be used only to show evidence of payment for postage or other services provided by the USPS. Indicia for zero postage must not be affixed to any item delivered by another carrier. In any illustration of information-based indicia (IBI) produced by an IBI meter or a PC Postage system, and not intended to be used as postage, the two-dimensional barcode or other USPS-approved symbology must be rendered unreadable.

[P030.8.3]

## 4.8 Indicia

### 4.8.1 Approval of Indicia Design

The manager of Postage Technology Management, USPS Headquarters, must approve the design (type, format, and content) of all indicia that will be produced by a postage evidencing system. This approval shall include all elements in the indicium required by USPS regulations and the postage evidencing system performance criteria and applies to the entire area within the indicium boundary. [P030.9.1]

### 4.8.2 Legibility Standards

Indicia must be legible. Illegible or unreadable (unscannable) indicia are not acceptable as payment of postage. Should there be a need to place multiple indicia on an envelope (e.g., for redate or postage correction) the indicia must not overlap each other. Overlapping indicia are not acceptable as payment of postage. Reflectance measurements of the indicia and the background material must meet the standards in 708.4.3. [P030.9.2]

### 4.8.3 Position of Indicia on Mailpiece

Indicia must be printed or applied in the upper right corner of the envelope or address label. Indicia must be at least 1/4 inch from the right edge of the mailpiece and 1/4 inch from the top edge of the mailpiece, and must not infringe on the areas reserved for the FIM, POSTNET barcode, or optical character reader (OCR) clear zone. Indicia must be oriented with the longest dimension parallel to the address. When a FIM is printed with the indicia, the position of the FIM must meet the requirements in 708.9.0. [P030.9.3]

### 4.8.4 Physical Dimensions of an Indicia

The USPS controls what is printed within the boundaries of indicia. The boundaries are defined as follows:

- a. For letterpress indicia, the boundaries are determined by the dimensions of the printing die used by the postage evidencing system to print postal information. Licensees may obtain an additional printing die from the provider, often called the “ad plate,” for additional text to be included when printing indicia. The ad plate may contain postal markings or other printed matter.
- b. For digital indicia, including IBI, the boundaries are defined by the right edge of the envelope, the top edge of the envelope, and the bottom edge and the left edge of any USPS-required indicium element printed by the postage evidencing system. A 1/2-inch clear zone, within which nothing shall be printed by the postage evidencing system, must surround the indicium boundaries to the left of and below all elements of the indicium. [P030.9.4]

### 4.8.5 Indicia Content

Unless otherwise approved by the manager of Postage Technology Management, USPS Headquarters, indicia must include the following information:

- a. The city, state, and 5-digit ZIP Code of the licensing post office; the postage evidencing system serial number or PSD identification number; identification of the provider; the date of mailing; the words “US Postage,” and the postage amount.

- b. As an alternative to the city, state, and 5-digit ZIP Code of the licensing post office, just the ZIP Code of the licensing post office; in this case, the words “Mailed from ZIP Code” may be added to the indicia. For letterpress meters only, the city and state of the licensing post office may be used without also including the ZIP Code, upon approval of the manager of Postage Technology Management, USPS Headquarters.
- c. For multiple indicia on a given mailpiece, information showing the licensing post office in each indicium.
- d. For digital indicia, including IBI, the class of mail and presort level.
- e. For IBI, the required data elements of the two-dimensional barcode or other USPS-approved symbology in accordance with the performance criteria for the given postage evidencing system.
- f. For meters and other postage evidencing systems placed in main offices, stations, or branches of the Postal Service, the indicia must include the capital letters “USPS.” No postage meter or postage evidencing system placed in any other location may include “USPS” in the indicia.
- g. For special indicia, including date correction or redate indicia, postage correction indicia, indicia for APO/FPO, and indicia for prepaid reply mail, information as required in 4.9.4. [P030.9.5]

#### 4.8.6 Indicia Design Standards

Arial font must be used for all postal information in the indicia. The postage amount must be at least 10-point type size. When they are required in the indicium, the capital letters “USPS” must be at least 12 points. For all other required information, the type size must be at least 8 points. The mail class or endorsement, the postage amount, and the words “US Postage” must be in bold capital letters. Text identifying special indicia (“redate,” “postage correction,” “reply postage”) must be in 8-point bold capital letters. The words “US Postage” must be the most prominent and conspicuous printed matter in the indicia other than the postage amount. [P030.9.6]

#### 4.8.7 Optional Postal Markings Included in an Indicia

The postal marking that may be included in indicia vary by indicia type, as follows:

- a. Letterpress indicia may include postal markings related to the class of mail and presort level, or ancillary service endorsement, in accordance with postal regulations. When placed in the ad plate area, only the postal marking may be printed, and it must fill the ad plate area as much as possible. All words must be in bold capital letters at least 1/4 inch high or 18-point type, and legible. Exceptions are not made for small ad plates that cannot accommodate a permissible marking.
- b. Digital indicia may include ancillary service endorsements. [P030.9.7]

#### 4.8.8 Optional Content Included in an Indicia

Other printed matter must not infringe on the areas reserved for the FIM, POSTNET barcode, or optical character reader (OCR) clear zone. The matter that may be printed is based on indicia type, as follows:

## 604.4.8.9

- a. For letterpress indicia only, advertising matter, slogans, and return addresses may be printed with the indicia within space limitations. Licensed users must obtain the ad plates for printing this matter from the authorized provider. Ad plate messages must be distinguished by the inclusion of the name of the mailer or words such as "Mailer's Message." The ad plate must not be obscene, defamatory of any person or group, or deceptive, nor may it advocate unlawful action. The ad plate must not emulate any form of valid indicia or payment for postage.
- b. For postage evidencing systems that print digital indicia, including IBI, an approved indicium shall include within its boundaries only postal markings and text required or recommended by USPS regulation, except that the indicium may identify the provider. Other matter may be printed only outside the boundaries of the clear zone surrounding the indicium. Such printed matter may not be obscene, defamatory of any person or group, or deceptive, and it must not advocate any unlawful action. The printed matter must not emulate any form of valid indicia or payment for postage. [P030.9.8]

**4.8.9 Ink**

All indicia printed by Generation 1 postage evidencing systems must be printed with USPS-approved fluorescent ink. Failure to use fluorescent ink may lead to the revocation of the user's license. Generation 2 postage evidencing systems must use fluorescence to ensure that the mail is faced during processing, unless otherwise approved by the manager of Postage Technology Management (see [608.8.0](#) for address). Generation 2 postage evidencing systems that do not print with fluorescent ink must use an alternative USPS-approved method to ensure that the mail is faced during processing. Approved methods include use of a facing identification mark (FIM) for indicia printed directly on letter-size First-Class Mail or printing indicia on USPS-approved labels. The ink or alternative facing method used is specified in the indicia approval granted by the manager of Postage Technology Management, USPS Headquarters. [P030.9.9]

**4.8.10 Facing Identification Mark**

The facing identification mark (FIM) serves to orient and separate certain types of First-Class Mail during the facing and canceling process. Letter-size First-Class Mail with IBI printed with nonfluorescent ink directly on the envelope by an IBI meter or a PC Postage system must bear a USPS-approved FIM D unless it is courtesy reply mail. The FIM must meet the format, dimensions, print quality, and placement specified in [708.9.0](#). [P030.9.10]

**4.8.11 Adhesive Tape or Label**

When indicia are printed on adhesive tape or on a label for application to the mailpiece, the tape or label used, including the label stock itself as well as the use of fluorescent ink to print indicia and the format and placement of any fluorescence on the label stock, must be approved by the manager of Postage Technology Management, USPS Headquarters. Failure to use the label approved by the USPS for use with the system may result in revocation of the postage evidencing system license. The label must meet the following requirements:

- a. The label must be a pressure-sensitive, permanent label. The label is subject to the corresponding standards in [201.3.12.2](#) for minimum peel adhesion. The applied label must adhere well enough that it cannot be removed in one piece. A face stock/liner label (also called a “sandwich” label) must not be used for printing indicia for postage evidencing.
- b. The label must meet the reflectance requirements in [708.4.3](#).
- c. The label must be large enough to contain the entire indicia.
- d. Indicia printed on a label must be the same as the indicia approved by the manager of Postage Technology Management for printing directly on an envelope. The label must not include any image or text other than those allowed by USPS regulation, unless approved by the manager of Postage Technology Management.
- e. For labels or tapes applied to standard letter-size envelopes and postcards sent as First-Class Mail, the indicia must be printed with fluorescent ink, or the label must have fluorescent tagging that is sufficient to enable the USPS to face and process the mail, as verified by postal testing of each label design. The fluorescent tagging must meet a minimum fluorescent emission intensity of at least 20 phosphor meter units (PMUs), with a maximum of 70 PMUs. The visible color of the fluorescent tagging may be any color that meets the fluorescence requirements. The fluorescent tagging shall exhibit no noticeable change (i.e., no more than 10%) in its emission when exposed to elevated temperature and high humidity conditions.
- f. The label must be placed on the envelope so that the position of the indicium meets the requirements in [4.8.3](#).
- g. When a label is applied to an envelope that already has a FIM, the label must not cover the existing FIM. [P030.9.11]

#### 4.8.12 Indicia Date Requirements

The mailing date in meter indicia must meet the format standards in [4.8.6](#) and this section. The year must be represented by all four digits or by the last two digits. The indicia may be printed directly onto mailpieces or onto separate labels or tape affixed to mailpieces. The mailing date format used in the indicia is subject to the following:

- a. *Complete Date*. At the mailer's option, a complete mailing date (month, day, and year) in the indicia may be used for any Standard Mail or Package Services piece. A complete date must be used for the following:
  1. All First-Class Mail, Priority Mail, and Express Mail pieces.
  2. Any mail with Insured Mail, COD, or Special Handling service.
  3. All mail prepared with the indicia printed on nonadhesive paper (e.g., computer printer paper) and affixed to the mailpiece or used as part of an insert in a window envelope or similar holder.
  4. Prepaid metered reply mail generated by a PC Postage system under [4.9.4](#).

604.4.8.13

- b. *Month and Year.* A mailing date consisting solely of the month and year in the indicia may be used only for Standard Mail and Package Services pieces.
- c. *No Date.* No mailing date may be used in the indicia for prepaid metered reply mail under 4.9.4, except for IBI generated by a PC Postage system. No mailing date in the indicia may be used for Standard Mail and Package Services pieces not subject to 604.4.8.12a.. [P030.9.12]

#### 4.8.13 Date Accuracy and Mailing Periods

The date or period when metered mail may be deposited or presented for mailing is controlled by the mailing date in the indicia as follows:

- a. *Complete Date.* Mailpieces bearing a complete date in the indicia must be deposited or presented on that date, except that pieces entered after the day's last scheduled collection from the licensing post office or collection box may bear the actual date of entry or the date of the next scheduled collection from the licensing post office or collection box. Authorized dispatch-prepared presort mail accepted after midnight may bear the previous day's date. If the mailer knows that the mail is not to be deposited or presented on the date in the indicia, the mailer must use a date correction indicia under 4.9.1. Prepaid metered reply mail generated by a PC Postage system under 4.9.4 and showing a complete date in the indicia may be deposited or presented for mailing on any date without date correction.
- b. *Month and Year.* Mailpieces bearing only the month and year in the indicia may be deposited or presented for mailing on any day during the month shown in the indicia and through the third day of the following month.
- c. *No Date.* Mailpieces bearing no date in the indicia may be deposited or presented for mailing on any date. [P030.9.13]

### 4.9 Special Indicia

#### 4.9.1 Date Correction or Redate

A date correction or redate indicium is required for any mailpiece not deposited by the date of mailing in the indicium as required by 4.8.13. Only one date correction indicium is permitted on a mailpiece. The date correction or redate indicium may be printed on a USPS-approved label instead of directly on the mailpiece. Formats are as follows:

- a. For all postage evidencing systems except PC Postage systems, a date correction must show the actual date of deposit and zero postage value ("0.00"). On letter-size mail, the date correction is placed on the nonaddress side in the upper right corner or on the address side in the lower left corner. On flat-size mail or parcels, the date correction must be placed next to the original indicium, except when applied by an ink jet printer on barcoded flats. The mailer may use an ink jet printer to correct the date in the indicia on mailpieces in barcoded mailings if the text, preceded by two asterisks and showing the actual date of deposit, city, state, and 3-digit ZIP Code of the mailing office, is placed above the address block and below the indicia. Alternatively, on flat-size mailpieces in barcoded mailings only, the mailer may use an ink jet printer to apply the date correction just above the barcode when the barcode is applied by an ink jet printer in accordance with 302.4.1.

- b. For PC Postage systems, a date correction or redate indicium includes only the actual date of deposit and the word “REDATE,” instead of a postage value. On letter-size mail, redate indicia must be placed on the nonaddress side at least 3/4 inch from the bottom edge of the mailpiece and not on an envelope flap. On flats or parcels, it must be placed next to the original indicium. The redate or date correction must not include the FIM or the two-dimensional barcode.

[P030.10.1]

#### 4.9.2 Postage Correction

Indicia for additional postage must be placed on a shortpaid mailpiece to correct postage. The postage correction may be printed on a USPS-approved label instead of directly on the mailpiece and must contain all of the elements required for indicia in 4.8.5. Formats are as follows:

- a. For all postage evidencing systems except for PC Postage systems, the postage correction indicium is placed on the nonaddress side in the upper right corner or on the address side in the lower left corner of letter-size mail. On flats or parcels, it must be placed next to the indicium.
- b. For a PC Postage system, the word “CORRECTION” must be printed in the postage correction and it must not include a FIM. On letter-size mail, the PC Postage correction indicium must be printed on the nonaddress side at least 3/4 inch from the bottom edge of the mailpiece and not on an envelope flap. On flats or parcels, it must be placed next to the original indicium. The postage correction indicium may be printed on a USPS-approved label instead of directly on the mailpiece. [P030.10.2]

#### 4.9.3 APO/FPO Meters

Postage evidencing systems used by military (APO/FPO) post offices must show the military branch and address format for each location (e.g., “ARMY APO AE 09102”). Exceptions are made only for postage evidencing systems used in fleet post offices on board U.S. naval vessels that may show the name of the ship instead of the standard wording for Navy meters (e.g., “USS SARATOGA (CV-60) 34078-2740”).

[P030.10.3]

#### 4.9.4 Reply Postage

Indicia generated by any postage evidencing system may be used to prepay reply postage on Express Mail; on Priority Mail when the rate is the same for all zones; on First-Class Mail cards, letters, and flats up to a maximum of 13 ounces; and on single-piece rate Media Mail and Library Mail, under the following conditions:

- a. The postage amount must be enough to prepay the postage in full.
- b. Indicia may be printed directly on the mailpiece or on a label and must be positioned in accordance with 4.8.3. An applied label must meet the standards in 4.8.11.
- c. Indicia used to prepay reply postage, except for IBI generated by a PC Postage system, must not show the date.
- d. IBI generated by a PC Postage system to prepay reply postage must show the date the licensee printed the indicium and must include the words “REPLY POSTAGE.”

## 604.4.9.5

- e. The mailpiece must be pre-addressed for return to the licensee. Prepaid reply mail is delivered only to the address of the licensee. When the address is altered, the mail is held for postage.
- f. Except for those PC Postage systems with the capability to print an address for the given class or size of mailpiece, the address side of reply mail may be prepared by any photographic, mechanical, or electronic process or combination of such processes (other than handwriting, typewriting, or handstamping). For those PC Postage systems with the capability to print destination addresses for the given size and class of mailpiece, the address must be prepared using the PC Postage system.
- g. The words “NO POSTAGE STAMP NECESSARY POSTAGE HAS BEEN PREPAID BY” must be printed above the address.
- h. For barcoded letter-size First-Class Mail reply mail for all postage evidencing systems except PC Postage, FIM A may be used. For PC Postage, FIM D is required for prepaid reply mail when the indicium is printed directly on the mailpiece.
- i. The address side must follow the style and content as described in this section and shown in the illustration below. Nothing may be added except a return address, FIM, or barcode.

[P030.10.4]

#### 4.9.5 Unpaid Metered Reply Mail

Metered reply mail on which the mailer failed to imprint a meter stamp is treated as business reply mail (BRM). Such mail is delivered on payment of postage and the applicable business reply per-piece charge for basic BRM. [P011.1.3]

## 4.10 Mailings

### 4.10.1 Preparation of Metered Mail

Metered mail is subject to the preparation standards that apply to the class of mail and rate claimed. [P030.11.1]

### 4.10.2 Completing Form 3615, Mailing Permit Application and Customer Profile

Mailers who present presorted First-Class Mail, Standard Mail, Parcel Post in bulk quantities, Presorted Bound Printed Matter, Carrier Route Bound Printed Matter, or Presorted Media Mail using metered postage must complete Form 3615.

Completion of this form is for record keeping only. If an applicant has a completed Form 3615 on file for other services, notification to present metered mail in bulk is annotated on the existing application. There is no fee for this service. [P030.11.2]

### 4.10.3 Combining Metered Mail With Other Postage Methods

Metered mail may be combined in the same mailing with mail paid by other methods only if authorized by the USPS. [P030.11.3]

### 4.10.4 Depositing Metered Mail

Metered mail must be deposited at a postal facility within the jurisdiction of the licensing post office (i.e., the ZIP Code shown in the indicia). However, Express Mail, Priority Mail, and single-piece rate First-Class Mail may be deposited at other than the licensing post office when necessary. Metered mail also may be drop shipped under [705.17.0](#). [P030.11.4]

### 4.10.5 Irregularities

USPS examines metered mail to detect irregularities in preparation and dating. [P030.11.5]

## 4.11 Authorization to Produce and Distribute Meters

Title 39, Code of Federal Regulations, part 501, contains information concerning authorization to produce and distribute postage meters (postage evidencing systems); the suspension and revocation of such authorization; performance standards, test plans, testing, and approval; required production security measures; and standards for distribution and maintenance. Further information may be obtained from the manager of Postage Technology Management, USPS Headquarters (see [608.8.0](#) for address). [P030.12.0]

## 5.0 PC Postage

### 5.1 Initialization, Authorization, Check In, and Installation

All PC Postage systems use a postal security device (PSD) to maintain postal registers and perform postal functions. Before the licensee can print evidence of postage using a PC Postage system, the system's PSD must be initialized and authorized by the provider. The initialization process installs PSD-specific information that does not change over the life cycle of the PSD. The authorization process sets user-specific information. The provider reauthorizes the PC Postage system PSD

604.5.2

when certain user-specific information changes. The installation and check in process for a PC Postage system is completed when the data required by the USPS is transmitted to the appropriate postal information systems. [P030.7.1]

### **5.2 Check Out and Withdrawal**

When a PC Postage system is no longer used, the licensee notifies the provider. The provider withdraws the system from service and transmits the required data to the appropriate postal information systems to check it out of service. A PSD in the custody of the licensee must be returned to the provider for examination before a refund can be issued for any postage remaining on the PSD. [P030.7.2]

### **5.3 Location of Setting**

A PC Postage system is reset remotely using a personal computer with a connection between the provider's resetting system and the postal registers in the PSD. [P030.7.3]

### **5.4 Paying for Postage Settings**

For a PC Postage system, the USPS will accept payment only in the form of credit card or automated clearing house debit, in accordance with USPS standards and procedures. [P030.7.4]

### **5.5 Resetting a PC Postage System**

To reset a PC Postage system the following conditions must be met:

- a. The licensee must initiate payment to the USPS sufficient to cover the desired postage increment before requesting a postage value download to reset the system.
- b. The licensee must provide identifying information and system audit data as required by the USPS and in accordance with the provider's resetting specifications. Before completing the resetting, the provider must verify the identifying data, authenticate the user's license, conduct a postage evidencing system audit, and ascertain whether payment to the USPS sufficient to cover the requested postage value download was initiated by the licensee.
- c. The provider will supply the licensee with documentation of the reset transaction and the balance in the descending register, if any. [P030.7.5]

### **5.6 Postage Refunds**

The USPS provides refunds for the entire postage value balance remaining on the PSD of a PC Postage system that is withdrawn from service and is in the possession of the provider. Refunds are requested and paid through the provider in accordance with 10.0. [P030.7.6]

### **5.7 Postage Adjustment for Faulty Postal Security Devices (PSDs)**

When the licensee requests a postage adjustment for a faulty PSD of a PC Postage system, the PSD must first be withdrawn from service and physically examined by the provider. The provider will compare the data in the PSD registers with the data from the system transaction records. After examining a PSD withdrawn from service for apparent faulty operation affecting the ascending or descending registers, the provider must notify the licensee of the proposed postage adjustment, if any. At the same time the user is notified, the provider must report the malfunction to the manager of Postage Technology Management, USPS Headquarters. The report

must contain all applicable documentation (including a copy of the transaction records) and a recommendation for any appropriate postage adjustment. The licensee may appeal a postage adjustment to the manager of Postage Technology Management, USPS Headquarters (see [608.8.0](#)), within 60 calendar days of the date that the user is notified of the proposed postage adjustment recommendation. [P030.7.7]

## 6.0 Permit Imprint (Indicia)

### 6.1 General Standards

#### 6.1.1 Definition

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with the USPS for that purpose. This payment method may be used for postage and extra service fees for First-Class Mail, Standard Mail, and Package Services. This method is not available for Periodicals or Express Mail and must not be used to pay postage on any mailpiece that is designed for reply purposes. [P040.1.1]

#### 6.1.2 Minimum Volume

Permit imprint mailings must contain at least 200 pieces or 50 pounds, except:

- a. Other higher minimum quantities may apply, depending on the rate claimed.
- b. An occasional First-Class mailing may contain fewer than 200 pieces if from a mailer whose total daily mailings are not much more than 200 pieces but who, to cooperate with the post office, presents a part of that mail early in the day.
- c. A mailing may contain fewer than 200 pieces if it is the completion of a large mailing extending over 2 or more consecutive days and the mailer includes an explanation on the accompanying postage statement.
- d. Single-piece rate mailings submitted under the terms of an approved manifest mailing system agreement with a minimum volume reduction provision.

[P040.5.1]

#### 6.1.3 Use of Permit Imprint

Each mailpiece sent under this payment method must bear a permit imprint indicia showing that postage is paid. Permit imprint indicia may be printed directly on mailpieces, on labels (including address labels) permanently affixed to mailpieces, or on mailpiece wrappers, envelopes, and other containers. Except where the enclosure is prohibited by other standards, matter bearing a permit imprint indicia may be mailed as an enclosure when postage for the enclosure or the host matter is not paid with the enclosed permit imprint, and the enclosed permit imprint indicia is not visible when the matter is mailed. [P040.1.9]

#### 6.1.4 Permit and Fees

A mailer may obtain a permit to use a permit imprint indicia and pay postage in cash before or at the time of mailing by submitting Form 3615 and the applicable fee to the post office where mailings are made. There is no other fee for the use of a permit

## 604.6.1.5

imprint indicia as long as the permit remains active, but other fees (e.g., an annual presort mailing fee) may be due depending on the class of mail to be prepared.

[P040.1.5]

**6.1.5 Application Fee**

Application fee: \$150.00. [R900.18.0]

**6.1.6 Payment of Permit Imprint Postage**

Payment must be made for each mailing, either in cash or through an advance deposit account, before the mailing can be released for processing. Funds to pay postage must be deposited as directed by the USPS. If the funds paid or on deposit are less than that necessary to pay for a mailing, the difference must be paid or deposited before the mailing or other permit imprint mailings can be accepted. Credit for postage is not allowed. Postage may not be paid partly in money and partly by postage stamps unless permitted by standard. [P040.5.5]

**6.1.7 Preparation of Mailing**

All pieces in a permit imprint mailing must be faced (i.e., positioned with all addresses in the same direction, unless counterstacked under the applicable standards) and meet the preparation standards for the rate claimed. Mail claimed at a postage rate that varies by zone must be separated by zone when mailed, unless otherwise authorized by the USPS. [P040.5.3]

**6.1.8 Weight Standards for Permit Imprint Mailing**

All pieces in a permit imprint mailing must be of identical weight unless otherwise authorized by the USPS. [P040.5.2]

**6.1.9 Combining Permit Imprint Mailings With Other Payment Methods**

Mailpieces paid with permit imprint may be combined in the same mailing with pieces paid with other methods only if authorized by the USPS. [P040.1.4]

**6.1.10 Presenting Mailings to be Weighed**

Permit imprint mailings with postage paid by advance deposit account must be presented to the USPS for weighing, unless otherwise authorized by Business Mailer Support, USPS Headquarters. [P040.1.3]

**6.1.11 Depositing Permit Imprint Mailings**

Mail must be deposited and accepted at the post office that issued the permit, at a time and place designated by the postmaster, except as otherwise provided for plant-verified drop shipments. [P040.5.4]

**6.2 Suspension and Revocation****6.2.1 Suspension of Authorization**

The USPS may immediately suspend the authorization to use a permit imprint if the permit holder or its agent refuses or fails to provide information in a timely manner (as specified in [604.6.3.9](#)) to the USPS about the use of its company permit.

[P040.1.7]

**6.2.2 Revocation of Permit**

A permit may be revoked for use in operating any unlawful scheme or enterprise, for nonuse during any 2-year period, for refusal to provide information about permit imprint use or mailings, or for noncompliance with any standard applicable to permit imprints. The permit holder may make a written appeal to the postmaster within 10 days of receipt of the notice. [P040.1.8]

**6.3 Indicia Design, Placement, and Content****6.3.1 Production**

Embossed or unembossed permit imprint indicia may be made by printing press, hand stamp, lithography, mimeograph, multigraph, address plate, or similar device. They may not be typewritten or hand-drawn. [P040.2.1]

**6.3.2 Permit Imprint Indicia Content and Format**

The content and format of a permit imprint indicia must meet the standards below. No other formats may be used. [P040.2.2]

**6.3.3 Indicia Legibility and Color**

The permit imprint indicia must be legible and of a color that contrasts sufficiently with the paper and the indicia's background for readability. A different color may be used to highlight the background of an indicia. [P040.2.3]

**6.3.4 Indicia Placement on Mailpiece**

Permit imprint indicia must be aligned parallel with the address of the mailpiece. The indicia must not encroach on reserved space (e.g., ACS participant code, delivery point barcode) if such a standard applies and can be placed in one of these four positions:

- a. Upper right corner of the mailpiece.
- b. Upper right corner of the address area.
- c. To the right of the address on an address label.
- d. To the right of the address on an insert appearing through a window envelope. [P040.2.4]

**6.3.5 Marking Expedited Handling on Standard Mail**

Except for postcard-size mail and permit imprint indicia placed on address labels, indicia on Standard Mail pieces bearing references to expedited handling or delivery (e.g., "Priority," "Express," "Overnight") must:

- a. Show the words "Presorted Standard" (or "PRSRT STD") or "Nonprofit Organization" (or "Nonprofit Org." or "Nonprofit") more prominently than other words in the indicia.
- b. Include a clear space of at least 3/8 inch around the entire indicia. [P040.2.5]

**6.3.6 First-Class Mail and Priority Mail Format**

A permit imprint indicia on First-Class Mail or Priority Mail must show "First-Class Mail" or "Priority Mail" (or "Priority"), as applicable; "U.S. Postage Paid"; city and state; and permit number. The "Priority Mail" (or "Priority") marking may be omitted when using USPS-provided Priority Mail envelopes and containers. The indicia may show the mailing date, amount of postage paid, or the number of ounces for which

postage is paid. The ZIP Code of the permit holder may be shown directly after the state name or in a separate inscription reading “ZIP Code 00000,” when that ZIP Code does not create uncertainty about the permit holder’s correct address or permit number. Instead of printing the city and state of mailing in the indicia, the mailer may print “Mailed From ZIP Code,” followed by the 5-digit ZIP Code assigned to the postmaster of the mailing office. The indicia may also include required rate markings. [P040.3.1]

### **6.3.7 Standard Mail and Package Services Format**

A Standard Mail or Package Services permit imprint indicia must contain the same information required in 6.3.6 for a First-Class Mail indicia, except “First-Class Mail” or “Priority Mail” (or “Priority”) must be omitted. The indicia may include the amount of postage paid, the weight of the piece, and rate markings as required. The indicia must not include the mailing date. [P040.3.2]

### **6.3.8 Indicating Extra Services**

Permit imprint mail with extra services also paid with a permit must show “First-Class Mail” (if First-Class Mail); “U.S. Postage and Fees Paid”; city and state; and permit number. The city, state, and permit number may be omitted in a company permit imprint indicia, subject to 6.3.9. [P040.3.3]

### **6.3.9 Use of a Company Permit Imprint**

A company permit imprint is one in which the exact name of the company or individual holding the permit is shown in the indicia in place of the city, state, and permit number. A customer may use a company permit imprint if:

- a. For 1 year from the date of mailing, the permit holder or its agent keeps records for each mailing paid with a company permit imprint and makes them available for USPS review on request. These records include (for each version of what was mailed, if applicable) the weight of a single piece; the total number of pieces mailed; the total postage; the date(s) and post office(s) of mailing; and other records required by the postage rate claimed or the payment method used. A complete sample mailpiece must be included for each identical-weight mailing, or each commingled or combined version in a nonidentical-weight mailing. Sample pieces are not required for nonidentical-piece Standard Mail and Package Services machinable or irregular parcel mailings (e.g., merchandise and other fulfillment mailings).
- b. Each mailpiece bears a complete domestic return address. The return address on official mail is subject to the corresponding standards. On unendorsed Standard Mail and Bound Printed Matter, the return address is permitted below the indicia. Except for official mail, if the return address is *not* the physical location at which the USPS may review the records listed in 6.3.9a (i.e., where they are kept or can be made available) or is *not* a point of contact from which such a physical location can be readily determined, the mailer must:
  1. Include in the indicia the 5-digit ZIP Code of the physical location at which the records listed in 6.3.9a are either kept or can be made available for USPS review.

2. Provide the postmaster of that post office with a complete sample mailpiece (except as noted above); the date(s) and post office(s) of mailing; and the name and local address of the party from whom the records listed in [6.3.9a](#) may be obtained. [P040.3.4]

**6.3.10 Indicia Formats**

Unless prepared under the option in [6.3.11](#), permit imprint indicia for ordinary mail, official mail, and Mailgrams must be prepared in one of the formats exemplified in [Exhibit 6.3.10](#), as applicable to the rate claimed or type of mail. (Not all permissible combinations of content elements are shown.) Specific markings may be required by the standards for the rate claimed. [P040.4.1]

604.6.3.10

[Exhibit P040.4.1a and Exhibit P040.4.1b]

#### 6.3.11 Optional Indicia Format

Permit imprint indicia may be prepared in a format other than the basic format described in [6.3.10](#), subject to these conditions:

- a. The rule that forms a box around the content of the indicia may be omitted if the content remains as specified in [6.3.6](#) through [6.3.9](#) and [Exhibit 6.3.10](#).
- b. Unless printed directly on an address label, the indicia content must be placed within a clear area no smaller than 1/2 inch high and 1/2 inch wide, no more than 1-1/2 inches below or left from the upper right corner of the mailpiece or of the address area when oriented to read the address, regardless of processing category or postage rate claimed. If printed on an address label

(including paper, adhesive, and multilayer sandwich labels), the space allowed for the indicia content must be rectangular, large enough to ensure legibility of that content from a normal reading distance and to separate it from other information on the label, and located in the upper right corner of the label when oriented to read the address.

- c. No printing appears in the indicia other than that required or allowed under [6.3.6](#) through [6.3.9](#).
- d. Except as required to enclose the permit information, no printing appears above or to the right of the permit information when the indicia is printed directly on the mailpiece or within the address area or on the address label.
- e. Except for indicia printed on address labels, the permit information is printed in no smaller than 4-point type. In indicia printed on address labels under [6.3.11b](#), the permit information must be legible.
- f. Except as required to enclose the permit information, decorative designs intended to be part of the indicia design must appear below or to the left of the permit information in an area extending no farther than 4-1/2 inches to the left of the right edge, and 1-1/2 inches below the top edge of the mailpiece, address area, or address label, as applicable. Such designs must not resemble or imitate a postage meter imprint, postage stamp, postcard postage, or other postage payment method; and they must not include words, symbols, or designs used by the USPS to identify a class of mail, rate of postage, or level of service, *unless* such elements are correctly used under the applicable standards for the mailpiece on which they appear and the corresponding postage and fees have been paid.
- g. All other applicable standards in [6.0](#) are met. [P040.4.2]

### **6.3.12 Indicia and Marking for Mailgrams**

Western Union Mailgram messages are enclosed in window envelopes that bear the Mailgram imprint in the upper right corner of the address side. The envelopes also have a blue background with the registered trademark “Western Union Mailgram” and the USPS emblem to the right. [P040.6.1]

### **6.3.13 Postal Charges for Mailgrams**

Postal charges for Western Union Mailgram messages are paid at USPS Headquarters by Western Union. Postage for delivery of Western Union Mailgram message envelopes is not paid or collected at local post offices. [P040.6.2]

## **7.0 Payment of Postage**

### **7.1 Basic Standards**

The mailer is responsible for proper payment of postage. Postage on all mail must be fully prepaid at the time of mailing, except as specifically provided by standard for:

- a. Business reply mail (see [507.8.0](#)) and metered reply mail (see [4.9.4](#)) handled as business reply mail.

604.7.2

- b. Merchandise return service (see [507.9.0](#)).
- c. Certain mail sent by members of the Armed Forces (see [703.4.0](#)).
- d. Certain matter by or for the blind or handicapped (see [703.5.0](#)).
- e. Official mail (see [703.6.0](#) and [703.7.0](#)).
- f. Keys and identification devices returned to owners (see [123.1.5](#) and [133.1.8](#)).  
[P011.1.1]

### **7.2 Unpaid Mailable Matter for Private Delivery**

If mailable matter without postage, intended for delivery by a private delivery company, is found in USPS collection boxes (or other receptacles for mail deposit), USPS facilities, or USPS mail processing operations, the company is contacted to pick up the matter by the close of the next workday. If the company does not pick up the matter, it is returned to the sender, postage due. If the sender cannot be identified or refuses the matter, it is treated as dead mail. [P011.1.4]

### **7.3 Payment for Postage Due Mail**

Customers must pay in cash for postage-due mail before the mail is delivered. If postage-due collections equal about \$10 or more every 60 days, payment may be made by advance deposit of money in a postage due account. Postage on quantity mailings found in private mailboxes is subject to [9.1.1](#). Government agencies using penalty mail must pay postage due through an OMAS postage due account. Government agencies may no longer use penalty meter strips or penalty mail stamps to pay postage due. [P011.3.1]

### **7.4 Advance Deposit Account**

Mailers may choose to establish an advance deposit account(s) from which postage, per piece charges, and other fees are deducted. For certain extra services, an advance deposit account is required. Mailers may use a single advance deposit account to pay postage due charges for more than one extra service (e.g., business reply mail, merchandise return service, and bulk parcel return service). [P011.3.3]

### **7.5 Annual Accounting Fee for Extra Services**

Except for accounts used solely to pay postage due for shortpaid mail, address correction notices, and undeliverable-as-addressed pieces returned to sender (e.g., return service requested), mailers must pay a separate annual accounting fee for each extra service paid through an advance deposit account. This fee covers the administrative cost of maintaining the account and provides the mailer with the accounting of all charges deducted from that account. The accounting fee is charged once each 12-month period on the anniversary date of the initial accounting fee payment. The fee may be paid in advance only for the next year and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment. [P011.3.4]

## 8.0 Computing Postage

### 8.1 General Standards

#### 8.1.1 Determining Single-Piece Weight for Retail and Discount Mail

To determine single-piece weight in any mailing at single-piece rates, in a bulk mailing at Parcel Post, Media Mail, or Library Mail rates, or in any bulk rate mailing of nonidentical-weight pieces, weigh each piece individually. To determine single-piece weight in any other bulk or presort rate mailing, weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample. Express all single-piece weights in decimal pounds rounded off to four decimal places. [P013.1.3]

#### 8.1.2 Expression of Numerical Values

For these standards, express:

- a. Piece counts in whole numbers.
- b. Weights in decimal pounds (e.g., 1.1250 pounds) rounded as shown below.
- c. Postage in decimal dollars (e.g., \$0.1625) rounded as shown below.
- d. Intermediate postage figures on all permit imprint and Periodicals statements (rounded off) to four decimal places. On all postage affixed statements (rounded off) to three decimal places. An intermediate postage figure is defined as follows: For First-Class Mail, Standard Mail, and Package Services mailings, any figure on any line of a postage statement, with the exception of the "Total Postage" line, is an intermediate figure. For Periodicals mailings, any figure on any line of a Form 3541, with the exception of the "Total Outside-County Postage," "Total In-County Postage," and "Total Foreign Postage" lines is an intermediate figure.
- e. Total postage figures (rounded off) to two decimal places. A total postage figure is defined as follows: For First-Class Mail, Standard Mail, and Package Services mailings any figure on a "Total Postage" line. For Periodicals mailings, any figure on a "Total Outside-County Postage," "Total In-County Postage," and "Total Foreign Postage" line. [P013.1.2]

#### 8.1.3 Rounding Numerical Values

For these standards:

- a. *Round off* requires increasing by 1 the last digit to be kept if the digit to its right, which is not to be kept, is 5 or greater. If that digit is 4 or less, the last digit kept is unchanged (e.g., 3.376 rounded off to two decimal places is 3.38, 3.374 is 3.37).
- b. *Round up* requires increasing by 1 the last digit to be kept if there are any digits to its right, regardless of significance (e.g., rounding up either 3.3701 or 3.379 to two decimal places yields 3.38). [P013.1.1]

604.9.1

## 9.0 Insufficient or Omitted Postage

### 9.1 Insufficient Postage

#### 9.1.1 Definition

Mail of any class, including mail indicating extra services (except Express Mail, Registered Mail, and nonmachinable First-Class Mail), that is received at either the office of mailing or office of address without enough postage is marked to show the total (rounded off) deficiency of postage and fees. Individual such pieces (or quantities fewer than 10) are delivered to the addressee on payment of the charges marked on the mail. For quantity mailings of 10 or more pieces, the mailer is notified so that the postage charges may be adjusted before dispatch. [P011.1.5]

#### 9.1.2 Undeliverable and Refused Mail

Mail with insufficient postage that is refused by the addressee or otherwise undeliverable is:

- a. Returned to the sender with the reason for nondelivery "Returned for Additional Postage" if First-Class Mail with a return address. *The sender may affix the additional postage, cross out the reason for nondelivery, and remail the piece.*
- b. Returned to the sender and delivered when the sender pays the total deficient postage and additional postage for forwarding or return if other than First-Class Mail and with a return address.
- c. Treated as dead mail if it has no return address. [P011.1.9]

#### 9.1.3 Nonmachinable Mail

Shortpaid nonmachinable First-Class Mail is returned to the sender for additional postage. [P011.1.8]

#### 9.1.4 Adding to Original Postage

Postage stamps or meter stamps originally affixed to insufficiently prepaid mail are accepted in payment of postage to the amount of their face value when the mail is again presented for mailing. [P011.1.10]

#### 9.1.5 Damaged Postage

When the cancellation impression shows that a postage stamp (or stamps) was wholly or partly lost, the piece is handled as if correct postage had been paid for the class and weight of the piece absent any evidence to the contrary. [P011.3.2]

#### 9.1.6 Registered Mail With Insufficient Postage

If shortpaid Registered Mail is found in ordinary mail, with only the First-Class rate of postage paid, the piece is delivered to the addressee as ordinary First-Class Mail. If the amount of postage and fees affixed indicates that the piece was intended to be registered, the piece is rated as postage due and forwarded to the addressee through the Registered Mail. If shortpaid Registered Mail is found in the Registered Mail, the piece is delivered without the collection of postage due. The additional postage is collected from the sender. [P011.1.7]

**9.1.7 Express Mail With Insufficient Postage**

An insufficiently prepaid Express Mail shipment is never endorsed "Postage Due," and collection of deficient postage is never attempted from the addressee. For an Express Mail Next Day, Second Day, Military, or Same Day Airport Service item received at the office of mailing without sufficient adhesive or meter stamps, the mailer is contacted to correct the deficiency before dispatch. If postage is paid by an Express Mail corporate account or federal government "Postage and Fees Paid" indicia, and the mailer writes an incorrect postage and/or fees amount, the account is debited for the correct amount. For a Custom Designed Service item received at the office of mailing with an incorrect weight listed, and if postage is paid with adhesive or meter stamps, the mailer is contacted to correct the deficiency before dispatch. If postage is paid by an Express Mail corporate account or federal government "Postage and Fees Paid" indicia, the account is debited for the correct amount. [P011.1.6]

**9.2 Omitted Postage****9.2.1 Handling Mail With Omitted Postage**

Matter of any class, including that for which extra services are indicated, received at either the office of mailing or office of address without postage, is endorsed "Returned for Postage" and is returned to the sender without an attempt at delivery. If a mail recipient attempts to return or forward the mail without paying additional postage when required, the mail is endorsed "Returned for Postage" and returned to the recipient. If no return address is shown, or the delivery and return addresses are identical, or the delivery and return addresses are different but for the same person or organization, the piece is treated as dead mail. [P011.1.2]

**9.2.2 Handling Unpaid Metered Reply Mail**

Metered reply mail on which the mailer failed to imprint a meter stamp is treated as business reply mail (BRM). Such mail is delivered on payment of postage and the applicable business reply per-piece charge for basic BRM. [P011.1.3]

**9.3 Mailable Matter Without Postage in or on Mail Receptacles****9.3.1 Penalty**

Whoever knowingly and willfully deposits any mailable matter (such as statements of account, circulars, sale bills, or other like matter) on which no postage is paid, in any letterbox established, approved, or accepted by the Postmaster General for the receipt or delivery of mail matter on any route, with intent to avoid payment of lawful postage thereon, shall for each such offense be fined not more than \$300 (18 USC 1725). [P011.2.1]

**9.3.2 Liability for Postage**

Except for limited use by newspapers under [508.3.0](#), any mailable matter not bearing postage found in, upon, attached to, supported by, or hung from private mail receptacles described in [508.3.0](#) is subject to payment of the same postage if carried by mail. [P011.2.2]

604.9.3.3

**9.3.3 Full Distribution**

If there is a distribution of identical pieces to all or substantially all addresses on a route, only a representative number of pieces is returned to the delivery unit. Postage is computed as described in 9.3.4. [P011.2.4]

**9.3.4 Partial Distribution**

If there is a distribution of pieces to some, but not all, addresses on a route, pieces are returned to the delivery unit for use in computing the postage due. First-Class Mail rates are applied to matter that would require First-Class Mail postage if mailed. For other matter, if the piece weighs less than 16 ounces, the applicable single-piece First-Class Mail or Priority Mail rate based on the weight of the piece is applied, or an applicable Package Services rate is applied, whichever is lower. If the piece weighs 16 ounces or more, the Package Services rate is applied. [P011.2.3]

**9.3.5 Known Distributor**

If there is reason to believe that a private delivery firm or an individual within the post office delivery area is responsible for the delivery, the local postmaster notifies that party of the number of pieces and the postage due. If, within 5 days after notice, the firm or individual agrees to pay the postage due, payment is accepted and the pieces are delivered to the addressees. The party paying the postage may choose to redeliver the pieces rather than have the USPS deliver them. If the pieces are found to have been removed from receptacles improperly, they are delivered without postage charge. [P011.2.5]

**9.3.6 Unknown Distributor**

If the party responsible for delivery is not known or if the firm requested fails to pay the postage, the pieces are returned to the publisher or manufacturer, postage due and endorsed to show they were found in or on the addressee's mailbox without postage. If a publisher or manufacturer gives the name and telephone number of a person to contact and guarantees postage payment, the pieces are redelivered to the addressees. If the publisher or manufacturer is unknown or refuses the pieces, the matter is treated as dead mail. [P011.2.6]

## 10.0 Refunds and Exchanges

### 10.1 Stamp Exchanges

**10.1.1 USPS Fault**

The post office may correct mistakes in selling damaged, defective, or otherwise unserviceable stamps by exchanging stamps at full postage value. [P014.1.1]

**10.1.2 Damaged in Customer's Possession**

Stamps that are damaged or otherwise unusable for postage (because of humidity, moisture, or other causes) while in a customer's possession may be exchanged only for an equal number of stamps of the same denomination. Unusable stamps accepted from a customer under these conditions must be those on sale at post offices within 12 months before the transaction. Quantities of the same denomination over \$10 must be returned in the same configuration as when bought, i.e., sheets, coils, booklets. Each such transaction is limited to \$100 worth of postage from each customer. [P014.1.2]

**10.1.3 Condition and Quantity**

The stamps presented for exchange must be in substantially whole condition, with the denomination evident. If coils of stamps are partially stuck together and cannot be counted, the postmaster may accept the customer's estimate of the number of stamps left in the coil and give equal quantities in exchange. [P014.1.3]

**10.1.4 Appeal**

Any customer denied an exchange for damaged stamps may appeal the postmaster's decision to the Consumer Advocate, USPS Headquarters (see [608.8.0](#) for address). [P014.1.4]

**10.1.5 Purchase Error**

If a customer bought the wrong denomination stamps (or the wrong kind, size, or denomination envelope), they may be exchanged at full postage value. Only full panes of stamps, coils of stamps in the original sealed wrappers, full boxes of stamped envelopes, or original sealed packs of stamped cards may be exchanged. A customer exchanging \$250 or more of such stock must show proof of identity (e.g., a driver's license) and must present the stock for exchange to the postal unit from which his or her mail is delivered. [P014.1.5]

**10.1.6 Exchange of Spoiled and Unused Postal Matter**

Unusable and spoiled stamped envelopes or stamped cards, if uncanceled, and unused precanceled stamps and stamped cards, are exchanged for other postage-stamped paper. Only the buyer may exchange stamped envelopes or aerogrammes (airletter sheets) with a printed return address and stamped cards with any printed matter of the buyer. If there is no purchaser's printing, any responsible person may exchange them. These conditions apply:

- a. Stamped envelopes (mutilated no more than is necessary to remove contents): postage value plus value of postage added because of a rate increase or for additional service.
- b. Unmutilated aerogrammes (airletter sheets): postage value minus \$0.01 for each aerogramme redeemed.
- c. Unmutilated single and double stamped cards: 85% of postage value, plus full value of postage added because of a rate increase or for additional service. Either half of a double stamped card may be redeemed, if the double card is printed and cut for use as single cards. Unused double stamped cards printed for reply should not be separated but, if they are separated in error and the buyer presents both halves, the cards may be redeemed. Reply halves of double stamped cards returned to sender outside of the mail are not redeemable by the original buyer, even though the reply half received no postal service.
- d. Sheet stamped cards spoiled when cut to size: 85% of postage value plus full value of postage added because of a rate increase or for additional service, if all cut sections are submitted.
- e. Stamps affixed to commercial envelopes and postcards: 90% of postage value. Envelopes and postcards must be in substantially whole condition and in lots of at least 50 of the same denomination and value.

604.10.1.7

- f. Unused precanceled stamps in full coils and in full sheets redeemed from precanceled permit holders: 90% of postage value. [P014.1.6]

**10.1.7 Stamps Converted to Other Postage Forms**

A customer may submit postage stamps for conversion to an advance deposit for permit imprint mailings, subject to these conditions:

- a. Only full panes of postage stamps (or coils of stamps in the original sealed wrappers) are accepted for conversion. Accepted stamps include commemorative stamps issued no more than 1 year before the requested conversion date or regular stamp issues not officially withdrawn from sale.
- b. A request for stamp conversions must be made in writing to the district manager of Customer Service and Sales in the district where the customer's post office is located. The customer's request must include:
  - c. Name, denomination, quantity, and value of stamps for which conversion is requested.
  - d. Name of the post office where the stamps were bought.
  - e. Evidence of purchase of the stamps.
- f. The amount of postage applied to a permit imprint advance deposit account through conversion is the full face value of the stamps.
- g. The district manager may ask the customer to submit additional records to support the information in the request. After reviewing the documentation, the district manager approves or denies the request. The customer is notified when the conversion is approved. The postmaster is advised of the procedures for accepting the stamps and making the required accounting entries.
- h. No part of any amount applied to a permit imprint advance deposit account from the conversion of postage stamps is refundable in cash or by any other means. [P014.1.7]

**10.1.8 Not Exchangeable**

The following postage items are not exchangeable:

- a. Adhesive stamps, unless mistakes were made in buying, stamps were defective, stamps were affixed to commercial envelopes and postcards, or under [10.1.7](#).
- b. Stamps cut from stamped cards, stamped envelopes, or aerogrammes (airletter sheets).
- c. Parts and pieces of stamped cards.
- d. Stamped cards, stamped envelopes, and aerogrammes received for reply.
- e. Mutilated and defaced stamps. [P014.1.8]

## 10.2 Postage and Fee Refunds

### 10.2.1 Refund Standards for Postage and Fees

A refund for postage and fees may be made:

- a. Under the standards below if postage and special or retail service fees are paid and no service is rendered, or if the amount collected was more than the lawful rate.
- b. Under 10.3 for refund requests for postage evidencing systems and metered postage. Metered postage is printed by a postage evidencing system (4.0). Refunds may be requested for unused indicia, unused postage value remaining in a postage evidencing system, and the unused balance in a postage payment account.
- c. Under 10.4 for refund requests for postage made at the time of mailing.
- d. Under 2.0 for rejected personalized envelopes.
- e. Under the terms of a contract between the contract postal unit (CPU) and the USPS for unused postage printed by the CPU. [P014.2.1]

### 10.2.2 Ineligible Matter

The USPS is presumed at fault and no service is rendered in cases involving returned articles improperly accepted in either domestic or international service because of excess size or weight. Any mailer who customarily weighs and rates mail is expected to be familiar with basic standards. The USPS is not at fault if the mailer is required to withdraw articles from the mail before dispatch. [P014.2.2]

### 10.2.3 Torn or Defaced Mail

If First-Class Mail or Package Services is torn or defaced during USPS handling so that the addressee or intended delivery point cannot be identified, the sender may receive a postage refund. This applies only when the failure to process and/or deliver is the fault of the USPS. Where possible, the damaged item is returned with the postage refund. [P014.2.3]

### 10.2.4 Full Refund

A full refund (100%) may be made when:

- a. The USPS is at fault.
- b. Postage or fees are paid in excess of the lawful rate.
- c. Service to the country of destination is suspended.
- d. Postage is fire-scarred while in USPS custody (including in the letterbox), and the mail is returned to sender without service.
- e. Special delivery stamps are mistakenly used to pay postage, and the mail is returned to the sender without service.
- f. Fees are paid for special handling, Certified Mail, Delivery Confirmation, or Signature Confirmation and the article fails to receive the extra service for which the fee is paid.

## 604.10.2.5

- g. Surcharges are mistakenly collected on domestic Registered Mail or collected over the proper amount, or represented by stamps affixed to matter not actually accepted for registration.
- h. Fees are paid for return receipt or for restricted delivery, and the USPS (through fault or negligence) fails to furnish the return receipt or its equivalent, or makes erroneous delivery or nondelivery.
- i. An annual presort mailing fee is paid for Presorted First-Class Mail, Standard Mail, Presorted Media Mail, or Presorted Library Mail or a destination entry mailing fee is paid for Parcel Select or Bound Printed Matter and no mailings are made during the corresponding 12-month period.
- j. Customs clearance and delivery fees are erroneously collected.
- k. Fees are paid for registry or insurance service on mail addressed to a country to which such services are not available, unless claim for indemnity is made.
- l. Express Mail is not delivered according to the applicable service standard. No refund is made if the mail was properly detained for law enforcement purposes (see *Administrative Support Manual* 274). [P014.2.4]

**10.2.5 Intercepted Mail**

When mail is returned at the sender's request or for a reason not the fault of the USPS, any difference between the amount paid and the appropriate surface rate chargeable from mailing office to interception point and return is refunded.

[P014.2.5]

**10.2.6 Unallowable Refunds**

The limits on refunds are not intended to prohibit payments for unused adhesive stamps and adhesive stamps affixed to unmailed matter in connection with an authorized marketing program. Refunds are not made for the following:

- a. An application fee to use permit imprints.
- b. Collect on delivery (COD), Express Mail insurance, insured, and registered fees after the USPS accepts the article, even if the article is later withdrawn from the mail.
- c. Unused adhesive stamps (may be exchanged under [10.1.1](#) through [10.1.5](#) in *Stamp Exchanges*).
- d. Adhesive stamps affixed to unmailed matter. [P014.2.6]

**10.2.7 Applying for Refund**

For refunds under [10.2](#), the customer must apply for a refund on Form 3533; submit it to the postmaster; and provide the envelope, wrapper, or a part of it showing the names and addresses of the sender and addressee, canceled postage and postal markings, or other evidence of postage and fees paid. Refunds for metered postage are submitted under [10.3](#).

[P014.2.7]

### 10.2.8 Ruling on Refund Request

Refund requests are decided based on the specific type of postage or mailing:

- a. Refunds under [10.2](#). The local postmaster grants or denies refunds under [10.2](#). The customer may appeal an adverse ruling through the postmaster to the Pricing and Classification Service Center (PCSC) manager who issues the final agency decision.
- b. Dated metered postage, except for PC Postage systems, under [10.3](#). The postmaster at the licensing post office grants or denies requests for refunds for dated metered postage under [10.3](#). The licensee may appeal an adverse ruling within 30 days through the manager, Postage Technology Management, USPS Headquarters (see [608.8.0](#) for address), who issues the final agency decision. The original meter indicia must be submitted with the appeal.
- c. Undated metered postage under [10.3](#). The manager, business mail entry at the district post office overseeing the mailer's licensing post office, or designee authorized in writing, grants or denies requests for refunds for undated metered postage under [10.3](#). The customer may appeal a decision on undated metered postage within 30 days through the manager, business mail entry, or designee, to the PCSC manager who issues the final agency decision. The original meter indicia must be submitted with the appeal.
- d. PC Postage systems under [10.3](#). The system provider grants or denies a request for a refund for dated indicia printed by PC Postage systems under [10.3](#) using established USPS criteria. For dated PC Postage indicia only, the licensee may appeal an adverse ruling within 30 days through the manager, Postage Technology Management, USPS Headquarters, who issues the final agency decision. The original indicia must be submitted with the appeal.
- e. Optional procedure (OP) mailings. Mailer's request for a refund must be submitted to the manager, Business Mailer Support, USPS Headquarters (see [608.8.0](#) for address). [P014.2.8]

### 10.2.9 Semipostal Stamps

Customers may exchange or convert semipostal stamps for their postage value (i.e., the price of the stamps less the contribution amount) to the extent exchange or conversion of postage stamps is permitted under [10.0](#). The postage the customer exchanges or converts is equal to the First-Class Mail single-piece rate in effect at the time of exchange. However, if the customer provides a receipt showing the date of purchase, the postage exchanged or converted is equal to the First-Class Mail single-piece rate in effect at the time of purchase. The contribution amount is not refundable and is not included in the exchange or conversion value. [P014.2.9]

### 10.2.10 Business Reply Mail

A business reply mail (BRM) permit holder may request a credit or refund for postage affixed to returned BRM pieces. Only the value of the postage affixed may be credited or refunded. Refunds are not given for foreign postage affixed to BRM. To receive a refund for postage affixed to returned BRM pieces, the permit holder must submit a completed Form 3533 to the postmaster, documenting the excess postage payment for which a credit or refund is desired. The permit holder also must present to the designated office properly faced and banded bundles of 100 identical

604.10.3

BRM pieces with identical amounts of postage affixed. A charge of \$35 per hour, or fraction thereof, is assessed for the workhours used to process the refund. With permission from the postmaster, a BRM permit holder may submit a bundle with fewer than 100 BRM pieces. Refunds are not given for any BRM or QBRM per piece charges, annual accounting fees, quarterly fees, or monthly maintenance fees.

[P014.2.10]

### **10.3 Refund Request for Postage Evidencing Systems and Metered Postage**

#### **10.3.1 Unused Postage Value in Postage Evidencing Systems**

The unused postage value remaining in a postage evidencing system when withdrawn from service may be refunded, depending upon the circumstance and the ability of the USPS to make a responsible determination of the actual or approximate amount of the unused postage value. If the postage evidencing system is withdrawn because of faulty operation, a final postage adjustment or refund will be withheld pending the system provider's report of the cause to the USPS and the USPS determination of whether or not a refund is appropriate and, if so, the amount of the refund. No refund is given for faulty operation caused by the licensee. When a postage evidencing system that is damaged by fire, flood, or similar disaster is returned to the provider, postage may be refunded or transferred when the registers are legible and accurate, or the register values can be reconstructed by the provider based on adequate supporting documentation. When the damaged system is not available for return, postage may be refunded or transferred only if the provider can accurately determine the remaining postage value based on adequate supporting documentation. The licensee may be required to provide a statement on the cause of the damage and to attest that there has not been reimbursement by insurance, or otherwise, and that the licensee will not seek such reimbursement. Refunds for unused postage value are granted as specified in 4.0 in accordance with the following procedures:

- a. All postage evidencing systems except for PC Postage systems. The postage evidencing system must be examined to verify the amount before any remaining funds are cleared from the meter, and a refund or credit is initiated for unused postage value or additional money is collected to pay for postage value used, based on what is found. Licensees may also submit their own transaction records, if any, or a system-generated register as supporting documentation.
- b. PC Postage systems. The licensee must notify the provider to withdraw the system. To determine the remaining postage value on the PC Postage system, the licensee generates a refund request indicium for transmittal to the provider for verification. A refund can be issued only when the system's postal security device (PSD) is in the provider's possession. The USPS refunds the entire unused postage value remaining on the PSD for the user's system, but the refund is issued through the licensee's provider. [P014.3.1]

#### **10.3.2 Unused, Dated Postage Evidencing System Indicia, Except PC Postage Indicia**

Unused, dated postage meter indicia are considered for refund only if complete, legible, and valid. PC Postage indicia refunds are processed under 10.3.3. All other metered postage refund requests must be submitted as follows:

- a. The licensee must submit the request. The refund request must include proof that the person or entity requesting the refund is the licensee for the postage meter that printed the indicia. Acceptable proof includes a copy of the lease, rental agreement, or contract.
- b. The licensee must submit the request, along with the items bearing the unused postage, to the licensing post office. The items must be sorted by meter used and then by postage value shown in the indicia, and must be properly faced and bundled in groups of 100 identical items when quantities allow. The request is processed by the USPS. The postmaster approves or denies the refund request.
- c. The licensee must submit the refund request within 60 days of the date(s) shown in the indicia.
- d. When the unused metered postage is affixed to a mailpiece, the refund request must be submitted with the entire envelope or wrapper. The unused metered postage must not be removed from the mailpiece once applied.
- e. Indicia printed on labels or tapes not stuck to wrappers or envelopes must be submitted loose and must not be stapled together or attached to any paper or other medium. However, self-adhesive labels printed without a backing may be submitted on a plain sheet of paper.
- f. If a part of one indicium is printed on one envelope or card and the remaining part on one or more, the envelopes or cards must be fastened together to show that they represent one indicium.
- g. Refunds are allowable for indicia on metered reply envelopes only when it is obvious that an incorrect amount of postage was printed on them.
- h. The refund request must be submitted with Form 3533. A separate Form 3533 must be completed for each meter for which a refund is requested. All identifying information and all sections related to the refund requested must be completed. Charges for processing a refund request for unused, dated meter indicia are as follows:
  1. If the total face value of the indicia is \$350 or less, the amount refunded is 90% of the face value. USPS may process the refund payment locally via a no-fee postal money order.
  2. If the total face value is more than \$350, the amount refunded is reduced by a figure representing \$35 per hour, or fraction thereof, for the actual hours to process the refund, with a minimum charge of \$35. The postmaster will submit the approved Form 3533 to the USPS Imaging and Scanning Center for payment processing through the Accounting Service Center. [P014.3.2]

### 10.3.3 Unused, Dated PC Postage Indicia

Unused, dated PC Postage indicia are considered for refund only if complete, legible, and valid. The refund request must be submitted as follows:

- a. Only the PC Postage licensee may request the refund. The licensee must submit the request, along with the items bearing the unused postage, to the system provider. The request is processed by the provider, not the USPS.

604.10.3.4

- b. The licensee must submit the refund request within 30 days of the date(s) shown in the indicia.
- c. The refund request must be submitted as required in [10.3.2d.](#) through [10.3.2g.](#)
- d. The provider may, at its discretion, charge for processing a refund request.  
[P014.3.3]

#### **10.3.4 Undated Metered Postage**

Unused, undated postage evidencing system indicia are considered for refund only if complete, legible, and valid. The refund request must be submitted as follows:

- a. Only the meter licensee or the commercial entity that prepared the mailing for the licensee using the licensee's meter may request the refund. The request must include a letter signed by the meter licensee or the commercial entity that prepared the mailing for the licensee explaining why the mailpieces were not mailed.
- b. The minimum quantity of unused, undated metered postage that may be submitted for refund is 500 pieces from a single mailing or, as an alternative, indicia with a total postage value of at least \$500 from a single mailing.
- c. The meter licensee, or the commercial entity that prepared the mailing for the licensee using the licensee's meter, must submit the request, along with the items bearing the unused postage and the required documentation, to the manager, business mail entry at the district post office overseeing the mailer's licensing post office, or to a designee authorized in writing. The manager or designee approves or denies the refund request.
- d. The request must include the items bearing the unused postage, sorted by meter used and then by postage value shown in the indicia. The items must be properly faced and bundled in groups of 100 identical items, when quantities allow, and must meet the requirements of [10.3.2d.](#) through [10.3.2g.](#)
- e. The request must be submitted within 60 days of the date the mail was metered. Supporting documentation must be submitted to validate the date. Examples of supporting documentation include the job order from the customer, production records, the USPS qualification report, spoilage report, and reorders created report, as well as customer billing records, postage statements, and a sample mailpiece.
- f. The refund request must be submitted with Form 3533. All identifying information and all sections related to the refund requested must be completed. When more than one meter was used to prepare the mailing, a separate Form 3533 must be completed for each.
  - 1. If the total face value of the indicia for a single mailing submitted for refund is \$350 or less, the amount refunded is 90% of the face value. USPS may process the refund payment locally via a no-fee postal money order.
  - 2. If the total face value of the indicia for a single mailing submitted for refund is more than \$350, the amount refunded is reduced by a figure representing \$35 per hour, or fraction thereof, for the actual hours to process the refund, with a minimum charge of \$35. The manager,

business mail entry will submit the approved Form 3533 to the USPS Imaging and Scanning Center for payment processing through the Accounting Service Center. [P014.3.4]

### 10.3.5 Ineligible Metered Postage Items

The following metered postage items are ineligible for refunds:

- a. Reply envelopes or cards paid at the proper postage rate.
- b. Indicia printed on labels or tape removed from wrappers or envelopes.
- c. Loose indicia printed on labels or tape that have been stapled together or attached to paper or other medium in any manner.
- d. Indicia lacking identification of the licensing post office or other required information.
- e. Indicia printed on mail dispatched and returned to sender as undeliverable as addressed, including mail marked “no such post office” and mail addressed for local delivery and returned after directory service was given or delivery was attempted. [P014.3.5]

### 10.3.6 Refunds for Metered Postage

Refunds for indicia amounts already printed on an envelope or label but not mailed are made in accordance with 10.3. [P030.8.2]

### 10.3.7 Rounding Numerical Values [Rounding]

Any fraction of a cent in the total to be refunded is rounded down to the whole cent (e.g., \$4.187 is rounded to \$4.18). [P014.3.6]

## 10.4 Value Added Refunds

### 10.4.1 Definition of Value Added Refund

Subject to the standards in 10.4, a *presenter* (i.e., the mailer or other party, such as a presort service bureau), who prepares letter-size First-Class Mail or Standard Mail under 10.4.12 and 10.4.13 for their customers and presents it to the USPS in their behalf, may request a *value added refund* (VAR) for postage affixed to mail in excess of the rate applicable to that mail when presented to the USPS. A presenter must be authorized by the USPS to seek the refund. Any refund is issued to the presenter, and the disposition of any such refund is a private matter between the presenter and the presenter’s customer. [P014.4.1]

### 10.4.2 Application

The presenter must make a written application to the postmaster serving each location where VAR mailings are to be deposited, verified, and paid. The application must describe the presenter’s mail preparation system and the documentation that it can produce. The application must also show that the presenter can produce the postage statements and the refund documentation required by 10.4.17. The postmaster forwards the application and supporting documentation for approval to the Business Mailer Support manager, USPS Headquarters. [P014.4.2]

**10.4.3 Mailer System**

Eligibility to submit requests for VARs requires that the presenter process and document mail through a fully automated mail sorting system. The system must include barcoding equipment (e.g., multiline optical character readers) to read the address information and determine the correct ZIP+4 code; an ink jet or laser printer to apply the correct POSTNET barcode in the required location; and a barcode reader (BCR) to read the POSTNET barcode, verify it for accuracy, and sort the mailpiece to the correct location. [P014.4.3]

**10.4.4 Presenter Agreement**

In applying for authorization to make VARs, the presenter agrees:

- a. That verification samples taken by the USPS represent the entire mailing and are to be used to adjust the total refund amount requested.
- b. To provide the USPS with advance written notice of plans for system changes that affect the calculation of postage, amount of refund, generation of required documentation, or mail presorting.
- c. To cooperate with the USPS during mail verification or system audits, and to process sampled mail through barcode readers (BCRs) when requested.

[P014.4.4]

**10.4.5 Authorization**

If the application is approved, an authorization to make refund requests is valid for a period not to exceed 2 years, subject to renewal after USPS review. [P014.4.5]

**10.4.6 Appeal**

If the application is denied, the presenter may file a written appeal within 15 days through Business Mailer Support, USPS Headquarters, to the Business Mail Acceptance manager, who issues the final agency decision. [P014.4.6]

**10.4.7 Suspension**

The Business Mailer Support manager may suspend an authorization after determining that the presenter does not meet the standards in 10.4. [P014.4.7]

**10.4.8 Cancellation**

The Business Mailer Support manager may cancel an authorization for any of these reasons:

- a. The presenter consistently provides incorrect information and is unwilling or unable to correct the problem.
- b. The presenter continually fails to meet the standards in 10.4.
- c. No mailings are made under these procedures during any 12 consecutive months. [P014.4.8]

**10.4.9 Appeal of Cancellation or Suspension**

A cancellation or suspension takes effect 15 days from the presenter's receipt of the notice unless, during that time, the presenter files a written appeal with the Business Mailer Support manager, USPS Headquarters, stating why the authorization should not be canceled or suspended. If the manager upholds the action, the appeal is

forwarded to the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision. A final cancellation takes effect 15 days after receipt by the presenter. [P014.4.9]

#### **10.4.10 Form 8096 Required**

The presenter must provide the USPS with an original Form 8096 completed and signed by each of the presenter's customers who meter any pieces in the mailing for which a VAR is requested, and a list of those customers. If postage is affixed to the pieces using a postage evidencing system by an intermediate agent (not the presenter of the mailing) for the owner of the pieces, a signed Form 8096 must be on file from the agent whose postage evidencing systems were used to affix the postage. Refund requests are denied if all required Forms 8096 are not provided. [P014.4.10]

#### **10.4.11 Form 8096 Not Required**

Form 8096 is not required for a customer whose mail is metered by the presenter with the presenter's own postage evidencing system. In such cases, the presenter must provide the post office where it submits refund requests with a list, in ascending numeric order, of its own postage evidencing system serial numbers and those of any intermediate agent used for affixing postage to the pieces included in the mailing. [P014.4.11]

#### **10.4.12 First-Class Mail**

If a VAR request is submitted when a First-Class Mail mailing is presented to the USPS, each piece in the mailing must be:

- a. Letter-size and weigh less than the applicable maximum weight for automation rate mail as required in [201.3.3](#).
- b. Part of an automation rate mailing prepared by the presenter.
- c. Metered by the presenter or the presenter's customer at the Presorted First-Class or automation rates applicable to a piece of that weight, including the full postage for the second and third ounces, if applicable. [P014.4.12]

#### **10.4.13 Standard Mail**

If a VAR request is submitted when a Standard Mail mailing is presented to the USPS, each piece in the mailing must be:

- a. Letter-size and weigh less than the applicable maximum weight for automation rate mail as required in [201.3.4](#).
- b. Part of an automation rate mailing prepared by the presenter.
- c. Metered by the presenter or the presenter's customer at a nonautomation rate or at any automation minimum per piece rate. Pieces for each entry must be prepared as a separate mailing if the destination entry rates are claimed.

[P014.4.13]

604.10.4.14

**10.4.14 Criteria for Mailing**

A mailing for which a VAR request is submitted must meet these criteria:

- a. The presenter must process the mail for each customer so that the rate of postage affixed on each piece can be documented by customer, unless otherwise authorized by Business Mailer Support, USPS Headquarters, and rate category.
- b. Documentation must be kept showing internal quality control procedures done for each mailing submitted for which a VAR is claimed.
- c. Mail must be prepared by the standards corresponding to the First-Class Mail or Standard Mail rate claimed.
- d. The presenter must be authorized by Business Mailer Support to submit Standard Mail mailings that contain both Regular and Nonprofit rate pieces under the applicable standards.
- e. Each piece in the mailing for which barcodes are applied by an MLOCR must bear an automation marking that also describes the method of postage payment and the rate of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail as described in [705.5.0, First-Class or Standard Mail Mailings With Different Payment Methods](#). [P014.4.14]

**10.4.15 Postage Statement**

The presenter must provide a complete and accurate postage statement with each mailing annotated to show the presort option used to prepare that mailing, and reporting postage data based on the rate category for which each piece qualifies when presented to the USPS. [P014.4.15]

**10.4.16 Applying for Refund**

To request a VAR, Form 3533 and supporting documentation as described below must be provided with the corresponding mailing at the time of mailing. After the time of mailing, refund applications are not considered. The entry office postmaster pays refunds weekly or on another schedule agreed to with the mailer. [P014.4.16]

**10.4.17 Documentation for Mailing**

Mailers are required to submit or generate the following reports:

- a. Each mailing must be accompanied by all of the following documentation to enable the VAR request and the specific and efficient USPS verification of that request:
  1. Form 3533, if a net VAR refund is due.
  2. The applicable postage statement.
  3. The USPS qualification report in standardized format detailing by ZIP Code the number of pieces qualifying for each rate by presort level. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS qualification report must be generated for each entry destination.
  4. The USPS Summary ZIP Destination report in one of two standardized formats that lists by tray destination and rate category: each mail category, postage payment type, weight and rate affixed (report all postage affixed

First-Class Mail pieces as weighing one ounce); number of pieces; dollar amount of postage affixed to those pieces; cumulative postage affixed; total postage; net postage due; cumulative postage due; and a running total of the number of pieces. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Summary ZIP Destination report must be generated for each entry destination. This report is not required if there is only one metered rate in the mailing. Business Mailer Support, USPS Headquarters, may authorize submission of only portions of this report.

5. The USPS Postage Summary in a standardized format. This report shows, by type of payment method, the total postage claimed for all pieces in the mailing by rate level and the total postage affixed by rate level. It also shows a grand total summary of postage affixed, postage claimed, and total postage due. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Postage Summary report must be generated for each entry destination.
  6. Other documentation that may be required by other standards for the rate claimed.
- b. The USPS Customer Mail Report must be generated for each mailing, but is required to be submitted to the USPS only when requested by USPS personnel for the resolution of errors (shortpaid and potential MLOCR profiling) detected in a specific mailing. The Customer Mail Report must list each customer by name and provide the following information about their mail: rate affixed, mail category including postage payment type, weight, total postage, postage affixed, number of pieces, cumulative number of pieces, number of pieces rejected, and total pieces fed. [P014.4.17]

## 10.5 Express Mail Postage Refund

### 10.5.1 Who May Apply

A claim for a refund for Express Mail postage may be made only by the mailer (the sender of an Express Mail item or the holder of the Express Mail Corporate Account used to pay for postage). [P014.5.1]

### 10.5.2 Conditions for Refund

A refund request must be made within 90 days after the date of mailing as shown in the "Date In" box on Label 11. Except as provided in [114.3.1](#), a mailer may file for a postage refund only under one of the following circumstances:

- a. The item was not delivered or made available for claim as guaranteed under the applicable service purchased.
- b. The item was not delivered or made available for claim by the guaranteed delivery time applicable to the service purchased, and delivery was not attempted by the guaranteed delivery time applicable to the service purchased. [P014.5.2]

### 10.5.3 Refunds Not Given

A refund claim will not be given if the guaranteed service was not provided due to any of the circumstances in [114.3.1](#). [P014.5.3]

604.10.5.4

**10.5.4 How to Apply for a Refund**

The mailer must complete Part I of Form 3533 in duplicate and submit it, along with the original customer copy of Label 11, to any post office. [P014.5.4]

**10.5.5 Immediate Refund**

If the USPS can determine immediately that the mailer is entitled to a refund and the Express Mail item had postage affixed, then the USPS refunds the postage immediately in cash or with a no-fee money order. [P014.5.5]

**10.5.6 Deferred Refund**

If the USPS cannot determine immediately that the mailer is entitled to a refund, then the USPS researches the application and, if appropriate, issues a refund to the mailer within 5 business days. [P014.5.6]

**10.5.7 Refunds Through a Corporate or Agency Account**

If the USPS determines that the mailer is entitled to a refund and postage was paid through an Express Mail Corporate Account or a federal government agency account, then the USPS refunds the postage by issuing a credit to that account within 5 business days. [P014.5.7]

**11.0 Revenue Deficiency****11.1 General****11.1.1 Definition of Revenue Deficiency**

*Revenue deficiency* means a shortage or underpayment of postage or fees. Revenue deficiencies are generally assessed by the postmaster or manager, Business Mail Entry, who issues a written notification to the customer citing the amount of the deficiency and the circumstances. [P011.4.1]

**11.1.2 Appeal of Ruling**

Except as provided under [11.2](#) and [703.1.0, Nonprofit Standard Mail](#), a mailer may appeal a revenue deficiency assessment by sending a written appeal within 30 days of receipt of the notification to the appropriate postmaster or manager in [11.1.2a.](#) through [11.1.2c.](#) In all cases, the mailer may be asked to give more information or documentation to support the appeal. Failure to do so within 30 days of the request is grounds for denying an appeal. Any decision that is not appealed as prescribed becomes the final agency decision. Mailers may send appeals as follows:

- a. To the district manager, Finance, for revenue deficiencies for fees. The district manager, Finance, issues the final USPS decision.
- b. To the postmaster or manager, Business Mail Entry, for revenue deficiencies for postage. The postmaster or manager, Business Mail Entry, forwards the appeal to the PCSC. If the appeal concerns a ruling that mail, due to its contents, must be entered at First-Class Mail rather than Standard Mail rates, the PCSC will forward the appeal to the manager, Mailing Standards, USPS Headquarters who will issue the final agency decision. The PCSC will issue the final agency decision on all other appeals.

- c. To the manager, Mailing Standards (see [608.8.0](#) for address), if the PCSC manager first assessed the deficiency. The manager, Mailing Standards issues the final agency decision. [P011.4.2]

**11.2 Nonprofit Standard Mail**

**11.2.1 Assessment and Appeal**

A revenue deficiency may be assessed in the amount of the unpaid postage against any person or organization that mailed, or caused to be mailed, ineligible matter at the Nonprofit Standard Mail rates in violation of [703.1.0](#). Nonprofit mailers have two levels of appeal. They may appeal revenue deficiency assessments as follows:

| IF THE INITIAL REVENUE DEFICIENCY ASSESSMENT WAS MADE BY: | FIRST-LEVEL APPEAL   | SECOND-LEVEL APPEAL AND FINAL USPS DECISION  |
|---|--|--|
| Postmaster or manager, Business Mail Entry                | PCSC   | Manager of Mailing Standards   |
| PCSC  | Manager of Mailing Standards (see <a href="#">608.8.0</a> for address) | Vice President, Pricing and Classification (see <a href="#">608.8.0</a> for address) |

All appeals must be submitted in writing within 30 days of the previous USPS decision. Any decision that is not appealed as prescribed becomes the final agency decision; no appeals are available within the USPS beyond the second appeal. [P011.5.1]

**11.2.2 Collection**

Any deficiency assessed under [11.2.1](#) that is found to be due and payable to the USPS in the final USPS decision must be paid promptly. If the USPS does not receive payment within 30 days, the USPS may deduct from the violator’s trust account or any other funds in USPS possession any deficiencies incurred within 12 months of the date of the final mailing on which the deficiency was assessed. [P011.5.2]

# 607 Mailer Compliance and Appeals of Classification Decisions

**Overview**

- [1.0 Mailer Compliance With Mailing Standards](#)
- [2.0 Rulings on Mailing Standards](#)

## 1.0 Mailer Compliance With Mailing Standards

### 1.1 Mailer Responsibility

A mailer must comply with all applicable postal standards. Despite any statement in this document or by any USPS employee, the burden rests with the mailer to comply with the laws and standards governing domestic mail. For mailings that require a postage statement, the mailer certifies compliance with all applicable postal standards when signing the corresponding postage statement. Questions on mail classification and special mail services may be directed to local USPS representatives (e.g., business mail entry managers). The Pricing and Classification Service Center (PCSC) can help local post offices answer customer questions on mailing standards (see [608.8.4](#) for address or telephone number). [G020.2.1]

### 1.2 Postage Payment

A permit imprint, bulk, or other discount rate mailing is accepted after an examination of the mailing and the accompanying postage statement prepared by the mailer. A USPS employee's signature on the postage statement and the subsequent acceptance of the mailing do not constitute verified accuracy of that statement, and do not limit the ability of the USPS to demand proper payment after acceptance when it becomes apparent such payment was not made. [G020.2.2]

### 1.3 Request for Exception to Standards

To the extent that postage rates, fees for mail services, and basic mail classification and eligibility are prescribed by federal statute or the Domestic Mail Classification Schedule, the USPS is not authorized to waive or except the corresponding DMM standards. Postmasters or managers at post offices, district or area offices, and other field facilities may not suspend or grant any waiver or exception to standards established by the USPS (e.g., regarding mail preparation) unless *specifically* authorized by the DMM. Any mailer's request for an exception to DMM standards must be referred to the PCSC (see [608.8.4](#) for address and telephone number). [G020.2.3]

## 2.0 Rulings on Mailing Standards

### 2.1 Local Decision

A mailer who disagrees with a classification decision by a local post office, whether on a pending or a proposed mailing, may send a written appeal to the postmaster within 30 days. The appeal is forwarded to the Pricing and Classification Service Center (PCSC). If the appeal concerns a ruling that mail, due to its contents, must

## 607.2.2

be entered at First-Class Mail rather than Standard Mail rates, the PCSC will forward the appeal to the manager, Mailing Standards, USPS Headquarters, who will issue the final agency decision. The PCSC will issue the final agency decision on all other appeals. Only the PCSC manager may rule on an appeal or initial request for a ruling on an exception to a USPS standard in the DMM. [G020.3.1]

**2.2 Expedited Oral Decision**

A mailer who receives an adverse ruling from a Post Office, whether on a pending or a proposed mailing, may request the PCSC manager to provide an expedited oral decision on appeal. This request for an expedited appeal may be made by telephone. If the appeal concerns a ruling that mail, due to its contents, must be entered at First-Class Mail rather than Standard Mail rates, the PCSC will forward the appeal to the manager, Mailing Standards, who will determine whether the appeal or individual questions in the appeal can be decided on an expedited basis and, if so, advise the mailer of the decision and then confirm it in writing. For all other appeals, the PCSC manager will determine whether the appeal or individual questions in the appeal can be decided on an expedited basis and, if so, advise the mailer of the determination and confirm it in writing. [G020.3.2]

**2.3 Classification While Appeal Pending**

Pending resolution of an appeal, the mailer may, by a letter to the local postmaster, request to mail under a deposit arrangement. The mailer must deposit with the postmaster enough funds to cover postage at the higher rate. If the appeal is upheld, the difference between the amount deposited and a lower rate determined to be appropriate is returned to the mailer. If the appeal is denied, the deposit is not returned. If a balance remains in the deposit after the higher rate postage is deducted, the balance is refunded at the mailer's request. [G020.3.3]

**2.4 Decisions on National Rulings**

The manager, Centralized National Cases makes mail preparation, mailpiece design, and rate eligibility decisions for customers in strategic industries as appropriate. Any mail classification decision made initially by the manager, Centralized National Cases may be appealed within 15 days to the manager, Pricing and Classification Service Center, who will issue the final agency decision. [G020.3.4]

**2.5 PCSC Decision**

Any mail classification decision made initially by the PCSC manager may be appealed within 15 days to the manager, Mailing Standards (see [608.8.0](#) for address), who has sole authority to render a decision on such appeals. [G020.3.5]

**2.6 Corresponding Standards**

Rulings and appeals concerning revenue deficiencies (on past mailings), refunds, or applications for various mailing privileges, rates, or authorizations, are subject to the corresponding standards. [G020.3.6]

## 608 Postal Information and Resources

### Overview

- [1.0 About the Domestic Mail Manual \(DMM\)](#)
- [2.0 Domestic Mail](#)
- [3.0 Post Offices and Holidays](#)
- [4.0 Philatelic \(Stamp Collecting\) Services](#)
- [5.0 Private Express Statutes](#)
- [6.0 Complaints and Postal Law Violations](#)
- [7.0 Trademarks and Copyrights of the USPS](#)
- [8.0 USPS Contact Information](#)

### 1.0 About the Domestic Mail Manual (DMM)

#### 1.1 Content of the DMM

The *Domestic Mail Manual* (DMM) contains the basic standards of the United States Postal Service (USPS) governing its domestic mail services; descriptions of the mail classes and extra services and conditions governing their use; and standards for rate eligibility and mail preparation. Domestic mail is classified by size, weight, content, service, and other factors. [G020.1.1]

#### 1.2 Copies of the DMM

The *Domestic Mail Manual* (DMM) is distributed to all post offices and is available online on the Postal Explorer web site (<http://pe.usps.com>). Copies of the DMM may be inspected during normal business hours at USPS Headquarters, area and district offices, and all domestic post offices, stations, and branches. A copy is also filed at the Office of the Federal Register, National Archives and Records Administration. The public may buy copies by subscription from the Superintendent of Documents, U.S. Government Printing Office (see [8.1](#) for address). [G020.1.3]

#### 1.3 Revisions to the DMM

The USPS reserves the right to change the standards in the *Domestic Mail Manual*. Substantive revisions are published in the *Postal Bulletin* and, when appropriate, the *Federal Register*. [G020.1.4]

#### 1.4 Terms in the DMM

Terms in the DMM referring to only one sex apply to persons of either sex. Terms referring to the singular also apply to the plural, unless the context indicates otherwise. The term *postmaster* also applies to an officer-in-charge if the postmaster position is vacant and, in district host cities, to the district manager. [G020.1.2]

608.2.1

## 2.0 Domestic Mail

### 2.1 Definition of “Domestic”

Domestic mail is mail transmitted within, among, and between the United States of America, its territories and possessions, Army post offices (APOs), fleet post offices (FPOs), and the United Nations, NY. For this standard, the term *territories and possessions* comprises the following:

---

American Samoa  
*Manua Island, Swain’s Island, Tutuila Island*

Baker Island

Guam

Howland Island

Jarvis Island

Johnston Atoll  
*East Island, Johnston Island, North Island, Sand Island*

Kingman Reef

Midway Atoll  
*Eastern Island, Sand Island, Spit Island*

Navassa Island

Northern Mariana Islands, Commonwealth of the  
*Rota Island, Saipan Island, Tinian Island*

Palmyra Atoll

Puerto Rico, Commonwealth of

U.S. Virgin Islands  
*St. Croix Island, St. John Island, St. Thomas Island*

Wake Atoll  
*Peale Island, Wake Island, Wilkes Island*

---

[G011.2.1]

### 2.2 Mail Treated as Domestic

Mail originating in the United States of America, its territories and possessions, APOs, FPOs, and the United Nations, NY, for delivery in the Freely Associated States, and mail originating in the Freely Associated States for delivery within, among, and between the Freely Associated States and the United States of

America, its territories and possessions, APOs, FPOs, and the United Nations, NY, is treated as if it were domestic mail. The term *Freely Associated States* comprises the following:

---

Marshall Islands, Republic of the

*Ebeye Island*

*Majuro Island*

Palau, Republic of

*Koror Island*

Micronesia, Federated States of

*Chuuk (Truk) Island*

*Kosrae Island*

*Pohnpei Island*

*Yap Island*

---

[G011.2.2]

## 2.3 International Mail

International mail is mail addressed to or received from foreign countries, except under 2.2. Provisions for international mail are in the *International Mail Manual*.

[G011.2.3]

## 3.0 Post Offices and Holidays

### 3.1 Management of Post Offices

#### 3.1.1 Establishment of Post Offices

The USPS establishes and maintains post offices, stations, and branches for customer convenience. [G011.1.1]

#### 3.1.2 Closing or Consolidation of Post Offices

Under 39 U.S. Code (USC) 404(b), any decision to close or consolidate a post office must be based on certain criteria. These include the effect on the community served; the effect on employees of the post office; compliance with government policy established by law that the USPS must provide a maximum degree of effective and regular postal services to rural areas, communities, and small towns where post offices are not self-sustaining; the economic savings to the USPS; and other factors that the USPS determines necessary. In addition, certain mandatory procedures apply. [G011.1.2]

#### 3.1.3 Procedures for Post Offices

The *Postal Operations Manual* contains USPS rules for discontinuing, consolidating, or suspending service at an existing post office or other postal facility; changing a post office or other postal facility name; setting public business hours of postal facilities; and using bulletin boards and handling lost articles found in public areas of postal facilities. [G011.1.3]

608.3.1.4

### 3.1.4 Military Post Offices

Military post offices (MPOs) are branches of a U.S. civil post office, operated by the Army, Navy, Air Force, or Marine Corps to serve military personnel overseas or aboard ships. The term includes Army post offices (APOs) for the U.S. Army and the U.S. Air Force and fleet post offices (FPOs) for the U.S. Navy and the U.S. Marine Corps. MPOs provide postal service for military personnel where the U.S. civil postal service does not operate and a military situation requires the service. MPOs are established or discontinued by the USPS only on request of the military department that operates them. Notice of these actions is published in the *Postal Bulletin*. Military post offices do not verify and accept bulk or discounted-rate mail; such mailings must be deposited at (nonmilitary) U.S. post offices. [G011.1.4]

### 3.2 Holiday Service

Exhibit 3.2a and Exhibit 3.2b shows the national holidays observed by the USPS and the service levels provided on those holidays for retail window, post office box, firm call, delivery, and collection services. [G011.1.5]

- a. Holidays widely observed:

|  |                  |             |              | Business          | Residential | Express Mail |                         |
| Saturday                               | Normal           | Normal      | Normal       | Normal            | Normal      | Normal       | Normal                  |
| Sunday                                 | None             | Normal      | None         | None              | None        | Normal       | None                    |
| <b>Monday (holiday)<sup>1</sup></b>    | Limited          | Sunday      | Limited      | None              | None        | Holiday      | Time decal <sup>2</sup> |

1. Veterans' Day, November 11, is the only movable holiday in the group of holidays designated as not widely observed; the other three holidays listed in section B are always observed on Mondays. When Veterans' Day falls on any day except Sunday, the services provided on that holiday are the same as those shown for Monday. When Veterans' Day falls on Sunday, the service levels are the same as those shown for Sunday; the USPS, however, observes the holiday on Monday and treats it as a Monday holiday.

2. When a holiday is observed on Monday and no residential collection is scheduled on Sunday, a full residential collection may be provided on the Monday holiday. Consecutive days without collections should be avoided.

[Exhibit G011.1.5b]

## 4.0 Philatelic (Stamp Collecting) Services

### 4.1 Basic Standards

#### 4.1.1 Philatelic Policy

A single national USPS policy governs postage stamps and postal stationery, including their release, sale, and discontinuance. [G090.1.1]

#### 4.1.2 Stamp Subjects

Subjects for commemorative postage stamps and postal stationery may be proposed by the public through correspondence to the Citizens' Stamp Advisory Committee (see 8.1 for address). The Committee reviews suggestions and makes recommendations to the postmaster general, who makes the final selections.

[G090.1.2]

#### 4.1.3 Philatelic Availability

Stamps, postal stationery, and philatelic products are sold at various types of postal retail facilities. Post offices establish special temporary stations to provide philatelic services and to sell commemorative stamps and philatelic products at activities of significant public or philatelic interest. Temporary philatelic stations may be authorized by the postmaster. Under specific circumstances, the USPS may limit or set conditions on the purchase of stamps and other forms of postage or postal stationery. [G090.1.3]

#### 4.1.4 Philatelic Mail Orders

Mail orders for postage stamps of selected quality and other philatelic items must be directed to Stamp Fulfillment Services. Post offices do not fill mail orders for stamps and other philatelic items other than orders under the stamps-by-mail program and for locally precanceled stamps. Customers must provide a self-addressed stamped envelope for the return of precanceled stamps. [G090.1.4]

608.4.1.5

#### 4.1.5 Philatelic Postmarking

Postmarking for philately is provided at the request of collectors or cover servicers for postmarking outside ordinary mail processing. The *Postal Operations Manual* contains USPS policy on philatelic postmarking, including cancellation devices, types of postmarks or cancelations, first day covers, postal cacheted envelopes, and service conditions. [G090.1.5]

## 4.2 Special Cancelations

### 4.2.1 Description of Special Cancelations

Special cancelations are machine cancelations in which a caption publicizing an event is engraved on a die hub used to cancel mail. They may be used only in post offices with 190 or more revenue units for canceling large volumes of mail. Special cancelations are authorized only if the scheduled observance either is for a national purpose for which Congress has made an appropriation or is of general public interest and importance for a definite period and not conducted for private gain or profit. [G090.2.1]

### 4.2.2 Prohibitions for Special Cancelations

Special cancelations are not authorized for events of interest primarily to a particular local group; fraternal, political, religious, service, commercial, or trade organizations; campaigns or events promoting the sale or use of private products or services; idea or slogan promotions not directly connected with an event of general public interest and importance; post office anniversaries; recruitment programs; or events that occur during a period when all canceling machines in the post office are scheduled for other special cancellation die hubs. [G090.2.2]

### 4.2.3 Applying to Use Special Cancelations

A written application for a special cancellation die hub must be submitted to the postmaster at the post office where the special cancellation is to be used. The application must be submitted by the sponsor at least 4 months before the date the special cancellation is to be used. The application must provide this information:

- a. Complete description and schedule of the event to be observed; evidence that the event is not for private gain or profit; and the name, address, and telephone number of the sponsor to be billed for the cost of manufacturing the die hubs.
- b. The wording of the special cancellation, which must be standardized and approved by the sponsor's national headquarters when the sponsor is an affiliate or local chapter of a national organization. Standardized requests for national events must be forwarded to the manager of Mailing Standards (see 8.1 for address.) *Space available for the wording is limited to three lines of not more than 20 letters, numbers, or spaces each. Illustrations or designs may not be used. The wording must directly reflect the event to be commemorated.*
- c. Post office name and telephone number where the cancellation is to be used, number of die hubs required, and the requested period of use. [G090.2.3]

### 4.2.4 Sponsor Payment for Special Cancelations

The sponsor must pay the cost of manufacturing the special cancellation die hub and any cost incurred for installing the hub or in adapting canceling machines for its use. [G090.2.4]

**4.2.5 Time Limit on Use of Special Cancellations**

Use of a special cancellation may not exceed 6 months. A special cancellation approved on an annual basis is limited to one 60-day period for each year. A request must be submitted for reuse of recurring annual cancellations 3 months before the date the sponsor wants the cancellation to be used again. For national cancellations, a single request from the national sponsor suffices. [G090.2.5]

**4.2.6 Revocation of Special Cancellations**

Use of any special cancellation may be curtailed or revoked when it is necessary to use special postmarking dies for USPS purposes. [G090.2.6]

**4.2.7 After Use of Special Cancellations**

Used die hubs may not be given to sponsors or transferred to another post office. A request from the sponsor that a special cancellation die hub be kept for an appropriate purpose (e.g., placement in a museum, library, or historical site) may be approved by the manager of Mailing Standards (see 8.1 for address). [G090.2.7]

**4.2.8 Information about Special Cancellations**

More information about special cancellations is in the *Postal Operations Manual*. [G090.2.8]

**4.2.9 Mail Submitted for Special Cancellations**

A mailer must affix First-Class postage to mail that the mailer wants canceled with a special cancellation. The mail must bear a complete address. Stamps issued by foreign countries are not permitted on the mail. Mail bearing the special cancellation will not be enclosed in another envelope for return even if a postage-paid envelope is provided by the customer. Damaged envelopes canceled with a special cancellation are not replaced. [G090.2.9]

**5.0 Private Express Statutes****5.1 Private Express Statutes****5.1.1 Legal Foundation**

By the laws known as the Private Express Statutes, Congress has generally conferred on the USPS the exclusive right to carry letters for others over post routes. USPS regulations under the Private Express Statutes are in the Code of Federal Regulations, 39 CFR 310 and 320, as amended by final rules published in the *Federal Register*. These regulations take precedence over all prior rulings and USPS publications. Copies of the regulations are available from the manager of the Pricing and Classification Service Center (PCSC) (see 8.4 for address). [G011.4.1]

**5.1.2 Definition of a Letter for Private Express**

For the Private Express Statutes, a *letter* is a message directed to a specific person or address and recorded in or on a tangible object. A *message* consists of any information or intelligence that can be recorded on tangible objects including, but not limited to, paper in sheet or card form, recording disks, and magnetic tapes. Certain matter is excluded from the definition of letter, e.g.: telegrams; checks and certain other instruments shipped to, from, or between financial institutions; newspapers; and periodicals. The regulations detail exclusions. [G011.4.2]

608.5.1.3

**5.1.3 Postage for Private Express**

If the proper postage is paid, letters may be privately carried without violating the Private Express Statutes. The regulations detail compliance. Under certain circumstances, letters may be privately carried without paying postage. The principal exceptions cover letters sent with, and related in all substantial respects to, some part of the cargo or to the ordering, shipping, or delivering of the cargo; letters carried by the senders or the recipients, or by their regular salaried employees; and letters carried to or from a postal facility where they are to be or have been carried in the mail. The regulations detail exceptions. [G011.4.3]

**5.1.4 Suspensions of Private Express Statutes**

Limited suspensions of the Private Express Statutes specify the conditions under which: (a) private couriers may carry data-processing materials, international ocean carrier documents, extremely urgent letters, and advertisements incidental to the shipment of accompanying merchandise or periodicals; and (b) universities and colleges may carry the letters of their bona fide student and faculty organizations. Carriers wanting to use the suspension for data-processing materials must file a notice of their intention on a form available from the manager of the PCSC. [G011.4.4]

**5.1.5 Violations of Private Express Statutes**

The PCSC reviews initial reports of possible violations of the Private Express Statutes. When warranted by the facts, possible violations are forwarded to the USPS General Counsel for further action. [G011.4.5]

**5.1.6 Legal Advice for Private Express**

The public and USPS employees can obtain authoritative advice on the Private Express Statutes, including written advisory opinions, by contacting the Senior Counsel, Ethics and Information, USPS Headquarters (see 8.4 for address and telephone number). [G011.4.6]

## 6.0 Complaints and Postal Law Violations

**6.1 Consumer Complaints and Inquiries**

Any postal customer may complain or inquire about postal products, services, or employees at any post office or directly to the USPS Consumer Advocate (see 8.1 for address). A complaint or inquiry may be made in person, by telephone, by e-mail, or by letter. A complaint or inquiry about the handling of a specific piece of mail should include the related envelope or wrapper and copies of all postal forms filed. A customer who is dissatisfied with the local handling of a complaint or inquiry may send a written appeal to the Consumer Advocate. A court of law can require such appeal as a legal prerequisite for hearing a customer's suit against the USPS. [G011.3.0]

**6.2 Postal Law Violations**

Instructions on mail security as it relates to unauthorized opening, inspection, tampering, or delay of mail are in *Administrative Support Manual 274*. Information and complaints on a possible postal law violation must be sent to the appropriate address according to the ZIP Code ranges shown below:

| ZIP CODES  | ADDRESS  |
|--|--|
| 003-079, 08005, 08006, 08008, 08050, 08087, 08092, 08501-08504, 08506-08510, 08512-08514, 08516, 08517, 08519-08553, 08555-08561, 08600-08639, 08642-08691, 087-098, 100-149 | Postal Inspection Service<br>PO Box 2613<br>Jersey City NJ 07303-2613              |

[G013.1.1]

608.7.1.2

**7.1.2 Use of Registered Marks**

USPS trademarks must be used in the form listed in [7.1.1](#). Proper use of USPS registered marks requires capitalizing the initial letters of the marks to distinguish them from terms not used as trademarks. Words and phrases that are registered trademarks may also use the registration symbol ®. Figures that are registered marks must always use the registration symbol. (An exception to this rule is the USPS emblem used on letterheads and business cards. All other uses of the emblem must include the ®.) [G013.1.2]

**7.1.3 Proposed or Pending Registration**

The USPS has additional trademarks not yet registered. The rules in [7.1.2](#) apply to these common law marks, except that such marks are not to be identified by the symbol ®. Instead, the superscript initials ™ may be used to identify these marks. The common law USPS trademarks and service marks for which registration is pending or proposed include the Express Mail International Service logotype, Presort, Registered Mail, and Standard Mail. [G013.1.3]

**7.2 Copyrights****7.2.1 Copyrighted Material**

The USPS secures copyrights in its philatelic designs and certain publications. The designs of postage stamps, stamped envelopes, stamped cards, aerogrammes, souvenir cards, and other philatelic items issued on or after January 1, 1978, are copyrighted by the USPS under title 17 USC. [G013.2.1]

**7.2.2 Permitted Use of Copyrighted Material**

The use of illustrations of the designs covered by such copyrights is permitted:

- a. In editorial matter in newspapers, magazines, journals, books, philatelic catalogs, and philatelic albums.
- b. In advertising matter, circulars, or price lists for the sale of the postal items illustrated.
- c. In advertising matter, circulars, or price lists for the sale of newspapers, magazines, journals, books, philatelic catalogs, and philatelic albums containing illustrations of philatelic designs.
- d. In motion-picture films, microfilms, slides, or electronic tape for projection on a screen or for use in telecasting. No print or other reproduction from such films, slides, or tapes may be made except for the uses permitted in this section.

[G013.2.2]

**7.2.3 Design Reproductions of Copyrighted Material**

Illustrations permitted by [7.2.2a](#) through [7.2.2d](#) may be in color or in black and white, and may depict philatelic items as uncanceled or canceled. When depicting uncanceled items in color, illustrations must be less than 75% or more than 150% in linear dimension of the size of the design of the philatelic items as issued. Color illustrations of canceled philatelic items and black and white illustrations of uncanceled or canceled philatelic items may be in any size. [G013.2.3]

**7.2.4 License Request for Copyrighted Material**

The USPS may grant licenses for the use of illustrations of its copyright designs and registered trademarks outside the scope of the above permission. A request for such a license must be sent to the manager, Licensing, Public Affairs and Communications (see 8.1 for address). [G013.2.4]

**7.2.5 Publication 65 Copyright**

The USPS copyrights each edition of Publication 65, *National Five-Digit ZIP Code and Post Office Directory*, to protect the accuracy and integrity of the ZIP Code information distributed to the public. The USPS licenses publishers on a nonexclusive basis to reproduce and sell Publication 65 or parts thereof, if the parts cover a complete state or a combination of states and include full ZIP Code information for multi-ZIP Coded post offices. Licensees must comply with the terms of the licensing agreements. The licenses are issued on an annual basis and may be renewed. [G013.2.5]

**7.3 Inquiries about USPS Trademarks and Copyrights**

Inquiries about USPS copyrights or use of USPS trademarks and service marks, copyright materials, and intellectual property other than patents and technical data rights in USPS contracts must be sent to USPS Stamp Development. Inquiries about licenses to publish or reproduce ZIP Code information must be sent to the National Customer Support Center (see 8.1 for address). [G013.3.0]

# 609 Filing Indemnity Claims for Loss or Damage

## Overview

- [1.0 General Filing Instructions](#)
- [2.0 Providing Proof of Loss or Damage](#)
- [3.0 Providing Evidence of Insurance and Value](#)
- [4.0 Claims](#)
- [5.0 Compensation](#)
- [6.0 Adjudication of Claims](#)

## 1.0 General Filing Instructions

### 1.1 Extra Services With Indemnity

A customer may file an indemnity claim for insured, collect on delivery (COD), registered with postal insurance, or Express Mail. Inquiries on uninsured Registered Mail may be filed as detailed in [503.2.0](#). [S010.1.0]

### 1.2 Bulk Insured Claims

Mailers authorized to mail at bulk insured rates under [503.4.0](#) will receive instructions for filing claims from their postmaster or designee, including specific claim numbers to be used when filing claims. At some time in the future, electronic filing of indemnity claims will become mandatory. Prior to mandatory electronic claims filing, customers will be provided with the format instructions for the new electronic (soft copy) of Form 3877 and instructions for electronic filing of indemnity claims. [S010.5.0]

### 1.3 Who May File for Loss or Damage

A claim may be filed by:

- a. Only the mailer, for the complete loss of an unnumbered retail insured mail article or article insured online for \$50 or less.
- b. Either the mailer or addressee who is in possession of the original mailing receipt, for the complete loss of a numbered insured mail (purchased through USPS retail channels), Registered Mail, COD, or Express Mail article.
- c. Either the mailer or addressee who is in possession of the online label record or computer printout of the Web-based application as described in [3.1e](#), for the complete loss of an article insured online for more than \$50 up to \$200.
- d. Either the mailer or addressee, for damage or loss of some or all of the contents of an article for both retail insured mail and mail for which insurance is purchased online.
- e. Only the merchandise return permit holder, for merchandise return service (MRS) parcels that are registered or insured as indicated by the permit holder on the MRS label.
- f. Only the mailer, for bulk insured service mail. [S010.2.1]

609.1.4

**1.4 When to File for Loss or Damage**

A customer should file a claim immediately, but must file no later than 60 days from the date of mailing, when the contents of an article are damaged or missing from the mailing container. For a lost article, a customer must file a claim within the time limits in the chart below.

| MAIL TYPE OR SERVICE   | WHEN TO FILE (FROM MAILING DATE) |               |
|--|----------------------------------|---------------|
|  | No Sooner Than                   | No Later Than |
| Insured Mail   | 21 days                          | 180 days      |
| COD  | 45 days                          | 180 days      |
| Registered Mail  | 15 days                          | 180 days      |
| Registered COD   | 45 days                          | 180 days      |
| Express Mail   | 7 days                           | 90 days       |
| Express Mail COD   | 45 days                          | 90 days       |
| APO/FPO Insured Mail<br>(First-Class Mail, SAM, PAL, or COD) | 45 days                          | 180 days      |
| APF/FPO Insured Mail (Surface Only)                          | 75 days                          | 180 days      |

[S010.2.2]

**1.5 Where to File for Loss or Damage**

A claim may be filed:

- a. At any post office, station, or branch, except for Registered Mail articles with merchandise return service.
- b. Only at the post office where the merchandise return permit is held, for Registered Mail articles with merchandise return service. [S010.2.3]

**1.6 How to File for Loss or Damage**

A customer may file a claim by presenting evidence of insurance, evidence of value, proof of damage, and for unnumbered insured mail claims only, proof of loss. (Proof of loss is not required for numbered insured mail, Registered Mail, COD, or Express Mail claims.) If the article was mailed Express Mail COD or Registered Mail COD, the claimant must provide both the original COD receipt with either the Express Mail or the Registered Mail receipt. The customer must complete the applicable portions of Form 1000. [S010.2.4]

**1.7 Filing Duplicate Claims for Loss or Damage**

A customer must file any duplicate claim no sooner than 30 days and no later than 60 days from the date the original claim was filed. [S010.2.10]

**2.0 Providing Proof of Loss or Damage****2.1 Missing Contents**

If a claim is filed because some or all of the contents are missing, the addressee must present the mailing container, including any wrapping, packaging, and any contents that were received, to the USPS with the claim. Failure to do so will result in denial of the claim. [S010.2.7]

## 2.2 Proof of Damage

If the addressee files the claim, the addressee must present the damaged article and mailing container, including any wrapping, packaging, and any other contents that were received, to the USPS for inspection. If the mailer files the claim, the St. Louis ASC will notify the addressee by letter to present the damaged article and mailing container, including any wrapping, packaging, and any other contents that were received, to the USPS for inspection. Failure to do so will result in denial of the claim. [S010.2.8]

## 2.3 Proof of Loss

The mailer must provide proof of loss for unnumbered insured mail and for items insured for \$50 or less online. Proof of loss is not required for numbered insured mail, Registered Mail, COD, or Express Mail claims. The mailer must present written and signed documentation from the addressee (such as a letter), dated at least 21 days from the date of mailing, stating the addressee did not receive the article. For items with insurance purchased online, the lack of a delivery scan is used to validate proof of loss. [S010.2.9]

# 3.0 Providing Evidence of Insurance and Value

## 3.1 Evidence of Insurance

For a claim involving insured, COD, registered, or Express Mail service, the customer must present any of the following evidence showing that the particular service was purchased:

- a. The original mailing receipt issued at the time of mailing (retail insured mail, Registered Mail, and COD receipts must contain a USPS postmark). Reproduced copies are not acceptable.
- b. The wrapper showing the names and addresses of the sender and the addressee and the proper mail endorsement, tag, or label showing that the article was sent insured, COD, registered with postal insurance, or Express Mail. If only the wrapper is submitted, indemnity can be limited to \$100 for insured, \$50 for COD, \$100 for Registered Mail, and \$100 for Express Mail.
- c. For Express Mail items accepted for mailing under an Express Mail Manifesting agreement in [705.2.0](#), a copy of the manifest page showing the Express Mail label number for the item in question; the manifest summary page for the date the piece was mailed; a copy of Form 3152-E, *Express Mail Manifesting Certification*, round-dated by the accepting post office; and a copy of the EMCA monthly statement that lists the label number and postage for the mailpiece. If the customer purchased additional insurance, a copy of the round-stamped Form 3877, *Firm Mailing Book for Accountable Mail*, must also be submitted.
- d. For retail insurance the original sales receipt from the USPS listing the mailing receipt number and insurance amount, if the original mailing receipt is not available. Reproduced copies of the USPS sales receipt are not acceptable.
- e. For insurance purchased online, the mailer has access to an electronic record and may print a record as follows:

## 609.3.2

1. A computer printout from the Web-based application through which the label was printed and insurance was purchased. The printout must clearly identify the following information: the Delivery Confirmation or Signature Confirmation services number of the insured parcel, total postage paid, insurance fee paid, declared value, declared mailing/shipping date, origin ZIP Code, and delivery ZIP Code.
2. A printed online label record. [S010.2.5]

**3.2 Evidence of Value**

The customer, either the mailer or the addressee, must submit acceptable evidence to establish the cost or value of the article at the time it was mailed. (Other evidence may be requested to help determine an accurate value.) Examples of acceptable evidence are:

- a. Sales receipt, invoice or bill of sale, or statement of value from a reputable dealer.
- b. For items valued up to \$100, the customer's own statement describing the lost or damaged article and including the date and place of purchase, the amount paid, and whether the item was new or used (only if a sales receipt or invoice is not available). If the article mailed is a hobby, craft, or similar handmade item, the statement must include the cost of the materials used in making the item. The statement must describe the article in sufficient detail to determine whether the value claimed is accurate.
- c. Picture from a catalog showing the value of a similar article (only if a sales receipt, invoice, or statement of value from a reputable dealer is not available). The date and place of purchase must be included.
- d. Paid repair bills; if the claim is for partial damage, estimates of repair costs or appraisals from a reputable dealer. Repair costs may not exceed the original purchase price.
- e. Receipt or invoice for the costs incurred to buy a surety bond required to reissue a lost item.
- f. Receipt or invoice of costs incurred for the reconstruction of nonnegotiable documents.
- g. A copy of a canceled check, money order receipt, credit card statement, or other documentation indicating the amount paid. For Internet purchases, a copy of the front and back of the canceled check, money order, or a copy of the credit card billing statement is required.
- h. For Internet transactions conducted through a Web-based payment network that offers payment services through a stored value account, provide a computer printout of the online transaction identifying the purchaser and seller, price paid, date of transaction, description of item purchased, and assurance that the transaction status is completed. The printout must clearly identify the Web-based payment network provider through which the Internet transaction was conducted. [S010.2.6]

## 4.0 Claims

### 4.1 Payable Claim

Insurance for loss or damage to insured, registered, or COD mail within the amount covered by the fee paid or within the indemnity limits for Express Mail as explained in 4.2 is payable for the following:

- a. Actual value of lost articles at the time and place of mailing (see 4.1n for bulk insured articles).
- b. Cost of repairing a damaged article or replacing a totally damaged article not exceeding actual value of the article at the time of mailing.
- c. Remittance due on a COD parcel not received by the sender, subject to the limitations set by the standards for COD service.
- d. Reasonable costs incurred duplicating documents such as:
  1. Copying service.
  2. Notary fees.
  3. Bonding fees for replacement of stock or bond certificates.
  4. Reasonable attorney's fees if required to replace the lost or damaged documents.
  5. Other direct and necessary expense or cost, as determined by the USPS.
  6. Face value of negotiable documents that cannot be reconstructed up to the amount of insurance coverage bought, but not to exceed the \$25,000 maximum amount of insurance coverage available if sent by Registered Mail.
- e. Extra cost of gift wrapping, if the gift-wrapped article was enclosed in another container when mailed.
- f. Cost of outer container, if designed and constructed for the article sent.
- g. Fair market value of stamps and coins of philatelic or numismatic value, as determined by a recognized stamp or coin dealer or current coin and stamp collectors newsletters and trade papers.
- h. Federal, state, or city sales tax paid on articles lost or totally damaged.
- i. Postage (not fee) paid for sending damaged articles for repair. (The USPS must be used for this purpose. Other reasonable transportation charges may be included if the USPS is not available.)
- j. Cost of film stock or blank tape for photographic film, negatives, slides, transparencies, videotapes, laser disks, x-rays, magnetic resonance imaging (MRI) prints, computerized axial tomography (CAT) scan prints, etc.
- k. Cost of bees, crickets, or baby poultry destroyed by *physical* damage to the package or delay for which the USPS is responsible. (In the absence of definite evidence showing responsibility for death of these insects or animals, the USPS is presumed to be at fault if 10% or more are dead on delivery, and pays indemnity for all dead bees, crickets, or poultry; if less than 10%, the USPS is not presumed to be at fault.)

609.4.2

- l. Cost of filing a lost ticket report with the airline.
- m. Per page copying cost of lost or damaged blueprints, schematics, etc.
- n. For bulk insured articles, indemnity is provided for the lesser of (1) the actual value of the article at the time of mailing or (2) the wholesale cost of the contents to the sender. [S010.2.11]

#### 4.2 Payable Express Mail Claim

In addition to the payable claims in 4.1, *Payable Claim*, the following are payable for Express Mail:

- a. For Express Mail insurance, nonnegotiable documents are insured against loss, damage, or rifling while in transit. Coverage is limited to \$100 per piece (the unit on which postage is paid), subject to a maximum limit per occurrence as provided in 4.2a4. Claims for document reconstruction insurance must be supported by a statement of expense incurred in reconstruction. For this standard, while in transit begins when the USPS receives custody of the insured material and ends when the material is delivered to the addressee or, if undeliverable, when the sender receives the material on return. Nonnegotiable documents include audit and business records, commercial papers, and such other written instruments for the conduct and operation of banks and banking institutions that have not been made negotiable or cannot be negotiated or converted into cash without forgery. Nonnegotiable documents can be in print, disk, tape, microfilm, or other forms of data storage. Articles such as artwork, collector or antique items, books, pamphlets, readers proofs, repro proofs, separation negatives, engineering drawings, blueprints, circulars, advertisements, film, negatives, and photographs are considered merchandise, not documents. Indemnity for document reconstruction is paid as follows:
  - 1. For payments made (or which are payable) for reasonable costs incurred in the reconstruction of the exact duplicate of a lost or damaged nonnegotiable document. Indemnity is not paid for the cost of preparing the document mailed, or for the mailer's time in preparing the document mailed or reconstructed. Except for the per page copying cost, indemnity is not paid for documents if copies of the lost document are available or if they could have been made before mailing.
  - 2. Reasonable reconstruction expenses incurred or obligated between the time of guaranteed or scheduled delivery and actual delivery.
  - 3. Loss sustained by the use of funds to maintain cash balances during the period of document reconstruction (based on the applicable Federal Reserve discount rate). The period begins at the scheduled delivery time and may not exceed 15 days.
  - 4. Catastrophic loss for multiple Express Mail items, such as a major fire, limited to \$5,000, regardless of the number of Express Mail items, or the identity or number of customers involved. Each claim resulting from a catastrophic loss first is adjudicated individually. If the preliminary adjudication exceeds \$5,000, the percentage of the sum represented by

each individual settlement is applied to the \$5,000 to determine each claimant's pro rata share of the final settlement, not to exceed \$100 per piece.

- b. Merchandise insurance coverage is provided against loss, damage, or rifling and is limited to \$100. (Additional insurance, up to a maximum liability of \$5,000, may be purchased for merchandise valued at more than \$100.)
- c. For negotiable items, currency, or bullion, the maximum indemnity is \$15.  
[S010.2.12]

#### 4.3 Nonpayable Claims

Indemnity is not paid for insured mail, Registered Mail, COD, or Express Mail in these situations:

- a. Evidence of insurance coverage not provided.
- b. Loss, rifling, or damage occurred after delivery by the USPS.
- c. Claim based solely on sentimental rather than actual value.
- d. Requested replacement value exceeded actual value at the time and place of mailing.
- e. The contents of film (e.g., positives, negatives, slides, transparencies, videotapes, laser disks, x-rays, magnetic resonance imaging (MRI) prints, computerized axial tomography (CAT) scan prints), the cost of creating or re-creating these items, or the photographer's time and expense in taking the photographs.
- f. Loss resulted from delay of the mail, except under [4.2a2, Payable Express Mail Claim](#).
- g. Consequential loss claimed rather than the actual value of the article.
- h. Perishable contents froze, melted, spoiled, or deteriorated.
- i. Damage by abrasion, scarring, or scraping to articles not properly wrapped for protection.
- j. Death of baby poultry caused by shipment to points where delivery could not be made within 72 hours from the time of hatching, unless it is determined that transportation was in place to achieve the 72-hour target.
- k. Death of honeybees, crickets, and harmless live animals not the fault of the USPS (mailability of these insects and animals is subject to [601.9.0, Perishables](#)).
- l. The sender or addressee failed to cooperate in the completion of required claim forms.
- m. Fragile nature of article prevented its safe carriage in the mail, regardless of packaging.
- n. Personal time required to replace documents.
- o. Claim filed after the article transported outside the USPS.
- p. Damage caused by shock, transportation environment, or x-ray, without evidence of damage to the mailing container.

## 609.4.3

- q. Mail article or part or all of its contents officially seized while in the military postal system overseas.
- r. Negotiable items (defined as instruments that can be converted to cash without resort to forgery), currency, or bullion valued in total at more than \$15 per shipment sent by Express Mail, except under 4.2c.
- s. Consequential loss of Express Mail claimed, except under 4.2a3.
- t. Nonmailable items, prohibited items, or restricted items not prepared and mailed according to postal standards, or any item packaged in such a manner that it could not have reached its destination undamaged in the normal course of the mail.
- u. Loss or damage caused by employees or agents of the sender or addressee.
- v. Radioactive injury, electrical or magnetic injury, or erasure of electrical recordings.
- w. War, insurrection, or civil disturbance, or seizure by any agency of government.
- x. Loss after items signed for by the addressee, the addressee's agent, or delivery employee if authorized under the applicable standards.
- y. Items sent COD without the addressee's consent.
- z. Adult birds in Express Mail with no physical damage to the container.
- aa. Cost incurred for estimates and appraisals.
- ab. Lottery tickets, sweepstakes tickets, contest entries, and similar items.
- ac. Mailer refuses to accept delivery of the parcel on return.
- ad. Mail not bearing the complete names and addresses of the mailer and addressee, or is undeliverable as addressed to either the addressee or the mailer.
- ae. Event or transportation tickets (e.g., concert, theater, sport, airline, bus, train, etc.) received after the event date. Such items are insured for loss, but not for delay or receipt after the event date for which they were purchased unless sent by Express Mail and the delay is attributable solely to the failure to meet the guaranteed delivery standard under the terms and conditions for the Express Mail service selected.
- af. Software installed onto computers that have been lost or damaged.
- ag. Damaged articles not claimed within the time limits in the *Postal Operations Manual*.
- ah. Personal time used to make hobby, craft, or similar handmade items.  
[S010.2.14]

## 5.0 Compensation

### 5.1 Payment Limitation

The USPS does not make payment for more than the actual value of the article (or, for bulk insurance, the wholesale cost of the contents to the sender if a lesser amount) nor make payment for more than the maximum amount covered by the fee paid. [S010.2.13]

### 5.2 Depreciation

The USPS depreciates a used article either lost or damaged based on the life expectancy of the article. [S010.2.15]

### 5.3 Insufficient Fee

If, through an established error by the USPS, a fee was charged for less than that required to pay for the amount of insurance coverage requested at the time of mailing, the sender may pay the difference. Indemnity may be paid within the limit fixed for the higher fee. This applies only to the insurance fee when the article is insured. An additional fee may not be paid to register an article previously sent by insured mail, to buy insurance on mail sent as uninsured registered, or to increase the indemnity on the registered article. The declared value must already be noted on Form 3806 or Form 3813-P. Customers must complete all entries on Form 3877 or facsimile. [S010.3.1]

### 5.4 Loss or Total Damage

If the insured, registered, or COD article is lost or the entire contents totally damaged, the payment includes an additional amount for the postage (not fee) paid by the sender. Postage for Express Mail is refunded under [503.1.0](#). [S010.3.2]

### 5.5 Dual Claim

If the mailer and the addressee both claim insurance and cannot agree on which one should receive the payment, any payment due is made to the mailer unless the claim has already been paid to the addressee upon presentation of the original mailing receipt. [S010.3.3]

### 5.6 Incompetent or Deceased

If the payee is incompetent or deceased, payment is made to the legal representative. If there is no legal representative, payment can be made at the discretion of the USPS. [S010.3.4]

### 5.7 Recovered Article

If a lost registered, insured, COD, or Express Mail article is recovered after payment of a claim, the payee may accept the article and reimburse the USPS for the full amount paid if the article is undamaged. If the article is damaged, has depreciated, or has missing contents, the payee may accept it and reimburse the USPS in an amount set by the Consumer Advocate, USPS Headquarters. [S010.3.5]

609.6.1

## 6.0 Adjudication of Claims

### 6.1 Initial Adjudication of Claims

The St. Louis Accounting Service Center (ASC) adjudicates and pays or disallows all domestic claims, except the initial adjudication of domestic retail unnumbered insured claims that are not bulk insured service, claims for insurance purchased online for \$50 or less, and claims appealed under 6.3. Domestic retail unnumbered insured claims, except for bulk insured service, and claims for insurance purchased online for \$50 or less are adjudicated and paid locally at the post office accepting the claims. [S010.4.1]

### 6.2 Appealing a Claim Decision

A customer may appeal a claim decision by filing a written appeal within 60 days of the date of the original decision. Except for an unnumbered insured article, the customer must send the appeal directly to Claims Appeals (see 608.8.0 for address). For an unnumbered insured article, the customer must send the appeal to the post office where the claim was filed. That post office forwards the appeal to the manager of Claims Appeals at the St. Louis ASC.  
[S010.4.2]

### 6.3 Final USPS Decision of Claims

If the manager of Claims Appeals at the St. Louis ASC sustains the denial of a claim, the customer may submit an additional appeal within 60 days for final review and decision to the Consumer Advocate, USPS Headquarters (see 608.8.0 for address), who may waive standards in 609 in favor of the customer. [S010.4.3]

## Overview

- 1.0 Nonprofit Standard Mail
- 2.0 Overseas Military Mail
- 3.0 Department of State Mail
- 4.0 Mail Sent by U.S. Armed Forces
- 5.0 Free Matter for the Blind and Other Physically Handicapped Persons
- 6.0 Official Mail (Franked)
- 7.0 Official Mail (Penalty)
- 8.0 Absentee Balloting Materials
- 9.0 Mixed Classes

## 1.0 Nonprofit Standard Mail

### 1.1 Basic Standards

#### 1.1.1 Organization Eligibility

Only organizations that meet the standards in [1.2, Qualified Nonprofit Organizations](#), or [1.3, Qualified Political Committees and State or Local Voting Registration Officials](#), and that have received specific authorization from the USPS may mail eligible matter at any Nonprofit Standard Mail rate, including Nonprofit Enhanced Carrier Route rates. [E670.1.1]

#### 1.1.2 Separate Authorizations

Except for mailings deposited under the plant-verified drop shipment postage payment system (see [705.15.0](#)), a separate authorization is required at each post office where Nonprofit Standard Mail rate mailings are deposited. [E670.1.2]

#### 1.1.3 Discounts

Pieces mailed at the Nonprofit Standard Mail rates must meet the standards in [243](#), [343](#), or [443](#) and the corresponding standards for any other discount or rate claimed. [E670.1.3]

### 1.2 Qualified Nonprofit Organizations

#### 1.2.1 General

An organization described in [1.2.3](#) through [1.2.10](#) may be authorized to mail at the Nonprofit Standard Mail rates if it is not organized for profit and none of its net income accrues to the benefit of any private stockholder or individual. [E670.2.1]

#### 1.2.2 Primary Purpose

The standard of *primary purpose* used in the definitions in [1.2.3](#) through [1.2.10](#) requires that the organization be both organized and operated for the primary purpose. Organizations that incidentally engage in qualifying activities do not meet the primary purpose test. [E670.2.2]

## 703.1.2.3

**1.2.3 Religious**

A *religious organization* is a nonprofit organization whose primary purpose is to:

- a. Conduct religious worship (e.g., churches, synagogues, temples, or mosques);
- b. Support the religious activities of nonprofit organizations whose primary purpose is to conduct religious worship; or
- c. Further the teaching of particular religious faiths or tenets, including religious instruction and the dissemination of religious information. [E670.2.3]

**1.2.4 Educational**

An *educational organization* is a nonprofit organization whose primary purpose is the instruction or training of individuals for improving or developing their capabilities or the instruction of the public on subjects beneficial to the community. An organization may be educational even though it advocates a particular position or viewpoint, as long as it presents a sufficiently full and fair exposition of the pertinent facts to permit the formation of an independent opinion or conclusion. Conversely, an organization is not considered educational if its principal function is the mere presentation of unsupported opinion. These are examples of educational organizations:

- a. An organization (e.g., a primary or secondary school, a college, or a professional or trade school) that has a regularly scheduled curriculum, a regular faculty, and a regularly enrolled body of students in attendance at a place where educational activities are regularly carried on.
- b. An organization whose activities consist of presenting public discussion groups, forums, panels, lectures, or similar programs, including on radio or television.
- c. An organization that presents a course of instruction by correspondence or through the use of television or radio.
- d. Museums, zoos, planetariums, symphony orchestras, and similar organizations. [E670.2.4]

**1.2.5 Scientific**

A *scientific organization* is a nonprofit organization whose primary purpose is to conduct research in the applied, pure, or natural sciences or to disseminate technical information dealing with the applied, pure, or natural sciences. [E670.2.5]

**1.2.6 Philanthropic (Charitable)**

A *philanthropic (charitable) organization* is a nonprofit organization organized and operated to benefit the public. Examples include those that are organized to relieve the poor, distressed, or underprivileged; to advance religion, education, or science; to erect or maintain public buildings, monuments, or works; to lessen the burdens of government; or to promote social welfare for any of the above purposes or to lessen neighborhood tensions, eliminate prejudice and discrimination, defend human and civil rights secured by law, or combat community deterioration and juvenile delinquency. That an organization organized and operated to relieve indigent persons may receive voluntary contributions from those persons does not necessarily make it ineligible for Nonprofit Standard Mail rates as a philanthropic organization. That an organization, in carrying out its primary purpose, advocates

social or civic changes or presents ideas on controversial issues to influence public opinion and sentiment to accept its views, does not necessarily make it ineligible for Nonprofit Standard Mail rates as a philanthropic organization. [E670.2.6]

#### **1.2.7 Agricultural**

An *agricultural organization* is a nonprofit organization whose primary purpose is the betterment of the conditions of those engaged in agricultural pursuits, the improvement of the grade of their products, and the development of a higher degree of efficiency in agriculture; or the collection and dissemination of information or materials about agriculture. The organization may further and advance agricultural interests through educational activities; by holding agricultural fairs; by collecting and disseminating information about cultivation of the soil and its fruits or the harvesting of marine resources; by rearing, feeding, and managing livestock, poultry, bees, etc.; or by other activities related to agricultural interests. [E670.2.7]

#### **1.2.8 Labor**

A *labor organization* is a nonprofit organization whose primary purpose is the betterment of the conditions of workers. Labor organizations include, but are not limited to, organizations in which employees or workers participate, whose primary purpose is to deal with employers on grievances, labor disputes, wages, hours of employment, working conditions, etc. (e.g., labor unions and employee associations). [E670.2.8]

#### **1.2.9 Veterans**

A *veterans' organization* is a nonprofit organization of veterans of the armed services of the United States, or an auxiliary unit or society of, or a trust or foundation for, any such post or organization. [E670.2.9]

#### **1.2.10 Fraternal**

A *fraternal organization* is a nonprofit organization whose primary purpose is fostering fellowship and mutual benefits among its members. For this standard, a qualified fraternal organization must also be organized under a lodge or chapter system with a representative form of government; must follow a ritualistic format; and must be composed of members elected to membership by vote of the members. Qualifying fraternal organizations include the Masons, Knights of Columbus, Elks, and college fraternities or sororities, and may have members of either or both sexes. Fraternal organizations do not encompass such organizations as business leagues, professional associations, civic associations, or social clubs. [E670.2.10]

### **1.3 Qualified Political Committees and State or Local Voting Registration Officials**

#### **1.3.1 Political Committees**

These political committees may be authorized to mail at the Nonprofit Standard Mail rates without regard to their nonprofit status:

- a. A national committee of a political party.
- b. A state committee of a political party.
- c. The Democratic Congressional Campaign Committee.
- d. The Democratic Senatorial Campaign Committee.

## 703.1.3.2

- e. The National Republican Congressional Committee.
- f. The National Republican Senatorial Committee. [E670.3.1]

**1.3.2 Definitions**

For the standards in [1.3.1](#):

- a. A *national committee* is the organization that, by virtue of the bylaws of a political party, is responsible for the day-to-day operations of such political party at the national level.
- b. A *state committee* is the organization that, by virtue of the bylaws of a political party, is responsible for the day-to-day operation of such political party at the state level. [E670.3.2]

**1.3.3 Voting Registration Officials**

Voting registration officials in a state or the District of Columbia are authorized to mail certain Standard Mail materials at the Nonprofit Standard Mail rates under the National Voter Registration Act of 1993 (see [1.6.10](#), *Political Mailings*). [E670.3.3]

**1.4 Ineligible Organizations****1.4.1 Private**

These and similar organizations do not qualify for the Nonprofit Standard Mail rates, even if organized on a nonprofit basis:

- a. Automobile clubs.
- b. Business leagues.
- c. Chambers of commerce.
- d. Citizens' and civic improvement associations.
- e. Individuals.
- f. Mutual insurance associations.
- g. Political organizations (other than those specified in [1.3](#)).
- h. Service clubs (e.g., Civitan, Kiwanis, Lions, Optimist, and Rotary).
- i. Social and hobby clubs.
- j. Associations of rural electric cooperatives.
- k. Trade associations. [E670.4.1]

**1.4.2 Government**

State, county, and municipal governments are generally not eligible for the Nonprofit Standard Mail rates. However, a separate and distinct state, county, or municipal governmental organization that meets the criteria for any one of the specific categories in [1.2](#) may be eligible, notwithstanding its governmental status. [E670.4.2]

**1.5 Identification of Nonprofit Organization**

All matter mailed at the Nonprofit Standard Mail rates must identify the authorized nonprofit organization. The name and return address of the authorized nonprofit organization must be either on the outside of the mailpiece or in a prominent

location on the material being mailed. Pseudonyms or bogus names of persons or organizations may not be used. If the piece bears any name and return address, it must be that of the authorized nonprofit organization. A well-recognized alternative designation (e.g., “The March of Dimes”) or abbreviation (e.g., “AFL-CIO”) may be used rather than the full organization name. [E670.6.0]

## **1.6 Eligible and Ineligible Matter**

### **1.6.1 Organization’s Own Mail**

An organization authorized to mail at the Nonprofit Standard Mail rates may mail only its own matter at those rates. An authorized organization may not delegate or lend the use of its authorization to mail at the Nonprofit Standard Mail rates to any other person or organization. [E670.5.1]

### **1.6.2 Ineligible Matter**

No person or organization may mail, or cause to be mailed by contractual agreement or otherwise, any ineligible matter at the Nonprofit Standard Mail rates. [E670.5.2]

### **1.6.3 Cooperative Mailing**

A cooperative mailing may be made at the Nonprofit Standard Mail rates only when each of the cooperating organizations is individually authorized to mail at the Nonprofit Standard Mail rates at the post office where the mailing is deposited. A cooperative mailing involving the mailing of any matter on behalf of or produced for an organization not itself authorized to mail at the Nonprofit Standard Mail rates at the post office where the mailing is deposited must be paid at the applicable Regular or Enhanced Carrier Route Standard Mail rates. The mailer may appeal the decision under [607.2.0](#). Exception: This standard does not apply to mailings by an organization authorized to mail at Nonprofit Standard Mail rates soliciting monetary donations to the authorized mailer and not promoting or otherwise facilitating the sale or lease of any goods or services. This exception applies only where the organization authorized to mail at Nonprofit Standard Mail rates is given a list of each donor, contact information (e.g., address, telephone number) for each, and the amount of the donation or waives in writing the receipt of this list. [E670.5.3]

### **1.6.4 Prohibitions and Restrictions**

Nonprofit Standard Mail rates may not be used for the entry of material that advertises, promotes, offers, or, for a fee or consideration, recommends, describes, or announces the availability of:

- a. Any credit, debit, or charge card or similar financial instrument or account, provided by or through an arrangement with any person or organization not authorized to mail at the Nonprofit Standard Mail rates at the entry post office.
- b. Any insurance policy, unless the organization promoting the purchase of such policy is authorized to mail at the Nonprofit Standard Mail rates at the entry post office; the policy is designed for and primarily promoted to the members, donors, supporters, or beneficiaries of that organization; and the coverage provided by the policy is not generally otherwise commercially available as explained in [1.6.5](#).

## 703.1.6.5

- c. Any travel arrangement, unless the organization promoting the arrangement is authorized to mail at the Nonprofit Standard Mail rates at the entry post office; the travel contributes substantially (aside from the cultivation of members, donors, or supporters, or the acquisition of income or funds) to one or more of the purposes that constitute the basis for the organization's authorization to mail at the Nonprofit Standard Mail rates; and the arrangement is designed for and primarily promoted to the members, donors, supporters, or beneficiaries of that organization.
- d. Any other product or service unless one of these exceptions is met:
  - 1. The sale of the product or the provision of such service is substantially related to the exercise or performance by the organization of one or more of the purposes used by the organization to qualify for mailing at the Nonprofit Standard Mail rates. The criteria in IRS regulations at 26 C.F.R. section 1.513-1(d), supplemented by the definitions in 1.6.6, are used to determine whether an advertisement, promotion, or offer for a product or service is for a substantially related product or service and, therefore, eligible for Nonprofit Standard Mail rates.
  - 2. The product or service is advertised in Standard Mail material meeting the prescribed content requirements for a periodical publication. The criteria in 1.6.8 are used to determine whether the Standard Mail material meets the content requirements for a periodical publication. [E670.5.4]

**1.6.5 Definitions, Insurance**

For the standard in 1.6.4b:

- a. Except as specified in 1.6.5c, the phrase *not generally otherwise commercially available* applies to the actual coverage stated in an insurance policy, without regard to the amount of the premiums, the underwriting practices, and the financial condition of the insurer. When comparisons are made with other policies, consideration is given to coverage benefits, limitations, and exclusions, and to the availability of coverage to the targeted recipients. When insurance policy coverages are compared to determine whether coverage in a policy offered by an organization is not generally otherwise commercially available, the comparison is based on the specific characteristics of the mailpiece recipients (e.g., geographic location or demographics).
- b. Except as specified in 1.6.5c, the types of insurance considered generally otherwise commercially available include, but are not limited to, homeowner's, property, casualty, marine, professional liability (including malpractice), travel, health, life, airplane, automobile, truck, motorhome, motorbike, motorcycle, boat, accidental death, accidental dismemberment, Medicare supplement (Medigap), catastrophic care, nursing home, and hospital indemnity insurance.
- c. Coverage is considered not generally otherwise commercially available if either of the following conditions applies:
  - 1. The coverage is provided by the nonprofit organization itself (i.e., the nonprofit organization is the insurer).

2. The coverage is provided or promoted by the nonprofit organization in a mailing to its members, donors, supporters, or beneficiaries in such a way that the members, donors, supporters, or beneficiaries may make tax-deductible donations to the nonprofit organization of their proportional shares of any income in excess of costs that the nonprofit organization receives from the purchase of the coverage by its members, donors, supporters, or beneficiaries. [E670.5.5]

### 1.6.6 Definitions, Substantially Related Advertising Products

For the standards in 1.6.4d:

- a. Standards established by the Internal Revenue Service (IRS) and the courts with respect to 26 USC 513(a) and (c) of the Internal Revenue Code are used to determine whether the sale or provision of an advertised product or service, whether sold or offered by the organization or by another party, is substantially related to the qualifying purposes of an organization. (Advertisements in Standard Mail material that meet the content requirements for a periodical publication need not meet the substantially related standard to be mailable at the Nonprofit Standard Mail rates. See 1.6.8.)
- b. To be substantially related, the sale of the product or the provision of the service must contribute importantly to the accomplishment of one or more of the qualifying purposes of the organization. This means that the sale of the product or providing of the service must be directly related to accomplishing one or more of the purposes on which the organization's authorization to mail at the Nonprofit Standard Mail rates is based. The sale of the product or providing of the service must have a causal relationship to the achievement of the exempt purposes (other than the production of income) of the authorized organization. (Income produced from selling an advertised product or providing a service does not make such action a substantially related activity, even if the income will be used to accomplish the purpose or purposes of the authorized organization.) See 26 C.F.R. section 1.513-1(d).
  1. If an organization pays Unrelated Business Income Tax (UBIT) on the income from the sale of a product or the provision of a service, that activity is by IRS definition not substantially related. See 26 U.S.C. section 512. The fact that an organization does not pay such tax, however, does not establish that the activity is substantially related because other criteria may exempt the organization from payment. See 26 C.F.R. section 1.513-1(e).
  2. Third-party paid advertisements may be included in material mailed at the Nonprofit Standard Mail rates if the products or services advertised are substantially related to one or more of the purposes for which the organization is authorized to mail at the Nonprofit Standard Mail rates. However, if the material contains one or more advertisements that are not substantially related, then the material is not eligible for the Nonprofit Standard Mail rates unless it is part of material that meets the content requirements described in 1.6.8 and is not disqualified from using the Nonprofit Standard Mail rates under another provision.

## 703.1.6.7

- c. Announcements of activities (e.g., bake sale, car wash, charity auction, oratorical contest) are considered substantially related if substantially all the work is conducted by the members or supporters of an authorized organization without compensation. See 26 U.S.C. section 513(a)(1); 26 C.F.R. section 1.513-1(e)(1).
- d. Advertisements for products and services, including products and services offered as prizes or premiums, are considered substantially related if the products and services are received by an authorized organization as gifts or contributions. See 26 U.S.C. section 513(a)(3); 26 C.F.R. section 1.513-1(e)(3).
- e. An advertisement, promotion, offer, or subscription order form for a periodical publication meeting the eligibility criteria in [707.4.0](#) and published by one of the types of nonprofit organizations listed in [1.2](#) is mailable at the Nonprofit Standard Mail rates.
- f. Unless the mailing is ineligible for the Nonprofit Standard Mail rates for other reasons, mailings will be accepted at the Nonprofit Standard Mail rates upon certification that income derived from the sale of products or services advertised in the mailing is not subject to the Unrelated Business Income Tax (UBIT) described at 26 U.S.C. section 512, and that each of the products or services is substantially related to the nonprofit organization's qualifying purpose. [E670.5.6]

**1.6.7 Other Matter**

An authorized nonprofit organization's material is not disqualified from being mailed at the Nonprofit Standard Mail rates solely because that material contains, but is not primarily devoted to:

- a. Acknowledgments of organizations or individuals who have made donations to the authorized organization.
- b. References to and a response card or other instructions for making inquiries about services or benefits available from membership in the authorized organization, if advertising, promotional, or application materials for such services or benefits are not included. For purposes of this section, descriptions of membership benefits available as a part of membership, including the use of adjectives, terms, conditions, and brand names, are permissible when they are a minor part of a solicitation or renewal request for membership payments. For purposes of this provision, "minor" is defined as "less than half." Measurement is made in accordance with [707.16.0](#) and [707.17.0](#). The solicitation or renewal request in which, to a minor degree, membership benefits may be promoted is considered to include only a printed letter to prospective members or current members whose membership is about to expire, and not to any separate, distinct, or independent brochure, circular, flyer, or other documents. Such separate documents will be considered advertising if they contain any advertising, promotional, or application materials. *Exception:* A separate document prepared by the qualifying organization, consisting of one sheet, will be considered to be part of the solicitation letter if it describes the organization's membership benefits and the solicitation letter does not describe the organization's benefits but instead refers the reader to the separate document. [E670.5.7]

**1.6.8 Periodical Publication Content Requirements**

Advertisements for products and services in material that meets the content requirements for a periodical publication are mailable at the Nonprofit Standard Mail rates. The material mailed must meet these standards:

- a. Have a title. The title must be printed on the front cover page in a style and size of type that make it distinguishable from other information on the front cover page.
- b. Be formed of printed sheets. (It may not be reproduced by stencil, mimeograph, or hectograph. Reproduction by any other process is permitted.) Any style of type may be used.
- c. Contain an identification statement on one of the first five pages of the publication that includes these elements:
  1. Title.
  2. Issue date. The date may be omitted if it is on the front cover or cover page.
  3. Statement of frequency showing when issues are to be published (daily; weekly; monthly; monthly except June; four times a year in June, August, September, and December; annually; irregularly, etc.).
  4. Name and address of the authorized organization, including street number, street name, and ZIP+4 or 5-digit ZIP Code. The street number and street name are optional if there is no letter carrier service.
  5. Issue number. Every issue of each publication is numbered consecutively in a series that may not be broken by assigning numbers to issues omitted. The issue number may be printed on the front or cover page instead of in the identification statement.
  6. International Standard Serial Number (ISSN), if applicable.
  7. Subscription price, if applicable.
- d. Consist of at least 25% nonadvertising matter in each issue. Advertising is defined in [707.4.12](#). [E670.5.8]

**1.6.9 Contribution and Membership Premiums**

Announcements for premiums received as a result of a contribution or payment of membership dues are not considered advertisements if the membership dues or requested contribution is more than 4 times the cost of the premium item(s) offered and more than 2 times the represented value in the mailpiece, if any, of the premium item(s) offered. [E670.5.9]

**1.6.10 Political Mailings**

A qualifying political committee under [1.3](#) may mail election-related materials, such as candidate endorsements, at the Nonprofit Standard Mail rates if the materials are exclusively of the qualifying political committee. Political mailings may not be made at the Nonprofit Standard Mail rates when a political candidate or anyone else not authorized to mail at the Nonprofit Standard Mail rates assists the qualifying political committee with the preparation or mailing of such materials, or pays any of the costs of preparation or mailing, or provides any consideration to the qualifying political

703.1.6.11

committee in return for the mailing being made. The following are examples of political mailings that would not qualify for mailing at the Nonprofit Standard Mail rates:

- a. A mailing containing material identified as having been paid for by the campaign committee or treasurer of an individual candidate.
- b. A mailing containing circulars, flyers, brochures, or other printed matter prepared or printed by a political candidate or his or her campaign organization.
- c. A mailing on which the postage is paid for by a political candidate or his or her campaign organization.
- d. A mailing made on behalf of a candidate in return for a contribution to the qualifying political committee. [E670.5.10]

#### **1.6.11 Products Mailable at Nonprofit Standard Mail Rates**

The following products are mailable at Nonprofit Standard Mail rates:

- a. Low-cost items within the meaning of 26 USC 513(h)(2), Internal Revenue Code. At the beginning of each calendar year, the value of low-cost items is adjusted for cost of living. Effective January 1, 2004, the standard established that the cost of such items cannot exceed \$8.30. This cost is the cost to the authorized organization that mails the items or on whose behalf the items are mailed.
- b. Items donated or contributed to the qualified organization. Such items do not have to meet the definition of a low-cost item.
- c. A periodical publication (as defined in 707.4.0) of a nonprofit organization unless it is ineligible under 1.6 to be mailed at the Nonprofit Standard Mail rates. [E670.5.11]

#### **1.6.12 Voting Registration Official**

The voting registration official may mail, at the Nonprofit Standard Mail rates, only qualifying Standard Mail matter that is required or authorized to be mailed at those rates by the National Voter Registration Act of 1993. [E670.5.12]

#### **1.6.13 Evidence of Eligibility**

On request, an organization authorized to mail at the Nonprofit Standard Mail rates must provide evidence to the USPS, or cause evidence held by another party to be provided to the USPS, about the eligibility of any of its mail matter or mailings to be sent at those rates. Any failure to provide evidence needed for a ruling on the eligibility of matter to be sent at the Nonprofit Standard Mail rates, or to cause such evidence to be provided, is sufficient basis for a finding that the matter is not eligible for the Nonprofit Standard Mail rates, as well as for the revocation of the organization's authorization to mail at the Nonprofit Standard Mail rates. [E670.5.13]

## 1.7 Authorization—Original Application

### 1.7.1 Filing

Except for mailings deposited under the plant-verified drop shipment postage payment system (see 705.15.0), Form 3624 must be filed by the organization at each post office where it wants to deposit mailings at the Nonprofit Standard Mail rates. The applicant must show on Form 3624 the qualifying category of organization under which it seeks authorization. [E670.7.1]

### 1.7.2 Fee

No fee is charged for filing Form 3624. [E670.7.2]

### 1.7.3 Qualified Nonprofit Organizations

Form 3624 must be accompanied by evidence that the applicant meets the standards of a qualifying category in 1.2 and that the organization is nonprofit (e.g., a certificate of exemption from federal income tax). *An exemption from the payment of federal income tax is not required to qualify for the Nonprofit Standard Mail rates. Such exemption is considered as evidence of qualification for preferred postal rates, but is not the controlling factor in the decision. When an organization submits proof that it is granted federal income tax exemption under 26 USC 501(c)(3), as a religious, educational, scientific, or philanthropic (charitable) organization; under 501(c)(5) as an agricultural or labor organization; under 501(c)(8) as a fraternal organization; or under 501(c)(19) as a veterans' organization, it is considered as qualifying for the Nonprofit Standard Mail rates, unless other evidence discloses some disqualification.* [E670.7.3]

### 1.7.4 Political Committees

Form 3624 filed by an organization seeking authorization as a qualified political committee must include evidence that the applicant meets the standards of one of the qualifying categories of political committees in 1.3; evidence of nonprofit status is not required. [E670.7.4]

## 1.8 Authorization—At Additional Offices

### 1.8.1 Application

Organizations authorized to mail at the Nonprofit Standard Mail rates at one post office may obtain authorization to mail at those rates at an additional post office. An official of the organization (not its agent) must file Form 3623 at the requested additional mailing office. The evidence of qualification required to accompany Form 3624 is not required when filing Form 3623. [E670.8.1]

### 1.8.2 Fee

No fee is charged for filing Form 3623. [E670.8.2]

### 1.8.3 Application Letter

Form 3623 must be accompanied by a letter from the organization on its official letterhead, signed by an official of the organization, stating the name of the organization and that it is requesting authorization to mail at the Nonprofit Standard Mail rates of postage at an additional office. [E670.8.3]

703.1.8.4

**1.8.4 Organization Name**

If the organization name on Form 3623 is different from the one on USPS records, the applicant must revise the organization's original application to reflect a name change by providing evidence that the organization name was officially changed (e.g., an official amendment to the organization's Articles of Incorporation stating the former name and the new name and a letter issued by the Internal Revenue Service recognizing the name change). [E670.8.4]

**1.8.5 Permits and Authorizations**

Authorization by Form 3623 does not relieve the mailer's obligation to obtain mailing permits and pay the required fees for mailing at bulk rates, and such authorization does not permit an organization to obtain an authorization for another separate legal entity. [E670.8.5]

**1.8.6 Retaining Additional Authorization**

To retain an additional authorization, an organization must make at least one mailing at that office during any 2-year period and maintain the original authorization on which it is based. If the original authorization is revoked for any reason the additional office authorization is also revoked. [E670.8.6]

**1.9 Mailing While Application Pending****1.9.1 Approval**

An organization may not mail at the nonprofit Standard Mail rates at a post office before the corresponding Form 3624 or Form 3623 is approved. [E670.9.1]

**1.9.2 Postage Record**

While an application is pending, postage must be paid at the applicable First-Class Mail or Priority Mail rates, or at the following Standard Mail rates: regular Enhanced Carrier Route, regular automation, or regular Presorted. The USPS records the difference between postage paid at the regular Standard Mail rates and the postage that would have been paid at the Nonprofit Standard Mail rates. No record is kept if postage is paid at First-Class Mail or Priority Mail rates. [E670.9.2]

**1.9.3 Refund**

If an authorization to mail at Nonprofit Standard Mail rates is issued, the mailer may be refunded the postage paid at that office in excess of the Nonprofit Standard Mail rate since the effective date of the authorization. No refund is made:

- a. If the application is denied and no appeal is filed.
- b. If postage was paid at First-Class Mail or Priority Mail rates.
- c. For the period before the effective date of the authorization.
- d. For mailings made at a post office at which a separate application was not filed.

[E670.9.3]

**1.9.4 Effective Date**

The effective date of the Nonprofit Standard Mail rate authorization is the date of the application or the date of the organization's eligibility, whichever is later. [E670.9.4]

**1.9.5 Pending Status**

The mailer may continue to mail in a pending status until a final decision is reached on an appeal of a denied application. [E670.9.5]

**1.10 Ruling on Application****1.10.1 Additional Information**

The PCSC manager may request additional information or evidence to support or clarify the application. Failure to provide such information is sufficient grounds to deny an application. [E670.10.1]

**1.10.2 Rulings**

The PCSC manager rules on Form 3624 and Form 3623 applications and notifies the applicant directly. [E670.10.2]

**1.10.3 Appealing a Denial**

If the application is denied, the applicant may submit a written appeal to the postmaster where the application was filed within 15 days of the applicant's receipt of the decision. After reviewing the file, if the PCSC manager still believes that the organization does not qualify, the appeal is forwarded to the manager of Mailing Standards (see [608.8.0](#) for address), who issues the final agency decision. [E670.10.3]

**1.11 Revocation****1.11.1 USPS Review**

The PCSC manager may initiate at any time a review of any organization authorized to mail at the Nonprofit Standard Mail rates. The PCSC manager may ask an organization for information or evidence to determine whether the organization is still qualified. Failure to provide such information is sufficient cause for revocation. [E670.11.1]

**1.11.2 Revocation for Cause**

If it is found that authorization has been given to an organization that was not qualified at the time of application or later became unqualified, the PCSC manager notifies the organization of the proposed revocation and the reasons for it. [E670.11.2]

**1.11.3 Appeal**

Revocation for cause under [1.11.2](#) takes effect 15 days from the organization's receipt of the notice, unless the organization files a written appeal within that time through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). The manager of Mailing Standards may ask the organization for more information or evidence to determine the organization's eligibility. Failure to provide such information is sufficient grounds for denial of the appeal. The manager issues a written appeal decision directly to the organization. [E670.11.3]

**1.11.4 Revocation for Nonuse**

The PCSC revokes an authorization to mail at the Nonprofit Standard Mail rates if no Nonprofit Standard Mail rate mailings are made by the authorized organization during a 2-year period. If the authorization pending revocation is a primary authorization, the authorization will not be revoked if one or more nonprofit mailings

703.2.1

have been made during the 2-year period at the primary authorization post office or at additional offices where authorization is based upon the primary authorization. The PCSC notifies the organization of the revocation for nonuse whether the entry is a primary or an additional office authorization. [E670.11.4]

## 2.0 Overseas Military Mail

### 2.1 Basic Standards

#### 2.1.1 First-Class Mail

First-Class letter mail, including postal cards and postcards, and sound-recorded communications that have the character of personal correspondence are given airlift service on a space available basis between overseas military post offices outside the 48 contiguous states, and between those military post offices and the point of embarkation or debarkation of this mail within the 50 states. Unless sent free under [4.0, Mail Sent by U.S. Armed Forces](#), sound recordings must be marked “Sound Recorded Personal Correspondence” by the mailer on the address side. [E010.1.1]

#### 2.1.2 SAM Parcels

Parcels of any class, paid at surface postage rates, are airlifted to, from, or between overseas military post offices outside the 48 contiguous states. These parcels must be marked “SAM” (space available mail) on the address side, preferably below the postage and above the addressee’s name. These maximum weight and size limits apply when mailed from:

- a. The 48 contiguous states: 15 pounds, 60 inches in length and girth combined.
- b. An APO or FPO outside the 48 contiguous states: Package Services weight and size limits ([401, Physical Standards](#)). [E010.1.2]

#### 2.1.3 Periodicals Publications

Periodicals publications featuring current news of general interest and published weekly or more frequently, mailed at or addressed to any military post office outside the 48 contiguous states, are given airlift service under [2.1.2](#). Airlift service in [2.1.2](#) and [2.1.3](#) is not provided for mailings of publications sent in bulk to exchanges or news agents for later resale or distribution. [E010.1.3]

#### 2.1.4 Preparation

Items sent by air or surface mail are subject to the size and weight standards in [201](#) or [401](#) unless limited further by this standard. Mail must be addressed under [602](#). Postage at the applicable Priority Mail or Package Services rates is charged for parcels sent by air or surface transportation. [E010.1.4]

#### 2.1.5 Privacy of Mail

The Department of Defense (DOD) can provide information on mail security and mail cover regulations for mail in the military postal system overseas. [E010.1.5]

#### 2.1.6 Restriction

Regardless of postage payment method, single-piece rate Priority Mail and single-piece rate Package Services weighing 16 ounces or more must be presented at a post office retail counter. The sender may be required to provide identification

before the mail is accepted by the USPS. Such mail may be presented by a sender known to the postal carrier at the sender's residence or place of business. Mail not complying with the requirements of this section and requiring air transportation is returned to the sender for proper deposit. [E010.1.6]

## 2.2 Addressing Military Mail

### 2.2.1 Overseas Address

Overseas military addresses must conform to domestic addressing standards. The delivery line (i.e., the second line from the bottom in the address) must show the ship name, unit number, CMR or PSC number, and box number if assigned. The last line must contain the APO and FPO designation and the appropriate two-letter "state" abbreviation (AA, AE, or AP), followed by the ZIP+4 or 5-digit ZIP Code. AA, AE, and AP are used for addresses with the 3-digit ZIP Code prefixes 340, 090-098, and 962-966, respectively. In addition:

- a. Mail addressed to Army personnel must show full name, including first name and middle name or initial, and unit number.
- b. Mail addressed to Air Force personnel must show full name, including first name and middle name or initial, and PSC or unit number.
- c. Mail addressed to Navy and Marine Corps personnel must show full name, including first name and middle name or initial, and PSC number for shore-based units, or ship name.
- d. Mail sent to dependents residing in overseas areas must be addressed in care of the sponsor. [A010.6.1]

### 2.2.2 Geographic Address

Mail showing a foreign city and country in addition to the military address is subject to the postage rates and conditions for international mail. [A010.6.2]

### 2.2.3 Address Within United States

Mail addressed to military personnel within the United States must show the name of the military installation, state, and either the correct ZIP Code or ZIP+4 code. In addition:

- a. Mail addressed to Army personnel must show full name, including first name and middle name or initial, and organization.
- b. Mail addressed to Air Force personnel must show full name, including first name and middle name or initial, organization, and box number (if served by a PSC).
- c. Mail addressed to Navy and Marine Corps personnel must show full name, including first name and middle name or initial, and organization.
- d. Mail sent to dependents of military personnel for delivery through the sponsor's military unit must be addressed in care of the sponsor.
- e. Mail sent to dependents of military personnel for delivery at the sponsor's military quarters need not be addressed in care of the sponsor. [A010.6.3]

## 2.3 General Restrictions

### 2.3.1 Mailability Conditions

Hazardous, restricted, or perishable materials mailed to, from, and between overseas military post offices are subject to the conditions of *International Mail Manual* 130, the standards in [601, Mailability](#), and conditions prescribed by the Department of Defense (DOD), as listed in *Conditions Applied to Mail Addressed to Military Post Offices Overseas* in the *Postal Bulletin*. [E010.2.1]

### 2.3.2 Firearms

Firearms are subject to [601.11.0](#). To export firearms not specifically prohibited by the *Conditions Applied to Mail Addressed to Military Post Offices Overseas*, periodically printed in the *Postal Bulletin*, a mailer exporting permissible firearms must present an export license from the Office of Munitions Control, Department of State, Washington, DC 20520-0001. Importing firearms by military personnel by mail from overseas military post offices is subject to 27 CFR 178.114(b), Revenue Ruling 69-309 of the Bureau of Alcohol, Tobacco and Firearms (ATF), preparation of ATF Form 6, Department of Defense regulation 5030.49-R, and other appropriate military directives and standards of the U.S. Customs Service. [E010.2.2]

### 2.3.3 Animals and Plants

Information on mailing animal and plant products is in [601.9.0](#) and Publication 52, *Hazardous, Restricted, and Perishable Mail*. [E010.2.3]

### 2.3.4 Military Retirees

Except for eligible mail marked “Free Matter for the Blind or Handicapped,” any mailpiece addressed to a retiree at a military post office overseas must weigh less than 1 pound when the designation “Box R” is part of the address. [E010.2.4]

### 2.3.5 Packaging

Packages addressed from, to, or between overseas military post offices must meet the standards in [601.1.0](#) through [601.10.0 in Mailability](#). All containers of liquids and substances that easily liquefy must be packed, with enough absorbent material to take up all leakage in case of breakage, inside a second sealed waterproof container. [E010.2.5]

### 2.3.6 Customs Declarations

Any mailpiece weighing 16 ounces or more that is addressed to an APO or FPO ZIP Code must bear customs Form 2976 and must be presented to an employee at a post office or as designated by the postmaster. Certain destination APO and FPO addresses require customs Form 2976-A, as shown in the chart *Conditions Applied to Mail Addressed to Military Post Offices Overseas*, published in the *Postal Bulletin*. Unless the destination ZIP Code has a customs declaration form requirement in the chart, any known mailer (see the *International Mail Manual* (IMM)) presenting bulk mailings that are declared on a postage statement is not required to use customs forms. The IMM contains procedures for completing the forms. Regardless of method of postage payment, mail from government agencies and their contractors going to, from, or between APO or FPO ZIP Codes is exempt from the requirements of this section unless customs declarations are necessary for customs treatment as indicated in the chart. [E010.2.6]

**2.4 Military Ordinary Mail (MOM)**

Military ordinary mail (MOM) is DOD official mail sent at Periodicals, Standard Mail, or Package Services postage rates that requires faster service than sealift transportation to, from, and between military post offices. USPS transportation of MOM is by surface means. Expedited service is determined and provided by and at the expense of the DOD. MOM is limited to mail originated by the DOD or DOD-authorized contractors and each piece must:

- a. Be conspicuously marked “MOM” on the address side, below the postage or penalty mail indicia, and above the addressee’s name.
- b. Conform to the maximum size and weight limits for the postage rate claimed (i.e., Periodicals, Standard Mail, or Package Services). [E010.3.0]

**2.5 Parcel Airlift (PAL)**

**2.5.1 Description**

Parcel airlift service (PAL) provides for air transportation of parcels on a space-available basis to or from military post offices (MPOs) outside the 48 contiguous states (from the post office of origin to the appropriate port of embarkation) for onward dispatch to other overseas MPOs or (from the port of embarkation for onward dispatch) to a post office within the 48 contiguous states. [S930.2.1]

**2.5.2 Availability**

PAL is available for Package Services that does not exceed 30 pounds in weight or 60 inches in length and girth combined, when it is mailed at or addressed to any overseas military post office outside the 48 contiguous states. [S930.2.2]

**2.5.3 Parcel Airlift (PAL) Fees**

Fee, in addition to postage and other fees, per piece:

| MAXIMUM WEIGHT | FEE    |
|----------------|--------|
| 2 pounds       | \$0.45 |
| 3 pounds       | 0.85   |
| 4 pounds       | 1.25   |
| 30 pounds      | 1.70   |

[R900.17.0]

**2.5.4 Fee and Postage**

The applicable PAL fee must be paid in addition to the regular surface rate of postage for each addressed piece sent by PAL service. [S930.2.4]

**2.5.5 Additional Services**

The following extra services may be combined with PAL if the applicable standards for the services are met and the additional service fees paid:

- a. Certificate of mailing.
- b. Insured mail.
- c. Restricted delivery (if insured for more than \$50).
- d. Return receipt (if insured for more than \$50).

703.2.5.6

e. Special handling. [S930.2.3]

### **2.5.6 Marking**

PAL parcels must be marked with the large letters “PAL” on the address side. [S930.2.5]

## **2.6 Express Mail Military Service (EMMS)**

### **2.6.1 Availability**

EMMS is available between the United States and designated APOs and FPOs to provide Department of Defense personnel stationed overseas, and others entitled to APO and FPO mailing privileges, an expedited delivery service to or from the United States. EMMS Custom Designed Service and EMMS drop shipment service are available to authorized APO/FPO destinations. [E500.7.1]

### **2.6.2 Rates**

EMMS postage rates correspond to the type of service requested, based on the weight of the addressed piece. [E500.7.2]

### **2.6.3 Designated Acceptance Sites**

EMMS is available at designated USPS facilities for 2-day or 3-day service to designated APO/FPO 5-digit ZIP Codes and at designated APO/FPO facilities for 2-day or 3-day service to designated 3-digit destination ZIP Code areas, facilities, or locations in the United States. The 3-day service option is offered from U.S. acceptance offices to APOs/FPOs to which 2-day EMMS is not logistically supportable. (All 2-day EMMS acceptance offices can accept EMMS shipments for 3-day service after the local cutoff time for normal 2-day service. Designated APO/FPO facilities overseas can accept 3-day service EMMS shipments for 3-digit destination ZIP Code areas in the United States not included on their 2-day service network.) [E500.7.3]

### **2.6.4 Service Limitation**

EMMS may not be available at or between all post offices or at all times of deposit. An EMMS directory, showing detailed local information about EMMS, is available at post offices. [E500.7.4]

### **2.6.5 Acceptance**

EMMS items must be presented by the times authorized by the local postmaster. [E500.7.5]

### **2.6.6 Post Office to Addressee (To APO/FPO)**

Under Post Office to Addressee Service to APO/FPO destinations, items presented under 2.6 for an APO/FPO address are available for delivery at the destination APO/FPO facility by 3 p.m. of the second day after mailing unless the APO/FPO facility is closed that day; in such cases, the item is available for delivery on the following business day. Items presented for 3-day service are available for delivery at the destination APO/FPO facility by 3 p.m. of the third day after mailing unless the APO/FPO facility is closed that day; in such cases, the item is available for delivery on the following business day. [E500.7.6]

**2.6.7 Post Office to Addressee (From APO/FPO)**

Under Post Office to Addressee Service from APO/FPO to U.S. destination, items presented under 2.6 are delivered to an addressee within the delivery area of the destination facility by 3 p.m. of the second day after mailing. Items presented for 3-day service are delivered to an addressee within the delivery area of the destination facility by 3 p.m. of the third day after mailing. [E500.7.7]

**2.6.8 Mailing Label**

For each Express Mail Next Day Service item, the mailer must complete a mailing label—either Label 11-A or Label 11-E (for Post Office to Post Office Service) or Label 11-B or Label 11-F (for Post Office to Addressee Service). Mailers authorized to present Next Day or Second Day Express Mail items using an Express Mail Manifesting System are required to follow label preparation procedures in Publication 97, *Express Mail Manifesting Technical Guide*. [M500.3.1]

**2.6.9 Customs Declaration**

For an Express Mail Military Service (EMMS) item, the mailer may also have to complete a customs declaration under 2.3.6. Military (APO/FPO) mail cannot be accepted under an Express Mail Manifesting agreement. [M500.3.2]

**2.6.10 Waiver of Signature**

Waiver of signature is not available for Express Mail Military Service. [M500.3.3]

**2.6.11 ZIP Code Determination**

For Express Mail Military Service (EMMS), the mailer must determine whether the item is addressed to a 5-digit APO/FPO ZIP Code to which EMMS is offered from the point of origin. [M500.3.4]

**2.6.12 Deposit**

Express Mail Military Service items must be presented by the times authorized by the local postmaster. [D500.2.4]

**2.7 Delivery of Military Mail****2.7.1 Military Post Offices**

Military post offices (MPOs) are branches of a U.S. civil post office, operated by the Army, Navy, Air Force, or Marine Corps to serve military personnel overseas or aboard ships. The term includes Army post offices (APOs) for the U.S. Army and the U.S. Air Force and fleet post offices (FPOs) for the U.S. Navy and the U.S. Marine Corps. MPOs provide postal service for military personnel where the U.S. civil postal service does not operate and a military situation requires the service. MPOs are established or discontinued by the USPS only on request of the military department that operates them. Notice of these actions is published in the *Postal Bulletin*. Military post offices do not verify and accept bulk or discounted-rate mail; such mailings must be deposited at (nonmilitary) U.S. post offices. [G011.1.4]

**2.7.2 Units Without MPOs**

For units not operating military post offices (MPOs), mail addressed to officials by title and personnel of military organizations is delivered to unit mail clerks or mail orderlies if such individuals are designated on DD Form 285 to receive all mail addressed to that unit. Registered, numbered insured, certified, and

## 703.2.7.3

restricted-delivery mail addressed to individuals by name may be delivered to the unit mail clerk or mail orderly only if the addressee so authorizes in a letter to the post office, on Form 3849 or Form 3801. [D042.8.1]

**2.7.3 Units With MPOs**

For units operating military post offices (MPOs), all mail is delivered to the military postal clerk, an assistant postal clerk, or postal finance clerk for the organization. Mail for other military organizations may be delivered to military postal clerks or military postal finance clerks for further delivery, when requested. [D042.8.2]

**2.7.4 Identification**

To obtain mail, unit mail clerks, mail orderlies, postal clerks, and assistant postal clerks must provide proper identification. [D042.8.3]

**2.7.5 Receipts**

Return receipts for registered, numbered insured, and Certified Mail must not be completed by anyone other than the addressee. [D042.8.4]

**3.0 Department of State Mail****3.1 Availability****3.1.1 General**

Subject to its own conditions and restrictions, the U.S. Department of State transmits certain types of personal mail to authorized U.S. citizen employees of the federal government stationed in other countries. If authorized, the mailer pays domestic postage rates and avoids foreign customs clearance standards. Current information on services provided by the Department of State, including restrictions, may be obtained from the U.S. Department of State Diplomatic Pouch Division. [E020.1.1]

**3.1.2 Inspection of Mail**

The Department of State opens and inspects mail sent to it for transmission abroad to determine whether the mail meets its standards. Mail that does not comply may be returned to the USPS. [E020.1.2]

**3.1.3 If Not Available**

If Department of State facilities are not available, senders may send articles to the addressee directly, either as regular international mail or, if the addressee has an APO or FPO address, as military mail under 2.0. [E020.1.3]

**3.1.4 Express Mail**

Express Mail may not be sent through the Department of State. [E020.1.4]

**3.2 Conditions For Authorized Mail****3.2.1 Mailability**

USPS mailability standards for international mail apply to mail sent to the Department of State for transmission abroad, in addition to any restriction imposed by the Department of State. [E020.2.1]

### 3.2.2 Address Format

All items authorized for transmission by the Department of State must be addressed:

NAME

FOREIGN CITY [omit name of country]

DEPARTMENT OF STATE

WASHINGTON DC 20521

[E020.2.2]

### 3.2.3 Extra Services

The following extra services are not available for mail transmitted through the Department of State: certified, COD, Delivery Confirmation, insured, registered, restricted delivery, return receipt, return receipt for merchandise, Signature Confirmation, and special handling. If one of those services is requested on this mail, it is returned to the sender endorsed "Service Not Available." [E020.2.3]

### 3.2.4 Weight and Size

Weight and size limits are 40 pounds, 24 inches in length, and 62 inches in length and girth combined. [E020.2.4]

### 3.2.5 Postage Rates

Postage at the applicable domestic rate for the class of mail and the type of service requested applies to mail sent through the Department of State. Zoned rates are computed from Washington, DC. [E020.2.5]

### 3.2.6 Customs

Customs declarations and stickers are not required on mail sent through Department of State facilities. [E020.2.6]

### 3.2.7 Prohibited Material

The Department of State does not accept dangerous or fragile materials, glass containers, parcels not meeting its size and weight limits, and items specified in its regulations, including the following:

- a. The personal effects of deceased U.S. citizens.
- b. Any item that is illegal to import into the receiving country or export from the sending country.
- c. Goods from third-country sources addressed to the Department of State requiring clearance by customs authorities before onward shipment to posts abroad.
- d. Alcoholic beverages, plants, and animals.
- e. Foodstuffs weighing more than 25 pounds per authorized individual per calendar year.
- f. Any item shipped to circumvent the weight limits provided for household effects, air freight, and food allowances. *This prohibition does not preclude the occasional shipment of clothing, gifts, printed materials, personal necessities, or household wares.* [E020.2.7]

703.3.3

**3.3 Mail Security**

The Department of State does not assume liability for loss or damage to any mail it accepts for transmission abroad. By using the department's facilities, the sender consents both to the department's examining the mail by means such as x-ray and letter-bomb detector and to the department's opening, searching, and divulging the content of any package. The Department of State does not open a sealed envelope that it believes to contain only correspondence or documents, except with the consent of the sender or addressee or under a federal search warrant. [E020.3.0]

**4.0 Mail Sent by U.S. Armed Forces****4.1 Letters Sent Postage Collect****4.1.1 Eligibility and Marking**

Letters sent by soldiers, sailors, airmen, and marines in the U.S. military service stationed in the United States or other places where U.S. domestic mail service operates, addressed to places in the United States, may be dispatched without postage for collection of the postage on delivery, if endorsed as follows:

- a. The address side of the letter must be marked "Soldier's Letter," "Airman's Letter," "Sailor's Letter," or "Marine's Letter," as applicable.
- b. Under the marking, the letter must bear the signature and official designation with a facsimile hand stamp or in writing of a commissioned officer to whose command the soldier or airman belongs, or of a surgeon or chaplain at a hospital where he or she is. In the Navy and Marine Corps, the letter must bear the signature and official designation with a facsimile hand stamp or in writing of a commissioned officer attached to the vessel on which the member is serving or an officer commanding a hospital or detachment ashore where he or she is. [E030.1.1]

**4.1.2 Postage**

Postage at the applicable single-piece rate for First-Class Mail is collected from the addressee on delivery. [E030.1.2]

**4.2 Matter Sent Free****4.2.1 Description**

Matter that may be mailed free of postage by certain military personnel is restricted to letters, postcards, and recorded communications (whether sound or video) with the character of personal correspondence. [E030.2.1]

**4.2.2 Eligibility**

The free mailing privilege may be used only by members of the U.S. Armed Forces on active duty who are either:

- a. Assigned to military duty in a certain overseas area, as designated by the President or designee under 39 USC 3401(a)(1), and who mail the matter at an Armed Forces post office in that area.

- b. Hospitalized in a facility under the jurisdiction of the U.S. Armed Forces because of disease or injury from military service in an overseas area, as designated by the President or designee. [E030.2.2]

#### **4.2.3 Description of Overseas Areas**

The definition of *overseas areas* is administered by the Military Postal Service Agency, which periodically provides the USPS with information for publication in the *Postal Bulletin* listing current overseas areas and other pertinent details. [E030.2.3]

#### **4.2.4 Military Address**

Matter mailed free must be addressed to a military post office (APO/FPO) or a place in the United States (including its territories, possessions, and Puerto Rico) served by a U.S. post office. [E030.2.4]

#### **4.2.5 Preparation**

The address side of a mailpiece must be marked "FREE," written in the sender's handwriting, in the upper right corner; and the sender's name, military grade, and complete military address, in the upper left corner. [E030.2.5]

#### **4.2.6 Extra Services**

Matter mailed free may not be registered, certified, or insured. [E030.2.6]

#### **4.2.7 Undeliverable Mail**

If matter mailed free is undeliverable as addressed, the matter is treated as First-Class Mail for transportation, processing, delivery, and handling. [E030.2.7]

## 5.0 Free Matter for the Blind and Other Physically Handicapped Persons

### 5.1 Basic Information

#### **5.1.1 General**

Subject to the standards below, matter may be entered free of postage if mailed by or for the use of blind or other persons who cannot read or use conventionally printed materials due to a physical handicap. The provisions of 5.0 apply to domestic mail only. [E040.1.1]

#### **5.1.2 Mail Classification**

Matter mailed free under this standard is not considered part of any particular class of mail and is not protected against postal inspection. This matter is treated as First-Class Mail for the exclusive purposes of determining appropriate standards for processing and delivery and for handling if undeliverable. [E040.1.2]

#### **5.1.3 Eligibility**

The following persons are considered to be blind or unable to read or use conventionally printed material due to a physical handicap for purposes of this section:

- a. Certified participants in the Library of Congress National Library Service for the Blind and Physically Handicapped (NLS).

## 703.5.1.4

- b. Blind persons whose visual acuity, as determined by competent authority, is 20/200 or less in the better eye with correcting lenses, or whose widest diameter of visual field subtends angular distance no greater than 20 degrees.
- c. Other physically handicapped persons certified by competent authority as meeting one or more of the following conditions:
  1. Having a visual disability, with correction and regardless of optical measurement, that prevents the reading of standard printed material.
  2. Being unable to read or unable to use standard printed material as a result of physical limitations.
  3. Having a reading disability resulting from organic dysfunction and of sufficient severity to prevent their reading printed material in a normal manner.
  4. Meeting the requirements of eligibility resulting from a degenerative, variable disease that renders them unable to read or use conventional printed material because of impaired eyesight or other physical factors. These persons are eligible during the time in which they are certified by a competent authority as unable to read or use conventional materials.
- d. Eligible participants must be residents of the United States, including the several states, territories, insular possessions, and the District of Columbia, or American citizens domiciled abroad. [E040.1.3]

**5.1.4 Certifying Authority**

For purposes of this standard:

- a. The postmaster may extend the free matter privilege to an individual recipient based on personal knowledge of the individual's eligibility.
- b. In cases of blindness, visual impairment, or physical limitations, "competent authority" is defined to include doctors of medicine; doctors of osteopathy; ophthalmologists; optometrists; registered nurses; therapists; and professional staff of hospitals, institutions, and public or private welfare agencies (e.g., social workers, caseworkers, counselors, rehabilitation teachers, and superintendents). In the absence of any of these, certification may be made by professional librarians or by any person whose competence under specific circumstances is acceptable to the Library of Congress (see 36 CFR 701.10(b)(2)(i)).
- c. In the case of reading disability from organic dysfunction, "competent authority" is defined as doctors of medicine and doctors of osteopathy. [E040.1.4]

**5.1.5 Qualifying Individuals**

The USPS may require individuals claiming entitlement to the free matter privilege to furnish evidence of eligibility consistent with the standards in 5.1.3 and 5.1.4, or verify by other means that the recipients are eligible to receive free matter. [E040.1.5]

## 5.2 Matter Sent To Blind or Other Physically Handicapped Persons

### 5.2.1 Acceptable Matter

Subject to 5.2.2, this matter may be mailed free:

- a. Reading matter in braille or 14-point or larger sightsaving type and musical scores.
- b. Sound reproductions.
- c. Paper, records, tapes, and other material for the production of reading matter, musical scores, or sound reproductions.
- d. Reproducers or parts of them for sound reproductions.
- e. Braille writers, typewriters, educational or other materials or devices, or parts thereof, used for writing by, or designed or adapted for use of, a blind person or a person who has a physical impairment as described in 5.1.3. [E040.2.1]

### 5.2.2 Conditions

The matter listed in 5.2.1 must meet these conditions:

- a. The matter must be for the use of a blind or other physically handicapped person.
- b. Either no charge, rental, subscription, or other fee is required for this matter; or, if required, may not exceed the cost of the item.
- c. The matter may be opened and inspected by the USPS.
- d. The matter contains no advertising. Advertising is defined as:
  1. All material of which a valuable consideration is paid, accepted, or promised, that calls attention to something to get people to buy it, sell it, seek it, or support it.
  2. Reading matter or other material of which an advertising rate is charged.
  3. Articles, items, and notices in the form of reading matter inserted by custom or understanding that textual matter is to be inserted for the advertiser or the advertiser's products in which a display advertisement appears.
  4. An organization's advertisement of its own services or issues, or any other business of the publisher, whether in display advertising or reading matter. [E040.2.2]

### 5.2.3 Letters From Sighted Individuals

Letters prepared in any form by sighted individuals, to be sent to a blind or other physically handicapped person, or empty shipping materials for mailing matter described in this section, may not be sent free and must bear the full applicable postage. [E040.2.3]

703.5.3

**5.3 Matter Sent By Blind or Other Physically Handicapped Persons****5.3.1 Acceptable Letters**

Only letters in braille or in 14-point or larger sightsaving type or in the form of sound recordings, and containing no advertising, may be mailed free, and only if unsealed and sent by a blind or other physically handicapped person as described in [5.1.3](#).  
[E040.3.1]

**5.3.2 Other Letters**

Letters that are handwritten, or printed or typed in a type size smaller than 14 points, may not be sent free. These letters must bear the full applicable postage.  
[E040.3.2]

**5.4 Preparation****5.4.1 Basic Standards**

All matter mailed under this standard:

- a. Must be marked “Free Matter for the Blind or Handicapped” in the upper right corner of the address side.
- b. Must meet the minimum and maximum dimensions in [601.1.0](#).
- c. Is subject to the mailability standards in [601.8.0](#) through [601.11.0](#) in *Mailability*.  
[E040.4.1]

**5.4.2 Extra Services**

Insurance is the only extra service that can be added to mail sent under this standard. The fee for insurance must be paid by the sender. [E040.4.2]

**6.0 Official Mail (Franked)****6.1 Basic Information****6.1.1 Members of Congress**

Official mail of Members of Congress is sent without prepayment of postage and bears instead either a written or printed facsimile signature or a specified marking. [Exhibit 6.1.1](#) shows what is accepted under frank and who is authorized its use.  
[E050.1.1]

**Exhibit 6.1.1 Franked Mail of Members of Congress**

| <b>USER ENTITLED</b>  | <b>MATTER PERMITTED</b>   | <b>MARKING REQUIRED</b>   | <b>PERIOD AUTHORIZED</b>  |
|---|---|---|---|
| Vice President of the United States, Members of Congress, Resident Commissioners, Secretary of the Senate, Sergeant at Arms of the Senate, and each elected officer of the House of Representatives (other than Members of the House)   | Public documents printed by order of Congress   | "Public Document" and "U.S.S." or "M.C." must appear on address side.   | During 90 days immediately after expiration of term of office   |
| Members of Congress and Resident Commissioners  | <i>Congressional Record</i> or any part of it (including reprints of any part, speech, or report contained in it) if for official business, activities, or duties | "Congressional Record" or "Part of Congressional Record" and "U.S.S." or "M.C." must appear on address side.  | During term of office only  |
| Members of Congress   | Seed and agricultural reports from Department of Agriculture  | Signature and title (written or printed facsimile) of person entitled to frank must appear on address side.   | During 90 days immediately after expiration of term of office   |
| Vice President of the United States, Members and Members-elect of Congress, Resident Commissioners, Secretary of the Senate, Sergeant at Arms of the Senate, each elected officer of the House of Representatives (other than a Member of the House), Legislative Counsels of the House of Representatives and the Senate, Law Revision Counsel of the House of Representatives, and Senate Legal Counsel | Official correspondence including Mailgrams   | Mailgrams may be sent in standard Mailgram envelopes. For other correspondence, signature and title (written or printed facsimile) of person entitled to frank must appear on address side. | During term of office only. When position of Secretary, Sergeant at Arms, elected officer, Legislative Counsel, Law Revision Counsel, or Senate Legal Counsel is vacant, privileges may be exercised in officer's name by authorized persons. |
| Vice President-elect  | All mail connected with preparation for assumption of official duties as Vice President   | Signature and title (written or printed facsimile) of Vice President-elect must appear on address side.   | Until assumption of duties as Vice President  |
| Former Vice President, each former Member of Congress, former Secretary of the Senate, former Sergeant at Arms of the Senate, each former elected officer of the House (other than former Member of the House), and each former Delegate or Resident Commissioner   | Matter on official business about closing of offices  | Signature and title (written or printed facsimile) of person entitled to frank must appear on address side.   | During 90 days immediately after date of leaving office   |
| Former Speakers of the House  | Public documents, seeds, and agricultural reports from Department of Agriculture, official correspondence including Mailgrams                                     | Signature and title (written or printed facsimile) of former Speaker, or Mailgram or public document marking as shown above, must appear on address side.                                   | For as long as former Speaker determines necessary  |

[Exhibit E050.1.1]

703.6.1.2

**6.1.2 Former President and Spouse**

Any former President of the United States and any surviving spouse of a former President may send nonpolitical mail as franked mail if it bears the sender's written or facsimile signature and the words "Postage and Fees Paid" in the upper right corner of the address side. [E050.1.2]

**6.1.3 Surviving Spouse of Member of Congress**

When a Member of Congress dies during the term of office, the Member's surviving spouse may send correspondence relating to the death without prepayment of postage, for a period not to exceed 180 days after the death of the Member. The mail must bear the sender's written or facsimile signature in the upper right corner of the address side. If there is no surviving spouse, this privilege may be exercised by an immediate family member of the deceased Member of Congress designated by the Secretary of the Senate or the Clerk of the House of Representatives, as appropriate. [E050.1.3]

**6.1.4 Use**

A person entitled to use franked mail may not lend this frank or permit its use by any committee, organization, association, or other person. This restriction does not apply to a committee of the Congress. [E050.1.4]

**6.1.5 Criteria**

Franked mail must be addressed to the recipient by name, except under [602.3.0, Use of Alternative Addressing](#), and it must meet the mailability criteria in [601](#) and the physical standards for the class of mail used. [E050.1.5]

**6.1.6 Handling**

Franked mail is entitled to all extra services for which it is properly endorsed and is handled and forwarded as ordinary mail, except that after delivery to the addressee, it may not be remailed. [E050.1.6]

**6.1.7 Package to One Addressee**

A person entitled to use franked mail may send a package of franked mail to one addressee, who may open the package and, on behalf of such person, address the franked articles and mail them. [E050.1.7]

**6.2 Addressing****6.2.1 Required Addressing**

Except as permitted in [6.2.2](#), all mail sent under the franking privilege must be addressed to the recipient by name and complete delivery address. [E050.2.1]

**6.2.2 Alternative Addressing**

Mail sent under the franking privilege of a member of or member-elect to Congress or a delegate, delegate-elect, resident commissioner, or resident commissioner-elect to the U.S. House of Representatives may be addressed under the alternative addressing formats in [602.3.2](#) through [602.3.4](#) for delivery to customers within the congressional district, state, or area that he or she represents. A member of the House of Representatives may not, under the franking privilege, use the alternative addressing formats to send mail outside the congressional district that he or she

represents. Any representative-at-large may send franked mail with the simplified address format to Postal Service customers within the entire state that he or she represents. [E050.2.2]

### 6.2.3 Simplified Address Format—Mail Preparation

Mailers must prepare containers of mail using the simplified address format in the manner listed below:

- a. Containers of congressional frank mailpieces using the simplified address format must be prepared under [602.3.0](#).
- b. PS Tag 11, *Congressional Mail* (“Postmaster—Open and Distribute”), must be securely affixed to each sack or tray of congressional mail to ensure adequate identification of the mail. On trays, the tag must be affixed to the end that bears the tray label. [E050.2.3]

### 6.2.4 Delivery

Mail with a simplified address format is delivered within the district, state, or area to any of the following:

- a. Each boxholder or family on a rural or highway contract route.
- b. Each post office boxholder.
- c. Each active possible delivery on city carrier routes.
- d. For deliveries under [6.2.4a](#) and [6.2.4c](#), partial distribution of simplified address mailings is permitted only when the carrier’s delivery territory crosses congressional district boundaries. In these cases, complete distribution is made to the portion of the route within a single congressional district. [E050.2.4]

### 6.2.5 Delivery Information

Delivery information as described in [509.1.0](#), *Address Information System Products*, is provided on request for a congressional district when a post office serves areas located in more than one district. [E050.2.5]

## 7.0 Official Mail (Penalty)

### 7.1 Definitions

The term *penalty mail* refers to official mail, sent by U.S. government agencies, relating solely to the business of the U.S. government, that is authorized by law to be carried in the mail without prepayment of postage. For this standard, *agencies* are departments, agencies, corporations, establishments, commissions, committees, and all officers and authorities of the U.S. government authorized to use penalty mail. [E060.1.0]

### 7.2 Postage And Fees

#### 7.2.1 Reimbursement

Agencies must reimburse the USPS the equivalent amount of postage and fees due for the penalty mail service they receive, following instructions from the USPS. The USPS requires agencies to use penalty postage meters (postage evidencing

703.7.2.2

systems) or other forms of direct accountability for penalty mail services to ensure proper reimbursement through the Official Mail Accounting System (OMAS).

[E060.2.1]

### **7.2.2 Prepayment**

An agency may also prepay postage by any method available to private-sector mailers. This prepaid mail is not considered penalty mail. [E060.2.2]

## **7.3 Eligibility**

### **7.3.1 Matter Sent as Penalty Mail**

Only matter relating solely to the business of the U.S. government may be sent without prepayment of postage as penalty mail when mailed by officers of the executive and judicial branches of the government, the Legislative Counsel for the House of Representatives and the Senate, the Superintendent of Documents, and the Joint Committee on Printing when it mails correspondence on the Congressional Directory. Generally, the USPS holds that the agency determines which matter relates solely to its own business. Cases of questionable use must be referred to the agency. [E060.3.1]

### **7.3.2 USDA**

Special conditions that apply to the U.S. Department of Agriculture (USDA) include:

- a. All correspondence, bulletins, and reports about agriculture extension work and home economics carried on in cooperation with the USDA may be sent as penalty mail when mailed by the college officer or other person connected with the extension department of the college and designated by the Secretary of Agriculture. The designated officer may deposit mailings only at the post office authorized by the PCSC. Correspondence must be conducted under the designated officer's name. Correspondence with an autograph signature may be sealed. All other matter must be unsealed.
- b. All correspondence, bulletins, and other matter promoting cooperative extension work as a federal enterprise or relating exclusively to the business of the U.S. government may be sent as penalty mail by cooperative extension agents of the USDA Extension Service when part of their official duties. If cooperative extension employees mail correspondence, authorized USDA agents must sign it and give their official titles to show that they are authorized to use penalty mail.
- c. Annual reports of government-aided colleges (under 7 USC 325) may be sent as penalty mail when addressed to the Secretary of Education, the Secretary of Agriculture, or to any other such government-aided college. [E060.3.2]

### **7.3.3 Employment Security Offices**

All mail prepared by state employment security offices cooperating with the U.S. Department of Labor is accepted without prepayment of postage or fees. [E060.3.3]

### **7.3.4 Others Authorized**

The general secretariat of the Organization of American States and Pan American Health Organization (or Pan American Sanitary Bureau) are authorized by law to transmit official matter without prepayment (see the *International Mail Manual*).

[E060.3.4]

**7.3.5 Vice President-Elect**

The Vice President-elect of the United States may send franked mail in connection with preparations for assuming official duties as Vice President. The right to use penalty mail ceases immediately on inauguration to the vice presidency. [E060.3.5]

**7.4 Authorization****7.4.1 Authorized Agencies**

Agencies authorized to use penalty mail are listed in Handbook DM-103, *Official Mail*, and are updated periodically in the *Postal Bulletin*. Other agencies may request authorization to use penalty mail by writing to the Post Office Accounting manager, USPS Headquarters (see [608.8.0](#) for address). [E060.4.1]

**7.4.2 College Officer**

The college officer or other person connected with the extension department of the college and designated by the Secretary of Agriculture to use penalty mail under [7.3.2a](#) must be authorized by the PCSC to deposit penalty mail at a specific post office. [E060.4.2]

**7.4.3 Licenses and Permits**

Any agency authorized to use penalty mail must obtain licenses or permits to use penalty postage meters, penalty permit imprints, penalty business reply mail, and penalty Periodicals at specific post offices under [7.7](#) through [7.13](#). [E060.4.3]

**7.4.4 Private Use**

Unless permitted by USPS standards, an agency may not lend or provide penalty envelopes, cards, cartons, labels, meter stamps, or penalty mail stamps to any private person, concern, or organization. The use of these items for matter not relating exclusively to the business of the U.S. government is prohibited. [E060.4.4]

**7.4.5 Permit and BRM Numbers**

Penalty mail permit imprint or BRM numbers, or information to help agencies track and account for penalty mail postage by cost center, may be obtained by written request to the Post Office Accounting manager, USPS Headquarters. [E060.4.5]

**7.5 Services, Classes, Rates, Preparation, And Detention****7.5.1 Postal Services**

USPS policy is to give penalty mail customers all postal services for which they qualify, including forwarding, return, and address correction, unless otherwise provided by law or regulation. Agencies must pay for services in accordance with [604.7.0](#), [604.9.0](#), and [604.11.0](#). [E060.5.1]

**7.5.2 Nonprofit Rates**

Agencies are not permitted to send penalty mail at any nonprofit or subsidized rate. [E060.5.2]

**7.5.3 Basic Preparation**

Penalty mail must:

- a. Be prepared with an appropriate penalty indicia format.
- b. Meet the eligibility, marking, preparation, and physical standards for the class of mail and rate of postage used.

## 703.7.5.4

- c. Include a ZIP+4 code or a 5-digit ZIP Code in all delivery and return addresses.
- d. For all methods of payment, be endorsed for class or rate except for single-piece rate First-Class Mail. [E060.5.3]

**7.5.4 Discounted Rates**

Discounted rate penalty mail mailings must meet additional preparation standards:

- a. Presorted mailings must be prepared with penalty postage meters or penalty permit imprints or, for Periodicals, the penalty Periodicals imprint.
- b. Mailing fees and application fees are reimbursed under 7.2 and are not paid to the local post office, but are charged and billed through the Official Mail Accounting System (OMAS) from records of mailing activity.
- c. Discounted rate mailings must meet the eligibility and preparation standards and must be submitted to the designated USPS acceptance unit with the proper USPS postage statement.
- d. Discounted rate mailings are subject to the same USPS procedures for verifying mail preparation as private-sector mailings. First-Class Mail and Priority Mail, however, are not detained for improper mailer preparation. If the agency cannot be reached about a disqualified discounted rate mailing, the single-piece rate is charged and the mailing is accepted. [E060.5.4]

**7.5.5 Extra Services**

Penalty mail endorsed for an extra service is given the requested service. Penalty mail may not be used for:

- a. Money orders.
- b. Collect on delivery (COD) mail.
- c. Post office box service fees. [E060.5.5]

**7.5.6 Shortpaid and Unpaid Mail**

604.7.0, 604.9.0, and 604.11.0 apply to shortpaid and unpaid penalty mail, except that military units engaged in hostile operations or operating under arduous conditions may send mail postage-due, using a special postage-due format, when permitted under 7.5.7. [E060.5.6]

**7.5.7 Military Units**

Military units engaged in hostile operations or operating under arduous conditions may be authorized to use a special form of postage-due penalty mail, subject to these conditions:

- a. This mail must be in the format shown in Exhibit 7.5.7.
- b. The special postage-due endorsement must be printed or hand-stamped above the delivery address where postage normally is affixed.
- c. Endorsements for class and requested extra services must be placed below the special postage-due indicia.
- d. The return address must be a military post office (APO/FPO).

- e. The Military Postal Service Agency must notify the Post Office Accounting manager, USPS Headquarters, within 3 business days after effecting these provisions.
- f. The use of these provisions is limited to 120 days from date of authorization unless otherwise announced.
- g. With prior agreement, the Military Postal Service Agency and the USPS may conduct tests of these provisions during designated military training exercises. [E060.5.7]

[Exhibit E060.5.7]

#### 7.5.8 Foreign

Penalty mail may be sent to other countries under the applicable standards and restrictions. [E060.5.8]

#### 7.5.9 Mail Detention

Except as permitted by standard, the USPS does not hold penalty mail even if the mail appears to abuse official mailing privileges. Reports of indicated abuse are submitted to the PCSC for referral to the proper agency for investigation and action. [E060.5.9]

## 7.6 General Standards for Penalty Indicia

### 7.6.1 General

The formats and methods of mailing penalty mail are penalty metered mail, penalty permit imprint mail, penalty mail stamps, penalty Periodicals imprint mail, and penalty reply mail. There are also special procedures for penalty Express Mail.

## 703.7.6.2

Information on use of INTELPOST may be obtained from the Post Office Accounting manager, USPS Headquarters. All penalty mail matter must meet the applicable standards in 7.6 through 7.15. [E060.6.1]

**7.6.2 Use**

Envelopes and labels prepared under these standards may be used only to transmit penalty mail within the U.S. Mail, except when:

- a. Official items are carried by employees of the originating agency.
- b. Official items are carried by contractors for later entry into the U.S. Mail.
- c. Agencies reach written agreement with the Post Office Accounting manager, USPS Headquarters, to account for and pay postage on official items carried outside the U.S. Mail (18 USC 1693-1699 and 39 USC 601-606). [E060.6.2]

**7.7 Penalty Meter****7.7.1 Description**

Any agency may use postage meters (postage evidencing systems) with a special penalty design, following the procedures in 604.4.0 as modified in 7.7.2 through 7.7.11. [E060.7.1]

**7.7.2 License**

The agency must include its 3-digit agency code on each application for a meter license submitted under 604.4.0 and may assign one cost code to each license. A meter may be licensed for use at only one licensing post office. The agency must have a license and assigned meter(s) for each post office where it will deposit mail. The agency may have any number of meters under a single license. All transactions for each meter on a single license are charged to the agency code on the license application. [E060.7.2]

**7.7.3 Meter Indicia Format**

Penalty mail meter stamp designs must be placed in the upper right corner of the mailpiece. Except under 604.4.8.9, *Ink*, or 604.4.8.10, *Facing Identification Mark*, envelopes used with a penalty postage meter must not contain facing identification marks (FIMs) or printing other than the meter indicia in the area where the meter stamps are applied. [E060.7.3]

**7.7.4 Return Address**

The complete return address (agency name and mailing address) must be in the upper left corner of each mailpiece. The preprinted words "Official Business" must be immediately below the return address. [E060.7.4]

**7.7.5 Refunds for Unused Penalty Meter Indicia**

Refunds for complete, legible, valid, unused penalty mail meter indicia are made under 604.10.3.2. No refunds are made in cash or applied to a meter. [E060.7.5]

**7.7.6 Transferring Meter**

An agency transferring a meter from one licensing post office to another must obtain a license from the new licensing office under 7.7.2. [E060.7.6]

**7.7.7 On-Site Service**

An agency wanting on-site meter service must pay the required fee in cash or with a check when the service is rendered. [E060.7.7]

**7.7.8 Replacement Meter**

If a meter is replaced, the remaining postage is transferred from the original meter to the replacement meter under [604.4.0](#) and [604.5.0](#). The postage may not be transferred to a penalty meter operating under a different license number. Cash refunds are not issued to agencies for penalty mail postage meters checked out of service. [E060.7.8]

**7.7.9 Insufficient Postage**

Penalty metered mail with insufficient postage imprinted, and envelopes and labels designed for penalty meter use found in the mail without a penalty meter stamp, are treated as postage due under [604.7.0](#), [604.9.0](#), and [604.11.0](#). [E060.7.9]

**7.7.10 Computerized Meter Resetting**

An agency may use a penalty mail version of the authorized postage meter payment process for remotely reset meters if it is offered by the postage meter provider and approved by the USPS. The agency must follow the procedures in [604.4.0](#) and [604.5.0](#), except the agency is not required to prepay for metered postage. [E060.7.10]

**7.7.11 Disaster Field Office Meters**

Authorized federal government agencies also may use a special penalty version of the authorized postage meter payment process for remotely reset meters for meters known as Disaster Field Office (DFO) meters. These meters are *only* for temporary use in federal government-declared disaster areas and must be replaced by regular penalty meters within 30 days, except for those used by designated agency staff specialists not in a fixed location (e.g., mobile vehicle or temporary office), who may use them through the duration of the emergency operation declaration. Written requests for authorization to use DFO meters must be submitted to the Post Office Accounting manager (see [608.8.0](#)) and include the name, office address, and telephone number of an agency headquarters manager responsible for tracking and maintaining these meters, including complying with the necessary examination requirements. License applications for DFO meters are handled by the meter providers, who set up the licenses through the Washington, DC, licensing post office under normal meter licensing procedures. [E060.7.11]

**7.8 Penalty Permit Imprint****7.8.1 Application**

An agency may apply to use penalty permit imprint procedures by completing Form 3615. The agency submits it to the post office where the mailings are to be deposited. The agency must show the complete name of the agency and, if applicable, the name of the component unit in the "Name of Applicant" section of the form. When the agency receives authorization to use a penalty permit imprint number not shown in the most recent listing in the *Postal Bulletin*, a copy of the authorizing letter from the Post Office Accounting manager, USPS Headquarters, must be submitted with Form 3615 to the post office where mailings are to be made. These procedures also apply when an agency uses a contractor to mail

## 703.7.8.2

penalty permit imprint matter, unless the agency provides the contractor with the completed Form 3615 to submit to the entry post office. Fees are reimbursed under [7.2](#) and are not paid to the local post office. The USPS is not required to complete Form 3615 to activate its own permit imprint number (G-10) at post offices.

[E060.8.1]

**7.8.2 Indicia Format**

The penalty permit imprint indicia must be in a rectangular box in the upper right corner of the mailpiece. The indicia must include the words “Postage and Fees Paid,” the agency name, and the agency’s assigned penalty permit imprint number or other penalty permit imprint number authorized by the Post Office Accounting manager, USPS Headquarters, preceded by the letter “G.” In addition, the class of mail or appropriate rate endorsement must be the first item within the indicia or immediately below or to the left of the indicia. Rate endorsements for certain rate categories may also be directly above the top line of the address. The city of mailing, amount of postage, and weight of the piece may be included within the indicia but are not required. First-Class Mail penalty permit imprints may also show the date.

[E060.8.2]

**7.8.3 Return Address**

The complete return address (agency name and mailing address) must be in the upper left corner. The preprinted words “Official Business” and “Penalty for Private Use \$300” must be directly below the return address. The penalty statement must not be handwritten or typewritten. [E060.8.3]

**7.8.4 Postage Statement**

Mail sent under penalty permit imprint procedures must meet the standards of [604.6.0](#), except for prepayment and imprint format. The proper USPS postage statement must be submitted with each penalty permit imprint mailing. If a receipt is needed, the mailer must submit a duplicate of the postage statement. When a postage statement is submitted by a Government Printing Office (GPO) contractor, the serial number of the accompanying GPO Form 712 must be shown in the upper right corner. [E060.8.4]

**7.8.5 GPO Contractor**

As an exception to the general standard in [7.8.5](#), an agency mailing submitted by a GPO contractor may contain nonidentical-weight pieces or more than one class of mail, if:

- a. The pieces are for mailing only at single-piece rates.
- b. All other applicable standards for use of permit imprints are met, including those on minimum quantity and class of mail endorsements.
- c. A completed Form 3602-G is submitted to the entry post office for each mailing, in duplicate if the contractor wants a copy.
- d. The mailing is separated by the class and weight categories on Form 3602-G when presented to the post office. Postage is computed on the average weight of a piece for each category of mailing reported.
- e. Mailings reported on Form 3602-G are not eligible for intra-BMC Parcel Post rates.

- f. GPO Form 712 is submitted with the mailing and the proper USPS postage statement. [E060.8.5]

**7.9 Penalty Postage Stamps and Stationery**

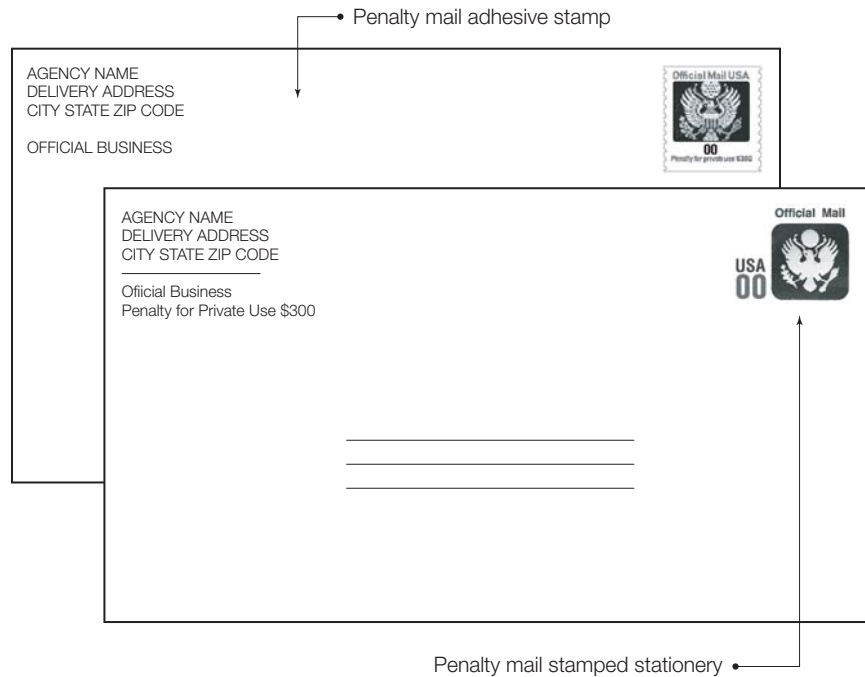

**7.9.1 Use**

Penalty mail stamps may be used by any authorized federal agency to facilitate postage accountability. Enough penalty mail stamps to cover the correct single-piece rate postage, including applicable surcharges or extra service fees, must be affixed to each mailpiece. Pieces with insufficient penalty mail stamps affixed, and envelopes and labels designed for penalty mail stamps found in the mail without a penalty mail stamp, are handled under 604.7.0, 604.9.0, and 604.11.0. [E060.9.1]

**7.9.2 Availability**

Penalty mail stamped stationery (plain stamped envelopes, personalized envelopes, and stamped cards) and penalty mail adhesive stamps (see Exhibit 7.9.2) are available in various denominations. [E060.9.2]

**Exhibit 7.9.2 Penalty Mail Postage Format**

[Exhibit E060.9.2]

**7.9.3 Application**

A federal agency may apply to use penalty mail stamps by submitting a letter to the Post Office Accounting manager, USPS Headquarters, stating how the agency plans to use the stamps. The Post Office Accounting manager provides a written response stating approval or denial of the application. [E060.9.3]

**7.9.4 Placement**

Penalty mail adhesive stamps must be affixed in the upper right corner of the address side of the mailpiece. [E060.9.4]

**7.9.5 Return Address**

The complete return address of the agency (agency name and mailing address) must be in the upper left corner of the address side of the mailpiece. The preprinted words "Official Business" must be immediately below the return address. On penalty stamped stationery, "Penalty for Private Use \$300" must be placed below "Official Business." [E060.9.5]

**7.9.6 Ordering Stock**

An agency authorized to use penalty mail stamps must order penalty mail stock as follows:

- a. Orders for penalty mail stamp stock other than personalized envelopes must be sent on Form 17-G to the stamp distribution office (SDO) serving the ZIP Code area to which the stamp stock is to be shipped. Orders for personalized envelopes must be sent on Form 17-J to Stamp Fulfillment Services (see [608.8.0](#) for address).
- b. Each order must total at least \$50. Smaller orders received are increased to meet or exceed the minimum by adding full 100-stamp coils at the current First-Class single-piece 1-ounce rate.
- c. Each denomination of stamps must be ordered in multiples of 100 (i.e., full sheets or coils), except that \$1 and \$5 stamps must be ordered in multiples of 10.
- d. Penalty stamped cards must be ordered in full units of 250 cards.
- e. Penalty stamped envelopes (plain and personalized) must be ordered in full units of 500 envelopes. [E060.9.6]

**7.9.7 Exchanges**

Incorrectly shipped items or items damaged in shipping or defective or otherwise unserviceable may be exchanged by the SDO at full value. [E060.9.7]

**7.10 General Standards for Penalty Reply Mail****7.10.1 Restriction to Approved Formats**

An agency may distribute penalty envelopes, cards, cartons, or labels to any person, concern, or organization. To distribute penalty reply mail, agencies must use the penalty business reply mail format; the penalty metered reply format; penalty mail adhesive stamps or penalty mail stamped stationery; or the penalty merchandise return service label. [E060.10.1]

**7.10.2 Prepayment**

Prepaid adhesive postage stamps may be affixed to cards and envelopes distributed for reply purposes. [E060.10.2]

**7.10.3 Penalty Metered Reply**

An agency that holds a penalty postage meter license may distribute penalty metered reply cards and envelopes for return to the meter license holder, subject to the relevant standards in [604.4.0](#) and [604.5.0](#). [E060.10.3]

**7.10.4 Penalty Stamped Mail**

An agency authorized to use penalty mail may furnish to a person, concern, or organization from or through whom official matter is desired, for reply purposes, printed penalty mail stamped stationery or envelopes or cards bearing penalty mail stamps that contain the preprinted address of a federal office or officer. [E060.10.4]

**7.10.5 Format**

Letter-size reply mail pieces enclosed in automation rate mailings must meet the standards in [201.3.0](#) and [507.8.0](#). [E060.10.5]

**7.11 Penalty Business Reply Mail (BRM)****7.11.1 General**

An agency may participate in business reply mail service (including Qualified Business Reply Mail). Standards for business reply mail are in [507.8.0](#). Agencies can choose to pay postage and per piece charges for BRM by setting up a BRM advance deposit account to be billed through the Official Mail Accounting System (OMAS) or by paying for BRM through an OMAS postage due account. Under a BRM advance deposit account, the agency is billed an annual accounting fee by each post office ZIP Code where mail is returned, the appropriate postage, and high-volume BRM per piece charges. Under the postage due option, the agency pays the appropriate postage and basic BRM per piece charges through an OMAS postage due account. The postage, fees, and per piece charges are the same as those for private-sector customers (see [507.8.1](#)). Government agencies cannot use cash, penalty meter stamps, or penalty mail stamps to pay postage due. [E060.11.1]

**7.11.2 Application**

An agency must apply for a BRM permit on Form 3615 at each post office where its BRM is to be returned. The form must include the BRM permit number, the agency code, the agency cost code (if desired), and whether the agency wants to set up a BRM account. A contractor for the agency may submit the form if it is signed by an authorized agency representative. The USPS is not required to complete Form 3615 to activate its own BRM permit number at post offices. [E060.11.2]

**7.11.3 Permit Fees**

If an agency uses BRM at any location, it is charged an annual BRM permit and renewal fee for each permit number assigned. These fees are billed automatically by USPS Headquarters each year, and no agency action is necessary. [E060.11.3]

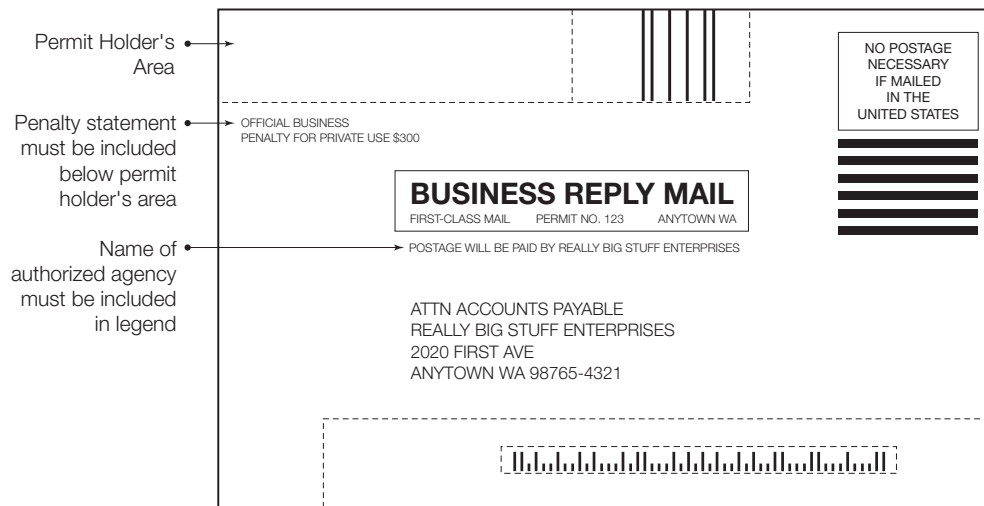

**7.11.4 Addressing and Format**

Penalty BRM envelopes must show the address of an authorized agency or a component unit. Envelopes must be printed as detailed in [507.8.0](#) and as shown in [Exhibit 7.11.4](#), with these exceptions:

703.7.11.5

- a. The address may be printed, typewritten, or hand-stamped directly on the mailpiece, or a printed gummed label may be affixed in the address area. The address must not be handwritten. Letter-size BRM enclosed in automation rate mailings must meet the standards in [201.3.0](#) and [507.8.0](#).
- b. The required legend must read “Postage Will Be Paid By [name of authorized agency].”
- c. The space for the permit holder’s use must include the statement “Official Business, Penalty for Private Use \$300.” Space above this statement may be used for return address, logos, and distribution codes. [[E060.11.4](#)]

### Exhibit 7.11.4 Penalty Business Reply Mail Format

*\*See Exhibit 507.9.8.1 for more complete formatting information*

[Exhibit E060.11.4]

### 7.11.5 Cancellation

If an agency wants to cancel a BRM account, the agency must notify the post office handling the account. [[E060.11.5](#)]

## 7.12 Penalty Merchandise Return Service

### 7.12.1 Description

Merchandise return service allows an authorized permit holder to pay the postage and extra service fees on single-piece rate First-Class Mail, Priority Mail, and Package Services (Parcel Post, Bound Printed Matter, and Media Mail only) that is returned by the permit holder’s customers via a special label produced by the permit holder as specified by [507.9.0](#). [[E060.12.1](#)]

### **7.12.2 Postage and Extra Service Fees**

The standards for payment of postage and fees are:

- a. The permit holder guarantees payment of the proper postage and extra service fees on all returned merchandise return service articles distributed under the permit holder's permit number. Postage is collected for each article from an OMAS MRS account.
- b. Returned parcels are charged single-piece rate postage and extra service fees based on the class or subclass marking on the label. If a piece is unmarked, then it is charged Parcel Post rates. If the postage for the returned piece is zoned and there is no way to determine the zone of origin (i.e., no postmark or return address), then postage is calculated at zone 4 (for Priority Mail) or zone 4 Inter-BMC rates (for Parcel Post).
- c. There is no per piece charge per parcel returned. [E060.12.2]

### **7.12.3 Annual Accounting Fee**

All MRS permit holders are required to pay the annual accounting fee in [507.9.1.2](#), which is assessed automatically through OMAS. [E060.12.3]

### **7.12.4 Application**

An agency must apply by letter to the Post Office Accounting manager, USPS Headquarters, to use merchandise return labels. A single permit number is assigned to each agency unless the agency asks for multiple numbers. [E060.12.4]

### **7.12.5 Post Office Notification**

Agencies must apply for authorization to use their penalty merchandise return permit by submitting a Form 3615 at each post office where pieces bearing penalty merchandise return labels will be received. No fee should accompany this application since all fees for penalty mailers are assessed through OMAS. [E060.12.5]

### **7.12.6 Permit Renewal**

Authorization to use a penalty merchandise return permit number at a local post office is renewed automatically unless the agency notifies the post office that it wishes to cancel its authorization. Annual authorization fees are assessed automatically through OMAS. [E060.12.6]

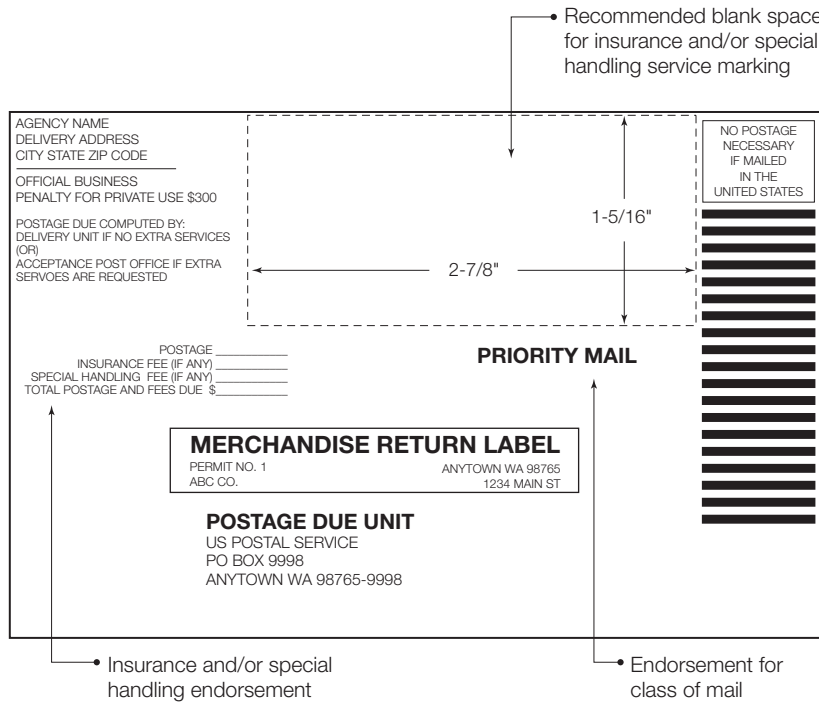

703.7.12.7

**7.12.7 Label Format**

The one-part merchandise return labels available for federal agencies must bear the address of an authorized agency or a component. *Exhibit 7.12.7a Merchandise Return Label with No Extra Services or with Insurance and/or Special Handling* shows the format required when no extra services are requested or when insurance and/or special handling are requested. *Exhibit 7.12.7b Merchandise Return Label for Registered Mail Service without Insurance* shows the format required when registered service without postal insurance is requested. The label must be printed in the format required by 507.9.0, except:

- a. The phrases “Official Business” and “Penalty for Private Use \$300” must be printed directly below the return address and above the class of service requested in the upper left corner of the label.

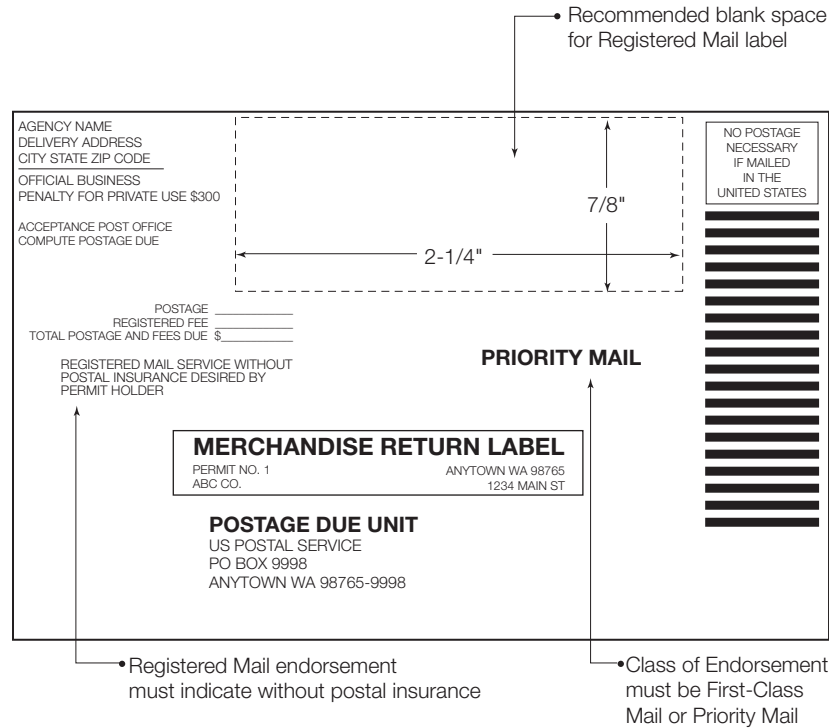

**Exhibit 7.12.7a Merchandise Return Label with No Extra Services or with Insurance and/or Special Handling**

[Exhibit E060.12.7a]

- b. The post office name required in the “Merchandise Return Label” legend must be the same as the post office authorized to receive the mail.

**Exhibit 7.12.7b Merchandise Return Label for Registered Mail Service without Insurance**

[Exhibit E060.12.7b]

- c. Permit holders are encouraged, but are not required, to put the rate marking in the space to the right and above the “Merchandise Return Label” legend. The marking must be at least 3/16 inch high and be printed or rubber-stamped. Only the permit holder may apply this marking. [E060.12.7]

**7.12.8 Insurance Indicated by Permit Holder**

The permit holder may obtain insured mail service with MRS. Indemnity under penalty mail merchandise return is limited to \$100. Items requiring insurance greater than \$100 may not be mailed under penalty merchandise return service. Only Package Services matter (i.e., matter not required to be mailed at First-Class Mail rates under 133.3.0) may be insured. Insured mail may be combined with other extra services as listed in 503.4.0, *Insured Mail*. To request insured mail service, the permit holder must preprint or rubber-stamp “Insurance Desired by Permit Holder for \$\_\_\_\_\_ (value)” to the left of and above the “Merchandise Return Label” legend and below the “Total Postage and Fees Due” statement on the merchandise return label. The value part of the endorsement, showing the dollar amount of insurance for

703.7.12.9

the article, may be handwritten by the permit holder. If insurance is paid for by the MRS permit holder, then only the MRS permit holder may file a claim (609).

[E060.12.8]

#### **7.12.9 Insured Mail Added by Sender**

If the permit holder has not indicated insured mail service on the MRS label, then the sender has the option of adding insurance at the sender's own expense. There is no limit on the indemnity coverage paid for by the sender. If insurance is paid by the sender, then only the sender may file a claim (609). [E060.12.9]

#### **7.12.10 Registered Mail**

Only the permit holder may request that the piece receive Registered Mail service by preprinting the endorsement noted below. All applications for registered merchandise return service must be submitted to the manager of Mailing Standards (see 608.8.0 for address). Registered Mail service may be obtained only on articles returned at First-Class Mail or Priority Mail rates. Only Registered Mail service without postal insurance is available under penalty mail merchandise return procedures. An agency wanting to register merchandise return articles with postal insurance must follow the procedures in 507.9.0. When Registered Mail service is requested for single-piece First-Class Mail or Priority Mail, no other extra service is available. The format in [Exhibit 7.12.7b, Merchandise Return Label for Registered Mail Service without Insurance](#), must be used for the merchandise return label, and the following endorsement must be preprinted to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement: "Registered Mail Service without Postal Insurance Desired by Permit Holder." [E060.12.10]

#### **7.12.11 Special Handling**

Only the permit holder may request that the mailpiece receive special handling. The format in [Exhibit 7.12.7a, Merchandise Return Label with No Extra Services or with Insurance and/or Special Handling](#), must be used for the merchandise return label. Package Services items requiring special handling must have the following endorsement preprinted or rubber-stamped to the left of and above the "Merchandise Return Label" legend and below the "Total Postage and Fees Due" statement: "Special Handling Desired by Permit Holder." [E060.12.11]

#### **7.12.12 Permit Cancellation**

A permit may be canceled by the Post Office Accounting manager, USPS Headquarters, for violation of postal regulations, including:

- a. Refusing to accept and pay the required charges for merchandise return offered for delivery.
- b. Distributing merchandise return labels that do not meet USPS specifications.

[E060.12.12]

#### **7.12.13 Later Receipt**

When a permit is canceled, mailpieces received after the cancellation are treated under 507.9.0. [E060.12.13]

**7.13 Penalty Periodicals**

**7.13.1 Application**

An agency may apply for penalty Periodicals mailing privileges for periodical publications that meet the basic eligibility standards in 707.4.0 through 707.15.0. The correct application form and supporting materials must be submitted to the post office where the known office of publication is located. [E060.13.1]

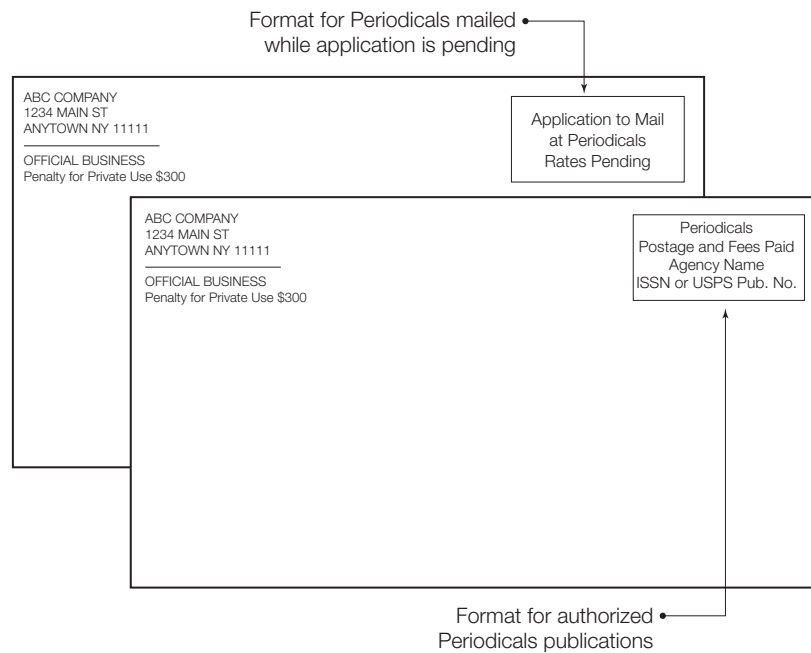

**7.13.2 Compliance**

Except for prepayment of postage, penalty Periodicals must meet the standards that apply to private-sector Periodicals publications. [E060.13.2]

**7.13.3 Format**

A penalty mail Periodicals imprint must be printed on the front or back cover of each copy, either in the upper right corner of the address area or in the upper right corner of the address side of the envelope or wrapper. The imprint for copies mailed while an application is pending must read “Application to Mail at Periodicals Rates Pending.” The imprint for authorized publications must contain the words “Periodicals” or “Periodicals Newspaper” (as appropriate); the words “Postage and Fees Paid”; the agency name; and the International Standard Serial Number assigned by the Library of Congress, if the publication has one, or the publication number assigned by the USPS at the time of authorization. See Exhibit 7.13.3 for format. [E060.13.3]

**Exhibit 7.13.3 Penalty Periodicals Formats**

[Exhibit E060.13.3]

703.7.13.4

**7.13.4 Return Address**

For both authorized publications and those with applications pending, the front or back cover of each copy or the address side of its envelope or wrapper must also show the agency name and a complete return address. The words “Official Business” and “Penalty for Private Use \$300” must be preprinted directly below the return address. The penalty statement must not be handwritten or typewritten (see [Exhibit 7.13.3](#)). [E060.13.4]

**7.13.5 Postage and Fees**

Postage and fees are billed through OMAS. Agencies must submit a completed postage statement to the entry office with each mailing of each edition or as otherwise permitted by the standards for Periodicals in [707.16.0](#) and [707.17.0](#). [E060.13.5]

**7.14 Penalty Express Mail**

Agencies have the same service and contract options as other mailers when arranging for penalty Express Mail service. Agencies may prepay Express Mail postage or pay with penalty postage meters or penalty mail stamps. They may also use the 3-digit agency code (and 5-digit cost code) if authorized according to the most recent listing in the *Postal Bulletin*. If postage is prepaid or paid with penalty meters or penalty mail stamps, the 3-digit agency code is not written in the customer number block on Express Mail labels. If the 3-digit agency code is used, an agency envelope or label must be used that contains a complete agency return address and the preprinted phrases “Official Business” and “Penalty for Private Use \$300.” [E060.14.0]

**7.15 Contractors****7.15.1 Reimbursement**

An agency authorized to use penalty mail must reimburse the USPS for contractor use of penalty mail services. The agency must promptly provide, in the form requested, all information on contractor use of penalty mail services that the Post Office Accounting manager, USPS Headquarters, considers necessary for accurate reimbursement to the USPS. [E060.15.1]

**7.15.2 Preparation**

Preparation standards for a contractor’s penalty mailings include:

- a. First-Class Mail, Standard Mail, and Package Services penalty mailings must be prepared with penalty permit imprints or penalty meters. Single-piece rate mailings may also be prepared with penalty mail stamps.
- b. Periodicals must be prepared with a penalty Periodicals imprint.
- c. Reply mail must be prepared under [7.10, General Standards for Penalty Reply Mail](#), [7.11, Penalty Business Reply Mail \(BRM\)](#), and [7.12, Penalty Merchandise Return Service](#), as applicable.
- d. Express Mail must be prepared with penalty postage meters, penalty mail stamps, or use of 3-digit agency code under [7.14](#). [E060.15.2]

**7.15.3 Postage Statement**

A contractor submitting a mailing that requires a postage statement must prepare the statement in duplicate if the mailer wants a copy. [E060.15.3]

**7.15.4 Providing Materials**

When an agency requires a contractor to provide progress reports or to return government materials to the agency by mail, the agency may either require the contractor to prepay postage on these items or provide the contractor with BRM or merchandise return envelopes and labels. [E060.15.4]

**7.15.5 Return Address**

Penalty envelopes and labels used by any contractor must show the printed return address of an authorized agency. The name and address of a private person, concern, organization, or contractor may not be shown in the return address. [E060.15.5]

## 8.0 Absentee Balloting Materials

### 8.1 Basic Standards

**8.1.1 Definition**

Balloting materials, consisting of postcard applications, ballots, voting instructions, and envelopes, may be sent through the mail without prepayment of postage to enable persons in the following categories to apply for registration and vote by absentee ballot when absent from the place of voting residence and otherwise eligible to vote as an absentee:

- a. Members of the Armed Forces in active service and their spouses and dependents.
- b. Members of the U.S. Merchant Marine and their spouses and dependents.
- c. U.S. citizens residing outside the territorial limits of the United States and the District of Columbia and their spouses and dependents residing with or accompanying them. [E080.1.1]

**8.1.2 Eligibility**

To be mailable without prepayment of postage, the balloting materials must be deposited at a U.S. post office, an overseas U.S. military post office, or an American Embassy or American Consulate. [E080.1.2]

**8.1.3 Between Officials**

Balloting materials may be mailed between state and local election officials, individually or in bulk, without prepayment of postage. Packages of materials mailed in bulk must bear an address label as described in 8.2. [E080.1.3]

**8.1.4 Elections Affected**

Materials may be for any general election of electors for President and Vice President, or of senators and representatives in Congress, and other general, primary, and special elections. [E080.1.4]

703.8.2

### 8.2 Marking

#### 8.2.1 Envelope

The envelope used to send balloting material and the envelope supplied for return of the ballots must have printed across the face the words “Official Absentee Balloting Material—First-Class Mail” (or similar language required by state law) in a rectangular box. Immediately below, the words “No Postage Necessary in the U.S. Mail—DMM 703.9.0” must be printed. Envelopes previously approved with the citation “DMM E080” must not be rejected. In the upper right corner of the envelope, in a rectangular box, the words “U.S. Postage Paid, 39 USC 3406” must be printed. An appropriate inscription or blank spaces for the return address of the sender must be shown in the upper left corner (see [Exhibit 8.2.1](#)). [E080.2.1]

#### Exhibit 8.2.1 Balloting Material Formats—Envelope

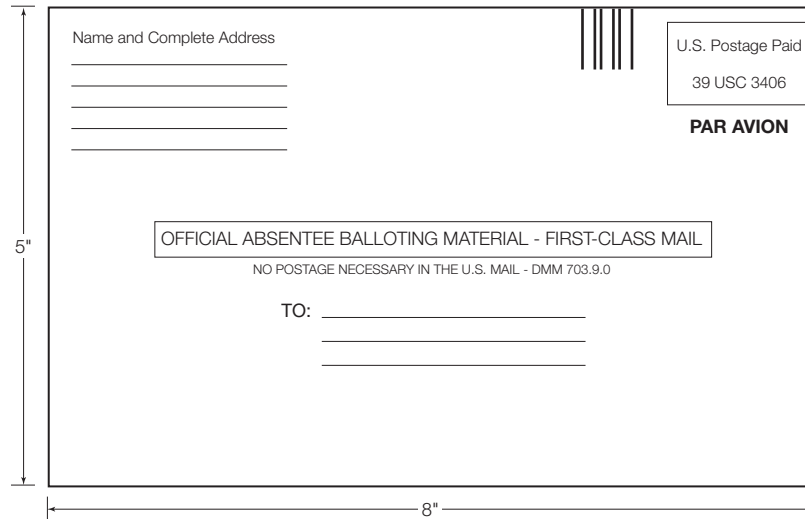

The diagram shows a rectangular envelope layout. In the top-left corner, there are five horizontal lines for the return address, with the label "Name and Complete Address" above them. In the top-right corner, there is a rectangular box containing the text "U.S. Postage Paid" and "39 USC 3406". To the left of this box are three vertical bars. Below the postage-paid box, the text "PAR AVION" is printed. In the center of the envelope, there is a rectangular box containing the text "OFFICIAL ABSENTEE BALLOTING MATERIAL - FIRST-CLASS MAIL". Below this box, the text "NO POSTAGE NECESSARY IN THE U.S. MAIL - DMM 703.9.0" is printed. Below that, the return address is listed: "SECRETARY OF STATE OF WASHINGTON", "CHAMPAIGN COUNTY ELECTIONS BOARD", "CHAMPAIGN COUNTY COURTHOUSE", "1234 MAIN ST", "ANYTOWN WA 98765-4321". At the bottom right of the envelope, there is a barcode.

[Exhibit E080.2.1]

**8.2.2 Postcard**

The federal voting registration postcard application must be approximately 5 by 8 inches. The design shown in [Exhibit 8.2.2](#) must be printed on the address side of the card. [E080.2.2]

**Exhibit 8.2.2 Balloting Material Formats—Postcard**

[Exhibit E080.2.1]

**8.2.3 FIM (Facing Identification Mark)**

The correct facing identification mark (FIM) as described in [507.8.8.8](#) must be printed on the address side of envelopes and cards. [E080.2.3]

**9.0 Mixed Classes**

**9.1 Basic Eligibility Information for Mixed Classes**

**9.1.1 General Eligibility**

When mail of a higher class is enclosed with mail of a lower class, the postage on the entire piece or package is charged at the rate of the higher class, except under [9.2](#) through [9.6](#) in *Mixed Classes*. [E070.1.1]

**9.1.2 Concealing Higher Classes**

A mailer is subject to a fine if the mailer knowingly conceals letters or other mail of a higher class (or rate) in mail sent at a lower class (or rate) without paying the correct postage on the enclosures (18 USC 1723). [E070.1.2]

## 9.2 Eligibility for Attachments of Different Classes

### 9.2.1 First-Class Mail or Standard Mail

Letters or other pieces of First-Class Mail or Standard Mail may be placed in an envelope and attached to the address side of a Periodicals, Standard Mail, or Package Services piece. Combination envelopes or containers with separate parts for the two classes of mail may be used. [E070.2.1]

### 9.2.2 Rate Qualification

If a Periodicals, Standard Mail, or Package Services host piece qualifies for:

- a. A presort discount, a First-Class Mail or Standard Mail attachment is eligible for the comparable First-Class Mail or Standard Mail presort rate. The attachment need not meet the volume standard that would apply if mailed separately.
- b. An automation rate, a First-Class Mail or Standard Mail attachment is eligible for the comparable First-Class Mail or Standard Mail rate. The attachment need not meet the volume standards that would apply if mailed separately. An automation rate may not be claimed for an attachment unless a similar automation rate is claimed for the host piece. If the attachment makes the host piece incompatible with automation standards, neither the host piece nor the attachment qualifies for an automation rate.
- c. A carrier route rate, a First-Class Mail or Standard Mail attachment is eligible for the comparable First-Class Mail or Standard Mail rate if every host piece for which the carrier route rate is claimed has a First-Class Mail or Standard Mail attachment. The attachment need not meet the volume standard that would apply if mailed separately. A carrier route rate may not be claimed for an attachment unless a similar rate is claimed for the host piece.
- d. A destination entry rate (DDU, DSCF, DADC, or DBMC), a Standard Mail attachment is eligible for the comparable destination entry rate. The attachment need not meet the volume standard that would apply if mailed separately. A rate including a destination entry discount may not be claimed for an attachment unless a similar rate is available and claimed for the host piece. [E070.2.2]

## 9.3 Eligibility for an Enclosure in Periodicals Publication

### 9.3.1 All Enclosures

Except under 9.3.2, all enclosures mailed with a bound publication must be bound into the publication or securely affixed to a page of the publication. Enclosures mailed with an unbound publication must be combined with, and inserted within, the publication. Subject to payment of the applicable postage, separate and independent pieces of nonincidental First-Class Mail and pieces of Standard Mail may be mailed as enclosures with Periodicals publications. [E070.3.1]

### 9.3.2 Loose Enclosure

A loose enclosure may be mailed with a bound Periodicals publication only if:

- a. The enclosure and the Periodicals materials are totally enclosed in an envelope or plastic or paper wrapper; or the enclosure and the Periodicals materials are inside a sleeve and the enclosures are inserted within the publication and held by tension or secured to prevent separating from the publication while in the mail.

- b. For Standard Mail matter, the total weight of all enclosed material is less than 16 ounces.
- c. If enclosed in a plastic wrapper or polybag, the Periodicals publication is the top or bottom piece, faces out, and its title is visible.
- d. The enclosure is not addressed. [E070.3.2]

#### **9.4 Eligibility for an Enclosure in Standard Mail and Package Services Parcels**

##### **9.4.1 First-Class Mail**

Letters or other pieces of First-Class Mail may be enclosed in pieces of Standard Mail and Package Services. Postage at the appropriate First-Class rate must be paid for each piece of First-Class Mail, except incidental First-Class attachments or enclosures under 9.5. [E070.4.1]

##### **9.4.2 Standard Mail**

Standard Mail may be enclosed in a Package Services parcel mailed at Package Services rates or under 4.0, *Mail Sent by U.S. Armed Forces*. Postage at the applicable First-Class Mail or Standard Mail rate must be paid on this matter, unless excepted by the rates and eligibility standards in 453, 463, 473, and 483. [E070.4.2]

#### **9.5 Eligibility for an Incidental First-Class Attachment or Enclosure**

An incidental attachment or enclosure must be closely associated with or related to the piece to which it is attached or in which it is enclosed; must be secondary to that piece; must not encumber postal processing; and must *require* First-Class postage if mailed separately. Incidental First-Class matter may be enclosed in or attached to Periodicals matter, Standard Mail merchandise (including books but excluding merchandise samples), and Package Services matter. The attached or enclosed incidental matter may be mailed at the applicable postage rate of the host piece with which it is attached or enclosed. Incidental First-Class matter includes a bill for the product or publication, a statement of account for past purchases, and a personal message or greeting included with a product, publication, or parcel. [E070.5.0]

#### **9.6 Eligibility for Combined Mailing of Media Mail and Bound Printed Matter**

##### **9.6.1 Machinable Parcels**

A mailer may combine into one parcel separate and distinguishable pieces of Media Mail and Bound Printed Matter for the same addressee, if these combined pieces form a regular machinable parcel as defined in 401.1.5. [E070.6.1]

##### **9.6.2 Presorted Rates**

Presorted rates may be claimed, subject to the applicable preparation standards. If Presorted rates are claimed on both subclasses, the mail must be prepared under the standards for Bound Printed Matter in 365.5.0 for flats and 465.5.0 for parcels. [E070.6.2]

#### **9.7 Markings on Mixed Mail**

##### **9.7.1 Attachments**

First-Class attachments must be marked “First-Class” or “Letter Enclosed.” Standard Mail attachments must be marked “Standard” or “STD.” [M071.1.1]

703.9.7.2

**9.7.2 Enclosures**

When a Periodicals publication is mailed with a nonincidental First-Class Mail or any Standard Mail enclosure, the corresponding “First-Class Mail Enclosed” or “Standard Mail Enclosed” marking must be placed on or in the host publication as follows:

- a. If placed on the outer wrapper, polybag, envelope, or cover of the host Periodicals publication, the marking must be set in type no smaller than any used in the change-of-address notice in the identification statement.
- b. If placed in the identification statement, the marking must meet the standard in [9.7.2a](#).
- c. Except under [9.8](#) through [9.10](#), the marking must not be on or in copies without a First-Class Mail or Standard Mail enclosure. [M071.1.2]

**9.7.3 Parcels**

The mailer must mark “First-Class Mail Enclosed” or “Standard Mail Enclosed” on each Standard Mail and Package Services parcel with such an enclosure. The marking must be placed below the postage and above the delivery address, using any method that produces legible wording. [M071.1.3]

**9.8 Postage Payment for Attachments of Different Classes****9.8.1 Computation and Payment**

Postage for the host Periodicals, Standard Mail, or Package Services piece must be paid under the applicable standards. Except for incidental First-Class Mail attachments under [9.11](#), First-Class Mail or Standard Mail attachments must have postage affixed at the proper rate. [P070.1.1]

**9.8.2 Postage Statements**

Separate postage statements using the proper USPS forms must be prepared for the host piece and the attachment and must be submitted at the time of mailing. [P070.1.2]

**9.8.3 Mailing Fee**

The annual mailing fee must be paid for the current 12-month period at each office where postage for a Standard Mail attachment is paid at any Standard Mail rate. [P070.1.3]

**9.9 Postage Payment for Enclosure in Periodicals Publication****9.9.1 General Rule**

Postage for the Periodicals publication is paid under [707.16.0](#). The proper First-Class Mail or Standard Mail rate is paid for the enclosed material, based on the comparable Periodicals rate applicable to the addressed piece containing the enclosure. [P070.2.1]

**9.9.2 Authorized Payment Method**

A publisher authorized for Centralized Postage Payment (CPP) may arrange to submit postage statements and pay postage for First-Class Mail or Standard Mail enclosures to the designated post office (DPO) under the relevant standards in [707.16.0](#). The publisher must be authorized by the DPO each time the Periodicals publication is mailed with a First-Class Mail or Standard Mail enclosure. [P070.2.2]

**9.9.3 Multiple Items**

When more than one enclosure of the same mail class is enclosed with a publication, they may be treated as a single enclosure for computing postage.

[P070.2.3]

**9.9.4 Affixing Postage**

Postage for a First-Class Mail or Standard Mail enclosure may be paid by affixing the correct amount in precanceled or meter stamps to the enclosure or to the outer wrapper, polybag, envelope, or cover of the host Periodicals publication. [P070.2.4]

**9.9.5 Permit Imprint—Outside Publication**

Postage for a First-Class Mail or Standard Mail enclosure may be paid with a permit imprint placed on the outer wrapper, polybag, envelope, or cover of the host Periodicals publication if:

- a. The permit imprint is prepared as shown in [604.6.0](#).
- b. The permit imprint and any required marking are set in type no smaller than any used in the change-of-address notice (“POSTMASTER: ...”) in the identification statement.
- c. The permit imprint and marking appear only on copies accompanied by a First-Class Mail or Standard Mail enclosure.
- d. Unless postage for the host publication is paid under CPP or plant-verified drop shipment procedures, the mail is entered at the post office where the permit is held. [P070.2.5]

**9.9.6 Permit Imprint—Inside Publication**

Postage for a First-Class Mail or Standard Mail enclosure may be paid with a permit imprint placed in the identification statement of the host Periodicals publication if:

- a. The permit imprint is prepared under [604.6.0](#).
- b. The permit imprint and any required marking are set in type no smaller than any used in the change-of-address notice (“POSTMASTER: ...”) in the identification statement and surrounded by either a black line or a 1/4-inch clear area.
- c. The permit imprint and the required markings are only on copies accompanied by a First-Class Mail or Standard Mail enclosure unless the marking in all copies is followed by both a list of the editions or edition codes mailed with a First-Class Mail or Standard Mail enclosure and the edition name or edition code that applies to the respective copy.
- d. Unless postage for the host publication is paid under CPP or plant-verified drop shipment procedures, the mail is entered at the post office where the permit is held. [P070.2.6]

**9.9.7 Permit Imprint—Omitted**

A permit imprint need not be printed on the outer wrapper, polybag, envelope, or cover of the host publication, and need not be printed inside the publication, when the marking “First-Class Mail Enclosed” or “Standard Mail Enclosed,” as appropriate, is placed on the outer wrapper, polybag, envelope, or cover of the host publication, or in the Identification Statement. [P070.2.7]

703.9.9.8

**9.9.8 Computing Permit Imprint Postage**

Permit imprint postage for the enclosure is computed at the applicable First-Class Mail or Standard Mail rate, corresponding to the number of copies of the Periodicals publication prepared with the enclosure. The enclosure is eligible for the rate for its class of mail that is most comparable to the presort and destination discounts that apply to the Periodicals host piece. For example, a Standard Mail enclosure is eligible for the SCF entry discount if the publication is deposited at the destinating SCF. When more than one enclosure of the same class of mail is enclosed with a publication, the enclosures are treated as a single enclosure for computing postage. Postage for the First-Class Mail or Standard Mail enclosure must be claimed on the proper postage statement. [P070.2.8]

**9.9.9 Mailing Fee**

The annual mailing fee must be paid for the current 12-month period at each office where postage for a Standard Mail enclosure is paid at any Standard Mail rate.

[P070.2.9]

**9.9.10 Documentation**

Subject to [708.1.0](#), documentation for a mailing of a Periodicals publication with nonincidental First-Class Mail or Standard Mail matter enclosed includes:

- a. The Periodicals postage statement and any supporting documentation specified in the standards for the rate claimed.
- b. The First-Class Mail or Standard Mail postage statement for the enclosed matter.
- c. Amendments or additions to the documentation required in [9.9.10a](#) as necessary to account for the enclosed matter and support the postage claimed for it. [P070.2.10]

**9.10 Postage Payment for Enclosure in Standard Mail and Package Services Parcel****9.10.1 Postage**

Postage for the enclosure must be placed on the outside of the parcel, either separately or by addition to the postage for the parcel itself. [P070.3.1]

**9.10.2 Postage Statements**

Separate postage statements for the host piece (if required) and the enclosure must be submitted at the time of mailing. [P070.3.2]

**9.11 Postage Payment for Incidental First-Class Mail Attachment or Enclosure****9.11.1 Computation**

Postage is based on the weight of the host piece plus the weight of the incidental attachment or enclosure and is paid at the rate applicable to the host piece.

[P070.4.1]

**9.11.2 Periodicals**

Postage for an incidental attachment or enclosure with a Periodicals piece is determined as follows:

- a. If the Periodicals piece consists entirely of nonadvertising matter, the attachment or enclosure is also considered nonadvertising matter.
- b. If the Periodicals piece consists of advertising and nonadvertising matter, the attachment or enclosure is considered advertising matter. [P070.4.2]

## **9.12 Postage Payment for Combined Mailings of Media Mail and Bound Printed Matter**

### **9.12.1 Postage**

Postage for each separate unit must be placed on the outside of the parcel. [P070.5.1]

### **9.12.2 Postage Statements**

When required, a separate postage statement must be submitted for each part of the combined mailing. [P070.5.2]

### **9.12.3 Endorsement**

In addition to the required rate markings, each parcel must show, below the postage and above the address, an endorsement declaring the enclosure and the additional postage paid for it (e.g., "Bound Printed Matter Enclosed \$1.46"). [P070.5.3]

### **9.12.4 Rating of Unmarked Parcel**

A parcel containing Media Mail and Bound Printed Matter is charged postage at Inter-BMC/ASF Parcel Post rates if it:

- a. Is not endorsed as specified in 9.12.3.
- b. Does not consist of separate and distinguishable units of mail.
- c. Is not machinable. [P070.5.4]

## **9.13 Extra Services for Mixed Classes**

### **9.13.1 Special Handling**

A combination mailpiece sent as a Package Services parcel may be sent using special handling; only one special handling fee is charged for the parcel. [S070.1.2]

### **9.13.2 Insured and COD**

A combination mailpiece may be sent insured or COD. The insurance covers only the value of the parcel. [S070.1.3]

### **9.13.3 Registered**

A combination mailpiece may not be registered. [S070.1.4]

# 705 Advanced Preparation and Special Postage Payment Systems

## Overview

- 1.0 Customized MarketMail
- 2.0 Manifest Mailing System (MMS)
- 3.0 Optional Procedure (OP) Mailing System
- 4.0 Alternate Mailing System (AMS)
- 5.0 First-Class or Standard Mail Mailings With Different Payment Methods
- 6.0 Preparation for Combined Mailings of Standard Mail and Package Services Parcels
- 7.0 Combining Package Service Parcels for Destination Entry
- 8.0 Preparation for Pallets
- 9.0 Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats
- 10.0 Preparation for Merged Containerization of Bundles of Flats Using City State Product
- 11.0 Preparation of Cobundled Automation Rate and Presorted Rate Flats
- 12.0 Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold
- 13.0 Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold
- 14.0 Preparation for Plant Load Mailings
- 15.0 Plant-Verified Drop Shipment (PVDS)
- 16.0 Express Mail and Priority Mail Drop Shipment
- 17.0 Metered Mail Drop Shipment

## 1.0 Customized MarketMail

### 1.1 Basic Standards

#### 1.1.1 General

Customized MarketMail (CMM) is an option for mailing nonrectangular and irregular-shaped Regular Standard Mail and Nonprofit Standard Mail pieces if the pieces weigh 3.3 ounces or less and meet the physical characteristics and the dimensional requirements in [1.1.3](#) and the mail preparation standards in [1.4](#). Other Regular and Nonprofit Standard Mail pieces measuring 3/4 inch thick or less and meeting the applicable standards in [1.0](#) may be entered as CMM at the mailer's option. CMM must be entered directly at a destination delivery unit (DDU). [E660.1.1]

#### 1.1.2 Eligibility Standards

All pieces in a CMM mailing must:

- a. Meet the basic standards for Standard Mail in [243.2.0](#) through [243.4.0](#) in *Rates and Eligibility* and, for Nonprofit Standard Mail, the additional standards in [703.1.0](#).

## 705.1.1.3

- b. Be part of a single mailing of at least 200 addressed pieces. All pieces must be identical in size, shape, and weight unless excepted by standard under an approved postage payment system.
- c. Bear a complete delivery address using the general addressing formats in [602.1.0](#) or the exceptional or occupant address formats in [602.3.0](#), *Use of Alternative Addressing*, with the correct ZIP Code or ZIP+4 code. Each piece also must bear a carrier release endorsement as specified in [508.1.0](#), *Recipient Options*. These additional addressing standards apply:
  - 1. Detached address labels (DALs) under [602.4.0](#) are not permitted.
  - 2. Ancillary service endorsements under [507.1.0](#), *Treatment of Mail*, are not permitted.
  - 3. The ZIP Code accuracy standard in [243.3.6](#) must be met.
  - 4. At the mailer's option, a carrier route information line under [708.6.0](#) may be added. If this option is used, a carrier route code must be applied to every piece in the mailing and must meet the carrier route accuracy standard in [243.6.2](#).
- d. Be marked, sorted, and documented as specified in [1.4](#).
- e. Be entered at the destination delivery unit appropriate to the delivery address on the corresponding mail, as a mailing subject to the applicable requirements in [243.2.0](#) through [243.4.0](#) in *Rates and Eligibility* and [246.2.0](#) through [246.5.0](#) in *Enter and Deposit*, as a mailing using Express Mail or Priority Mail drop shipment under [16.4](#) and [16.5](#), or as a plant-verified drop shipment (PVDS) mailing under [15.0](#). Minimum volumes per destination are not required.  
[E660.1.2]

**1.1.3 Physical Standards**

Mailpieces prepared as Customized MarketMail (CMM) under [1.0](#) must meet these additional standards and physical characteristics:

- a. The material used for constructing the pieces must be free of sharp edges, protrusions, and other design elements that could cause harm or injury to USPS personnel handling these pieces.
- b. The dimensions of the pieces must not be smaller than the minimum dimensions for letter-size mail in [201](#) or greater than the maximum dimensions for flat-size mail in [301](#). Length and height are defined as follows:
  - 1. The length and the axis of length are determined by drawing a straight line between the two outer points most distant from each other.
  - 2. The height is determined by drawing perpendicular lines to the points that are the greatest distance above and below the axis of length. The sum of these two lines defines the height.
- c. The maximum weight may not exceed 3.3 ounces.
- d. Pieces may be rectangular or nonrectangular, may be uniform or nonuniform in thickness, and may include die cuts, holes, and voids.

- e. Pieces must be flexible enough to fit inside a minimum-size mail receptacle measuring 4-7/8 inches wide, 14-7/8 inches high, and 5-7/8 inches long (deep).
- f. Design approval by the district business mail entry manager is not required, but it is recommended. [C600.2.0]

## 1.2 Rates

Each piece in a CMM mailing is subject to the Presorted Regular or Nonprofit Standard Mail nondestination entry basic nonletter rate plus the residual shape surcharge. CMM pieces are not eligible for any discount including the parcel barcode discount in [443.5.5](#). CMM pieces are not subject to the nonmachinable surcharge for letters. [E660.2.0]

## 1.3 Extra Services

CMM is not eligible for any extra service. [E660.3.0]

## 1.4 Preparation Standards

### 1.4.1 All Mailings

All mailings and all pieces in each mailing prepared as Customized MarketMail (CMM) are subject to specific preparation standards in [1.4](#) and to these general standards:

- a. All pieces must meet the standards for basic eligibility in [243.2.0](#) through [243.4.0](#) in *Rates and Eligibility* and specific eligibility in [246.2.0](#) through [246.5.0](#) in *Enter and Deposit*. Nonprofit Standard Mail pieces must meet the additional eligibility standards in [703.1.0](#).
- b. CMM pieces must not be part of a mailing containing any other type of Standard Mail pieces.
- c. Each mailing must meet the applicable standards for mail preparation in [245.1.0](#) and [245.2.0](#) and the following:
  - 1. Subject to the marking standards in [202](#), Regular Standard Mail pieces must be marked "Presorted Standard" (or "PRSRT STD") and Nonprofit Standard Mail pieces must be marked "Nonprofit Organization" (or "Nonprofit Org." or "Nonprofit"). All pieces must also be marked "Customized MarketMail," "CUST MKTMAIL," or "CMM."
  - 2. At the mailer's option, a carrier route information line under [708.6.0](#) may be added. If this option is used, a carrier route code must be applied to every piece in the mailing and must be applied using CASS-certified software and the current USPS Carrier Route File scheme, printed Carrier Route Files, or another AIS product containing carrier route information, subject to [509.1.0](#), *Address Information System Products*, and [708.3.0](#), *Coding Accuracy Support System (CASS)*. Carrier route information must be updated within 90 days before the mailing date.
- d. Pieces are subject to the rate eligibility specified in [1.0](#), *Customized MarketMail*. [M660.1.1]

**1.4.2 Required Endorsement**

Any matter mailed as Customized MarketMail must bear the endorsement "Carrier—Leave If No Response" placed directly below the return address. If any other endorsement is used, the carrier route release endorsement must be separated by the equivalent of one blank line of the type size used. [D042.7.2]

**1.4.3 Postage**

CMM is subject to the same options of postage payment (precanceled stamps, metered postage, or permit imprint) for Standard Mail pieces as permitted under [244, Postage Payment and Documentation](#). [M660.1.2]

**1.4.4 Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile with the residual shape surcharge, must accompany each mailing. The mailer must also provide an extra copy of the postage statement and a sample of the CMM mailpiece. The sample and the copy postage statement are then forwarded by the USPS to the PCSC (see [608.8.4](#) for address). Mailings of nonidentical-weight pieces or mailings using more than three different types of containers must also be supported by standardized documentation meeting the standards in [708.1.0](#). Documentation for nonidentical-weight pieces is not required if the correct rate is affixed to each piece. [M660.1.3]

**1.4.5 Required Bundling**

Bundling is required before sacking, traying, or filling other types of mailing containers. A bundle must be prepared when two or more addressed pieces are destined to the same 5-digit ZIP Code or to the same carrier route if the optional carrier route presort level is used. The maximum weight for any bundle is 20 pounds. Pieces of irregular thickness must be counterstacked as provided in [245.2.0](#). At the mailer's option, facing slips, optional endorsement lines, or pressure-sensitive bundle labels may be used on bundles. CMM pieces prepared in optional carrier route bundles are subject to [243.6.0](#) but are not required to meet any minimum number of pieces per route. [M660.2.1]

**1.4.6 Bundling and Labeling**

Preparation sequence, bundle size, and labeling:

- a. Carrier route (optional); no minimum; and carrier route information line (required).
- b. 5-digit (required); no minimum; and facing slip (optional), red Label 5 (optional), or optional endorsement line (OEL). [M660.2.2]

**1.4.7 Required Containerizing**

The following standards apply to containerizing CMM bundles:

- a. Bundles and single pieces to a destination must be prepared in 5-digit containers or optionally in 5-digit scheme under [L606](#), carrier route, or 5-digit carrier routes containers, with no minimum volume (piece or weight) required for an individual container.

- b. Bundles for PVDS drop shipment mailings or non-PVDS mailings under [246.2.0](#) through [246.5.0](#) must be placed in letter trays, flat trays, or sacks. Bundles in Priority Mail and Express Mail drop shipments under [16.4](#) may be placed in USPS-supplied or mailer-supplied mailing containers.
- c. The container size must be appropriate to the dimensions of the pieces, and the number of containers must be appropriate to the volume of pieces in the mailing.
- d. If more than three types of containers are used, the mailing must be prepared using an approved manifest mailing system (MMS), unless the manager, Business Mailer Support (BMS) approves another postage payment system. Each mailing presented in mailer-supplied containers must include sample containers for tare weight calculations. [M660.2.3]

#### 1.4.8 Containerizing and Labeling

Containers are prepared and labeled as follows:

- a. PVDS drop shipments and non-PVDS mailings under [246.2.0](#) through [246.5.0](#) in *Enter and Deposit* must be prepared in 5-digit trays or sacks, or as an option, in 5-digit scheme (under [L606](#), Column B), carrier route, or 5-digit carrier routes trays or sacks, labeled as follows:
  - 1. Line 1: For 5-digit, carrier route, 5-digit carrier routes, city, state, and 5-digit ZIP Code on mail; for 5-digit scheme (optional), [L606](#).
  - 2. Line 2: “DEL LTR STD CMM MAN” (for letter trays); “DEL FLTS STD CMM MAN” (for flat trays); “DEL STD CMM MAN” (for sacks).
  - 3. Line 3: Office of mailing or mailer information (see [707.21.0](#), *Sack and Tray Labels*).
- b. Express Mail and Priority Mail drop shipments must be prepared in USPS-provided Express Mail or Priority Mail containers (i.e., pouches, sacks, cartons, or envelopes) or in mailer-supplied containers, labeled under [16.4](#). [M660.2.4]

## 2.0 Manifest Mailing System (MMS)

### 2.1 Description

A manifest mailing system (MMS) is a method of verifying postage payment of permit imprint mailings, as an alternative to weight verification. The MMS is an automated system that allows a mailer to document postage and fees for all pieces in First-Class Mail, Standard Mail, Package Services, and international permit imprint mailings. Each piece is assigned a unique identification number that is listed on the manifest along with pertinent information about the mailpiece. The USPS randomly selects pieces from the mailing and compares them to the manifest to determine if postage was accurately reported. The standards below describe how to mail using an MMS. [P910.1.0]

## 2.2 Basic Standards

### 2.2.1 Service Agreement

A service agreement must be signed by the mailer and a USPS representative. The agreement contains provisions regarding mailer and USPS responsibilities, including document retention, quality control, and the duration of the agreement. [P910.2.1]

### 2.2.2 Mailer System

The mailer must have an automated system that produces mail consistent with postal standards and calculates postage accurately. For presorted mail, the system also must determine the qualifying presort level and the correct rate of postage for each piece and perform the presort routines. The mailer must assign a unique identification number to each piece. Letter- and flat-size mail produced using batch processing must bear the keyline information in 2.3. The system must produce a manifest for each mailing that allows USPS verification of the postage and levels of presort. The manifest must account for every piece in the mailing, as follows:

- a. For presorted letter- and flat-size mail produced using batch processing, the manifest must list destination ZIP Codes, presort categories, batch number ranges, postage amounts, and cumulative postage amounts.
- b. For mail produced using itemized processing, the manifest must list the postage for each piece and those factors used to calculate the correct amount of postage, such as the destination postal zone and piece weight. Each page of the manifest must show cumulative postage totals.
- c. When extra services are used, the manifest must include the fees for each piece.
- d. A summary listing the required information on the postage statement must be included as the last page of the manifest unless the MMS produces a computer-generated postage statement facsimile and postage is reported on one postage statement only.
- e. A separate summary and register of mailings is required for all plant-verified drop shipment (PVDS) mailings. [P910.2.2]

### 2.2.3 Manifest Format

The two basic manifest formats are:

- a. Itemized Processing. Each piece of mail is individually listed by unique identification number, weight, and other pertinent information. Publication 401, *Guide to the Manifest Mailing System*, contains specific formats for manifests using itemized processing.
- b. Batch Processing. The mailing is divided into groups of mailpieces with consecutive identification numbers. Only the identification numbers of the first and last pieces of each group are listed, along with the piece count and the total postage charges for the entire batch. This method is limited to piece rate letter- and flat-size mailings. Publication 401 contains specific formats for manifests using batch processing. [P910.2.3]

**2.2.4 Mailer Quality Control**

The mailer must implement a quality control program that ensures proper mail preparation and provides accurate documentation. The service agreement must detail the USPS-approved quality control procedures. [P910.2.4]

**2.2.5 Permit Imprint**

Mailings deposited under the MMS program must meet the standards for permit imprint mail in 604.6.0, except that presorted letter-size or flat-size mail produced using batch processing must include the qualified rate abbreviation in the keyline. [P910.2.5]

**2.2.6 Marking**

MMS mailings must meet the marking standards for the rate claimed. Markings on presorted letter-size and flat-size mail produced using batch processing are placed in the keyline as described in 2.3.3. Markings on itemized mailpieces may be:

- a. Incorporated as part of the permit imprint.
- b. Printed or rubber-stamped above the address and immediately below or to the left of the permit imprint.
- c. Produced as otherwise specified in the MMS authorization.
- d. Provided in an endorsement line in the address area, directly above the top line of the address, if no additional information except carrier route information appears on the endorsement line. [P910.2.6]

**2.2.7 Postage Statement**

The mailer must submit a complete postage statement with each mailing. If the entry office postmaster approves, mailers may submit a computerized facsimile of the applicable USPS postage statement. Data fields may be omitted on facsimiles if they pertain to rates not claimed in the mailing. [P910.2.7]

**2.2.8 Manifest Adjustments**

When mailpieces are mutilated, spoiled, or destroyed during normal operations and cannot be presented as part of the mailing, a method of adjusting the manifest and postage statement that has been approved by the USPS must be used. Whether the method in 2.2.8a or 2.2.8b is used, the total number of pieces must be deducted at the end of the manifest and the postage statement adjusted. Use one of the following methods:

- a. For manifests using itemized processing, line out the identification number, weight, and postage information (if applicable, also line out the piece on Form 3877) or write the unique identification number, piece weight, and postage (and, if applicable, the fee amount) on a separate listing. Deduct the total number of pieces, piece weights, and postage and fees from the totals shown on the manifest, summary, and postage statement.
- b. For manifests using batch processing, write the adjustments directly on the manifest listing showing the consecutive serial number, weight increment, rate category, and postage of each item next to the batch that includes the serial number. Alternatively, a separate list may be prepared as an attachment to the manifest showing, for each spoiled piece, the consecutive serial number, weight

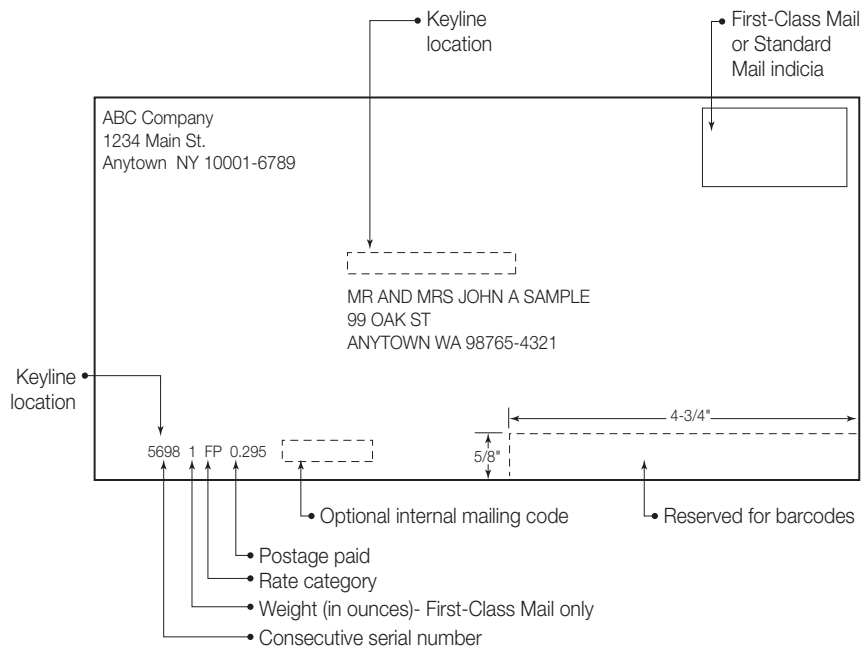

increment, rate category, and postage. The total number of pieces, piece weight, and postage must be deducted from the batch, manifest summary, and postage statement. [P910.2.8]

### 2.3 Keyline

#### 2.3.1 Batch Mailings

The keyline printed on each piece of presorted letter- or flat-size First-Class Mail or Standard Mail produced using batch processing must contain, in order, the consecutive unique piece number, the weight increment (First-Class Mail only), the rate category for which the piece qualifies, and the postage paid by weight and rate category (see Exhibit 2.3.1). [P910.3.1]

#### Exhibit 2.3.1 Letter-Size Keyline Information

[Exhibit P910.3.1]

#### 2.3.2 Mailer Codes

Codes for internal mailer use may be printed to the right of the postage-paid information, if at least two spaces separate the postage paid and any internal code information. [P910.3.2]

**2.3.3 Rate Category Abbreviations**

Keylines on First-Class Mail or Standard Mail may use only the rate category abbreviations in [Exhibit 2.3.3a](#) or [Exhibit 2.3.3b](#), respectively. All pieces that qualify for more than one postage rate must show each rate category abbreviation, separated by a “/” (slash) (e.g., EB/DS).

- a. First-Class Mail

**Exhibit 2.3.3a Rate Category Abbreviations—First-Class Mail**

| CODE | RATE CATEGORY   |
|------|---|
| AC   | Automation Carrier Route [letters only]                                       |
| AV   | Automation 5-Digit  |
| AT   | Automation 3-Digit  |
| AB   | Automation AADC   |
| AB   | Automation ADC  |
| MB   | Automation Mixed AADC   |
| MB   | Automation Mixed ADC  |
| FP   | Presorted   |
| SP   | Single-Piece Rate (when fewer than 500 pieces accompany automation rate mail) |

[Exhibit P910.3.3a]

- b. Standard Mail [P910.3.3]

**Exhibit 2.3.3b Rate Category Abbreviations—Standard Mail**

| CODE | RATE CATEGORY  |
|------|--|
| AV   | Automation 5-Digit [letters only]                      |
| AT   | Automation 3-Digit [letters only]                      |
| AF   | Automation 3/5 [flats only]                            |
| AB   | Automation AADC  |
| MB   | Automation Mixed AADC                                  |
| BB   | Automation Basic                                       |
| RA   | 3/5  |
| BS   | Basic  |
| EA   | Enhanced Carrier Route Automation Basic [letters only] |
| EB   | Enhanced Carrier Route Basic                           |
| EH   | Enhanced Carrier Route High Density                    |
| ES   | Enhanced Carrier Route Saturation                      |
| DB   | Destination Bulk Mail Center (DBMC)                    |
| DD   | Destination Delivery Unit (DDU)                        |
| DS   | Destination Sectional Center Facility (DSCF)           |

[Exhibit P910.3.3b]

**2.3.4 Keyline Location—Batch Mailings**

The keyline must be readily identifiable and placed anywhere on the address side that does not conflict with other standards (see [Exhibit 2.3.1](#) for examples). On letter-size mail, the keyline must not interfere with the OCR read area (see [202.2.1](#)) or barcode clear zone (see [202.5.1](#)). If printed on an insert, the keyline must conform to [202.5.0](#). [P910.3.4]

**2.3.5 Unique ID Number Location—Itemized Mailings**

The unique identification number must be printed on the address side of each itemized piece. It may be a product number or any other number that is not duplicated within the mailing. The numbers must be printed in overall ascending order, or in ascending order within each zone or 5-digit, 3-digit, or BMC ZIP Code area on the manifest list. [P910.3.5]

**2.4 Authorization****2.4.1 Application**

The mailer must submit an MMS application and supporting documentation as specified on the application to the postmaster of each post office where mailings will be deposited. Publication 401 contains an application to mail using an MMS. Application procedures for mailers who want to manifest and pay postage for Express Mail using an Express Mail Manifesting System are outlined in [2.6](#). [P910.4.1]

**2.4.2 Approval Review**

After the mailer completes the development and installation of the MMS, the USPS will review the system and give temporary approval if the system is functioning as required. A final review will be conducted within 90 days of the temporary approval, and final approval will be given if the system is functioning as required. [P910.4.2]

**2.4.3 General Requirements for Authorization**

General requirements for authorization are as follows:

- a. Verification samples are deemed representative of the entire mailing, and postage adjustment calculations are applied to the total mailing. The mailer must pay additional postage for any underpayments identified during USPS verification. A mailer may elect to overpay postage for pieces that are borderline weight or rate increments to avoid postage underpayment adjustments.
- b. If the total postage or the total weight of pieces sampled during a verification results in an underpayment by more than 1.5%, total postage for the mailing is adjusted.
- c. An MMS is authorized for no more than 2 years.
- d. The mailer must notify the USPS in writing of any system change that affects postage calculation, generation of required documentation, or mail presorting before the mailing is presented.
- e. Postage must be paid by an advance deposit account from which funds may be deducted by the USPS to cover any deficiency discovered after acceptance of the mail. [P910.4.3]

#### 2.4.4 Approval Authority

The final authority for manifest mailing approval is as follows:

- a. The district Customer Service and Sales manager approves systems that produce separate or mixed mailings of single-piece rate First-Class Mail, Package Services, or international mail, including mailings with extra services and predetermined weights.
- b. The Business Mailer Support manager, USPS Headquarters, approves systems that produce presorted mailings, including First-Class Mail, Standard Mail, Package Services, and PVDS mailings. [P910.4.4]

#### 2.4.5 Denial

If an MMS application is denied final approval, then the mailer may appeal the decision as follows:

- a. For MMS authorizations denied final approval by the district Customer Service and Sales manager, the mailer may, within 15 days from the receipt of the notice, file a written appeal, including additional evidence showing why the MMS should be authorized. The appeal is sent to the Business Mailer Support manager, USPS Headquarters, who issues the final agency decision.
- b. For MMS authorizations denied final approval by the Business Mailer Support manager, the mailer may, within 15 days from the receipt of the notice, file a written appeal, including additional evidence showing why the MMS should be authorized. The appeal is sent to the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision (see [608.8.0](#) for address). [P910.4.5]

#### 2.4.6 Renewal

An MMS authorization may be renewed before its expiration date after a review. The district Customer Service and Sales manager will review systems originally given final approval by that office. The Business Mailer Support manager reviews systems originally given final approval by that office. If the system remains qualified, the following applies:

- a. When the review determines that the system remains qualified, without any modifications, the existing service agreement is extended for 2 years. Approval to extend the existing agreement is sent in writing from the authorized USPS manager.
- b. When the review determines that the system was modified but continues to remain qualified, a new service agreement that details the changes to the system must be prepared. The revised service agreement must be signed by the authorized USPS manager and by the mailer.
- c. When the review determines that modifications are needed before renewal, the mailer is informed in writing of the necessary modifications. If the mailer chooses to make the modifications, the system is reviewed again under [2.4.6b](#). [P910.4.6]

## 2.5 Revocation

### 2.5.1 Revocation Authority

The revocation authority for MMS is as follows:

- a. The district Customer Service and Sales manager may revoke a mailer's MMS authorization that was originally given final approval by that office.
- b. The Business Mailer Support manager may revoke an MMS authorization originally given final approval by that office or by the district Customer Service and Sales manager. [P910.5.1]

### 2.5.2 Reasons for Revocation

An MMS authorization may be revoked if:

- a. The mailer provides incorrect data on the manifest list and appears unable or unwilling to correct the problems.
- b. The mailer is not properly completing the required quality control procedures.
- c. The mailings no longer meet MMS criteria established by this standard and in the MMS service agreement.
- d. The mailer does not present mailings under MMS for more than 6 months (except as noted in the service agreement).
- e. The mailer continues to present mailings that are improperly prepared and proper postage is not being paid. [P910.5.2]

### 2.5.3 Corrective Action

After a notice of revocation is issued, the mailer and the USPS determine corrective actions, including an implementation schedule. At the conclusion, the USPS reexamines the mailer's system. Failure to correct identified problems is sufficient grounds to revoke the mailer's MMS authorization. [P910.5.3]

### 2.5.4 Appeal of Revocation

After initial notice of revocation is received, the mailer may appeal. The mailer can continue to mail under the MMS during the appeal process. Appeals are handled as follows:

- a. For MMS authorizations given final approval by the district Customer Service and Sales manager, the mailer has 15 days from date of receipt of the notice to file a written appeal with the Business Mailer Support manager. The appeal must include the reason why the MMS authorization should not be revoked. The Business Mailer Support manager issues the final agency decision. The final revocation decision takes effect 15 days after receipt by the mailer.
- b. For MMS authorizations given final approval by the Business Mailer Support manager, the mailer has 15 days from the date of receipt of the notice to file a written appeal with the Business Mail Acceptance manager, USPS Headquarters. The appeal must include the reason why the MMS authorization should not be revoked. The Business Mail Acceptance manager issues the final agency decision. The final revocation decision takes effect 15 days after receipt by the mailer. [P910.5.4]

## 2.6 Express Mail Manifesting Agreements

### 2.6.1 Description

Express Mail Manifesting (EMM) is an automated system that allows a mailer to document postage and fees for all pieces in an Express Mail mailing by transmitting an electronic file to the Postal Service. [P910.6.1]

### 2.6.2 What May Be Manifested

EMM may be used to pay postage for domestic Express Mail items and Global Express Mail items as well as any extra service fees. Postage for other classes of mail cannot be paid through EMM. Custom-designed service and mailings to military (APO/FPO) addresses may not be mailed using EMM. [P910.6.2]

### 2.6.3 Service Guarantee

Express Mail items mailed using an EMM are covered by current Express Mail service and postage guarantees. Refunds for service failures are subject to the standards in 604.10.5. Reimbursements are paid under 604.10.5.7. [P910.6.3]

### 2.6.4 Postage Payment

Postage for EMM is paid through an Express Mail corporate account (EMCA) using the information in the mailer's electronic file. Mailers wishing to mail using an EMM system must apply for an EMCA using the procedures in 114 before an EMM agreement will be authorized. [P910.6.4]

### 2.6.5 Mail Volume

EMM is designed for large volume mailings; however, there are no minimum volume requirements. [P910.6.5]

## 2.7 Basic Standards

### 2.7.1 Mailer Participation Requirements

To participate in Express Mail Manifesting, mailers must:

- a. Develop or purchase computer software that will meet the EMM technical requirements outlined in Publication 97, *Express Mail Manifesting Technical Guide*.
- b. Obtain a DUNS® number for each mailing location.
- c. Obtain USPS certification that the mailer's software and barcoded labels meet EMM requirements.
- d. Develop and administer effective quality control procedures that will ensure the integrity of the system.
- e. Use one-ply Express Mail labels that meet the requirements in Publication 97.
- f. Be able to have the USPS accept and dispatch EMM items from their company or a postal facility at the times approved by the district marketing manager.
- g. Receive authorization to mail items using EMM under 2.8. [P910.7.1]

### 2.7.2 Mailer Quality Control

The mailer must implement a quality control program that ensures proper mail preparation and provides accurate documentation. The service agreement must detail the USPS-approved quality control procedures. [P910.7.2]

**2.7.3 Mailer System Accuracy/Manifest Adjustments**

The USPS verifies the accuracy of the EMM system by selecting mailpieces at random and comparing them to a verification manifest. If the sampling indicates that the total postage (for the sample mailpieces) is understated by more than 1.5%, the mailer must either withdraw the mailing or pay postage at an adjusted rate. Specific procedures are outlined in Publication 97. [P910.7.3]

**2.7.4 Markings, Label Specifications, and Barcodes**

No special rate markings are required on EMM items. However, barcoded EMM labels are required on all EMM mailpieces, and specific label formats must be followed. Detailed barcode and Express Mail label specifications and options are published in Publication 97. The labels are subject to approval by Product Information Requirements, Product Development, USPS Headquarters, and the National Customer Support Center (NCSC). Mailers must follow the specific certification procedures outlined in Publication 97. [P910.7.4]

**2.7.5 Mail Entry**

Mailers must present a photocopy or facsimile of Form 3152-E and a verification manifest with each mailing. [P910.7.5]

**2.7.6 Manifest Data Edit Error/Warning Listing**

Mailers must retrieve and retain the Manifest Data Edit Error/Warning Listing for each mailing that will be made available by the host computer. The listing confirms whether an electronic transmission was successful or contained errors or warnings. Specific information about this requirement is included in Publication 97 and in the mailer's EMM agreement. [P910.7.6]

**2.7.7 Form 3152-E for Postage Payment**

Form 3152-E is presented with each mailing. There is no postage affixed to the mailpieces and no postage statement presented with mailings. Postage payment is completed by electronic withdrawal of funds from a mailer's Express Mail corporate account. Form 3152-E must include the following information:

- a. Number of pieces in the mailing.
- b. Total weight of pieces in the mailing.
- c. Total postage and extra service fees, if applicable, for the mailing.
- d. EMCA number.
- e. Electronic file number from header record positions 4-25.
- f. Mailer signature.
- g. Date of mailing. [P910.7.7]

**2.8 Applications, Agreement Renewals, Modifications, Suspensions, and Cancellations****2.8.1 Applications**

Mailers must apply to use an EMM system by completing the application in Publication 97. The application must be sent to the USPS sales representative at the post office where the items will be accepted as mail. After the application and other documentation has been received and reviewed, the application and Form 1357-S is faxed to Product Information, Product Requirements, USPS

Headquarters. This office will send the contact page of the application to the Postal NCSC Delivery Confirmation Office. The Delivery Confirmation Office will send a test kit to the applicant via electronic mail to test the electronic file transmission accuracy. The application for EMM must be accompanied by the following:

- a. A completed Form 1357-S.
- b. A copy of Form 5637 showing that an Express Mail corporate account has been established.
- c. A DUNS® number for each mailing location.
- d. Sample copies of a verification manifest created from the mailer's EMM software.
- e. An EMM label sample.
- f. A rate matrix, if applicable. [P910.8.1]

### **2.8.2 Approval**

A temporary service agreement will be issued by the district marketing manager through the Business Mail Entry Office for 90 days at the location where the mailings will be verified and accepted when a review of the mailer's application and mailing operation indicates the mailer meets the eligibility requirements for entry of Express Mail items using an EMM system. Prior to the end of the 90 day temporary agreement the district business mail entry manager will conduct a final review to ensure that the system continues to meet standards. Upon a successful review, the district Customer Sales and Service manager gives final approval of the EMM system. Publication 97-A, Express Mail Manifesting Implementation and Administration Guide, outlines the specific responsibilities of the various USPS departments in approval process. [P910.8.2]

### **2.8.3 Denial**

If an application for EMM is denied by the district marketing manager, the denial is effective 15 days from the mailer's receipt of the notice unless a written appeal is filed within that time to the Business Mailer Support manager, USPS Headquarters, who issues the final agency decision on the application. [P910.8.3]

### **2.8.4 Changes, Additions, or Modifications to the Service Agreement**

If a mailer proposes to change the method of presenting or documenting mailings from the method specified in the agreement, or the mailer is no longer able to comply with the standards that apply to the authorization, the mailer must immediately notify the district marketing manager. [P910.8.4]

### **2.8.5 Renewal**

EMM agreements are valid for 2 years. The district Customer Service and Sales manager, USPS Headquarters, will conduct renewal reviews. [P910.8.5]

### **2.8.6 Postal Service Suspension**

The district Customer Service and Sales manager may suspend an EMM agreement at any time, pending review, when there is an indication that postal revenue is not fully protected. The district Customer Service and Sales manager will notify the mailer of the decision in writing. The suspension becomes effective upon the mailer's receipt of the notification. [P910.8.6]

705.2.8.7

**2.8.7 Postal Service Cancellation**

The district Customer Service and Sales manager may cancel an EMM agreement upon 15 days notice if:

- a. The mailer fails to provide a manifest with correct data.
- b. The required quality control procedures described in the EMM agreement are not properly performed.
- c. The EMM does not comply with USPS requirements.
- d. Mailings are presented that are not properly prepared or paid.
- e. No Express Mail manifest mailings are presented for more than 6 months (unless approved by the Business Mailer Support manager).
- f. The mailer has relocated or has changed ownership without notification.
- g. The 2-year renewal review reveals that the EMM agreement should no longer be authorized or the mailer is not complying with the agreement. [P910.8.7]

**2.8.8 Cancellation Notice and Appeal**

The cancellation takes effect 15 days from the mailer's receipt of the notice unless, within that time, the mailer files a written appeal with the Business Mailer Support manager. The appeal must present additional information explaining why the EMM agreement should not be canceled. The Business Mailer Support manager will issue the final agency decision. [P910.8.8]

## 3.0 Optional Procedure (OP) Mailing System

### 3.1 Basic Information

#### 3.1.1 Description

An OP Mailing System is a method of verifying and accepting First-Class Mail, Standard Mail, and Package Services paid by permit imprint. Mailings may consist of identical-weight or nonidentical-weight pieces. The OP Mailing System reviews a mailer's financial, production, and other business records in lieu of standard weight verification procedures. Postage verification is normally completed by a USPS audit of business records kept by the mailer. A USPS audit is designed to detect underpayment of postage. The burden rests with the mailer to prove any overpayment of postage. [P920.1.1]

#### 3.1.2 General Qualification

An OP Mailing System is authorized and renewed in 2-year intervals when all of the following conditions are met:

- a. The mailer's plant is operating and mailing when the application is submitted.
- b. The mailer's records provide a sound audit trail that ensures proper postage is collected.
- c. Mailings qualify as permit imprint mailings under the applicable standards.
- d. The administering post office or district can provide trained, qualified employees during the mailer's hours of mailing operations. [P920.1.2]

### 3.1.3 Quality Control

The mailer must implement a documented quality control program that ensures integrity of the system, accuracy and proper maintenance of OP records, eligibility of the mailings prepared for the postage rates claimed, and ability to take corrective actions. [P920.1.3]

### 3.1.4 Service Agreement

A service agreement must be signed by the mailer, the postmaster, the district manager, and the Business Mailer Support (BMS) manager before the first OP mailing is presented. Before the service agreement is finalized the mailer must submit an OP Mailing System application and that application must be approved under the procedures in 3.2. The agreement must set forth, among other things, the mailing information described in 3.2.3 and 3.2.4. [P920.1.4]

## 3.2 Authorization

### 3.2.1 Application

The mailer must submit an OP Mailing System application to the postmaster at the office of mailing. Publication 407, *Optional Procedure (OP) Mailing System*, available through business mail entry units and [www.usps.com](http://www.usps.com), contains an application and detailed information about mailer standards, responsibilities, and qualifying criteria. The mailer must submit, as part of the application, a complete sample job with all records to be part of the audit trail identified and labeled; a detailed explanation of how each record supports the number of pieces and presort level rate of postage claimed on the postage statements; and a detailed description of current internal quality control procedures as they relate to production and presentation of mailing. [P920.2.1]

### 3.2.2 Business Mailer Support Action

The Business Mailer Support (BMS) manager, USPS Headquarters, approves or denies applications for optional procedure. [P920.2.2]

### 3.2.3 Approval

When the application is approved, a written service agreement is signed between the USPS and the mailer to specify the types of mailings that may be mailed under the OP Mailing System (e.g., the classes of mail, processing categories, permit numbers to be used, and whether the mailer is authorized to mail identical-weight and/or nonidentical-weight pieces). [P920.2.3]

### 3.2.4 Denial

If the application is denied, the denial is effective 15 days from the mailer's receipt of the notice unless, within that time, the mailer files a written appeal with the BMS manager. The appeal must present additional information explaining why the OP application should be approved. If the manager still finds that the application should be denied, the file is forwarded to the Business Mail Acceptance manager, Postal Service Headquarters, who will issue a final agency decision to the mailer. [P920.2.4]

### 3.2.5 Changes

If the mailer proposes to change the method of presenting or documenting mailings from that specified in the agreement, or the mailer is no longer able to comply with the standards that apply to the authorization, the mailer must immediately notify the

## 705.3.2.6

BMS manager, through the postmaster of the administering post office. The BMS manager will notify the mailer in writing if the OP agreement should be modified, continued, or canceled. [P920.2.5]

**3.2.6 Additions or Modifications to the Service Agreement**

If the mailer requests additional options or modifications to the OP agreement, the mailer must submit a written request to the BMS manager stating the requested change or modification and complete documentation supporting each change or modification. The mailer's request must be submitted before the change or modification is made. Changes to the OP service agreement cannot be made until the BMS manager has notified the mailer in writing that the changes or modifications have been approved and an addendum is added to the OP service agreement. [P920.2.6]

**3.2.7 Postal Service Suspension**

The BMS manager may suspend an OP Mailing System at any time, pending review, when there is an indication that postal revenue is not fully protected. The BMS manager will notify the mailer in writing of the decision. The suspension becomes effective upon the mailer's receipt of the notification. [P920.2.7]

**3.2.8 Mailer Cancellation**

The mailer may cancel an OP Mailing System authorization at any time by written notice to the administering post office. [P920.2.8]

**3.2.9 Postal Service Cancellation**

The USPS may cancel an OP Mailing System authorization if:

- a. The mailer provides misleading or incorrect data to avoid paying postage, makes no mailings under the OP agreement during any consecutive 12-month period, or routinely fails to comply with the OP agreement or the standards applicable to the OP Mailing System.
- b. The 2-year renewal audit reveals that the OP agreement should no longer be authorized or the mailer is not complying with the agreement. [P920.2.9]

**3.2.10 Cancellation Notice and Appeal**

The cancellation takes effect 15 days from the mailer's receipt of the notice unless, within that time, the mailer files a written appeal with the BMS manager. The appeal must present additional information explaining why the OP Mailing System authorization should not be canceled. If the BMS manager does not uphold the appeal, the appeal, the additional information, and the complete record underlying the initial decision to cancel the authorization are forwarded to the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision to the mailer. [P920.2.10]

**3.3 Records****3.3.1 Mailer Responsibility**

The mailer must submit accurate postage statements and keep accurate records. The mailer must prepare a complete record for each mailing, label all component records as they are created with the mailing (and/or order) to which they relate, and

keep it at a central location for 1 year. Records used for verification of OP mailings must be records that are also routinely kept for production of other than OP mailings. [P920.3.1]

### 3.3.2 Mailer Running Summary

The mailer must maintain a running summary of mailings made to the USPS. The summary must include the permit number, date of mailing, postage statement sequence number, total pieces, weight of a single piece (or weight ranges of nonidentical-weight pieces), and the total weight and total postage for each mailing. For plant-verified drop shipment (PVDS) mailings the grand totals from the consolidated postage statement are entered on the summary. [P920.3.2]

### 3.3.3 Contents

Each mailing record must contain a sample of the mailpiece, the corresponding postage statement, and source documents required for the audit trail as specified in the mailer's OP agreement. [P920.3.3]

## 4.0 Alternate Mailing System (AMS)

### 4.1 Basic Information

#### 4.1.1 Purpose

An Alternate Mailing System (AMS) provides for other methods of accepting permit imprint mail, not established in 2.0, *Manifest Mailing System (MMS)*, or 3.0, *Optional Procedure (OP) Mailing System*, that show proper postage payment and mail preparation without verification by weight. [P930.1.1]

#### 4.1.2 Postage Adjustment

Overpayments or underpayments identified during USPS verification require a postage adjustment. Verification samples are deemed to be representative of the entire mailing and postage adjustment calculations are based on the total mailing. The mailer must pay a penalty when the sampling verification shows that the postage error exceeds 1.5% of the corrected postage. The total corrected postage for the entire mailing is deducted from the permit imprint advance deposit account. [P930.1.2]

### 4.2 Authorization

#### 4.2.1 Procedure

A mailer may request authorization to pay postage by an AMS by submitting a written request to the postmaster at the office of mailing. The request must include a complete description of the types of matter to be mailed, the proposed method of paying postage, the proposed method to determine correct mail preparation, and a statement of the reasons for requesting the alternate system. The USPS may review the mailer's operation before ruling on the application. [P930.2.1]

#### 4.2.2 Conditions

The conditions of authorization are:

- a. Authorization to use AMS must benefit the USPS.
- b. Authorization to use AMS must include a signed AMS agreement.

## 705.4.2.3

- c. An AMS agreement must specify the terms and conditions of the AMS.
- d. All postage must be paid by permit imprint unless otherwise permitted in writing by the BMS manager.
- e. There must be no additional cost to the USPS for an AMS agreement beyond the costs of current mail acceptance procedures for the mail in question.
- f. The mailer must implement a quality control program that ensures proper mail preparation and accurate documentation, subject to USPS approval. The service agreement must include details of this program. Each AMS mailing must include a statement from the mailer certifying that the approved quality control verification is done.
- g. Authorization must not exceed 2 years. [P930.2.2]

**4.2.3 BMS Action**

The BMS manager approves or denies a written request for AMS. [P930.2.3]

**4.2.4 Approval**

If the application is approved, a service agreement must be signed by the USPS and the mailer. [P930.2.4]

**4.2.5 Denial**

If the application is denied, the mailer may file a written appeal, within 15 days from the receipt of the notice, containing additional evidence explaining why the AMS request should be approved, with the Business Mail Acceptance manager, USPS Headquarters, who reviews the appeal and issues the final agency decision. [P930.2.5]

**4.2.6 Revocation**

The BMS manager may revoke an AMS authorization if the mailer:

- a. Provides incorrect data for mailings and appears unable or unwilling to correct all problems.
- b. Is not conducting required quality control procedures.
- c. No longer meets the criteria established by standard or the AMS agreement.
- d. Does not present mailings under AMS for more than 6 months (except under the service agreement).
- e. Continues to present mailings improperly prepared or mailings without correct postage. [P930.2.6]

**4.2.7 Notice of Revocation**

After a revocation notice is issued, the mailer and the USPS decide on the corrective actions and set up an implementation schedule, after which the USPS reexamines the mailer's system. Failure to correct identified problems is sufficient grounds to revoke a mailer's AMS authorization. [P930.2.7]

**4.2.8 Appeal**

Revocation proceeds if the mailer is unable or unwilling to correct the discrepancies found. The mailer may file a written appeal within 15 days from the date of receipt of the notice, which includes evidence explaining why the AMS authorization should

not be revoked. The appeal must be filed with the BMS manager for transmission to the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision. The mailer may continue to present mail under the AMS pending a decision on appeal. The revocation decision takes effect 15 days after receipt by the mailer. [P930.2.8]

## 5.0 First-Class or Standard Mail Mailings With Different Payment Methods

### 5.1 Basic Provisions

#### 5.1.1 General

After specific USPS authorization, a mailer may prepare separate First-Class Mail or Standard Mail letter-size automation rate mailings that each contain pieces paid with more than one of the three authorized methods of postage payment (permit imprint, meter stamp, or precanceled stamp) or that contain pieces having different rates of postage affixed or multiple ounces of First-Class permit imprint mail or nonidentical-weight permit imprint mail. For this standard, *mailer* or *presenter* is the entity preparing the combined mailing and presenting it to the USPS. All standards applying to each method of payment apply in a combined mailing, unless excepted below. [P960.1.1]

#### 5.1.2 Postage Payment

Postage due the USPS for permit imprint mail and additional postage for postage-affixed pieces is paid through a specific advance deposit account kept exclusively for combined mailings. [P960.1.2]

#### 5.1.3 Value Added

To request value added refunds of postage overpayments for the metered part of combined mailings, see [604.10.0, Refunds and Exchanges](#). [P960.1.3]

#### 5.1.4 Mailer Processing

The mailer must have an automated mailing system that can be shown to correctly produce automation rate letter-size mailings under the applicable standards and accurately compute and document the postage due. [P960.1.4]

#### 5.1.5 Authorization Process

To be authorized to prepare automation rate combined letter-size mailings, a mailer must submit a written request to the postmaster serving the mailer's production plant. This request must:

- a. Identify the postage payment methods to be combined, the rates of postage to be affixed to precanceled stamped or metered pieces, and, for First-Class Mail, the weight increments of pieces to be combined.
- b. Describe all steps in the automated mailing system to be used to prepare combined mailings. Include a flow chart showing how jobs are handled from the time received from clients or other departments through the time the combined mailing is presented to the post office for verification and acceptance.

## 705.5.1.6

- c. Include samples of all reports that the mailing system can generate. Number and annotate samples to describe step-by-step how the data are obtained and how each data element is supported and can be verified. Describe at which step in the mailing operation the reports may be generated, and how the reports relate to each other and to the preparation of postage statements.
- d. Describe how rejects are handled during mail preparation.
- e. Describe in detail internal quality control procedures that ensure that mailings are properly prepared, that postage statement and supporting data are accurate, and that correct postage is paid. Submit copies of quality control instructions and checklists used. [P960.1.5]

**5.1.6 On-Site Review**

The USPS examines the mailer's operation as part of the application process. During the on-site review, the mailer must:

- a. Produce a controlled test mailing with supporting documentation.
- b. Show that internal quality control procedures are satisfactorily administered.
- c. Show that the mailing system provides acceptable documentation by which the USPS can verify postage statement data. [P960.1.6]

**5.1.7 Interim Authorization**

If the mailer meets standards, the USPS grants a 90-day interim authorization to prepare combined mailings. During this time, USPS monitors the mailer's system to ensure continued compliance with all applicable standards. [P960.1.7]

**5.1.8 Final Authorization**

After the 90-day authorization, if the mailer's program meets all applicable standards, BMS prepares a detailed authorization for the mailer to follow in preparing combined mailings. The authorization period does not exceed 2 years. The mailer must give advance written notice to BMS about plans to change the system used to prepare combined mailings. [P960.1.8]

**5.1.9 Denial**

If an application is denied, the mailer may, within 15 days from receipt of the notice, file a written appeal, including additional evidence, with the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision. [P960.1.9]

**5.1.10 USPS Review**

A USPS review of the mailer's system is conducted before the expiration date:

- a. If the review shows no need for modifications to the agreement, it is renewed for a 2-year period.
- b. If the review shows modifications to the system without prior notification to BMS, but the system still remains qualified, a new agreement must be reached that details the modifications.
- c. If the review shows that the system can be renewed only with modifications required by the USPS, the mailer must be so informed and, if the mailer agrees, a new agreement is implemented under [5.1.7](#) and [5.1.8](#).

- d. If the review shows that the mailer is not properly preparing combined mailings or does not agree to USPS modifications, steps must be taken to cancel the authorization. [P960.1.10]

#### **5.1.11 Suspension**

The BMS manager may suspend a combined mailing system agreement at any time, pending investigation, if the manager finds that postage is not being fully paid or mail is not being prepared according to standards. The decision may be appealed to the Business Mail Acceptance manager, USPS Headquarters, within 15 days of the suspension by submitting a written appeal with explanation. The suspension remains in effect during the appeal. A suspension is ended when the mailer comes into compliance. [P960.1.11]

#### **5.1.12 Cancellation by USPS**

The USPS may cancel an authorization to prepare combined mailings at any time if the mailer:

- a. Provides misleading or incorrect data to avoid payment of postage.
- b. Makes no combined mailings under the agreement during any consecutive 12-month period.
- c. Fails to comply with applicable standards or the agreement, including required quality control procedures, and does not make changes to comply after USPS notification. [P960.1.12]

#### **5.1.13 Cancellation Procedure**

If the USPS decides to cancel an authorization, cancellation becomes effective 15 days from the mailer's receipt of the notice, unless the mailer files a written appeal within that time with the BMS manager. The appeal must show additional information on why the combined mailing authorization should not be canceled. If the manager denies the appeal, both the appeal and the additional information are sent to the Business Mail Acceptance manager, USPS Headquarters, who issues the final agency decision. [P960.1.13]

#### **5.1.14 Cancellation by Mailer**

The mailer may cancel an authorization to prepare combined mailings at any time by notifying the administering post office in writing. [P960.1.14]

## **5.2 Postage**

### **5.2.1 Metered Pieces—First-Class Mail**

Metered pieces in a combined mailing must bear postage for the first ounce at the Presorted rate or at an automation rate for which the pieces are eligible and, if applicable, the full amount of postage due for additional ounces. Additional postage due for metered pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at single-piece First-Class Mail rates must be paid on accompanying single-piece rate mail using one of the methods under [134.1.0](#). Additional preparation to verify postage due may be required by the USPS. [P960.2.1]

**5.2.2 Metered Pieces—Standard Mail**

Metered pieces in a combined mailing must bear postage at a Presorted or automation rate for which the pieces are eligible. Additional postage due for metered pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at single-piece First-Class Mail rates must be paid on accompanying single-piece rate mail using one of the methods under [243.3.0](#), [243.5.0](#), and [134.1.0](#). Additional preparation to verify postage due may be required by the USPS. [P960.2.2]

**5.2.3 Precanceled Pieces—First-Class Mail**

Pieces with precanceled stamps in a combined mailing must not weigh more than 1 ounce and must bear postage in any denomination of precanceled stamps permitted in a Presorted or automation rate mailing. Additional postage due for precanceled stamp pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at the single-piece First-Class Mail rate must be paid on accompanying single-piece rate mail using one of the methods under [134.1.0](#). Additional preparation to verify postage due may be required by the USPS. [P960.2.3]

**5.2.4 Precanceled Pieces—Standard Mail**

Pieces with precanceled stamps in a combined mailing must bear postage in any denomination of precanceled stamp permitted in an automation rate mailing. Nonprofit postage may appear only on pieces in a Nonprofit rate mailing that are eligible for and claimed at a Nonprofit rate. Additional postage due for precanceled stamp pieces in a combined mailing is deducted from the mailer's postage due advance deposit account. Full postage at single-piece First-Class Mail rates must be paid on accompanying single-piece rate mail using one of the methods under [243.3.0](#), [243.5.0](#), or [134.1.0](#). Additional preparation to verify postage due may be required by the USPS. [P960.2.4]

**5.2.5 Permit Imprint Pieces—First-Class Mail and Standard Mail**

Pieces in a combined mailing may bear the permit imprint of the mailer or the mailer's clients. Postage for the permit imprint part of a combined mailing must be paid by the permit imprint advance deposit account kept for combined mailings. Postage is deducted only from this account, regardless of the permit numbers or company permit imprints on pieces in a combined mailing. Full postage at single-piece First-Class rates must be paid on accompanying single-piece rate mail using one of the methods under [134.1.0](#) and, for Standard Mail, [243.3.0](#) and [243.5.0](#). Additional preparation to verify postage due may be required by the USPS. [P960.2.5]

**5.3 Producing the Combined Mailing****5.3.1 Mailer Quality Control**

Before merging different pieces into a combined presorted mailing, the mailer must have quality control procedures to ensure that:

- a. Meter dates are correct.
- b. Meter impressions are legible.
- c. Permits and licenses are current at office of mailing.

- d. In First-Class mailings, full postage on 2-ounce and 3-ounce metered and precanceled stamped pieces is affixed for the ounces in addition to postage for the first ounce at a rate acceptable for inclusion in the mailing.
- e. In Standard Mail mailings, full postage is affixed at a rate acceptable for inclusion in the mailing.
- f. Barcodes meet all applicable standards.
- g. Mailings are prepared under the relevant standards.
- h. Source mailing information (on client, job, or segment) is entered accurately into the automated mailing system.
- i. When markings are applied by an MLOCR, they properly show the applicable identifier/rate code described in [5.3.2](#) that specifies the product month designator, MASS/*FASTforward* system identifier, the method of postage payment, and the rate of postage affixed for metered and precanceled stamp mail or other postage information for permit imprint mail. These markings must be linked by the computer system to the rate entered by the mailer when the pieces are run through the MLOCR. [P960.3.1]

### 5.3.2 Rate and Postage Marking

The following markings must be applied to each piece in the mailing when markings are applied by an MLOCR. These seven-character markings provide the automation rate marking information and additional information including the product month designator, MASS/*FASTforward* (FF) system identifier, manufacturer code, and rate marking information. The product month designator is the first character position and represents the product month of the USPS ZIP+4 Product installed with the system's lookup engine responsible for the ZIP+4 assignment. Each product month is designated by a character "A" through "L" (with "A" meaning January, "B" meaning February, etc.). The MASS/FF System Identifier is characters 2 through 4 and represents the certified system identifier responsible for the ZIP+4 assignment. There is a one-to-one relationship between the certified system serial number and the assigned identifier. The manufacturer code is the fifth character and is assigned at the manufacturer's discretion with one exception: the character "Z" is assigned when the mailpiece contains a delivery point barcode in the address block and the MLOCR does not perform a lookup but simply reproduces the address block barcode. The rate marking is represented in the last two characters according to the chart below. The applicable marking must appear on each mailpiece in one of the locations authorized under [202](#) for letters, [302](#) for flats, or [402](#) for parcels.

## 705.5.3.2

## a. First-Class Mail:

| RATE MARKING |       |   |
|--------------|-------|---|
| Letters      | Flats | RATE AND POSTAGE CATEGORY                 |
| P1           | F1    | Barcoded 1-ounce Permit Imprint           |
| P2           | F2    | Barcoded 2-ounce Permit Imprint           |
| P3           | F3    | Barcoded 3-ounce Permit Imprint           |
| P4           | F4    | Barcoded 4-ounce Permit Imprint           |
|              | F5    | Barcoded 5-ounce Permit Imprint           |
|              | F6    | Barcoded 6-ounce Permit Imprint           |
|              | F7    | Barcoded 7-ounce Permit Imprint           |
|              | F8    | Barcoded 8-ounce Permit Imprint           |
|              | F9    | Barcoded 9-ounce Permit Imprint           |
|              | F0    | Barcoded 10-ounce Permit Imprint          |
|              | FA    | Barcoded 11-ounce Permit Imprint          |
|              | FB    | Barcoded 12-ounce Permit Imprint          |
|              | FC    | Barcoded 13-ounce Permit Imprint          |
| M5           | MF    | Barcoded 5-Digit Meter Postage Affixed    |
| M3           | MT    | Barcoded 3-Digit Meter Postage Affixed    |
| MA           | MD    | Barcoded AADC Meter Postage Affixed       |
| MM           | MX    | Barcoded Mixed AADC Meter Postage Affixed |
| MP           | MP    | Presorted Meter Postage Affixed           |
| S1           |       | Precanceled \$0.15 Stamp Affixed (card)   |
| S3           |       | Precanceled \$0.23 Stamp Affixed          |
| S2           |       | Precanceled \$0.25 Stamp Affixed          |

## b. Standard Mail (letters only):

| RATE MARKING | RATE AND POSTAGE CATEGORY                            |
|--------------|--|
| PI           | Barcoded Regular Permit Imprint                      |
| NI           | Barcoded Nonprofit Permit Imprint                    |
| M5           | Barcoded 5-Digit Meter Regular Postage Affixed*      |
| N5           | Barcoded 5-Digit Meter Nonprofit Postage Affixed*    |
| M3           | Barcoded 3-Digit Meter Regular Postage Affixed*      |
| N3           | Barcoded 3-Digit Meter Nonprofit Postage Affixed*    |
| MA           | Barcoded AADC Meter Regular Postage Affixed*         |
| NA           | Barcoded AADC Meter Nonprofit Postage Affixed*       |
| MM           | Barcoded Mixed AADC Meter Regular Postage Affixed*   |
| NM           | Barcoded Mixed AADC Meter Nonprofit Postage Affixed* |

\* The same code is used regardless of the destination entry rate, if any, for which the piece is metered.

| RATE MARKING | RATE AND POSTAGE CATEGORY                       |
|--------------|---|
| M8           | Presorted 3/5 Meter Regular Postage Affixed*    |
| N8           | Presorted 3/5 Meter Nonprofit Postage Affixed*  |
| M9           | Barcoded Basic Meter Regular Postage Affixed*   |
| N9           | Barcoded Basic Meter Nonprofit Postage Affixed* |
| SR           | Precanceled Regular Rate Stamp Affixed          |
| SN           | Precanceled Nonprofit Stamp Affixed             |

\* The same code is used regardless of the destination entry rate, if any, for which the piece is metered. [P960.3.2]

**5.3.3 Merging Methods and Documentation**

During the initial count of each source mailing (i.e., the quantity of mail originated by each of the mailer’s clients) by the mailer’s automated mailing system, pieces must be grouped by payment method (and, within each for First-Class, by ounce increment). All pieces within each postage-affixed group must have the same amount of postage affixed (for First-Class, the same amount of postage must be affixed for the first ounce). The mailer must keep records of each source that was merged in the combined mailing to allow the USPS to identify each source, the number of pieces by postage payment method, and, within each, by ounce increment (for First-Class), or by amount of postage affixed (for Standard Mail). The mailer must keep these records (in the form of computer-generated printouts or computer media approved by Business Mailer Support) in a central location for 90 days after the mailing date of the combined mailing. [P960.3.3]

**5.3.4 Rejected Pieces**

Pieces rejected for any reason by the mailer’s automated sorting system and pulled out of the combined mailing stream must be identified by the mailer, specifically accounted for in documentation, and:

- a. If postage-affixed, bear postage or have additional postage affixed to equal a rate no lower than the correct Presorted First-Class rate or 3/5 Presorted Standard Mail rate for letters, as applicable.
- b. If paid by permit imprint, separately presented to the USPS for verification of postage. [P960.3.4]

**5.4 Documentation**

**5.4.1 Submission**

Mailers are required to submit or generate the following reports:  
For each First-Class Mail or Standard Mail combined mailing, the mailer must provide these materials:

- a. For each postage payment method, a complete and accurate postage statement endorsed “Combined Mailing” at the top.
  - 1. A separate Form(s) 3553.

## 705.5.4.2

2. The USPS qualification report in standardized format detailing by ZIP Code the number of pieces qualifying for each rate by presort level. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS qualification report must be generated for each entry destination.
  3. The USPS Summary ZIP Destination report in one of two standardized formats that lists by tray destination and rate category: each mail category, postage payment type, weight, and rate affixed (report all postage affixed First-Class Mail pieces as weighing one ounce); number of pieces; dollar amount of postage affixed to those pieces; cumulative postage affixed; total postage; net postage due; cumulative postage due; and a running total of the number of pieces. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Summary ZIP Destination report must be generated for each entry destination. This report is not required if there is only one metered rate in the mailing. BMS may authorize submission of only portions of this report.
  4. The USPS Postage Summary in a standardized format. This report shows, by type of payment method, the total postage claimed for all pieces in the mailing by rate level and the total postage affixed by rate level. It also shows a grand total summary of postage affixed, postage claimed, and total postage due. If plant-verified drop shipment (PVDS) is used for Standard Mail, a separate USPS Postage Summary report must be generated for each entry destination.
  5. Other documentation that may be required by other standards for the rate claimed.
- b. The USPS Customer Mail Report must be generated for each mailing but is required to be submitted to the USPS only when requested by USPS personnel for the resolution of errors (shortpaid and potential MLOCR profiling) detected in a specific mailing. The Customer Mail Report must list each customer by name and provide the following information about their mail: rate affixed, mail category including postage payment type, weight, total postage, postage affixed, number of pieces, cumulative number of pieces, number of pieces rejected, and total pieces fed. [P960.4.1]

**5.4.2 Permit Imprint**

To prepare the postage statement for permit imprint pieces, the mailer multiplies the number of such pieces qualifying for each rate level (and, for First-Class Mail, in each weight increment) (as documented by the mailer) by the corresponding rate. The result is the net postage due for the permit imprint part of the combined mailing. If the mailing contains nonidentical-weight permit imprint pieces, the postage statement must be so annotated. [P960.4.2]

**5.4.3 Postage Affixed**

In completing the separate postage statements for postage-affixed pieces:

- a. Multiply the number of pieces at each rate level (which, for First-Class Mail, are treated as weighing 1 ounce or less, regardless of actual weight) by the corresponding rate of postage. The product is the postage due before adjustments are made for the value of postage affixed to those pieces.

- b. Multiply the amount of postage (or, for First-Class Mail only, first ounce postage) affixed by the number of pieces at each amount, to determine the total postage already paid.
- c. Set the amount paid against the amount due to find the postage to be paid by or to the mailer for the postage-affixed pieces. [P960.4.3]

#### 5.4.4 Reporting Results

Any additional postage due is paid through the mailer's advance deposit account for combined mailings. A "value added" refund of any overpayment of meter postage may be requested under [604.10.0](#). [P960.4.4]

## 6.0 Preparation for Combined Mailings of Standard Mail and Package Services Parcels

### 6.1 Combined Machinable Parcels—Rates Other than Parcel Post OBMC Presort, BMC Presort, DSCF, and DDU

#### 6.1.1 Qualification

Machinable Standard Mail and machinable Package Services parcels may be combined under the sortation and other requirements in [6.1](#) except when claiming the following Parcel Post rates or discounts: OBMC Presort, BMC Presort, DSCF, and DDU. When claiming the OBMC Presort, BMC Presort, or DSCF rates, machinable Standard Mail and machinable Package Services parcels may be combined under the sortation and other requirements in [6.2](#). Standard Mail parcels must not be combined with Package Services parcels prepared for DDU rates. [M073.1.1]

#### 6.1.2 Description

Subject to [6.1.1](#) and authorization under [6.1.5](#), a mailer who is authorized plant load or plant-verified drop shipment privileges may prepare a combined mailing of Standard Mail and Package Services machinable parcels that have been merged and sorted in sacks (under [6.1.5](#)) or on pallets (under [8.0](#)) to achieve the finest presort level. The combined mailing must meet the standards in [6.1](#) and those that apply to the rates claimed. Each parcel in a combined mailing is subject to the applicable Standard Mail or Package Services rate, based on the corresponding standards. Required volume for bulk or presort rates is based solely on the quantity of pieces eligible for each rate at the required presort level. Pieces claimed at other rates in the same sack or on the same pallet do not count. [M073.1.2]

#### 6.1.3 Postage Payment

Postage for all pieces must be paid with permit imprint at the post office serving the mailer's plant under [2.0](#), *Manifest Mailing System (MMS)*, [3.0](#), *Optional Procedure (OP) Mailing System*, or [4.0](#), *Alternate Mailing System (AMS)*. The applicable agreement must include procedures for combined mailings approved by BMS. [M073.1.3]

#### 6.1.4 Documentation

Separate postage statements must be prepared for the Standard Mail and Package Services pieces. Within each group, combined forms may be prepared where standards and the forms permit. All postage statements must be provided at the time of mailing, accompanied by a computer-generated listing (in ZIP Code sequence and numbered to correspond to the sacks or pallets) that describes the content of each sack or pallet. The mailer must keep this information for 90 days after the mailing is dispatched. This listing must show the mailer's name and location, the name and owner of each product for which a separate postage statement is prepared, and the entry post office. For each product, the listing must detail the number of pieces at each rate by 5-digit ZIP Code and totals for each pallet or sack and for the entire mailing. Additional documentation must be provided for all mailings of nonidentical-weight pieces or in which basic and 3/5 rate pieces are commingled and the mailer has not separated the sacks or pallets containing the pieces at the respective rates. Such documentation must be in one of these formats:

- a. Segmented sequentially by sortation level (e.g., 5-digit scheme, 5-digit, BMC) and, within each, listing a unique number or Line 1 of each sack or pallet label. For each 5-digit scheme, 5-digit, or ASF/BMC entry, the number of pieces at each rate must be shown by 5-digit scheme, 5-digit, or 3-digit ZIP Code prefix. Destination ASF/BMC sacks or pallets must show a total number of pieces in the sack or on the pallet. The entries must be summarized for the whole mailing to show total pieces at each rate, total pieces, and total postage (and additional postage due, as applicable). The sacks or pallets do not have to be presented to the USPS in any particular order.
- b. Segmented sequentially by sortation level and by 5-digit scheme and 5-digit (for sacks) or 3-digit ZIP Code prefix (for other sacks or pallets) with the number of pieces at each rate shown on the listing. The entries must be totaled for the whole mailing to show total pieces at each rate, total pieces, and total postage (or additional postage due, as applicable). If different amounts of additional postage are due, the summary must detail the number of pieces at each postage amount or at each amount of additional postage due. The sacks or pallets must be separated by sortation level when presented. [M073.1.4]

#### 6.1.5 Authorization

The requirements for authorization are as follows:

- a. A mailer who wants to present combined mailings must submit a written request to BMS. The request must show names of mail owner and mailer (if different); address of mailer's plant and mailing office (if different); names of items in combined mailing; evidence of authorization to mail under [2.0, Manifest Mailing System \(MMS\)](#), [3.0, Optional Procedure \(OP\) Mailing System](#), or [4.0, Alternate Mailing System \(AMS\)](#); expected date of first mailing; and sample of required computer-generated listings.
- b. A separate written request must be made for each group of mailpieces to be prepared. An authorization is valid only for a specifically named group of items to be combined. If documentation for more than one mailer is derived from the same computer software program, and each mailer usually mails at regular

intervals, requests for more than one mailing group may be made as part of the same authorization request. In such cases, the name of each mailer, frequency of mailing, type of product, and combination must be listed as part of the request.

- c. An authorization to combine Standard Mail and Package Services machinable parcels expires at the same time as the applicable postage payment system authorization and may not be for more than 2 years. A mailer may terminate an authorization at any time by written notice to the postmaster of the office serving the mailer's location. The USPS may terminate an authorization, by written notice, if it finds that the mailer does not meet the applicable standards. [M073.1.5]

### 6.1.6 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. 5-digit scheme (optional, but required for Standard Mail 3/5 rate eligibility); 10-piece or 20-pound minimum; labeling:
  1. Line 1: L606.
  2. Line 2: "STD/PSVC MACH 5D SCH."
- b. 5-digit (optional, but required for Standard Mail 3/5 rate eligibility); 10-piece or 20-pound minimum; labeling:
  1. Line 1: city, state, and 5-digit ZIP Code on mail (see 8.6.4 for overseas military mail).
  2. Line 2: "STD/PSVC MACH 5D."
- c. ASF (optional; allowed only for mail deposited at an ASF to claim DBMC rate); 10-piece or 20-pound minimum; labeling:
  1. Line 1: L602, Column B. DBMC rate eligibility determined by Exhibit 6.1.6.
  2. Line 2: "STD/PSVC MACH ASF."
- d. BMC (required); 10-piece or 20-pound minimum; labeling:
  1. Line 1: L601, Column B. DBMC rate eligibility determined by Exhibit 6.1.6.
  2. Line 2: "STD/PSVC MACH BMC."
- e. Mixed BMC (required); no minimum; labeling:
  1. Line 1: "MXD" followed by L601 Column B information for BMC serving 3-digit ZIP Code prefix of entry post office.
  2. Line 2: "STD/PSVC MACH WKG." [M073.1.6]

705.6.1.6

[Exhibit E751.1.3]

## 6.2 Combined Parcels—Parcel Post OBMC Presort, BMC Presort, and DSCF Rates

### 6.2.1 Qualification

Combination requirements for specific discounts and rates are as follows:

- a. When claiming Parcel Post OBMC Presort and BMC Presort discounts and DSCF rates, machinable Standard Mail parcels may be combined with machinable Package Services parcels under [6.2](#).
- b. When claiming the Parcel Post DSCF rate, machinable and nonmachinable Standard Mail may be combined with machinable and nonmachinable Package Services parcels under [6.2](#).
- c. Standard Mail parcels may not be combined with Package Services parcels prepared for DDU rates. [\[M073.2.1\]](#)

### 6.2.2 Authorization

Mailers must be authorized under [6.1.5](#) to prepare mailings that combine Standard Mail and Package Services parcels. [\[M073.2.2\]](#)

### 6.2.3 Postage Payment

Postage for all pieces must be paid with permit imprint at the post office serving the mailer's plant under an approved manifest mailing system under [2.0](#). The applicable agreement must include procedures for combined mailings approved by BMS.

[\[M073.2.3\]](#)

### 6.2.4 Preparation and Rates

Combined parcels must be prepared as follows:

- a. Minimum Mailing Volume. Separate minimum mailing volume requirements must be met for Standard Mail parcels and for Package Services parcels.
- b. Parcel Post Qualifying for DSCF Rates. The combined mailings must be prepared under the applicable 5-digit scheme and 5-digit sack requirements in [455.4.0](#) or the applicable 5-digit scheme and 5-digit pallet requirements in [8.0](#) for the Parcel Post DSCF rates. All other requirements for the Parcel Post DSCF rates and the Presorted Standard Mail rates, as applicable, must be met. The following additional requirements apply:
  1. If sacked under [455.4.0](#), the minimum requirement of seven pieces per sack must be met with only Package Services parcels. After the minimum sack volume has been met, Standard Mail parcels may be included in the sack or in overflow sacks.
  2. If palletized under the option to prepare 5-digit scheme or 5-digit pallets when there are at least 50 pieces and 250 pounds per pallet, this pallet minimum must be met with only Package Services parcels. After the minimum pallet volume has been met, Standard Mail parcels may be included on the pallet or in overflow sacks.
  3. If palletized under the alternate pallet preparation where no pallet may contain fewer than 35 pieces and 200 pounds provided the average number of pieces on pallets qualifying for the DSCF rate is at least 50, Standard Mail parcels may not be combined with Package Services parcels.

## 705.6.2.5

4. If palletized under the option to prepare 5-digit scheme or 5-digit pallets under the 36-inch-high (mail only) pallet minimum, any combination of Standard Mail or Package Services parcels may be used to meet the minimum pallet height requirement.
  5. Line 2 of 5-digit scheme pallet and sack labels must read: "STD/PSVC MACH 5D SCH." Line 2 of 5-digit pallet and sack labels must read: "STD/PSVC MACH 5D."
  6. Standard Mail parcels are eligible for the Presorted 3/5 rate.
- c. Parcel Post Qualifying for OBMC Presort or BMC Presort Rates. The combined mailings must be prepared under the 8.0 BMC pallet requirements for machinable parcels at Parcel Post OBMC Presort or BMC Presort rates. All other requirements for the Parcel Post OBMC Presort or BMC Presort rates and the Presorted Standard Mail rates must be met. The following additional requirements apply:
1. The minimum height requirement for each pallet or pallet box on a pallet may be met using any combination of Standard Mail and Package Services parcels.
  2. Line 2 of BMC pallet box labels must read: "STD/PSVC MACH BMC."
  3. Standard Mail parcels are eligible for the Presorted 3/5 rate only if it can be shown by documentation that there was insufficient volume of Standard Mail parcels in the mailing to prepare separate 5-digit scheme and 5-digit pallets required for Standard Mail machinable parcels under 8.0. Otherwise, Presorted basic rates apply to the Standard Mail parcels.  
[M073.2.4]

**6.2.5 Documentation**

Presort documentation is required as applicable for each rate claimed if the manifest does not list pieces in presort order. Separate postage statements must be prepared for the Standard Mail and Package Services pieces. Within each group, combined forms may be prepared where the standards and the forms permit. All postage statements must be provided at the time of mailing. [M073.2.5]

## 7.0 Combining Package Service Parcels for Destination Entry

### 7.1 Combining Parcels

#### 7.1.1 General

Package Services parcels may be combined, at the mailer's option and when authorized by the USPS, in 5-digit scheme and 5-digit sacks or on 5-digit scheme and 5-digit pallets for entry either at a destination sectional center facility (DSCF) or a destination delivery unit (DDU). All applicable fees for presort and drop shipment must be paid and applicable minimum volume requirements for Presort rates and Parcel Select rates must be met. Combined Package Services mailings must meet the standards in 456.2.0 and 466.2.0 through 466.5.0, except as provided by this section. Parcels may not be combined for entry at a destination bulk mail center (DBMC). Carrier Route Bound Printed Matter may not be combined with other

parcels under these standards. Presorted Media Mail and Presorted Library Mail claimed at basic rates may not be combined with other parcels under these standards. Parcels combined under these standards are not eligible for the barcoded discount. [E753.1.1]

### 7.1.2 Basic Standards

Package Services parcels that qualify as machinable, nonmachinable, and irregular under 401 and meet the following conditions may be combined in 5-digit scheme and 5-digit sacks or 5-digit scheme and 5-digit pallets under these conditions:

- a. Minimum volume requirements for Parcel Select, Presorted Bound Printed Matter, Presorted Library Mail, and Presorted Media Mail must be met separately before combining.
- b. Postage must be paid via permit imprint under an approved manifest mailing system as provided in 2.0.
- c. All parcels must be prepared in sacks under 7.2 or on pallets under 7.3. For mail entered at the DSCF rates, pallet preparation is not permitted for 5-digit ZIP Codes that are unable to handle pallets. Refer to the Drop Ship Product maintained by the National Customer Support Center (NCSC) (see 608.8.0 for address) to determine which 5-digit delivery facilities can handle pallets. If a DDU facility cannot handle pallets, and a mailer transports mail to the DDU facility on pallets, the driver will have to unload the pallets into a container specified by the delivery unit.
- d. Pieces may be claimed at single-piece rates, Presorted rates, and destination entry rates under 7.2.1 or 7.3.1.
- e. Separate postage statements must be prepared for each subclass and destination entry rate as appropriate.
- f. The deposit of combined Package Services at a DSCF or DDU must be in accordance with applicable drop shipment standards. [E753.1.2]

### 7.1.3 Authorization

Mailers apply for Business Mailer Support (BMS) authorization to combine parcels as part of a manifest mailing agreement (2.0). Current manifest mailers can apply for additional authorization to combine parcels. This authorization may not exceed 2 years. [E753.1.3]

## 7.2 Combined Parcels Prepared in Sacks

### 7.2.1 Rate Eligibility

In addition to the applicable standards in 456.2.0 and 466.2.0 through 466.5.0 for destination entry Package Services, the following standards apply for combined Package Services mail prepared in sacks:

- a. Parcel Select DSCF rates apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2, provided all other requirements for the DSCF rate in 456.2.0 are met. Parcel Select DDU rates apply to parcels that are contained in 5-digit scheme and 5-digit sacks,

## 705.7.2.2

each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2, provided all other requirements for the DDU rate in 456.2.0 are met.

- b. Presorted Bound Printed Matter DSCF rates apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2, provided all other requirements for the DSCF rate in 466.2.0 through 466.5.0 are met. Presorted Bound Printed Matter DDU rates apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2, provided all other requirements for the DDU rate in 466.2.0 through 466.5.0 are met.
- c. Presorted Library Mail 5-digit rates apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2.
- d. Presorted Media Mail 5-digit rates apply to parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2.
- e. Single-piece rate parcels that are contained in 5-digit scheme and 5-digit sacks, each containing at least 10 pieces of any combination of Package Services, or contained in overflow sacks under 7.2.2, qualify for their applicable single-piece rates. [E753.2.1]

**7.2.2 Sack Preparation**

Only 5-digit scheme and 5-digit sacks may be prepared. Each sack of combined Package Services mail must contain at least 10 pieces. One overflow sack containing fewer than 10 pieces is permitted per 5-digit scheme and 5-digit destination. [E753.2.2]

**7.2.3 Sack Labeling**

Sack labels must be prepared as follows:

- a. 5-digit scheme (optional):
  1. Line 1: use L606, Column B.
  2. Line 2: "PSVC PARCELS 5D SCH."
- b. 5-digit:
  1. Line 1: use city, state, and 5-digit ZIP Code destination of pieces.
  2. Line 2: "PSVC PARCELS 5D." [E753.2.3]

**7.3 Combined Parcels Prepared on Pallets****7.3.1 Rate Eligibility**

In addition to the applicable standards in 456.2.0, *Parcel Select*, and 466.2.0 through 466.5.0 in *Enter and Deposit* for destination entry Package Services, the following standards apply for combined Package Services prepared on pallets:

- a. Parcel Select DSCF rates apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#), and deposited at a DSCF under [456.2.0](#). Parcel Select DDU rates apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#), and deposited at a DDU under [456.2.0](#).
- b. Presorted Bound Printed Matter DSCF rates apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or at least 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#), and deposited at a DSCF under [466.2.0](#) through [466.5.0](#). Presorted Bound Printed Matter DDU rates apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or at least 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#), and deposited at a DDU under [466.2.0](#) through [466.5.0](#).
- c. Presorted Library Mail 5-digit rates apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#).
- d. Presorted Media Mail 5-digit rates apply to pieces that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#).
- e. Single-piece rate parcels that are prepared on 5-digit scheme and 5-digit pallets, each containing at least 50 pieces and 250 pounds or 36 inches of Package Services mail, or contained in overflow sacks under [7.3.3](#), qualify for their applicable single-piece rates. [E753.3.1]

### 7.3.2 Pallet Preparation

Only 5-digit scheme and 5-digit pallets may be prepared. Each 5-digit scheme and 5-digit pallet of combined Package Services must contain at least: (1) 50 parcels and 250 pounds of mail, or (2) 36 inches of mail (excluding the height of the pallet). Pallets prepared using either minimum requirement may be combined in the same mailing. [E753.3.2]

### 7.3.3 Overflow Sacks

After filling pallets to a 5-digit scheme or 5-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in 5-digit scheme or 5-digit overflow sacks. Overflow sacks must be labeled as provided in [7.2.3](#). [E753.3.3]

### 7.3.4 Pallet Labeling

Pallet labels must be prepared as follows:

- a. 5-digit scheme (optional):
  1. Line 1: use [L606](#), Column B.

## 705.7.4

2. Line 2: "PSVC PARCELS 5D SCH."
- b. 5-digit:
  1. Line 1: use city, state, and 5-digit ZIP Code destination of pieces.
  2. Line 2: "PSVC PARCELS 5D." [E753.3.4]

**7.4 Documentation**

Separate postage statements are required for each of the separate mailings contained within the combined mailing. All postage statements must be provided at the time of mailing and must be accompanied by a BMS-approved manifest prepared in accordance with 2.0 and this section. [E753.4.0]

**8.0 Preparation for Pallets****8.1 Physical Characteristics****8.1.1 Standards**

All pallets presented to the USPS, whether USPS-provided or mailer-provided, must meet the standards in 8.1.2 through 8.1.4. Mail on such pallets must meet the standards for the class and rate claimed. [M041.1.1]

**8.1.2 Construction**

Pallets must be made of high-quality material that can hold loads equal to a gross weight of 2,200 pounds. Pallets must measure 48 by 40 inches and must allow four-way entry by forklift trucks and two-way entry by pallet jacks. [M041.1.2]

**8.1.3 Securing Pallets**

Except for stacked pallets under 8.3.1 and pallet boxes under 8.4.3, each loaded pallet of mail must be prepared to maintain the integrity of the mail and the entire pallet load during transport and handling using one of the following methods:

- a. Securing with at least two straps or bands of appropriate material. Wire or metal bands, straps, buckles, seals, and similar metal fastening devices cannot be used.
- b. Wrapping with stretchable or shrinkable plastic.
- c. Securing with at least two straps or bands of appropriate material and wrapping with stretchable or shrinkable plastic. Wire and metal bands and straps, metal buckles, metal seals, and similar metal fastening devices cannot be used. [M041.1.3]

**8.1.4 Nonconforming Mailer**

The USPS informs any mailer or mailer's agent who presents palletized mailings, including plant-verified drop shipment (PVDS), when the mailer's pallets fail to meet basic pallet integrity and safety standards. After a mailer is notified and allowed to make changes to improve load integrity, if the mailer's methods, or those of the mailer's agent, do not work, the mailer is considered nonconforming. A nonconforming mailer must meet the specifications for nonconforming mailers for top-cap use, stacking of pallets, pallet box construction, and maximum height/tiers

of trays in 8.2 through 8.5, respectively. A mailer is suspended from the pallet program if the mailer's pallets continue to fail to meet the minimum load integrity levels after being notified and allowed to make changes. [M041.1.4]

## 8.2 Top Caps

### 8.2.1 Use

Top caps are used as follows:

- a. Except as provided below, all pallets of sacks, trays, parcels, bundles of mail, or pallet boxes must be top-capped if the pallets are stacked two, three, or four tiers high when presented to the USPS for acceptance.
- b. The top pallet need not be top-capped if the strapping or banding securing the stacked pallets together neither damages the mail on the top pallet nor allows the stack to shift.
- c. Lower pallet(s) containing either parcels or bundles of mail need not be top-capped if the top surface of each pallet load provides a sturdy, flat surface, parallel to the pallet base, that allows safe and efficient stacking of pallets placed on top and prevents sliding of the top pallet(s), damage to the loaded mail, or crushing of the load. [M041.2.1]

### 8.2.2 Construction

Any material may be used as a top cap if it provides a flat, level surface horizontal to the base pallet, protects the integrity of the mail below it while supporting a loaded pallet above, and allows easy entry of a forklift to remove the upper pallet(s). Flimsy paper or fiberboard (e.g., the ends of paper rolls) or similar material is inadequate and may not be used as a top cap. [M041.2.2]

### 8.2.3 Securing

A top cap must be secured to the pallet horizontal to the plane of the base pallet, with either stretchwrap or at least two crossed straps or bands, so that the cap stays in place to protect the mail and maintain the integrity of the pallet load.

[M041.2.3]

### 8.2.4 Use by Nonconforming Mailer

A nonconforming mailer (see 8.1.4) must use top caps on all pallets of sacks, letter mail trays, parcels, or bundles of mail, regardless of weight, or on pallets containing pallet boxes no more than 60 inches high. Top caps must be approximately 48 by 40 inches and meet one of these construction standards:

- a. Five-wood boards, with uniform edges and nine-leg pallet contact for stacking.
- b. Fiberboard box-end style, with a minimum 3-inch side and wall material of at least double-wall corrugated fiberboard C-flute and/or B-flute.
- c. Fiberboard honeycomb covered on both sides, with heavy linerboard at least 1/2 inch thick.
- d. Corrugated fiberboard C-flute sheet covering the entire top of the load, with standard pallet solid fiberboard corner edge protectors. [M041.2.4]

## 8.3 Stacking Pallets

### 8.3.1 Physical Characteristics

Pallets may be stacked two, three, or four tiers high if:

- a. The combined gross weight of the stacked pallets (pallets, top caps, and mail) does not exceed 2,200 pounds.
- b. The heaviest pallet is on the bottom and the lightest is on the top.
- c. Individual pallets are secured with straps or stretchable or shrinkable plastic as specified in [8.1.3](#).
- d. The stack of pallets is secured with at least two straps or bands of appropriate material to maintain the integrity of the stacked pallets during transport and handling. Wire or metal bands, straps, buckles, seals, and similar metal fastening devices cannot be used. The stack of pallets cannot be secured together with stretchable or shrinkable plastic.
- e. Each pallet is top-capped as specified in [8.2](#).
- f. The combined height of the stacked pallets and their loads does not exceed 84 inches. *Exception:* Pallets prepared for entry at Anchorage or Fairbanks, Alaska, cannot exceed 72 inches (pallets, top caps, and mail). [M041.3.1]

### 8.3.2 Pallet Height Restriction for Nonconforming Mailer

A nonconforming mailer (see [8.1.4](#)) who stacks pallets is subject to the requirements of [8.3.1](#) with the additional restrictions that the combined height of any stacked pallets may not exceed 77 inches and that stacking pallets four tiers high is permitted only for pallets of parcels. [M041.3.2]

## 8.4 Pallet Boxes

### 8.4.1 Use

A mailer may use pallet boxes constructed of single-, double-, or triple-wall corrugated fiberboard placed on pallets to hold sacks or parcels. Pallet boxes must protect the mail and maintain the integrity of the pallet loads throughout transportation, handling, and processing. Single-wall corrugated fiberboard may be used only for light loads (such as lightweight parcels) that do not require transportation by the USPS beyond the entry office, or for Parcel Post DSCF rate mail. Mailers must supply their own pallet boxes. The base of the boxes must measure approximately 40 by 48 inches. Pallet standards require the use of pallet boxes meeting the size requirements in [8.4.2](#) for machinable Parcel Post claiming OBMC Presort and BMC Presort discounts. Pallet standards prohibit use of pallet boxes for nonmachinable Parcel Post claiming OBMC Presort and BMC Presort discounts. Pallet boxes meeting the size dimensions in [8.4.2](#) also may be used at the mailer's option for Parcel Post DSCF and Parcel Post DDU rate mail. [M041.4.1]

### 8.4.2 Height

The combined height of a single pallet, pallet box, and mail may not exceed 77 inches. The contents of the box may not extend above the top rim of the box. For all Package Services mailings entered at a DSCF or DDU, the height of the pallet

box may not exceed 60 inches (excluding the pallet). For Parcel Post OBMC Presort and BMC Presort rate mailings of machinable pieces, the height of the pallet box must not exceed 69 inches (excluding the pallet). [M041.4.2]

#### **8.4.3 Securing**

Pallet boxes must be secured to the pallet with strapping, banding, stretchable plastic, shrinkwrap, or other material (wire or metal bands, straps, buckles, seals, and similar metal fastening devices cannot be used) that ensures that the pallet can be safely unloaded from vehicles, transported, and processed as a single unit to the point where the contents are distributed with the load intact if:

- a. The pallet and its contents are transported by the USPS from the office where the mail is accepted to another postal facility where the contents are distributed; and
- b. The weight of the mail in the box is not sufficient to hold the box in place on the pallet during transportation and processing. [M041.4.3]

#### **8.4.4 Use by Nonconforming Mailer**

Except when mailing Parcel Post claiming a DSCF or DDU rate, a nonconforming mailer (see 8.1.4) may use pallet boxes only if the boxes are constructed of triple-wall corrugated fiberboard (C-flute and/or B-flute material) with a maximum height (pallet and box) of 77 inches. [M041.4.4]

### **8.5 General Preparation**

#### **8.5.1 Presort**

Pallet sortation is generally intended to presort the palletized portion of a mailing to at least the finest extent required for the corresponding class of mail and method of preparation. Pallet sortation is sequential from the lowest (finest) level to the highest and must be completed at each required level before the next optional or required level is prepared. Standard preparation terms are defined in the Mail Preparation section for each class of mail, standard presort levels are defined in 8.0, and advanced presort levels are defined in 10.0, 12.0, and 13.0. For sacks, trays, or machinable parcels on pallets, the mailer must prepare all required pallet levels before any mixed ADC or mixed BMC pallets are prepared for a mailing or job. Bundles must not be placed on mixed ADC or mixed BMC pallets. Bundles that cannot be placed on pallets must be prepared in sacks under the standards for the rate claimed. The standards for bundle reallocation to protect the SCF or BMC pallet (8.11 and 8.12) are optional methods of pallet preparation designed to retain as much mail as possible at the SCF or BMC level. These standards may result in some bundles of Periodicals flats and irregular parcels and Standard Mail flats that are part of a mailing job prepared in part as palletized flats at automation rates not being placed on the finest level of pallet possible. Mailers must use PAVE-certified presort software to prepare mailings using bundle reallocation (bundle reallocation is optional, but if performed, it must be done for the complete mailing job). [M041.5.1]

### 8.5.2 Required Preparation

These standards apply to:

- a. Periodicals, Standard Mail, and Package Services (except for Parcel Post mailed at BMC Presort, OBMC Presort, DSCF, and DDU rates). A pallet must be prepared to a required sortation level when there are 500 pounds of bundles, sacks, or parcels or 72 linear feet or six layers of letter trays. For bundles of Periodicals flats and irregular parcels and bundles of Standard Mail flats on pallets that are prepared under the standards for bundle reallocation to protect the SCF pallet (8.11), not all mail for a 5-digit scheme carrier routes, 5-digit scheme, 5-digit carrier routes, or 5-digit pallet or for a merged 5-digit scheme, merged 5-digit, or 3-digit pallet is required to be on that corresponding pallet level. For bundles of Standard Mail flats on pallets prepared under the standards for bundle reallocation to protect the BMC pallet (8.12), not all mail for a required ASF pallet must be on an ASF pallet. Mixed ADC or mixed BMC pallets of sacks, trays, or machinable parcels, as appropriate, must be labeled to the BMC or ADC (as appropriate) serving the post office where mailings are entered into the mailstream. The processing and distribution manager of that facility may issue a written authorization to the mailer to label mixed BMC or mixed ADC pallets to the post office or processing and distribution center serving the post office where mailings are entered. These pallets contain all mail remaining after required and optional pallets are prepared to finer sortation levels.
- b. Parcel Post mailed at BMC Presort, OBMC Presort, DSCF, and DDU rates. Pallets must meet the requirements specifically prescribed for these rates.  
[M041.5.2]

### 8.5.3 Minimum Load

These standards apply to:

- a. Periodicals, Standard Mail, and Package Services (except for Parcel Post mailed at BMC Presort, OBMC Presort, DSCF, and DDU rates). In a single mailing, the minimum load per pallet is 250 pounds of bundles, parcels, or sacks; or 36 linear feet or three layers of letter trays. In a mailing or mailing job presented for acceptance at a single postal facility, one overflow pallet with less than the required minimum may be prepared for mail destinating in the service area of the entry facility; that pallet must be properly labeled. Exceptions: There is no minimum load for pallets entered at a destination delivery unit if the mail on those pallets is for that unit's service area. For mail entered at an SCF, the SCF manager must authorize in writing preparation of any 5-digit, 3-digit, or SCF pallet containing less than the minimum required load if the mail on those pallets is for that SCF's service area.
- b. Parcel Post mailed at BMC Presort, OBMC Presort, DSCF, and DDU rates. A minimum load for the rate claimed may be stated in terms of weight, combined piece minimum and weight, or minimum height. There are separate minimum mail heights for machinable parcels and for nonmachinable parcels claimed at OBMC Presort and BMC Presort rates. Mail entered at the Parcel Post DSCF rates and prepared directly on pallets or in pallet boxes on pallets must be prepared under either a minimum height requirement or under one of two

options requiring a minimum number of pieces and pounds per pallet. There is no minimum weight requirement for an SCF pallet containing 5-digit scheme and 5-digit sacks prepared for the DSCF rate. There are no minimums for the Parcel Post DDU rate. [M041.5.3]

#### 8.5.4 Minimum Height of Mail

The definitions of the minimum height of mail used to qualify for OBMC Presort, BMC Presort, and DSCF Parcel Post rates are as follows:

- a. Machinable parcels. The minimum height of mail in a pallet box is the shortest vertical distance measured from the bottom of a pallet box to the top of the lowest mailpiece. The height of the pallet is not included in this measurement.
- b. Nonmachinable parcels. The minimum height of mail on a pallet is the shortest vertical distance measured from the top of the pallet to the top of the lowest mailpiece. The height of the pallet is not included in this measurement.

[M041.5.4]

#### 8.5.5 Maximum Load

The maximum weight (mail and pallet) is 2,200 pounds. The maximum height of a single pallet (mail and pallet) is 77 inches for bundles, parcels, sacks, or pallet boxes, or 77 inches or 12 layers of trays (whichever occurs first) for letter trays.

*Exception:* A single pallet that is prepared for entry at Anchorage or Fairbanks, Alaska, has a maximum height of 72 inches (pallet, top cap, and mail). [M041.5.5]

#### 8.5.6 Mail on Pallets

These standards apply to mail on pallets:

- a. Pieces in trays, bundles, and sacks must be prepared under the standards for the class of mail and rate claimed.
- b. When two or more Periodicals mailings, two or more Standard Mail mailings, or two or more Bound Printed Matter mailings are placed together on pallets, the mailer must keep records for each mailing as required by the standards for the class of mail.
- c. For letter-size Standard Mail and Periodicals prepared in trays on pallets, carrier route rate mail (including automation carrier route) must be prepared on separate 5-digit pallets (5-digit carrier routes pallets) from non-carrier route automation rate or Presorted rate mail (5-digit pallets).
- d. For determining minimum pallet volume, mail in letter trays is measured in full layers of trays or in linear feet. A 2-foot tray equals 2 linear feet; a 1-foot tray equals 1 linear foot.
- e. Heavier, fuller trays must be placed at the bottom of the load.
- f. For Bound Printed Matter irregular parcels, Presorted and Carrier Route rate mail may be combined on all levels of pallet. For Bound Printed Matter flats, Presorted and Carrier Route rate mail may be combined on all levels of pallet except as provided in 8.5.6g.
- g. For sacks of Periodicals, Standard Mail, and Bound Printed Matter flats or irregular parcels, carrier route rate mail must be prepared on separate 5-digit pallets from automation rate and/or presorted rate mail.

## 705.8.5.7

- h. Periodicals, Standard Mail, and Bound Printed Matter flats or irregular parcels prepared in carrier route and noncarrier route 5-digit bundles may be placed on the same merged 5-digit scheme, merged 5-digit, and 5-digit metro pallet, as appropriate. [M041.5.6]

**8.5.7 Arranging Pieces in a Bundle (“Facing”)**

Except as noted in 8.5.8, all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

**8.5.8 Counter-Stacking—Sacked and Palletized Mail**

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

**8.5.9 Labeling Bundles**

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under 708.7.0 or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Firm (Periodicals use only), blue Label F.
- b. Five-digit presort level, red Label 5.
- c. Three-digit presort level, green Label 3.
- d. ADC presort level, pink Label A.
- e. Mixed ADC presort level, tan Label X. [M020.1.3]

### 8.5.10 Securing Bundles

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under 8.5.11, bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.
- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 8.5.11 Bundles on Pallets

In addition to 8.5.7 through 8.5.10, bundles on pallets must meet the following standards:

- a. Except as noted below, bundles up to 1 inch in height (thickness) must be secured with appropriate banding, placed at least once around the girth, or with shrinkwrap. Bundles over 1 inch in height must be secured with at least two bands (plastic bands, rubber bands, twine/string, or similar material), one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or two bands.
- b. Bundles may be secured with heavy-gauge shrinkwrap plus plastic banding, only shrinkwrap, or only banding material if they can stay together during normal processing. Except for bundles of individually polywrapped pieces, bundle on BMC pallets must be shrinkwrapped and machinable on BMC parcel sorters. Bundles of individually polywrapped pieces may be secured with banding material only. Machinability is determined by the USPS. If used, banding material must be applied at least once around the length and once around the girth; wire and metal strapping are prohibited. [M020.1.5]

### 8.5.12 Sacked Mail

Mail that is not palletized (e.g., the mailer chooses not to prepare BMC pallets, or the bundles do not meet the machinability standards in 8.5.7 through 8.5.11) must be prepared under the standards for the rate claimed. For Periodicals, the mailer must separately sack bundles of each publication that are not palletized or that are excluded from palletization. Trays that are not palletized must be bedloaded. Sacks (including sacks of bundles not placed on pallets) containing bundles remaining after

705.8.5.13

all pallets are prepared may be presented with the palletized mail (and reported on the same postage statement) if separated from the palletized portion of the mailing.

[M041.5.7]

### **8.5.13 Nonconforming**

For a nonconforming mailer (see 8.1.4) of letter-size mail in trays, the combined height of a pallet and its load cannot exceed six layers of MM or EMM letter trays.

[M041.5.8]

## **8.6 Pallet Labels**

### **8.6.1 Placement**

At least two clearly visible labels must be affixed on two adjacent sides of each pallet. [M031.4.1]

### **8.6.2 Specifications**

Pallet labels must be pink for Periodicals mail or white for Standard Mail and Package Services mail. Pallet labels must measure at least 8 inches by 11 inches.

[M031.4.2]

### **8.6.3 Lettering**

Lettering for required information on pallet labels must be at least 1/2 inch high.

[M031.4.3]

### **8.6.4 Line 1 (Destination Line)**

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed on the pallet. If the pallet label does not provide enough space for all required Line 1 information, the destination ZIP Code may be placed right-justified on the line immediately below the rest of Line 1 and above Line 2 (content line). A standard abbreviation for the destination city name may be used.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., "ADC"). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit pallets for overseas military destinations, Line 1 shows, from left to right, "APO" or "FPO," followed by "AE" (for ZIP Codes within the ZIP Code prefix range 090-098), "AA" (for ZIP Codes within the 3-digit ZIP Code prefix 340), or "AP" (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail on the pallet. [M031.4.5]

### **8.6.5 Line 2 (Content Line)**

Line 2 (content line) must meet these standards:

- a. *Content Line Information:* Pallet labels must indicate whether the mail on the pallet is barcoded, or not barcoded, or both. The content line (line 2 of required information) must be the second visible line on the label. This line must show the class and processing category of the mail on the pallet and other information as specified by standard. If the content line of a pallet label does not

provide enough space for all required information, the content information may be continued right-justified on the line immediately below the content line and above the office of mailing or mailer information line. [M031.4.6]

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack, tray, and pallet labels.

| <b>CONTENT TYPE</b>  | <b>CODE</b>  |
|--|--|
| Barcoded   | BC   |
| Barcoded and Nonbarcoded   | BC/NBC   |
| Carrier Route  | C (type of route)  |
| Carrier Routes   | CR-RT or CR-RTS  |

| Working  | WKG  |

[M031.5.0]

**8.6.6 Line 3 (Origin Line)**

The office of mailing or mailer information line (line 3 of required information) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office. [M031.4.7]

**8.6.7 5-Digit, 5-Digit Carrier Routes, and 5-Digit Scheme Carrier Routes Pallets**

All 5-digit carrier routes or 5-digit scheme carrier routes pallets must show the words "CARRIER ROUTES" (or "CR-RTS") after the processing category description on the content line under 8.0, 10.0, 12.0, and 13.0. 5-digit pallets of Bound Printed Matter that contain only carrier route rate mail also must show the words "CARRIER ROUTES" (or "CR-RTS") after the "5D" pallet level description on the contents line. [M031.4.8]

**8.6.8 Extraneous Information**

Extraneous information is permitted on pallet labels if:

- a. The print size is smaller than a 1/2 inch.
- b. It does not consist of a numbered series resembling a ZIP Code or 3-digit ZIP Code prefix.
- c. It does not appear on or between the lines reserved for USPS required information (blank lines are permitted). Exception: For combined mailings of Standard Mail and Package Services machinable parcels, mailer codes and extraneous information may appear between the content line and the office of mailing or mailer information line.
- d. It is below the office of mailing or mailer information line.
- e. A 1-inch clear space is maintained around the lines reserved for USPS required information.
- f. On the office of mailing or mailer information line, the mailer's name or abbreviation, "Mailer," "From" (or "FR"), "Entered at," or a similar notation precedes the required information, or mailer codes or other extraneous information appear to the right of the required information. [M031.4.10]

**8.6.9 Periodicals Publications**

Except as provided in 8.15 for copalletized mailings, Periodicals publications must use one of the following for Line 2 class information:

- a. "PER."
- b. "NEWS" if published weekly or more often or if authorized newspaper treatment as of March 1, 1984. [M031.4.11]

**8.6.10 Pallet Bundle Information**

It is recommended that mailers preparing bundles on pallets add to the pallet label, below the office of mailing or mailer information line and according to the provisions of 8.6.8, additional information listing the number of bundles for each bundle

sortation and rate level on the pallet (i.e., the number of carrier route bundles, the number of 5-digit, 3-digit, and ADC automation rate bundles, and the number of 5-digit, 3-digit, and ADC Presorted rate bundles on each pallet). [M031.4.12]

## **8.7 Copalletized, Combined, or Mixed-Rate Level Mailings of Flat-Size Pieces**

### **8.7.1 General**

Palletized mailings (including combined, copalletized, and mixed rate level mailings) must be prepared under the standards for the class of mail, subject to specific authorization by Business Mailer Support when required. [M041.6.1]

### **8.7.2 Application**

The mailer (or publisher or agent) must submit a written request to Business Mailer Support to present the types of pallets described in this section. A separate request is required for each type of pallet at each location, but multiple, concurrent applications are acceptable. A mailer who cannot meet the minimum palletization standards without copalletizing, combining, or commingling mixed rate mailings might still qualify if the total copalletized, combined, or commingled mailing meets minimum pallet standards. The request must be received at least 30 days before the first mailing and include the names, addresses, and telephone numbers of the mail owner and of the firm or person preparing the mail; a description of the mailing (e.g., size, weight, class, rate, volume, mailing frequency, and postage payment method); the type of authorization requested; and a sample of the applicable documentation under 8.0, or 10.0, 12.0, and 13.0. [M041.6.2]

### **8.7.3 Periodicals Publications**

To combine more than one Periodicals publication on pallets, the mailer must merge and presort copies of all the publications into common bundles to achieve the finest presort level for the combined mailing. To copalletize different Periodicals flat-size publications, the mailer must consolidate on pallets all independently sorted bundles for each publication to achieve the finest presort level for the mailing. A combined or copalletized mailing prepared under 8.11, *Bundle Reallocation to Protect SCF Pallet for Periodicals Flats and Irregular Parcels and Standard Mail Flats on Pallets*, using bundle reallocation, may not always result in all bundles being placed on the finest pallet level possible. Both combined and copalletized publications must be supported by the documentation required in 8.0, or 10.0, 12.0, and 13.0. Preferred Periodicals may be combined with Regular Periodicals only as permitted by standard. [M041.6.3]

### **8.7.4 Standard Mail**

To copalletize different Standard Mail flat-size mailings, the mailer must consolidate on pallets all independently sorted bundles from each mailing to achieve the finest presort level for the mailing, except that a copalletized mailing prepared under 8.11 or 8.13 using the bundle reallocation option may not always result in all bundles being placed on the finest pallet level possible. At the time of mailing, the mailer must present computer-generated listings required in 8.0, or 10.0, 12.0, and 13.0 that include a summary list consolidating the copalletized multiple mailings and a list of the contents of each pallet by ZIP Code and presort level. [M041.6.4]

705.8.7.5

**8.7.5 Cancellation**

An authorization may be canceled by Business Mailer Support if the mailer does not meet the standards for pallets or the rates claimed or the mailer does not submit information on future mailings as requested by Business Mailer Support. A mailer may appeal canceled authorizations through Business Mailer Support to the Business Mail Acceptance manager, USPS Headquarters. [M041.6.5]

**8.8 Basic Uses**

These types of mail may be palletized:

- a. Letter-size mail in trays.
- b. Bundles of nonletter-size mail not prepared in sacks.
- c. Bundles or parcels in sacks.
- d. Machinable or irregular parcels.
- e. Copalletized multiple flat-size mailings, subject to [8.0, Preparation for Pallets](#).
- f. Combined mailings of machinable parcels (Standard Mail and Package Services), subject to [6.0](#).
- g. Two or more Periodicals publications combined or copalletized, subject to [8.0](#).
- h. Combined mailings of Nonprofit Standard Mail mixed rate levels, subject to [8.0](#).
- i. Commingled zoned rate Package Services, subject to [455.4.1.4](#). [M045.1.0]

**8.9 Bundles on Pallets****8.9.1 Applicability**

Presort destination bundles of Periodicals, Standard Mail, and Package Services flats and irregular parcels may be placed directly on pallets under [8.9.2](#) through [8.9.5](#), [8.10](#). Mail that cannot be placed on pallets must be prepared in sacks under the applicable standards in [707.22.0](#) through [707.26.0](#) for Periodicals, [245.5.0](#) and [245.6.0](#) for Standard Mail letters, [345.5.0](#) and [345.6.0](#) for Standard Mail flats, [365.5.0](#) and [365.6.0](#) for Bound Printed Matter flats, [375.5.0](#) for Media Mail flats, [385.5.0](#) for Library Mail flats, [445.5.0](#) and [445.6.0](#) for Standard Mail Parcels, [455.4.0](#) Parcel Post parcels, [465.5.0](#) and [465.6.0](#) for Bound Printed Matter parcels, [475.5.0](#) for Media Mail parcels, and [485.5.0](#) for Library Mail parcels. Sacks containing any remaining bundles after all pallets are prepared may be presented with the palletized portion of the mailing job (and, subject to [8.15.5](#), reported on the same postage statement) if the sacked portion is presented separately from the palletized portion. [M045.2.1]

**8.9.2 Basic Bundling Standards**

Bundle preparation for Periodicals, Standard Mail, and Package Services mailpieces must meet the applicable standards in [707.18.0](#), [707.19.0](#) and [707.22.0](#) through [707.26.0](#) for Periodicals, [245.1.0](#), [245.2.0](#) and [245.5.0](#) through [245.7.0](#) for Standard Mail letters, [345.1.0](#), [345.2.0](#), [345.5.0](#) and [345.6.0](#) for Standard Mail flats, [365.1.0](#), [365.2.0](#), [365.5.0](#) and [365.6.0](#) for Bound Printed Matter flats, [445.1.0](#), [445.2.0](#), [445.5.0](#) and [445.6.0](#) for Standard Mail parcels, and [465.1.0](#) and [465.2.0](#)

for Bound Printed Matter parcels, except as noted in 8.9.3 through 8.9.5 in *Bundles on Pallets*. Bundles may be sorted onto pallets under 8.10, as well as 10.0, 12.0, and 13.0. [M045.2.2]

### 8.9.3 Periodicals

Bundle size: Six-piece minimum (lower volume bundles permitted under 707.22.0, *Preparation of Presorted Periodicals*, and 707.23.0, *Preparation of Carrier Route Periodicals*), 20-pound maximum, except that:

- a. Firm bundles may contain as few as two copies of a publication and do not have to be further consolidated with other bundles to the same 5-digit destination. A firm bundle may be counted as one piece for presort standards (see 707.22.0 and 707.23.0).
- b. All pieces for the same presort destination must be in one bundle if they weigh less than 10 pounds. Otherwise, bundles must weigh from 10 to 20 pounds each.
- c. The last bundle to a presort destination may contain less than 10 pounds. [M045.2.3]

### 8.9.4 Standard Mail

Bundle size: 10-piece or 15-piece minimum as applicable; 20-pound maximum, except that:

- a. All pieces for the same presort destination must be in one bundle if they weigh less than 10 pounds. Otherwise, bundles must weigh from 10 to 20 pounds each.
- b. The last bundle to a presort destination may contain less than 10 pounds. [M045.2.4]

### 8.9.5 Bound Printed Matter

Bound Printed Matter on pallets must be bundled as follows:

- a. Minimum Bundle Size. Bundle mail under the minimum bundle size of “10 pieces or 10 pounds, whichever comes first” according to these standards:
  1. For identical-weight pieces, a single-piece weight of 1 pound results in 10 pieces weighing 10 pounds. Identical-weight pieces weighing 1 pound or less must be prepared using the 10-piece minimum; those that weigh more must be prepared using the 10-pound minimum.
  2. For nonidentical-weight pieces, mailers must either use the minimum that applies to the average piece weight for the entire mailing (divide the net weight of the mailing by the number of pieces; the resulting average single-piece weight determines whether the 10-piece or 10-pound minimum applies). Alternatively, bundle by the actual piece count or mail weight for each bundle destination, provided documentation can be presented with the mailing that shows (specifically for each bundle) the number of pieces and their total weight.
  3. Mailers must note on the accompanying postage statement whether they applied the 10-piece or 10-pound threshold, or both.
- b. Presorted and Carrier Route Bound Printed Matter:

705.8.10

1. Only individual pieces of flats or irregular parcels that weigh less than 10 pounds each may be prepared as bundles on pallets. Presorted rate pieces that weigh 10 or more pounds each must be prepared and palletized as machinable parcels under [8.10.3, Package Services Flats—Bundles and Sacks](#), or prepared in sacks under [365.5.0](#) for flats and [465.5.0](#) for parcels. Carrier route pieces that individually weigh 10 or more pounds each must either be prepared and palletized as machinable parcels under [8.10.3, Package Services Flats—Bundles and Sacks](#), and qualify for Presorted rates or be prepared in sacks under [365.6.0](#) for flats and [465.6.0](#) for parcels and qualify for carrier route rates.
2. Bundles must be prepared under [365.5.0](#) for presorted flats, [365.6.0](#) for carrier route flats, [465.5.0](#) for presorted parcels, and [465.6.0](#) for carrier route parcels, or [11.0](#) as appropriate. The minimum bundle size is 10 addressed pieces or 10 pounds, whichever occurs first, except that the last bundle to a presort destination may contain fewer than 10 pieces or weigh less than 10 pounds. When there are at least 10 pieces but less than 10 pounds for a presort destination, the pieces must be prepared in a single physical bundle. The maximum physical bundle size for pallets prepared under [8.10.3a](#) through [8.10.3g](#), and [8.10.4a](#) through [8.10.4g](#) is 40 pounds. The maximum physical bundle size for pallets prepared under [8.10.3h](#) through [8.10.3l](#), and [8.10.4h](#) through [8.10.4l](#) is 20 pounds. The total number of bundles for a single presort destination must not exceed the number of 10-pound increments to that destination. Each physical bundle must contain at least two addressed pieces. [M045.2.5]

## 8.10 Pallet Presort and Labeling

### 8.10.1 Periodicals—Bundles, Sacks, or Trays

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. See [707.28.0](#) for additional requirements for destination entry rates eligibility. For mailings of sacks or trays on pallets, pallet preparation begins with [8.10.1e](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#). All pallets prepared under [8.10.1](#) may contain firm bundles, and pallets prepared under [8.10.1a](#) through [8.10.1i](#) may contain low-volume bundles. Bundles of Periodicals nonletters (flats and irregular parcels) may also be palletized under [10.0](#), [12.0](#), or [13.0](#).

- a. *Merged 5-Digit Scheme (required)*. Permitted for bundles only. Not permitted for bundles containing noncarrier route AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats or irregular parcels. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (automation rate and/or Presorted rate bundles) for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), merged 5-digit pallet preparation begins with [8.10.1d](#). Pallet labeling:
  1. Line 1: [L001](#).
  2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “CR/5D”; followed by “SCHEME” (or “SCH”).

- b. *5-Digit Scheme Carrier Routes (required)*. Permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit carrier routes pallet preparation begins with [8.10.1e](#). Pallet labeling:
  1. Line 1: [L001](#).
  2. Line 2: "PER" or "NEWS," as applicable; followed by "FLTS" or "IRREG," as applicable; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "SCHEME" (or "SCH").
- c. *5-Digit Scheme (required)*. Permitted for bundles only. Not permitted for bundles containing AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats and irregular parcels. Pallet must contain only 5-digit bundles of automation rate and/or Presorted rate mail for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit pallet preparation begins with [8.10.1f](#). Pallet labeling:
  1. Line 1: [L001](#).
  2. Line 2: "PER" or "NEWS," as applicable; followed by "FLTS" or "IRREG," as applicable; followed by "5D"; followed by "BARCODED" (or "BC") if pallet contains automation rate mail; followed by "NONBARCODED" (or "NBC") if pallet contains Presorted rate mail; followed by "SCHEME" (or "SCH").
- d. *Merged 5-Digit (required)*. Permitted for bundles only. Not permitted for bundles containing noncarrier route AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats or irregular parcels. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (automation rate and/or Presorted rate bundles) for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  2. Line 2: "PER" or "NEWS," as applicable; followed by "FLTS" or "IRREG," as applicable; followed by "CR/5D."
- e. *5-Digit Carrier Routes (required except for trays)*. Permitted for bundles, sacks, and trays. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  2. Line 2: "PER" or "NEWS," as applicable; followed by "FLTS," "IRREG," or "LTRS," as applicable; followed by "CARRIER ROUTES" (or "CR-RTS").
- f. *5-Digit (required except for trays)*. Permitted for bundles, sacks, and trays. Pallet must contain only automation rate and/or Presorted rate mail for the same 5-digit ZIP Code or the same 5-digit scheme under [L007](#) (for AFSM 100-compatible flats only under [301.3.3](#)). Five-digit scheme ([L007](#)) bundles are assigned to pallets according to the OEL "label to" 5-digit ZIP Code. Pallet labeling:

## 705.8.10.1

1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “5D”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains Presorted rate mail.
- g. *5-Digit Metro (optional)*. Permitted for bundles only. Pallet may contain carrier route, automation rate, and/or Presorted rate bundles for the 5-digit ZIP Codes in [L006](#), Column A, and for 3-digit ZIP Code groups in [L006](#), Column B. Pallet labeling:
1. Line 1: [L006](#).
  2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS” or “IRREG,” as applicable; followed by “METRO” (or “MET”); followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail.
- h. *3-Digit (optional)*. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). Permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation rate, and/or Presorted rate mail for the same 3-digit ZIP Code or the same 3-digit scheme under [L008](#) (for AFSM 100-compatible flats only under [301.3.0](#)). Three-digit scheme ([L008](#)) bundles are assigned to pallets according to the OEL “label to” 3-digit ZIP Code. Pallet labeling:
1. Line 1: [L002](#), Column A.
  2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “3D”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail.
- i. *SCF (required)*. Permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation rate, and/or Presorted rate mail for the 3-digit ZIP Code groups in [L005](#). Pallet labeling:
1. Line 1: [L002](#), Column C.
  2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “SCF”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail.
- j. *ADC (required)*. Permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation rate, and/or Presorted rate mail for the 3-digit ZIP Code groups in [L004](#). Pallet labeling:
1. Line 1: [L004](#).

2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “ADC”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail.
- k. *Mixed ADC (optional)*. Permitted for sacks and trays only. Pallet may contain carrier route, automation rate, and/or Presorted rate mail. Pallet labeling:
1. Line 1: “MXD” followed by city, state, and ZIP Code information for ADC serving 3-digit ZIP Code prefix of entry post office as shown in [L004](#), Column A (label to plant serving entry post office if authorized by processing and distribution manager).
  2. Line 2: “PER” or “NEWS,” as applicable; followed by “FLTS,” “IRREG,” or “LTRS,” as applicable; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail; followed by “WKG.” [\[M045.3.1\]](#)

### 8.10.2 Standard Mail—Bundles, Sacks, or Trays

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. See [707.28.0](#) for additional requirements for destination entry rates eligibility. Irregular parcels prepared in bundles directly onto pallets are limited to those mailpieces that are of uniform thickness and more than 15 inches long or more than 12 inches high. For mailings of sacks or trays on pallets, pallet preparation begins with [8.10.1e](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#). Bundles of Standard Mail flats may also be palletized under [10.0](#), [12.0](#), or [13.0](#).

- a. *Merged 5-Digit Scheme (required)*. Permitted for bundles only. Not permitted for bundles containing noncarrier route AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats or irregular parcels. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (automation rate and/or Presorted rate bundles) for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), merged 5-digit pallet preparation begins with [8.10.1d](#). Pallet labeling:
1. Line 1: [L001](#).
  2. Line 2: “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “CR/5D”; followed by “SCHEME” (or “SCH”).
- b. *5-Digit Scheme Carrier Routes (required)*. Permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit carrier routes pallet preparation begins with [8.10.1e](#). Pallet labeling:
1. Line 1: [L001](#).
  2. Line 2: “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “CARRIER ROUTES” (or “CR-RTS”); followed by “SCHEME” (or “SCH”).

## 705.8.10.2

- c. *Merged 5-Digit (required)*. Permitted for bundles only. Not permitted for bundles containing noncarrier route AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats or irregular parcels. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (automation rate and/or Presorted rate bundles) for the same 5-digit ZIP Code. Pallet labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  - 2. Line 2: “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “CR/5D.”
- d. *5-Digit Carrier Routes (required except for trays)*. Permitted for bundles, sacks, and trays. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Pallet labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  - 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “CARRIER ROUTES” (or “CR-RTS”). For letters, “STD LTRS”; followed by “CARRIER ROUTES” (or “CR-RTS”); followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- e. *5-Digit (required except for trays)*. Permitted for bundles, sacks, and trays. Pallet must contain only automation rate and/or Presorted rate mail for the same 5-digit ZIP Code or same 5-digit scheme under [L007](#) (for AFSM 100-compatible flats only under [301.3.3](#)). Five-digit scheme ([L007](#)) bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code. Pallet labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  - 2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “5D”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains Presorted rate mail. For letters, “STD LTRS 5D”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- f. *5-Digit Metro (optional)*. Permitted for bundles only. Pallet may contain carrier route, automation rate, and/or Presorted rate bundles for the 5-digit ZIP Codes in [L006](#), Column A, and for 3-digit ZIP Code groups in [L006](#), Column B. Pallet labeling:
  - 1. Line 1: [L006](#).

2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “METRO” (or “MET”); followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail.
- g. *3-Digit (optional)*. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). Permitted for bundles, sacks, and trays. Pallet may contain carrier route, and/or Presorted rate mail for the same 3-digit ZIP Code or the same 3-digit scheme under [L008](#) (for AFMS 100-compatible flats only under [301.3.0](#)). Three-digit scheme ([L008](#)) bundles are assigned to pallets according to the OEL “label to” 3-digit ZIP Code. Pallet labeling:
1. Line 1: [L002](#), Column A.
  2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “3D”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail. For letters, “STD LTRS 3D”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- h. *SCF (required)*. Permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation rate, and/or Presorted rate mail for the 3-digit ZIP Code groups in [L005](#). Pallet labeling:
1. Line 1: [L002](#), Column C.
  2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “SCF”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail. For letters, “STD LTRS SCF”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- i. [\[03-17-05\]](#) [\[02-03-05\]](#) *ASF (required, unless bundle reallocation used under [8.12](#))*. Permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation rate, and/or Presorted rate mail for the 3-digit ZIP Code groups in [L602](#). ADC bundles, sacks, or trays are assigned to pallets according to the “label to” ZIP Code in [L004](#) or [L603](#), as appropriate. AADC trays are assigned to pallets according to the “label to” ZIP Code in [L801](#). At the mailer’s option, appropriate mixed ADC bundles and sacks of flats; and mixed ADC and mixed AADC trays of letters, may be sorted to ASF pallets according to the “label to” ZIP Code in [L010](#). Mixed ADC sacks of irregular parcels may be sorted to ASF pallets according to the “label to” ZIP Code in [L604](#). All mixed ADC bundles, sacks, and trays and mixed AADC trays must contain only pieces destinating within the ASF in [Exhibit 6.1.6](#). Pallet labeling:
1. Line 1: [L602](#).

2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “ASF”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail. For letters, “STD LTRS ASF”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- j. [\[03-17-05\]](#) [\[02-03-05\]](#) *BMC (required)*. Permitted for bundles, sacks, and trays. Pallet may contain carrier route, automation rate, and/or Presorted rate mail for the 3-digit ZIP Code groups in [L601](#). ADC bundles, sacks, or trays are assigned to pallets according to the “label to” ZIP Code in [L004](#) or [L603](#), as appropriate. AADC trays are assigned to pallets according to the “label to” ZIP Code in [L801](#). At the mailer’s option, appropriate mixed ADC bundles and sacks of flats; and mixed ADC trays and mixed AADC trays of letters, may be sorted to BMC pallets according to the “label to” ZIP Code in [L010](#). Mixed ADC sacks of irregular parcels may be sorted to ASF pallets according to the “label to” ZIP Code in [L604](#). All mixed ADC bundles, sacks, and trays and mixed AADC trays must contain only pieces destinating within the BMC in [Exhibit 6.1.6](#). Pallet labeling:
1. Line 1: [L601](#).
  2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “BMC”; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail. For letters, “STD LTRS BMC”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters.
- k. *Mixed BMC (optional)*. Permitted for sacks and trays only. Pallet may contain carrier route, automation rate, and/or Presorted rate mail. Pallet labeling:
1. Line 1: “MXD” followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry post office (label to plant serving entry post office if authorized by processing and distribution manager).
  2. Line 2: For flats and irregular parcels, “STD” followed by “FLTS” or “IRREG,” as applicable; followed by “BARCODED” (or “BC”) if pallet contains automation rate mail; followed by “NONBARCODED” (or “NBC”) if pallet contains carrier route and/or Presorted rate mail; followed by “WKG.” For letters, “STD LTRS”; followed by “BC” if pallet contains barcoded letters; followed by “MACH” if pallet contains machinable letters; followed by “MAN” if pallet contains nonmachinable letters; followed by “WKG.” [\[M045.3.2\]](#)

**8.10.3 Package Services Flats—Bundles and Sacks**

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. Carrier route mail and Presorted rate mail with a barcode apply only to Bound Printed Matter mailings. Destination entry rate eligibility also applies only to Bound Printed Matter (see [366](#) for flats). At the mailer's option, all Package Services flats may be prepared for destination entry. For mailings of sacks on pallets, pallet preparation begins with [8.10.3e](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *Merged 5-Digit Scheme (required)*. Permitted for bundles only. Not permitted for bundles containing noncarrier route AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (Presorted rate bundles) for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), merged 5-digit pallet preparation begins with [8.10.3d](#). Pallet labeling:
  1. Line 1: [L001](#).
  2. Line 2: "PSVC FLTS CR/5D"; followed by "SCHEME" (or "SCH").
- b. *5-Digit Scheme Carrier Routes (required)*. Permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit carrier routes pallet preparation begins with [8.10.3e](#). Pallet labeling:
  1. Line 1: [L001](#).
  2. Line 2: "PSVC FLTS"; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "SCHEME" (or "SCH").
- c. *5-Digit Scheme (required)*. Permitted for bundles only. Not permitted for bundles containing AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats. Pallet must contain only 5-digit bundles of Presorted rate mail for the same 5-digit scheme under [L001](#). For 5-digit destinations not part of [L001](#), 5-digit pallet preparation begins with [8.10.3f](#). Pallet labeling:
  1. Line 1: [L001](#).
  2. Line 2: "PSVC FLTS 5D"; followed by "SCHEME" (or "SCH").
- d. *Merged 5-Digit (required)*. Permitted for bundles only. Not permitted for bundles containing noncarrier route AFSM 100-compatible flats under [301.3.3](#). Required for bundles containing all other flats. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (Presorted rate bundles) for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  2. Line 2: "PSVC FLTS CR/5D."

## 705.8.10.3

- e. *5-Digit Carrier Routes (required)*. Permitted for bundles and sacks. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Pallet labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  - 2. Line 2: "PSVC FLTS"; followed by "CARRIER ROUTES" (or "CR-RTS").
- f. *5-Digit (required)*. Permitted for bundles and sacks. Pallet must contain only Presorted rate mail with or without a barcode for the same 5-digit ZIP Code or same 5-digit scheme under [L007](#) (for AFSM 100-compatible flats only under [301.3.3](#)). Five-digit scheme ([L007](#)) bundles are assigned to pallets according to the OEL "label to" 5-digit ZIP Code. Pallet labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for overseas military mail).
  - 2. Line 2: "PSVC FLTS 5D"; followed by "BARCODED" (or "BC") if pallet contains Presorted rate mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains Presorted rate mail without a barcode.
- g. *5-Digit Metro (optional)*. Permitted for bundles only. Pallet may contain carrier route and/or Presorted rate mail with or without a barcode for the 5-digit ZIP Codes in [L006](#), Column A, and for the 3-digit ZIP Code groups in [L006](#), Column B. Pallet labeling:
  - 1. Line 1: [L006](#).
  - 2. Line 2: "PSVC FLTS"; followed by "METRO" (or "MET"); followed by "BARCODED" (or "BC") if pallet contains Presorted rate mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted rate mail without a barcode.
- h. *3-Digit (optional)*. Option not available for 3-digit ZIP Code prefixes marked "N" in [L002](#). Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail with or without a barcode for the same 3-digit ZIP Code or the same 3-digit scheme under [L008](#) (for AFSM 100-compatible flats only under [301.3.0](#)). Three-digit scheme ([L008](#)) bundles are assigned to pallets according to the OEL "label to" 3-digit ZIP Code. Pallet labeling:
  - 1. Line 1: [L002](#), Column A.
  - 2. Line 2: "PSVC FLTS 3D"; followed by "BARCODED" (or "BC") if pallet contains Presorted rate mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted rate mail without a barcode.
- i. *SCF (required)*. Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail with or without a barcode for the 3-digit ZIP Code groups in [L005](#). Pallet labeling:
  - 1. Line 1: [L002](#), Column C.

2. Line 2: "PSVC FLTS SCF"; followed by "BARCODED" (or "BC") if pallet contains Presorted rate mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted rate mail without a barcode.
- j. **[02-03-05] ASF (required)**. Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail with or without a barcode for the 3-digit ZIP Code groups in [L602](#). ADC bundles or sacks are assigned to pallets according to the "label to" ZIP Code in [L004](#). At the mailer's option, appropriate mixed ADC bundles or sacks may be sorted to ASF pallets according to the "label to" ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the ASF in [Exhibit 6.1.6](#). Pallet labeling:
  1. Line 1: [L602](#).
  2. Line 2: "PSVC FLTS ASF"; followed by "BARCODED" (or "BC") if pallet contains Presorted rate mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted rate mail without a barcode.
- k. **[02-03-05] BMC (required)**. Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail with or without a barcode for the 3-digit ZIP Code groups in [L601](#). ADC bundles or sacks are assigned to pallets according to the "label to" ZIP Code in [L004](#). At the mailer's option, appropriate mixed ADC bundles or sacks may be sorted to BMC pallets according to the "label to" ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the BMC in [Exhibit 6.1.6](#). Pallet labeling:
  1. Line 1: [L601](#).
  2. Line 2: "PSVC FLTS BMC"; followed by "BARCODED" (or "BC") if pallet contains Presorted rate mail with a barcode; followed by "NONBARCODED" (or "NBC") if pallet contains carrier route and/or Presorted rate mail without a barcode.
- l. **Mixed BMC (optional)**. Permitted for sacks only. Pallet may contain carrier route and/or Presorted rate mail with or without a barcode. Pallet labeling:
  1. Line 1: "MXD" followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry post office (label to plant serving entry post office if authorized by processing and distribution manager).
  2. Line 2: "PSVC FLTS WKG." [[M045.3.3](#)]

#### **8.10.4 Package Services Irregular Parcels—Bundles and Sacks**

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. Carrier route ([8.10.4a](#), [8.10.4b](#), [8.10.4d](#), and [8.10.4e](#)) applies to Bound Printed Matter mailings only. Destination entry rate eligibility applies only to Parcel Select (see [456](#)) and Bound Printed Matter (see [466](#) for parcels). At the mailer's option, all Package

## 705.8.10.4

Services irregular parcels also may be prepared for destination entry (see 7.0). For mailings of sacks on pallets, pallet preparation begins with 8.10.4e. Pallets must be labeled according to the Line 1 and Line 2 information listed below and under 8.6.

- a. *Merged 5-Digit Scheme (required)*. Permitted for bundles only. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (Presorted rate bundles) for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, merged 5-digit pallet preparation begins with 8.10.4d. Pallet labeling:
  1. Line 1: L001.
  2. Line 2: "PSVC IRREG CR/5D"; followed by "SCHEME" (or "SCH").
- b. *5-Digit Scheme Carrier Routes (required)*. Permitted for bundles only. Pallet must contain only carrier route bundles for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, 5-digit carrier routes pallet preparation begins with 8.10.4e. Pallet labeling:
  1. Line 1: L001.
  2. Line 2: "PSVC IRREG"; followed by "CARRIER ROUTES" (or "CR-RTS"); followed by "SCHEME" (or "SCH").
- c. *5-Digit Scheme (required)*. Permitted for bundles only. Pallet must contain only 5-digit bundles of Presorted rate mail for the same 5-digit scheme under L001. For 5-digit destinations not part of L001, 5-digit pallet preparation begins with 8.10.4d. Pallet labeling:
  1. Line 1: L001.
  2. Line 2: "PSVC IRREG 5D"; followed by "SCHEME" (or "SCH").
- d. *Merged 5-Digit (required)*. Permitted for bundles only. Pallet must contain carrier route bundles and noncarrier route 5-digit bundles (Presorted rate bundles) for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see 8.6.4c for overseas military mail).
  2. Line 2: "PSVC IRREG CR/5D."
- e. *5-Digit Carrier Routes (required)*. Permitted for bundles and sacks. Pallet must contain only carrier route mail for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see 8.6.4c for overseas military mail).
  2. Line 2: "PSVC IRREG"; followed by "CARRIER ROUTES" (or "CR-RTS").
- f. *5-Digit (required)*. Permitted for bundles and sacks. Pallet must contain only Presorted rate mail for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see 8.6.4c for overseas military mail).
  2. Line 2: "PSVC IRREG 5D."

- g. *5-Digit Metro (optional)*. Permitted for bundles only. Pallet must contain carrier route and/or Presorted rate bundles for the 5-digit ZIP Codes in [L006](#), Column A, and for the 3-digit ZIP Code groups in [L006](#), Column B. Pallet labeling:
1. Line 1: [L006](#).
  2. Line 2: "PSVC IRREG"; followed by "METRO" (or "MET").
- h. *3-Digit (optional)*. Option not available for 3-digit ZIP Code prefixes marked "N" in [L002](#). Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail. Pallet labeling:
1. Line 1: [L002](#), Column A.
  2. Line 2: "PSVC IRREG 3D."
- i. *SCF (required)*. Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail for the 3-digit ZIP Code groups in [L005](#). Pallet labeling:
1. Line 1: [L002](#), Column C.
  2. Line 2: "PSVC IRREG SCF."
- j. [\[02-03-05\]](#) *ASF (required)*. Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail for the 3-digit ZIP Code groups in [L602](#). ADC bundles or sacks are assigned to pallets according to the "label to" ZIP Code in [L004](#). At the mailer's option, appropriate mixed ADC bundles or sacks may be sorted to ASF pallets according to the "label to" ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the ASF in [Exhibit 6.1.6](#). Pallet labeling:
1. Line 1: [L602](#).
  2. Line 2: "PSVC IRREG ASF."
- k. [\[02-03-05\]](#) *BMC (required)*. Permitted for bundles and sacks. Pallet may contain carrier route and/or Presorted rate mail for the 3-digit ZIP Code groups in [L601](#). ADC ([L004](#)) bundles or sacks are assigned to pallets according to the "label to" ZIP Code in [L004](#). At the mailer's option, appropriate mixed ADC bundles or sacks may be sorted to BMC pallets according to the "label to" ZIP Code in [L010](#). All mixed ADC bundles and sacks must contain only pieces destinating within the BMC in [Exhibit 6.1.6](#). Pallet labeling:
1. Line 1: [L601](#).
  2. Line 2: "PSVC IRREG BMC."
- l. *Mixed BMC (optional)*. Permitted for sacks only. Pallet may contain carrier route and/or Presorted rate mail. Pallet labeling:
1. Line 1: "MXD" followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry post office (or labeled to plant serving entry post office if authorized by processing and distribution manager).
  2. Line 2: "PSVC IRREG WKG." [[M045.3.4](#)]

**8.10.5 Machinable Parcels—Standard Mail and Package Services**

Pallets must be prepared under [8.0](#) in the sequence listed below and completed at each required level before the next optional or required level is prepared. Unless indicated as optional, all sort levels are required under the conditions shown. At the mailer's option, Inter-BMC/ASF and Intra-BMC/ASF Parcel Post mailings may be prepared on pallets under this section. Destination entry rates eligibility applies only to Standard Mail (see [446](#) for parcels), Parcel Select (see [456](#)), and Bound Printed Matter (see [466](#) for parcels). At the mailer's option, all Package Services machinable parcels also may be prepared for destination entry (see [7.0](#)). Combined mailings of Standard Mail and Package Services machinable parcels must also meet the standards in [6.0](#). Pallets must be labeled according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *5-Digit Scheme (optional)*. Pallet may contain parcels for the same 5-digit scheme under [L606](#). Pallets need not be prepared for all 5-digit scheme destinations. For 5-digit destinations not part of [L606](#), or for which scheme sorts are not performed, 5-digit pallets are prepared under [8.10.5b](#). Pallet labeling:
  1. Line 1: [L606](#).
  2. Line 2: "STD MACH 5D" or "PSVC MACH 5D," as applicable; followed by "SCHEME" (or "SCH").
- b. *5-Digit (required)*. Optional for Standard Mail if 3/5 rates are not claimed. Pallet must contain parcels only for the same 5-digit ZIP Code. Pallet labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see [8.6.4c](#) for military mail).
  2. Line 2: "STD MACH 5D" or "PSVC MACH 5D," as applicable.
- c. *ASF (required if claiming DBMC rates, otherwise optional)*. Not available for the Buffalo, NY ASF in [L602](#). Pallets must contain only parcels for the 3-digit ZIP Code groups in [L602](#).
  1. Line 1: [L602](#).
  2. Line 2: "STD MACH ASF" or "PSVC MACH ASF," as applicable.
- d. *BMC (required)*. Pallets must contain only parcels for the 3-digit ZIP Code groups in [L601](#). Pallet labeling:
  1. Line 1: [L601](#).
  2. Line 2: "STD MACH BMC" or "PSVC MACH BMC," as applicable.
- e. *Mixed BMC (optional)*. Pallet labeling:
  1. Line 1: "MXD" followed by information in [L601](#), Column B, for BMC serving 3-digit ZIP Code prefix of entry post office (or labeled to plant serving entry post office if authorized by processing and distribution manager).
  2. Line 2: "STD MACH WKG" or "PSVC MACH WKG," as applicable.  
[\[M045.3.5\]](#)

## 8.11 Bundle Reallocation to Protect SCF Pallet for Periodicals Flats and Irregular Parcels and Standard Mail Flats on Pallets

### 8.11.1 Basic Standards

Bundle reallocation to protect the SCF pallet is an optional preparation method (if performed, bundle reallocation must be done for the entire mailing job); only PAVE-certified presort software may be used to create pallets under the standards in 8.11.2 through 8.11.4. Presort software determines if mail for an SCF service area would fall beyond the SCF level if all finer level pallets are prepared. Reallocation is performed only when there is mail for the SCF service area that would fall beyond the SCF pallet level (e.g., to an ADC or BMC pallet). The amount of mail required to bring the mail that would fall beyond the SCF level back to an SCF level is the minimum volume that will be reallocated. For the purposes of reallocation, 5-digit metro pallets are considered to be 3-digit pallets (because they contain subsets of mail for a 3-digit ZIP Code area). [M045.4.1]

### 8.11.2 General Rules

Reallocation rules are as follows:

- a. Bundle preparation is not affected by the reallocation process. Reallocate only complete bundles and only the minimum number of bundles necessary to create an SCF pallet meeting the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create an SCF pallet.
- b. Reallocate bundles from the highest (least fine) pallet level possible. If it is not possible to reallocate some mail from a 3-digit pallet first, then attempt to eliminate a 3-digit pallet and reallocate all mail from that pallet to create an SCF pallet; if mail cannot be reallocated from a 3-digit pallet, then attempt to reallocate some mail from any 5-digit level pallet.
- c. The reallocation process may result in the elimination of a 3-digit pallet to create an SCF pallet, but a 5-digit level pallet may not be eliminated to create an SCF pallet.
- d. When reallocating mail to create an SCF pallet, reallocate mail from only one more finely sorted pallet. This may be accomplished by reallocating a portion of a 3-digit pallet, reallocating all mail from a 3-digit pallet, or reallocating a portion of one of the following pallets: 5-digit, 5-digit carrier routes, merged 5-digit, 5-digit scheme, 5-digit scheme carrier routes, or merged 5-digit scheme.
- e. Mailers may use any minimum pallet weight(s) permitted by standards and may use different minimum weights for different pallet levels in conjunction with bundle reallocation. [M045.4.2]

### 8.11.3 Reallocation of Bundles If Optional 3-Digit Pallets Are Prepared

Reallocation rules are as follows:

- a. Attempt to identify a 3-digit pallet of adequate weight that can support reallocation of one or more bundles to bring the mail that has fallen through the SCF level back to the SCF level without eliminating the pallet. A sufficient volume of mail must remain on the 3-digit pallet after reallocation to meet the

3-digit pallet weight minimum established by the mailer in compliance with applicable standards. If a 3-digit pallet of adequate weight is available, create an SCF pallet by combining the reallocated mail from the 3-digit pallet with the mail that would fall beyond the SCF pallet level.

- b. If no single 3-digit pallet within the SCF service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in the previous step, then eliminate one 3-digit pallet and reallocate all of the mail to create an SCF pallet by combining it with the mail that would fall beyond the SCF pallet level. As a result, the software will not prepare one 3-digit pallet for the SCF service area if it is detrimental to the SCF pallet.
- c. If preparation is under 8.0 and there are no 3-digit pallets, attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF pallet level back to the SCF level. If preparation is under 10.0, 12.0, or 13.0 and there are no 3-digit pallets, attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF pallet level back to the SCF level. A sufficient volume of mail must remain on the applicable pallet after reallocation to meet the pallet weight minimum established by the mailer in compliance with applicable standards. If a 5-digit level pallet of adequate weight is available, create an SCF pallet by combining the reallocated bundles with the mail that would fall beyond the SCF pallet level.
- d. If no single 5-digit level pallet within the SCF service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in 8.11.3c, then no bundles will be reallocated and an SCF pallet will not be prepared; the mail that falls beyond the SCF pallet level must be placed on the next appropriate pallet (ADC, ASF, or BMC) or in the next appropriate sack. [M045.4.3]

#### **8.11.4 Reallocation of Bundles If Optional 3-Digit Pallets Are Not Prepared**

Reallocation rules are as follows:

- a. Attempt to identify a 5-digit level pallet of adequate weight to support reallocation of one or more bundles to bring the mail that would fall beyond the SCF pallet level back to the SCF level. A sufficient volume of mail must remain on the 5-digit level pallet after reallocation to meet the pallet weight minimum established by the mailer in compliance with applicable standards. If a 5-digit level pallet of adequate weight is available, create an SCF pallet by combining the reallocated bundles with the mail that would fall beyond the SCF pallet level.
- b. If no single 5-digit level pallet within the SCF service area contains an adequate volume of mail to allow reallocation of a portion of the mail on a pallet as described in 8.11.4a, then no bundles will be reallocated and an SCF pallet will not be prepared; the mail that falls beyond the SCF pallet level must be placed on the next appropriate pallet (ADC, ASF, or BMC) or in the next appropriate sack. [M045.4.4]

#### **8.11.5 Documentation**

Mailings must be supported by documentation produced by PAVE-certified software meeting the standards in 708.1.0. [M045.4.5]

**8.12 Bundle Reallocation to Protect BMC Pallet for Standard Mail Flats on Pallets**

**8.12.1 Basic Standards**

Bundle reallocation to protect the BMC pallet level is an optional preparation method (if performed, bundle reallocation must be done for the complete mailing job); only PAVE-certified presort software may be used to create pallets under the standards in 8.12.2 through 8.12.4. The software will determine if mail for a BMC service area would fall beyond the BMC level when ASF pallets are prepared. Reallocation is performed only when there is mail for the BMC service area that would fall beyond the BMC pallet level as a result of an ASF pallet being prepared. The amount required to bring the mail back to the BMC level is the minimum volume that would be reallocated from an ASF pallet, when possible. The following “parent” BMCs can be protected with bundle reallocation by using mail from the ASF “child” pallets indicated in Exhibit 8.12.1. [M045.5.1]

**Exhibit 8.12.1 “Parent” BMC/“Child” ASF**

| “PARENT” BMC SERVICE AREAS | “CHILD” ASF ZIP CODE AREAS SERVED   |
|----------------------------|---|
| Pittsburgh BMC             | Buffalo ASF: 130-136; 140-149   |

| Minneapolis BMC            | Fargo ASF: 565, 567, 580-588  |

[Exhibit M045.5.1]

**8.12.2 General Rules**

In general, when reallocating:

- a. The reallocation process does not affect bundle preparation. Reallocate only complete bundles and only the minimum number of bundles necessary to create a BMC pallet that meets the minimum pallet weight. Based on the weight of individual pieces within a bundle and bundling parameters, the weight of mail that is reallocated may be slightly more than the minimum volume required to create a BMC pallet.
- b. Use Exhibit 8.12.1 to reallocate bundles from the ASF pallet to create a BMC pallet. The ASF pallet may be eliminated to protect the BMC pallet.
- c. Reallocate mail only from one ASF pallet. Bundle reallocation is to be used only between the “parent” BMC and the “child” ASF. Mail from finer levels of pallets (e.g., SCF pallets) may not be reallocated.
- d. Mailers may use any minimum pallet weight(s) permitted by standard and may use different minimum weights for different pallet levels in conjunction with bundle reallocation. [M045.5.2]

705.8.12.3

**8.12.3 Reallocation of Bundles From ASF Pallets**

When reallocating bundles from ASF pallets:

- a. Use [Exhibit 8.12.1](#) to identify an ASF pallet of adequate weight that can support reallocation of one or more bundles to bring the mail that has fallen through the BMC level back to the BMC level without eliminating the ASF pallet. A sufficient amount of mail must remain on the ASF pallet after reallocation to meet the minimum ASF pallet weight. If an ASF pallet of adequate weight is available, then create a BMC pallet by combining the reallocated mail from the ASF pallet with the mail that would fall beyond the BMC pallet level.
- b. If no single ASF pallet within the BMC service area contains an adequate volume of mail to allow reallocation of the portion of the mail on a pallet as described in [8.12.3a](#), then eliminate one ASF pallet and reallocate all of the mail to create a BMC pallet. [M045.5.3]

**8.12.4 Documentation**

Mailings must be supported by documentation produced by PAVE-certified software meeting the standards in [708.1.0](#). [M045.5.4]

**8.13 Pallets of Bundles, Sacks, and Trays****8.13.1 Periodicals**

Additional pallet preparation:

- a. Combined Mailings. When two or more publications are part of a combined mailing, the mailer must keep records for each mailing (publication) as required by standard.
- b. Destination Delivery Unit Rates. Pieces claimed at destination delivery unit rates do not require separation from pieces claimed at other rates on the same pallet.
- c. Carrier Route Mail on Separate 5-Digit Level Pallets. Carrier route sorted pieces must be prepared on separate 5-digit pallets (5-digit carrier routes or 5-digit scheme carrier routes pallets) from automation rate or Presorted rate pieces (prepared on 5-digit pallets or 5-digit scheme pallets). *Exception:* When nonletter-size Periodicals are prepared as bundles on pallets under [10.0](#), [12.0](#), or [13.0](#), then carrier route sorted mail, 5-digit sorted automation rate mail, and 5-digit sorted Presorted rate mail may be placed on the same merged 5-digit pallet or on the same merged 5-digit scheme pallet for those 5-digit ZIP Codes for which 1) there are “A” or “C” indicators in the City State Product under [10.0](#), or 2) the 5-digit bundles are within the 5% threshold requirement under [12.0](#), or 3) the 5-digit bundles are either all for 5-digit ZIP Codes that have an “A” or “C” indicator in the City State Product or are for 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product and the pieces in such 5-digit bundles meet the 5% threshold under [13.0](#). [M045.6.1]

**8.13.2 Standard Mail**

Additional pallet preparation:

- a. Combined Mailings. Nonprofit Standard Mail may be included in the same mailing or palletized on the same pallet as regular Standard Mail only as permitted by standard.

- b. Destination Delivery Unit Rates. Pieces claimed at destination delivery unit rates do not require separation from pieces claimed at other rates on the same pallet.
- c. Carrier Route Mail on Separate 5-Digit Level Pallets. Carrier route rate pieces must be prepared on separate 5-digit pallets (5-digit carrier routes or 5-digit scheme carrier routes pallets) from automation rate and/or Presorted rate pieces (prepared on 5-digit pallets or 5-digit scheme pallets). *Exception:* When flat-size pieces are prepared as bundles on pallets under 10.0, 12.0, or 13.0, then carrier route sorted mail, 5-digit sorted automation rate mail, and 5-digit sorted Presorted rate mail may be placed on the same merged 5-digit pallet or on the same merged 5-digit scheme pallet for those 5-digit ZIP Codes for which 1) there are “A” or “C” indicators in the City State Product under 10.0, or 2) the 5-digit bundles are within the 5% threshold requirement under 12.0, or 3) the 5-digit bundles are either all for 5-digit ZIP Codes that have an “A” or “C” indicator in the City State Product, or are for 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product and the pieces in such 5-digit bundles meet the 5% threshold under 13.0. [M045.6.2]

### 8.13.3 BMC and Mixed BMC Pallets

Bundles placed on BMC pallets must be machinable on BMC parcel sorting equipment. Line 2 on pallet labels must reflect the processing category of the pieces. A BMC or mixed BMC (trays and sacks only) pallet may include pieces that are eligible for the DBMC rate and others that are ineligible. [M045.6.3]

### 8.13.4 Commingled Zones

Pieces of Package Services for different zones may be commingled only under 455.4.1.4 for Parcel Post parcels or 365.5.3.3 or 365.6.3.3 for Bound Printed Matter flats or 465.5.1.3 or 465.6.1.3 for Bound Printed Matter parcels. [M045.6.4]

### 8.13.5 Securing Trays

Trays must be sleeved and strapped under 235.3.0 for First-Class Mail letters, 245.3.0 for Standard Mail letters, 335.3.0 for First-Class Mail flats, 345.3.0 for Standard Mail flats, 365.3.0 for Bound Printed Matter flats, 375.3.0 for Media Mail flats, 385.3.0 for Library Mail flats, *except that* strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF (mail processing plant) service area. [M045.6.5]

## 8.14 Sacks

All sacks remaining after all pallets are prepared may be presented with the palletized mailing (on the same postage statement) if the sacks are set apart from the palletized portion of the mailing. [M045.7.0]

## 8.15 Copalletized Flat-size Pieces—Periodicals or Standard Mail

### 8.15.1 Basic Standards

Copalletized flat-size mailings must meet the applicable standards in 8.0. In addition, if copalletized under 10.0, 12.0, or 13.0, the provisions of one of those preparation options must also be met. Any combination of automation rate mailings

705.8.15.2

and nonautomation rate mailings is subject to the restrictions in [8.13](#). Bundles in a copalletized mailing qualify for the appropriate presort level rate, regardless of the pallet level on which they are placed. [M045.8.1]

### **8.15.2 Periodicals**

Additional standards are as follows:

- a. Periodicals eligible for preferred rates (In-County, Nonprofit, Classroom, and Science-of-Agriculture) may be combined with Periodicals eligible for Outside-County rates.
- b. All pallets in a copalletized mailing are identified on the content line (Line 2) of the label with only “NEWS” (see [8.6](#)) or “PER” as the class designation under these conditions:
  1. If at least 51% of the total number of copies in the copalletized mailing can qualify for “NEWS” treatment, then all pallets in such a mailing are labeled “NEWS,” unless the mailer chooses to use “PER.”
  2. If less than 51% of the total number of copies in a copalletized mailing can qualify for “NEWS” treatment, then all pallets in such a mailing are labeled “PER.”
- c. Documentation meeting the basic standard in [708.1.0](#) must be provided with each mailing. Before copalletizing, the mailer must obtain the written approval of the Business Mailer Support manager. Approval is based on the mailer’s demonstrated ability to provide documentation meeting these standards:
  1. Documentation by bundle and by publication and edition showing the number of addressed pieces and copies in each bundle and the per piece presort rate claimed, or a listing by pallet showing (by presort level and destination) the number of copies and pieces for each publication and edition. For large volume mailing jobs reported on a single listing, the mailer may provide the abbreviated documentation in [708.b.](#)
  2. Documentation showing the number of copies and pieces claimed at the SCF rate.
  3. Documentation showing that bundles are sorted to the appropriate finest pallet level in the mailing.
  4. Documentation showing that 5-digit, 3-digit, SCF, and ADC pallets are prepared when the applicable minimum volume is developed in the copalletized mailing for these destinations.
  5. A listing showing the destination of pallets in the copalletized mailing.
  6. If the sacked portion of the mailing is presented with the copalletized portion, a report by sack showing the number of pieces (and copies) at each presort level. [M045.8.2]

### **8.15.3 Standard Mail**

Additional standards are as follows:

- a. Nonprofit Standard mailings may be copalletized with one another but not with mailings at other rates unless permitted by standard.

- b. Nonidentical-weight pieces may be copalletized only if the correct postage is affixed to each piece or if otherwise authorized by Business Mailer Support.
- c. All pieces in mailings to be copalletized must be subject to the minimum per piece rate, or all subject to the per pound rate, unless otherwise authorized by Business Mailer Support.
- d. All pieces must have postage paid with permit imprint, or all pieces must have postage affixed.
- e. When requested, the mailer must present pallets selected by USPS employees for verification. [M045.8.3]

#### **8.15.4 Pallet Labels**

Pallet labels for copalletized mailings must meet the provisions of 8.6 and 8.10, or if applicable, 8.6 and 10.0, 12.0, or 13.0. [M045.8.4]

#### **8.15.5 Postage Statement**

Separate postage statements are required:

- a. For Periodicals, a separate postage statement is required for each publication and/or edition that is part of the copalletized mailing. The mailer must note on or in an attachment to the postage statement the name and issue date of the publications with which each publication and/or edition was copalletized.
- b. For Standard Mail, a separate postage statement must be prepared for each mailing that is part of a single copalletized shipment, *except that* copalletized Regular and Enhanced Carrier Route mailings (or Nonprofit and Nonprofit Enhanced Carrier Route mailings) produced as part of the same job may be reported on the same postage statement. [M045.8.5]

### **8.16 Pallets of Machinable Parcels**

#### **8.16.1 Standard Mail**

Pieces may be eligible for the 3/5 rate when prepared under 8.10.5a. through 8.10.5d.. This eligibility includes pieces sorted under 8.10.5c. and 8.10.5d. to the service area of the *entry* ASF/BMC. [M045.9.1]

#### **8.16.2 DBMC Rate**

A BMC pallet may include pieces that are eligible for the DBMC rate and pieces that are ineligible. [M045.9.2]

#### **8.16.3 Top Caps**

When top caps are used, the mailer must write the tare weight of the top cap on the pallet label or in another prominent location. [M045.9.3]

### **8.17 Parcel Post—Bulk Mail Center (BMC) Presort Discount**

#### **8.17.1 Machinable Parcels**

To qualify for the BMC Presort discount:

- a. Machinable pieces must be sorted to BMCs under L601 in 69-inch pallet boxes. Each pallet box must contain at least 52 inches of mail (not including pallet) for a BMC. Overflow pallet boxes are not permitted. Preparation in sacks, directly on pallets, or in other containers is not permitted.

705.8.17.2

- b. Pallet box preparation and Line 1 labeling: destination BMC (required); for Line 1 use [L601](#).
- c. Pallet box Line 2 labeling: "PSVC MACH BMC." [M045.10.1]

**8.17.2 Nonmachinable Parcels**

To qualify for the BMC Presort discount:

- a. Nonmachinable pieces must be sorted to BMCs and ASFs under [L605](#) directly on pallets. Each pallet for a BMC or ASF destination must have a minimum height of 42 inches of mail (not including the height of the pallet). Overflow pallets are not permitted. Preparation in sacks, pallet boxes, or in other containers is not permitted.
- b. Pallet preparation and Line 1 labeling: destination BMC or destination ASF (required); for Line 1, use [L605](#).
- c. Pallet Line 2 labeling: "PSVC NON MACH BMC" or "PSVC NON MACH ASF" as applicable. [M045.10.2]

**8.18 Parcel Post—Origin Bulk Mail Center (OBMC) Presort Discount****8.18.1 Machinable Parcels**

To qualify for the OBMC Presort discount:

- a. Machinable pieces must be sorted to BMCs under [L601](#) in 69-inch pallet boxes. Each pallet box must contain at least 52 inches of mail (not including pallet) for a BMC. Overflow pallet boxes are not permitted. Preparation in sacks, directly on pallets, or in other containers is not permitted.
- b. Pallet box preparation and Line 1 labeling: destination BMC (required); for Line 1, use [L601](#).
- c. Pallet box Line 2 labeling: "PSVC MACH BMC." [M045.11.1]

**8.18.2 Nonmachinable Parcels**

To qualify for the OBMC Presort discount:

- a. Nonmachinable pieces must be sorted to BMCs and ASFs under [L605](#) directly on pallets. Each pallet for a BMC or ASF destination must have a minimum height of 42 inches of mail (not including the height of the pallet). Overflow pallets are not allowed. Preparation in sacks, pallet boxes, or in other containers is not permitted.
- b. Pallet preparation and Line 1 labeling: destination BMC or destination ASF (required); for Line 1, use [L605](#).
- c. Pallet Line 2 labeling: "PSVC NON MACH BMC" or "PSVC NON MACH ASF" as applicable. [M045.11.2]

**8.19 Parcel Post DSCF Rates—Parcels on Pallets****8.19.1 Basic Preparation, Parcels on Pallets**

Unless prepared under [8.19.2](#), or in sacks, mail must be prepared for the DSCF rate as follows:

- a. General. Parcels for each SCF area must be sorted to 5-digit scheme, 5-digit, or 3-digit (nonmachinable) destinations on pallets. For purposes of this section, the term “pallets” includes preparation of parcels directly on pallets and in pallet boxes on pallets. Except when prepared under [8.19.2](#), each 5-digit scheme, 5-digit, and 3-digit pallet must meet a minimum volume requirement under one of the criteria in [8.19.1b](#). Machinable and nonmachinable pieces may be combined on the same pallet or in the same overflow sack when sorted to 5-digit scheme or 5-digit destinations. In a single mailing mailers may prepare some pallets under the minimum volume requirement in [8.19.1b1](#) and some pallets under the minimum volume requirement in [8.19.1b2](#). A mailing entered at a destination SCF facility containing pallets prepared under [8.19.1](#) also may include mail that is sacked for the DSCF rate. Double-stacking is permitted if the requirements of [8.3](#) are met.
- b. Minimum volume. The minimum volume per 5-digit scheme, 5-digit, and 3-digit pallet can be met in one of the following ways:
  1. Pieces may be placed on 5-digit scheme, 5-digit, and 3-digit pallets, each containing at least 50 pieces and 250 pounds.
  2. Pieces may be placed on 5-digit scheme, 5-digit, and 3-digit pallets, each having a minimum height of 36 inches of mail (excluding the height of the pallet) (see [8.5.4](#)).
- c. Overflow. After filling a pallet(s) to a 5-digit scheme, 5-digit, or 3-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in one or both of the following ways:
  1. Placed in 5-digit scheme, 5-digit, or 3-digit overflow sacks (no minimum number of pieces per sack) that are labeled in accordance with the 5-digit scheme, 5-digit, or 3-digit sacking requirements for the DSCF rate in [455.4.5](#). Overflow pieces sacked in this manner are eligible for the DSCF rates.
  2. Placed on a 5-digit scheme, 5-digit, or 3-digit pallet labeled under [8.19.1d](#) that does not meet the minimums for the DSCF rate. Overflow pieces palletized in this manner are not eligible for the DSCF rates but are eligible for the DBMC rates.
- d. 5-digit scheme pallet labeling:
  1. Line 1: use [L606](#), Column B.
  2. Line 2: “PSVC PARCELS 5D SCH.”
- e. 5-digit pallet labeling:
  1. Line 1: use city, state, and 5-digit ZIP Code destination of contents.
  2. Line 2: “PSVC PARCELS 5D.”
- f. 3-digit pallet labeling:
  1. Line 1: use [L002](#), Column C.
  2. Line 2: “PSVC PARCELS 3D.”

705.8.19.2

- g. Separation. If sacks prepared under [455.4.0, Preparation for Parcel Post](#), are included in the same mailing as pallets prepared under this section, at the time of acceptance the mailer must separate sacks that are overflow from palletized mail from those sacks that were prepared under the provisions of [455.4.0](#).

[M045.12.1]

**8.19.2 Alternate Preparation, Parcels on Pallets**DSCF rate mailings not prepared under [8.19.1](#) may be prepared as follows:

- a. General. All DSCF rate mail in the mailing must be sorted to 5-digit scheme, 5-digit, or 3-digit destinations under [8.19.2](#) (i.e., mail prepared under [8.19.1](#) and mail sacked under [455.4.0](#) must not be included in a mailing prepared under [8.19.2](#)). For purposes of this section, the term “pallets” includes preparation of parcels directly on pallets and in pallet boxes on pallets. Machinable and nonmachinable pieces may be combined on the same pallet. Double-stacking is permitted if the requirements of [8.3](#) are met.
- b. Minimum volume. To qualify for the DSCF rate, no pallet may contain fewer than 35 pieces and 200 pounds, and for the entire mailing the average number of DSCF rate pieces per 5-digit scheme, 5-digit, or 3-digit destination must be at least 50.
- c. Overflow. After filling pallets to a 5-digit scheme, 5-digit, or 3-digit destination, any remaining pieces that do not meet the minimum pallet requirements may be prepared in one or both of the following ways:
  - 1. Placed in 5-digit scheme, 5-digit, or 3-digit overflow sacks (no minimum number of pieces per sack) that are labeled in accordance with the DSCF sacking requirements in [455.4.0](#). Overflow pieces sacked in this manner are eligible for the DSCF rates.
  - 2. Placed on a 5-digit scheme, 5-digit, or 3-digit pallet labeled under [8.19.2d](#) that does not meet the minimums for the DSCF rate. Overflow pieces palletized in this manner are not eligible for the DSCF rates but are eligible for the DBMC rates.
- d. 5-digit scheme pallet labeling:
  - 1. Line 1: use [L606](#), Column B.
  - 2. Line 2: “PSVC PARCELS 5D SCH.”
  - 3. In the mailer area below Line 3: use the pallet ID number.
- e. 5-digit pallet labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code destination of contents.
  - 2. Line 2: “PSVC PARCELS 5D.”
  - 3. In mailer area below line 3: use the pallet ID number.
- f. 3-digit pallet labeling:
  - 1. Line 1: use [L002](#), Column C.
  - 2. Line 2: “PSVC PARCELS 3D.”
  - 3. In the mailer area below Line 3: use the pallet ID number.

- g. Documentation. A list of each 5-digit scheme, 5-digit, and 3-digit pallet in the mailing that qualifies for the DSCF rate must be submitted. The pallets in the mailing that qualify for the DSCF rate must be renumbered sequentially, and this pallet identification number must be printed below Line 3 on the pallet label. The documentation must list each pallet in sequential order by pallet identification number. For each pallet, the listing must show: the pallet identification number, the applicable 5-digit scheme, 5-digit, or 3-digit destination of the pallet, the total weight of pieces on the pallet, the total number of pieces on the pallet, and the running total of pieces (i.e., the number equal to the number of pieces for that pallet plus the sum of the pieces on all pallets listed before it). This documentation must not include: pieces prepared in overflow sacks at the DSCF rates, pieces prepared on overflow pallets at the DBMC rates, or pieces claimed at any other rate in the mailing. [M045.12.2]

### 8.19.3 5-Digit ZIP Codes for Which Pallets May Not Be Prepared

Refer to the Drop Shipment Product available from the National Customer Support Center (NCSC) (see 608.8.0) and to Exhibit 456.2.7 and Exhibit 456.2.8 to determine if the facility serving the 5-digit ZIP Code destination can handle pallets. There is a charge for the Drop Shipment Product. If a facility cannot handle pallets, the DSCF rate is not applicable unless the mail can be prepared under the sacking requirement in 455.4.0. [M045.12.3]

### 8.19.4 5-Digit ZIP Codes Requiring BMC Entry

Refer to Exhibit 456.2.6 for 5-digit ZIP Code destinations where palletized mail must be entered at the BMC that serves the SCF to obtain the DSCF rate. [M045.12.4]

## 8.20 Parcel Post DSCF Rates—Sacks on Pallets

Mailers who prepared DSCF rate mail in 5-digit scheme or 5-digit sacks under 455.4.0 may place 5-digit sacks for the same SCF area on an SCF pallet (including a pallet box on a pallet). Mailers who prepare overflow from pallets under 8.19.1 or 8.19.2 may place 5-digit scheme or 5-digit sacks for the same SCF area on an SCF pallet (including a pallet box on a pallet). See 8.19.1g for requirements concerning separation of sacks prepared under 455.4.0 from sacks prepared under 8.19.1. There are no pallet minimums for such pallets. Mailers may prepare such SCF pallets without preparing all possible 5-digit scheme and 5-digit pallets. The pallets must be labeled in the following manner:

- a. 5-digit scheme pallets (optional):
  1. Line 1: use L606, Column B.
  2. Line 2: “PSVC PP 5D SCHEME” or “PSVC PP 5D SCH.”
- b. 5-digit pallets:
  1. Line 1: use L002, Column C.
  2. Line 2: “PSVC PP 5D.” [M045.13.0]

## 8.21 Parcel Post DDU Rates

Parcels may be bedloaded, sacked, or palletized. For purposes of this section the term “pallets” includes preparation of parcels directly on pallets and preparation of parcels in pallet boxes on pallets. There are no preparation or presort requirements for DDU rate mailings other than separation by 5-digit scheme and 5-digit

705.9.1

destination. Machinable and nonmachinable pieces may be combined. Refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.0](#)) and the information in [456.2.0](#), *Parcel Select*, including [Exhibit 456.2.7](#) and [Exhibit 456.2.8](#) to determine the location of the 5-digit delivery facility and whether that facility can handle pallets (including pallet boxes on pallets). If a DDU facility cannot handle pallets, and a mailer transports mail to the DDU facility on pallets, the driver must unload the pallets into a container specified by the delivery unit. If pieces are sacked or palletized, they must be prepared to 5-digit scheme (optional) and 5-digit destinations, and labeled as follows:

- a. 5-digit scheme sacks or pallets (optional):
  1. Line 1: use [L606](#), Column B.
  2. Line 2: "PSVC PARCELS 5D SCH."
- b. 5-digit sacks or pallets:
  1. Line 1: use city, state, and 5-digit ZIP Code destination of pieces.
  2. Line 2: "PSVC PARCELS 5D." [[M045.14.0](#)]

## 9.0 Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats

### 9.1 First-Class Mail

#### 9.1.1 Basic Standards

Bundles of flats in an automation rate mailing prepared under [335.6.5](#) must be cotrayed with bundles of flats in a Presorted rate mailing under the following conditions:

- a. The automation rate pieces and Presorted rate pieces are part of the same mailing job and reported on the same postage statement.
- b. Pieces in the automation rate mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted rate mailing must meet the criteria for a flat under [301.1.1](#).
- c. The automation rate mailing must meet the eligibility criteria in [333.5.0](#), except that the traying criteria in [9.1.4](#) must be met rather than the traying criteria in [335.6.0](#).
- d. The Presorted rate mailing must meet the eligibility criteria in [333.3.0](#), except that the traying and documentation criteria in [9.1.1](#) and [9.1.4](#) must be met rather than the traying and documentation criteria in [335.6.0](#).
- e. The rates for pieces in the automation rate mailing are applied based on the level of bundle to which they are sorted under [333.5.3](#), *Rate Application—Bundle-Based Flats*, and [333.5.4](#), *Rate Application—Tray-Based Flats*.
- f. The pieces must be marked according to [302](#).

- g. The bundles prepared from the automation rate mailing and the bundles prepared from the Presorted rate mailing must be sorted into the same trays as described in [9.1.4](#).
- h. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#) must be submitted with each cotrayed mailing job that describes for each tray sortation level the number of pieces qualifying for each applicable automation rate and the number of pieces qualifying for the Presorted rate.
- i. Barcoded tray labels under [708.6.0](#) must be used to label the trays. [M910.1.1]

### 9.1.2 Bundle Preparation

Except for mail prepared under the cobundling option in [9.1.3](#), the automation rate mailing must be bundled and labeled under [335.6.5](#). The Presorted rate mailing must be bundled and labeled under [335.5.0](#). [M910.1.2]

### 9.1.3 Optional Cobundling Preparation

As an option to the basic bundling requirements in [9.1.2](#), a mailer may choose to cobundle automation rate and Presorted rate flat-size pieces, subject to the conditions in [11.0](#). [M910.1.3]

### 9.1.4 Tray Preparation and Labeling

Presorted rate and automation rate bundles prepared under [9.1.2](#) or [9.1.3](#) must be presorted together into trays (cotrayed) in the sequence listed below. Trays must be labeled using the following information for Lines 1 and 2 and [335.4.0](#) for other sack label criteria.

- a. *5-Digit*. Required, full trays only (no overflow trays).
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [335.4.3](#) for military mail).
  - 2. Line 2: "FCM FLTS 5D BC/NBC."
- b. *3-Digit*. Required, full trays only (no overflow trays).
  - 1. Line 1: Use [L002](#), Column A.
  - 2. Line 2: "FCM FLTS 3D BC/NBC."
- c. *Origin/entry 3-Digit*. Required for each 3-digit ZIP Code served by the SCF of the origin (verification) office, optional for each 3-digit ZIP Code served by the SCF of an entry office other than the origin office, no minimum.
  - 1. Line 1: Use [L002](#), Column A.
  - 2. Line 2: "FCM FLTS 3D BC/NBC."
- d. *ADC*. Required, full trays only (no overflow trays), use [L004](#) to determine ZIP Codes served by each ADC.
  - 1. Line 1: Use [L004](#), Column B.
  - 2. Line 2: "FCM FLTS ADC BC/NBC."
- e. *Mixed ADC*. Required, no minimum.

705.9.2

1. Line 1: Use “MXD” followed by the city, state, and ZIP Code of the facility serving the 3-digit ZIP Code of the entry post office, as shown in [L002](#), Column C.
2. Line 2: “FCM FLTS BC/NBC WKG.” [M910.1.4]

## 9.2 Periodicals

### 9.2.1 Basic Standards

Bundles of nonletter-size pieces in an automation rate mailing must be cosacked with bundles of nonletter-size pieces in a Presorted rate mailing under the following conditions:

- a. The pieces in the automation rate mailing and in the Presorted rate mailing must be part of the same mailing job and must be reported on the appropriate postage statement(s).
- b. The pieces in the mailing job must all be nonletter-size and meet any other size and mailpiece design requirements applicable to the rate category for which they are prepared.
- c. The automation rate mailing must meet the eligibility criteria in [707.14.0](#), except that the sacking and documentation criteria in [9.2.1](#), [9.2.4](#), and [9.2.5](#) must be met rather than the sacking and documentation criteria in [707.25.0](#).
- d. The Presorted rate mailing must meet the eligibility criteria in [707.12.0](#), except that the sacking and documentation criteria in [9.2.1](#), [9.2.4](#), and [9.2.5](#) must be met rather than the sacking and documentation criteria in [707.25.0](#).
- e. The rates for pieces in the automation rate mailing are applied based on the number of pieces in the bundle and the level of bundle to which they are sorted under [707.14.0](#), *Automation Rate Eligibility*. The rates for pieces in the Presorted rate mailing are based on the number of pieces in the bundle and the level of sack in which they are placed under [707.12.0](#), *Presorted Rate Eligibility*.
- f. The bundles prepared from the automation rate mailing and the bundles prepared from the Presorted rate mailing must be sorted into the same sacks as described in [9.2.4](#) and [9.2.5](#).
- g. A complete, signed, appropriate postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#) must be submitted with each cosacked mailing job that describes for each sack sortation level the number of pieces qualifying for each applicable automation rate and the number of pieces qualifying for each applicable Presorted rate.
- h. Barcoded sack labels under [708.6.0](#) must be used to label sacks. [M910.2.1]

### 9.2.2 Bundle Preparation

Except for mail prepared under the cobundling option in [9.2.3](#), the automation rate mailing must be bundled and labeled under [707.25.0](#) (all bundle levels) and the Presorted rate mailing must be bundled and labeled under [707.22.0](#) (excluding carrier route bundles). [M910.2.2]

### 9.2.3 Optional Cobundling Preparation

As an option to the basic bundling requirements in 9.2.2, a mailer may choose to cobundle automation rate and Presorted rate flat-size pieces, subject to the conditions in 11.0. [M910.2.3]

### 9.2.4 Low-Volume Bundles in Sacks or on Pallets

5-digit and 3-digit bundles prepared under 707.22.0 and 707.25.0 or under 9.2.3 may contain fewer than six pieces when the publisher determines that such preparation improves service. These low-volume bundles may be placed in 5-digit, 3-digit, and SCF sacks or on 5-digit, 3-digit, or SCF pallets. Pieces in low-volume bundles must claim the applicable basic Presorted or automation rate, except for firm bundles at Presorted rates as applicable under 707.22.3. [M910.2.4]

### 9.2.5 Sack Preparation and Labeling

Presorted rate and automation rate bundles prepared under 9.2.2, 9.2.3, and 9.2.4 must be presorted together into sacks (cosacked) in the sequence listed below. Sacks must be labeled using the following information for Lines 1 and 2 and 707.21.0 for other sack label criteria. If, due to the physical size of the mailpieces, the automation rate pieces are considered flat-size under 301.3.0 and the Presorted rate pieces are considered irregular parcels under 401.1.6, the processing category shown on the sack label must show "FLTS."

- a. *5-Digit*. Required at 24 pieces to the same 5-digit, optional with one six-piece bundle, or under 9.2.4 with at least one bundle of fewer pieces.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 707.21.1.2 for military mail).
  2. Line 2: "PER" or "NEWS" as applicable and "FLTS 5D BC/NBC."
- b. *3-Digit*. Required at 24 pieces to the same 3-digit, optional with one six-piece bundle, or under 9.2.4 with at least one bundle of fewer pieces.
  1. Line 1: use L002, Column A.
  2. Line 2: "PER" or "NEWS" as applicable and "FLTS 3D BC/NBC."
- c. *SCF*. Required at 24 pieces, optional with one six-piece bundle, or under 9.2.3 with at least one bundle of fewer pieces.
  1. Line 1: use L002, Column C.
  2. Line 2: "PER" or "NEWS" as applicable and "FLTS SCF BC/NBC."
- d. *Origin/entry SCF*. Required for the SCF of the origin (verification) office, optional for the SCF of an entry office other than the origin office, no minimum.
  1. Line 1: use L002, Column C.
  2. Line 2: "PER" or "NEWS" as applicable and "FLTS SCF BC/NBC."
- e. *ADC*. Required at 24 pieces, optional with one six-piece bundle (bundles of fewer than six pieces are not permitted).
  1. Line 1: use L004, Column B.
  2. Line 2: "PER" or "NEWS" as applicable and "FLTS ADC BC/NBC."

705.9.3

- f. *Mixed ADC*. Required, no minimum, except that bundles of fewer than six pieces at 5-digit, 3-digit, and ADC bundle levels are not permitted.
  1. [02-03-05] Line 1: Use L009, Column B, effective May 15, 2005. Until then, use either L009, Column B or L011, Column B.
  2. Line 2: "PER" or "NEWS" as applicable and "FLTS BC/NBC WKG."  
[M910.2.5]

### 9.3 Standard Mail

#### 9.3.1 Basic Standards

Bundles of flats in an automation rate mailing must be cosacked with bundles of flats in a Presorted rate mailing under the following conditions:

- a. The automation rate pieces and the Presorted rate pieces are part of the same mailing job and are reported on the same postage statement.
- b. Pieces in the automation rate mailing must meet the criteria for a flat under 301.3.0. Pieces in the Presorted rate mailing must meet the criteria for a flat under 301.1.1.
- c. The automation rate mailing must meet the eligibility criteria in 343.7.0, except that the sacking and documentation criteria in 9.3.1, 9.3.4, and 9.3.5 must be met rather than the sacking and documentation criteria in 345.7.0.
- d. The Presorted rate mailing must meet the eligibility criteria in 343.2.0 and 343.3.0, except that the sacking and documentation criteria in 9.3.1, 9.3.4, and 9.3.5 must be met rather than the sacking and documentation criteria in 345.5.0.
- e. The rates for pieces in the automation rate mailing are applied based on the number of pieces in the bundle and the level of bundle to which they are sorted under 343.7.0. The rates for pieces in the Presorted rate mailing are based on the number of pieces in the bundle and the level of sack in which they are placed under 343.3.4 and 343.3.5.
- f. The pieces must be marked according to 302.
- g. The bundles prepared from the automation rate mailing and the bundles prepared from the Presorted rate mailing must be sorted into the same sacks as described in 9.3.4 and 9.3.5.
- h. A complete, signed postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, documentation produced by PAVE-certified software or standardized documentation under 708.1.0 must be submitted with each cosacked mailing job that describes for each sack sortation level the number of pieces qualifying for each applicable automation rate and the number of pieces qualifying for each applicable Presorted rate.
- i. Barcoded sack labels under 708.6.0 must be used to label the sacks.  
[M910.3.1]

### 9.3.2 Bundle Preparation

Except for mail prepared under the cobundling option in 9.3.3, the automation rate mailing must be bundled and labeled under 345.7.0 and the Presorted rate mailing must be bundled and labeled under 345.5.0. Loose packing under 345.5.0 is not permitted. [M910.3.2]

### 9.3.3 Optional Cobundling Preparation

As an option to the basic bundling requirements in 9.3.2, a mailer may choose to cobundle automation rate and Presorted rate flat-size pieces, subject to the conditions in 11.0. [M910.3.3]

### 9.3.4 Sacking Under 125-Piece or 15-Pound Rules

When the minimum quantity of 125 pieces or 15 pounds of mail is specified for a sack sortation level in 9.3.5, the provisions of 345.7.5.3 apply. [M910.3.4]

### 9.3.5 Sack Preparation and Labeling

Presorted rate and automation rate bundles prepared under 9.3.2 and 9.3.3 must be presorted together into sacks (cosacked) in the sequence listed below. Sacks must be labeled using the following information for Lines 1 and 2, and 345.4.0 for other sack label criteria.

- a. *5-Digit*. Required, 125-piece/15-pound minimum.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 345.4.2 for military mail).
  2. Line 2: "STD FLTS 5D BC/NBC."
- b. *3-Digit*. Required, 125-piece/15-pound minimum.
  1. Line 1: use L002, Column A.
  2. Line 2: "STD FLTS 3D BC/NBC."
- c. *Origin/entry 3-digit*. Required for each 3-digit ZIP Code served by the SCF of the origin (verification) office, optional for each 3-digit ZIP Code served by the SCF of an entry office other than the origin office, no minimum.
  1. Line 1: use L002, Column A.
  2. Line 2: "STD FLTS 3D BC/NBC."
- d. *ADC*. Required, 125-piece/15-pound minimum, use L004 to determine ZIP Codes served by each ADC.
  1. Line 1: use L004, Column B.
  2. Line 2: "STD FLTS ADC BC/NBC."
- e. *Mixed ADC*. Required, no minimum.
  1. [02-03-05] Line 1: Use L009, Column B, effective May 15, 2005. Until then, use either L009, Column B, or L011, Column B or L010, Column B, as applicable.
  2. Line 2: "STD FLTS BC/NBC WKG." [M910.3.5]

### 9.3.6 Tray Preparation and Labeling

Presorted rate and automation rate bundles meeting the standards in [345.3.0](#) for letter trays and prepared under [9.3.2](#) must be presorted together into trays (cotrayed) in the sequence in [9.3.5](#). Trays must be labeled using the information for Lines 1 and 2 and [345.4.0](#) for other tray label criteria. Cobundling under this option is not permitted. [M910.3.6]

## 9.4 Bound Printed Matter

### 9.4.1 Basic Standards

Bundles of flat-size pieces in a Presorted rate mailing qualifying for and claiming the barcoded discount under [363.2.0](#), [363.3.0](#), and [363.4.0](#) must be cosacked with bundles of flat-size pieces from a Presorted rate mailing (not claiming the barcoded discount) under the following conditions:

- a. The Presorted rate pieces qualifying for and claiming the barcoded discount and the Presorted rate pieces must be part of the same mailing job and be reported on the same postage statement.
- b. The Presorted rate pieces qualifying for and claiming the barcoded discount must meet the criteria for flat-size mail under [301.3.0](#). Pieces in the Presorted rate mailing must meet the criteria for flat-size mail under [301.2.0](#).
- c. The Presorted rate mailing qualifying for and claiming the barcoded discount must meet the eligibility criteria in [363.2.0](#), [363.3.0](#), and [363.4.0](#), the mail preparation standards in [365.7.0](#), the sacking requirements in [9.4.4](#), and the documentation criteria in [9.4.1h](#).
- d. The Presorted rate mailing must meet the eligibility criteria in [363.2.0](#), [363.3.0](#), and [363.4.0](#), the mail preparation standards in [365.5.0](#), the sacking requirements in [9.4.4](#), and the documentation criteria in [9.4.1h](#).
- e. The rates for pieces in the Presorted rate mailing qualifying for and claiming the barcoded discount are applied based on meeting the sortation requirements in [365.7.0](#), and when applicable, the zone. The rates for pieces in the Presorted rate mailing are based on meeting the sortation requirements in [365.5.0](#), and when applicable, the zone.
- f. The pieces must be marked according to [302](#).
- g. The bundles prepared from the Presorted rate mailing qualifying for the barcoded discount and the bundles prepared from the Presorted rate mailing must be sorted into the same sacks as described in [9.4.4](#).
- h. A complete, signed postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures. In addition to the applicable postage statement, standardized documentation under [708.1.0](#) must be submitted with each cosacked mailing job that describes for each sack sortation level the number of pieces qualifying for the barcoded discount and the number of pieces qualifying for each applicable Presorted rate.
- i. Barcoded sack labels under [708.6.0](#) must be used to label the sacks.  
[M910.4.1]

### 9.4.2 Bundle Preparation

Except for mail prepared under the cobundling option in 9.4.3, the Presorted rate mailing qualifying for and claiming the barcoded discount must be bundled and labeled under 365.7.0, and the Presorted rate mailing must be bundled and labeled under 365.5.0. [M910.4.2]

### 9.4.3 Optional Cobundling Preparation

As an alternative to the basic bundling requirements in 9.4.2, flat-size Presorted rate pieces qualifying for and claiming the barcoded discount may be cobundled with flat-size Presorted rate pieces, subject to 11.0. [M910.4.3]

### 9.4.4 Sack Preparation and Labeling

Bundles of Presorted rate pieces qualifying for and claiming the barcoded discount and Presorted rate pieces prepared under 9.4.2 or 9.4.3 must be presorted together into sacks (cosacked) using the following preparation sequence, sack size, and labeling:

- a. 5-digit (required); minimum 20 addressed pieces; labeling:
  1. Line 1: city, state, and 5-digit ZIP Code destination (see 345.4.2 for overseas military mail).
  2. Line 2: "PSVC FLTS 5D BC/NBC."
- b. 3-digit (required, except for optional bundles with 3-digit ZIP Code prefixes indicated by an "N" in L002, when optional SCF sacks are prepared); minimum 20 addressed pieces; labeling:
  1. Line 1: L002, Column A.
  2. Line 2: "PSVC FLTS 3D BC/NBC."
- c. SCF (optional); minimum 20 addressed pieces; labeling:
  1. Line 1: L005, Column B.
  2. Line 2: "PSVC FLTS SCF BC/NBC."
- d. ADC (required); minimum 20 addressed pieces (use L004 to determine ZIP Codes served by each ADC); labeling:
  1. Line 1: L004, Column B.
  2. Line 2: "PSVC FLTS ADC BC/NBC."
- e. Mixed ADC (required); no minimum; labeling:
  1. [02-03-05] Line 1: Use L009, Column B, effective May 15, 2005. Until then, use either L009, Column B, or L011, Column B or L010, Column B, as applicable.
  2. Line 2: "PSVC FLTS BC/NBC WKG." [M910.4.4]

705.10.1

## 10.0 Preparation for Merged Containerization of Bundles of Flats Using City State Product

### 10.1 Periodicals

#### 10.1.1 Basic Standards

Carrier route bundles in a carrier route rate mailing may be placed in the same sack or on the same pallet as 5-digit bundles from an automation rate mailing and 5-digit bundles from a Presorted rate mailing (including pieces cobundled under [11.0](#)) under the following conditions:

- a. A carrier route mailing must be part of the mailing job, unless cobundled under [11.0](#) utilizing 5-digit scheme ([L007](#)) or 3-digit scheme ([L008](#)) bundle preparation, and sacked under [10.1.4](#).
- b. The pieces in the carrier route mailing, the automation rate mailing, and the Presorted rate mailing must be part of the same mailing job.
- c. Pieces in the automation rate mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted rate mailing and the carrier route mailing must be nonletter-size.
- d. Mailers must use the Carrier Route Indicators field in the City State Product to prepare the mailing and enter the mailing no later than 90 days after the release date of the City State Product used.
- e. Carrier route bundles may be cosacked or copalletized with automation rate 5-digit bundles, Presorted rate 5-digit bundles, and cobundled 5-digit bundles only for those 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product indicating eligibility for such cosacking or copalletization. Containers of mail sorted in this manner are called “merged 5-digit” sacks or pallets. Containers of mail sorted in this manner for which scheme ([L001](#)) sortation is also performed are called “merged 5-digit scheme” sacks or pallets. Pieces in 5-digit scheme ([L007](#)) bundles may not be placed in merged 5-digit containers.
- f. If sortation under this section is performed, merged 5-digit sacks or pallets must be prepared for all 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product that permits such preparation when there is enough volume for the 5-digit ZIP Code to prepare such a sack under [10.1.4](#) or such a pallet under [10.1.5](#). In addition, all possible merged 5-digit scheme sacks must be prepared under [10.1.4](#), or all possible merged 5-digit scheme and 5-digit scheme pallets must be prepared under [10.1.5](#).
- g. The carrier route mailing must meet the eligibility criteria in [707.13.0](#), the automation rate mailing must meet the eligibility criteria in [707.14.0](#), and the Presorted rate mailing must meet the eligibility criteria in [707.12.0](#).
- h. For sacked mailings, the rates for pieces in the carrier route mailing are based on the criteria in [707.13.0](#), the rates for pieces in the automation rate mailing are applied based on the number of pieces in the bundle and the level of bundle to which they are sorted under [707.14.0](#), and the rates for pieces in the Presorted rate mailing are based on the number of pieces in the bundle and the level of sack to which they are sorted under [707.12.0](#).

- i. For palletized mailings, the rates are based on the level of bundle and the number of pieces in the bundle under [707.12.0](#), [707.13.0](#), and [707.14.0](#).
- j. For mailings prepared in sacks, firm bundles and 5-digit scheme bundles may not be combined within a 5-digit scheme (L007) bundle or within a 5-digit scheme (L007) sack. A firm bundle can contribute toward the six-piece minimum for rate eligibility and must be placed in a separate individual 5-digit sack under [10.1.4g](#) to maintain 5-digit rate eligibility. Firm bundles may be placed with 5-digit scheme, 3-digit scheme, and other presort destination bundles in 3-digit, SCF, ADC, and mixed ADC sacks, as appropriate.
- k. The bundles from each separate mailing must be sorted together into sacks (cosacked) under [10.1.4](#) or on pallets (copalletized) under [10.1.5](#) using presort software that is PAVE-certified.
- l. A complete, signed postage statement(s), using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- m. In addition to the postage statement(s), documentation prepared by PAVE-certified software must be submitted with each cosacked or copalletized mailing job that describes for each sack sortation level and sack, or each pallet sortation level and pallet, the number of pieces qualifying for each applicable carrier route rate, each applicable automation rate, and each applicable Presorted rate under [708.1.0](#).
- n. Barcoded sack labels under [708.6.0](#) must be used to label sacks. [M920.1.1]

### 10.1.2 Bundle Preparation

Bundles must be prepared as follows:

- a. *Sacked Mailings*. The carrier route mailing must be bundled and labeled under [707.23.0](#). Except when prepared under the cobundling option in [11.0](#), the automation rate mailing must be bundled and labeled under [707.25.0](#) and the Presorted rate mailing must be bundled and labeled under [707.22.0](#).
- b. *Palletized Mailings*. Bundles placed on pallets must be prepared under the standards in [8.9](#). [M920.1.2]

### 10.1.3 Low-Volume Bundles in Sacks or on Pallets

Carrier route, 5-digit scheme (L007), 5-digit, 3-digit scheme (L008), and 3-digit bundles prepared under [707.22.0](#), [707.23.0](#), and [707.25.0](#) or [11.0](#) that contain fewer than six pieces may be placed in sacks under [10.1.4](#), or placed on pallets under [10.1.5](#) as follows:

- a. Low-volume carrier route, 5-digit, 3-digit scheme, and 3-digit bundles may be placed in carrier routes, merged 5-digit scheme (L001), 5-digit scheme carrier routes, merged 5-digit, 5-digit carrier routes, 5-digit, 3-digit, and SCF sacks, as appropriate, or on merged 5-digit scheme (L001), 5-digit scheme carrier routes, 5-digit scheme, merged 5-digit, 5-digit carrier routes, 5-digit, 5-digit metro, 3-digit, or SCF pallets, as appropriate. Pieces in such low-volume bundles must be claimed at the applicable basic rate.

## 705.10.1.4

- b. Low-volume 5-digit scheme bundles may be placed in 5-digit scheme (L007), 3-digit, and SCF sacks, or on 3-digit, or SCF pallets, as appropriate. Pieces in such low-volume bundles must be claimed at the applicable basic rate.  
[M920.1.3]

**10.1.4 Sack Preparation and Labeling**

Mailers must prepare sacks containing the individual carrier route and 5-digit bundles from the carrier route, automation rate, and Presorted rate mailings in the mailing job in the following manner and sequence. All carrier route bundles must be placed in sacks under 10.1.4a through 10.1.4e as described below. When sortation under this section is performed, merged 5-digit scheme sacks, 5-digit scheme carrier routes sacks, and merged 5-digit sacks must be prepared for all possible 5-digit schemes or 5-digit ZIP Codes as applicable, using L001 (merged 5-digit scheme and 5-digit scheme carrier routes sort only) and the Carrier Route Indicators field in the City State Product when there is enough volume for the 5-digit scheme or 5-digit ZIP Code to prepare such sacks under 10.1.4, *Sack Preparation and Labeling*. Mailers must label sacks according to the Line 1 and Line 2 information listed below and under 707.20.1, *Basic Standards*. If, due to the physical size of the mailpieces, the automation rate pieces are considered flat-size under 301.3.0, *Physical Standards for Automation Flats*, and the carrier route sorted pieces and Presorted rate pieces are considered irregular parcels under 401.1.6, *Irregular Parcel*, “FLTS” must be shown as the processing category shown on the sack label. If a mailing job does not contain an automation rate mailing and the carrier route mailing and the Presorted rate mailing are irregular parcel shaped, use “IRREG” for the processing category on the contents line of the label.

- a. *Carrier Route*. Required. May contain only carrier route bundles. Must be prepared when there are 24 or more pieces for the same carrier route. Smaller volume not permitted.
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see 707.21.1.2 for military mail).
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR” for basic rate, “WSH” for high-density rate, or “WSS” for saturation rate; followed by the route type and number.
- b. *Merged 5-Digit Scheme*. Required. Permitted only when there is at least one 5-digit ZIP Code in the scheme with an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in L001 as well as automation rate 5-digit bundles and Presorted rate 5-digit bundles for those 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product. When preparation of this sack level is permitted, a sack must be prepared if there are any carrier route bundle(s) for the scheme. If there is not at least one carrier route bundle for any 5-digit destination in the scheme, preparation of this sack is required at 24 pieces in 5-digit bundles, and optional with one six-piece bundle or at least one 5-digit bundle of fewer pieces for the scheme in L001 under 10.1.3, for any of the 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product. For a 5-digit ZIP Code(s) in a scheme that has a “B” or “D”

indicator in the City State Product, prepare sack(s) for the automation rate and Presorted rate bundles under [10.1.4g](#) and [10.1.4h](#). For 5-digit ZIP Codes not included in a scheme, prepare sacks under [10.1.4d](#) through [10.1.4h](#).

1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D SCH.”
- c. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for 5-digit ZIP Code(s) in a single scheme listed in [L001](#) when all the 5-digits in the scheme have a “B” or “D” indicator in the City State Product. Must be prepared if there are any carrier route bundle(s) for such a scheme.
1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS SCH.”
- d. *Merged 5-Digit*. Required. Must be prepared only for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product. May contain carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles. Must be prepared if there are any carrier route bundles for the 5-digit. If there is not at least one carrier route bundle for the 5-digit destination, preparation of this sack is required at 24 pieces in 5-digit bundles for the same 5-digit destination, and is optional with one six piece bundle or at least one bundle of fewer pieces under [10.1.3](#).
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D.”
- e. *5-Digit Carrier Routes*. Required. Sack only carrier route bundles for a 5-digit ZIP Code remaining after preparing sacks under [10.1.4a](#) through [10.1.4d](#) to this level. May contain only carrier route bundles for any 5-digit ZIP Code that is not part of a scheme listed in [L001](#) and that has a “B” or “D” indicator in the City State Product. No sack minimum.
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS.”
- f. *5-Digit Scheme*. Required. May contain only automation rate and cobundled automation and Presorted rate 5-digit scheme bundles for the same 5-digit scheme destination. Must be prepared at 24 or more pieces, optional with one six-piece bundle or at least one bundle of fewer pieces under [10.1.3](#).
1. Line 1: [L007](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS 5D SCH BC.”

## 705.10.1.5

- g. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code for any 5-digit ZIP Code that has a “B” or “D” indicator in the City State Product. Must be prepared at 24 or more pieces, optional with one six-piece bundle or at least one bundle of fewer pieces under [10.1.3](#).
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [707.21.1.2](#) for military mail).
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS 5D BC/NBC,” except if there are no automation rate bundles in the mailing job, label under [707.22.6e](#).
- h. *3-Digit through Mixed ADC Sacks*. Any 5-digit scheme and 5-digit bundles remaining after preparing sacks under [10.1.4a](#) through [10.1.4g](#), and all 3-digit, ADC, and Mixed ADC bundles, must be sacked and labeled according to the applicable requirements under [9.2](#) for cosacking of automation rate and Presorted rate bundles, except if there are no automation rate bundles in the mailing job, sack and label under [707.22.6](#), or, if there are no Presorted rate bundles in the mailing job, sack and label under [707.25.3](#). [M920.1.4]

**10.1.5 Pallet Preparation and Labeling**

Mailers must prepare pallets of bundles in the manner and sequence listed below and under [8.0, Preparation for Pallets](#). When sortation under this option is performed, mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using [L001](#) and/or the City State Product. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under [8.6, Pallet Labels](#). If, due to the physical size of the mailpieces, the automation rate pieces are considered flat-size under [301.3.0, Physical Standards for Automation Flats](#), and the carrier route sorted pieces and Presorted rate pieces are considered irregular parcels under [401.1.6, Irregular Parcel](#), “FLTS” must be shown as the processing category on the pallet label. If a mailing contains no automation rate pieces and the carrier route mailing and the Presorted rate mailing are irregular parcels, use “IRREG” for the processing category on the contents line of the label.

- a. *Merged 5-Digit Scheme*. Required and permitted only when there is at least one 5-digit ZIP Code in the scheme that has an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in [L001](#) as well as automation rate 5-digit bundles and Presorted rate 5-digit bundles for those 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product. For schemes in which all of the 5-digit ZIP Codes have a “B” or “D” indicator in the City State Product, begin preparing pallets under [10.1.5d](#) (5-digit scheme carrier routes pallet). For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under [10.1.5d](#) (merged 5-digit pallet).
  - 1. Line 1: use [L001](#), Column B.
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D SCHEME.”

- b. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for carrier routes in an [L001](#) scheme for which all of the 5-digit ZIP Codes in the scheme have a “B” or “D” indicator in the City State Product.
  - 1. Line 1: use [L001](#), Column B.
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS SCHEME.”
- c. *5-Digit Scheme*. Not permitted for flats that meet the dimension, weight, and flexibility criteria of the AFSM 100 in [301.3.3](#), including copalletized or combined AFSM 100-compatible flats and other flats, and not permitted for sacks or trays. Required for all other flats and irregular parcels. May contain only 5-digit bundles of automation rate and Presorted rate mail for the same 5-digit scheme under [L001](#) for ZIP Codes in the scheme that have a “B” or “D” indicator in the City State Product.
  - 1. Line 1: use [L001](#), Column B.
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail; followed by “SCHEME” or “SCH.”
- d. *Merged 5-Digit*. Required. May contain carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product.
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D.”
- e. *5-Digit Carrier Routes*. Required. May contain only carrier route rate bundles for the same 5-digit ZIP Code for those 5-digit ZIP Codes that are not part of a scheme and that have a “B” or “D” indicator in the City State Product.
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CARRIER ROUTES” or “CR-RTS.”
- f. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code with a “B” or “D” indicator in the City State Product, or 5-digit scheme ([L007](#)) bundles (automation rate and cobundled automation and Presorted rate pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code.
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).

## 705.10.1.5

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail.
- g. *5-Digit Metro*. Optional. May contain carrier route, automation, and Presorted rate bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B.
  1. Line 1: use [L006](#), Column C.
  2. Line 2: “PER” or “NEWS”; followed by “FLTS” or “IRREG”; followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate and/or carrier route mail.
- h. *3-Digit*. Optional. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route rate, automation rate, and Presorted rate mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted rate pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the OEL “label to” 3-digit ZIP Code.
  1. Line 1: use [L002](#), Column A.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “3D,” followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
- i. *SCF*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
  1. Line 1: use [L002](#), Column C.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
- j. *ADC*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
  1. Line 1: use [L004](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “ADC”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.

[M920.1.5]

## 10.2 Standard Mail

### 10.2.1 Basic Standards

Carrier route bundles from a carrier route rate mailing may be placed in the same sack or on the same pallet as 5-digit bundles from an automation rate mailing and 5-digit bundles from a Presorted rate mailing (including pieces cobundled under 11.0) under the following conditions:

- a. A carrier route mailing must be part of the mailing job, unless cobundled under 11.0 utilizing 5-digit scheme (L007) or 3-digit scheme (L008) bundle preparation and sacked under 10.1.4.
- b. The pieces in the carrier route rate mailing, the automation rate mailing, and the Presorted rate mailing must be part of the same mailing job, and all three mailings must be reported on the same postage statement.
- c. Pieces in the automation rate mailing must meet the criteria for a flat under 301.3.0. Pieces in the Presorted rate mailing and the carrier route mailing must meet the criteria for a flat under 301.1.1.
- d. Mailers must use the Carrier Route Indicators field in the City State Product to prepare the mailing and enter the mailing no later than 90 days after the release date of the City State Product used.
- e. Carrier route bundles may be cosacked or copalletized with automation rate 5-digit bundles, Presorted rate 5-digit bundles, and cobundled 5-digit bundles only for those 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product indicating eligibility for such cosacking or copalletization. Containers of mail sorted in this manner are called “merged 5-digit” sacks or pallets. Containers of mail sorted in this manner for which scheme (L001) sortation is also performed are called “merged 5-digit scheme” sacks or pallets. Pieces in 5-digit scheme (L007) bundles may not be placed in merged 5-digit containers.
- f. If sortation under this section is performed, merged 5-digit sacks or pallets must be prepared for all 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product that permits such preparation when there is enough volume for the 5-digit ZIP Code to prepare that sack or pallet.
- g. The carrier route mailing must meet the eligibility criteria in 343.6.0, the automation rate mailing must meet the eligibility criteria in 343.7.0, and the Presorted rate mailing must meet the eligibility criteria in 343.5.0.
- h. For sacked mailings, the rates for pieces in the carrier route mailing are based on the criteria in 343.6.0, the rates for pieces in the automation rate mailing are applied based on the number of pieces in the bundle and the level of bundle to which they are sorted under 343.7.0, and the rates for pieces in the Presorted rate mailing are based on the number of pieces in the bundle and the level of sack to which they are sorted under 343.5.0.
- i. The pieces in each separate mailing must bear the applicable markings required under 345.5.0, 345.6.0, or 345.7.0 and under 302.
- j. For palletized mailings, the rates are based on the level of bundle that the pieces are contained in under 343.6.0 and 343.7.0.

## 705.10.2.2

- k. The bundles from each separate mailing must be sorted together into sacks (cosacked) under [10.2.3](#) and [10.2.4](#) or on pallets (copalletized) under [10.2.5](#) using presort software that is PAVE-certified.
- l. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- m. In addition to the applicable postage statement, documentation produced by PAVE-certified software must be submitted with each cosacked or copalletized mailing job that describes for each sack sortation level and sack, or each pallet sortation level and pallet, the number of pieces qualifying for each applicable carrier route rate, each applicable automation rate, and each applicable Presorted rate.
- n. Barcoded sack labels under [708.6.0](#) must be used to label sacks. [M920.2.1]

**10.2.2 Bundle Preparation**

Bundles must be prepared as follows:

- a. *Sacked Mailings*. The carrier route mailing must be bundled and labeled under [345.6.0](#). Except when prepared under the cobundling option in [11.0](#), the automation rate mailing must be bundled and labeled under [345.7.0](#) and the Presorted rate mailing must be bundled and labeled under [345.5.0](#).
- b. *Palletized Mailings*. Bundles placed on pallets must be prepared under the standards in [8.0, Preparation for Pallets](#). [M920.2.2]

**10.2.3 Sacking Under 125-Piece or 15-Pound Rules**

When the minimum quantity of 125 pieces or 15 pounds of mail is specified for a sack sortation level in [10.2.4](#), the provisions of [345.7.5.3](#) apply. [M920.2.3]

**10.2.4 Sack Preparation and Labeling**

Mailers must prepare sacks in the following manner and sequence. All carrier route bundles must be placed in sacks under [10.2.4a](#) through [10.2.4e](#) as described below. Mailers must prepare all merged 5-digit scheme sacks, 5-digit scheme carrier routes sacks, and merged 5-digit sacks that are possible in the mailing based on the volume of mail to the destination using [L001](#) and the Carrier Route Indicators field in the City State Product. Mailers must label sacks according to the Line 1 and Line 2 information listed below and under [345.4.0, Sack and Tray Labels](#).

- a. *Carrier Route*. Required. May contain only carrier route bundles. Must be prepared when there are 125 pieces or 15 pounds of pieces for the same carrier route. Smaller volume not permitted.
  - 1. Line 1 labeling: use city, state, and 5-digit ZIP Code destination (see [345.4.2](#) for military mail).
  - 2. Line 2 labeling: "STD FLTS"; followed by "ECRLOT," "ECRWSH," or "ECRWSS" as applicable for basic, high-density, and saturation rate mail; followed by the route type and number.
- b. *Merged 5-Digit Scheme*. Required and permitted only when there is at least one 5-digit ZIP Code in the scheme with an "A" or "C" indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a

single scheme listed in [L001](#) as well as automation rate 5-digit bundles and Presorted rate 5-digit bundles for those 5-digit ZIP Codes in the scheme with an “A” or “C” indicator in the City State Product. When preparation of this sack level is permitted, a sack must be prepared if there are any carrier route bundle(s) for the scheme. If there is not at least one carrier route bundle for any 5-digit destination in the scheme, preparation of this sack is required when there are at least 125 pieces or 15 pounds of pieces in 5-digit bundles for any of the 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product (smaller volume not permitted). For a 5-digit ZIP Code(s) in a scheme with a “B” or “D” indicator in the City State Product, prepare sack(s) for the automation rate and Presorted rate bundles under [10.2.4g](#) and [10.2.4h](#). For 5-digit ZIP Codes not included in a scheme, prepare sacks under [10.2.4d](#) through [10.2.4h](#).

1. Line 1: use [L001](#), Column B.
  2. Line 2: “STD FLTS CR/5D SCH.”
- c. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for 5-digit ZIP Code(s) in a single scheme listed in [L001](#) when all the 5-digit ZIP Codes in the scheme have a “B” or “D” indicator in the City State Product. Must be prepared if there are any carrier route bundle(s) for such a scheme.
1. Line 1: use [L001](#), Column B.
  2. Line 2: “STD FLTS CR-RTS SCH.”
- d. *Merged 5-Digit*. Required. Must be prepared only for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product. May contain carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles. Must be prepared if there are any carrier route bundles for the 5-digit destination. If there is not at least one carrier route bundle for the 5-digit destination, must be prepared when there are at least 125 pieces or 15 pounds of pieces in 5-digit bundles for the same 5-digit destination (smaller volume not permitted).
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.4.2](#) for military mail).
  2. Line 2: “STD FLTS CR/5D.”
- e. *5-Digit Carrier Routes*. Required. Sack only carrier route bundles for a 5-digit ZIP Code remaining after preparing sacks under [10.2.4a](#) through [10.2.4d](#) to this level. May contain only carrier route bundles for any 5-digit ZIP Code that is not part of a scheme listed in [L001](#) and that has a “B” or “D” indicator in the City State Product. No sack minimum.
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.4.2](#) for military mail).
  2. Line 2: “STD FLTS CR-RTS.”

## 705.10.2.5

- f. *5-Digit Scheme*. Required. May contain only automation rate, and cobundled automation and Presorted rate 5-digit scheme bundles for the same 5-digit scheme destination. Must be prepared when there are at least 125 pieces or 15 pounds of pieces for the 5-digit scheme destination. Smaller volume not permitted.
  - 1. (1) Line 1: [L007](#), Column B.
  - 2. (2) Line 2: “STD FLTS 5D SCH BC.”
- g. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for a 5-digit ZIP Code that has a “B” or “D” indicator in the City State Product. Must be prepared when there are at least 125 pieces or 15 pounds of pieces for the 5-digit ZIP Code. Smaller volume not permitted.
  - 1. Line 1: use city, state, and 5-digit ZIP Code destination (see [345.4.2](#) for military mail).
  - 2. Line 2: “STD FLTS 5D BC/NBC,” except if there are no automation rate bundles in the mailing job, use “STD FLTS 5D NON BC.”
- h. *3-Digit through Mixed ADC Sacks*. Any 5-digit scheme and 5-digit bundles remaining after preparing sacks under [10.2.4a](#) through [10.2.4g](#), and all 3-digit, ADC, and Mixed ADC bundles, must be sacked and labeled according to the applicable requirements under [9.3](#) for cosacking of automation rate and Presorted rate bundles, except if there are no automation rate bundles in the mailing job, sack and label under [345.5.7](#), or, if there are no Presorted rate bundles in the mailing job, sack and label under [345.7.5.4](#). [M920.2.4]

**10.2.5 Pallet Preparation and Labeling**

Mailers must prepare pallets in the manner and sequence listed below and under [8.0](#). Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using [L001](#) and/or the City State Product. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under [8.6](#).

- a. *Merged 5-Digit Scheme*. Required and permitted only when there is at least one 5-digit ZIP Code in the scheme that has an “A” or “C” indicator in the City State Product. May contain carrier route bundles for any 5-digit ZIP Code(s) in a single scheme listed in [L001](#) as well as automation rate 5-digit bundles and Presorted rate 5-digit bundles for those 5-digit ZIP Codes in the scheme that have an “A” or “C” indicator in the City State Product. For schemes in which all of the 5-digit ZIP Codes have a “B” or “D” indicator in the City State Product, begin preparing pallets under [10.2.5b](#) (5-digit scheme carrier routes pallet). For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under [10.2.5c](#) (merged 5-digit pallet).
  - 1. Line 1: use [L001](#), Column B.
  - 2. Line 2: “STD FLTS CR/5D SCHEME.”

- b. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for carrier routes in an [L001](#) scheme for which all of the 5-digit ZIP Codes in the scheme have a “B” or “D” indicator in the City State Product.
  1. Line 1: use [L001](#), Column B.
  2. Line 2: “STD FLTS CR-RTS SCHEME.”
- c. *Merged 5-Digit*. Required. May contain carrier route rate bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles for those 5-digit ZIP Codes that are not part of a scheme and that have an “A” or “C” indicator in the City State Product.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: “STD FLTS CR/5D.”
- d. *5-Digit Carrier Routes*. Required. May contain only carrier route rate bundles for the same 5-digit ZIP Code for those 5-digit ZIP Codes that are not part of a scheme and that have a “B” or “D” indicator in the City State Product.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: “STD FLTS,” followed by “CARRIER ROUTES” or “CR-RTS.”
- e. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code with a “B” or “D” indicator in the City State Product, or 5-digit scheme ([L007](#)) bundles (automation rate and cobundled automation and Presorted rate pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: “STD FLTS 5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail.
- f. *5-Digit Metro*. Optional. May contain carrier route, automation, and Presorted rate bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B.
  1. Line 1: use [L006](#), Column C.
  2. Line 2: “STD FLTS” followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate and/or carrier route mail.
- g. *3-Digit*. Optional. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route rate, automation rate, and Presorted rate mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted rate pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the OEL “label to” 3-digit ZIP Code.

## 705.10.2.5

1. Line 1: use [L002](#), Column A.
  2. Line 2: “STD FLTS 3D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- h. *SCF* Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
1. Line 1: use [L002](#), Column C.
  2. Line 2: “STD FLTS SCF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- i. [\[02-03-05\]](#) *ASF*. Required, except that an ASF sort may not be required if using bundle reallocation under [8.12.3](#). May contain carrier route rate, automation rate, and/or Presorted rate bundles. Sort ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on ASF pallets must contain only pieces destinating within the ASF as shown in [Exhibit 6.1.6](#). See [346.3.0](#) for additional requirements for DBMC rate eligibility.
1. Line 1: use [L602](#), Column B.
  2. Line 2: “STD FLTS ASF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- j. [\[02-03-05\]](#) *BMC*. Required. May contain carrier route rate, automation rate, and/or Presorted rate bundles. Sort ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on BMC pallets must contain only pieces destinating within the BMC as shown in [Exhibit 6.1.6](#). See [346.3.0](#) for additional requirements for DBMC rate eligibility.
1. Line 1: Use [L601](#), Column B.
  2. Line 2: “STD FLTS BMC”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.

[\[M920.2.5\]](#)

## 11.0 Preparation of Cobundled Automation Rate and Presorted Rate Flats

### 11.1 First-Class Mail

#### 11.1.1 Basic Standards

Mailers may choose to cobundle (see [335.1.4m.](#)) automation rate and Presorted rate pieces as an option to the basic bundling requirements in [9.0, \*Preparation for Cotraying and Cosacking Bundles of Automation and Presorted Flats\*](#), subject to the following conditions:

- a. The pieces in the automation rate mailing and the Presorted rate mailing must be part of the same mailing job and must be reported on the appropriate postage statement.
- b. The pieces in the mailing job must be flat-size and meet any other size and mailpiece design requirements applicable to the rate category for which they are prepared.
- c. The basic standards in [9.0](#) must be met.
- d. A minimum of 500 automation rate pieces and 500 Presorted rate pieces are required. The total number of automation rate and Presorted rate pieces must be used to meet the minimum volume requirements for bundles and containers to a presort destination.
- e. Presorted rate pieces must contain a 5-digit barcode and be cobundled with automation rate pieces for the same presort destination. If this optional preparation method is used, all automation rate and Presorted rate pieces in the same mailing job and reported on the same postage statement must be cobundled.
- f. Within a bundle, all pieces must meet the AFSM 100 requirements or all pieces must meet the UFSM 1000 requirements described in [301.3.0](#).
- g. Mailers must sort automation rate pieces and Presorted rate pieces for each presort destination so that only one physical bundle for each logical presort destination (see [335.1.4l.](#)) includes both automation rate pieces (containing a ZIP+4 or delivery point barcode) and Presorted rate pieces (containing a 5-digit barcode). [M950.1.1]

#### 11.1.2 Bundle Preparation

Preparation sequence, bundle size, and labeling:

- a. 5-digit (required); 10-piece minimum; red Label 5 or optional endorsement line (OEL).
- b. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- c. ADC (required); 10-piece minimum; pink Label A or OEL.
- d. Mixed ADC (required); no minimum; tan Label X or OEL. [M950.1.2]

705.11.2

## 11.2 Periodicals

### 11.2.1 Basic Standards

Mailers may choose to cobundle (see [707.18.4z.](#)) automation rate and Presorted rate flat-size pieces as an option to the basic bundling requirements in [707.22.0](#) and [707.25.0](#). Mailing jobs consisting entirely of AFSM 100-compatible pieces meeting the criteria in [301.3.3](#) may be prepared in 5-digit scheme bundles using [L007](#) and 3-digit scheme bundles using [L008](#). 5-digit scheme and 3-digit scheme bundles must also meet the additional standards in [707.18.4g.](#). Mailing jobs prepared using the 5-digit scheme and/or 3-digit scheme bundle option must be sacked under [10.0](#) or palletized under [10.0](#), [12.0](#), or [13.0](#). All bundles are subject to the following conditions:

- a. The pieces in the automation rate mailing and the Presorted rate mailing must be part of the same mailing job and must be reported on the appropriate postage statement.
- b. The pieces in the mailing job must be nonletter-size and meet any other size and mailpiece design requirements applicable to the rate category for which they are prepared.
- c. Mailings prepared in sacks must meet the basic standards in [9.0](#) or [10.0](#).
- d. Mailings prepared on pallets must meet the basic standards in [8.0](#), [10.0](#), [12.0](#), or [13.0](#).
- e. The total number of automation rate and Presorted rate pieces must be used to meet the minimum volume requirements for bundles and containers.
- f. Presorted rate pieces must contain a 5-digit barcode and be cobundled with automation rate pieces for the same presort destination. If this optional preparation method is used, all automation rate and Presorted rate pieces in the same mailing job and reported on the same postage statement must be cobundled.
- g. Within a bundle, all pieces must meet the AFSM 100 requirements or all pieces must meet the UFSM 1000 requirements described in [301.3.0](#).
- h. Mailers must sort Presorted rate pieces and automation rate pieces for each presort destination so that only one physical bundle for each logical presort destination (see [707.18.4y.](#)) includes both automation rate pieces (containing a ZIP+4 or delivery point barcode) and Presorted rate pieces (containing a 5-digit barcode). [M950.2.1]

### 11.2.2 Bundle Preparation

Preparation sequence, bundle size, and labeling:

- a. Firm (optional for Presorted rate pieces only under [707.22.3](#)); two-piece minimum; blue Label F or optional endorsement line (OEL).
- b. 5-digit scheme (optional under [10.0](#), *Preparation for Merged Containerization of Bundles of Flats Using City State Product*; required under [12.0](#), *Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold*, and [13.0](#),

*Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold*); six-piece minimum (fewer permitted under 11.2.3); OEL required.

- c. 5-digit (required); six-piece minimum (fewer permitted under 11.2.3); red Label 5 or OEL.
- d. 3-digit scheme (optional under 10.0; required effective April 18, 2005, under 12.0 and 13.0); six-piece minimum (fewer permitted under 11.2.3); OEL required.
- e. 3-digit (required); six-piece minimum (fewer permitted under 11.2.3); green Label 3 or OEL.
- f. ADC (required); six-piece minimum; pink Label A or OEL.
- g. Mixed ADC (required); no minimum; tan Label X or OEL. [M950.2.2]

### 11.2.3 Low-Volume Bundles in Sacks or on Pallets

As a general exception to 11.2.2, 5-digit scheme (L007), 5-digit, 3-digit scheme (L008), and 3-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Low-volume 5-digit and 3-digit bundles may be placed in 5-digit scheme (L007), 5-digit, 3-digit, and SCF sacks, as appropriate, or on merged 5-digit scheme (L001), 5-digit scheme, merged 5-digit, 5-digit, 5-digit metro, 3-digit, or SCF pallets, as appropriate. Low-volume 5-digit scheme and 3-digit scheme bundles may be placed in 5-digit scheme, 3-digit, and SCF sacks, as appropriate, or on 3-digit, or SCF pallets, as appropriate. Pieces in such low-volume bundles must be claimed at the applicable basic rate. [M950.2.3]

## 11.3 Standard Mail

### 11.3.1 Basic Standards

Mailers may choose to cobundle (see 345.1.4u.) automation rate and Presorted rate flat-size pieces as an option to the basic bundling requirements in 345.5.0 and 345.7.0. Mailing jobs consisting entirely of AFSM 100-compatible pieces meeting the criteria in 301.3.3 may be prepared in 5-digit scheme bundles using L007 and 3-digit scheme bundles using L008. Five-digit scheme and 3-digit scheme bundles must also meet the additional standards in 345.1.4f.. Mailing jobs prepared using the 5-digit scheme and/or 3-digit scheme bundle option must be sacked under 10.0 or palletized under 10.0, 12.0, or 13.0. All bundles are subject to the following conditions:

- a. The pieces in the automation rate mailing and the Presorted rate mailing must be part of the same mailing job and must be reported on the appropriate postage statement.
- b. The pieces in the mailing job must be flat-size and meet any other size and mailpiece design requirements applicable to the rate category for which they are prepared.
- c. Mailings prepared in sacks must meet the basic standards in 9.0 or 10.0.
- d. Mailings prepared on pallets must meet the basic standards in 8.0, 10.0, 12.0, or 13.0.

## 705.11.3.2

- e. A minimum of 200 pieces or 50 pounds of automation rate pieces are required; the Presorted rate mailing may meet the residual volume requirements in [343.3.4](#). The total number of automation rate and Presorted rate pieces must be used to meet the minimum volume requirements for bundles and containers.
- f. Presorted rate pieces must contain a 5-digit barcode and be cobundled with automation rate pieces for the same presort destination. If this optional preparation method is used, all automation rate and Presorted rate pieces in the same mailing job and reported on the same postage statement must be cobundled.
- g. Within a bundle, all pieces must meet the AFSM 100 requirements or all pieces must meet the UFSM 1000 requirements described in [301.3.0](#).
- h. Mailers must sort Presorted rate pieces and automation rate pieces for each presort destination so that only one physical bundle for each logical presort destination (see [345.1.4t.](#)) includes both Presorted rate pieces (containing a 5-digit barcode) and automation rate pieces (containing a ZIP+4 or delivery point barcode). [M950.3.1]

**11.3.2 Bundle Preparation**

Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional):
  - 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less: 15-piece minimum; optional endorsement line (OEL) required.
  - 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound): 10-piece minimum; OEL required.
- b. 5-digit (required):
  - 1. For mailings containing only pieces weighing 5 ounces (0.3125 pound) or less and measuring 3/4 inch thick or less: 15-piece minimum; red Label 5 or OEL.
  - 2. For mailings containing any pieces weighing more than 5 ounces (0.3125 pound) or measuring more than 3/4 inch thick: 10-piece minimum; red Label 5 or OEL.
- c. 3-digit scheme (optional); 10-piece minimum; OEL required.
- d. 3-digit (required); 10-piece minimum; green Label 3 or OEL.
- e. ADC (required); 10-piece minimum; pink Label A or OEL.
- f. Mixed ADC (required); no minimum; tan Label X or OEL. [M950.3.2]

**11.4 Bound Printed Matter****11.4.1 Basic Standards**

Mailers may choose to cobundle (see [365.1.4l.](#)) Presorted rate flat-size with and without a barcode, as an option to the basic bundling requirements in [365.5.0](#) and [365.7.0](#), subject to the following conditions:

- a. The pieces in the Presorted rate mailing qualifying for and claiming the barcoded discount and the pieces in the Presorted rate mailing must be part of the same mailing job and reported on the same postage statement.
- b. The mailing job must consist entirely of AFSM 100-compatible pieces meeting the criteria in [301.3.3](#), and may be prepared in 5-digit scheme bundles using [L007](#) and 3-digit scheme bundles using [L008](#).
- c. Cobundled pieces must be cosacked under [9.0](#) or palletized under [8.0](#).
- d. A separate minimum of 300 Presorted rate pieces qualifying for and claiming the barcoded discount and a separate minimum of 300 Presorted rate pieces are required. The combined total number of pieces qualifying for and claiming the barcoded discount and the Presorted rate must be used to meet the minimum volume requirements for bundles and sacks.
- e. Presorted rate pieces must contain a 5-digit barcode and be cobundled with Presorted rate pieces qualifying for and claiming the barcoded discount for the same presort destination.
- f. Unless presented using an approved manifest mailing system under [2.0](#), Presorted rate pieces qualifying for and claiming the barcoded discount and Presorted rate pieces for each presort destination must be sorted so that only one physical bundle for each logical presort destination includes both Presorted rate pieces qualifying for the barcoded discount (containing a ZIP+4 or delivery point barcode) and Presorted rate pieces (containing a 5-digit barcode).  
[M950.4.1]

#### 11.4.2 Bundle Preparation

Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional); minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; optional endorsement line (OEL) required.
- b. 5-digit (required); minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; red Label 5 or optional endorsement line (OEL).
- c. 3-digit scheme (optional); minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; OEL required.
- d. 3-digit (required); minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; green Label 3 or OEL.
- e. ADC (required); minimum 10 addressed pieces or 10 pounds, maximum bundle weight 20 pounds; pink Label A or OEL.
- f. Mixed ADC (required); no minimum, maximum bundle weight 20 pounds; tan Label X or OEL. [M950.4.2]

705.12.1

## 12.0 Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold

### 12.1 Periodicals

#### 12.1.1 Basic Standards

[02-03-05] Five-digit scheme bundles (under [L007](#)) must be prepared, and effective April 17, 2005, 3-digit scheme bundles (under [L008](#)) also must be prepared, according to standards in [12.1.5](#). However, neither 5-digit scheme bundles nor 3-digit scheme bundles may be copalletized on any merged pallets. Five-digit bundles from an automation rate mailing and 5-digit bundles from a Presorted rate mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the same mailing job as the automation rate mailing and/or the Presorted rate mailing.
- b. Each portion of the mailing job must meet the eligibility criteria (including rate eligibility) under the relevant DMM standards: [707.13.0](#) for the carrier route mailing, [707.14.0](#) for the automation rate mailing, and [707.12.0](#) for the Presorted rate mailing.
- c. Pieces in the automation rate mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted rate mailing and the carrier route mailing must be nonletter-size.
- d. When firm bundles, carrier route bundles, and 5-digit bundles are placed together on the same merged 5-digit scheme or merged 5-digit pallet, pieces in 5-digit bundles (other than firm bundles) must not exceed the 5% limit described in [12.1.4](#).
- e. All possible merged 5-digit scheme and 5-digit scheme pallets must be prepared according to standards in [12.1.5](#).
- f. The bundles from each separate mailing must be sorted together on pallets (copalletized) under [12.1.5](#) using presort software that is PAVE-certified.
- g. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job. In addition, documentation prepared by PAVE-certified software must be submitted with each mailing job. Documentation, under [708.1.0](#), must describe for each "logical" pallet sortation level and each physical pallet the number of addressed pieces qualifying for each carrier route rate, each Presorted rate, and each automation rate. Within the body of the documentation beneath the listing for the last physical pallet for each logical pallet presort destination, a separate 5% threshold summary also must be provided for each merged 5-digit scheme and each merged 5-digit logical pallet destination. *Note:* The separate 5% threshold summary must be for the mail on all of the physical pallets (i.e., the "logical" pallet) for that presort destination. This summary must describe for each 5-digit ZIP Code:
  1. The total number of all addressed pieces.

2. The total number of addressed pieces sorted in carrier route bundles and firm bundles (each firm bundle is claimed as one addressed piece).
  3. The total number of addressed pieces sorted in 5-digit bundles (other than firm bundles).
  4. Of the total number of all addressed pieces in [12.1.1g1](#), the percentage of addressed pieces sorted in 5-digit bundles (other than firm bundles).
- h. Portions of the mailing job that cannot be palletized must be prepared in sacks. [\[M930.1.1\]](#)

### 12.1.2 Bundle Preparation

[\[02-03-05\]](#) Bundles must be prepared under the standards in [8.0](#). [\[M930.1.2\]](#)

### 12.1.3 Low-Volume Bundles

[\[02-03-05\]](#) Carrier route and 5-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in such low-volume bundles must be claimed at the basic rate. [\[M930.1.3\]](#)

### 12.1.4 5% Threshold

[\[02-03-05\]](#) Firm bundles may be eligible for carrier route, 5-digit, or basic rates, as applicable. Firm bundles (claimed as one addressed piece), carrier route bundles, and 5-digit bundles may be placed together on the same merged 5-digit scheme or merged 5-digit logical pallet under [12.1.5](#) if all of the following conditions in items [12.1.4a](#) through [12.1.4e](#) below are met:

- a. For the purpose of calculating the 5% threshold, firm bundles (regardless of the rate claimed) are added together with the number of addressed pieces in carrier route bundles.
- b. The number of pieces prepared in 5-digit bundles (other than firm bundles) for any single 5-digit ZIP Code on a “logical” merged 5-digit scheme or merged 5-digit pallet must not exceed 5% of the total number of addressed pieces for the 5-digit ZIP Code on the logical pallet for that presort destination.
- c. The 5% threshold is calculated separately for each 5-digit ZIP Code. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code for the scheme on a merged 5-digit scheme pallet. Since 5-digit scheme bundles may not be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- d. When firm bundles, other than those claimed at carrier route rates, are placed on a merged 5-digit scheme or a merged 5-digit pallet, addressed pieces in all corresponding 5-digit bundles up to 5% also must be merged. If the number of addressed pieces placed in 5-digit bundles (for an individual 5-digit ZIP Code) exceeds the 5% threshold, the mailer may place a portion of the addressed pieces (up to 5%) on a merged 5-digit scheme or a merged 5-digit pallet. Mailers are encouraged, but not required, to include such pieces on a merged pallet in this sequence: presorted rate bundles, followed by cobundles (if using [11.0](#)), followed by automation rate bundles. Each 5-digit physical bundle placed on a merged 5-digit scheme or a merged 5-digit pallet must contain at least six

addressed pieces, and any remaining 5-digit physical bundles placed on other pallets also must contain at least six addressed pieces, unless prepared under standards allowing lower volumes as specified in [12.1.3](#).

- e. For the purpose of determining the 5% threshold, addressed pieces in low-volume carrier route bundles count as carrier route sorted pieces, and addressed pieces in low-volume 5-digit bundles count as 5-digit sorted pieces, even though the basic rate is paid for all such pieces. [M930.1.4]

### 12.1.5 Pallet Preparation and Labeling

Mailers must prepare pallets of bundles in the manner and sequence listed below and under [8.0](#). Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using [L001](#) and the 5% threshold, as applicable. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under [8.6](#). If, due to the physical size of the mailpieces, the automation rate pieces are considered flat-size under [301.3.0](#) and the carrier route sorted pieces and Presorted rate pieces are considered irregular parcels under [401.1.6](#), “FLTS” must be shown as the processing category on the pallet label. If a mailing contains no automation rate pieces and the carrier route mailing and the Presorted rate mailing are irregular parcels, use “IRREG” for the processing category on the contents line of the pallet label.

- a. *Merged 5-Digit Scheme*. Required. Permitted only when 5-digit bundles for at least one 5-digit ZIP Code in the scheme may be merged with carrier route bundles under the 5% threshold standard in [12.1.4](#). May contain carrier route bundles for any 5-digit ZIP Code in a single scheme listed in [L001](#). May also contain automation rate 5-digit bundles and Presorted rate 5-digit bundles up to a maximum of 5% of the total number of pieces for each 5-digit ZIP Code in the scheme under [12.1.4](#). For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under [12.1.5d](#) (merged 5-digit pallet).
  1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D SCHEME.”
- b. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for all carrier routes in an [L001](#) scheme when a merged 5-digit scheme pallet could not be prepared under [12.1.5a](#).
  1. Line 1 use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS SCHEME.”
- c. *5-Digit Scheme*. Not permitted for flats that meet the dimension, weight, and flexibility criteria of the AFSM 100 in [301.3.3](#), including copalletized or combined AFSM 100 flats and other flats, and not permitted for sacks or trays. Required for all other flats and irregular parcels. May contain only 5-digit bundles of automation rate and Presorted rate mail for the same 5-digit scheme under [L001](#) that could not be placed on a merged 5-digit scheme pallet.
  1. Line 1: use [L001](#), Column B.

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail; followed by “SCHEME” or “SCH.”
- d. *Merged 5-Digit*. Required. Permitted only when 5-digit bundles may be merged with carrier route bundles under the 5% threshold standard in 12.1.4 for a 5-digit ZIP Code that is not part of an L001 scheme. May contain carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles. The number of pieces in 5-digit bundles is limited to 5% of the total number of pieces placed on the pallet under 12.1.4.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR/5D.”
- e. *5-Digit Carrier Routes*. Required. May contain only carrier route rate bundles for the same 5-digit ZIP Code that is not part of a scheme for which a merged 5-digit pallet could not be prepared under 12.1.5d.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CARRIER ROUTES” or “CR-RTS.”
- f. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme (L007) bundles (automation rate and cobundled automation and Presorted rate pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail.
- g. *5-Digit Metro*. Optional. May contain carrier route, automation, and Presorted rate bundles for the 5-digit ZIP Codes listed in L006, Column A, and for the 3-digit ZIP Code areas listed in L006, Column B.
  1. Line 1: use L006, Column C.
  2. Line 2: “PER” or “NEWS”; followed by “FLTS” or “IRREG”; followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate and/or carrier route mail.

- h. *3-Digit*. Optional. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route rate, automation rate, and Presorted rate mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted rate pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the OEL “label to” 3-digit ZIP Code.
    - 1. Line 1: use [L002](#), Column A.
    - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “3D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
  - i. *SCF*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
    - 1. Line 1: use [L002](#), Column C.
    - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
  - j. *ADC*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
    - 1. Line 1: use [L004](#), Column B.
    - 2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “ADC”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
- [M930.1.5]

## 12.2 Standard Mail

### 12.2.1 Basic Standards

Five-digit scheme bundles (under [L007](#)) must be prepared, and effective April 18, 2005, 3-digit scheme bundles (under [L008](#)) must also be prepared. Five-digit scheme bundles may not be copalletized on any merged pallets. Five-digit bundles from an automation rate mailing and 5-digit bundles from a Presorted rate mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the mailing job.
- b. The pieces in the carrier route rate mailing, the automation rate mailing, and the Presorted rate mailing must be part of the same mailing job and all three mailings must be reported on the same postage statement.
- c. Pieces in the automation rate mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted rate mailing and the carrier route mailing must meet the criteria for a flat under [301.1.1](#).

- d. Automation rate 5-digit bundles, Presorted rate 5-digit bundles, and cobundled 5-digit bundles may be copalletized with carrier route bundles only when the pieces in the 5-digit bundles do not exceed the 5% limit described in [12.2.3](#). Pallets of mail sorted in this manner are called “merged 5-digit” pallets. Pallets of mail sorted in this manner for which scheme sortation is also performed are called “merged 5-digit scheme” pallets. Since 5-digit scheme bundles cannot be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- e. If sortation under this section is performed, merged 5-digit scheme pallets must be prepared whenever there is enough volume of carrier route and 5-digit bundles under [8.0](#) and [12.2.3](#) to prepare such pallets.
- f. The carrier route mailing must meet the eligibility criteria in [343.6.0](#), the automation rate mailing must meet the eligibility criteria in [343.7.0](#), and the Presorted rate mailing must meet the eligibility criteria in [343.5.0](#).
- g. The rates are based on the level of bundle that the pieces are contained in under [343.5.0](#) and [343.7.0](#).
- h. The bundles from each separate mailing must be sorted together on pallets (copalletized) using presort software that is PAVE-certified.
- i. The pieces in each separate mailing must bear the applicable markings required under [345.5.0, Preparation for Presorted Flats](#), [345.6.0, Preparation for Enhanced Carrier Route Flats](#), or [345.7.0, Preparation for Automation Rate Flats](#), and under [302, Elements on the Face of a Mailpiece](#).
- j. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- k. In addition to the postage statement(s), documentation prepared by PAVE-certified software must be submitted with each copalletized mailing job that describes for each pallet sortation level and pallet the number of pieces qualifying for each applicable carrier route rate, each applicable automation rate, and each applicable Presorted rate under [708.1.0](#). A separate 5% threshold summary also must be provided under [708.1.0](#) for each “logical” merged 5-digit scheme or “logical” merged 5-digit pallet presort destination. This 5% threshold summary must show for each 5-digit ZIP Code on the logical merged 5-digit scheme or logical merged 5-digit pallet: the total number of pieces on the pallet for the 5-digit ZIP Code; the total number of pieces sorted in carrier route bundles for the 5-digit ZIP Code; the total number of pieces sorted in 5-digit bundles for the 5-digit ZIP Code, and; of the total number of pieces for the 5-digit ZIP Code, the percentage of pieces sorted in 5-digit bundles for that 5-digit ZIP Code. This additional 5% threshold summary must appear within the body of the documentation beneath the pallet rate listing for the last physical pallet for the logical pallet presort destination. Note: If there are two or more physical pallets for the same presort destination, for example, the same merged 5-digit pallet destination, these two or more physical pallets would be considered as one “logical pallet.” The separate pallet summary must be for the mail on all of the physical pallets (the “logical pallet”) for that presort destination.

- I. Portions of the mailing job that cannot be palletized must be prepared in sacks.  
[M930.2.1]

### 12.2.2 Bundle Preparation

Bundles placed on pallets must be prepared under the standards in [8.0, Preparation for Pallets](#). [M930.2.2]

### 12.2.3 5%-Threshold Standard

Five-digit bundles and carrier route bundles may be placed on the same merged 5-digit scheme and merged 5-digit pallet if all of the following conditions are met:

- a. The number of pieces prepared in 5-digit bundles for any single 5-digit ZIP Code on a logical merged 5-digit or merged 5-digit scheme pallet does not exceed 5% of the total number of pieces for the 5-digit ZIP Code on the pallet(s) for the presort destination. That is, the total number of pieces for a 5-digit ZIP Code in 5-digit and carrier route bundles must not be greater than the number of pieces in carrier route bundles divided by 0.95.
- b. The 5% threshold is calculated separately for each 5-digit ZIP Code. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code for the scheme on a merged 5-digit scheme pallet. Since 5-digit scheme bundles may not be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- c. Except when bundles are prepared under the cobundling option in [11.0](#), all the mail in a logical 5-digit bundle must be able to be placed on the logical pallet under the 5% rule. A logical 5-digit bundle is all pieces for a mailing (rate level) prepared in a 5-digit bundle or bundles for the same 5-digit destination. For each 5-digit ZIP Code, it is possible to have a logical 5-digit bundle of automation rate mail and a logical 5-digit bundle of Presorted rate mail. If the total number of pieces in a logical 5-digit bundle exceeds the 5% limit, none of the pieces for that 5-digit bundle level may be placed on a merged 5-digit or merged 5-digit scheme pallet. For some ZIP Codes, the total number of pieces prepared in logical 5-digit bundles (both an automation rate 5-digit bundle and a Presorted rate 5-digit bundle) may exceed 5% of the total mail for that ZIP Code, but the number of pieces for an individual automation rate logical 5-digit bundle for that ZIP Code does not exceed the 5% limit nor does an individual Presorted rate logical 5-digit bundle for that ZIP Code exceed the 5% limit. In such instances, mailers may choose to place all of the pieces in a logical 5-digit bundle for a single rate category on the logical merged 5-digit or merged 5-digit scheme pallet so that the 5% threshold is not exceeded.
- d. Except for bundles prepared under the cobundling option in [11.0](#), if the total number of pieces in both the logical 5-digit automation rate bundle and the logical 5-digit Presorted rate bundle each separately exceed 5% of the total number of pieces for the 5-digit ZIP Code, none of the pieces in 5-digit bundles may be merged with carrier route bundles on a merged 5-digit or merged 5-digit scheme pallet.

- e. For mailing jobs prepared using the cobundling option in 11.0, if the total number of pieces prepared in a logical 5-digit bundle (containing automation rate and Presorted rate pieces) exceeds the 5% limit for a 5-digit ZIP Code in 12.2.3a, a mailer may, for each 5-digit ZIP Code, choose to place a portion of the pieces prepared in the logical 5-digit bundle on a merged 5-digit or 5-digit scheme pallet using one of the options below. Regardless of the option selected, a minimum of 10 pieces or 15 pieces as applicable must be prepared in 5-digit bundle(s) placed on the merged pallet and a minimum of 10 or 15 remaining pieces as applicable prepared in 5-digit bundle(s) not placed on the merged pallet, with the total number of pieces not exceeding the 5% limit. The options are:
1. Place either all automation rate pieces or all Presorted rate pieces for the 5-digit ZIP Code on the merged pallet.
  2. Place a portion of either the automation rate pieces or the Presorted rate pieces for the 5-digit ZIP Code on the merged pallet.
  3. Place either all the automation rate pieces plus a portion of the Presorted rate pieces or all the Presorted rate pieces plus a portion of the automation rate pieces for the 5-digit ZIP Code on the merged pallet. [M930.2.3]

#### 12.2.4 Pallet Preparation and Labeling

Mailers must prepare pallets of bundles in the manner and sequence listed below and under 8.0. Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using L001 and the 5% threshold. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under 8.6.

- a. *Merged 5-Digit Scheme*. Required. Permitted only when 5-digit bundles for at least one 5-digit ZIP Code in the scheme may be merged with carrier route bundles under the 5% threshold standard in 12.2.3. May contain carrier route bundles for any 5-digit ZIP Code in a single scheme listed in L001. May also contain automation rate 5-digit bundles and Presorted rate 5-digit bundles up to a maximum of 5% of the total number of pieces for each 5-digit ZIP Code in the scheme under 12.2.3. For 5-digit ZIP Codes not included in a scheme, begin preparing pallets under 12.2.4c (merged 5-digit pallet).
  1. Line 1: use L001, Column B.
  2. Line 2: "STD FLTS CR/5D SCHEME."
- b. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for all carrier routes in an L001 scheme when a merged 5-digit scheme pallet could not be prepared under 12.2.4a.
  1. Line 1: use L001, Column B.
  2. Line 2: "STD FLTS CR-RTS SCHEME."
- c. *Merged 5-Digit*. Required. Permitted only when 5-digit bundles may be merged with carrier route bundles under the 5% threshold standard in 12.2.3 for a 5-digit ZIP Code that is not part of an L001 scheme. May contain carrier route

## 705.12.2.4

rate bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles. The number of pieces in 5-digit bundles is limited to 5% of the total number of pieces placed on the pallet under [12.2.3](#).

1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: "STD FLTS CR/5D."
- d. *5-Digit Carrier Routes*. Required. May contain only carrier route rate bundles for the same 5-digit ZIP Code that is not part of a scheme and for which a merged 5-digit pallet could not be prepared under [12.2.4c](#).
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: "STD FLTS"; followed by "CARRIER ROUTES" or "CR-RTS."
- e. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme ([L007](#)) bundles (automation rate and cobundled automation and Presorted rate pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL "label to" 5-digit ZIP Code.
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: "STD FLTS 5D"; followed by "BARCODED" or "BC" if the pallet contains automation rate mail; followed by "NONBARCODED" or "NBC" if the pallet contains Presorted rate mail.
- f. *5-Digit Metro*. Optional. May contain carrier route, automation, and Presorted rate bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B.
1. Line 1: use [L006](#), Column C.
  2. Line 2: "STD FLTS" followed by "METRO" or "MET"; followed by "BARCODED" or "BC" if the pallet contains automation rate mail; followed by "NONBARCODED" or "NBC" if the pallet contains Presorted rate and/or carrier route mail.
- g. *3-Digit*. Optional. Option not available for 3-digit ZIP Code prefixes marked "N" in [L002](#). May contain carrier route rate, automation rate, and Presorted rate mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted rate pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the OEL "label to" 3-digit ZIP Code.
1. Line 1: use [L002](#), Column A.
  2. Line 2: "STD FLTS 3D"; followed by "BARCODED" or "BC" if the pallet contains automation rate mail; followed by "NONBARCODED" or "NBC" if the pallet contains Presorted rate mail and/or carrier route rate mail.
- h. *SCF*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.

1. Line 1: use [L002](#), Column C.
  2. Line 2: “STD FLTS SCF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- i. [\[02-03-05\]](#) *ASF*. Required, except that an ASF sort may not be required if using bundle reallocation under [8.12.3](#). May contain carrier route rate, automation rate, and/or Presorted rate bundles. Sort ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on ASF pallets must contain only pieces destinating within the ASF as shown in [Exhibit 6.1.6](#). See [346.3.0](#) for additional requirements for DBMC rate eligibility.
1. Line 1: use [L602](#), Column B.
  2. Line 2: “STD FLTS ASF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- j. [\[02-03-05\]](#) *BMC*. Required. May contain carrier route rate, automation rate, and/or Presorted rate bundles. Sort ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on BMC pallets must contain only pieces destinating within the BMC as shown in [Exhibit 6.1.6](#). See [346.3.0](#) for additional requirements for DBMC rate eligibility.
1. Line 1: Use [L601](#), Column B.
  2. Line 2: “STD FLTS BMC”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- [\[M930.2.4\]](#)

## 13.0 Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold

### 13.1 Periodicals

#### 13.1.1 Basic Standards

[\[02-03-05\]](#) Five-digit scheme bundles (using [L007](#)) must be prepared, and effective April 17, 2005, 3-digit scheme bundles (using [L008](#)) also must be prepared, according to standards in [13.1.4](#). Five-digit scheme bundles and 3-digit scheme bundles may not be copalletized on any merged pallets. Five-digit bundles from an automation rate mailing and 5-digit bundles from a presorted rate mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

## 705.13.1.1

- a. A carrier route mailing must be part of the same mailing job as the automation rate mailing and/or the Presorted rate mailing.
- b. Each portion of the mailing job must meet the eligibility criteria (including rate eligibility) under the relevant DMM standards: [12.0](#) for the Presorted rate mailing, [13.0](#) for the carrier route mailing, and [14.0](#) for the automation rate mailing.
- c. Pieces in the automation rate mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted rate mailing and the carrier route mailing must be nonletter-size.
- d. Mailers must use the Carrier Route Indicators field in the City State Product and the 5% limit criteria in [13.1.4](#) to prepare the mailing. The mailing must be entered no later than 90 days after the release date of the City State Product used.
- e. When firm bundles, carrier route bundles, and 5-digit bundles are placed together on the same merged 5-digit scheme or merged 5-digit pallet according to standards in [13.1.4](#) and [13.1.5](#), the following conditions also apply:
  1. For 5-digit ZIP Codes identified with an "A" or "C" indicator in the City State Product, merged 5-digit scheme and merged 5-digit pallets may be prepared with no limit to the number of addressed pieces placed in 5-digit bundles.
  2. For 5-digit ZIP Codes identified with a "B" or "D" indicator in the City State Product, the number of addressed pieces placed in 5-digit bundles (other than firm bundles) must not exceed 5% of the total number of addressed pieces placed on the merged 5-digit scheme or merged 5-digit pallet, for each corresponding 5-digit ZIP Code. For merged 5-digit scheme pallets, the 5% threshold is calculated separately for each individual 5-digit ZIP Code.
- f. All possible merged 5-digit scheme, 5-digit scheme carrier routes, and 5-digit scheme pallets must be prepared according to standards in [13.1.5](#).
- g. The bundles from each separate mailing must be sorted together on pallets (copalletized) under [13.1.5](#) using presort software that is PAVE-certified.
- h. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job. In addition, documentation produced by PAVE-certified software must be submitted with each mailing job. Documentation, under [708.1.0](#), must describe for each "logical" pallet sortation level and each physical pallet the number of addressed pieces qualifying for each carrier route rate, each Presorted rate, and each automation rate. Within the body of the documentation beneath the listing for the last physical pallet for each logical pallet presort destination, a separate 5% threshold summary also must be provided for each merged 5-digit scheme and each merged 5-digit logical pallet destination that contains mail for one or more 5-digit ZIP Codes with a "B" or "D" indicator in the City State Product. *Note:*

The separate 5% threshold summary must be for the mail on all of the physical pallets (i.e., the "logical" pallet) for that presort destination. This summary must describe for each 5-digit ZIP Code:

1. The total number of all addressed pieces.
  2. The total number of addressed pieces sorted in carrier route bundles and firm bundles (each firm bundle is claimed as one addressed piece).
  3. The total number of addressed pieces sorted in 5-digit bundles (other than firm bundles).
  4. Of the total number of all addressed pieces in [13.1.1h1](#), the percentage of addressed pieces sorted in 5-digit bundles (other than firm bundles).
- i. Portions of the mailing job that cannot be palletized must be prepared in sacks. [M940.1.1]

### **13.1.2 Bundle Preparation**

[02-03-05] Bundles must be prepared under the standards in [8.0](#). [M940.1.2]

### **13.1.3 Low-Volume Bundles**

[02-03-05] Carrier route and 5-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Pieces in such low-volume bundles must be claimed at the basic rate. [M940.1.3]

### **13.1.4 5% Threshold—5-Digit ZIP Codes Identified with a “B” or “D” Indicator**

[02-03-05] Firm bundles may be eligible for carrier route, 5-digit, or basic rates, as applicable. Firm bundles (claimed as one addressed piece), carrier route bundles, and 5-digit bundles may be placed together on the same merged 5-digit scheme or merged 5-digit logical pallet under [13.1.5](#) if all of the following conditions in items [13.1.4a](#) through [13.1.4e](#) below are met:

- a. For the purpose of calculating the 5% threshold, firm bundles (regardless of the rate claimed) are added together with the number of addressed pieces in carrier route bundles.
- b. The number of pieces prepared in 5-digit bundles (other than firm bundles) for any single 5-digit ZIP Code with a “B” or “D” indicator (in the City State Product) on a logical merged 5-digit scheme or merged 5-digit pallet must not exceed 5% of the total number of addressed pieces for the 5-digit ZIP Code on the logical pallet for the presort destination. Five-digit ZIP Codes with an “A” or “C” indicator (in the City State Product) are not subject to the 5% limit.
- c. The 5% threshold is calculated separately for each 5-digit ZIP Code with a “B” or “D” indicator. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code with a “B” or “D” indicator for the scheme on a merged 5-digit scheme pallet. (5-digit ZIP Codes with an “A” or “C” indicator are not subject to the 5% limit.) Since 5-digit scheme bundles may not be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.

- d. When firm bundles, other than those claimed at carrier route rates, are placed on a merged 5-digit scheme or a merged 5-digit pallet, addressed pieces in all corresponding 5-digit bundles up to 5% also must be merged. If the number of addressed pieces placed in 5-digit bundles (for an individual 5-digit ZIP Code) exceeds the 5% threshold, the mailer may place a portion of the addressed pieces (up to 5%) on a merged 5-digit scheme or a merged 5-digit pallet. Mailers are encouraged, but not required, to include such pieces on a merged pallet in this sequence: presorted rate bundles, followed by cobundles (if using 11.0), followed by automation rate bundles. Each 5-digit physical bundle placed on a merged 5-digit scheme or a merged 5-digit pallet must contain at least six addressed pieces, and any remaining 5-digit physical bundles placed on other pallets also must contain at least six addressed pieces, unless prepared under standards allowing lower volumes as specified in 13.1.3.
- e. For the purpose of determining the 5% threshold, addressed pieces in low-volume carrier route bundles count as carrier route sorted pieces, and addressed pieces in low-volume 5-digit bundles count as 5-digit sorted pieces, even though the basic rate is paid for all such pieces. [M940.1.4]

### 13.1.5 Pallet Preparation and Labeling

Mailers must prepare pallets of bundles in the manner and sequence listed below and under 8.0. Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination (8.0) using L001, the City State Product, and the 5% threshold (13.1.4), as applicable. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under 8.6. If, due to the physical size of the mailpieces, the automation rate pieces are considered flat-size under 301.3.0 and the carrier route sorted pieces and Presorted rate pieces are considered irregular parcels under 401.1.6, “FLTS” must be shown as the processing category on the pallet label. If a mailing contains no automation rate pieces and the carrier route mailing and the Presorted rate mailing are irregular parcels, use “IRREG” for the processing category on the contents line of the pallet label.

- a. *Merged 5-Digit Scheme*. Required. For schemes that contain at least one 5-digit ZIP Code that has an “A” or “C” indicator in the City State Product, the pallet contains 1) carrier route bundles for all 5-digit ZIP Codes in the scheme, 2) 5-digit automation rate and 5-digit Presorted rate bundles for those 5-digit ZIP Codes in the scheme with an “A” or “C” indicator in the City State Product, and 3) 5-digit automation rate and/or 5-digit Presorted rate bundles for those 5-digit ZIP Codes in the scheme with a “B” or “D” indicator when the number of pieces in the 5-digit bundle(s) does not exceed 5% of the total number of pieces for that 5-digit ZIP Code under 13.1.4. For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there is at least one 5-digit ZIP Code for which 5-digit bundles may be placed on the pallet under the 5% limit in 13.1.4, place all carrier route bundles plus the 5-digit bundles within the 5% limit on the pallet. For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there are no 5-digit ZIP Codes for which 5-digit

bundles may be placed on the pallet under the 5% limit, do not prepare a merged 5-digit scheme pallet (sort bundles to pallets under [13.1.5b](#) through [13.1.5j](#)).

1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CR/5D SCHEME.”
- b. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for all carrier routes in an [L001](#) scheme for which all 5-digit ZIP Codes in the scheme have a “B” or “D” indicator and for which no 5-digit bundles could be placed on a merged 5-digit scheme pallet with the carrier route bundles because the 5-digit bundles exceeded the 5% threshold.
1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CR-RTS SCHEME.”
- c. *5-Digit Scheme*. Not permitted for flats that meet the dimension, weight, and flexibility criteria of the AFSM 100 in [301.3.3](#), including copalletized or combined AFSM 100 flats and other flats, and not permitted for sacks or trays. Required for all other flats and irregular parcels. May contain only 5-digit bundles of automation rate and Presorted rate mail for the same 5-digit scheme under [L001](#) for which one or more 5-digit ZIP Codes in the scheme had a “B” or “D” indicator in the City State Product, and the 5-digit bundles could not be placed on a merged 5-digit scheme pallet (the pieces exceeded the 5% threshold).
1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail; and followed by “SCHEME” or “SCH.”
- d. *Merged 5-Digit*. Required. May contain carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles for those 5-digit ZIP Codes that are not part of a scheme. For 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product, there is no limit on the number of pieces in 5-digit bundles that may be placed on the pallet and a merged 5-digit pallet is prepared even if there are no 5-digit bundles for that ZIP Code. For those 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product, the number of pieces in 5-digit bundles is limited to 5% of the total number of pieces for the 5-digit pallet destination under [13.1.4](#). However, if no 5-digit bundles for ZIP Codes with “B” or “D” indicators can be placed on this level pallet under the 5% limit, do not prepare this a merged 5-digit pallet (sort bundles under [13.1.5e](#) through [13.1.5j](#)).
1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).

## 705.13.1.5

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or IRREG” as applicable; and followed by “CR/5D.”
- e. *5-Digit Carrier Routes*. Required. May contain only carrier route rate bundles for the same 5-digit ZIP Code that is not part of a scheme and that could not be placed on a merged 5-digit pallet.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; and followed by “CARRIER ROUTES” or “CR-RTS.”
- f. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme (L007) bundles (automation rate and cobundled automation and Presorted rate pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see 8.6.4 for military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail.
- g. *5-Digit Metro*. Optional. May contain carrier route, automation, and Presorted rate bundles for the 5-digit ZIP Codes listed in L006, Column A, and for the 3-digit ZIP Code areas listed in L006, Column B.
  1. Line 1: use L006, Column C.
  2. Line 2: “PER” or “NEWS”; followed by “FLTS” or “IRREG”; followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate and/or carrier route mail.
- h. *3-Digit*. Optional. Option not available for 3-digit ZIP Code prefixes marked “N” in L002. May contain carrier route rate, automation rate, and Presorted rate mail, including 3-digit scheme (L008) bundles (automation and cobundled automation and Presorted rate pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the OEL “label to” 3-digit ZIP Code.
  1. Line 1: use L002, Column A.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or IRREG” as applicable; followed by “3D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
- i. *SCF*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
  1. Line 1: use L002, Column C.

2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.
- j. *ADC*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
  1. Line 1: use [L004](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “ADC”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route mail.  
[M940.1.5]

## 13.2 Standard Mail

### 13.2.1 Basic Standards

Five-digit scheme bundles (under [L007](#)) must be prepared, and effective April 18, 2005, 3-digit scheme bundles (under [L008](#)) must also be prepared. Five-digit scheme bundles may not be copalletized on any merged pallets. Five-digit bundles from an automation rate mailing and 5-digit bundles from a Presorted rate mailing (including pieces cobundled under [11.0](#)) may be placed on the same pallet as carrier route bundles under the following conditions:

- a. A carrier route mailing must be part of the mailing job.
- b. The pieces in the carrier route rate mailing, the automation rate mailing, and the Presorted rate mailing must be part of the same mailing job, and all three mailings must be reported on the same postage statement.
- c. Pieces in the automation rate mailing must meet the criteria for a flat under [301.3.0](#). Pieces in the Presorted rate mailing and the carrier route mailing must meet the criteria for a flat under [301.1.1](#).
- d. Mailers must use the Carrier Route Indicators field in the City State Product and the 5% limit criteria in [13.2.3](#) to prepare the mailing. The mailing must be entered no later than 90 days after the release date of the City State Product used.
- e. Automation rate 5-digit bundles, Presorted rate 5-digit bundles, and cobundled 5-digit bundles may be copalletized with carrier route bundles and firm bundles on merged 5-digit or merged 5-digit scheme pallets as follows:
  1. For 5-digit ZIP Codes with an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product, carrier route and 5-digit bundles may be merged with no limit on the number of pieces in 5-digit bundles placed on the pallet. 5-digit scheme bundles may not be used.
  2. For 5-digit ZIP Codes with a “B” or “D” indicator in the Carrier Route Indicators field in the City State Product, the pieces in the 5-digit bundles must not exceed 5% of the total number of pieces for each individual 5-digit ZIP Code on the pallet as described in [13.2.3](#). Since 5-digit scheme

## 705.13.2.1

bundles cannot be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.

- f. If sortation under this section is performed, then merged 5-digit scheme pallets must be prepared whenever there is enough volume of carrier route and 5-digit bundles under 8.0 to prepare such pallets using the criteria in 13.2.1e and the sortation criteria in 13.2.4.
- g. The carrier route mailing must meet the eligibility criteria in 343.6.0, the automation rate mailing must meet the eligibility criteria in 343.7.0, and the Presorted rate mailing must meet the eligibility criteria in 343.5.0.
- h. The rates are based on the level of bundle that the pieces are contained in under 343.5.0 and 343.7.0.
- i. The pieces in each separate mailing must bear the applicable markings required under 345.5.0, 345.6.0, or 345.7.0 and under 302, *Elements on the Face of a Mailpiece*.
- j. The bundles from each separate mailing must be sorted together on pallets (copalletized) using presort software that is PAVE-certified.
- k. A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing job prepared under these procedures.
- l. In addition to the applicable postage statement, documentation produced by PAVE-certified software must be submitted with each copalletized mailing job that describes for each pallet sortation level and pallet the number of pieces qualifying for each applicable carrier route rate, each applicable automation rate, and each applicable Presorted rate. A separate 5% threshold summary also must be provided under 708.1.0 for each “logical” merged 5-digit scheme or “logical” merged 5-digit pallet presort destination that contains mail for one or more 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product. This 5% threshold summary must show for each 5-digit ZIP Code with a “B” or “D” indicator on the logical merged 5-digit scheme or logical merged 5-digit pallet: the total number of pieces on the pallet for the 5-digit ZIP Code; the total number of pieces sorted in carrier route bundles for the 5-digit ZIP Code; the total number of pieces sorted in 5-digit bundles for the 5-digit ZIP Code, and; of the total number of pieces for the 5-digit ZIP Code, the percentage of pieces sorted in 5-digit bundles for that 5-digit ZIP Code. This additional 5% threshold summary must appear within the body of the documentation beneath the pallet rate listing for the last physical pallet for the logical pallet presort destination.  
*Note:* If there are two or more physical pallets for the same presort destination, for example, the same merged 5-digit pallet destination, these two or more physical pallets would be considered as one “logical pallet.” The separate pallet summary must be for the mail on all of the physical pallets (the “logical pallet”) for that presort destination.
- m. Portions of the mailing job that cannot be palletized must be prepared in sacks.  
[M940.2.1]

### 13.2.2 Bundle Preparation

Bundles placed on pallets must be prepared under the standards in 8.0. [M940.2.2]

### 13.2.3 5% Threshold Standard

Five-digit bundles, carrier route bundles, and firm bundles may be placed on the same merged 5-digit scheme or merged 5-digit pallet under 13.2.4 if all of the following conditions are met:

- a. The number of pieces prepared in 5-digit bundles for any single 5-digit ZIP Code with a “B” or “D” indicator on a logical merged 5-digit or merged 5-digit scheme pallet does not exceed 5% of the total number of pieces for the 5-digit ZIP Code on the logical pallet for the presort destination. That is, the total number of pieces for a 5-digit ZIP Code in 5-digit and carrier route bundles must not be greater than the number of pieces in carrier route bundles divided by 0.95. 5-digit ZIP Codes with an “A” or “C” indicator are not subject to the 5% limit.
- b. The 5% threshold is calculated separately for each 5-digit ZIP Code with a “B” or “D” indicator. For example, if a scheme contains four different 5-digit ZIP Codes, a separate 5% threshold applies to each 5-digit ZIP Code with a “B” or “D” indicator for the scheme on a merged 5-digit scheme pallet. (Five-digit ZIP Codes with an “A” or “C” indicator are not subject to the 5% limit.) Since 5-digit scheme bundles cannot be placed on merged pallets, pieces in 5-digit scheme bundles do not count as 5-digit sorted pieces for purposes of determining the 5% limit.
- c. Except when bundles are prepared under the cobundling option in 11.0, all mail in a logical 5-digit bundle for a 5-digit ZIP Code with a “B” or “D” indicator must be able to be placed on the logical pallet under the 5% rule. A logical 5-digit bundle is all pieces for a mailing (rate level) prepared in a 5-digit bundle or bundles for the same 5-digit destination. For each 5-digit ZIP Code, it is possible to have a logical 5-digit bundle of automation rate mail and a logical 5-digit bundle of Presorted rate mail. If the total number of pieces in a logical 5-digit bundle exceeds the 5% limit, none of the pieces for that 5-digit bundle level may be placed on a merged 5-digit or merged 5-digit scheme pallet. For some ZIP Codes, the total number of pieces prepared in logical 5-digit bundles (both an automation rate logical 5-digit bundle and a Presorted rate logical 5-digit bundle) may exceed 5% of the total mail for that ZIP Code, but the number of pieces for an individual automation rate logical 5-digit bundle for that ZIP Code does not exceed the 5% limit nor does an individual Presorted rate logical 5-digit bundle for that ZIP Code exceed the 5% limit. In such instances, mailers may choose to place all of the pieces in a logical 5-digit bundle for a single rate category on the logical merged 5-digit or merged 5-digit scheme pallet so that the 5% threshold is not exceeded.
- d. Except for bundles prepared under the cobundling option in 11.0, if the total number of pieces in both the logical 5-digit automation rate bundle and the logical 5-digit Presorted rate bundle each separately exceed 5% of the total number of pieces for the 5-digit ZIP Code with a “B” or “D” indicator, none of the pieces in 5-digit bundles may be merged with carrier route bundles on a merged 5-digit or merged 5-digit scheme pallet.

## 705.13.2.4

- e. For mailing jobs prepared using the cobundling option in 11.0, if the total number of pieces prepared in a logical 5-digit bundle (containing automation rate and Presorted rate pieces) exceeds the 5% limit for a 5-digit ZIP Code in 13.2.3a, a mailer may, for each 5-digit ZIP Code, choose to place a portion of the pieces prepared in the logical 5-digit bundle on a merged 5-digit or 5-digit scheme pallet using one of the options below. Regardless of the option selected, a minimum of 10 pieces or 15 pieces as applicable must be prepared in 5-digit bundle(s) placed on the merged pallet and a minimum of 10 or 15 remaining pieces as applicable prepared in 5-digit bundle(s) not placed on the merged pallet, with the total number of pieces not exceeding the 5% limit. The options are:
1. Place either all automation rate pieces or all Presorted rate pieces for the 5-digit ZIP Code on the merged pallet.
  2. Place a portion of either the automation rate pieces or the Presorted rate pieces for the 5-digit ZIP Code on the merged pallet.
  3. Place either all the automation rate pieces plus a portion of the Presorted rate pieces or all the Presorted rate pieces plus a portion of the automation rate pieces for the 5-digit ZIP Code on the merged pallet.

[M940.2.3]

### 13.2.4 Pallet Preparation and Labeling

Mailers must prepare pallets of bundles in the manner and sequence listed below and under 8.0. Mailers must prepare all merged 5-digit scheme, 5-digit scheme carrier routes, 5-digit scheme, and merged 5-digit pallets that are possible in the mailing based on the volume of mail to the destination using L001, the City State Product, and the 5% threshold. Mailers must label pallets according to the Line 1 and Line 2 information listed below and under 8.6.

- a. *Merged 5-Digit Scheme*. Required. For schemes that contain at least one 5-digit ZIP Code that has an “A” or “C” indicator in the City State Product, the pallet contains: carrier route bundles for all 5-digit ZIP Codes in the scheme; 5-digit automation rate and 5-digit Presorted rate bundles for those 5-digit ZIP Codes in the scheme with an “A” or “C” indicator in the City State Product, and; 5-digit automation rate and/or 5-digit Presorted rate bundles for those 5-digit ZIP Codes in the scheme with a “B” or “D” indicator when the number of pieces in the 5-digit bundle(s) does not exceed 5% of the total number of pieces for that 5-digit ZIP Code under 13.2.3. For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there is at least one 5-digit ZIP Code for which 5-digit bundles may be placed on the pallet under the 5% limit in 13.2.3, place all carrier route bundles plus the 5-digit bundles within the 5% limit on the pallet. For schemes in which all 5-digit ZIP Codes have “B” or “D” indicators and for which there are no 5-digit ZIP Codes for which 5-digit bundles may be placed on the pallet under the 5% limit, do not prepare a merged 5-digit scheme pallet (sort bundles to pallets under 13.2.4b through 13.2.4j).
1. Line 1: use L001, Column B.
  2. Line 2: “STD FLTS CR/5D SCHEME.”

- b. *5-Digit Scheme Carrier Routes*. Required. May contain only carrier route bundles for all carrier routes in an [L001](#) scheme for which all 5-digit ZIP Codes in the scheme have a “B” or “D” indicator and for which no 5-digit bundles could be placed on a merged 5-digit scheme pallet with the carrier route bundles because the 5-digit bundles exceeded the 5% threshold.
  1. Line 1: use [L001](#), Column B.
  2. Line 2: “STD FLTS CR-RTS SCHEME.”
- c. *Merged 5-Digit*. Required. May contain carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles for those 5-digit ZIP Codes that are not part of a scheme. For 5-digit ZIP Codes with an “A” or “C” indicator in the City State Product, there is no limit on the number of pieces in 5-digit bundles that may be placed on the pallet, and a merged 5-digit pallet is prepared even if there are no 5-digit bundles for that ZIP Code. For those 5-digit ZIP Codes with a “B” or “D” indicator in the City State Product, the number of pieces in 5-digit bundles is limited to 5% of the total number of pieces for the 5-digit pallet destination under [13.2.3](#). However, if no 5-digit bundles for ZIP Codes with “B” or “D” indicators can be placed on this level pallet under the 5% limit, do not prepare a merged 5-digit pallet (sort bundles to pallets under [13.2.4d](#) through [13.2.4j](#)).
  1. Line 1: use city, state abbreviation, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: “STD FLTS CR/5D.”
- d. *5-Digit Carrier Routes*. Required. May contain only carrier route rate bundles for the same 5-digit ZIP Code that is not part of a scheme and that could not be placed on a merged 5-digit pallet.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: “STD FLTS,” followed by “CARRIER ROUTES” or “CR-RTS.”
- e. *5-Digit*. Required. May contain only automation rate 5-digit bundles and Presorted rate 5-digit bundles for the same 5-digit ZIP Code that could not be placed on a merged 5-digit pallet, or 5-digit scheme ([L007](#)) bundles (automation rate and cobundled automation and Presorted rate pieces only). Five-digit scheme bundles are assigned to 5-digit pallets according to the OEL “label to” 5-digit ZIP Code.
  1. Line 1: use city, state, and 5-digit ZIP Code destination (see [8.6.4](#) for military mail).
  2. Line 2: “STD FLTS 5D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail.
- f. *5-Digit Metro*. Optional. May contain carrier route, automation, and Presorted rate bundles for the 5-digit ZIP Codes listed in [L006](#), Column A, and for the 3-digit ZIP Code areas listed in [L006](#), Column B.
  1. Line 1: use [L006](#), Column C.

## 705.13.2.4

2. Line 2: “STD FLTS” followed by “METRO” or “MET”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate and/or carrier route mail.
- g. *3-Digit*. Optional. Option not available for 3-digit ZIP Code prefixes marked “N” in [L002](#). May contain carrier route rate, automation rate, and Presorted rate mail, including 3-digit scheme ([L008](#)) bundles (automation and cobundled automation and Presorted rate pieces only). Three-digit scheme bundles are assigned to 3-digit pallets according to the OEL “label to” 3-digit ZIP Code.
  1. Line 1: use [L002](#), Column A.
  2. Line 2: “STD FLTS 3D”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- h. *SCF*. Required. May contain carrier route rate, automation rate, and Presorted rate bundles.
  1. Line 1: use [L002](#), Column C.
  2. Line 2: “STD FLTS SCF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- i. [\[02-03-05\]](#) *ASF*. Required, except that an ASF sort may not be required if using bundle reallocation under [8.12.3](#). May contain carrier route rate, automation rate, and/or Presorted rate bundles. Sort ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to ASF pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on ASF pallets must contain only pieces destinating within the ASF as shown in [Exhibit 6.1.6](#). See [346.3.0](#) for additional requirements for DBMC rate eligibility.
  1. Line 1: use [L602](#), Column B.
  2. Line 2: “STD FLTS ASF”; followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail.
- j. [\[02-03-05\]](#) *BMC*. Required. May contain carrier route rate, automation rate, and/or Presorted rate bundles. Sort ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L004](#). At the mailer’s option, sort appropriate mixed ADC bundles to BMC pallets based on the “label to” ZIP Code for the ADC destination of the bundle in [L010](#). All optional mixed ADC bundles on BMC pallets must contain only pieces destinating within the BMC as shown in [Exhibit 6.1.6](#). See [346.3.0](#) for additional requirements for DBMC rate eligibility.
  1. Line 1: Use [L601](#), Column B.

2. Line 2: “STD FLTS BMC,” followed by “BARCODED” or “BC” if the pallet contains automation rate mail; and followed by “NONBARCODED” or “NBC” if the pallet contains Presorted rate mail and/or carrier route rate mail. [M940.2.4]

## 14.0 Preparation for Plant Load Mailings

### 14.1 Basic Information

#### 14.1.1 Purpose

In a plant load operation, the USPS receives mail at a mailer’s plant and transports it to bypass handling otherwise required at one or more postal facilities. Plant loads are authorized if they benefit the USPS. The USPS selects the appropriate mode of transportation and determines responsibility as shown below.

| TYPE                                 | WHO ARRANGES,<br>PAYS TRANSPORT | RESPONSIBILITY | POSTAGE<br>PAID FROM      | ADDITIONAL<br>FORMS <sup>1</sup> |
|--------------------------------------|---------------------------------|----------------|---------------------------|----------------------------------|
| Collection <sup>2</sup>              | USPS                            | USPS           | Affixed/Mailer<br>Plant   | None                             |
| Pickup <sup>3</sup>                  | USPS with fee                   | USPS           | Affixed/Mailer<br>Plant   | None                             |
| Drop Shipment <sup>4</sup>           | Mailer/USPS                     | USPS           | Acceptance<br>Post Office | None                             |
| Drop Shipment<br>Metered Mail        | Mailer                          | Mailer         | Post Office<br>of License | None/<br>Endorsement             |
| Business Mail<br>Entry Unit (BMEU)   | Mailer                          | Mailer         | BMEU Post<br>Office       | None                             |
| Destination Entry<br>(drop shipment) | Mailer                          | Mailer         | Entry Office              | Form 8125                        |
| Periodicals<br>Additional Entry      | Mailer                          | Mailer         | Entry Office              | Form 3510                        |
| Periodicals<br>Exceptional Dispatch  | Mailer                          | Mailer         | Entry Office              | Statements                       |
| Periodicals Airport<br>Mail Facility | Mailer                          | Mailer         | Entry Office              | Form 3510                        |
| Plant Load                           | USPS                            | USPS           | Mailer Plant              | None                             |
| Expedited Plant<br>Load Shipment     | Mailer                          | Mailer         | Mailer Plant              | Form 8017                        |

1. Postage statements and other appropriate mailing documentation forms are required.

2. Collection applies to mail that is part of an approved collection service and may include Presorted First-Class Mail and all automation rate mail. It generally does not apply to mailings at bulk rates.

3. Express Mail, Priority Mail, and scheduled Parcel Post only.

4. Express Mail or Priority Mail service to expedite other class. Only at designated postal facilities; mailers must submit/present shipment to acceptance unit designated by postmaster (mailer transportation). USPS transports by Express Mail or Priority Mail from origin post office to destination post office of the shipment. If authorized, the shipment is accepted at mailer plant acceptance unit and transported from mailer plant with other mail on USPS transportation.

[D020.1.1]

705.14.1.2

**14.1.2 Service Objectives**

The service objectives for the class of mail transported apply to the plant-loaded mail. Plant-loaded mail may have deferred service objectives if provided in the plant load agreement. [D020.1.2]

**14.1.3 Service Not Provided**

The USPS does not hold, store, or delay the dispatch of plant-loaded mail released to the USPS, except under the plant load agreement with the mailer. The USPS does not relocate trailers on the mailer's premises. [D020.1.3]

**14.2 Application for Plant Load Privileges****14.2.1 Application**

To have mail plant-loaded, the mailer must complete Form 3815 and submit it to the postmaster of the post office serving the mailer's plant. [D020.2.1]

**14.2.2 Approval**

Generally, a plant load application is approved if transportation is available and cost savings to the USPS are shown. If the application is approved, the mailer must enter into a plant load agreement with the USPS. [D020.2.2]

**14.2.3 Denial and Appeal**

If the application is denied, the mailer may appeal through the local postmaster within 10 calendar days of the mailer's receipt of the denial notice to the vice president of area operations for the area in which the mailer's plant is located, giving the reasons why the application should be approved. [D020.2.3]

**14.3 Plant Load Operations****14.3.1 Mixed Mail Classes**

A mailer may combine Periodicals, Standard Mail, and Package Services in a single vehicle if the mailings are physically separated, a postage statement is submitted for each mailing, and the service standards are met for each class of mail combined in the vehicle or trailer. [D020.3.1]

**14.3.2 Compliance**

The mailer must meet all relevant mailing standards and the terms of the plant load agreement. Destination loads must be prepared under 14.5 through 14.7 and as specified by the postmaster administering the plant load. [D020.3.2]

**14.3.3 Reimbursement by Mailer**

Under the plant load privileges and the terms of the plant load agreement, the mailer must reimburse the USPS for services it furnished while providing plant load service, including:

- a. Detention charges when trailers furnished by the USPS are held up for some action or inaction of the mailer.
- b. Costs for bobtailing, deadheading, or waiting/holding, if such charges are incurred by the USPS to provide plant load service for some action or inaction of the mailer. [D020.3.3]

## 14.4 Expedited Plant Load Shipment

### 14.4.1 Definition

Under an expedited plant load shipment authorization, the USPS verifies and receives postage payment for mailable matter at the mailer's plant, after which the mailer transports the shipment (at the mailer's expense) to a destination postal facility. [D020.4.1]

### 14.4.2 Authorization

Only an authorized plant load mailer may prepare and transport expedited plant load shipments. Authorization is by written request to the postal official who authorized the plant load. The request must state, for each destination to which mail is to be transported, the material to be deposited as an expedited plant load shipment (e.g., the class, characteristics, and quantity), the frequency of mailing, and whether the request is for one or for a series of mailings. The mailer must meet all conditions in the authorization, if approved. [D020.4.2]

### 14.4.3 Liability

The mailer assumes all liability and responsibility for any loss or damage to the shipment before it is deposited in and accepted at a postal facility, whether or not a third party is used to transport the shipment. The USPS is not liable or responsible for any loss of or damage to an expedited plant load shipment before it is deposited in and accepted at a postal facility. [D020.4.3]

### 14.4.4 Postage Refund

The USPS does not refund postage for any failure to provide service caused in whole or in part by any event that occurs before the shipment is deposited in and accepted at a postal facility, except under the applicable standards for refunds. [D020.4.4]

## 14.5 Mailer Responsibilities

### 14.5.1 General

The plant load mailer must meet the terms of the plant load agreement and the standards that apply to the class of mail prepared, rates claimed, and method of paying postage used. [M074.1.1]

### 14.5.2 Verification at USPS Facility

If mail verification does not occur at the mailer's plant, the mailer must:

- a. Keep a plant load control log with a copy of each postage statement, numbered sequentially; the number of each vehicle used to transport plant-loaded mail; and the name of the postal facility where verification is to occur.
- b. Not shrinkwrap or otherwise secure the mail to inhibit verification.
- c. Correct preparation errors found in the mail when verified or pay additional postage at the rate for which it qualifies. [M074.1.2]

### 14.5.3 Postage

Unless otherwise permitted by standard, the mailer must pay all applicable postage and fees to the origin post office before a plant-loaded mailing is dispatched. [M074.1.3]

705.14.6

**14.6 IntraDISTRICT Plant-Loaded Shipments**

Intradistrict plant-loaded shipments must fill 50% or more of a vehicle by weight or cube (a minimum of 23,000 pounds or 1,600 cubic feet). [M074.2.0]

**14.7 InterDISTRICT Plant-Loaded Shipments****14.7.1 One Mailing**

The mailer must prepare interdistrict plant-loaded vehicles containing one mailing under 14.7.2 through 14.7.4 as appropriate to the class of mail. [M074.3.1]

**14.7.2 First-Class Mail**

For plant-loaded shipments of First-Class Mail:

- a. If there is enough mail for the same SCF service area to fill 60% or more of a vehicle by weight or by cube (a minimum of 28,000 pounds or 2,000 cubic feet), the mailer must prepare a direct vehicle for that SCF.
- b. After making up all possible SCF vehicles, if there is enough mail for the same ADC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that ADC. [M074.3.2]

**14.7.3 Periodicals**

For plant-loaded shipments of Periodicals:

- a. If there is enough mail for the same SCF service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that SCF.
- b. After making up all possible SCF vehicles, if there is enough mail for the same ADC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that ADC.
- c. After making up all possible SCF and ADC vehicles, if there is enough mail for the same transfer hub service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that transfer hub. [M074.3.3]

**14.7.4 Standard Mail and Package Services**

For plant-loaded shipments of Standard Mail and Package Services:

- a. If there is enough mail for the same SCF service area to fill 60% or more of a vehicle by weight or by cube (a minimum of 28,000 pounds or 2,000 cubic feet), the mailer must prepare a direct vehicle for that SCF.
- b. After making up all possible SCF vehicles, if there is enough mail for the same ASF or BMC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that BMC or ASF. [M074.3.4]

**14.7.5 Two or More Mailings**

The mailer must prepare interdistrict plant-loaded vehicles containing two or more mailings under 14.7.6 and 14.7.7 as appropriate to the class of mail. [M074.3.5]

**14.7.6 Insufficient Volume**

Two or more mailings that independently have insufficient volume to require direct destination vehicles to be prepared may be combined to make up an origin vehicle without meeting the standards in 14.7.7. [M074.3.6]

**14.7.7 Sufficient Volume**

Two or more mailings, which independently have sufficient volume to require destination vehicles to be prepared, must meet these standards when combined:

- a. For First-Class Mail, if there is enough mail for the same ADC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for the ADC.
- b. For Periodicals, if there is enough mail for the service area of the same transfer hub to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that transfer hub.
- c. For Standard Mail and Package Services, if there is enough mail for the same ASF or BMC service area to fill 60% or more of a vehicle by weight or by cube, the mailer must prepare a direct vehicle for that ASF or BMC. [M074.3.7]

**14.7.8 Destination**

The preparation standards for plant-loaded vehicles are determined by the destination of the mailings accepted by the USPS at the mailer's plant. [M074.3.8]

**14.7.9 Two Options**

If a plant-loaded mailing does not meet the preparation standards for plant-loaded vehicles under 14.7.1 through 14.7.8, the mailer has two options:

- a. Rework the mailing so that it meets the applicable standard. If the mailing is verified and accepted as mail by the USPS at the mailer's plant and then it is determined that the vehicle preparation standards are not met, the mailer must rework the mailing.
- b. Transport the mailing at the mailer's expense to a postal facility within the origin service area designated by the origin postmaster and with the capability to process that class of mail. If this option is chosen, all applicable postage statements must be provided with the mailings. [M074.3.9]

## 15.0 Plant-Verified Drop Shipment (PVDS)

### 15.1 Description

**15.1.1 Purpose**

Plant-verified drop shipment (PVDS) enables origin verification and postage payment for shipments transported by a mailer (or third party) at the mailer's expense, on the mailer's own or contracted vehicle, to destination USPS facilities for acceptance as mail. The mailings may be prepared for deposit at a destination entry rate, or they may be claimed at the applicable rates from the destination entry facility. [P950.1.1]

**15.1.2 Function**

Under PVDS:

- a. Mailings are verified at origin by USPS employees assigned to a detached mail unit (DMU) at a mailer's plant or at the business mail entry unit (BMEU) at the origin post office serving the mailer's plant. The shipments are then released for transportation to destination USPS facilities.

## 705.15.1.3

- b. For Periodicals, postage is paid at a valid original entry or additional entry post office serving the mailer's plant, unless an alternative postage payment method is authorized.
- c. For Standard Mail and Package Services, postage and fees are paid under a valid permit at the post office serving the mailer's plant, or as designated by the district manager.
- d. The shipment is deposited at the destination USPS facility, by the mailer or the mailer's agent, where it is verified and accepted as mail by USPS employees and released for processing. [P950.1.2]

**15.1.3 Other Mailings**

The following mailings must be verified, accepted, and paid for at the destination USPS facility:

- a. Periodicals mailings not verified at origin under PVDS or under the Centralized Postage Payment System (see [707.16.0](#) and [707.17.0](#)). The destination USPS facility must be a valid original entry or additional entry post office if mailings are submitted there for postal verification.
- b. Standard Mail and Package Services mailings not verified and paid for at origin under PVDS. Mailers must have a valid permit at the destination USPS facility for postage payment. [P950.1.3]

**15.1.4 Dates**

The postage statement may be submitted before or at the time a shipment is presented to the origin post office DMU or BMEU. The date shown by the mailer and the post office round stamp date on the postage statement and Form 8125 represents the date the origin post office DMU or BMEU verified the shipment and cleared it for dispatch by the mailer to the destination USPS facility. It does not necessarily represent the date the USPS accepts the PVDS at the USPS destination facility as mail. [P950.1.4]

**15.1.5 Postage Refund**

The USPS does not refund postage for any failure to provide service caused by any event that occurs before the shipment is deposited and accepted into the mailstream and becomes mail at a destination postal facility, except under [604.10.0](#). [P950.1.5]

**15.2 Program Participation****15.2.1 Mailer Responsibility**

A mailer participating in PVDS must comply with [15.0](#). If the mailer does not meet these requirements, the mailer may be prohibited from participating in PVDS by the local postmaster. Any mailer denied a request for PVDS may file an appeal under [607.2.0](#). [P950.2.1]

**15.2.2 Verification at Mailer's Plant**

Before PVDS verification can be performed at the mailer's plant, the mailer must have either a USPS plant load authorization for that plant or a postage payment agreement with the USPS that establishes a detached mail unit (DMU) at that plant. The DMU must be separate from the mailer's activities, in an enclosed, secure, and

safe work area with a telephone. The work area must be approved by the USPS. The mailer may submit a letter to the postmaster serving the plant and request PVDS verification at the plant. The postmaster may agree to the mailer's request to verify PVDS shipments at the plant on an as-needed basis, if an approved DMU is established and staffing can be accommodated. [P950.2.2]

### 15.2.3 Verification at Origin BMEU

PVDS verification can be performed at the origin business mail entry unit (BMEU) under these conditions:

- a. There is no detached mail unit (DMU) at the mailer's plant.
- b. The mailer is in the service area of the post office where the PVDS is to be verified and where postage is to be paid, unless another postal facility is designated by the district manager.
- c. Each vehicle contains only one mailer's shipment(s), each physically separated.
- d. A completed postage statement and Form 8125 accompanies each PVDS (or segment, if the PVDS is contained in more than one vehicle).
- e. If an alternate method of paying postage with permit imprint is used, in addition to 15.2.3d, (additional) required documentation must accompany each PVDS (or segment, if the PVDS is contained in more than one vehicle).
- f. The PVDS can be physically verified at the origin BMEU. Shipments to be verified may not be wrapped or otherwise prepared if a presort and postage verification cannot be performed without destroying the physical integrity of the shipment.
- g. The BMEU has enough space and staff to handle verification, and scales to calculate per piece and gross weights are available. If the post office serving the mailer's plant lacks resources, another postal facility may be designated by the district manager.
- h. The mailer must transport all shipments to the post office, unload them for verification. When cleared for dispatch, reload the shipments back onto the mailer's vehicle for transportation to the destination USPS facility. [P950.2.3]

### 15.2.4 Periodicals

Periodicals postage must be paid at the post office verifying the copies or as designated by the district. Advertising postage is zoned from the destination USPS facility where deposited and accepted as mail (or from the facility where the Express Mail or Priority Mail drop shipment destinates). The publisher must ensure that sufficient funds are on deposit to pay for all shipments before their release. (A publisher authorized under an alternative postage payment system must pay postage under corresponding standards.) [P950.2.4]

### 15.2.5 Standard Mail and Package Services

The mailer must pay any applicable permit fees, mailing fees, and postage for Standard Mail and Package Services PVDS at either the post office serving the mailer's plant or the post office that does BMEU verification as designated by the district. If permit imprints are used to pay postage, the mailer must ensure that sufficient funds are on deposit to pay for all shipments before their release. For

## 705.15.2.6

Nonprofit Standard Mail rates, a valid authorization must be on file at the post office where postage is paid. No permit, fees, or authorizations are required at the destination USPS facility where PVDS mailings are deposited. [P950.2.5]

**15.2.6 Postage Statement—Periodicals**

The mailer must submit a Form 3541 for each edition of each issue of each publication prepared for deposit at each destination USPS facility when the corresponding copies are presented to the DMU or the post office BMEU for verification. When required by the USPS, the mailer must submit consolidated postage statements and a postage statement register. [P950.2.6]

**15.2.7 Postage Statement—Standard Mail**

At the time mail is presented for verification, the mailer must submit an appropriate Form 3602 representing all the pieces from the mailing job and Form 3602-C (or postage statement register) for all PVDS verified at the mailer's DMU or the post office BMEU. The mailer must enter the required information on Form 3602-C for each PVDS to be deposited at each destination USPS facility, in lieu of providing a separate Form 3602 for each PVDS. [P950.2.7]

**15.2.8 Postage Statement—Package Services**

At the time mail is presented for verification, the mailer must submit an appropriate postage statement for each PVDS mailing destined for each destination USPS facility. When required by the USPS, the mailer must submit consolidated postage statements and a postage statement register. [P950.2.8]

**15.2.9 Form 8125 and Form 8125-C**

Form 8125 is used to report a single PVDS that the mailer will transport from origin to a destination USPS facility. Computer-generated Form 8125-C (format available at [www.usps.com](http://www.usps.com)) provides for reporting multiple PVDS mailings that are prepared by an individual mailer and that are cleared at origin on the same day for entry at a single destination USPS facility on the same vehicle (see [15.2.11](#)). The mailer must submit a completed Form 8125 (signed and dated by the DMU or BMEU) for each PVDS to the destination USPS facility. The form must be submitted in duplicate, or in triplicate if the mailer desires a signed and dated copy returned to its representative when depositing the mail at the destination USPS facility. Form 8125 is not required for PVDS sent via Express Mail or Priority Mail drop shipment. [P950.2.9]

**15.2.10 Facsimile Forms 8125 and 8125-C**

Facsimile Forms 8125 may be used in lieu of the USPS form. Formats must be approved in advance by the district manager of Business Mail Entry or designee. Formats must include all required information, including the correct title (preceded by the word "facsimile") and edition date, in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information relating to the PVDS, and other extraneous information that appears on the USPS form, do not have to be included. Form 8125-C must always be computer-generated. Form 8125-C may omit the "Number of Pieces" and "Piece Weight" columns for mailings prepared in sacks, trays, or on pallets if there is sufficient information for the origin post office and destination USPS facility to identify the mailings and to compare the information on the form with the physical mail. The mailer must report the number of pieces in each mailing on Form 8125-C if the mailings consist of individual

mailpieces that are not prepared in containers (e.g., bedloaded parcels). For mailings consisting of identical-weight pieces, mailers should report the piece weight where possible. [P950.2.10]

#### **15.2.11 Mailer Transport of PVDS**

Using any means of transportation, including Express Mail or Priority Mail drop shipment, the mailer must transport PVDS mailings from origin to the destination USPS facility. The mailer must not transport PVDS mailings on the same vehicle with shipments not entered as PVDS. For Standard Mail and Package Services PVDS, the mailer must meet the scheduling standards for mail deposit at destination USPS facilities. If a vehicle contains mail paid at Parcel Select rates, the applicable standards for scheduling of deposits and unloading of vehicles apply to any other mail on the same vehicle for the same destination USPS facility. Any material classified as hazardous under 601.10.0 may not be carried in the same vehicle as PVDS mailings. [P950.2.11]

#### **15.2.12 Separation of PVDS Mailings**

When a vehicle contains more than one PVDS for a single destination USPS facility, the shipments must be separated to allow reconciliation with each accompanying Form 8125. Vehicles containing shipments for multiple destination USPS facilities must be kept physically separated. Where applicable, a single Form 8125 that identifies all the mail for a single facility must be prepared for a shipment of copalletized or combined mailings. [P950.2.12]

### **15.3 Liability**

The mailer assumes all responsibility and liability for any loss or damage to PVDS mailings before they are deposited and accepted as mail at destination USPS facilities, including third party transportation. [P950.3.0]

### **15.4 Standard Mail Documentation**

#### **15.4.1 Same Day**

All mailings or segments of the same job submitted for verification and release on the same day under PVDS must be reported on a single postage statement and Form 3602-C (or postage statement register), or on computer media under Multiple Entry Point Processing System (MEPPS). [P950.4.1]

#### **15.4.2 Documentation**

In addition to the documentation required in 708.1.0, the mailer must also submit the documentation below at the time the first mailing identified on Form 3602-C is presented for verification:

- a. Form 3602-C, which serves as the postage statement register, along with the appropriate postage statement. All mailing volumes, weights, and postage for each rate category are entered on the postage statement and used to debit the mailer's account for permit imprint mailings and to enter data on postage-affixed mailings.

705.15.5

- b. A separate Form 8125 for each PVDS listed on Form 3602-C (or postage statement register). Each PVDS must be identified with a unique statement number (e.g., the date and a sequential three-digit suffix) on the Form 3602-C (or postage statement register) and the corresponding Form 8125, as appropriate.
- c. A separate postage statement showing the mailing post office is the same as the post office of PVDS origin for any portion of a job accepted by the local verifying office under a standard plant load arrangement. Plant load mailings are not considered a PVDS and are not reported on Forms 3602-C and 8125.  
[P950.4.2]

## **15.5 Package Services PVDS Option**

### **15.5.1 General Standards**

Under this option, in addition to the individual postage statements required for each Package Services mailing, the mailer may be required to submit postage statement registers and consolidated postage statements for PVDS mailings. A single, unique USPS mailing number must be on all related individual postage statements and postage statement register listing these individual statements, and the associated consolidated postage statement. When a mailer is required to submit consolidated postage statements, the information on these statements is used to debit the mailer's account. [P950.5.1]

### **15.5.2 Individual Postage Statements**

The mailer must submit a complete postage statement for each mailing for each destination USPS facility when the mailing is presented for verification and postage payment. In addition to the information required on all individual postage statements, if the mailer is required to submit consolidated postage statements (for three or more entry post offices) for debiting of the advance deposit account, each individual postage statement must include a uniquely assigned postage statement sequence number that must not exceed nine digits. The numbers must be sequential within a job or mailing cycle for mailings verified, paid for, and cleared for dispatch on the same day. The statements must also include a unique USPS mailing number corresponding to the number on the related postage statement register and consolidated postage statement. [P950.5.2]

### **15.5.3 Postage Statement Register**

A postage statement register is a computer-generated line item listing of all individual postage statements for PVDS permit imprint mailings verified and released for dispatch on a single day from a job or mailing cycle. All postage statements listed on a postage statement register must be represented by a corresponding consolidated postage statement. The total postage charge on the postage statement register must be identical to the total postage charge on the corresponding consolidated statement. The following information must appear on each postage statement register:

- a. At the top of the first page the endorsement “Register of Postage Statements”; name and location of the mailing agent; date mailings are verified and cleared for dispatch; the permit imprint number; the unique USPS mailing number corresponding to the number on related postage statements; and the related consolidated statement.
- b. Each line item must include (based on the individual postage statement on that line) the unique postage statement sequence number; destination USPS facility; and, for that statement, total postage, weight, and number of pieces.
- c. The sum of the total postage charges must appear with total weight, and total pieces must be listed from each postage statement. The total postage charge on the register must match total postage charge on the related consolidated statement.
- d. If necessary, manual corrections may be made to the postage statement register listing the data from any revised individual statement. These corrections must be documented by the DMU, and the corrected register must be signed and dated by both the mailer and the USPS representative approving the changes. The changes on the register must be reflected on the associated consolidated postage statement. [P950.5.3]

#### **15.5.4 Submitting Register**

The mailer must submit the postage statement register to the DMU before or when presenting the first individual mailing on the register to the DMU for verification and dispatch. [P950.5.4]

#### **15.5.5 Consolidated Postage Statement**

The consolidated postage statement assembles data from the individual postage statements representing permit imprint mailings verified, paid for, and released for dispatch on a single day from a job or mailing cycle. The consolidated postage statement must be a computer-generated facsimile similar in format to the appropriate USPS postage statement. The mailer must sign and date the consolidated statement. Certain data elements not on the individual postage statements must be reflected on the consolidated statement, including the range of unique individual statement sequence numbers, the number of individual statements represented, and the endorsement “Consolidated Postage Statement.” Other data elements on individual statements, such as each post office of deposit for PVDS mailings, are not shown on the consolidated statement. Each individual statement must contain a USPS mailing number that corresponds to the USPS mailing number on the related consolidated statement. The consolidated statements are used to debit the mailer’s account. The following information must be identical for each individual statement consolidated onto a single (consolidated) postage statement:

- a. Mailing date.
- b. Name and location of mailing agent.
- c. Processing category.
- d. Permit imprint number.
- e. Job or mailing cycle description.

705.15.5.6

- f. Unique USPS mailing number corresponding to the number on related individual postage statements. [P950.5.5 and P950.5.6]

#### **15.5.6 Calculating and Reporting Data**

Each field on the consolidated postage statement represents the sum of the figures in that field from the individual postage statements. The figures reported on the consolidated statement must be rounded in accordance with [604.8.1.3](#). All fields containing data on the individual statements must be rolled up to the consolidated statement. The total postage on the consolidated statement must be the sum of the total postage for all individual postage statements. This total is used to debit the mailer's account. [P950.5.7]

#### **15.5.7 Submitting Statement**

The mailer must submit the consolidated postage statement to the DMU at or before the time the last individual postage statement it represents is submitted to the DMU for the day's mailing. [P950.5.8]

## 16.0 Express Mail and Priority Mail Drop Shipment

### 16.1 Express Mail and Priority Mail Drop Shipments

#### **16.1.1 Standards**

The Express Mail or Priority Mail shipment and the enclosed mail must meet all corresponding eligibility and preparation standards. [E070.7.1]

#### **16.1.2 Enclosed Mail**

The mail enclosed in an Express Mail or Priority Mail pouch must consist either entirely of single-piece rate matter or entirely of presorted matter that is part of the same mailing, unless an exception is granted by the PCSC. [E070.7.2]

#### **16.1.3 Authorization**

Except under [16.1.5, Zoned Rate Matter](#), no authorization is required for Express Mail or Priority Mail drop shipment, but the mailer must obtain necessary permits, licenses, or authorizations for the enclosed mail or postage payment method used and must pay any annual mailing fee applicable to the enclosed mail at the post office where the Express Mail or Priority Mail drop shipment is mailed. [P070.6.1]

#### **16.1.4 Listing Destination Offices**

A mailer enclosing zoned rate mail in Express Mail or Priority Mail drop shipments must provide the accepting post office with a list of all the drop ship post offices at least 3 business days before presenting the first drop shipment. A mailer may add to the list at any time by written notice to the accepting post office, but an added destination post office must be on the list for at least 10 workdays before the mailer may mail a drop shipment to it. [P070.6.2]

#### **16.1.5 Zoned Rate Matter**

To use meter or precanceled postage stamps on zoned rate matter enclosed in an Express Mail or Priority Mail drop shipment, the mailer must apply in writing to the accepting post office postmaster and include the list required by [16.1.4](#). [P070.6.3]

**16.1.6 Basis of Rate**

Express Mail or Priority Mail postage must be paid on the weight of the entire contents of the Express Mail pouch or Priority Mail sack. The tare weight of the pouch or sack is not included in this weight. [P070.6.4]

**16.1.7 Zone Rates**

Zone rates for Priority Mail are computed from the accepting post office to the destination post office for the drop shipment (not the destination post office for the enclosed mail). [P070.6.5]

**16.1.8 Calculating Payment for Enclosed Mail**

Postage and fees for the mail enclosed must be prepaid under the applicable standards. When the enclosed mail is zone-rated, the zone is computed from the postal facility where the Express Mail or Priority Mail drop shipment destinates. Discounts otherwise available to the enclosed mail may be claimed if the applicable standards (e.g., volume and preparation) are met. [P070.6.6]

**16.1.9 Payment Method**

Postage on the enclosed mail may be paid with any method permitted for that mail class. Express Mail postage must be paid under 114. Priority Mail postage must be paid with adhesive stamps or meter stamps affixed to Tag 159. Priority Mail may also be paid with a permit imprint through a manifest mailing system, optional procedure mailing system, or alternate mailing system authorized under 2.0, 3.0, or 4.0. If a permit imprint is used for Priority Mail postage, the permit imprint must be affixed to or hand-stamped on the Tag 159. [P070.6.7]

**16.1.10 Postage Statement for Enclosed Mail**

A postage statement is not required for the Express Mail or Priority Mail portion of the drop shipment. The mailer must provide the correct postage statement for the mail class enclosed and postage payment method used. The postage statement must show the total number of Priority Mail drop shipment sacks in the mailing in addition to the number of sacks, trays, or other containers enclosed. If the enclosed mail is zone-rated, the mailer must either provide an attachment to the postage statement that details the pieces and postage, by zone for each post office at which an Express Mail or Priority Mail drop shipment is to destinate, or provide a separate postage statement for each Express Mail or Priority Mail drop shipment destination post office. If no postage statement is required for the enclosed mail, the mailer must still present the mailing to the designated USPS location for verification of postage and fees. [P070.6.8]

**16.2 Express Mail****16.2.1 Description**

Express Mail drop shipment (Express Mail Custom Designed Service, Express Mail Next Day Service, or Express Mail Second Day Service) expedites movement of any other class of mail between domestic postal facilities. The drop shipment receives the Express Mail service selected from the origin post office to the destination post office of the shipment, where the enclosed mail is processed and provided the appropriate service from that post office to its destination. [D071.1.1]

705.16.2.2

**16.2.2 Drop Shipment Service Objectives**

The service guarantee for an Express Mail shipment using drop shipment procedures ends on receipt at the postal facility where the shipment is destined. [D500.1.5]

**16.2.3 Preparation for Drop Shipment**

The mailer must present matter prepared as an Express Mail drop shipment in Express Mail pouches. The proper mailing label or form must be placed in an EP-13 envelope and attached to each Express Mail pouch. [M500.3.5]

**16.2.4 Deposit Site**

An Express Mail drop shipment must be made at a postal facility designated by the postmaster to accept both the class of mail enclosed and Express Mail. The shipment must be prepared under 16.4 and 16.5 and presented to the business mail entry unit (BMEU) of the origin post office. [D071.1.2]

**16.2.5 Acceptance Time**

An Express Mail drop shipment must be presented to the BMEU with enough time for acceptance, processing, and dispatch to the Express Mail unit before the cutoff time for Express Mail. [D071.1.3]

**16.2.6 Extra Services**

No extra services can be added to the Express Mail portion of the drop shipment. [D071.1.4]

**16.2.7 Express Mail Reship Service**

The USPS picks up shipments made up of mail addressed to post office boxes and dispatches it as a Custom Designed or Next Day Service shipment under a service agreement (on Form 5631) between the USPS and the mailer, subject to these standards:

- a. Service frequency is scheduled.
- b. For each pickup stop, the mailer is charged the applicable pickup fee no matter how many of the same mailer's post office boxes are checked in the same post office box unit at the same time.
- c. Express Mail postage and fees are paid by Express Mail Corporate Account or federal agency "Postage and Fees Paid" indicia.
- d. The mailer must keep a postage-due or business reply account at the postal facility where the post office box is located for any shortpaid or business reply mail. The service agreement must state that such an account exists.
- e. Express Mail reship service is not available for registered, certified, COD, insured, or Express Mail items addressed to the post office box. The mailer must give instructions for redirecting such items on Form 1093.
- f. The service agreement must: (1) list the Expedited Mail analyst at the originating office as the "Firm Representative"; (2) show the pickup time is when the USPS employee picks up the mail from the post office boxes and prepares it for dispatch as Express Mail.
- g. Commencement and termination of service agreements are subject to the standards for Express Mail Custom Designed Service. [D500.3.0]

## 16.3 Priority Mail

### 16.3.1 Description

Priority Mail drop shipment expedites movement of any other class or subclass of mail (except Express Mail) between domestic postal facilities. The drop shipment receives Priority Mail service from the origin post office to the destination post office of the shipment, where the enclosed mail is processed and provided the appropriate service from that post office to its destination. [D071.2.1]

### 16.3.2 Deposit Site

A Priority Mail drop shipment must be prepared under 16.4 and 16.5 and presented to the business mail entry unit (BMEU) authorized by the postmaster to accept the class of mail enclosed. [D071.2.2]

### 16.3.3 Acceptance Time

A Priority Mail drop shipment must be presented to the BMEU with enough time for acceptance, processing, and dispatch before the critical dispatch time for Priority Mail. [D071.2.3]

### 16.3.4 Extra Services

No extra services can be added to the Priority Mail portion of the drop shipment. [D071.2.4]

### 16.3.5 Priority Mail Drop Shipment

For a Priority Mail drop shipment, no extra services may be added to the Priority Mail segment, and the mail enclosed may receive only the following services:

- a. First-Class Mail pieces may be sent with Certified Mail service or special handling or, for First-Class Mail parcels only, electronic option Delivery Confirmation service or electronic option Signature Confirmation service.
- b. Standard Mail pieces subject to the residual shape surcharge (except Customized MarketMail pieces) may be sent with electronic option Delivery Confirmation service.
- c. Package Services mail may be sent with special handling or, for Package Services parcels only, electronic option Delivery Confirmation service or electronic option Signature Confirmation service. [S070.1.1]

## 16.4 Basic Preparation Standards

### 16.4.1 Enclosed Mail

Mail enclosed in a drop shipment must meet the eligibility and preparation standards for its class and rate and for any extra services used. Mail requiring cancellation may not be drop shipped. For mail enclosed in an Express Mail drop shipment, available extra services are indicated in 503.1.1. For mail enclosed in a Priority Mail drop shipment, available extra services are indicated in 703.9.13 and 16.3.5, *Priority Mail Drop Shipment*. When a drop shipment is destined to a 5-digit facility, then sacking or traying is not required for letters or flats if all enclosed presort destination bundles are destined to the same 5-digit ZIP Code as the Express Mail or Priority Mail pouch, sack, or container. [M072.1.1]

705.16.4.2

**16.4.2 Standards**

The Express Mail or Priority Mail portion of the drop shipment must meet the standards in [115](#) or [125](#), respectively, and the applicable standards in [16.0](#).  
[M072.1.2]

**16.4.3 Containers for Expedited Transport**

Acceptable containers for expedited transport are as follows:

- a. An Express Mail drop shipment must be contained in a blue and orange Express Mail pouch, except that Customized MarketMail pieces under [1.0](#) may be contained in USPS-provided Express Mail envelopes and cartons or in any properly labeled container supplied by the mailer.
- b. A Priority Mail drop shipment must be contained in either an orange Priority Mail sack or a letter-size tray, except that Customized MarketMail pieces under [1.0](#) may be contained in USPS-provided Priority Mail envelopes and cartons or in any properly labeled container supplied by the mailer. [M072.1.3]

**16.4.4 Container Labels**

Container labels for drop shipments expedited by Express Mail pouches or Priority Mail sacks/trays must be barcoded and meet the requirements in [708.6.0](#). All lines of information must be completely visible when inserted into the label holder. Sacks and trays are labeled as follows:

- a. Line 1 (destination line) provides information on the destination entry office where the enclosed mail is to be distributed:
  1. For BMC distribution, use [L601](#).
  2. For ASF distribution, use [L602](#).
  3. For 3-digit ZIP Code prefix groups, use [L004](#) (ADC distribution) or [L005](#) (SCF distribution).
  4. For 5-digit ZIP distribution, use the city, state, and 5-digit ZIP Code that appears on the enclosed mail.
- b. For Line 2 (content line), print "EXPRESS DROP SHIP" or "PRIORITY DROP SHIP," as applicable.
- c. Line 3 (origin line) must conform to the standards in [708.6.1.5](#). [M072.1.4]

**16.4.5 Tag 157**

In addition to the Express Mail pouch label, Tag 157 must be attached to each Express Mail pouch to identify it as an Express Mail drop shipment and to identify the class of mail enclosed. This tag or an approved facsimile also must be affixed to containers used for Express Mail drop shipment of Customized MarketMail (CMM).  
[M072.1.5]

**16.4.6 Tag 159**

In addition to the Priority Mail sack label, Tag 159 must be attached to each Priority Mail sack to identify it as a Priority Mail drop shipment. Tag 159 indicates the class of mail enclosed in the Priority Mail sack and provides a place to affix Priority Mail postage. This tag or an approved facsimile also must be affixed to containers used for Priority Mail drop shipment of CMM. [M072.1.6]

**16.4.7 Label 23**

As an alternative to sacks for Priority Mail drop shipments, letter trays or mailer-supplied containers for Customized MarketMail (CMM) pieces under 1.0 may be used as follows:

- a. Label 23 is affixed to the letter tray or mailer-supplied container. A single Label 23 may be used to identify two letter trays strapped together. Mailer-supplied containers may not be strapped together.
- b. If two letter trays are strapped together, each tray must be of identical size and individually strapped under 235.3.4. Label 23 must be affixed to the sleeve of the top tray before strapping. The trays must be strapped securely around the length of the two trays.
- c. The total weight of two trays strapped together or mailer-supplied containers used for CMM may not exceed 70 pounds. [M072.1.7]

**16.4.8 Open and Distribute**

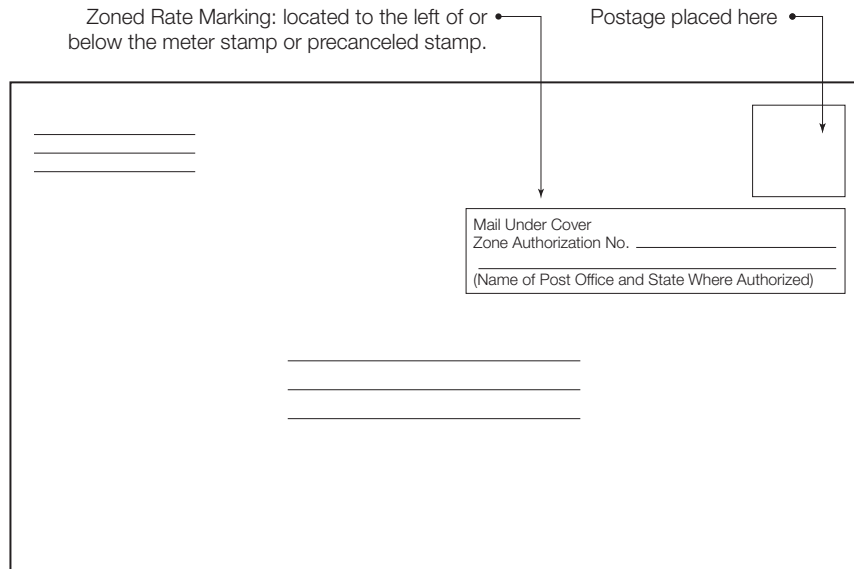

In addition to Tag 157 or Tag 159, USPS-supplied cartons and envelopes and mailer-supplied containers used for Express Mail or Priority Mail drop shipment must be addressed “POSTMASTER—OPEN AND DISTRIBUTE”; followed by street address (mailing address) of the facility on the next line; and city, state, and ZIP Code on the last line. [M072.1.8]

705.16.5

### 16.5 Markings on Enclosed Mail

#### 16.5.1 Zoned Rate Mail

When the enclosed mail is zoned rate mail and has postage affixed, the following marking must appear as part of the meter stamp. The marking may be to the left of or below the meter stamp or precanceled stamp, in addition to but not interfering with other markings required for the class of mail.

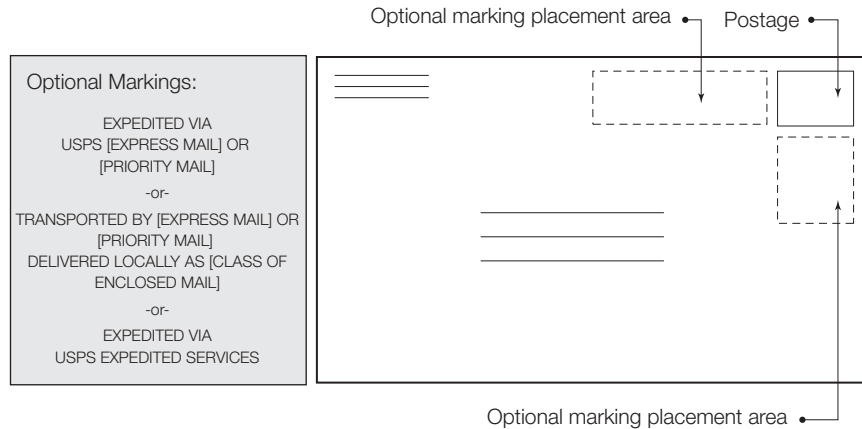

[M072.2.1]

**16.5.2 Optional Marking**

The enclosed mail may show one of the optional markings below. The optional marking must be placed directly below or to the left of the postage area. The optional marking may appear in any type font. When an optional marking is used, the type size of the required rate marking (202 for letters, 302 for flats, or 402 for parcels) must be at least 8 points.

[M072.2.2]

**17.0 Metered Mail Drop Shipment**

**17.1 Basic Information**

**17.1.1 General**

A customer may affix postage using a postage meter (postage evidencing system) licensed at one post office (licensing post office) and deposit that mail at another post office (entry post office) only if prior authorization is obtained from the USPS under one of the procedures described below. Such authorization may be revoked under 17.2.6 when the USPS determines that information or circumstances supporting the original authorization may no longer be accurate, complete, or applicable. (604.4.0 provides an exception to this standard for metered Express Mail, Priority Mail, and single-piece rate metered mail.) These general conditions apply:

- a. The meter stamp or indicium must show the name of the licensing post office.
- b. Metered mailpieces that bear meter impressions or other endorsements containing the wrong post office name, authorization number (as applicable), or other required information are not accepted.
- c. A metered mail drop shipment must be deposited at the time and place and under any additional condition specified by the USPS.
- d. Annual mailing fees, as applicable for the class of mail, must be paid at the office(s) where mailings will be entered, as required under 233.3.2 or 243.3.2.

[D072.1.1]

705.17.1.2

**17.1.2 Effect on Service**

The USPS assumes no responsibility for the material presented until it is accepted into the mail. The USPS is not responsible for service delays when the mailer does not meet the applicable preparation or entry requirements. Entry of mail by drop shipment may adversely affect the USPS's ability to achieve the applicable service objectives. [D072.1.2]

**17.1.3 Changes**

A mailer authorized to drop ship metered mail must inform the approving official of all changes to the information originally provided as part of the application. When the USPS asks, the mailer must submit additional information supporting that authorization. Failure to provide this information is grounds to revoke the authorization. [D072.1.3]

**17.2 Authorization****17.2.1 Options 1 & 2**

Authorizations under Options 1 and 2 in [17.3, Option 1: Deposit at P&DC/F](#), and [17.4, Option 2: Deposit at Another Post Office](#), are granted to meter license holders. The meter license holder must apply in writing to the district manager of business mail entry whose district includes the licensing post office of the meter holder. [D072.2.1]

**17.2.2 Options 3 & 4**

Authorization under Option 3 in [17.5, Option 3: Consolidated Drop Shipment With Endorsement](#), is granted to mailers intending to present mail for other meter license holders (including their own mail, if applicable) at one location other than the licensing office(s), whereas authorization under Option 4 in [17.6, Option 4: Consolidated Drop Shipment Without Endorsement](#), is granted for mailings presented at more than one location. For authorization under Option 3, the mailer or consolidator must apply in writing to the district manager of business mail entry whose district includes the post office(s) where the mailings are verified for presort preparation and payment of postage. Applications under Option 4 must be submitted to the manager, Business Mailer Support. [D072.2.2]

**17.2.3 Application**

The application must describe the classes of mail to be deposited and the volume, processing category, frequency of mailing, and requested deposit schedule of each. The application must also state how the mail to be entered meets applicable eligibility and service standards and must identify any third party preparing and presenting the mail. The application must be prepared on the mailer's letterhead and signed by an authorized manager or representative. There is no USPS form for this purpose. Additional information is required for Options 3 and 4. Mailers seeking authorization under Option 4 must contact Business Mailer Support, USPS Headquarters, for guidance (see [608.8.0](#) for address). [D072.2.3]

**17.2.4 Notification**

The manager of business mail entry (or the manager, Business Mailer Support under Option 4) notifies the applicant in writing of approval or conditions of approval, including the drop shipment (DS) authorization number, or denial. [D072.2.4]

**17.2.5 Application Denial**

A decision denying an application for operational reasons may be appealed within 15 days of its receipt to the area manager of processing and distribution. If denied because of noncompliance with applicable eligibility standards, the applicant may appeal the denial under [607.2.0](#). [D072.2.5]

**17.2.6 Revocation**

An authorization may be revoked:

- a. When it is determined that the authorized entry no longer reduces postal handling or improves service, or is not in the best interests of the USPS.
- b. For nonuse during any consecutive 12 months.
- c. When used in operating any unlawful scheme or enterprise, or for any noncompliance with the regulations governing the use of postage meters. [D072.2.6]

**17.2.7 USPS Authorities**

Authorization is revoked by:

- a. The manager of business mail entry of the district originally issuing authorization or the manager, Business Mailer Support.
- b. The postmaster of the licensing post office (under any option) when it is used in operating any unlawful scheme or enterprise, or for any noncompliance with the regulations for postage meters. [D072.2.7]

**17.2.8 Nonuse**

If revocation is for nonuse, and the mailer shows that use is to resume within 90 days after the revocation notice, revocation may be deferred for a period not to exceed 90 days from the date of the original revocation notice. [D072.2.8]

**17.2.9 Appeal**

Written appeal of the revocation notice may be made within 15 days of its receipt, under [607.2.0](#). [D072.2.9]

**17.3 Option 1: Deposit at P&DC/F**

Metered mail of any class may be entered and deposited by the licensed meter holder or an agent at the local processing and distribution center/facility (P&DC/F) making the initial originating distribution of mail deposited at the post office where the meter license is held. Mail must be prepared under the standards for the class and rate claimed and as specified in the drop shipment authorization. The mailer may be required to prepare and deposit the mail in an additional manner that best enhances postal handling as specified in the drop shipment authorization. Any such requirements are modified to reflect changes in the mailings subsequently presented by the mailer. Failure to meet these standards may lead to revocation of the authorization. [D072.3.0]

## 17.4 Option 2: Deposit at Another Post Office

### 17.4.1 Eligibility

Metered mail of any class may be entered and deposited by the licensed meter holder or an agent at a post office other than the licensing post office or P&DC/F serving the licensing post office. Mail must be prepared under the standards for the class and rate claimed and as specified in the drop shipment authorization. The mailer may be required to perform additional preparation and meet specific deposit schedules to enhance postal handling. Any such requirements are specified in the drop shipment authorization and may be modified to reflect changes in the mailings subsequently presented by the mailer. Failure to meet these standards may lead to revocation of the authorization. [D072.4.1]

### 17.4.2 Endorsement

Each mailpiece deposited under this option must contain an endorsement with the city and state of the entry post office, the words "Drop Shipment Authorization" (or the abbreviation "D/S AUTH"), and the unique authorization number issued by the district manager of business mail entry serving the entry post office. If the abbreviation "D/S AUTH" is not used, the mailing office ZIP Code may be used instead of the city and state of mailing. The endorsement must be included in digital indicia (under the conditions in 604.4.8.8) or placed outside the indicium boundary in 8-point or larger type by a computer or mechanical method providing a clear and legible impression. For letter press indicia, the endorsement must appear in the ad plate area. The application and the endorsement format must be approved by the district manager of business mail entry before mail is deposited under this option.

#### EXAMPLES

##### Full Endorsement – Mailing Office City and State

|                      |                     |
|----------------------|---------------------|
| MAILED AT CHICAGO IL | DROP SHIPMENT       |
| DROP SHIPMENT        | AUTHORIZATION 48    |
| AUTHORIZATION 12     | MAILED AT YAKIMA WA |

##### Full Endorsement – Mailing Office ZIP Code

|                  |                  |
|------------------|------------------|
| MAILED AT 606    | DROP SHIPMENT    |
| DROP SHIPMENT    | AUTHORIZATION 48 |
| AUTHORIZATION 12 | MAILED AT 98901  |

##### Abbreviated Format

|             |             |
|-------------|-------------|
| CHICAGO IL  | D/S AUTH 48 |
| D/S AUTH 12 | YAKIMA WA   |

[D072.4.2]

### 17.4.3 Not Valid

Drop shipment endorsements authorized before March 19, 1989, are no longer valid. [D072.4.3]

### 17.4.4 Rate and Class Marking

The drop shipment endorsement placed in the ad plate area or within the indicium boundary may include the marking required by the standards for the rate claimed if that marking is placed directly below the drop ship endorsement and meets the

standards in 202 for letters, 302 for flats, and 402 for parcels. The marking may also be provided separately directly below the indicium boundary if the marking meets the relevant size and legibility standards. [D072.4.4]

## **17.5 Option 3: Consolidated Drop Shipment With Endorsement**

### **17.5.1 General**

A mailer presenting a consolidated mailing may apply to collect metered mail bearing postage from meters licensed at different post offices and present such mailings at one post office, subject to the conditions and limitations in 17.5. All conditions for presenting presort mailings must be met as applicable for the class of mail. All applicable conditions under 604.10.4, *Value Added Refunds*, and 5.0, *First-Class or Standard Mail Mailings With Different Payment Methods*, must also be met. [D072.5.1]

### **17.5.2 Barcoded and Nonbarcoded Portions**

The majority of the mail consolidated for entry under Option 3 must be prepared in a single mailing (with a single postage statement) in which all pieces, regardless of rate claimed, have the correct barcode (ZIP+4 for flats, delivery point for letters and cards) and are physically compatible with automated mail processing equipment. The entry post office may reject a mailing if all pieces do not have the correct barcode. A minor portion of the consolidated mail may be prepared as a second, separate mailing (with its own postage statement) in which the pieces do not bear the correct barcode (or are not compatible with automated processing equipment) but do meet the standards that apply to the rates claimed. [D072.5.2]

### **17.5.3 Service Objective**

When a mailpiece is part of a consolidated mailing, the service objective that applies must be the same as or better than that which would have applied had the piece been entered at the licensing post office. As part of the application, documentation must be provided by the mailer to show compliance with this standard to USPS satisfaction. (Typical documentation lists the service objective that applies to each licensing post office from whose area mail is to be consolidated and the standard that applies to that mail when it is entered under Option 3.) [D072.5.3]

### **17.5.4 Information**

An application under Option 3 must be submitted by the mailer (i.e., the party to present the consolidated mailing to the USPS). In addition to the information detailed in 17.2.3, the application must identify the meter licensees whose mail is to be consolidated and the serial numbers of each licensee's meters. [D072.5.4]

### **17.5.5 Notice to Licensees**

After receiving an authorization notice, the mailer must give written notice to each licensee whose mail is to be consolidated under the authorization. The mailer's notice must include a copy of the authorization, a full explanation of preparation requirements, and a reminder that consolidation of their mail can adversely affect service. The mailer must give copies of each licensee notice to the entry office and licensing office postmasters. [D072.5.5]

**17.5.6 Additional Standards**

Metered mail deposited under Option 3 must be prepared as specified by the USPS. This preparation may extend beyond that which is required to qualify for the rate paid for the mail, and may require the mail to be configured and its deposit scheduled to enhance USPS handling. Failure to meet these standards can lead to revocation of the authorization. [D072.5.6]

**17.5.7 Endorsement**

Each mailpiece deposited under this option must be endorsed with the letters “DS,” followed by a unique drop shipment authorization number (issued by the manager of business mail entry of the district in which the mail is entered) and the words “MAILED AT,” followed by the 3-digit ZIP Code prefix of the entry post office. The endorsement may also include the correct mailing date. (Including this date does not relieve the meter licensee(s) from meeting the standards for correct dating of metered mail.) The endorsement must be printed immediately below the meter stamp or indicium or in the lower left corner of the mailpiece, in 8-point or larger type, by a computer or another mechanical method providing a clear and legible endorsement. The district manager of business mail entry issuing the authorization number must approve the endorsement before drop shipment mailings may be made under this option.

**EXAMPLES**

DS12 MAILED AT 606 – 04/01/04

MAILED AT 606 DS12 – 04/01/04

DS48 MAILED AT 981

MAILED AT 981 DS48

[D072.5.7]

**17.5.8 Placement**

The drop shipment endorsement must not interfere with the barcode clear zone or any other marking. [D072.5.8]

**17.5.9 Preparation**

The preparation and documentation standards that apply to the rates claimed in the mailing remain unaffected by entry under Option 3. [D072.5.9]

**17.5.10 Consolidation**

Mail collected from licensees for mailing under Option 3 may not be further collected or consolidated by any other mailer or consolidator. [D072.5.10]

**17.6 Option 4: Consolidated Drop Shipment Without Endorsement****17.6.1 General**

A mailer presenting a consolidated mailing may apply to collect metered mail bearing postage from meters licensed at different post offices and consolidate that mail for mailing (entry and deposit) at other entry post offices, subject to the conditions and limitations in 17.6. All conditions for presenting presort mailings must be met as applicable for the class of mail. All applicable conditions under 604.10.4, *Value Added Refunds*, and 5.0, *First-Class or Standard Mail Mailings With Different Payment Methods*, must also be met. [D072.6.1]

**17.6.2 Barcoded and Nonbarcoded Portions**

The majority of the mail consolidated for entry under Option 4 must be prepared in a single mailing (with a single postage statement) in which all pieces, regardless of rate claimed, have the correct barcode (ZIP+4 for flats, delivery point for letters and cards) and are physically compatible with automated mail processing equipment. The entry post office may reject a mailing if all pieces do not have the correct barcode. A minor portion of the consolidated mail may be prepared as a second, separate mailing (with its own postage statement) in which the pieces do not bear the correct barcode (or are not compatible with automated processing equipment) but do meet the standards that apply to the rates claimed. [D072.6.2]

**17.6.3 Service Objective**

When a mailpiece is part of a consolidated mailing, the service objective that applies must be the same as or better than that which would have applied had the piece been entered at the licensing post office. As part of the application, documentation must be provided by the mailer to show compliance with this standard to USPS satisfaction. (Typical documentation lists the service objective that applies to each pair of origin/destination 3-digit ZIP Codes in the consolidated mailing, both if entered at the licensing post office and if entered as authorized under Option 4.) [D072.6.3]

**17.6.4 Information**

An application under Option 4 must be submitted by the mailer (i.e., the party to present the consolidated mailing to the USPS). The information in [17.2, Authorization](#), must be provided for each post office at which mail is to be entered under Option 4. The application must also detail: the meter licensees whose mail is to be consolidated and the serial numbers of each licensee's meters; the mailer's method of sortation, documentation, and quality control; and the mailer's procedures for ensuring that all pieces in the consolidated mailing are entered to meet or exceed the service objectives for the place of origin. [D072.6.4]

**17.6.5 Notice to Licensees**

After receiving the authorization notice, the mailer must give written notice to each licensee whose mail is to be consolidated under the authorization. The mailer's notice must include a copy of the authorization, a full explanation of preparation requirements, and a reminder that consolidation of their mail can adversely affect service. The mailer must give copies of each licensee notice to the entry office and licensing office postmasters. [D072.6.5]

**17.6.6 Additional Standards**

Metered mail deposited under Option 4 must be prepared in segments for entry at postal facilities according to schemes and schedules provided by the USPS. Further, each segment must be prepared for dispatch without additional postal processing or handling, and deposited at places and times specified by the USPS. The USPS may stipulate preparation beyond that required to qualify for the rate paid for the mail. Failure to meet these standards can lead to revocation of the authorization. [D072.6.6]

**17.6.7 Transportation**

The mailer must provide transportation for the consolidated mailing, unless the USPS provides plant load service. [D072.6.7]

705.17.6.8

**17.6.8 Endorsement**

A drop shipment endorsement is not required on pieces mailed under Option 4.

[D072.6.8]

**17.6.9 Preparation**

The preparation and documentation standards that apply to the rates claimed in the mailing remain unaffected by entry under Option 4. [D072.6.9]

**17.6.10 Consolidation**

Mail collected from licensees for mailing under Option 4 may not be further collected or consolidated by any other mailer or consolidator. [D072.6.10]

**17.6.11 Documentation**

The mailer/consolidator must keep documentation supporting each consolidated mailing, including the volume collected from each meter licensee, for at least 1 year from the date of mailing, and make it available for postal inspection on request.

## 1.0 Rates and Fees

### 1.1 Outside-County—Excluding Science-of-Agriculture

#### 1.1.1 Pound Rates

Per pound or fraction:

- a. For the nonadvertising portion: \$0.193.
- b. For the advertising portion:

| LETTERS, FLATS & PARCELS |         |
|--------------------------|---------|
| Zone                     | Rate    |
| DDU                      | \$0.158 |
| DSCF                     | 0.203   |
| DADC                     | 0.223   |
| 1&2                      | 0.248   |
| 3                        | 0.267   |
| 4                        | 0.315   |
| 5                        | 0.389   |
| 6                        | 0.466   |
| 7                        | 0.559   |
| 8                        | 0.638   |

[R200.1.1]

#### 1.1.2 Piece Rates

Per addressed piece:

| Presort Level       | LETTERS                 | FLATS                   | LETTERS, FLATS & PARCELS |
|---------------------|-------------------------|-------------------------|--------------------------|
|                     | Automation <sup>1</sup> | Automation <sup>1</sup> | Nonautomation            |
| Basic               | \$0.281                 | \$0.325                 | \$0.373                  |
| 3-Digit             | 0.249                   | 0.283                   | 0.324                    |
| 5-Digit             | 0.195                   | 0.226                   | 0.256                    |
| Carrier Route       |                         |                         |                          |
| <i>Basic</i>        | ---                     | ---                     | 0.163                    |
| <i>High Density</i> | ---                     | ---                     | 0.131                    |
| <i>Saturation</i>   | ---                     | ---                     | 0.112                    |

1. Lower maximum weight applies: letter-size at 3 ounces (or 3.3 ounces for heavy letters); flat-size at 20 ounces (AFSM 100) and 6 pounds (UFSM 1000).

[R200.1.2]

#### 1.1.3 Discounts

Discounts for each addressed piece:

- a. Nonadvertising content, for each 1% of nonadvertising: \$0.00074.
- b. Destination delivery unit: \$0.018.
- c. Destination SCF: \$0.008.
- d. Destination ADC: \$0.002.
- e. Destination entry pallet: \$0.015.

- f. Pallet (for other than 1.1.3e): \$0.005. [R200.1.3]

#### 1.1.4 Nonprofit

Authorized nonprofit mailers receive a discount of 5% off the total Outside-County postage excluding the postage for advertising pounds. The 5% discount does not apply to commingled nonsubscriber copies in excess of the 10% allowance provided under 7.0. [R200.1.4]

#### 1.1.5 Classroom

Authorized Classroom mailers receive a discount of 5% off the total Outside-County postage excluding the postage for advertising pounds. The 5% discount does not apply to commingled nonsubscriber copies in excess of the 10% allowance provided under 7.0. [R200.1.5]

## 1.2 Outside-County—Science-of-Agriculture

### 1.2.1 Pound Rates

Per pound or fraction:

- a. For the nonadvertising portion: \$0.193.
- b. For the advertising portion:

| LETTERS, FLATS & PARCELS |         |
|--------------------------|---------|
| Zone                     | Rate    |
| DDU                      | \$0.119 |
| DSCF                     | 0.152   |
| DADC                     | 0.167   |
| 1&2                      | 0.186   |
| 3                        | 0.267   |
| 4                        | 0.315   |
| 5                        | 0.389   |
| 6                        | 0.466   |
| 7                        | 0.559   |
| 8                        | 0.638   |

[R200.2.1]

707.1.2.2

### 1.2.2 Piece Rates

Per addressed piece:

| Presort Level       | LETTERS                 | FLATS                   | LETTERS, FLATS & PARCELS |
|---------------------|-------------------------|-------------------------|--------------------------|
|                     | Automation <sup>1</sup> | Automation <sup>1</sup> | Nonautomation            |
| Basic               | \$0.281                 | \$0.325                 | \$0.373                  |
| 3-Digit             | 0.249                   | 0.283                   | 0.324                    |
| 5-Digit             | 0.195                   | 0.226                   | 0.256                    |
| Carrier Route       |                         |                         |                          |
| <i>Basic</i>        | ---                     | ---                     | 0.163                    |
| <i>High Density</i> | ---                     | ---                     | 0.131                    |
| <i>Saturation</i>   | ---                     | ---                     | 0.112                    |

1. Lower maximum weight applies: letter-size at 3 ounces (or 3.3 ounces for heavy letters); flat-size at 20 ounces (AFSM 100) and 6 pounds (UFSM 1000).

[R200.2.2]

### 1.2.3 Discounts

Discounts for each addressed piece:

- a. Nonadvertising content, for each 1% of nonadvertising: \$0.00074.
- b. Destination delivery unit: \$0.018.
- c. Destination SCF: \$0.008.
- d. Destination ADC: \$0.002.
- e. Destination entry pallet: \$0.015.
- f. Pallet (for other than [1.2.3e](#)): \$0.005. [R200.2.3]

## 1.3 In-County

### 1.3.1 Pound Rates

Per pound or fraction:

| LETTERS, FLATS & PARCELS |         |
|--------------------------|---------|
| Zone                     | Rate    |
| DDU                      | \$0.112 |
| None                     | 0.146   |

[R200.3.1]

**1.3.2 Piece Rates**

Per addressed piece:

| Presort Level       | LETTERS                 | FLATS                   | LETTERS, FLATS & PARCELS |
|---------------------|-------------------------|-------------------------|--------------------------|
|                     | Automation <sup>1</sup> | Automation <sup>1</sup> | Nonautomation            |
| Basic               | \$0.050                 | \$0.077                 | \$0.106                  |
| 3-Digit             | 0.048                   | 0.073                   | 0.097                    |
| 5-Digit             | 0.046                   | 0.067                   | 0.087                    |
| Carrier Route       |                         |                         |                          |
| <i>Basic</i>        | ---                     | ---                     | 0.050                    |
| <i>High Density</i> | ---                     | ---                     | 0.034                    |
| <i>Saturation</i>   | ---                     | ---                     | 0.028                    |

1. Lower maximum weight applies: letter-size at 3 ounces (or 3.3 ounces for heavy letters); flat-size at 20 ounces (AFSM 100) and 6 pounds (UFSM 1000).

[R200.3.2]

**1.3.3 Discount**

Destination delivery unit discount for each addressed piece: \$0.006. [R200.3.3]

**1.4 Ride-Along Rate**

Rate per ride-along piece: \$0.124. [R200.4.0]

**1.5 Fees**

Per application:

- a. Original entry: \$375.00.
- b. News agent registry: \$40.00.
- c. Additional entry: \$60.00.
- d. Reentry: \$40.00. [R200.5.0]

**2.0 Rate Application and Computation****2.1 Periodicals Rate Application****2.1.1 Rate Elements**

Postage for all Periodicals includes a pound rate charge, a piece rate charge, and any discount for which the mail qualifies under the corresponding standards.

[P013.3.1]

**2.1.2 Applying Pound Rate**

Pound rates are applied to the weight of the pieces in the mailing. Outside-County and Science-of-Agriculture Outside-County pound rates are based on the weight of the advertising portion of the mail sent to each postal zone (as computed from the entry office) and the weight of the nonadvertising portion without regard to zone. In-County pound rates consist of a delivery unit zone rate and a uniform (unzoned) rate for all other eligible pieces delivered within the county of publication. The minimum pound rate charge for any zone or other group for which a per pound charge is computed is 1 unit (1 pound) of the pound rate charge. *For example, three 2-ounce pieces for a zone are subject to the minimum 1-pound charge.* [P013.3.2]

## 707.2.1.3

**2.1.3 Computing Weight of Advertising Portion**

The pound rate charge is the sum of the charges for the computed weight of the advertising portion of copies to each zone, plus an additional flat (unzoned) charge for the total weight of the nonadvertising portion of all copies to all zones. For publications containing advertising, the minimum pound rate charge for any zone to which copies are mailed is 1 unit (pound) of the advertising pound rate charge. The minimum pound rate charge for the nonadvertising portion is that which applies to all weight not reported in the advertising (zoned) portion. (Authorized Nonprofit and Classroom publications with an advertising percentage that is 10% or less are considered 100% nonadvertising. When computing the pound rates and the nonadvertising adjustment, use "0" as the *advertising percentage*. Authorized Nonprofit and Classroom publications claiming 0% advertising must pay the nonadvertising pound rate for the entire weight of all copies to all zones.) [P013.3.3]

**2.1.4 Per Piece Charge**

Piece rates apply to each addressed piece, based on the sortation done by the publisher. An *addressed piece* can be a single individually addressed copy, a bundle of unaddressed copies with a single delivery address for the bundle, or a firm bundle containing unaddressed or individually addressed copies for the same address. The per piece charge is based on the number of addressed pieces (not the number of copies). [P013.3.4]

**2.1.5 Discounts**

Discounts and reductions apply per pound, per addressed piece, or per copy as specified for each in 4.0 through 15.0 and 28.0. [P013.3.5]

**2.2 Computing Postage****2.2.1 Percentage of Advertising**

The percentage of advertising shown on the postage statement must be based on the marked copy of the corresponding issue or edition provided as required. If necessary, round off the computed percentage of advertising to two decimal places. Advertising percentages also may be calculated through the Periodicals Accuracy, Grading, and Evaluation (PAGE) Program using the procedures in 16.0, *Basic Standards for Postage Payment Methods*, and 17.0, *Documentation Standards*. [P013.7.1]

**2.2.2 Weight Per Copy**

To determine the weight per copy, select and weigh a random sample of 10 or more copies and divide the total sample weight by the number of pieces in the sample. Express the weight per copy in decimal pounds rounded off to four decimal places. Per-copy weights also may be calculated through the Periodicals Accuracy, Grading, and Evaluation (PAGE) Program using the procedures in 16.0 and 17.0. [P013.7.2]

**2.2.3 Computing Other Weights**

To find the total weight of mailed copies per zone or rate level, multiply the corresponding number of copies by the computed weight per copy. Round off each result to the nearest whole pound, except that when the result is under 0.5 pound, round to 1 pound. To find the weight of the advertising portion for each zone, where applicable, multiply the total weight of copies for that zone by the percentage of

advertising. Round off each result to the nearest whole pound, except that when the result is under 0.5 pound, round to 1 pound. To find the weight of the nonadvertising portion, subtract the total weight of the advertising portion to all zones from the total weight of copies to all zones. To find the weight of In-County rate copies, multiply the number of copies by the weight per copy and round off the total weight to the nearest whole pound, except that when the result is less than 0.5 pound, round to 1 pound. [P013.7.3]

#### **2.2.4 Pound Rate**

To compute the pound rate postage for Regular and Preferred outside-county copies, multiply the weight of the advertising and nonadvertising portions by the corresponding rates, add the *unrounded* results, and subtract all applicable discounts. To compute the pound rate postage for In-County rate copies, multiply their total weight by the corresponding rate per pound. [P013.7.4]

#### **2.2.5 Piece Rate**

To find the piece rate postage for outside-county and In-County rate copies, multiply the number of *addressed pieces* (*not* copies) by the appropriate rate, based on the presort of the pieces as mailed. [P013.7.5]

#### **2.2.6 Nonadvertising Adjustment**

To compute the nonadvertising adjustment (where applicable), subtract the advertising percentage from 100, multiply the remainder by the nonadvertising adjustment per piece, multiply the *unrounded* product by the number of pieces, and round off the product to four decimal places. [P013.7.6]

#### **2.2.7 Total Postage**

Total Outside-County postage is the sum of the per pound and per piece charges, and any Ride-Along charge, less all discounts, rounded off to the nearest whole cent. Total In-County postage is the sum of the per pound and per piece charges, and any Ride-Along charge, less all discounts, rounded off to the nearest whole cent. For mailings that include foreign copies, total foreign postage is the sum of the per piece charges, less a discount, rounded off to the nearest whole cent. [P013.7.7]

### **3.0 Physical Characteristics and Content Eligibility**

#### **3.1 Physical Standards**

##### **3.1.1 General**

See [201](#) for the physical characteristics for letter-size Periodicals, [301](#) for flat-size Periodicals, and [401](#) for parcel-size Periodicals.

#### **3.2 Addressing Standards for Periodicals**

##### **3.2.1 Preparation**

Each addressed piece, including the top copy of a firm bundle, must bear the addressee's name and address. The address must include the correct ZIP+4 code or 5-digit ZIP Code. [A010.7.1]

707.3.2.2

**3.2.2 Address Label**

White or other light-colored paper must be used for the address label. To identify the mailpiece as Periodicals, the mailer may place, vertically along the left-hand side of the label, a 1/4-inch or narrower strip of solid pink or of pink “PER” characters.

[A010.7.2]

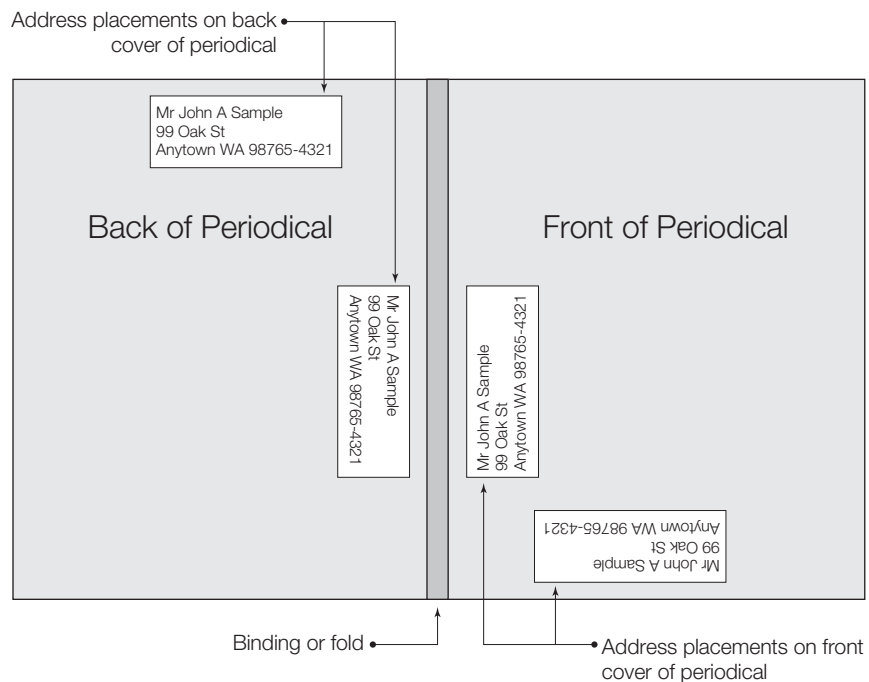

**3.2.3 Address Placement**

The delivery address must be clearly visible on or through the outside of the mailpiece, whether placed on a label or directly on the host publication, a component, or the mailing wrapper. If placed on the mailing wrapper, the address must be on a flat side, not on a fold (see Exhibit 3.2.4). If a polybag is used, the address must not appear on a component that rotates within the bag, and the address must remain visible throughout the addressed component’s range of motion. [A010.7.3]

**3.2.4 Return Address**

The return address must appear on any mailing wrapper that is endorsed “Address Service Requested.” [A010.7.4]

**Exhibit 3.2.4 Address Placement for Periodicals**

[Exhibit A010.7.3]

### 3.3 Permissible Mailpiece Components

#### 3.3.1 Pages

Pages are the printed sheets forming the publication or one of the mailpiece's components, bearing advertising, nonadvertising, or both, including pages having textual and graphic matter, blank spaces for writing or marking, and material to be completed or used by the reader. A minor portion of the pages in a Periodicals mailpiece may have unusual characteristics, such as a different size, shape, or construction, or portions that may be wholly or partially separable, and pages prepared for folding out. No page may have dimensions (when folded, if folded) that exceed the dimensions of the publication. Pages are also subject to these standards:

- a. Multilayer pages (including pages formed by sheets glued together and pages that have unusual shapes, such as cutouts, movable flaps, or "pop-ups") may include small amounts of fastening material such as grommets, string, or rubber bands as needed to assemble the page. Multilayer pages may also be formed as pouches or pockets but may contain only permissible loose enclosures (see [3.3.4](#)) or other securely affixed permissible components.
- b. Multiple pages may be held together by staples or other means separate from and in addition to the regular binding of the publication.
- c. Oversized pages may be used for illustrations, charts, maps, and other advertising and nonadvertising content. [C200.1.1]

#### 3.3.2 Parts and Sections

Parts and sections are pages that are physically separate subdivisions of the publication, as identified by the publisher. Each part or section must show the publication title, and the number of parts or sections in the issue must be stated on the cover of the first part or section. Parts or sections produced by someone other than the publisher may not be mailed at Periodicals rates if these parts or sections are prepared by or for advertisers or if they are provided to the publisher free or at a nominal charge. On request, the publisher must submit contracts entered into with producers of parts or sections. [C200.1.2]

#### 3.3.3 Enclosures of First-Class Mail or Standard Mail

Matter to be paid at the applicable First-Class Mail or Standard Mail rate may be enclosed in a Periodicals mailpiece subject to these conditions:

- a. The total weight of all enclosed Standard Mail matter must be less than 16 ounces.
- b. Postage and fee payment is subject to [703.9.8](#) through [703.9.12](#) and [707.16.3](#). A permit imprint that may appear on a First-Class Mail or Standard Mail enclosure must not be visible when the mailpiece is prepared for mailing except as provided under [703.9.8](#) through [703.9.12](#) and [707.16.3](#).
- c. When enclosing nonincidental First-Class Mail or any Standard Mail, combination envelopes or containers with separate parts for the two classes of mail may be used. If both the sender's and addressee's names and addresses are not on both pieces, the sender's name and address must be placed on one

## 707.3.3.4

piece and the addressee's name and address on the other. Combination containers with inseparable parts may bear the names and addresses on only one part.

- d. The applicable "First-Class Mail Enclosed" or "Standard Mail Enclosed" marking must be placed on or in the host publication if it contains any nonincidental First-Class Mail or any Standard Mail enclosure. If placed on the outer wrapper, polybag, envelope, or cover of the host publication, the marking must be set in type no smaller than any used in the required "POSTMASTER: Send change of address..." statement. If placed in the identification statement, the marking must meet the applicable standards. The marking must not be on or in copies not accompanied by a First-Class Mail or Standard Mail enclosure unless additional information is provided under the applicable postage payment standards in [703.9.8](#) through [703.9.12](#) and [707.16.3](#). [C200.1.3]

**3.3.4 Loose Enclosures at Periodicals Rate**

Only the following material may be included loose as an enclosure in a Periodicals mailpiece and be paid at Periodicals rates, subject to the corresponding conditions:

- a. An incidental First-Class piece must be closely related but secondary to the Periodicals publication with which it is enclosed and must consist of matter that, if mailed separately, would require First-Class postage. Examples of an incidental First-Class enclosure are a bill for the publication, a statement of account for past publication purchases, or a personal message or greeting included with the publication.
- b. A receipt, request, or order for a subscription may be printed or written; prepared as a reply mail card or envelope for any authorized Periodicals publication (or a publication pending Periodicals authorization); or inserted in an envelope within the publication. The receipt or request may be part of, or accompanied by, printed matter containing information related exclusively to a receipt or request or order for a subscription provided the printed matter does not advertise, promote, or offer for sale other products or services.
- c. A card or form for the recipient's use in providing address correction information to the publisher may be printed or written; prepared as a card or envelope, including business reply, or as a combination form for two or more Periodicals publications issued by the same publisher; inserted in an envelope that is attached to, bound in, or loose within the publication; or prepared as a detachable part of another permissible enclosure.
- d. Enclosures listed in [3.3.4b](#) and [3.3.4c](#) are not counted when determining the percentage of advertising in the publication, but they are included in the total weight of the publication reported on the postage statement. If the publication otherwise consists entirely of nonadvertising matter, an incidental First-Class enclosure may be treated as nonadvertising matter. In all other cases, an incidental First-Class enclosure is considered part of the advertising portion of the publication. [C200.1.4]

### 3.3.5 Supplement

A supplement is one or more pages (subject to 3.3.1) formed by one or more printed sheets that are not bound into a publication. A supplement may be devoted to a single topic and may contain material different from that in the host publication. The external dimensions of a supplement (i.e., its length and height) may not exceed those of the host publication except when the host publication and the supplement are contained in an envelope, polybag, or other complete wrapper. Supplements are also subject to these conditions as applicable:

- a. A loose supplement to a bound Periodicals publication must contain at least 25% nonadvertising matter and bear the endorsement “Supplement to” followed by the title of the publication or the name of the publisher. A bound publication with one or more supplements must be enclosed in a wrapper. If a supplement to a bound publication is formed of more than one sheet, all sheets making up the supplement must be bound together.
- b. A supplement to an unbound publication must be combined with and inserted within the publication under 3.5.4. If the supplement is included loose outside the unbound publication, the publication and its supplement must be enclosed in a wrapper or envelope, and the supplement must bear the endorsement “Supplement to” followed by the title of the publication or the name of the publisher. [C200.1.5]

### 3.3.6 Cover and Protective Cover

A cover may be placed on the outside of a Periodicals publication. A protective cover is an additional cover placed around the outside of a publication; preparation is subject to 3.5.5. Advertising, nonadvertising, or both may be printed on the cover or protective cover. The cover and protective cover on a publication are included when measuring advertising percentage. Nothing may be attached to the cover or protective cover except as permitted under 3.3.8, *Attachment*. [C200.1.6]

### 3.3.7 Mailing Wrapper

A mailing wrapper is an envelope, sleeve, partial wrapper, or polywrap used to enclose the mailpiece. Advertising may be printed on the mailing wrapper and is included when measuring advertising percentage. Nothing may be attached to the mailing wrapper except as permitted under 3.3.8. [C200.1.7]

### 3.3.8 Attachment

The following may be attached to a cover, protective cover, or mailing wrapper of a publication:

- a. Stickers of any size and shape. If stickers are attached to the cover, protective cover, or mailing wrapper, no portion of the publication title may be obscured.
- b. Material allowed as a loose enclosure described in 3.3.3, *Enclosures of First-Class Mail or Standard Mail*, or 3.3.4, *Loose Enclosures at Periodicals Rate*. When nonincidental First-Class Mail and/or Standard Mail enclosures (see 3.3.3) are attached, the marking “First-Class” or “Letter Enclosed” must be on a First-Class Mail attachment; “Standard” or “STD,” on a Standard Mail attachment.

## 707.3.3.9

- c. Material normally allowed within the contents of the publication composed of advertising, nonadvertising, or a combination of both may be attached to the cover or protective cover only when the publication and attached material are enclosed in a wrapper. No portion of the publication title may be obscured.

[C200.1.8]

**3.3.9 Printed Addition**

Only the following may be printed on a copy of a Periodicals publication after it is printed or placed on its cover, protective cover, or mailing wrapper:

- a. The name and address of the intended recipient or of the publisher or sender.
- b. The printed title of the publication and its place of publication.
- c. The expiration date of the subscription.
- d. The request for address correction information from the addressee.
- e. The words "Sample Copy" (if the copy is a sample), "Marked Copy" (if the copy contains a marked item or article), or "Address Service Requested" (if the copy is to be returned to the sender if undeliverable as addressed).
- f. The number of copies enclosed in a bundle (on the outside of the bundle) or a bundle count such as "2 of 4" (on the bundle wrapper).
- g. Corrections of typographical errors or a mark, except by written or printed words, to call attention to a word or passage.
- h. Printed messages not required to be mailed as First-Class Mail or Express Mail.

[C200.1.9]

**3.3.10 Label Carrier**

A label carrier may be used to carry the delivery address for the mailpiece and must consist of a single unfolded, uncreased sheet of card or paper stock, securely affixed to the cover of the publication or large enough so that it does not rotate inside the wrapper, subject to these conditions:

- a. The label carrier must bear the title of the Periodicals publication or the name and address of the publisher; the Periodicals imprint "Periodicals Postage Paid at..." or the word "Periodicals" in the upper right corner of the address side (unless "Periodicals" is printed on the address side of the polybag); and the address to which the mailpiece can be returned if undeliverable (if endorsed "Address Service Requested").
- b. The label carrier may bear a request for address correction from the addressee. It also may bear information about requesting or subscribing to any Periodicals publication (or a publication pending Periodicals authorization), including a request or subscription form.
- c. As applicable, the label carrier may show the endorsement "First-Class Mail Enclosed," "Standard Mail Enclosed," or "Ride-Along Enclosed," or the permit imprint used to pay postage for the First-Class Mail or Standard Mail enclosure if that permit imprint is below the Periodicals imprint or the word "Periodicals."

- d. Other printed information, whether advertising or nonadvertising, is permitted only on the back of the label carrier and is subject to measurement and postage payment accordingly. A single line of text calling attention to information on the reverse may be placed on the front of the label carrier. If any information on the reverse of the label carrier is advertising, the line of text on the front is also treated as advertising. [C200.1.10]

### **3.4 Impermissible Mailpiece Components**

#### **3.4.1 General Standards**

Regardless of preparation or characteristics, the materials described in 3.4.2 through 3.4.5 are not eligible for Periodicals rates. [C200.2.1]

#### **3.4.2 Prohibited Matter**

Material that contains any one of the following printed items or that is referred to in a component of the Periodicals mailpiece (by the use of one of these items) is ineligible to be mailed at Periodicals rates:

- a. A separate price or subscription instructions different from those of the host publication.
- b. The word “catalog.”
- c. A First-Class Mail, Standard Mail, or Package Services permit imprint.
- d. An ISBN (International Standard Book Number).
- e. An ISSN (International Standard Serial Number) or USPS number different from that of the host publication. [C200.2.2]

#### **3.4.3 Products**

Products may not be mailed at Periodicals rates. Examples include stationery (such as pads of paper or blank printed forms); cassettes; floppy disks; merchandise; envelopes containing enclosures, other than receipts, orders for subscriptions, and incidental First-Class matter; and wall, desk, and blank calendars. Printed pages, including oversized pages and calendars, are not considered products if they are not offered for sale. [C200.2.3]

#### **3.4.4 Package Services**

Package Services may not be combined with a Periodicals publication. [C200.2.4]

#### **3.4.5 Nonprinted Sheets**

Any matter not formed of printed sheets (except as permitted under 3.3.1a) is not eligible for Periodicals rates. [C200.2.5]

### **3.5 Mailpiece Construction**

#### **3.5.1 Bound/Unbound**

Publications may be prepared in either a bound or unbound form, with or without wrappers unless required by 3.5.7. A bound publication is a publication in which pages are securely held together by two or more staples, spiral binding, glue, stitching, or other permanent fastening. All other publications are unbound, including folded multisheet and single-sheet publications and those in which pages are loose and collated (“nested”) or in which pages are held together by a single staple. [C200.3.1]

**3.5.2 Size and Weight**

Periodicals mail may not weigh more than 70 pounds or measure more than 108 inches in length and girth combined. Additional size and weight limitations apply to individual Periodicals rate categories. Requester publications must contain at least 24 pages per issue. [C200.5.0 and C200.3.2]

**3.5.3 Uniformity**

Automation-compatible pieces must remain uniformly thick. Cover attachments, tabbed or glued half covers, flat-surfaced ride-along enclosures, loose subscription materials, and flat-surfaced enclosures of other classes may be included as long as the overall uniform thickness of the flat is maintained. [C200.3.3]

**3.5.4 Without Mailing Wrapper**

When the mailpiece does not have a mailing wrapper, all the components of an unbound publication must be combined with and inserted inside the publication. Only enclosures mailable at Periodicals rates under 3.3.4 may be included loose inside a bound unwrapped publication. An enclosure under 3.3.3, *Enclosures of First-Class Mail or Standard Mail*, or 3.3.4, *Loose Enclosures at Periodicals Rate*, may be securely attached on the outside of an unwrapped publication along the bound edge if it does not exceed any dimension of the cover of the publication and comes within 3/4 inch of the edge opposite the fold or binding. [C200.3.4]

**3.5.5 With Mailing Wrapper**

Except as provided in 3.3.5, *Supplement*, when the mailpiece is completely enclosed in a mailing wrapper, the components may be placed anywhere within that wrapper. When a sleeve or other partial wrapper is used, the components must be secured so that they do not fall out during handling. Bound publications carrying loose supplements or prepared in physically separate parts or sections must be either completely enclosed in an envelope, plastic wrapper (polybag), or paper wrapper or inserted within a sleeve so that the component parts do not become separated while in the mail. [C200.3.5]

**3.5.6 Cover Page and Protective Cover**

If the piece is not completely enclosed in a mailing wrapper, then any protective cover or cover page must cover both the front and back of the host publication and extend to within at least 3/4 inch of the edge opposite the fold or binding.

*Exception:* Flat-size pieces may have short covers as provided in 301.3.7.2. If the host publication is bound, the protective cover must be permanently attached to the publication. [C200.3.6]

**3.5.7 APO/FPO Copy**

Any single copy of an unbound publication that includes any enclosure, supplement, or more than one part or section and that is mailed to an APO/FPO address must be completely enclosed in a mailing wrapper. [C200.3.7]

**3.5.8 Sealing and Postal Inspection**

Periodicals mail must be prepared so that it can be easily examined. The mailing of publications at Periodicals postage rates represents consent by the sender to USPS inspection of the contents whether loose or inserted in envelopes, wrappers, or

other covers. Mailers who want to ensure that publications are not opened for postal inspection must pay First-Class rates and mark such mail accordingly. [C200.3.8]

### **3.6 Printed Features**

#### **3.6.1 Publication Title and Address Notice**

The publication title must be displayed prominently on the publication and any protective cover. The title or the name and address of the publisher must be displayed prominently on any opaque mailing wrapper. The publication title, followed immediately by the USPS publication number (or ISSN if one has been assigned), and the mailing address to which undeliverable copies or change-of-address notices are to be sent may be shown in the upper left corner of the address side of a mailing wrapper or directly on the outside of the host publication if it can be read when the mailing wrapper is in place. The publication number includes an alpha prefix and is to be within parentheses, e.g., THE NATIONAL WEEKLY (ISSN 9876-543X) or THE COMMUNITY (USPS 123-456). [C200.4.1]

#### **3.6.2 Periodicals Imprint**

Mailing wrappers that completely enclose the host publication must bear the Periodicals imprint "Periodicals Postage Paid at..." or the word "Periodicals" in the upper right corner of the address area. If a clear plastic wrapper is used, those words may appear anywhere on the address side of the wrapper or the topmost item inside. [C200.4.2]

#### **3.6.3 Advertising**

Advertising may be printed on the pages of any component of a publication, subject to the corresponding standards. Regardless of location, an advertisement must be prepared as an integral part of the publication. Except for advertisements in supplements, all advertisements in a bound publication must be permanently attached. Except as provided in 3.3.4d, all advertising must be included in the advertising portion of the issue measured under 16.0 and 17.0. Different advertising may occupy the same space in different editions of the same issue. [C200.4.3]

#### **3.6.4 Marking of Paid Reading Matter**

Pursuant to 18 USC 1734, if a valuable consideration is paid, accepted, or promised for the publication of any editorial or other reading matter in a Periodicals publication, that matter must be plainly marked "advertisement" by the publisher. When a single item of paid editorial or other reading matter occupies more than one page, it need only be marked "advertisement" on the first page. The word "advertisement" may be included in a statement that explains why the material is marked "advertisement." Such a statement must be prominent on the first page of the material and the word "advertisement" in the statement must be in bold or italicized print or otherwise emphasized so that it can be plainly seen. Editors or publishers who print such matter without plainly marking it "advertisement" are subject to a fine of not more than \$500. [C200.4.4]

## **4.0 Basic Eligibility Standards**

### **4.1 Second Class Mail**

Effective July 1, 1996, second-class mail was renamed Periodicals. [E211.1.1]

707.4.2

**4.2 Qualification Categories**

All Periodicals publications must be authorized Periodicals mailing privileges under one of five qualification categories (general publications, publications of institutions and societies, publications of state departments of agriculture, requester publications, and foreign publications). These publications are subject to the general standards below and the standards for each respective category. [E211.1.2]

**4.3 Eligibility Categories**

Only newspapers and periodical publications meeting the mailability standards in 601 and the general and applicable specific standards in 4.0 through 15.0 and 28.0 may be authorized mailing at the Periodicals rates. [E211.1.3]

**4.4 Periodical Publications****4.4.1 Definitions and Characteristics**

For Periodicals purposes, *periodical publication* or *periodical* is one published at a stated frequency with the intent to continue publication indefinitely, with these characteristics:

- a. The continuity of the periodical must show from issue to issue. Continuity is shown by serialization of articles or by successive issues carrying the same style, format, theme, or subject matter.
- b. The primary purpose of the periodical must be the transmission of information.
- c. The content of the periodical may consist of original or reprinted articles on one topic or many topics, listings, photographs, illustrations, graphs, a combination of advertising and nonadvertising matter, comic strips, legal notices, editorial material, cartoons, or other subject matter.
- d. The primary distribution of each issue must be made before that of each succeeding issue. [E211.2.1]

**4.4.2 Other Publication Types**

The following types of publications also qualify as periodical publications:

- a. Any catalog or other course listing (including mail announcements of legal texts that are part of post-bar admission education) issued by any institution of higher education or by a nonprofit organization engaged in continuing legal education.
- b. Any loose-leaf page or report (including any index, filing instruction, table, or sectional identifier that is part of such report) designed as part of a loose-leaf reporting service on developments in the law or public policy.
- c. Any transportation guide containing schedules, fares, and related information. [E211.2.2]

**4.4.3 Content Restriction**

Material that has been, or is intended to be, distributed primarily as a book may not be converted into an issue of a periodical by merely placing a periodical's title on it, placing the material within a periodical's cover, or using similar superficial methods. This restriction does not prohibit excerpts or condensations of books from being proper subject matter for periodicals. [E211.2.3]

**4.4.4 Printed Sheets**

Periodicals publications must be formed of printed sheets. Sheets may be die cut or deckle-edged and may be made of paper, cellophane, foil, or other similar materials. They may not be reproduced by stencil, mimeograph, or hectograph. Reproduction by any other process is permitted. Any style of type may be used. [E211.3.0]

**4.5 Known Office of Publication****4.5.1 Location**

The publisher of a Periodicals publication must maintain a known office of publication at the location where the original entry for Periodicals mailing privileges is authorized. [E211.4.1]

**4.5.2 Purpose**

The known office of publication must be a public office for transacting the business of the publication during normal business hours. It must also be the office where the publication's circulation records are kept or can be available for USPS examination. [E211.4.2]

**4.6 Regular Issuance****4.6.1 Frequency**

Each Periodicals publication must be issued at a regular frequency of at least four times a year. [E211.5.1]

**4.6.2 Statement of Frequency**

The publisher must adopt a statement of frequency showing how many issues are to be published each year and at which regular intervals (e.g., daily; weekly; quarterly; four times a year in January, February, October, and November; weekly during school year; monthly except during July and August). [E211.5.2]

**4.6.3 Compliance With Frequency**

All issues must be published regularly as called for by the statement of frequency. To change the number of issues scheduled or the statement of frequency, the publisher must file an application for reentry. If a publication does not maintain regular issuance according to its stated frequency, even after USPS notice, the PCSC revokes the publication's Periodicals mailing privileges. [E211.5.3]

**4.7 Eligible Formats****4.7.1 Complete Copies**

Complete copies of the regular issues of a Periodicals publication may be mailed at the applicable Periodicals rates. Incomplete copies (e.g., those lacking pages or parts of pages) are subject to the applicable First-Class Mail, Standard Mail, or Package Services rates. [E211.6.1]

**4.7.2 Issues and Editions**

Issues and editions of a Periodicals publication may be mailed at the applicable Periodicals rates if they show continuity and meet the applicable standards in [4.8, Issues](#), or [4.9, Editions](#). [E211.6.2]

707.4.8

**4.8 Issues****4.8.1 Regular Issues**

Regular issues must be published according to the publication's stated frequency. The publication of regular issues of general and requester publications must be reflected in the publication's identification statement and (where applicable) in the subscription price. For requester publications, copies must be distributed to requesters. [E211.7.1]

**4.8.2 Extra Issues**

Extra issues, not shown in the publication's stated frequency, published for communicating news and information received too late for insertion in the regular issue, but not for advertising purposes, may be mailed occasionally at Periodicals rates. The original entry post office must receive written notice of these issues before they are mailed. [E211.7.2]

**4.8.3 Content**

Issues may include annual reports, directories, buyers' guides, lists, and similar material prepared as part of the content if copies of these issues bear the publication title and are included in the regular subscription price. [E211.7.3]

**4.8.4 Mailing Issues—Same Day**

For determining Periodicals eligibility and postage, an issue of a newspaper or other periodical that is published at a regular frequency, more often than once a month, on the same day as another regular issue of the same publication, is deemed to be a separate publication that must independently meet the applicable standards for Periodicals mailing privileges if:

- a. More than 10% of the total copies of the issue is distributed on a regular basis to nonsubscribers or nonrequesters.
- b. The number of copies of the issue distributed to nonsubscribers or nonrequesters is more than twice the number of nonsubscriber or nonrequester copies of the other issue distributed on that same day. [E211.7.4]

**4.8.5 Mailing Issues—Different Day**

For determining Periodicals eligibility and postage, an issue of a newspaper or other periodical that is published at a regular frequency, more often than once a month, but not on the same day as another regular issue of the same publication, is deemed to be a separate publication that must independently meet the applicable standards for Periodicals mailing privileges if:

- a. More than 10% of the total copies of the issue is distributed on a regular basis to nonsubscribers or nonrequesters.
- b. The number of copies of the issue distributed to nonsubscribers or nonrequesters is more than twice the number of nonsubscriber or nonrequester copies of any other issue distributed during the period between the distribution of each of the issues whose eligibility is being examined. [E211.7.5]

## 4.9 Editions

### 4.9.1 Types

Issues mailed at Periodicals rates may be prepared in editions (e.g., demographic, morning). Subscribers and requesters must not routinely receive more than one edition of any issue. [E211.8.1]

### 4.9.2 Extra Editions

Extra editions may be mailed at Periodicals rates to communicate news and information received too late for the regular edition. Extra editions may not be intended for advertising. [E211.8.2]

### 4.9.3 Content of Editions

Editions may differ in content, but not so much that they constitute separate and independent publications. A separate publication is not acceptable as an edition of another publication. [E211.8.3]

## 4.10 Back Numbers and Reprints

Periodicals rates may be paid on mailings of unbound back issues (if the publication's Periodicals entry is in effect), reprint copies of daily publications printed within 1 week of the issue date, and reprint copies of other than daily publications printed before the next issue is printed. Other mailings of back issues or reprint copies, including permanently bound back issues or reprint copies, are subject to the applicable First-Class Mail, Standard Mail, or Package Services rates. [E211.9.0]

## 4.11 Identification

### 4.11.1 Title

The publication title must be shown on the front or cover page in a position and in a type style and size that distinguish the title from the publisher's name or other items. [E211.10.1]

### 4.11.2 Identification Statement

An identification statement, in an easily read type, must be included in all copies of publications authorized Periodicals mailing privileges and in all copies mailed pending approval of Periodicals mailing privileges. [E211.10.2]

### 4.11.3 Unbound Publication

In an unbound publication, the identification statement must be shown conspicuously in one of the following places:

- a. On one of the first five pages.
- b. On the table of contents page.
- c. In the masthead on the editorial page, if the location of the editorial page is shown in the table of contents on the front page of the publication. [E211.10.3]

### 4.11.4 Bound Publication

In a bound publication (one secured with two or more staples, spiral binding, glue, stitching, or other permanent fastening), the identification statement must be shown conspicuously as described in 4.11.3 or on one of the last three nonadvertising pages inside the back cover. [E211.10.4]

**4.11.5 Identification Statement Content**

The identification statement must contain:

- a. The publication title and number. The publication number includes an alpha prefix and must be within parentheses immediately after or below the publication title. If an International Standard Serial Number (ISSN) is assigned, it must appear in the identification statement (e.g., “THE WEEKLY JOURNAL” (ISSN 9876-543X)). If an ISSN is not assigned, the USPS number assigned by the PCSC must appear in the identification statement within 90 days after being provided (e.g., “THE CIVIC BULLETIN” (USPS 876-690)). The publication number may be on the front or cover page instead of in the identification statement.
- b. The issue date. The date may be omitted if it is on the front or cover page.
- c. A statement of frequency, such as described in [4.6.2](#).
- d. The issue number. Every issue of each publication must be numbered consecutively in a series that may not be broken by assigning numbers to issues unavoidably omitted. The issue number may be omitted if it is on the front or cover page.
- e. At the publisher’s option, the subscription price, if the publication has one.
- f. The name and address of the known office of publication, including street number, street name, and the ZIP+4 or 5-digit ZIP Code. The street name and number are optional if there is no letter carrier service. The known office of publication must be clearly distinguishable from the name of other offices of the publication. For foreign publications, the address of the publisher’s agent must be shown as the known office of publication.
- g. The imprint “Periodicals Postage Paid at...” or, if mailed at two or more offices, “Periodicals Postage Paid at... and at additional mailing offices.” A notice of pending application is shown instead if copies are mailed while an application is pending: “Application to Mail at Periodicals Postage Rates is Pending at....”
- h. The mailing address for change-of-address orders, in the normal text type of the publication: “POSTMASTER: Send address changes to [publication title and mailing address].” Publications that are wrapped may use an alternative measure under [3.6.1](#). Change-of-address information may also be shown on the label carrier or container of publications prepared in envelopes, closed wrappers, or polybags. [E211.10.5]

**4.12 Advertising Standards****4.12.1 Advertising**

Advertising is restricted or prohibited by [6.1.3](#) and [6.2.3](#) for the categories of Periodicals authorization. For these standards, the term *advertising* includes:

- a. All material for the publication of which a valuable consideration is paid, accepted, or promised, that calls attention to something to get people to buy it, sell it, seek it, or support it.
- b. Reading matter or other material for the publication of which an advertising rate is charged.

- c. Articles, items, and notices in the form of reading matter inserted by custom or understanding that textual matter is to be inserted for the advertiser or the advertiser's products in the publication in which a display advertisement appears.
- d. A newspaper's or periodical's advertisement of its own services or issues, or any other business of the publisher, whether in display advertising or reading matter. [E211.11.1]

#### **4.12.2 Public Service Announcement**

The term *public service announcement* means any announcement for which no valuable consideration is received by the publisher, which does not include any matter related to the business interests of the publisher, and which promotes programs, activities, or services of federal, state, or local governments or of nonprofit organizations, or matters generally regarded as in the public interest. A public service announcement is not treated as advertising. [E211.11.2]

### **4.13 Fees**

#### **4.13.1 Fee Required**

The required fee must accompany an application for:

- a. Periodicals mailing privileges (original entry).
- b. News agent registry.
- c. Additional entry (unless excepted in 4.13.2 or 4.13.3).
- d. Reentry (unless excepted in 4.13.2 or 4.13.3) to request a:
  - 1. Change in title, frequency of issuance, or original entry office.
  - 2. Change in qualification category.
  - 3. Change in eligibility from preferred rates or the preferred rate discount to regular Outside-County rates.
  - 4. Modification or cancelation of an additional entry. [E211.13.1]

#### **4.13.2 No Fee**

No fee is charged if reentry is only to change eligibility to preferred rates or the preferred rate discount. [E211.13.2]

#### **4.13.3 Single Fee**

Only one fee is charged for a single complete additional or reentry application that requests establishing, modifying, or canceling one or more additional entries if the effective dates for the requested actions do not exceed 30 calendar days. [E211.13.3]

#### **4.13.4 Return of Fee**

After an application is filed with the USPS, no part of the fee is returned to the applicant. [E211.13.4]

#### **4.13.5 Address Correction**

The fee for manual or automated address correction service is charged per notice issued. [E211.13.5]

707.5.1

## 5.0 Applying for Periodicals Authorization

### 5.1 Original Entry Application

#### 5.1.1 General Publications

To apply for Periodicals mailing privileges in the general publication category:

- a. Form 3500 must be completed and filed at the post office serving the known office of publication.
- b. If the frequency of the publication includes more than one regular issue on any day, the publisher also must complete Form 3541-C. If the frequency of the publication includes more than one regular issue per month, but not on the same day, the publisher also must complete Form 3541-E. The applicable form must be submitted with Form 3500.
- c. The publisher must provide all supporting information required on the application and must keep (and make available for USPS examination) records that establish that the publication is not designed primarily for free or nominal rate circulation. [E213.1.1]

#### 5.1.2 Publications of Institutions and Societies

To apply for Periodicals mailing privileges in the publications of institutions and societies category:

- a. Form 3500 must be completed and filed at the post office serving the known office of publication.
- b. When a publication issued by an institution or society carries general advertising, individual subscriptions or receipts are not required; a resolution is acceptable (e.g., "*Resolved: That a copy of each issue of [publication title] shall be sent to each member of [organization name] and that [\$] of each member's annual dues of [\$] shall be for a year's subscription to that publication.*"). Records must be kept accordingly. The written assurance of a responsible official that such records are kept must accompany the application on Form 3500, with a certified copy of the resolution adopted.
- c. The information required on the form must be submitted with the application. [E213.1.2]

#### 5.1.3 Publications of State Departments of Agriculture

To apply for Periodicals mailing privileges in the publications of state departments of agriculture category:

- a. Form 3500 must be completed and filed at the post office serving the known office of publication.
- b. Evidence that the publication is issued by a state department of agriculture must accompany the application. [E213.1.3]

#### 5.1.4 Requester Publications

To apply for Periodicals mailing privileges in the requester publication category:

- a. Form 3500 must be completed and filed at the post office serving the known office of publication.

- b. If the frequency of the publication includes more than one regular issue on any day, the publisher also must complete Form 3541-C. If the frequency of the publication includes more than one regular issue per month, but not on the same day, the publisher also must complete Form 3541-E. The applicable form must be submitted with Form 3500.
- c. The publisher must provide all information required on the application and must keep (and make available for USPS examination) records showing that the primary distribution of the publication is to persons who have requested it. [E213.1.4]

#### **5.1.5 Foreign Publications**

To apply for Periodicals mailing privileges in the foreign publication category:

- a. Form 3500 must be completed and filed at the post office serving the known office of publication.
- b. The publisher or publisher's agent must have available for USPS verification all information on the form. [E213.1.5]

#### **5.1.6 News Agent Registry**

To apply for news agent registry:

- a. Form 3500 must be completed and filed at each post office where mailings are to be made.
- b. Evidence must be given to the postmaster at the mailing office that copies of publications offered for mailing are entitled to Periodicals rates and that the copies are sent to actual subscribers or other news agents for sale or distribution to requesters. The evidence provided in support of the application must include a listing of the publishers, the corresponding titles, and the publication numbers for the qualifying Periodicals publications. [E213.1.6]

#### **5.1.7 Publication Copies**

Applications under 5.1.1 through 5.1.5 must be accompanied by two copies of the issue published nearest to the date of application. These copies must be identified as required in 4.11, marked to show the advertising content, and the percentage of advertising must be shown on the cover. [E213.1.7]

#### **5.1.8 Translation**

If a publication is printed in a foreign language, a brief translation of the contents of the copies (e.g., a synopsis of each article and advertisement) must accompany the application. [E213.1.8]

#### **5.1.9 Fee**

The applicable fee must accompany an application for Periodicals mailing privileges or news agent registry. The fee is not refundable. [E213.1.9]

#### **5.1.10 Location**

The location shown on the application as the original entry post office must be a post office. Other postal facilities (e.g., branches, stations, contract offices, processing hubs) may not be authorized as original entries. [E213.1.10]

707.5.2

## 5.2 Mailing While Application Pending

### 5.2.1 Mailing Before Approval

A publisher or news agent may not mail at Periodicals rates before the PCSC approves the application for Periodicals mailing privileges. Postage at the applicable First-Class Mail, Standard Mail, or Package Services rates must be paid while the application is pending. [E213.2.1]

### 5.2.2 Record of Deposits

If postage is paid by advance deposit account, the USPS keeps a record of deposits and mailings made while an application is pending. The amount that would be charged at the applicable Standard Mail or Package Services rates or the Airmail Letter-Post or Economy Letter-Post international rates must be paid until final action is taken on the application. No record is kept of postage paid at First-Class rates or of postage not paid by advance deposit account. Records are kept for First-Class rate mailings that may qualify for a refund under the exception in [5.3.6e](#). [E213.2.2]

## 5.3 Decision on Application

### 5.3.1 Ruling

The PCSC manager rules on all applications for Periodicals mailing privileges or news agent registry. [E213.3.1]

### 5.3.2 Additional Information

Before acting on an application, the PCSC manager may ask the publisher for more information or evidence to complete or clarify the application. Failure to provide such information is sufficient grounds to deny the application. [E213.3.2]

### 5.3.3 Mailability

If the PCSC manager grants an application for original entry, this approval does not represent a USPS determination that a publication isailable under 39 USC 3001(a) and 18 USC 1461 and 1463. (See *Blount v. Rizzi*, 400 U.S. 410 (1971).) [E213.3.3]

### 5.3.4 Effective Date

The authorization takes effect on the date of application or the date of eligibility for Periodicals mailing privileges (or for news agent registry), whichever is later. [E213.3.4]

### 5.3.5 Refunds

Except as noted in [5.3.6](#), when an authorization for Periodicals mailing privileges is granted, the postmaster refunds to the applicant the difference, if any, between the postage amount deposited and the applicable Periodicals postage for copies mailed while the application was pending. Refunds are made only for mailings deposited on or after the effective date of the authorization and only if postage was paid by advance deposit account for which the entry post office kept the necessary records. [E213.3.5]

### 5.3.6 No Refund

No refund is made for:

- a. A denied or withdrawn application.
- b. The period before the effective date of the authorization.

- c. Postage not paid by advance deposit account for which the required records were kept.
- d. Postage at any rate affixed to copies of the publication.
- e. Postage paid at Express Mail or First-Class Mail rates. Exception: When postage is deposited at single-piece First-Class Mail rates because a mailing presorted and prepared as Periodicals mail is less than 200 pieces or 50 pounds, a refund may be authorized.
- f. Postage on mailings not meeting the applicable preparation or other eligibility standards for Periodicals. [E213.3.6]

### 5.3.7 Denial and Appeal

If the PCSC manager denies an application, the applicant is notified in writing and given the reasons for the denial. The denial takes effect 15 days from receipt of the notice by the applicant, unless an appeal is filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). If the manager of Mailing Standards upholds the denial of an application for news agent registry, that is the final agency decision. For other applications, the manager's denial takes effect 15 days from the applicant's receipt of the notice unless, during that time, an appeal is filed with the USPS Recorder under 39 CFR 954, a copy of which is included with the notice of denial. [E213.3.7]

## 5.4 Revocation or Suspension of Privileges

### 5.4.1 Discontinued Eligibility

The USPS revokes a publication's or news agent's Periodicals mailing privileges if it finds, after a hearing, that the publication or news agent no longer meets the applicable standards. [E213.4.1]

### 5.4.2 Initial Decision

The PCSC manager may ask a publisher or news agent to submit information on a publication's eligibility for Periodicals mailing privileges. If the manager decides that a publication or news agent is no longer entitled to Periodicals mailing privileges, a notice of suspension or revocation of Periodicals mailing privileges is sent to the publisher or news agent at the last known address of the office of publication or of the news agent, giving the reasons for the ruling. [E213.4.2]

### 5.4.3 Appeal

A ruling to suspend or revoke a publication's Periodicals mailing privileges takes effect 15 days from the publisher's receipt of the notice unless, during that time, an appeal is filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address). If the manager upholds the denial of a news agent's appeal, that is the final agency decision. For other actions, the manager's decision takes effect 15 days from its receipt by the publisher unless, during that time, an appeal is filed with the USPS Recorder under 39 CFR 954, a copy of which is included with the notice. [E213.4.3]

707.6.1

## 6.0 Qualification Categories

### 6.1 General Publication

#### 6.1.1 Basic Standards

General publications must meet the applicable basic standards for Periodicals in 4.0 through 9.0 and 11.0 and must be originated and published to disseminate information of a public character or be devoted to literature, the sciences, art, or some special industry. [E212.1.1]

#### 6.1.2 Circulation Standards

General publications must meet these circulation standards:

- a. General publications must have a legitimate list of subscribers who have paid or promised to pay, at more than a nominal rate, for copies to be received during a stated time.
- b. Records for subscriptions to a publication obtained with subscriptions to one or more other publications must be kept so that individual subscriptions to each publication, by title, can be verified.
- c. Persons whose subscriptions are obtained at a nominal rate and those whose copies bear an alternative form of address must not be included in the legitimate list of subscribers. These copies must be treated as nonsubscriber copies, subject to the applicable rate.
- d. Subscriptions may be paid for with dues or contributions, if the dues or contributions and the subscription price are separated to show compliance with 6.1.2, including the amount paid for the subscription. The USPS may require evidence of compliance (e.g., the forms used to obtain payments for dues and subscriptions). For example, dues statements would read: "Annual membership dues of [\$] include [\$] for a 1-year subscription to [Title]."
- e. To determine whether a subscription is genuine, it must be so separated from all other business transactions as to constitute a distinct, voluntary, and independent act. Publishers must be able to show that subscriptions to their publications are voluntary, that the subscription price is paid or definitely promised, and that the relationship of subscriber is understood and agreed to.
- f. At least 50% of a publication's distribution must be to persons who have paid above a nominal rate. Nominal rate subscriptions include those sold at a subscription price so low that the rate cannot be considered a material consideration; or at a reduction to the subscriber (under a premium offer or any other arrangement) of more than 50% of the basic annual subscription rate that would entitle the subscriber to receive one copy of each issue published during the subscription period. The value of a premium is considered its actual cost to the publisher, its recognized retail value, or its represented value, whichever is highest.
- g. Publications primarily designed for free circulation and/or circulation at nominal rates may not qualify for the general publications category. For this standard, the distribution of all copies of a publication is considered, whether circulated in

the mail or otherwise. Publications are considered primarily designed for free circulation and/or circulation at nominal rates when more than 50% of all copies circulated are:

1. Provided free of charge to the ultimate recipients;
2. Paid for at nominal rates by the ultimate recipients;
3. Addressed with an alternative form of address; or
4. Intended by the publisher to be circulated for free and/or at nominal rates. [E212.1.2]

### 6.1.3 Advertising Standards

Advertising is defined in 4.12. General publications primarily designed for advertising purposes do not qualify for Periodicals mailing privileges, including publications that:

- a. Contain more than 75% advertising in more than half of the issues published during any 12-month period.
- b. Are owned or controlled by individuals or business concerns and conducted as an auxiliary to and essentially for the advancement of any other business or calling of those who own or control the publications.
- c. Consist principally of advertising and articles about advertisers in the publication.
- d. Have only a token list of subscribers and that print advertisements free for advertisers who pay for copies to be sent to a list of persons furnished by the advertisers.
- e. Are published under a license from individuals or organizations and that feature other businesses of the licensor. [E212.1.3]

## 6.2 Publications of Institutions and Societies

### 6.2.1 Eligibility

A publication that meets the applicable basic standards in 4.0 through 9.0 and 11.0 and contains only the publisher's own advertising and not, under any condition, the advertising of other persons or organizations, is eligible for Periodicals mailing privileges if it is:

- a. Published by a regularly incorporated nonprofit institution of learning, i.e., an organization of a permanent nature where instruction is given in the higher branches of education only, owing its origin to private or public munificence, and established solely for the public good and not for private gain.
- b. Published by a regularly established state institution of learning supported in whole or in part by public taxation.
- c. Published by any public or nonprofit private elementary or secondary institution of learning or its administrative or governing body.
- d. A bulletin issued by a state board of health, a state industrial development agency, a state conservation or fish and game agency or department, or a state board or department of public charities or corrections.

## 707.6.2.2

- e. A program announcement or guide published by an educational radio or television agency of a state or political subdivision thereof or by a nonprofit educational radio or television station. [E212.2.1]

**6.2.2 Eligible Publications**

The following types of publications are eligible for Periodicals mailing privileges if they meet the basic standards of 4.0, contain only the publisher's own advertising or general advertising subject to 6.2.3, and are published by:

- a. A benevolent or fraternal society or order organized under the lodge system and having a bona fide membership of at least 1,000 persons (publications under the auspices of the society or order are also eligible).
- b. A trade union (publications under the auspices of the union are also eligible).
- c. A strictly professional society, i.e., a group consisting solely of persons who have obtained professional status by advanced educational training, experience, specialized interest, or peer examination. Where applicable, public certification in a particular field of the arts or sciences (such as engineering, law, or medicine) is considered in determining eligibility. The members must be engaged in their given profession under its binding standards of performance and conduct on which the public is entitled to rely.
- d. A strictly literary society, i.e., an organization whose sole purpose is to encourage and cultivate an appreciation of general literature, a literary subject, or an author of recognized literary accomplishment. The membership must be composed of individuals who discuss or analyze the style, composition, or other characteristics of the literature or authors in which they have a common interest.
- e. A strictly historical society, i.e., an organization whose sole purpose is to discover, collect, and systematically record the history of civilization or of a particular segment. Such a society should preserve this material and make it available to its members and the general public, and should extend education by producing published matter, holding regular meetings, presenting addresses and lectures, or using mass media.
- f. A strictly scientific society, i.e., an organization whose sole purpose is to bring individuals together for scientific investigations and pursuits in the applied, pure, or natural sciences, and to disseminate technical information on these subjects.
- g. A church (i.e., a congregation of worshippers who conduct religious services) or a church organization (i.e., organizations of individual churches, organizations that are subsidiary to individual churches, and national or regional organizations of churches). [E212.2.2]

**6.2.3 Advertising Standards**

Advertising is defined in 4.12. A publication qualifying for Periodicals mailing privileges under 6.2.2 may contain advertising of other organizations or persons if:

- a. It is not designed or published primarily for advertising purposes.
- b. It is originated and published to further the purposes of the qualifying organization.

- c. Its mailed circulation is limited to copies mailed to members who pay, either as a part of their dues or assessments or otherwise, at least 50% of the subscription price regularly charged to other members; to other actual subscribers; to exchanges; and to 10% of such circulation as sample copies. When members pay for their subscriptions as a part of their dues or assessments, individual subscriptions or receipts are not required. [E212.2.3]

### **6.3 Publication of State Departments of Agriculture**

#### **6.3.1 Eligibility**

A publication issued by a state department of agriculture that meets the basic standards in 4.0 is eligible for Periodicals mailing privileges if it is published to further only the objectives of the department and contains no advertising.

[E212.3.1]

#### **6.3.2 In County Rates**

For determining the number of copies qualifying for In-County rates, all circulated copies are considered subscriber copies and the total number of such copies is the total paid circulation. [E212.3.2]

### **6.4 Requester Publications**

#### **6.4.1 Basic Standards**

A publication, whether circulated free or to subscribers, may be authorized to be mailed at the Outside-County Periodicals rates if it meets the basic standards in 4.0 and:

- a. Each issue contains at least 24 pages.
- b. No issue contains more than 75% advertising (as defined in 4.12).
- c. The publication is not owned or controlled by one or more individuals or business concerns and conducted as an auxiliary to and essentially for the advancement of the main business or calling of those who own or control the publication. [E212.4.1]

#### **6.4.2 Circulation Standards**

Requester publications must meet these circulation standards:

- a. The publication must have a legitimate list of persons who have requested the publication, and 50% or more of the copies must be distributed to persons who have made such requests.
- b. Subscription copies of the publication that are paid for or promised to be paid for, including those at or below a nominal rate, may be included in the determination of whether the 50% request requirement is met.
- c. Persons are not deemed to have requested the publication if their request is induced by a premium offer or by receipt of material consideration.
- d. Records of requests for a publication obtained with subscriptions or requests for one or more other publications must be kept so that individual subscriptions or requests for each publication, by title, can be verified.

## 707.6.5

- e. Requests that are more than 3 years old cannot be considered valid requests. Copies addressed using an alternative address format are not considered requested copies, and persons are not considered to have requested the publication if their copies are addressed in that manner.
- f. When a requester publication is issued by a membership organization, the organization may adopt a resolution specifying that each member receive a copy of each issue of the publication. *For example: "Resolved: That a copy of [publication title] shall be sent to each member of [organization name]."* Records must be kept to show that the publication is sent to organization members. Form 3500 must be accompanied by a certified copy of the resolution adopted and the written assurance of a responsible official that the required records are kept. [E212.4.2]

**6.5 Foreign Publications****6.5.1 General Character**

Foreign newspapers and other periodicals that meet the basic standards in 4.0 and have the same general character as domestic publications entered as Periodicals may be granted Periodicals mailing privileges. [E212.5.1]

**6.5.2 Known Office**

The known office of publication may be the office of the publisher's agent. [E212.5.2]

**6.5.3 Rates**

Foreign publications eligible for Periodicals mailing privileges are subject to the same Periodicals rates as domestic (U.S.) publications. [E212.5.3]

**6.5.4 Circulation**

Review of applications is based only on U.S. circulation. [E212.5.4]

**6.5.5 Copyright**

This standard does not authorize the mailing of a publication that violates a copyright granted by the United States. [E212.5.5]

**6.6 News Agent Registry****6.6.1 Definition**

The term *news agent* means a person or concern selling two or more Periodicals publications published by more than one publisher. [E212.6.1]

**6.6.2 Authorization**

A news agent must be authorized by the USPS before the agent may mail Periodicals publications at Periodicals rates. [E212.6.2]

**6.6.3 Remailing**

A news agent may not remove bundles of copies from a post office, write an address on each copy, and return them to the office for dispatch or delivery without paying additional postage. [E212.6.3]

**6.6.4 Unsold Copies**

Unsold copies returned to the publishers or other news agents, or copies sent to other news agents for purposes other than sale, or sent to persons not having subscriptions with news agents, are subject to the Outside-County Periodicals rates. [E212.6.4]

**6.6.5 Parts Returned**

Parts of publications returned to publishers to show that copies have not been sold are subject to the applicable Standard Mail or Package Services rates. [E212.6.5]

**7.0 Standards for Mailing to Nonsubscribers or Nonrequesters****7.1 Sample Copies**

Sample copies are nonsubscriber or nonrequester copies. They may be mailed at the rates and under the applicable standards below and in [10.0, Eligibility Standards for Preferred Periodicals](#). [E215.1.1]

**7.2 Simplified Address**

Nonsubscriber or nonrequester copies may be mailed to boxholders with each copy addressed in the simplified address format if such copies are mailed to each boxholder on a rural route or highway contract route, or to each boxholder at post offices that do not have city carrier service. Copies addressed in this manner may be mailed only to nonsubscribers or nonrequesters. If simplified address mailing results in a subscriber or requester receiving a copy in addition to his or her subscriber or requester copy, the additional copy is considered a nonsubscriber or nonrequester copy. [E215.1.2]

**7.3 Advertising Copies**

Copies paid for by advertisers or others for advertising purposes are nonsubscriber or nonrequester copies. Copies mailed for advertising purposes under arrangements with advertisers or others, and copies mailed by a publisher acting as an agent for an advertiser, are nonsubscriber or nonrequester copies. Those copies are subject to the applicable rates for nonsubscriber or nonrequester copies. [E215.1.3]

**7.4 Gift Subscriptions**

The subscription list may contain the names of persons whose subscriptions were paid by other individuals as gifts; these subscriptions are considered subscriber copies. Subscriptions paid by advertisers or other persons promoting their own interests, and subscriptions given free by the publisher, are *not* gift subscriptions, and are considered nonsubscriber or nonrequester copies subject to the corresponding rates. [E215.1.4]

**7.5 Exchange Copies**

A small part of the subscription list may contain publishers to whom copies are sent in exchange for copies of the recipients' publications. Only one copy may be sent to each publisher. These exchange copies are considered subscriber or requester copies. [E215.1.5]

707.7.6

**7.6 Expired Subscription**

Copies may be mailed at the rates that apply to subscriber copies for 6 months after a subscription has expired if the publisher makes a good-faith attempt to obtain payment or a promise of payment for a renewal during the 6-month period. These copies are *not* considered subscriber copies for determining eligibility for Periodicals mailing privileges, the base for computing the 10% nonsubscriber limits, or whether an issue is a bona fide issue under [8.0, Record Keeping Standards for Publishers](#). [E215.1.6]

**7.7 Complimentary Copies**

All complimentary copies, including copies sent in fulfillment of subscriptions given free by the publisher, are considered nonsubscriber or nonrequester copies subject to the corresponding rates. [E215.1.7]

**7.8 Proof Copies**

One complete copy of each issue may be mailed at the applicable subscriber rates to each advertiser (or representative or agent) in the issue to prove that the advertisements are printed. These copies are considered subscriber or requester copies for Periodicals rates and eligibility. If more than one proof copy in an issue is sent to an advertiser (or representative or agent), the additional copies are considered nonsubscriber or nonrequester copies subject to the corresponding rates. [E215.1.8]

**7.9 Nonsubscriber and Nonrequester Copies****7.9.1 Nonrequester Copies**

For authorized Periodicals requester publications, up to 10% of the total number of copies mailed to requesters during the calendar year may be mailed to nonrequesters at the Outside-County Periodicals rates, provided that those copies would be eligible for Outside-County rates if mailed to requesters, and if the copies are presorted under applicable standards. Nonrequester copies within the 10% limit do not need to be commingled in a mailing with requester copies to be eligible for Outside-County rates. [E215.2.1]

**7.9.2 Nonsubscriber Copies**

For other publications authorized Outside-County rates, up to 10% of the total number of copies mailed to subscribers during the calendar year may be mailed to nonsubscribers at the Outside-County Periodicals rates, provided that those copies would be eligible for Outside-County rates if mailed to subscribers, and if the copies are presorted under applicable standards. Nonsubscriber copies within the 10% limit do not need to be commingled in a mailing with subscriber copies to be eligible for Outside-County rates. [E215.2.2]

**7.9.3 Preferred Rates and the Preferred Rate Discount**

For In-County rates and Nonprofit, Classroom, and Science-of-Agriculture publications, nonsubscriber copies up to 10% of the total number of copies mailed to subscribers during the calendar year may be mailed at the applicable Preferred rates or Preferred rate discount, provided that the nonsubscriber copies would qualify as Preferred rate or Preferred rate discount publications if mailed to subscribers and if the copies are presorted under applicable standards. Nonsubscriber copies mailed over the 10% limit are not eligible for Preferred rates or

the Preferred rate discount. To qualify for Outside-County rates, the nonsubscriber copies over the 10% limit must be part of a presorted commingled mailing (one that includes subscriber copies). Subject to 11.3, nonsubscriber copies may be mailed at In-County rates up to a 10% limit of the total number of subscriber copies of the publication mailed at In-County rates during the calendar year. Once the 10% calendar year limit is exceeded for the number of nonsubscriber copies that may be mailed at Preferred rates or the Preferred rate discount, nonsubscriber copies may not then be mailed at In-County rates even if the 10% limit separately applied to those rates is not exceeded. [E215.2.3]

#### **7.9.4 Publications of Institutions and Societies**

For publications of institutions and societies that are not authorized to contain general advertising, all circulated copies are considered subscriber copies and the total number of such copies is the total paid circulation. [E215.2.4]

#### **7.9.5 Mixed Preferred and Regular Rates**

For publications authorized both Outside-County rates and In-County rates and/or Science-of-Agriculture rates, once the total number of nonsubscriber copies mailed during the calendar year (regardless of rate) exceeds 10% of the total number of copies mailed to subscribers during the calendar year, further mailings of nonsubscriber copies are not eligible for any Preferred rate. Nonsubscriber copies over the 10% allowance must be part of a presorted commingled mailing (i.e., including subscriber copies) to qualify for Outside-County rates. [E215.2.5]

#### **7.9.6 Copies Over 10% Allowance**

Nonsubscriber or nonrequester copies, over 10% of the total number of copies mailed to subscribers or requesters during the calendar year, are eligible for Outside-County rates when they are commingled and presorted with subscriber or requester copies. [E215.2.6]

#### **7.9.7 Excess Noncommingled Mailing**

A mailing is not eligible for Periodicals rates if it consists entirely of nonsubscriber or nonrequester copies over the 10% limit of the total number of copies mailed to subscribers or requesters during the calendar year. These copies are subject to the appropriate Express Mail, First-Class Mail, Standard Mail, or Package Services rate. [E215.2.7]

#### **7.9.8 Mixed Mailing**

If all copies in a mailing are to nonsubscribers or nonrequesters, and some copies are within the 10% limit while the rest are over the 10% limit, the portion exceeding the 10% limit is not eligible for Periodicals rates. That portion is subject to the appropriate Express Mail, First-Class Mail, Standard Mail, or Package Services rate. [E215.2.8]

707.8.1

## 8.0 Record Keeping Standards for Publishers

### 8.1 Basic Standards

#### 8.1.1 Purpose

The publisher must keep records that can support the information required on the application for Periodicals mailing privileges (or any other form) and to confirm eligibility for entry of the publication at the requested Periodicals rate. The records must show that the publication is distributed to a legitimate list of requesters (if applicable) or is not designed primarily for free circulation or circulation at nominal rates. If the publication is authorized to carry general advertising, the publisher must keep a list of legitimate subscribers. A publication of an institution or society that is authorized to carry general advertising may keep a list of subscribers or proof of a resolution to distribute to members, similar to that described in [5.0, Applying for Periodicals Authorization](#). [E216.1.1]

#### 8.1.2 Information Required

Records must be available so that the USPS can determine:

- a. Number of copies printed.
- b. Manner of distribution and disposition of all copies.
- c. Accuracy of the zone distribution on the postage statement.
- d. The existence of a list of legitimate subscribers who have paid more than a nominal subscription price for publications authorized to carry general advertising (other than requester publications).
- e. The existence of a legitimate list of requesters for requester publications.

[E216.1.2]

#### 8.1.3 Retention

The publisher must keep records for each issue of a publication for 3 years from its issue date, except for circulation records for general or requester publications for which USPS verification of circulation is done by a USPS- authorized audit bureau. A publisher whose records are verified by an authorized audit bureau is not required to keep source records of requests and subscriptions longer than required by the audit bureau. [E216.1.3]

#### 8.1.4 Types of Records

These records may be used to meet the standards in [8.1.1](#) and [8.1.2](#):

- a. Print orders and invoices showing the total number of copies printed.
- b. Individual and bulk orders for subscriptions and nonsubscriber copies.
- c. Newsstand and vending machine sales and returns.
- d. Stubs or copies of receipts issued.
- e. Sales records and returns for over-the-counter sales.
- f. Cash books, bank deposit receipts, or similar records.
- g. Records of copies of the publication destroyed. [E216.1.4]

## 8.2 Verification

### 8.2.1 Purpose

A publisher must make records available for USPS review and verification on a periodic basis to evaluate indications of ineligibility for Periodicals entry, to verify that the postage statement shows the correct number of copies mailed to each zone and the correct postage, and to confirm that publications authorized to carry general advertising meet the applicable circulation standards. [E216.2.1]

### 8.2.2 Authorized Verification

USPS employees or an authorized audit bureau may conduct verifications of circulation for an application for Periodicals mailing privileges, reentry application, or other required circulation verification of general or requester publications. [E216.2.2]

### 8.2.3 Independent Audit Bureau

To have an authorized independent audit bureau conduct the audit, the publisher must make that request directly to the bureau and advise the original entry postmaster. The audit bureau coordinates the verification with the original entry postmaster. [E216.2.3]

## 8.3 Statement of Ownership, Management, and Circulation

### 8.3.1 Filing Form 3526

The publisher of each Periodicals publication, including foreign publications accepted at Periodicals rates, must file Form 3526 by October 1 of each year at the original entry post office. [E216.3.1]

### 8.3.2 Content

The information provided on Form 3526 must allow the USPS to determine whether the publication meets the standards for Periodicals mailing privileges. This information includes, as applicable, the identity of the editor, managing editor, publishers, and owners; the owning corporation and its stockholders; any further corporations and stockholders that own at least 1% of the stock of a corporation owning the publication; known bondholders, mortgagees, and other security holders; and the extent and nature of the circulation of the publication, including the number of copies distributed, the methods of distribution, and how much of the circulation is paid in whole or in part. [E213.3.2]

### 8.3.3 Publication

The publisher of each publication authorized Periodicals mailing privileges as a general or requester publication must publish a complete statement of ownership, containing all information required by Form 3526, in an issue of the publication to which that statement relates; other publications are not required to publish this statement. A reproduction of the Form 3526 submitted to the USPS may be used. The required information must appear in an issue whose primary mailed distribution is produced not later than October 10 for publications issued more frequently than weekly, or not later than October 31 for publications issued weekly or less frequently but more frequently than monthly; or in the first issue whose primary mailed distribution is produced after October 1 for all other publications. [E216.3.3]

707.8.3.4

**8.3.4 Noncompliance**

If a publisher does not comply with the filing or publishing standards of 8.3 and, after notice from the postmaster, further fails to comply within 10 days, that publisher's eligibility for Periodicals rates is suspended until compliance occurs.

[E216.3.4]

**8.4 Nonsubscriber/Nonrequester Copy Distribution****8.4.1 Multiple Issues—Same Day**

The USPS may require the publisher to submit Form 3541-C when an issue is regularly published on the same day as another issue of the same publication under the Periodicals authorization of the parent publication. When requested, the publisher must complete Form 3541-C and attach it to the postage statements submitted with the corresponding mailings. [E216.4.1]

**8.4.2 Multiple Issues—Different days**

The USPS may require the publisher to submit Form 3541-E when an issue is regularly published during the same month as another issue of the same publication under the Periodicals authorization of the parent publication. When requested, the publisher must complete Form 3541-E and attach it to the postage statements submitted with the corresponding mailings. [E216.4.2]

**9.0 Changing Title, Frequency, or Known Office of Publication****9.1 General Information****9.1.1 When Required**

Except under 9.1.2, the publisher must file an application for reentry on Form 3510 to change the title, frequency of issue, or location of the known office of publication of an authorized Periodicals publication. [E214.1.1]

**9.1.2 When Not Required**

An application for reentry is not required if the current and requested known offices of publication are served by the same post office; or if only the ownership of the publication is changed, unless that change disqualifies the publication from eligibility under 10.0 for Preferred Periodicals rates or from authorized entry under 6.0 as a publication of an institution or society, as a publication of a state department of agriculture, or as a foreign publication. [E214.1.2]

**9.1.3 Where to File**

To change the title or frequency of issuance of a Periodicals publication, the publisher must submit Form 3510 to the original entry postmaster. To relocate the known office of publication, the publisher must submit Form 3510 to the postmaster with jurisdiction over the requested new location. [E214.1.3]

#### 9.1.4 Accompanying Documentation

A Form 3510 must be accompanied by two copies of the publication that show the new title (if applicable), and that contain a complete identification statement that reflects the changes requested. A proof copy of the amended identification statement is acceptable if the publisher specifies the issue in which it is to be printed. Other documentation may be required:

- a. To change frequency of issuance: Form 3541-C (if the requested frequency of issuance includes more than one regular issue on any day) or Form 3541-E (if the requested frequency of issuance includes more than one regular issue per month, but not on the same day) (see [8.0, Record Keeping Standards for Publishers](#)).
- b. To change known office of publication: A complete distribution plan, including details on the mail volume to be deposited at the new original entry post office, regardless of whether relocation of the original entry post office changes that information. An additional fee (under [29.0, Additional Entry](#)) is not required if distribution changes affect only the original entry post office. [E214.1.4]

#### 9.1.5 Location

The location shown on Form 3510 for the new original entry post office must be a post office. Other postal facilities (e.g., branches, stations, contract offices, processing hubs) are not authorized as original entries. [E214.1.5]

#### 9.1.6 Same County

Reentry may be authorized at a new original entry post office in the same county as an existing additional entry post office. If the publication is eligible for In-County rates, the publisher must give the original entry postmaster a copy of all postage statements claiming those rates to support compliance with the standards for In-County rates. [E214.1.6]

#### 9.1.7 Other Reentry Actions

A Form 3510 filed to relocate the known office of publication must include a separate Form 3510 and the applicable additional fee if changes are made in the publication's distribution plan other than the location of the original entry post office. [E214.1.7]

#### 9.1.8 Filing Date

Publishers wanting to change the title or frequency of issuance of a publication must file Form 3510 by the date on which copies are to be issued with the new title or on the new frequency. [E214.1.8]

#### 9.1.9 Effective Date

To permit adjustment of transportation without penalty to the USPS, the USPS may delay the effective date for a publisher's requested change in the known office of publication if the application was filed fewer than 40 days before that date. [E214.1.9]

#### 9.1.10 Reentry Denial

Reentry may be denied at a post office where resources are not adequate for efficient and economical handling by postal transportation, distribution, and processing systems. [E214.1.10]

707.9.1.11

**9.1.11 Application Fee**

The correct fee must accompany an application for reentry to change a publication's title, frequency of issuance, or known office of publication. The fee is not refundable. No additional fee is required when Form 3500 is required as part of a reentry application. [E214.1.11]

**9.1.12 Multiple Reentry Requests**

A publisher may file a single Form 3510 and pay a single fee to request more than one reentry action under [9.1](#) if all required documentation is submitted with the Form 3510; all required information is given about the distribution plan for mailings at the new original entry post office (if applicable); and the effective dates for the reentry actions do not cover more than 30 calendar days. The publisher must submit a separate Form 3510 (and pay the fee) for each reentry action that cannot meet these conditions. [E214.1.12]

**9.1.13 Other Actions**

A publisher must submit a separate Form 3510 (and pay any required fee) for each reentry action under [27.4, Deposit at AMF](#), [29.0, Additional Entry](#), [10.0, Eligibility Standards for Preferred Periodicals](#), (no fee), or [9.2, Changing Qualification Categories](#). A publisher must file a separate Form 3510 (and pay the applicable fee) if modifications are made to the publication's distribution plan by reentry under [9.1](#) other than the frequency of issuance or the location of the original entry. [E214.1.13]

**9.2 Changing Qualification Categories****9.2.1 When Required**

To change the category under which a publication is authorized Periodicals mailing privileges, the publisher must file an application for reentry on Form 3510 with the original entry postmaster and pay the applicable fee. [E214.2.1]

**9.2.2 When Not Required**

An application for reentry is not required if only the ownership of the publication is changed, unless that change disqualifies the publication for eligibility for Preferred Periodicals rates, or for entry as a publication of an institution or society, as a publication of a state department of agriculture, or as a foreign publication. [E214.2.2]

**9.2.3 Category Changes**

The publisher must submit Form 3500 and Form 3510 to change a publication's authorization category. [E214.2.3]

**9.2.4 Filings and Records**

The publisher must make all filings under [9.2.3](#) to the original entry postmaster. [E214.2.4]

**9.3 Application for Reentry****9.3.1 Pending**

While an application for reentry is pending, copies of an authorized Periodicals publication are accepted for mailing at the Periodicals rates, subject to [9.3.5, Effective Date](#). [E214.3.1]

**9.3.2 Additional Information**

The PCSC manager may ask for more information or evidence from the publisher to complete or clarify an application. Failure to provide such information is sufficient grounds to deny the application. [E214.3.2]

**9.3.3 Proof of Compliance**

The publisher must be able to show to USPS satisfaction that the publication, as reentered, still meets all applicable Periodicals standards. As evidence of continued qualification that must be made available with the application for reentry, circulation records must be available to allow USPS verification that all issues or editions of the publication, as reentered, meet applicable standards. Other documentation, including circulation records for other issues or editions, must be available on request. Failure to provide this evidence is sufficient grounds to deny the reentry request. [E214.3.3]

**9.3.4 Ruling**

The PCSC manager reviews and rules on an application for reentry. [E214.3.4]

**9.3.5 Effective Date**

An entry office may not be used before authorization by the USPS. A publisher may not pay postage at another rate to deposit copies at an unauthorized entry office. Subject to the restrictions in 9.1.7 through 9.1.11, the effective date of a reentry authorization is the application date (if the publication was eligible on that date) or the eligibility date (if the publication became eligible after the application date). The requested effective date for a change in original entry office may be deferred temporarily until transportation or mail processing resources are in place to handle the action requested. If deferral is due to USPS transportation contract limitations, the publisher's requested effective date may be approved with the publisher's agreement to reimburse the USPS for any cost caused by modifying or canceling contracted transportation. [E214.3.5]

**9.3.6 Denial After Verification**

If a verification shows that the publication (as modified by the requested reentry) does not meet applicable Periodicals standards, the PCSC manager denies the reentry application and notifies the publisher in writing of the reasons for the denial. Within 15 days of receipt of such notice, the publisher may either return to the publication status before the application for reentry was submitted or appeal the denial under 9.3.8. If no appeal is filed, the denial takes effect 15 days from the publisher's receipt of the manager's decision. [E214.3.6]

**9.3.7 Denial—No Verification**

If the PCSC manager denies an application not requiring verification, the publisher receives written notice of the reasons for denial. The denial takes effect 15 days from the publisher's receipt of the notice, unless the publisher files an appeal under 9.3.8 within that time. [E214.3.7]

**9.3.8 Appeal**

An appeal must be filed through the PCSC with the manager of Mailing Standards (see 608.8.0 for address). The manager of Mailing Standards may ask the publisher for more information or evidence to clarify the appeal. Failure to provide such information is sufficient grounds to deny the appeal. [E214.3.8]

707.9.3.9

**9.3.9 Mailing During Appeal**

During the appeal:

- a. Copies of any issue of a publication denied reentry under [9.1](#) and found unqualified for Periodicals mailing privileges are accepted in a pending status at the applicable Standard Mail or Package Services rates. For this standard, the pending status begins when the appeal is filed and continues until the end of the appeal process.
- b. Copies of a publication denied reentry under [9.2](#) are accepted at the currently applicable Periodicals rate.
- c. The publisher must submit the applicable Periodicals and Standard Mail or Package Services postage statements with each mailing of the publication in a pending status. Failure to submit these statements is sufficient grounds to deny a postage refund under [9.3.12](#). [E214.3.9]

**9.3.10 Refunds**

If the reentry application is approved on appeal, the publisher receives the difference between the applicable Periodicals postage and the Standard Mail or Package Services postage paid during the pending status if the publisher submits records to substantiate the amount of the refund. If the reentry application is denied on appeal, no refund is made. [E214.3.10]

**9.3.11 Final Decision**

The manager of Mailing Standards (see [608.8.0](#) for address) issues the final agency decision on appeals under [9.1](#). [E214.3.11]

**9.3.12 Denial**

If the manager denies an appeal under [9.2](#), *Changing Qualification Categories*, it is effective 15 days from the publisher's receipt of the decision unless, during that time, the publisher files an appeal with the USPS Recorder under 39 CFR 954, a copy of which accompanies the decision. [E214.3.12]

## 10.0 Eligibility Standards for Preferred Periodicals

### 10.1 Nonprofit Eligibility—Basic Information

**10.1.1 Authorization**

To be mailed as a Nonprofit Periodical, a publication must be granted Periodicals entry in other than the requester category and a Nonprofit authorization for which eligibility was established under [10.2](#) or [10.3](#). [E270.1.1]

**10.1.2 Other Rates**

Each piece must also meet the standards for rates or discounts claimed. Nonsubscriber copies are subject to [7.0](#). Subject to [28.0](#), the DDU or DSCF piece rate applies to each piece claimed in the pound rate portion at the corresponding rate. [E270.1.2]

**10.1.3 Advertising/ Nonadvertising**

Publications with an advertising percentage of 10% or less are considered 100% nonadvertising for rate purposes. Those publications may use “0” as the advertising percentage when computing the nonadvertising adjustment to be applied to the outside-county piece rate charges. Publications with an advertising percentage exceeding 10% are subject to Outside-County pound rates for the entire advertising portion of the publication. [E270.1.3]

**10.2 Nonprofit Eligibility—Qualified Organizations****10.2.1 Types of Organizations**

A publication issued by and in the interest of one of the types of organizations described in 10.2.3 through 10.2.10 qualifies for the Nonprofit rates if the organization is not organized for profit and none of its net income inures to the benefit of any private stockholder or individual. [E270.2.1]

**10.2.2 Primary Purpose**

The standard of *primary purpose* used in the definitions in 10.2.3 through 10.2.10 requires that the organization be both organized and operated for the primary purpose. Organizations that incidentally engage in qualifying activities do not meet the primary purpose test. [E270.2.2]

**10.2.3 Religious**

A *religious organization* is a nonprofit organization whose primary purpose is to:

- a. Conduct religious worship (e.g., churches, synagogues, temples, or mosques);
- b. Support the religious activities of nonprofit organizations whose primary purpose is to conduct religious worship; or
- c. Further the teaching of particular religious faiths or tenets, including religious instruction and the dissemination of religious information. [E270.2.3]

**10.2.4 Educational**

An *educational organization* is a nonprofit organization whose primary purpose is the instruction or training of individuals for improving or developing their capabilities or the instruction of the public on subjects beneficial to the community. An organization may be educational even though it advocates a particular position or viewpoint, as long as it presents a specifically full and fair exposition of the pertinent facts to permit the formation of an independent opinion or conclusion. Conversely, an organization is not considered educational if its principal function is the mere presentation of unsupported opinion. These are examples of educational organizations:

- a. An organization (e.g., a primary or secondary school, a college, or professional or trade school) that has a regularly scheduled curriculum, a regular faculty, and a regularly enrolled body of students in attendance at a place where educational activities are regularly carried on.
- b. An organization whose activities consist of presenting public discussion groups, forums, panels, lectures, or similar programs, including on radio or television.
- c. An organization that presents a course of instruction by correspondence or on television or radio.

707.10.2.5

- d. Museums, zoos, planetariums, symphony orchestras, and similar organizations. [E270.2.4]

**10.2.5 Scientific**

A *scientific organization* is a nonprofit organization whose primary purpose is to conduct research in the applied, pure, or natural sciences or to disseminate technical information dealing with the applied, pure, or natural sciences. [E270.2.5]

**10.2.6 Philanthropic (Charitable)**

A *philanthropic (charitable) organization* is a nonprofit organization organized and operated to benefit the public. Examples include those that are organized to relieve the poor, distressed, or underprivileged; to advance religion, education, or science; to erect or maintain public buildings, monuments, or works; to lessen the burdens of government; or to promote social welfare for any of the above purposes or to lessen neighborhood tensions, eliminate prejudice and discrimination, defend human and civil rights secured by laws, or combat community deterioration and juvenile delinquency. That an organization organized and operated to relieve indigent persons receives voluntary contributions from those persons does not necessarily make it ineligible for Nonprofit rates as a philanthropic organization. That an organization, in carrying out its primary purpose, advocates social or civic changes or presents ideas on controversial issues to influence public opinion and sentiment to accept its views does not necessarily make it ineligible for Nonprofit rates as a philanthropic organization. [E270.2.6]

**10.2.7 Agricultural**

An *agricultural organization* is a nonprofit organization whose primary purpose is the betterment of the conditions of those engaged in agricultural pursuits, improvement of the grade of their products, and the development of a higher degree of efficiency in agriculture; or the collection and dissemination of information or materials about agriculture. The organization may further and advance agricultural interests through educational activities; by holding agricultural fairs; by collecting and disseminating information about cultivation of the soil and its fruits or the harvesting of marine resources; by rearing, feeding, and managing livestock, poultry, bees, etc.; or by other activities related to agricultural interests. [E270.2.7]

**10.2.8 Labor**

A *labor organization* is a nonprofit organization whose primary purpose is the betterment of the conditions of workers. Labor organizations include, but are not limited to, organizations in which employees or workers participate, whose primary purpose is to deal with employers about grievances, labor disputes, wages, hours of employment, working conditions, etc. (e.g., labor unions and employee associations). [E270.2.8]

**10.2.9 Veterans**

A *veterans' organization* is a nonprofit organization of veterans of the armed services of the United States, or an auxiliary unit or society of, or a trust or foundation for, any such post or organization. [E270.2.9]

**10.2.10 Fraternal**

A *fraternal organization* is a nonprofit organization whose primary purpose is fostering fellowship and mutual benefits among its members. For this standard, a qualified fraternal organization must also be organized under a lodge or chapter system with a representative form of government; must follow a ritualistic format; and must be composed of members who are elected to membership by vote of the members. Qualifying fraternal organizations include the Masons, Knights of Columbus, Elks, and college fraternities or sororities, and may have members of either or both sexes. Fraternal organizations do not include such organizations as business leagues, professional associations, civic associations, or social clubs.

[E270.2.10]

**10.3 Nonprofit Eligibility—Other Qualified Organizations****10.3.1 Basic Eligibility**

Subject to 10.3.2, a publication (other than a requester publication) may qualify for the nonprofit rates regardless of the nonprofit status of the publishing organization if it is a:

- a. Publication issued by and in the interest of an association of rural electric cooperatives.
- b. Program announcement or guide published by an educational radio or television agency of a state or political subdivision thereof or by a nonprofit educational radio or television station.
- c. Publication of the official highway or development agency of the state that meets the standards for a general publication in 6.0 and contains no advertising other than the publisher's own advertising.
- d. Conservation publication published by a state agency responsible for management and conservation of the fish or wildlife resources of that state.

[E270.3.1]

**10.3.2 Eligibility Limitation**

Only one publication (other than a requester publication) per qualifying organization may qualify for the Nonprofit rates under 10.3.1c or 10.3.1d. [E270.3.2]

**10.4 Classroom Eligibility****10.4.1 Authorization**

To be mailed at the Classroom Periodicals rates, a publication must be granted Periodicals entry in other than the requester category and a Classroom rate authorization. [E270.4.1]

**10.4.2 Eligibility**

Classroom rates apply only to educational, religious, or scientific publications designed for use in school classrooms or religious instruction classes. [E270.4.2]

**10.4.3 Other Rates**

Each piece must also meet the standards for rates or discounts claimed. Nonsubscriber copies are subject to 7.0. Subject to 28.0, the DDU or DSCF piece rate applies to each piece claimed in the pound rate portion at the corresponding rate. [E270.4.3]

707.10.4.4

**10.4.4 Advertising/Nonadvertising**

Publications with an advertising percentage of 10% or less are considered 100% nonadvertising for rate purposes. Those publications may use “0” as the advertising percentage when computing the nonadvertising adjustment to be applied to the outside-county piece rate charges. Publications with an advertising percentage exceeding 10% are subject to Outside-County pound rates for the entire advertising portion of the publication. [E270.4.4]

**10.5 Application****10.5.1 Procedures**

The Preferred rate discount is available only after USPS authorization. An application or written request for authorization as a Nonprofit or Classroom publication must be filed at the publication’s original entry post office. Application may be made by submitting an application for Periodicals mailing privileges (Form 3500) or by filing for reentry (on Form 3510) after Periodicals mailing privileges are authorized. The applicant must submit evidence to show eligibility under the corresponding standards in 10.0. [E270.5.1]

**10.5.2 Fee**

No fee is required for an application to mail at a special Periodicals rate. [E270.5.2]

**10.6 Mailing While Application Pending****10.6.1 Mailing Before Approval**

A publisher or news agent may not mail at a Periodicals Preferred rate or deduct the Preferred rate discount until the PCSC manager approves the application for such privilege. Until approval is given, postage must be paid at the Outside-County rates (if the publication is authorized), or at the applicable First-Class Mail, Standard Mail, or Package Services rates (if the publication or news agent is in a pending status for Periodicals mailing privileges). [E270.6.1]

**10.6.2 Postage Paid Record**

If postage is paid through an advance deposit account, the USPS keeps a record of deposits and mailings made while the application for special rates is pending. The record is used to compute the difference between either the Outside-County rate postage paid for an authorized Periodicals publication, or the Standard Mail or Package Services postage paid before Periodicals mailing privileges are granted, and the applicable postage at the special rate. No record is kept if postage is paid at First-Class Mail rates or if postage is not paid by advance deposit account. [E270.6.2]

**10.7 Decision on Application****10.7.1 Ruling**

The PCSC manager rules on special rate applications that are filed concurrently with an original entry application. The PCSC manager also rules on requests for special rates made on Form 3510 for publications authorized Periodicals mailing privileges. [E270.7.1]

### **10.7.2 Additional Information**

Before acting on an application, the manager may ask the publisher for more information or evidence to complete or clarify the application. Failure to provide such information is sufficient grounds to deny the application. [E270.7.2]

### **10.7.3 Effective Date**

The authorization takes effect on the application date or the eligibility date, whichever is later. [E270.7.3]

### **10.7.4 Refunds**

Except as noted in [10.7.5](#), when an authorization for special rates is granted, the original entry postmaster refunds to the publisher the difference, if any, between the postage paid at the Outside-County Periodicals rates or deposited at Standard Mail or Package Services rates and the applicable special rates for copies mailed while the application was pending. Refunds are made only for mailings deposited on or after the effective date of the authorization and only if postage was paid by advance deposit account for which the entry post office kept the necessary records. [E270.7.4]

### **10.7.5 No Refund**

No refund is made for:

- a. A denied or withdrawn application.
- b. The period before the effective date of the authorization.
- c. Postage paid at any rate other than the Periodicals rates.
- d. Postage not paid by advance deposit account for which the required record was kept.
- e. Postage at any rate affixed to copies of the publication.
- f. Postage paid at Express Mail or First-Class Mail rates.
- g. Postage on mailings not meeting the applicable standards for special Periodicals rates. [E270.7.5]

### **10.7.6 Denying Application**

If the application to mail at special rates is denied, the PCSC manager notifies the applicant in writing, giving the reasons for the denial. The denial takes effect 15 days from the publisher's receipt of the denial, unless within that time the publisher appeals to the manager of Mailing Standards (see [608.8.0](#) for address). Before taking action, the manager of Mailing Standards may ask the publisher for more information or evidence to support the appeal. Failure to provide such information is sufficient grounds for denying the appeal. The manager of Mailing Standards issues the final agency decision. [E270.7.6]

707.11.1

## 11.0 Basic Rate Eligibility

### 11.1 Outside-County Rates

#### 11.1.1 Description

Outside-County rates apply to copies of an authorized Periodicals publication mailed by a publisher or news agent that are not eligible for In-County rates under [11.3](#). Outside-County rates consist of an addressed per piece charge, a zoned charge for the weight of the advertising portion of the publication, and an unzoned charge for the weight of the nonadvertising portion. [E217.1.1]

#### 11.1.2 Nonrequester and Nonsubscriber Copies

For excess noncommingled mailings under [7.0](#), nonrequester and nonsubscriber copies are not eligible for Periodicals rates unless the publication is authorized under [6.2, \*Publications of Institutions and Societies\*](#), and is not authorized to contain general advertising. Nonrequester and nonsubscriber copies in excess of the 10% allowance under [7.0](#) are subject to Outside-County rates when commingled with requester or subscriber copies, as appropriate. [E217.1.2]

#### 11.1.3 Outside-County Preferred Rate Discount

Periodicals publications qualifying as Nonprofit or Classroom Periodicals receive a 5% discount off the total Outside-County postage, excluding the postage for advertising pounds. Requester publications are not eligible for the Preferred rate discount. Nonsubscriber copies claiming the Preferred rate discount are subject to the standards in [7.0](#). [E217.2.0]

### 11.2 Outside-County Science-of-Agriculture Rates

#### 11.2.1 Authorization

To be mailed at the Science-of-Agriculture Periodicals rates, a publication must be granted Periodicals entry in other than the requester category and granted a Science-of-Agriculture rate authorization. [E217.3.1]

#### 11.2.2 Eligibility

Science-of-Agriculture rates apply to Outside-County copies of authorized Periodicals publications mailed by publishers or news agents when the total copies provided during any 12-month period to subscribers residing in rural areas are at least 70% of the total number of copies distributed by any means for any purpose. [E217.3.2]

#### 11.2.3 Other Rates

All Outside-County rates and discounts apply, except for separate rates for DDU, DSCF, DADC, and zones 1 and 2. Nonsubscriber copies are subject to [7.0](#). Each piece must meet the standards for the rates or discounts claimed. [E217.3.3]

#### 11.2.4 Application Procedures

The Science-of-Agriculture rate is available only after USPS authorization. An application or written request for Science-of-Agriculture rates must be filed at the publication's original entry post office. Application may be made by submitting an application for Periodicals mailing privileges (Form 3500) or by filing for reentry (on

Form 3510) after Periodicals mailing privileges are authorized. The applicant must submit evidence to show eligibility under the corresponding standards in 11.0.

[E217.3.4]

### 11.3 In-County Rates

#### 11.3.1 Subscriber Copies

In-County rates apply to subscriber copies of any issue of a Periodicals publication (except a requester publication) when they are entered within the county in which the post office of original entry is located for delivery to addresses within that county, if one of the following is met:

- a. The total paid circulation of such issue is less than 10,000 copies.
- b. The number of paid copies of such issue distributed within the county of publication is more than 50% of the total paid circulation of such issue.

[E217.4.1]

#### 11.3.2 Exceptional Conditions

The standard in 11.3.1 also is applied under any of these exceptional conditions:

- a. If an entry office postmaster directs the publisher to deposit copies of the publication at a postal facility serving that office, those copies are considered as mailed at the entry office for purposes of In-County rates.
- b. A copy addressed to a destination within the county of publication is eligible for In-County rates when the entry post office serving that address is outside the county.
- c. Each Periodicals publication (except a requester publication or commingled nonsubscriber copies above the 10% allowance) having original entry at an incorporated city situated entirely within a county or contiguous to one or more counties in the same state, but politically independent of such county or counties, is considered within a part of the county with which it is principally contiguous. Copies mailed into that county are charged postage at the In-County rates. Where more than one county is involved, the publisher selects the principal county and notifies the postmaster. [E217.4.2]

#### 11.3.3 Nonsubscriber Copies

During a calendar year, the total number of nonsubscriber copies mailed at In-County rates may not exceed 10% of the number of subscriber copies mailed at In-County rates. The number of nonsubscriber copies mailed at In-County rates must be included in the determination of the overall 10% allowance under 7.0.

Effectively, the allowance for nonsubscriber copies mailable at the In-County rates is the 10% allowed under this standard or the *overall* 10% limit under 7.0, whichever occurs first. [E217.4.3]

#### 11.3.4 Other Rates

Each piece also must meet the standards for the rates and discounts claimed. Subject to 28.0, the delivery unit piece rate applies to each piece claimed in the pound rate portion at the delivery unit rate. [E217.4.4]

707.11.4

**11.4 Discounts**

The following discounts are available:

- a. Nonadvertising. The nonadvertising discount applies to the Outside-County piece rate and is computed under [2.0](#).
- b. Destination Entry. Destination entry discounts are available under [28.0](#) for copies entered at specific USPS facilities.
- c. Pallet. Two discounts are available in [1.0](#) for Outside-County rate nonletters (flats and irregular parcels) bundled and placed directly on pallets: a destination entry pallet discount, and a discount for all other pallets. Only one of the two discounts may be claimed. Except for overflow pallets, each pallet must contain a minimum of 250 pounds of addressed pieces. Pieces taken to destination delivery units (DDUs) that cannot accept pallets need meet only the minimum weight requirement. To determine whether a 5-digit delivery facility can handle pallets, refer to the Drop Shipment Product maintained by the National Customer Support Center (NCSC) (see [608.8.0, USPS Contact Information](#)).  
[E217.5.0]

**11.5 Copies Mailed by Public**

The applicable single-piece First-Class Mail, Priority Mail, or Package Services rate is charged on copies of publications mailed by the general public (i.e., other than publishers or registered news agents) and on copies returned to publishers or news agents. [E217.6.0]

**12.0 Presorted Rate Eligibility****12.1 Basic Information****12.1.1 Standards**

The standards for Presorted rates are in addition to the basic standards for Periodicals in [4.0](#) through [9.0](#) and [11.0](#), the standards for other rates or discounts claimed, and the applicable preparation standards in [705.8.0](#), [22.0](#), [23.0](#), [26.0](#) and [705.9.0](#) through [705.13.0](#). Not all combinations of presort level, automation, and destination entry discounts are permitted. [E220.1.1]

**12.1.2 Palletized Mail**

A correctly prepared bundle is the equivalent of a sack when palletized. Individual pieces qualify for the presort level rate appropriate for the palletized bundles in which they are placed, regardless of the destination of the pallet. Eligibility for destination entry or other zoned rates depends on the point of entry. [E220.1.2]

**12.1.3 Address Quality**

All pieces in a Periodicals Presorted rate mailing must bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:

- a. The ZIP Code accuracy standard in [12.3](#).
- b. If an alternative addressing format is used, the additional standards in [602.3.0](#).  
[E220.1.3]

**12.1.4 Barcodes**

Any POSTNET barcode on a mailpiece in a Presorted Periodicals mailing must be correct for the delivery address and meet the standards in [708.4.0](#) and [708.3.0](#).

[E220.1.4]

**12.1.5 Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in [708.1.0](#). Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by rate, by zone (including separation by In-County and Outside-County rates), and by entry discount (e.g., DDU and DSCF).

[E220.1.5]

**12.2****Rates****12.2.1 5-Digit Rates**

Five-digit rates apply to:

- a. Letter-size pieces in 5-digit bundles of six or more pieces each, placed in 5-digit trays.
- b. Nonletter-size pieces in 5-digit scheme ([L007](#)) bundles and 5-digit bundles of six or more addressed pieces each, placed in applicable merged 5-digit scheme ([L001](#)) sacks, merged 5-digit sacks, 5-digit scheme ([L001](#)) sacks, or 5-digit sacks, or palletized under [705.8.0](#) or [705.10.0](#), [705.12.0](#), or [705.13.0](#).

[E220.2.1]

**12.2.2 3-Digit Rates**

Three-digit rates apply to:

- a. Letter-size pieces in 5-digit and 3-digit bundles of six or more pieces each, placed in 3-digit trays.
- b. Nonletter-size pieces in 5-digit scheme ([L007](#)), 5-digit, 3-digit scheme ([L008](#)) and 3-digit bundles of six or more addressed pieces each, placed in 3-digit sacks; or 3-digit scheme, and 3-digit bundles of six or more addressed pieces each, prepared under [705.8.0](#) or [705.10.0](#), [705.12.0](#), or [705.13.0](#). [E220.2.2]

**12.2.3 Basic Rates**

Basic rates apply to pieces that are not eligible for and claimed at 5-digit or 3-digit rates. [E220.2.3]

**12.3****ZIP Code Accuracy****12.3.1 Basic Standards**

The ZIP Code accuracy standard is a means of ensuring that the 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific 5-digit ZIP Code. Addresses used on pieces claiming certain rates that are subject to the ZIP Code accuracy standard must meet these requirements:

## 707.12.3.2

- a. Each address and associated 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in [12.3.2](#).
- b. Each individual address in the mailing is subject to the ZIP Code accuracy standard.
- c. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate. [A030.2.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Periodicals Presorted rates, regardless of any required surcharge, must meet the ZIP Code accuracy standard. [A030.2.2 and A030]

**12.3.2 USPS-Approved Methods**

The following methods are authorized for meeting the ZIP Code accuracy standard:

- a. For computerized lists, Coding Accuracy Support System (CASS)-certified address matching software and current USPS City State Product, within a mailer's computer systems or through an authorized service provider.
- b. For manually maintained lists or small computerized lists, options include the following:
  1. Current USPS Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.
  2. Surveys of addressees on mailer's address list inquiring about the accuracy of ZIP Code information.
  3. Any mailing list service in [507.6.0](#).
  4. An authorized service provider.
  5. CASS-certified matching software.
  6. USPS Web site [www.usps.com](http://www.usps.com). [A030.2.4]

**12.3.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the ZIP Code accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.2.5]

## 13.0 Carrier Route Rate Eligibility

### 13.1 Basic Information

#### 13.1.1 Standards

The standards for carrier route rates are in addition to the basic standards for Periodicals in [4.0](#) through [9.0](#) and [11.0](#), the standards for other rates or discounts claimed, and the applicable preparation standards in [705.8.0](#), [22.0](#), [23.0](#), [26.0](#) and [705.9.0](#) through [705.13.0](#). Not all combinations of presort level, automation, and destination entry discounts are permitted. [E230.1.1]

**13.1.2 Palletized Mail**

A correctly prepared bundle is the equivalent of a sack when palletized. Individual pieces qualify for the presort level rate appropriate for the palletized bundles in which they are placed, regardless of the destination of the pallet. Eligibility for destination entry or other zoned rates depends on the point of entry. [E230.1.2]

**13.1.3 Address Quality**

All pieces in a Periodicals carrier route rate mailing must bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets these address quality standards:

- a. The carrier route accuracy standard in [13.4](#).
- b. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- c. If flat-size pieces are prepared with detached address labels, the additional standards in [602.4.0](#). [E230.1.3]

**13.1.4 Carrier Route Sequencing**

All pieces in a carrier route rate mailing must also meet the applicable sequencing requirements in [13.2.2](#), [13.3](#), and [23.7](#). [E230.1.4]

**13.1.5 Barcodes**

Any POSTNET barcode on a mailpiece in a nonautomation Periodicals mailing must be correct for the delivery address and meet the standards in [708.4.0](#) and [708.3.0](#). [E230.1.5]

**13.1.6 Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in [708.1.0](#). Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by rate, by zone (including separation by In-County and Outside-County rates), and by entry discount (e.g., DDU and DSCF). Documentation of sequencing and of density standards under [23.7](#) must be submitted with each mailing. [E230.1.6]

**13.2 Sortation****13.2.1 Sequencing**

Preparation to qualify eligible pieces for carrier route rates is optional and need not be performed for all carrier routes in a 5-digit area. Carrier route rates apply to copies that are prepared in carrier route bundles of six or more addressed pieces each subject to these standards:

- a. *Letter-size mailings.* Carrier route rates apply to carrier route bundles that are sorted into carrier route, 5-digit carrier routes, or 3-digit carrier routes trays under [23.0](#). Trays may be palletized under [705.8.0](#).
- b. *Nonletter-size mailings.* Carrier route rates apply to carrier route bundles that are sorted onto pallets prepared under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#), as appropriate, or prepared in carrier route, 5-digit scheme (L001) carrier routes, or 5-digit carrier routes sacks under [23.0](#). Sacks may be palletized under [705.8.0](#). [E230.2.1]

707.13.2.2

**13.2.2 Sequencing Requirements**

Carrier route mail must be prepared in delivery sequence as follows:

- a. Basic carrier route rate mail must be prepared either in carrier walk sequence or in line-of-travel (LOT) sequence according to LOT schemes prescribed by the USPS (23.7).
- b. The high density and saturation rates apply to pieces that are eligible for carrier route rates under 13.2.1, are prepared in carrier walk sequence, and meet the applicable density standards in 13.3 for the rate claimed. [E230.2.2]

**13.3 Walk-Sequence Discounts****13.3.1 Eligibility**

The high density or saturation rates apply to each walk-sequenced piece in a carrier route mailing, eligible under 13.2.1 and prepared under 705.8.0, 23.0, or (nonletter-size mail only) 705.10.0, 705.12.0, or 705.13.0, that also meets the corresponding addressing and density standards in 13.3.4. High density and saturation rate mailings must be prepared in carrier walk sequence according to schemes prescribed by the USPS (see 23.7). [E230.3.1]

**13.3.2 Copies at Other Rates**

A mailing that includes copies claimed at a walk-sequence rate may include other copies claimed at other presort rates. When presented to the USPS, the trays or sacks containing the walk-sequence rate copies must be separated from other trays or sacks. Any effective separation method may be used. [E230.3.2]

**13.3.3 Addressing Standards**

Walk-sequence mail must meet these addressing standards:

- a. Each addressed piece must bear a complete delivery address or an alternative format address, subject to the applicable standards.
- b. Official matter, whether mailed under congressional frank or by certain government entities for delivery on a city route, may use the appropriate simplified address format described in 23.7. [E230.3.3]

**13.3.4 Density Standards**

Walk-sequence rate mailings are subject to these density standards:

- a. Once the minimum volume per carrier route is met, there is no further minimum volume for the 5-digit ZIP Code delivery area. Walk-sequence rate mail need not be sent to all carrier routes within a 5-digit delivery area.
- b. Except under 13.3.4c, at least 125 walk-sequenced addressed pieces must be prepared for each carrier route receiving mail claimed at the high density rate. Mail for carrier routes of 124 or fewer possible deliveries can qualify for the high density rate if there are at least 125 addressed pieces for the route or if pieces are addressed to every possible delivery on the route. This mail may also qualify for the saturation rate, subject to 13.3.4e. In-County rate pieces may also qualify for high density rates under 13.3.4c.
- c. Mail may qualify for In-County high density rates when there are addressed pieces for a minimum of 25% of the total active possible deliveries on a carrier route. If a route contains addresses both within and outside the county, the

number of pieces addressed to the entire carrier route will be used to determine if the 25% requirement has been met. However, for such carrier routes meeting the 25% requirement, only the pieces for that carrier route that are addressed to addresses within the county in which the original entry is located may qualify for the In-County high density rates.

- d. Pieces eligible for and claimed at the saturation rate must be addressed to either 90% or more of the active residential addresses or 75% or more of the total number of active possible delivery addresses, whichever is less, on each carrier route receiving saturation rate mail, except that mail addressed in the simplified address format must meet the coverage standards in [602., 3.0 Use of Alternative Addressing](#).
- e. More than one addressed piece per delivery address may be included in a high density rate mailing and may be counted for the density standard in [13.3.4b](#) for the high density rate. Only one piece per delivery address may be counted toward the density standards for high density in [13.3.4c](#) and for the saturation rate in [13.3.4d](#). [E230.3.4]

## 13.4 Carrier Route Eligibility

### 13.4.1 Basic Standards

The carrier route accuracy standard is a means of ensuring that the carrier route code correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific carrier route code. Addresses used on pieces claiming certain rates that are subject to the carrier route accuracy standard must meet these requirements:

- a. Each address and associated carrier route code used on the mailpieces in a mailing must be updated within 90 days before the mailing date with one of the USPS-approved methods in [13.4.2](#).
- b. Each individual address in the mailing is subject to the carrier route accuracy standard.
- c. If the carrier route code (and accuracy) of an address used on a mailpiece in a carrier route mailing at one class of mail and rate is updated with an approved method, the same address may be used during the following 90 days to meet the carrier route accuracy standard required for mailing at any other class of mail and rate. [A030.3.1]
- d. Except for mail bearing a simplified address, addresses used on pieces claiming Periodicals carrier route rates, regardless of any required surcharge, must meet the carrier route accuracy standard. [A030.3.2]

### 13.4.2 USPS-Approved Methods

Carrier route coding must be performed using CASS-certified software and the current USPS Carrier Route Product or another Address Information System (AIS) product containing carrier route information subject to [509.1.0](#) and [708.3.0](#). Printed Carrier Route Files (schemes) may be used only for Periodicals carrier route mail and for Standard Mail Enhanced Carrier Route flat-size mail at basic, high density, and saturation rates. [A030.3.4]

707.13.4.3

**13.4.3 Mailer Certification**

The mailer's signature on the postage statement certifies that the carrier route accuracy standard has been met for each address in the corresponding mailing presented to the USPS. [A030.3.5]

**14.0 Automation Rate Eligibility****14.1 Basic Standards****14.1.1 All Pieces**

All pieces in a Periodicals automation rate mailing must:

- a. Meet the basic standards for Periodicals in [4.0](#) and for the category of authorization in [6.0](#).
- b. Be in the same processing category and meet the physical standards in [201.3.0](#), *Physical Standards for Automation Letters and Cards*, or [301.3.0](#), *Physical Standards for Automation Flats*. (Automation rate mailings may not include firm bundles.)
- c. Bear a delivery address that includes the correct ZIP Code, ZIP+4 code, or numeric equivalent to the delivery point barcode (DPBC) and that meets these address quality standards:
  1. The address matching and coding standards in [14.3](#) and [708.3.0](#).
  2. If an alternative addressing format is used, the additional standards in [602.3.0](#).
- d. Bear an accurate barcode meeting the standards in [708.4.0](#), either a DPBC (if a letter) or a ZIP+4 barcode or DPBC (if a flat), either on the piece or on an insert showing through a barcode window.
- e. Be marked, sorted, and documented as specified in [705.8.0](#) (if palletized), or [24.0](#) (for letters) or [25.0](#) (for flats) or, for nonletter-size mail, [705.9.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#).
- f. Meet the applicable documentation standards in [708.1.0](#) and postage payment standards in [2.0](#), [16.0](#), and [17.0](#). [E240.1.1]

**14.1.2 Enclosed Reply Cards and Envelopes**

All letter-size reply cards and envelopes provided as enclosures in automation rate Periodicals and addressed for return to a domestic delivery address must meet the standards in [201.3.15](#) for enclosed reply cards and envelopes. The mailer's signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. [E240.1.2]

## 14.2 Rate Application

### 14.2.1 5-Digit Rates

5-digit automation rates apply to:

- a. Letters in groups of 150 or more pieces to the same 5-digit or 5-digit scheme placed in a 5-digit or 5-digit scheme tray or trays prepared under [24.0](#). (Preparation to qualify for the 5-digit rate is optional and, if performed, need not be done for all 5-digit or 5-digit scheme destinations.)
- b. Flats in 5-digit bundles and 5-digit scheme bundles of six or more pieces each, prepared under [25.0](#) or [705.8.0](#) through [705.13.0](#). [E240.2.1]

### 14.2.2 3-Digit Rates

3-digit automation rates apply to:

- a. Letters in groups of 150 or more pieces to the same 3-digit or 3-digit scheme placed in a 3-digit/scheme tray or trays under [24.0](#).
- b. Flats in 3-digit scheme, and 3-digit bundles of six or more pieces each, prepared under [25.0](#) or [705.8.0](#) through [705.13.0](#). [E240.2.2]

### 14.2.3 Basic Rates

Basic automation rates apply to:

- a. Letters prepared under [24.0](#) that are not claimed at 5-digit or 3-digit rates.
- b. Flats prepared under [25.0](#) or [705.8.0](#) through [705.13.0](#) that are not claimed at 5-digit or 3-digit rates.
- c. All pieces in any bundle that contains fewer than six pieces. [E240.2.3]

## 14.3 Address Standards for Barcoded Pieces

### 14.3.1 Basic Address Standards for Barcodes

To qualify for automation rates, addresses must be sufficiently complete to enable matching to the current USPS ZIP+4 Product when used with current CASS-certified address matching software. Standardized address elements are not required. Any barcode as defined in [708.4.0](#) that appears on a mailpiece claimed at an automation rate must be the correct barcode for the corresponding delivery address on the piece. [A800.1.1]

### 14.3.2 Numeric ZIP+4

A numeric ZIP+4 code must consist of five digits, a hyphen, and four digits.

[A800.1.2]

### 14.3.3 Numeric DPBC

A numeric equivalent of the delivery point barcode (DPBC) consists of five digits followed by a hyphen and seven digits as specified in [708.4.0](#). The numeric equivalent is formed by adding three digits directly after the ZIP+4 code. [A800.1.3]

### 14.3.4 Firm Name

An address must include a firm name when necessary to obtain a match with the finest level of ZIP+4 code in the USPS ZIP+4 Product. If an address contains a firm name assigned a unique ZIP+4 code in the USPS ZIP+4 Product, the unique ZIP+4 code must be used. If the firm name is not one assigned a unique ZIP+4 code in the

## 707.14.3.5

USPS ZIP+4 Product and the apartment/suite number is included in the address, the ZIP+4 code for the range in which the apartment/suite number appears must be used in that address. If the firm name does not correspond to a firm name that has a unique ZIP+4 code assigned in the USPS ZIP+4 Product and the apartment/suite number is not included in the address, the ZIP+4 code for the building must be used. [A800.2.1]

**14.3.5 Address Elements**

Addresses must include the correct street number, predirectional, street name, suffix, and postdirectional that are input to obtain a match with the current USPS ZIP+4 Product. [A800.2.2]

**14.3.6 Secondary Designator**

If a secondary address designator (e.g., an apartment number) is shown in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that secondary address as contained in the current USPS ZIP+4 Product. If a secondary address designator is required to obtain an exact match with the finest level of ZIP+4 code in the USPS ZIP+4 Product but the information is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the building must be used. [A800.2.3]

**14.3.7 Rural and Highway Contract Routes**

If a rural route or highway contract route box number is included in the address, the mailpiece must show the appropriate ZIP+4 code representing the range for that box number as contained in the current USPS ZIP+4 Product. If a rural route or highway contract route box number is required to obtain a match with the finest level of ZIP+4 code but is not available, the alternative ZIP+4 code or ZIP+4 or delivery point barcode for the rural route or highway contract route must be used. If used, the rural route or highway contract route box number must be placed on the line immediately above the city/state/ZIP Code line. [A800.2.4]

**14.3.8 Post Office Box**

A post office box address must contain a post office box number that can be exactly matched with the USPS ZIP+4 Product in effect. [A800.2.5]

**15.0 Ride Along Rate Eligibility****15.1 Description**

The standards in 15.0 apply to Standard Mail material paid at the Periodicals Ride-Along rate that is attached to or enclosed with Periodicals mail. All Periodicals subclasses may enclose eligible matter at the Ride-Along rate. [E260.1.1]

**15.2 Basic Standards**

Only one Ride-Along piece may be attached to or enclosed with an individual copy of Periodicals mail. The Ride-Along rate must be paid on each copy in the mailing, not addressed pieces. If more than one Ride-Along piece is attached or enclosed, mailers have the option of paying Standard Mail postage for all the enclosures or attachments, or paying the Ride-Along rate for the first attachment or enclosure and Standard Mail rates for subsequent attachments and enclosures. Ride-Along pieces eligible must be eligible as Standard Mail and must:

- a. Not exceed any dimension of the host publication except when the host publication and the Ride-Along piece are contained in an envelope, polybag, or other complete wrapper.
- b. Not exceed 3.3 ounces and must not exceed the weight of the host publication.
- c. Not obscure the title of the publication or the address label. [E260.1.2]

### 15.3 Physical Characteristics

The host Periodicals piece and the Ride-Along piece must meet the following physical characteristics:

- a. Construction:
  1. Bound publications. If contained within the host publication the Ride-Along piece must be securely affixed to prevent detachment during postal processing. If loose, the Ride-Along piece and publication must be enclosed together in a full wrapper, polybag, or envelope.
  2. Unbound publications. A loose Ride-Along enclosure with an unbound publication must be combined with and inserted within the publication in a manner that prevents detachment during postal processing. If the Ride-Along piece is included outside the unbound publication, the publication and the Ride-Along piece must be enclosed in a full wrapper, polybag, or envelope.
- b. A Periodicals piece (automation and nonautomation) with the addition of a Ride-Along piece must remain uniformly thick and remain in the same processing category as before the addition of the Ride-Along attachment or enclosure.
- c. A Periodicals piece with a Ride-Along that claims automation rates must meet the appropriate automation requirements in [201.3.0, \*Physical Standards for Automation Letters and Cards\*](#), or [301.3.0, \*Physical Standards for Automation Flats\*](#), must maintain the same processing category as before the addition of the Ride-Along attachment or enclosure and, for flat-size mail, must meet the flat sorting machine criteria under [301.3.0](#) (AFSM 100 or UFSM 1000). For example:
  1. If, due to the inclusion of a Ride-Along piece, an AFSM 100- compatible host piece can no longer be processed on the AFSM 100, but must be processed on a UFSM 1000, then that piece must pay either the appropriate Periodicals nonautomation rate plus the Ride-Along rate, or the appropriate Periodicals automation rate for the host piece and the appropriate Standard Mail rate for the attachment or enclosure.
  2. If, due to the inclusion of a Ride-Along piece, a UFSM 1000-compatible host piece can no longer be processed on the UFSM 1000, but must be processed manually, then that piece must pay either the appropriate Periodicals nonautomation rate plus the Ride-Along rate, or the appropriate Periodicals nonautomation rate for the host piece and the appropriate Standard Mail rate for the attachment or enclosure.

707.15.4

3. If, due to the inclusion of a Ride-Along piece, an automation letter host piece can no longer be processed as an automation letter, then that piece must pay the appropriate Periodicals nonautomation rate plus the Ride-Along rate, or the appropriate Periodicals nonautomation rate for the host piece and the appropriate Standard Mail rate for the attachment or enclosure. [E260.1.3]

**15.4 Marking**

The marking "Ride-Along Enclosed" must be placed on or in the host publication if it contains an enclosure or attachment paid at the Ride-Along rate. If placed on the outer wrapper, polybag, envelope, label carrier, or cover of the host publication, the marking must be set in type no smaller than any used in the required "POSTMASTER: Send change of address..." statement. If placed in the identification statement, the marking must meet the applicable standards. The marking must not be on or in copies not accompanied by a Ride-Along attachment or enclosure. [E260.1.4]

**16.0 Basic Standards for Postage Payment Methods****16.1 Filing a Copy of Each Issue**

The publisher must file a copy of each issue with the postmaster of the original entry office. [P200.1.1]

**16.2 Filing Marked Copy**

The publisher must file a copy of each edition of each issue marked by the publisher so the advertising content may be verified when necessary. This marked copy must be filed either with the postmaster of the original entry office or the postmaster of the additional entry office where the publication is produced or prepared for mailing. On the first page of each marked copy, the publisher must show the total units and percentage of space devoted to advertising and nonadvertising in the copy. Advertising matter printed on envelopes, wrappers, and the back of detached address cards must be included in the measurement of the advertising space. The computed percentage of advertising must be rounded off to two decimal places, if necessary, as shown in 2.0. Mailers are not required to submit marked copies if they are certified by the USPS to use the Periodicals Accuracy, Grading, and Evaluation (PAGE) Program. [P200.1.2]

**16.3 Responsibility**

The mailer is responsible for proper payment of postage. Postage must be fully prepaid before Periodicals mailings are dispatched. The publisher must ensure that all information on postage statements is correct and that all copies qualify for the rates claimed. [P200.1.3]

**16.4 Available Payment Method Options**

Payment for Periodicals must be by advance deposit account at the original or additional entry post office, except under procedures in 16.5 for Centralized Postage Payment (CPP) or in 705.15.2.4. Postage for Periodicals may not be paid

with permit imprint, meter stamp, postage stamp, or precanceled stamps. Postage for enclosed First-Class Mail and Standard Mail matter must be paid under [703.9.8](#) through [703.9.12](#) and [705.16.1](#). [P200.1.4]

### **16.5 Centralized Postage Payment (CPP) System**

Subject to specific standards and authorization by the Pricing and Classification Service Center (PCSC), the Centralized Postage Payment (CPP) System allows the publisher of a Periodicals publication to pay Periodicals postage for that publication at the PCSC instead of at each authorized additional entry office. An additional entry is required at each post office where copies of the Periodicals publication are presented for postal verification under [29.0](#). [P200.3.0]

### **16.6 Periodicals Accuracy, Grading, and Evaluation (PAGE) Program**

#### **16.6.1 Basic Information**

The Periodicals Accuracy, Grading, and Evaluation (PAGE) Program is a process to evaluate publishing and print planning (PPP) software and to determine its accuracy in computing per-copy weights and calculating advertising percentages for Periodicals. Certification of PAGE software is available only to those companies that develop or write PPP software. PAGE certification does not guarantee acceptance of the publisher's per-copy weights and advertising percentages prepared with PAGE-certified software. [P200.4.1]

#### **16.6.2 Process**

The PAGE Program evaluates and tests PPP software. In addition, the PAGE Program tests and qualifies publishing personnel to submit data to the USPS using PAGE-certified PPP software. The Postal Service National Customer Support Center (NCSC) in Memphis, TN, is the USPS location for certifying developer's software and publisher's employees to use certified PPP software to submit Periodicals mailings. The PAGE Program involves the following three elements:

- a. Stage I, Product Certification for Software Developers. NCSC evaluates the accuracy of the calculations of PPP software by processing a test publication file either at the NCSC or at the developer's location (on-site visit).
- b. Stage II, User certification for PPP software. NCSC provides test bundles to the users and evaluates the results.
- c. Stage III, PAGE Program authorization. Publishers who want to use PAGE-certified software and PAGE-certified users to submit per-copy weight and calculated advertising percentages must apply for authorization to the manager, PCSC. [P200.4.2]

#### **16.6.3 Participation**

For information about charges and the PAGE Program, publishers may request a technical guide (including order forms) from the NCSC (see [608.8.0](#) for address). Additional information is also available from the PCSC (see [608.8.0](#) for address). [P200.4.3]

707.17.1

## 17.0 Documentation Standards

### 17.1 **Completing Postage Statements**

Any mailing claiming a discount and all permit imprint mailings must be accompanied by a postage statement completed and signed by the mailer (in duplicate if the mailer wants a receipted copy). The mailer may submit a computer-generated facsimile. A change made to any postage statement requires the mailer (agent) to correct the postage statement accordingly and document the correction. [P012.4.2]

### 17.2 **Postage Statement and Documentation**

A complete postage statement must accompany each mailing. The postage statement must be supported by documentation (see 708.1.0) unless each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by rate, by zone (including separation by In-County and Outside-County rates), and by entry discount (i.e., DDU, DSCF, and DADC). Additional documentation must be submitted if required by the standards for the rate or discount claimed. Subject to 17.5, the entry office postmaster, on request, may authorize the publisher of a publication regularly printed on sheets of uniform weight to provide one postage statement after each calendar month for mailings made during that month. [P200.1.5]

### 17.3 **Purpose and Basic Standards of Documentation**

#### 17.3.1 **Basic Documentation Standards**

Documentation describes the preparation and rate levels of the mailing, details the volume and postage data, substantiates the rate or discount eligibility, reports the result of a process (i.e., presort or barcoding), and, by comparison with the actual mailing it describes, supports the claims contained on the postage statement accompanying the mailing and allows the USPS to verify its accuracy. Documentation must be submitted when specified for the rate claimed or postage payment method used. [P012.1.1]

#### 17.3.2 **Standard Format for Documentation**

Periodicals documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in 708.1.0, as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

#### 17.3.3 **Preparing Documentation**

As provided by standard, documentation may be presented in abbreviated form or on computer-readable media. Required documentation must be presented with every mailing unless, by standard, it may be provided to support multiple mailings or mailings that are part of the same job or cycle. [P012.1.2]

**17.3.4 Multiple Standards**

If multiple documentation standards apply to the same mailing, only one set of documentation is necessary if it provides enough information to meet all applicable standards. Redundant or duplicate documentation is not required simply to meet individual standards. [P012.1.3]

**17.3.5 Providing Additional Information**

The postmaster of the office of mailing may require additional information if the documentation submitted does not allow the corresponding mailing to be verified. Failure to provide information is sufficient reason for the USPS to refuse a mailing. The mailer may appeal any determination to the PCSC under 607.2.0. [P012.1.5]

**17.4 Postage Statements Standards for All Periodicals****17.4.1 Documentation for All Periodicals**

Each Periodicals mailing must be accompanied by a postage statement using the correct USPS form or an approved facsimile. Supporting documentation may be required under 8.0 or, for specific rates, under 10.0, 12.0 through 15.0, and 28.0. [E211.12.0]

**17.4.2 Reporting Multiple Mailings on One Statement**

Each group of pieces prepared as a separate mailing must be presented with a postage statement using the correct USPS form for the particular class, rate, and postage payment method. A mailer may report more than one mailing from a single job (e.g., a carrier route rate mailing, an automation rate mailing, and a nonautomation rate mailing) on the same postage statement if the mailings are presented at the same time for verification, the pieces are in the same processing category, each mailing separately meets all applicable eligibility standards, and the number of pieces in each mailing is separately reported on the postage statement. [P012.4.1]

**17.4.3 Facsimile Postage Statements**

Facsimile postage statements must contain data and elements in locations as close as possible to where they appear on the USPS form. Data fields that do not pertain to information and rates claimed in the mailing and other extraneous information that appears on the USPS form do not have to be included. Facsimiles must include all other information pertaining to the mailing, including the class of mail (or subclass as appropriate), postage payment method (e.g., permit imprint), and four-digit form number (hyphen and suffix, optional). All parts, and line numbers within each part, must reflect those on the USPS form(s). In some cases, this can include fields from multiple USPS forms onto a single facsimile. Most importantly, the facsimile must fully and exactly reproduce the "Certification" and "USPS Use Only" fields that appear on the USPS form. A facsimile postage statement produced by software certified by the USPS Presort Accuracy Validation and Evaluation (PAVE) or Manifest Analysis and Certification (MAC) program is considered a USPS-approved form for these standards. Others may be approved by the entry office postmaster. Periodicals mailers authorized centralized postage payment (CPP) procedures receive approval from the PCSC. [P012.4.3]

## 707.17.4.4

**17.4.4 Advertising Percentage**

At least once a year, the USPS verifies the advertising percentage reported on the corresponding postage statement by measuring the advertising and nonadvertising portions of one issue. [P200.1.6]

**17.4.5 Measuring Advertising**

The total advertising and nonadvertising portions may be determined by column inches, square inches, pages, or by another recognized unit of measure if the same unit of measure is used for both portions. One full page of advertising must equal one full page of nonadvertising regardless of the amount of blank space between each advertisement or nonadvertising article on a page. If measured in column inches, nonadvertising inches are determined by subtracting the total measured advertising inches from the total column inches of the publication. A blank page, portion of a page, or blank border or margin is counted as advertising if consideration was received for the whole page, the blank portion, or the blank border or margin. The border of a page is otherwise considered neither advertising nor nonadvertising and is not measured, but it is included in the total weight of the publication for purposes of postage calculation. When measuring nonrectangular sheets, the measurement is based on the smallest rectangle that could contain the irregular sheet; exact measurement is not attempted. When two or more sheets are permanently glued together to form a single sheet, the surface area of the resulting sheet (front and back) is included when measuring the advertising or nonadvertising portion. [P200.1.7]

**17.4.6 Waiving Nonadvertising Rates**

Instead of marking a copy of each issue to show the advertising and nonadvertising portions, the publisher may pay postage at the advertising zoned rates on both portions of all issues or editions of a Periodicals publication (except a requester publication). *This option is not available if the rate for advertising is lower than the rate for nonadvertising.* When the amount of advertising exceeds 75%, the copies provided to the postmaster must be marked "Advertising over 75%." When the amount of advertising is 75% or less, the copies provided to the postmaster must be marked "Advertising not over 75%" on the first page. The entire weight of the copy must be entered on the postage statement in the column provided for the advertising portion. The words "Over 75%" or "Not over 75%" must be annotated on the postage statement and the word "Waived" must be written in the space provided for the weight of the nonadvertising portion. [P200.1.8]

**17.4.7 Copies of Previous Issues**

When a reasonable number of copies of previous issues are included in a mailing of a current issue, those issues may be accepted and charged with postage by the percentages of advertising and nonadvertising material in the current issue. The issue forming the bulk of the mailing is regarded as the current issue. The advertising and nonadvertising percentages for the current issue are based on the edition forming the bulk of the current issue. [P200.1.9]

**17.4.8 Mailing While Application Pending**

A publisher mailing under an advance deposit account while a Periodicals application is pending must submit with each mailing both a Periodicals postage statement (annotated with the words “Pending Application”) and a Standard Mail or Package Services postage statement. [P200.1.10]

**17.4.9 Sequenced Postage Statement Number**

A mailer who provides more than one postage statement per day must enter a sequenced statement number in the proper block on each postage statement prepared that day. At the mailer’s discretion are the content and length of the number, the cycle of the sequence (beyond 1 day), and the number of concurrently active cycles, if the same series of numbers is not active in two cycles at the same time. If the same mailing of one edition of one issue includes copies reported on two postage statements (e.g., when additional postage is paid for nonsubscriber/nonrequester copies over the 10% limit), the sequenced statement number of the second form must be included with the other information required on the primary postage statement reporting the total postage for the mailing.

[P200.1.11]

**17.4.10 Official Mail**

Official (penalty) Periodicals matter is also subject to the standards in [703.7.0](#), which supersede conflicting standards below. [P200.1.12]

**17.4.11 News Agent’s Statement**

A news agent presenting Periodicals matter subject to the zone rates of postage must provide a statement showing the percentages of such matter devoted to advertising and nonadvertising. [P200.1.13]

**17.5 Monthly Postage Statements****17.5.1 Conditions**

The postmaster may authorize a publisher to submit Form 3541-M after the month for all issues mailed during that month, if all issues are printed on sheets of the same weight. If authorized, the publisher must provide Form 3541-M no more than 72 hours after the first mailing of the last issue mailed each month. [P200.2.1]

**17.5.2 Measurement of Advertising**

The total advertising and nonadvertising portions may be expressed in column inches, square inches, pages, or by any other recognized unit of measure. The same unit of measure must be used for the advertising and nonadvertising portions. When measuring nonrectangular sheets, base the measurement on the smallest rectangle that could contain the irregular sheet. No attempt is made to determine the exact area of the irregular shape. When two or more sheets or parts thereof are glued together, the surface area of each sheet (front and back) is counted when measuring the advertising or nonadvertising portion for determining postage. [P200.2.2]

**17.5.3 Determining Combined Weight**

The combined weight of one copy from each issue mailed during a calendar month is obtained as follows:

- a. Determine the weight of one copy as described in [2.0](#).

## 707.17.6

- b. Determine the weight of one sheet by dividing the average weight of one copy by the number of sheets (not pages) in the copy. Express the result in decimal pounds rounded off to four decimal places.
- c. Select one copy of each of the issues mailed during the month; count the sheets (not pages) in each; add these figures to determine the total number of sheets.
- d. Multiply the total number of sheets by the weight of one sheet; do not round the product. [P200.2.3]

**17.6 Detailed Zone Listing For Periodicals****17.6.1 Definition and Retention**

The publisher must be able to present documentation to support the actual number of copies of each edition of an issue, by entry point, mailed to each zone, at DDU, DSCF, DADC, and In-County rates. This listing is separate from the standardized documentation required under 17.5 to support presort. This listing may be submitted with each mailing, or, as an alternative, a publisher may keep records supporting zone and destination entry information reported on the postage statement for each mailing. Records must be kept for 2 months after the mailing date. A publisher must be able to submit detailed zone listings for specific mailings when requested in advance by the USPS. [P012.3.1]

**17.6.2 Characteristics**

Report the number of copies mailed to each 3-digit ZIP Code area at applicable zone rates using one of the following formats:

- a. Report copies by 3-digit ZIP Code, listed in ascending numeric order, for all ZIP Codes in the mailing. The listing must include the following columns: 3-digit ZIP Code, zone, and number of copies (for the zone). Include a summary of the number of copies at each zone rate at the end of the report. A 3-digit ZIP Code may appear more than once if there are copies at different zone rates for that ZIP Code (e.g., In-County and outside-county rate copies within the same 3-digit ZIP Code area).
- b. Report copies by zone (In-County DDU, In-County others, Outside-County DDU, Outside-County DSCF, and Outside-County DADC) and by 3-digit ZIP Code, listed in ascending numeric order, for each zone. For each zone, the listing must include the following columns: 3-digit ZIP Code and number of copies (for each zone) in the mailing. Include a summary of the total number of copies for each zone at the end of each zone listing. A 3-digit ZIP Code may appear under more than one zone if there are copies at different zone rates for that ZIP Code (e.g., In-County and outside-county rate copies within the same 3-digit ZIP Code area). [P012.3.2]

**17.6.3 Zone Abbreviations**

Use the actual rate name or the authorized zone abbreviation in the listings in [17.5, Monthly Postage Statements](#), and [17.6.2, Characteristics](#):

| ZONE ABBREVIATION                | RATE EQUIVALENT                   |
|----------------------------------|-----------------------------------|
| ICD                              | In-County, DDU                    |
| IC                               | In-County, Others                 |
| DDU                              | Outside-County, DDU               |
| SCF                              | Outside-County, DSCF              |
| ADC                              | Outside-County, DADC              |
| 1-2 or 1/2                       | zones 1 and 2                     |
| 3, 4, 5, 6, 7, 8 (as applicable) | zones 3 through 8 (as applicable) |
| M                                | mixed zones                       |

[P012.3.3]

**17.7 Additional Documentation Standards**

**17.7.1 Presorted Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in [708.1.0](#). Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by rate, by zone (including separation by In-County and Outside-County rates), and by entry discount (e.g., DDU and DSCF).

[E220.1.5]

**17.7.2 Carrier Route Rate Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in [708.1.0](#). Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by rate, by zone (including separation by In-County and Outside-County rates), and by entry discount (e.g., DDU and DSCF). Documentation of sequencing and of density standards under [23.7](#) and [23.8](#) must be submitted with each mailing. [E230.1.6]

**17.7.3 Destination Entry Documentation**

Subject to [708.1.0](#), the mailer must be able to show compliance with eligibility requirements (e.g., by bundle, tray, sack, or pallet), and list the number of addressed pieces by presort level for each 5-digit and 3-digit ZIP Code destination as appropriate for the rates and discounts claimed. Documentation is not required if each addressed piece in the mailing is of identical weight, and are separated by zone, rate, and destination entry (if applicable), when presented for mailing.

[E250.1.2]

707.18.1

## 18.0 General Information for Mail Preparation

### 18.1 Definition of Presort Process

Presort is the process by which a mailer prepares mail so that it is sorted to at least the finest extent required by the standards for the rate claimed. Generally, presort is performed sequentially, from the lowest (finest) level to the highest level, to those destinations specified by standard and is completed at each level before the next level is prepared. Under standards for bundle reallocation for Periodicals flats and irregular parcels and Standard Mail flats on pallets, mail will not necessarily be placed on the lowest (finest) level pallets (bundle reallocation is optional, but, if performed, must be done for the complete mailing job). Not all presort levels are applicable in all situations. [M011.1.1]

### 18.2 Definition of Mailings

Mailings are defined as:

- a. General. A mailing is a group of pieces within the same class of mail and, except for certain parcel rates, the same processing category that may be sorted together and/or presented under a single minimum volume mailing requirement under the applicable standards. Generally, types of mail that follow different flows through the postal processing system (e.g., automation, nonautomation carrier route, and other nonautomation) and mail for each separate class and subclass must be prepared as a separate mailing. Other specific standards may define whether separate mailings may be combined, palletized, reported, or deposited together.
- b. Periodicals. Mail qualifying for the In-County rates may be part of a mailing that includes pieces eligible for the Outside County rates. Mail at carrier route rates, nonautomation Presorted rates, and automation rates must each be sorted as separate mailings. However, each of these mailings may be reported on the same postage statement if the pieces are for the same publication and edition. See [705.8.0](#), [22.0](#), and [23.0](#) for copalletized, combined, or mixed-rate mailings. See [705.9.0](#) through [705.13.0](#) for advanced preparation options for nonletter-size mail. [M011.1.4]

### 18.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

- a. *Firm*: all pieces for delivery at the address shown on the top piece (for nonautomation Periodicals only).
- b. *Carrier route*: all pieces for delivery to the same city route, rural route, highway contract route, post office box section, or general delivery unit.
- c. *5-digit*: the delivery address on all pieces includes the same 5-digit ZIP Code.
- d. *5-digit scheme (trays) for automation letters*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in the USPS City State Product.
- e. *5-digit scheme (bundles and sacks) for AFSM 100-compatible flats*: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Code areas processed by the USPS as a single scheme, as shown in [L007](#).

- f. *5-digit scheme carrier routes (pallets and sacks) for Periodicals flats and irregular parcels:* the ZIP Code in the delivery address on all pieces in carrier route bundles is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- g. *5-digit scheme (pallets) for Periodicals flats and irregular parcels:* the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in [L001](#).
- h. *Merged 5-digit sacks:* the carrier route bundles and/or automation rate 5-digit bundles and/or Presorted rate 5-digit bundles in a sack are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route rate bundles with automation rate 5-digit bundles and Presorted rate 5-digit bundles in the same 5-digit container.
- i. *Merged 5-digit pallets:* the carrier route bundles and/or automation rate 5-digit bundles and/or Presorted rate 5-digit bundles on a pallet are: 1) prepared under [705.10.0](#) and are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product, or 2) prepared under [705.12.0](#) and pieces in 5-digit bundles meet the 5% threshold requirement, or 3) prepared under [705.13.0](#) and pieces are either all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product or are all for a ZIP Code with a “B” or “D” indicator in the City State Product and the pieces in 5-digit bundles meet the 5% threshold requirement.
- j. *Merged 5-digit scheme sack:* the 5-digit ZIP Codes on pieces in carrier route bundles and/or automation rate 5-digit bundles and/or Presorted rate 5-digit bundles in a sack are all for 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#), and the automation rate 5-digit bundles and/or the Presorted rate 5-digit bundles also are for 5-digit ZIP Codes that have an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles with automation rate 5-digit bundles and Presorted rate 5-digit bundles in the same 5-digit container.
- k. *Merged 5-digit scheme pallet:* contains carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or presorted rate 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#).
- l. *5-digit metro pallets for Periodicals flats and irregular parcels:* the 5-digit ZIP Codes on pieces in carrier route, automation rate, and presorted rate bundles are all destined for the same mail processing facility listed in [L006](#).
- m. *3-digit:* the ZIP Code in the delivery address on all pieces begins with the same three digits (see [L002](#), Column A).
- n. *Unique 3-digit:* the ZIP Code in the delivery address on all pieces begins with the same three digits, and that the 3-digit prefix is so identified in [L002](#), Column A.
- o. *3-digit scheme:* the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L003](#).

707.18.4

- p. *3-digit scheme bundles, for AFSM 100-compatible flats*: the ZIP Code in the delivery address begins with one of the 3-digit prefixes processed by the USPS as a single scheme, as shown in [L008](#).
- q. *Origin/optional entry 3-digit(s)*: the ZIP Code in the delivery address on all pieces begins with one of the 3-digit prefixes processed at the sectional center facility (SCF) in whose service area the mail is verified/entered. Subject to standard, a separation is required for each such 3-digit area regardless of the volume of mail.
- r. *SCF*: the separation includes pieces for two or more 3-digit areas served by the same sectional center facility (SCF) (see [L005](#)), *except that*, where required or permitted by standard, mail for a single 3-digit area may be prepared in an SCF separation when no mail for other 3-digit ZIP Code areas is available. For pallets, the SCF sort may include mail for a single 3-digit ZIP Code area.
- s. *Origin/optional entry SCF*: the separation includes bundles for one or more 3-digit areas served by the same sectional center facility (SCF) (see [L002](#), Column C, or [L005](#)) in whose service area the mail is verified/entered. Subject to standard, this separation is required regardless of the volume of mail.
- t. *ADC/AADC*: all pieces are addressed for delivery in the service area of the same area distribution center (ADC) or automated area distribution center (AADC) (see [L004](#) or [L801](#)).
- u. *Mixed [ADC, AADC, etc.]*: the pieces are for delivery in the service area of more than one ADC, AADC, etc.
- v. *Residual pieces/bundles/sacks* contain material remaining after completion of a presort sequence. Residual mail lacks the volume set by standard to require or allow bundle preparation to a particular destination, and usually does not qualify for a presort rate. Residual mail is also referred to as *nonqualifying* or *working* mail. [[M011.1.2](#)]

#### 18.4 Preparation Definition and Instructions

For purposes of preparing mail:

- a. *Pieces* refers to individually addressed mailpieces. This definition also applies when *pieces* is used in eligibility standards. Quantities indicated for optional or required sortations always refer to pieces unless specifically excepted.
- b. A *full* letter tray is one in which faced, upright pieces fill the length of the tray between 75% and 100% full.
- c. A *less-than-full* letter tray is one that contains mail for the same destination regardless of quantity or whether a full tray was previously prepared for that destination. Less-than-full trays may be prepared only if permitted by the standards for the rate claimed.
- d. An *overflow* letter tray is a less-than-full tray that contains all pieces remaining after preparation of full trays for the same destination. Overflow trays may be prepared only if permitted by the standards for the rate claimed.
- e. A *full* sack is defined in the standards for the class and rate claimed.

- f. A *5-digit scheme sort for automation letters* yields 5-digit scheme trays for those 5-digit ZIP Codes identified in the USPS City State Product and 5-digit trays for other areas. Mail prepared using 5-digit scheme sort must be entered no later than 90 days after the release date of the City State Product used to obtain the scheme information (see [708.3.0](#)). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Trays prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is *always* optional, including when 5-digit sortation is required for rate eligibility; need not be used for all 5-digit ZIP Codes that are part of a scheme; and is available only for automation rate letter-size Periodicals and may not be used for mail at other rate.
- g. A *5-digit scheme sort for AFSM 100-compatible flats* yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in [L007](#). Presorting must be performed using [L007](#). Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in [301.3.3](#). The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 5-digit ZIP Code required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. The 5-digit scheme sort is optional, except under [705.12.0](#), [Preparation of Merged Palletization of Bundles of Flats Using a 5% Threshold](#), and [705.13.0](#), [Preparation of Merged Palletization of Bundles of Flats Using the City State Product and a 5% Threshold](#). Mailpieces must be labeled using an optional endorsement line (OEL) under [708.7.0](#). Bundles are placed in appropriate containers using the OEL “label to” 5-digit ZIP Code. Periodicals firm bundles must not be part of a 5-digit scheme bundles.
- h. A *5-digit scheme carrier routes sort for carrier route rate Periodicals flats and irregular parcels (nonletters) prepared in sacks or as bundles on pallets* yields a 5-digit scheme carrier routes sack or pallet for those 5-digit ZIP Codes listed in [L001](#) and 5-digit carrier routes sacks or pallets for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum sack or pallet volume, with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme carrier routes destination that contain carrier route bundles for only one of the schemed 5-digit areas are still considered to be sorted to 5-digit scheme carrier routes and are labeled accordingly. The 5-digit scheme carrier routes sort is required for carrier route bundles of flat-size and irregular parcel Periodicals. Preparation of 5-digit scheme carrier routes sacks or pallets must be done for all 5-digit scheme destinations.
- i. A *5-digit scheme sort for Periodicals flats and irregular parcels (nonletters) prepared as bundles on pallets* yields 5-digit scheme pallets containing automation rate and Presorted rate 5-digit bundles for those 5-digit ZIP Codes listed in [L001](#) and yields 5-digit pallets containing automation rate and Presorted rate 5-digit bundles for other areas. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum

pallet volume, with no further separation by 5-digit ZIP Code required. Pallets prepared for a 5-digit scheme destination that contain 5-digit bundles for only one of the schemed 5-digit areas are still considered to be sorted to the 5-digit scheme and are labeled accordingly. The 5-digit scheme sort is required for flat-size and irregular parcel-size Periodicals. The 5-digit scheme sort may not be used for other mail prepared on pallets. Preparation of 5-digit scheme pallets must be done for all 5-digit scheme destinations.

- j. *A merged 5-digit sort for Periodicals flats and irregular parcels prepared in sacks* yields merged 5-digit sacks that contain carrier route bundles and/or automation rate 5-digit bundles, and/or Presorted rate 5-digit bundles that are all for a 5-digit ZIP Code that has an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles in the same 5-digit sack or pallet. The merged 5-digit sort is optional for Periodicals flats and irregular parcels. Sacks prepared for a merged 5-digit destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only Presorted rate 5-digit bundle(s)) or that contain only two rate levels of bundle(s) are still considered to be merged 5-digit sorted and are labeled accordingly. If preparation of merged 5-digit sacks is performed, it must be done for all 5-digit ZIP Code destinations with an “A” or “C” indicator in the Carrier Route Indicators field in the City State Product that allows combining carrier route bundles, automation rate 5-digit bundles, and Presorted rate 5-digit bundles in the same 5-digit container.
- k. *A merged 5-digit sort for Periodicals flats and irregular parcels prepared as bundles on pallets* yields merged 5-digit pallets that contain carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or presorted rate 5-digit bundles). The merged 5-digit sort is optional for Periodicals flats and irregular parcels and Standard Mail flats prepared in sacks under [705.10.0](#). Sacks or pallets prepared for a merged 5-digit destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only presorted rate 5-digit bundle(s)) or only two rate levels of bundle(s) are still considered to be merged 5-digit sorted and must be labeled accordingly.
- l. *A merged 5-digit scheme sort for Periodicals flats and irregular parcels prepared in sacks* yields merged 5-digit scheme sacks that contain carrier route bundles and noncarrier route 5-digit bundles (automation rate 5-digit bundles and/or presorted rate 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in [L001](#). Sacks prepared for a merged 5-digit scheme destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only presorted rate 5-digit bundle(s)), or only two rate levels of bundle(s), or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme sacks is performed, it must be done for all 5-digit scheme destinations in [L001](#).

- m. *A merged 5-digit scheme sort for Periodicals flats and irregular parcels prepared as bundles on pallets yields merged 5-digit scheme pallets that contain carrier route bundles and noncarrier route 5-digit bundles (automation rate and/or presorted rate 5-digit bundles) for those 5-digit ZIP Codes that are part of a single scheme as shown in L001. Pallets prepared for a merged 5-digit scheme destination that contain only a single rate level of bundle(s) (only carrier route bundle(s) or only automation rate 5-digit bundle(s) or only presorted rate 5-digit bundle(s)), or only two rate levels of bundle(s), or bundles for only one of the schemed 5-digit ZIP Codes are still considered to be merged 5-digit scheme sorted and must be labeled accordingly. If preparation of merged 5-digit scheme pallets is performed, it must be done for all 5-digit scheme destinations in L001.*
- n. *A 5-digit metro sort for Periodicals nonletters (flats and irregular parcels) prepared as bundles on pallets yields 5-digit metro pallets that contain carrier route and/or noncarrier route 5-digit and 3-digit bundles (automation rate and/or presorted bundles) for the 5-digit ZIP Codes listed in L006. The ZIP Codes in L006 are treated as a single presort destination, with no further separation by 5-digit ZIP Code required. The 5-digit metro sort is optional and need not be done for all possible destinations in L006.*
- o. *A 3-digit scheme sort yields 3-digit scheme trays for those 3-digit ZIP Code prefixes listed in L003 and 3-digit trays for other areas. The 3-digit ZIP Code prefixes in each scheme are treated as a single presort destination subject to a single minimum tray volume, with no further separation by 3-digit prefix required. Trays prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit areas are still considered 3-digit scheme sorted and are labeled accordingly. The 3-digit scheme sort is required for automation rate letter-size Periodicals and is not permitted to be used for mail entered at another rate.*
- p. *A 3-digit scheme sort for AFSM 100-compatible flats yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in L008. Presorting may be performed using L008 starting January 6, 2005. The 3-digit scheme sort is optional, except under 705.12.0 and 705.13.0. For 705.12.0 and 705.13.0, presorting must be performed using L008 by April 18, 2005. Pieces prepared in scheme bundles must meet the AFSM 100 compatibility criteria in 301.3.3. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Mailpieces must be labeled using an optional endorsement line (OEL) under 708.7.0. Three-digit scheme bundles are placed in 3-digit through Mixed ADC containers, as applicable, using the OEL "label to" 3-digit ZIP Code. Periodicals firm bundles must not be physically combined within 3-digit scheme bundles, but can contribute toward the six-piece minimum for rate eligibility.*

707.18.4

- q. An *origin 3-digit* (or *origin 3-digit scheme*) tray/sack contains all mail (regardless of quantity) for a 3-digit ZIP Code (or 3-digit scheme) area processed by the SCF in whose service area the mail is verified. If more than one 3-digit (or 3-digit scheme) area is served, as indicated in [L005](#), a separate tray/sack must be prepared for each.
- r. An *origin/optional entry SCF sack* contains all 5-digit and 3-digit bundles (regardless of quantity) for the SCF in whose service area the mail is verified. At the mailer's option, such a sack may be prepared for the SCF area of each entry post office. This presort level applies only to nonletter-size Periodicals prepared in sacks.
- s. The *required at [quantity]* instruction (e.g., "required at 10 pieces") means that the particular unit *must* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles and containers may contain more than the specified *required at* quantity up to the applicable maximum physical size. Subject to applicable rate eligibility standards, smaller quantities may be prepared only if permitted. Where specified by standard, required preparation applies only if the mailer chooses to qualify for the corresponding rate.
- t. The *optional at [quantity]* instruction means that the particular unit *may* be prepared for the corresponding presort level whenever the specified quantity of mail is reached or exceeded. Bundles or containers may contain more than the specified *optional at* quantity up to the applicable maximum physical size. Smaller quantities may be prepared only if permitted by applicable rate eligibility standards. Standards for quantities with which preparation is optional are often followed by standards for larger quantities with which preparation is required.
- u. *Entry [facility]* (or *origin [facility]*) refers to the USPS mail processing facility (e.g., "entry SCF") that serves the post office at which the mail is entered by the mailer. If the post office where the mail is entered is not the one serving the mailer's location (e.g., for plant-verified drop shipment), the post office of entry determines the *entry facility*. *Entry SCF* includes both single-3-digit and multi-3-digit SCFs.
- v. The *group pieces* instruction means the pieces are to be sorted together as if to be bundled but not actually secured into a bundle. Bundle labels and other bundle identification methods may be used for unsecured groups of pieces as permitted by standard.
- w. A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in each group together, the result is a bundle. The term bundle does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). Bundle preparation is described in [19.0](#).
- x. A *tic mark* is defined as a solid black rectangle that must be printed on both the front side (extending over the top) and back side (flap side) of the envelope. Tic marks may be used in lieu of separator cards or rubber bands in Periodicals

nonautomation carrier route mailings prepared in full 5-digit carrier routes trays. Tic marks must be printed on the top edge of the first mailpiece in each carrier route grouping during the mailpiece production process and must meet the following specifications:

1. Color: black.
  2. Reflectance and Contrast Ratio: The tic mark must meet the reflectance and contrast ratio specifications in [708.4.3](#).
  3. Location: The tic mark must extend along the top edge of the envelope, to the left of center line of the envelope. Its location must be referenced to the center line. The right edge of the tic mark must be 0.5 inch (+ 0.125 inch) from the center line of the envelope.
  4. Size: The width of the tic mark must be 0.5 inch (+ 0.125 inch). The tic mark must extend over the top of the envelope, down each side a distance of 0.25 inch (+ 0.125 inch). When a second tic mark is used to indicate a tray break at the end of the tray, all specifications are the same as for one tick mark, except for the location on the envelope. When a second tic mark is used on the last piece in a tray to indicate a tray break, the right edge of the second tic mark must be 0.5 inch (+ 0.125 inch) from the left edge of the first tic mark.
- y. A “logical” presort destination represents the total number of pieces that are eligible for a specific presort level based on the required sortation, but which might not be contained in a single bundle or in a single container (i.e., sack, pallet) due to applicable preparation requirements or the size of the individual pieces. For example, there may be 42 mailpieces for ZIP Code 43112 forming a Periodicals “logical” 5-digit bundle, and they are prepared in three physical 5-digit bundles because of the applicable weight and height restrictions on bundles. For pallets, 2,800 pounds of mail may be destined to an SCF destination, and these would form the “logical” SCF pallet, but the mail is placed on two physical SCF pallets each weighing 1,400 pounds because of the 2,200 pound maximum pallet weight requirement.
- z. *Cobundling* is an alternate preparation method available under [705](#). for Periodicals that allows the combining of flat-size automation rate and Presorted rate pieces within the same bundle under the single minimum bundle size requirement. Regardless of the class of mail, pieces may not be combined in more than one physical bundle for each logical presort destination unless presented using an approved manifest mailing system under [705.2.0](#).

[M011.1.3]

## 19.0 Bundles

### 19.1 Definition of a Bundle

A *bundle* is a group of addressed pieces secured together as a unit. The presort process considers the total number of pieces available for the particular presort destination and assembles them into groups meeting applicable volume and size standards. When the standards for the rate claimed require securing the pieces in

each group together, the result is a bundle. The term *bundle* does not apply to unsecured groups of pieces (e.g., pieces prepared in trays and identified by separator cards or tic marks). [M011.1.3aa]

## **19.2 Arranging Pieces in a Bundle (“Facing”)**

Except as noted in 19.3, all pieces in a bundle must be “faced” (i.e., arranged with the addresses in the same read direction), with an address visible on the top piece. [M020.1.1]

## **19.3 Preparing Bundles of Pieces of Nonuniform Thickness (“Counterstacking”)**

Bundles of flats and other pieces of nonuniform thickness may be prepared by counter-stacking under these conditions:

- a. Counter-stacking should be used only to create bundles of more uniform thickness that are more likely to maintain their integrity during transportation and processing.
- b. Counter-stacking is appropriate for saddle-stitched mailpieces and pieces where one edge is thicker than other edges or one corner is thicker than other corners.
- c. When counter-stacking, pieces must all have addresses facing up and be divided into no more than four approximately equal groups, with each group rotated 180 degrees from the preceding and succeeding group(s); prepare as few groups as possible to create a bundle of uniform thickness.
- d. Counter-stacked groups within a bundle should be as thick as possible, generally at least 1 inch thick.
- e. When pieces are nonuniform in thickness because they are thicker in the center instead of along an edge or corner, counter-stacking will generally not result in a bundle of uniform thickness (i.e., a football-shaped bundle would be created). Instead of counter-stacking such pieces, limit the height (thickness) of the bundle to 3 to 6 inches to ensure the bundle will stay together during normal transit and handling. [M020.1.2]

## **19.4 Securing Bundles**

Bundle preparation is subject to the following requirements:

- a. Bundles must be able to withstand normal transit and handling without breakage or injury to USPS employees.
- b. Bundles must be secured with banding, shrinkwrap, or shrinkwrap plus one or more bands. Banding includes plastic bands, rubber bands, twine/string, and similar material. Use of wire or metal banding is not permitted.
- c. When one band is used, it must be placed tightly around the girth (narrow dimension).
- d. Except under 19.9, *Bundles on Pallets*, bundles over 1 inch high (thick) must be secured with at least two bands or with shrinkwrap. When double banding is used to secure bundles, it must encircle the length and girth of the bundle at least once. Additional bands may be used if none lies within 1 inch of any bundle edge.

- e. Banding tension must be sufficient to tighten and depress the edges of the bundle so pieces will not slip out of the banding during transit and processing. Loose banding is not allowed.
- f. When twine/string is used to band bundles, the knot(s) must be secure so the banding does not come loose during transit and processing. [M020.1.4]

### 19.5 Letter-Size Bundles

Letter-size pieces are subject to these bundling standards:

- a. The maximum thickness for bundles of carrier route rate mail is 4 inches. The maximum thickness for other bundles is 6 inches.
- b. Bundles must be prepared for mail in all less-than-full trays and 3-digit carrier routes trays; and for nonautomation Periodicals.
- c. Separator cards or tic marks *may* be used instead of bundling for letter-size pieces in full 5-digit carrier routes trays of Periodicals. The cards must be of paper or card stock, at least 0.25 inch higher than the highest pieces in the mailing, and in front of the corresponding groups of mail. The tic mark must be applied during the mailpiece production process and be printed on the top edge of the envelope, to the left of the center line of the envelope. Each tic mark must have its location referenced to the center line. The right edge of the tic mark must be 0.5 inch (+ 0.125 inch) from the center line of the envelope. The width of the tic mark must be 0.5 inch (+ 0.125 inch). The tic mark must extend over the top of the envelope, down each side a distance of 0.25 inch (+ 0.125 inch). In trays of tic-marked mail, all mailpieces must be the same dimension so that the tic marks are visible.
- d. For mail in less-than-full trays, bundles must be secured with rubber bands, elastic strapping, flat plastic strapping, or string. (Elastic strapping must have a minimum strength of 15 pounds and a minimum of 150% elongation before breaking. Minimum tension, when applied to the bundle, must be 50% breaking strength. Elastic strapping may not be used unless approved by USPS Engineering. If requested, the mailer must be able to show such approval for the strapping material used for a mailing.)
- e. Bundles up to 1 inch thick must be secured with appropriate banding placed once around the girth (narrow dimension). Bundles over 1 inch thick must be secured with at least two bands, one around the length and one around the girth. [M020.2.1]

### 19.6 Flat-Size Bundles

Bundles of flat-size pieces must be secure and stable subject to the following:

- a. If placed on pallets, the specific weight limits in [705.8.0](#).
- b. If placed in sacks, the specific weight and height limits in [19.8](#). [M020.2.2]

### 19.7 Exception to Bundle Preparation— Full Single-Sort-Level Trays

In bundle-based mailings not entirely of card-size pieces (i.e., pieces not larger than 4-1/4 by 6 by 0.016 inch), mail need not be prepared in 5-digit bundles if placed in a full 5-digit tray. Similarly, mail need not be prepared in other levels of bundles when it will be placed in a full tray to the corresponding tray level, and none of the mail in

that tray would have been more finely sorted if bundled. For example, the content of a full ADC tray need not be bundled if, when correctly sorted, it would have all been prepared in ADC bundles to the same destination; conversely, this exception would not apply if some pieces would require preparation in 5-digit or 3-digit bundles.

[M020.1.9]

## **19.8 Bundles in Sacks**

Periodicals prepared in sacks must be secured in bundles as follows:

- a. The maximum weight for all bundles is 20 pounds.
- b. Bundles up to 1 inch in height (thickness) must be secured with appropriate banding, placed at least once around the girth (narrow dimension), or with shrinkwrap. Bundles over 1 inch in height must be secured with at least two bands (plastic bands, rubber bands, or twine/string), one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or two bands.
- c. Bundles should be measured at the lowest (thinnest) point to determine the bundle height.
- d. A bundle that exceeds the maximum prescribed height by less than the thickness of a single piece meets the standard (e.g., if a glossy piece is 0.625 (5/8) of an inch thick, five pieces may be secured in a bundle 3.125 inches high; if a piece with uncoated cover stock is 0.75 (3/4) of an inch thick, 11 pieces may be secured in a bundle 8.25 inches high).
- e. Bundles of pieces with covers of coated stock that are not individually enclosed in a mailing wrapper (e.g., magazines or catalogs with glossy covers not individually enclosed in an envelope, uncoated paper wrapper, or plastic wrapper (polybag)) are subject to these conditions:
  1. Except as noted in [19.8e2](#), bundles must not exceed 3 inches in height (thickness).
  2. Bundles of such pieces secured with shrinkwrap plus one or two plastic straps, or with at least two plastic straps, one around the length and one around the girth, must not exceed 6 inches in height (thickness).
- f. Bundles containing pieces with outer surfaces of uncoated stock are subject to these conditions:
  1. "Uncoated stock" also refers to pieces with coated covers that are individually enclosed in a cover or mailing wrapper of uncoated stock such as an envelope, sleeve, protective cover, partial wrapper, or polybag and pieces with outer surfaces composed of material other than paper (e.g., plastic, cloth, fiberboard, or metal).
  2. Bundles must not exceed 8 inches in height (thickness); however, it is recommended that such bundles not exceed 6 inches in height (thickness). [M020.1.8]

## **19.9 Bundles on Pallets**

In addition to [19.2](#), [19.3](#), [19.4](#), and [19.12](#), bundles on pallets must meet the following standards:

- a. Except as noted in [19.9b](#), bundles up to 1 inch in height (thickness) must be secured with appropriate banding, placed at least once around the girth, or with shrinkwrap. Bundles over 1 inch in height must be secured with at least two bands (plastic bands, rubber bands, twine/string, or similar material), one around the length and one around the girth; or with shrinkwrap; or with shrinkwrap plus one or two bands.
- b. Bundles may be secured with heavy-gauge shrinkwrap plus plastic banding, only shrinkwrap, or only banding material if they can stay together during normal processing. Except for bundles of individually polywrapped pieces, bundle on BMC pallets must be shrinkwrapped and machinable on BMC parcel sorters. Bundles of individually polywrapped pieces may be secured with banding material only. Machinability is determined by the USPS. If used, banding material must be applied at least once around the length and once around the girth; wire and metal strapping are prohibited. [M020.1.5]

#### **19.10 Pieces With Simplified Addresses**

For mail prepared with a simplified address, all pieces for the same post office must be prepared in bundles of 50 when possible. If bundles of other quantities are prepared, the actual number of pieces must be shown on the facing slip attached to show distribution desired (e.g., rural route, city route, post office boxholder). Bundles must be secure and stable subject to specific weight limits in [705.8.0](#) if placed on pallets, specific weight and height limits in [19.8](#) for Periodicals placed in sacks, and specific thickness limits in [19.5](#) for cards and letter-size pieces. [M020.2.3]

#### **19.11 Bundles With Fewer Than the Minimum Number of Pieces Required**

An individual bundle may be prepared with fewer than the minimum number of pieces required by the standards for the rate claimed without loss of rate eligibility under either of these conditions:

- a. A greater number of pieces would exceed the maximum physical size for a bundle and the total number of pieces for that presort destination meets the minimum volume standard (e.g., 30 pieces are available to meet a 10-piece minimum, but a bundle of eight pieces is 6 inches thick).
- b. The pieces constitute the “last bundle” for a presort destination and previously prepared bundles met the applicable minimum volume standard (e.g., 505 pieces prepared in 10 50-piece bundles and one five-piece bundle). [M020.1.7]

#### **19.12 Labeling Bundles**

Unless excepted by standard, the presort level of each bundle (other than carrier route bundles) must be identified either with an optional endorsement line under [708.7.0](#) or with a barcoded pressure-sensitive bundle label. On letter-size mail (including card-size pieces), the bundle label must be placed in the lower left corner of the address side of the top piece in the bundle. On flat-size mail, the label may be placed anywhere on the address side of the top piece in the bundle. Bundle labels must not be obscured by banding or shrinkwrap. The following colors and presort characters apply to bundle labels:

- a. Firm (Periodicals use only), blue Label F.
- b. Five-digit presort level, red Label 5.

707.19.13

- c. Three-digit presort level, green Label 3.
- d. ADC presort level, pink Label A.
- e. Mixed ADC presort level, tan Label X. [M020.1.3]

### 19.13 Use of Optional Endorsement Lines (OEL)

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece of bundles under [708.7.0, \*Optional Endorsement Lines \(OEL\)\*](#). [M013.1.1]

### 19.14 Use of Carrier Route Information Lines

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [19.0, \*Bundles\*](#), optional endorsement lines under [708.7.0](#), or carrier route information lines under [708.6.0](#). These standards apply to Carrier Route Periodicals mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

### 19.15 Facing Slips—All Carrier Route Mail

All facing slips used on carrier route bundles must show this information:

- a. Line 1: Destination city, two-letter state abbreviation, and 5-digit ZIP Code.
- b. Line 2: Content (as appropriate to the class), followed by carrier route type and route number (e.g., “NEWS LTRS CR R 012”).
- c. Line 3: City and two-letter state abbreviation of the origin post office. [M020.3.0]

## 20.0 Sacks and Trays

### 20.1 Basic Standards

#### 20.1.1 Standard Containers

Depending on the class of mail and processing category, mailings must be prepared in trays or sacks as shown in [Exhibit 20.1.1](#) and under other applicable standards in this section. The following additional standards apply to [Exhibit 20.1.1](#):

- a. Palletized mail is subject to [705.8.0](#).
- b. A postmaster may authorize nonpostal containers for a small-volume presorted mailing if the mailing weighs no more than 20 pounds, consists primarily of mail or bundles of mail for local ZIP Codes, and requires no USPS transportation for processing. [M033.1.2]

#### Exhibit 20.1.1 Standard Containers

| PROCESSING CATEGORY | USPS CONTAINER            |
|---------------------|---------------------------|
| <b>Periodicals</b>  |                           |
| Letter-size         | Letter tray (with sleeve) |
| Flat-size, parcels  | Sack (brown)              |

[Exhibit M033.1.2]

### 20.1.2 Letter Tray Sizes

These approximate measurements define the tray sizes that apply to all mail preparation standards:

- a. 2-foot managed mail (MM) trays: 21 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- b. 1-foot MM trays: 10-1/4 inches long by 10 inches wide (inside bottom dimensions) by 4-5/8 inches high.
- c. 2-foot extended MM (EMM) trays: 21-3/4 inches long by 11-1/2 inches wide (inside bottom dimensions) by 6-1/8 inches high. [M033.1.3]

### 20.1.3 Presort

Presort, presort levels, and standard preparation terms are defined in 18.0. [M033.1.4]

### 20.1.4 Tray Sleevng and Strapping

Each letter tray must be sleeved, using USPS-provided sleeves. Except under 20.1.5, each sleeved letter tray must then be secured with one plastic strap placed tightly around the length of the tray without crushing the tray or sleeve. [M033.1.5]

### 20.1.5 Strapping Exception

Strapping is not required for any letter tray placed on a 5-digit, 3-digit, or SCF pallet secured with stretchwrap. In addition, if the processing and distribution manager gives a written waiver, strapping is not required for any letter tray that originates and destines in the same SCF (mail processing plant) service area. [M033.1.6]

### 20.1.6 Origin/Entry 3-Digit/Scheme Trays

For letter-size Periodicals, after all finer sort levels are prepared, an origin/entry 3-digit tray (or, if applicable, origin/entry 3-digit scheme tray) must be prepared to contain any remaining mail for each 3-digit (or 3-digit scheme) area serviced by the SCF serving the post office where the mail is verified (origin), and may be prepared for each 3-digit (or 3-digit scheme) area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the post office where the mail is verified—e.g., a PVDS deposit site). In all cases, only one less-than-full tray may be prepared for each 3-digit (or 3-digit scheme) area. [M033.1.7]

### 20.1.7 Periodicals Flats and Irregular Parcels Origin/Entry SCF Sacks

For flat-size and irregular parcel-size Periodicals, after all finer sort levels are prepared, an origin/entry SCF sack must be prepared to contain any remaining 5-digit and 3-digit bundles for the 3-digit ZIP Code area(s) served by the SCF serving the post office where the mail is verified (origin), and may be prepared for the area served by the SCF/plant where mail is entered (if that is different from the SCF/plant serving the post office where the mail is verified—e.g., a PVDS deposit site). In all cases, only one less-than-full sack may be prepared for each SCF area. [M033.1.8]

## 20.2 Letter Tray Preparation

Letter trays are prepared as follows:

- a. Subject to availability of equipment, standard MM trays must be used for all letter-size mail, except that EMM trays must be used when available for letter-size mail that exceeds the inside dimensions of MM trays defined in [20.1.2](#). When EMM trays are not available for those larger pieces, they must be placed in MM trays, angled back, or placed upright perpendicular to the length of the tray in row(s) to preserve their orientation.
- b. Pieces must be “faced” (oriented with all addresses in the same direction with the postage area in the upper right).
- c. Each tray prepared must be filled before filling the next tray, with the contents in multiple trays relatively balanced. When preparing full trays, mailers must fill all possible 2-foot trays first; if there is mail remaining for the presort destination, mailers must use a combination of 1-foot and 2-foot trays that results in the fewest total number of trays for that presort level. As an alternative, if there is mail remaining, mailers may move those pieces to the next higher presort level at which there is a minimum quantity (e.g., 150 pieces).
- d. For presort destinations that do not require full trays, pieces are placed in a less-than-full tray.
- e. Mailers must use as few trays as possible without jeopardizing rate eligibility. For instance, a mailer will never have two 1-foot trays to a single destination; instead, that mail must be placed in a single 2-foot tray. A 1-foot tray is prepared only if it is a full tray with no overflow; or if there is less than 1 foot of mail for that destination; or if the overflow from a full 2-foot tray is less than 1 foot of mail.
- f. Each tray must bear the correct tray label.
- g. Each tray must be sleeved and strapped under [1.4](#) and [1.5](#).
- h. If a mailing is prepared using an MLOCR/barcode sorter and is submitted with standardized documentation, then pieces do *not* have to be grouped by 3-digit ZIP Code prefix (or by 3-digit scheme, if applicable) in AADC trays, or by AADC in mixed AADC trays. [M033.2.1]

## 20.3 Sack Preparation

### 20.3.1 Basic Standards

All sack preparation is subject to these standards:

- a. Each sack must bear the correct sack label.
- b. The weight of a sack and its content must not exceed 70 pounds. [M033.2.4]

## 21.0 Sack and Tray Labels

### 21.1 Sack and Tray Labels

#### 21.1.1 Basic Standards

Only sack labels may be used for sacks; only tray labels may be used for trays. Machine-printed labels (available from the USPS) ensure legibility. Legible hand-printed labels are acceptable. Illegible labels are not acceptable. Container labels for automation rate mailings are subject to [21.3](#), [21.4](#), and [21.5](#). [M031.1.1]

#### 21.1.2 Line 1 (Destination Line)

Line 1 (destination line) must meet these standards:

- a. *Placement.* Line 1 must be the first visible line on the label. It must be completely visible and legible when placed in the label holder. This visibility is ensured if the top of this line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.
- b. *Information.* Line 1 must contain only the information specified by standard, including the appropriate destination facility prefix (e.g., “ADC”). Two zeros may follow the 3-digit ZIP Code prefix required by labeling standards (e.g., 223 as 22300).
- c. *Overseas Military Mail.* On 5-digit sacks and trays for overseas military destinations, Line 1 shows, from left to right, “APO” or “FPO,” followed by “AE” (for ZIP Codes within the ZIP Code prefix range 090-098), “AA” (for ZIP Codes within the 3-digit ZIP Code prefix 340), or “AP” (for ZIP Codes within the ZIP Code prefix range 962-966), followed by the destination 5-digit ZIP Code of the mail in the sack or tray. [M031.1.2]

#### 21.1.3 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

- a. *Placement:* Line 2 must be the second visible line on the label. This line must show the class and processing category of the mail in the sack or tray and other information as specified by standards. Except as provided in [26.0](#) for combined mailings, Periodicals publications must use one of the following for Line 2 class information:
  1. “PER.”
  2. “NEWS” if published weekly or more often or if authorized newspaper treatment as of March 1, 1984. [M031.1.3 and M031.1.7]

## 707.21.1.4

- b. *Codes:* The codes shown below must be used as appropriate on Line 2 of sack, tray, and pallet labels.

| CONTENT TYPE   | CODE   |
|--|--|
| Barcoded   | BC   |
| Barcoded and Nonbarcoded   | BC/NBC   |
| Carrier Route  | C (type of route)  |
| Carrier Routes   | CR-RT or CR-RTS  |
| Digit  | D  |
| Flats  | FLTS   |
| General Delivery Unit  | G  |
| Highway Contract Route   | H  |
| Irregular Parcels  | IRREG  |
| Letters  | LTR or LTRS  |
| Machinable   | MACH   |
| Manual (cannot be processed on automated equipment or mailer requests manual processing) | MAN or MANUAL  |
| Mixed  | MXD  |
| Nonbarcoded  | NON BC (sacks) NBC (pallets and cotrayed or cosacked mail under 705.9.0) |
| Periodicals  | PER (see 21.1.3a) NEWS (see 21.1.3a)                                     |
| Post Office Box Section  | B  |
| Rural Route  | R  |
| Scheme   | SCH  |
| Working  | WKG  |

[M031.5.0]

### 21.1.4 Line 3 (Office of Mailing or Mailer Information Line)

Line 3 (office of mailing or mailer information line) must be the bottom line of required information and must show either the city and state of the entry post office or the mailer's name and the city and state of the mailer's location. It is recommended that the mailer's name also appear with the city and state of the entry post office.

[M031.1.4]

### 21.1.5 Extraneous Information

Extraneous information is not permitted on the destination and content lines. It may be placed away from required lines, subject to these conditions:

- It may be placed above Line 1 in not more than 0.083 inch high type (6-point type).
- It may appear to the right of required Line 3 information but it must not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.

- c. It must not appear between Lines 1 and 2 (a blank line is permitted), but may appear between Lines 2 and 3 if it does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix.
- d. It may appear below Line 3.
- e. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on Line 3.  
[M031.1.5]

#### **21.1.6 Abbreviations**

Lines 1 and 3 may contain abbreviated information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. [M031.1.6]

## **21.2 Additional Standards—Tray and Sack Labels**

### **21.2.1 Placement of Tray Labels**

A tray label must be securely placed in an adhesive-backed label holder that is affixed to the specific location designated on the tray. Where no specific location is indicated the label must be securely placed in an adhesive-backed label holder that is affixed horizontally to the top left corner of one end of the tray. Do not use tape. Insert labels completely into the label holder to ensure that they do not fall out during processing. Do not insert labels upside down. [M031.3.1]

### **21.2.2 Physical Characteristics of a Tray Label**

A tray label must meet these specifications:

- a. Color: pink for Periodicals.
- b. Weight: minimum 70-pound stock (500 sheets, 24 by 36 inches).
- c. Height (perpendicular to printing): 1.860 inches minimum; 2.015 inches maximum.
- d. Length (parallel to printing): 3.250 inches minimum; 3.515 inches maximum.
- e. Thickness: 0.005 inch minimum. [M031.3.2]

### **21.2.3 Physical Characteristics of a Sack Label**

A sack label must meet these specifications:

- a. Color: pink for Periodicals.
- b. Weight: 70-pound or heavier stock (required for mailings of automation-compatible flats, optional for others).
- c. Length (parallel to printing): 3.250 inches minimum; 3.375 inches maximum.
- d. Height (perpendicular to printing): 0.937 inch minimum; 0.980 inch maximum.  
[M031.2.1]

**21.2.4 Additional Standards for Automation-Compatible Flats**

For sack labels used on mailings of automation-compatible flats only.

- a. The human-readable content of sack labels must be machine-printed at five lines per inch. If the information cannot be shortened by postal abbreviations, it may be printed at a pitch of up to 15 characters per inch, if at least 22 human-readable characters fit on the label without interfering with the “quiet zone.”
- b. The minimum acceptable height for the destinating ZIP Code is 0.111 inch (8-point type).
- c. The minimum acceptable character height for all other information on Lines 1, 2, and 3 is 0.083 inch (6-point type). [M031.2.2]

**21.3 Use of Barcoded Tray And Sack Labels**

[Exhibit 21.3](#) shows the types of mail requiring barcoded tray or sack labels.

Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in [21.3](#), [21.4](#), and [21.5](#).
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

**Exhibit 21.3 Required Barcoded Container Labels**

| RATE OR TYPE  | PROCESSING CATEGORY    |
|---|------------------------|
| <b>Periodicals</b>  |                        |
| Automation rate   | Letter-size, flat-size |
| Cobundled and cosacked under <a href="#">705.9.0</a> through <a href="#">705.13.0</a> | Flat-size              |

[Exhibit M032.1.1]

**21.4 Additional Standards—Barcoded Tray Labels****21.4.1 Physical Characteristics of a Label**

A barcoded tray label must meet these specifications:

- a. Color: pink for Periodicals.
- b. Reflectance: minimum reflectance requirements in [708.6.2.4i](#).
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum. [M032.2.1]

**21.5 Additional Standards—Barcoded Sack Labels****21.5.1 Physical Characteristics of a Sack Label**

A barcoded sack label must meet these specifications:

- a. Color: pink for Periodicals.
- b. Reflectance: minimum reflectance requirements in [708.6.3.3i.](#)
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

**22.0 Preparation of Presorted Periodicals****22.1 Basic Standards****22.1.1 General Preparation Standards**

For all letter-size mailings, for sacked mailing jobs of nonletter-size mail that do not contain an automation rate mailing or a carrier route mailing, and for all palletized mailing jobs the following standards must be met for the Presorted rate mailing:

- a. All pieces in each Presorted rate Periodicals mailing must be in the same processing category.
- b. Letter-size pieces must be bundled under [22.2](#) and prepared in trays under [22.5](#). Trays prepared under this section may subsequently be palletized under [705.8.0](#).
- c. Nonletter-size pieces must be bundled under [22.2](#). Bundles placed on pallets must meet additional bundling criteria under [705.8.0](#).
- d. Bundles of nonletter-size pieces must be sacked or palletized under one of the following:
  1. Sacked under [22.2](#), except that a Presorted rate mailing that is part of a mailing job that also contains an automation flats mailing must be sacked as described in [22.1.2](#).
  2. Palletized under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#).
- e. Sacks prepared under [22.6](#), *Sack Preparation—Flat-Size Pieces and Irregular Parcels*, may subsequently be prepared on pallets under [705.8.0](#).
- f. All pieces must be sorted together to the finest extent required under the applicable sortation standards described above. [M210.1.1]

**22.1.2 Additional Standards for Nonletter Sacked Mailing Jobs Containing More Than One Mailing**

The following standards apply:

- a. Mailings prepared in sacks that are part of a mailing job that includes a carrier route mailing, an automation rate mailing, and a presorted rate mailing must be prepared under one of the options listed below. Presorted rate pieces may be cobundled with automation rate pieces under the standards in [705.11.0](#).

## 707.22.1.3

1. The carrier route mailing must be prepared under [13.0, Carrier Route Rate Eligibility](#), and [23.0, Preparation of Carrier Route Periodicals](#), and the automation rate and Presorted rate mailing must be prepared under [705.9.0](#).
2. All three mailings in the mailing job must be prepared under [705.10.0](#).
- b. Mailings prepared in sacks that are part of a mailing job that includes an automation rate mailing and a Presorted rate mailing must be prepared under the cosacking standards in [705.9.0](#). Presorted rate pieces may be cobundled with automation rate pieces under the standards in [705.11.0](#).
- c. Sacked mailing jobs that contain only a carrier route mailing and a Presorted rate mailing may be separately sacked, or may be prepared using the merged sacking option under [705.10.0](#).
- d. Sacked mailing jobs that contain only a carrier route mailing and an automation rate mailing may be separately sacked under [23.0](#) and [25.0](#), or may be prepared using the merged sacking option under [705.10.0](#). [M210.1.2]

**22.1.3 Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by documentation meeting the basic standards in [708.1.0](#). Postage statements must be supported by documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#). Documentation of postage is not required if each piece is of identical weight and the pieces are separated by rate and zone when presented for acceptance. [M210.1.3]

**22.1.4 Merged Containerization of Nonletter-Size Carrier Route, Automation Rate, and Presorted Rate Mail**

Under the optional preparation in [705.10.0](#), Presorted rate firm and 5-digit bundles prepared under [22.1](#) and [22.2](#) are cosacked with firm and carrier route bundles prepared under [23.0](#) and with automation rate 5-digit bundles prepared under [25.0](#) in merged 5-digit sacks and in merged 5-digit scheme sacks. Under the optional preparation in [705.10.0](#), [705.12.0](#), or [705.13.0](#), Presorted rate firm and 5-digit bundles prepared under [22.1](#) and [22.2](#) are copalletized with firm and carrier route bundles prepared under [23.0](#) and with automation rate 5-digit bundles prepared under [25.0](#) on merged 5-digit pallets and on merged 5-digit scheme pallets. See [22.1.2a](#) for information on when preparation under [705.10.0](#) may be required. Presorted rate pieces may be cobundled with automation rate pieces under [705.11.0](#). [M210.1.6]

**22.2 Bundle Preparation**

Bundling is required before trayng or sacking. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches the minimum bundle size. Smaller volumes are not permitted except mixed ADC bundles and 5-digit and 3-digit bundles prepared under [22.4](#). Bundling is also subject to [19.0, Bundles](#). Preparation sequence, bundle size, and labeling:

- a. Firm (optional); two-piece minimum; blue Label F or optional endorsement line (OEL).

- b. 5-digit (required); six-piece minimum; red Label 5 or OEL; bundle labeling optional for pieces in full 5-digit trays.
- c. 3-digit (required); six-piece minimum; green Label 3 or OEL.
- d. ADC (required); six-piece minimum; pink Label A or OEL.
- e. Mixed ADC (required); no minimum; tan Label X or OEL. [M210.2.0]

### 22.3 Firm Bundles

A firm bundle is two or more copies for the same address placed in one bundle. If each copy has a delivery address, each may be claimed as a separate piece for presort and on the postage statement, or the firm bundle may be claimed as one piece. A firm bundle sorted and claimed as one piece must be accompanied by (but must be physically separate from) five other pieces bundled to the same destination to satisfy a six-piece bundle requirement when applicable, regardless of the number of copies in the firm bundle. [M210.1.4]

### 22.4 Low-Volume Bundles and Sacks

As a general exception to [22.2, Bundle Preparation](#), and [22.6, Sack Preparation—Flat-Size Pieces and Irregular Parcels](#), nonletter-size Periodicals may be prepared in low-volume 5-digit and 3-digit bundles containing fewer than six pieces when the publisher determines that such preparation improves service, if those bundles are placed in 5-digit, 3-digit, and SCF sacks. Low-volume bundles also may be placed on merged 5-digit scheme, 5-digit scheme, merged 5-digit, 5-digit, 5-digit metro, 3-digit, and SCF pallets. [M210.1.5]

### 22.5 Tray Preparation—Letter-Size Pieces

Preparation sequence, tray size, and labeling:

- a. *5-digit*: required at 24 pieces, optional with one six-piece bundle minimum.
  - 1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
  - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS 5D NON BC.”
- b. *3-digit*: required at 24 pieces (no minimum for required origin/optional entry 3-digit(s)), optional with one six-piece bundle minimum.
  - 1. Line 1: use [L002](#), Column A.
  - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS 3D NON BC.”
- c. *ADC*: required at 24 pieces, optional with one six-piece bundle minimum.
  - 1. Line 1: use [L004](#), Column B.
  - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS ADC NON BC.”
- d. *Mixed ADC*: required (no minimum).
  - 1. Line 1: use “MXD” followed by the city, state, and ZIP of the ADC serving the 3-digit ZIP Code of the entry post office, as shown in [L004](#).
  - 2. Line 2: “PER” or NEWS” as applicable; followed by “LTRS NON BC WKG.” [M210.3.0]

707.22.6

**22.6 Sack Preparation—Flat-Size Pieces and Irregular Parcels**

For mailing jobs that also contain an automation rate mailing, see [22.1.2](#) and [705.9.0](#) or [705.10.0](#). For other mailing jobs, preparation sequence, sack size, and labeling:

- a. *5-digit*: required at 24 pieces, optional with one six-piece bundle minimum except under [22.4](#).
  1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “5D”; followed by “NON BC” for flats.
- b. *3-digit*: required at 24 pieces, optional with one six-piece bundle minimum except under [22.4](#).
  1. Line 1: use [L002](#), Column A.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “3D”; followed by “NON BC” for flats.
- c. *SCF*: required at 24 pieces, optional with one six-piece bundle minimum except under [22.4](#).
  1. Line 1: use [L002](#), Column C.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “NON BC” for flats.
- d. *Origin/entry SCF*: required for the SCF of the origin (verification) office, optional for the SCF of an entry office other than the origin office, (no minimum); for Line 1 use [L002](#), Column C.
  1. Line 1: use [L002](#), Column C.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “SCF”; followed by “NON BC” for flats.
- e. *ADC*: required at 24 pieces, optional with one six-piece bundle minimum.
  1. Line 1: use [L004](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “ADC”; followed by “NON BC” for flats.
- f. *Mixed ADC*: required (no minimum).
  1. [\[3-17-05\]](#) [\[02-03-05\]](#) Line 1: Use [L009](#), effective May 15, 2005. Until then, use “MXD” followed by city, state, and ZIP Code of ADC serving the 3-digit ZIP Code prefix of the entry post office as shown in [L004](#), or use [L009](#).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “NON BC WKG” for flats or “WKG” for irregular parcels. [\[M210.4.0\]](#)

## 23.0 Preparation of Carrier Route Periodicals

### 23.1 Basic Information

#### 23.1.1 General Preparation Standards

The following standards must be met for carrier route mailings:

- a. All pieces in each carrier route Periodicals mailing must be in the same processing category.
- b. Letter-size pieces must be bundled under [23.2](#) and prepared in trays under [23.3](#). Trays prepared under this section may subsequently be palletized under [705.8.0](#).
- c. Nonletter-size pieces must be bundled under [23.2](#). Bundles placed on pallets must meet additional bundling standards under [705.8.0](#).
- d. Bundles of nonletter-size pieces must be sacked or palletized under one of the following:
  1. Sacked under [23.4](#) or, if eligible, under [705.10.0](#); or
  2. Palletized under [705.8.0](#), [705.10.0](#), [705.12.0](#), or [705.13.0](#).
- e. Sacks prepared under [23.4](#), *Preparation—Flat-Size Pieces And Irregular Parcels*, may subsequently be prepared on pallets under [705.8.0](#).
- f. All pieces must be sorted together to the finest extent required under the applicable sortation standards described above.
- g. Pieces with a simplified address must meet the corresponding preparation standards in [602.3.0](#), *Use of Alternative Addressing*, and the eligibility standards in [7.0](#), *Standards for Mailing to Nonsubscribers or Nonrequesters*.  
[M220.1.1]

#### 23.1.2 Documentation

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by documentation meeting the basic standards in [708.1.0](#). Postage statements must be supported by documentation produced by PAVE-certified software or standardized documentation under [708.1.0](#). Documentation of postage is not required if each piece is of identical weight and the pieces are separated by rate and zone when presented for acceptance. Documentation of sequencing and of density standards under [23.7](#) and [23.8](#) must be submitted with each mailing. [M220.1.2]

#### 23.1.3 Sequencing Standards

Preparation for carrier route rates is optional and subject to additional standards. Periodicals for which a carrier route discount is claimed must be prepared as a carrier route mailing under this section, using either walk sequencing or line-of-travel sequencing, applicable to the rate claimed (see [23.7](#) and [23.8](#), *Delivery Sequence Documentation*). Mailpieces prepared with a simplified address must meet the additional standards in [602.3.0](#), *Use of Alternative Addressing*. [M220.1.3]

### **23.1.4 Merged Containerization of Nonletter-Size Carrier Route, Automation Rate, and Presorted Rate Mail**

For sacked mailing jobs that contain an automation rate, a Presorted rate, and a carrier route rate mailing, mailers must prepare the automation and Presorted rate mailings under 705.9.0 (see 22.1.2a) and the carrier route mailing under 23.0, unless they elect to prepare the mailings under 705.10.0. Under the optional preparation in 705.10.0, firm and carrier route bundles prepared under 23.1 and 23.2.4 are cosacked with Presorted rate 5-digit bundles prepared under 22.0 and with automation rate 5-digit bundles prepared under 25.0 in merged 5-digit sacks and merged 5-digit scheme sacks. Under the optional preparation in 705.10.0, 705.12.0, or 705.13.0, firm and carrier route bundles prepared under 23.1 and 23.2.4 are copalletized with Presorted rate 5-digit bundles prepared under 22.0 and with automation rate 5-digit bundles prepared under 25.0 on merged 5-digit pallets and on merged 5-digit scheme pallets. Presorted rate pieces may be cobundled with automation rate pieces under 705.11.0. [M220.1.6]

## **23.2 Bundle Preparation**

### **23.2.1 General**

Bundle preparation is subject to 19.0, *Bundles*, and the specific standards below. [M220.2.1]

### **23.2.2 Optional Higher Bundle Minimums**

A mailer may choose to prepare carrier route bundles at a higher level of route saturation (for example, only if there are at least 15 pieces per route). Under this option, smaller groups of six or more pieces per carrier route not prepared in carrier route bundles for carrier route rates must be prepared for and paid at another applicable rate. [M220.2.2]

### **23.2.3 Walk-Sequence Identification**

In addition to the bundle label showing carrier route type and number under 23.2.4, each bundle of Periodicals walk-sequence mail must show that the mail is walk sequenced and the level of sequencing. A facing slip with the phrase “HIGH DENSITY WALK-SEQUENCED CARRIER ROUTE MAIL” or “SATURATION WALK-SEQUENCED CARRIER ROUTE MAIL” (as applicable) may be placed on the top of each bundle of walk-sequence mail. It may be an address label with the required information placed on a sample mailpiece that is the top piece in the bundle, or a slip of paper affixed to the top of the bundle. If bundles are prepared without facing slips, an optional endorsement line or carrier route information line must be placed on each piece in the bundle to provide the equivalent information. [M220.2.3]

### **23.2.4 Bundling and Labeling**

Preparation sequence, bundle size, and labeling:

- a. Firm (optional); two-piece minimum; blue Label F or optional endorsement line (OEL).
- b. Carrier route (optional, but required for rate eligibility); six-piece minimum (fewer pieces permitted under 23.6); labeling required (facing slip, OEL, or carrier route information line) except for bundles placed in a carrier route tray or sack.

[M220.2.4]

### 23.3 Preparation—Letter-Size Pieces

#### 23.3.1 Basic Preparation

Preparation sequence, tray size, and labeling:

- a. *Carrier route*: required at 24 pieces, optional with one six-piece bundle.
  1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “LTRS;” followed by “WSS” for saturation rate mail, or “WSH” for high density rate mail, or “CR” for basic rate mail; followed by the route type and number.
- b. *5-digit carrier routes*: required if full tray, optional with one six-piece bundle.
  1. Line 1: use city, state, and 5-digit ZIP Code destination of bundles, preceded for military mail by the prefixes under [21.1.2](#).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “LTRS CR-RTS.”
- c. *3-digit carrier routes*: optional with one six-piece bundle for each of two or more 5-digit areas.
  1. Line 1: use the city, state, and ZIP shown in [L002](#), Column A that corresponds to the 3-digit ZIP Code prefix of bundles.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “LTRS 3D CR-RTS.”  
[M220.3.1]

#### 23.3.2 Tray Line 2 for Simplified Address

For trays that contain letter-size pieces with a simplified address prepared under [602.3.0, Use of Alternative Addressing](#), use “MAN” on Line 2 in place of “BC.”  
[M220.3.2]

### 23.4 Preparation—Flat-Size Pieces And Irregular Parcels

#### 23.4.1 Sacking and Labeling

Preparation sequence, sack size, and labeling:

- a. *Carrier route*: required at 24 pieces, fewer pieces not permitted.
  1. Line 1: use city, state, and 5-digit ZIP Code on mail (see [21.1.2](#) for overseas military mail).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “WSS” for saturation rate mail, or “WSH” for high density rate mail, or “CR” for basic rate mail; followed by the route type and number.
- b. *5-digit scheme carrier routes*: required (no minimum).
  1. Line 1: use [L001](#), Column B.
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS SCH.”

707.23.4.2

- c. *5-digit carrier routes*: required (no minimum).
  1. Line 1: use city, state, and 5-digit ZIP Code destination of bundles, preceded for military mail by the prefixes under [21.1.2](#).
  2. Line 2: “PER” or “NEWS” as applicable; followed by “FLTS” or “IRREG” as applicable; followed by “CR-RTS.” [\[M220.4.1\]](#)

**23.4.2 Exception to Sacking**

Sacking is not required for bundles that are prepared for and entered at a DDU. Firm bundles must be clearly labeled using optional endorsement lines under [708.7.0](#), or facing slips or barcoded presort labels under [19.0](#). Carrier route bundles must be clearly labeled using optional endorsement lines under [708.7.0](#) or facing slips under [19.15](#). Bedloaded bundles may weigh up to 40 pounds each. [\[M220.4.2\]](#)

**23.5 Firm Bundles**

A *firm bundle* is two or more copies for the same address placed in one bundle. If each copy has a delivery address, each may be claimed as a separate piece for presort and on the postage statement, or the firm bundle may be claimed as one piece. A firm bundle sorted and claimed as one piece must be accompanied by (but must be physically separate from) five other pieces bundled to the same destination to satisfy a six-piece bundle requirement when applicable, regardless of the number of copies in the firm bundle. [\[M220.1.4\]](#)

**23.6 Low-Volume Bundles and Sacks**

As a general exception to [23.2.4b](#) and [23.4b](#) and [23.4c](#), nonletter-size Periodicals may be prepared in low-volume carrier route bundles containing fewer than six pieces when the publisher determines that such preparation improves service, if those bundles are placed in merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, or 5-digit carrier routes sacks. Low-volume carrier route bundles also may be placed on merged 5-digit scheme, 5-digit scheme carrier routes, merged 5-digit, 5-digit carrier routes, 5-digit metro, 3-digit, and SCF pallets. [\[M220.1.5\]](#)

**23.7 Delivery Sequence Information****23.7.1 General**

Mailpieces for which a walk-sequence discount is claimed must be organized in the delivery sequence determined by the USPS and prepared as a carrier route mailing under [23.0](#) and the standards below. Pieces prepared with a simplified address must also meet the corresponding standards. [\[M050.1.1\]](#)

**23.7.2 Missing Addresses**

Some mailpieces cannot be sequenced because an exact match for a name or address cannot be obtained. These pieces may be included in a sequenced mailing only if they are placed behind or after the sequenced mail. Arrange these pieces:

- a. Alphabetically by complete street name, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

- b. Numerically for numbered streets, then either in ascending order by ZIP+4 code sector segments or numerically in ascending order by primary address.

[M050.1.2]

### **23.7.3 With Simplified Addressing**

Walk-sequence rate pieces prepared with a simplified address must be based on delivery stop information obtained within 90 days before the mailing date, either from the Delivery Statistics File or from the postmaster of the destination office.

[M050.2.1]

### **23.7.4 Without Simplified Addressing**

Walk-sequence rate pieces prepared with other than a simplified address format under 23.7.3 must be sequenced using USPS data from one of the following sources, issued within 90 days before the mailing date:

- a. The Computerized Delivery Sequence (CDS) file.
- b. The Delivery Sequence File, Second Generation (DSF<sup>2</sup>).
- c. Delivery sequence information from USPS address sequencing services, as requested by the customer. [M050.2.2]

### **23.7.5 Out-of-Date Schemes**

Mailings prepared with out-of-date walk-sequencing information are not eligible for walk-sequence rates. [M050.2.3]

### **23.7.6 Line-of-Travel Sequence**

Unless the mail is prepared in carrier walk sequence, line-of-travel (LOT) sequence is required for mailings at Standard Mail Enhanced Carrier Route basic rates and Periodicals carrier route basic rates. LOT sequence is not an exact walk sequence but a sequence of ZIP+4 codes arranged in the order that the route is served by a carrier. (First the ZIP+4 groups are sequenced, then the addresses within each are identified as being in ascending or descending order.) The USPS eLOT product provides a list of the ZIP+4 codes each carrier route serves, identifies the order in which they are delivered, and provides an indicator specifying whether the addresses that share the same ZIP+4 code must be sorted in ascending or descending order. When a range of ZIP+4 codes on the same carrier route are assigned the same sequence number, the addresses bearing those ZIP+4 codes must be arranged in ascending ZIP+4 code order before the sequence number is assigned. LOT information must be updated within 90 days before the date of mailing. [M050.2.4]

## **23.8 Delivery Sequence Documentation**

### **23.8.1 General**

The postage statement must be annotated in the “Carrier Route Sequencing Date” block on page 1. The mailer must annotate the postage statement to show the earliest (oldest) date of the method used to obtain sequencing information for the mailing. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The mailer must maintain documentation to substantiate compliance with the standards for carrier route sequencing. Unless submitted with each corresponding mailing, the

mailer must be able to provide the USPS with documentation (if requested) of accurate sequencing or delivery statistics for each carrier route to which pieces are mailed. Acceptable forms of documentation are:

- a. The invoice showing that the addresses came from CDS.
- b. DSF<sup>2</sup> invoice or documentation.
- c. Copies of the delivery unit summaries that served as the mailer's bills for address sequencing service charges.
- d. Evidence of receipt of information from postmasters for simplified address mailings (see [509.1.0, Address Information System Products](#)).
- e. Form 3553 showing the date of the eLOT product used, or the date from the USPS Qualification report produced by presort software. [M050.3.1]

### **23.8.2 High Density**

The following documentation must be submitted for high density rate mail:

- a. Periodicals Other Than In-County Mail. For each carrier route to which high density rate mail is addressed, the mailer must document the total number of addressed pieces to the route. If there are fewer than 125 addressed pieces for a given route, the documentation also must show the number of possible deliveries on the route.
- b. Periodicals In-County Mail. For each carrier route for which Periodicals In-County high density rates are claimed under the minimum 25% of the total active possible deliveries per carrier route, the documentation must show for each carrier route for which the rates are claimed the total number of active possible deliveries and the number and percentage of deliveries to which mailpieces are addressed. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.2]

### **23.8.3 Saturation Density—Simplified Address Mail**

For each carrier route to which mail with a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standard. This documentation must show the total number of active possible deliveries and the total number to which mailpieces in the mailing are being addressed, by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.3]

### **23.8.4 Saturation Density—Other Mail**

For each carrier route to which mail without a simplified address is sent at the saturation rate, the mailer must be able to document that the mailing meets the applicable density standards. This documentation must show either the total number of active possible *residential* deliveries and the number and percentage to which mailpieces are addressed, or the total number of *all* active possible deliveries and the number and percentage to which mailpieces are addressed, depending on whether qualification is based on the 90% or 75% criterion, respectively. The documentation must be listed by 5-digit ZIP Code and, within each, by carrier route. It must be submitted with each applicable mailing. [M050.3.4]

**23.8.5 Both Rates**

If a mailing contains pieces qualifying for both walk-sequence rates, the documentation may be combined. Entries for pieces at the high density rate must be so annotated on the documentation. For the entire mailing, a summary of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing. [M050.3.5]

**23.8.6 Carrier Route Rate**

If a mailing includes high density and saturation rate and basic carrier route rate pieces, in addition to the applicable information required by 23.8.2 through 23.8.5, the documentation for the basic carrier route rate mail must show, by 5-digit ZIP Code and, within each, by carrier route, the total number of addressed pieces at each rate for each carrier route to which pieces are addressed. Pieces qualifying for the basic carrier route rate must be so annotated. For the entire mailing, a summary by 5-digit ZIP Code of the total number of pieces at each rate must be provided. This documentation must be submitted with each applicable mailing to meet the documentation standard for the carrier route rate. [M050.3.6]

## 24.0 Preparation of Letter-Size Automation Periodicals

### 24.1 Basic Standards

**24.1.1 Standards**

Letter-size automation rate Periodicals must be prepared under 24.0 and the eligibility standards for the rate claimed. Bundle and tray preparation are subject to 19.0 through 21.0. Trays must bear barcoded tray labels under 708.6.0. [M810.1.1]

**24.1.2 Mailings**

The requirements for mailings are as follows:

- a. General. All pieces in a mailing must meet the standards in 201.3.0 and must be sorted together to the finest extent required for the rate claimed. The definitions of a mailing and permissible combinations are in 19.0.
- b. Periodicals. A single automation rate Periodicals mailing may include pieces prepared at 5-digit, 3-digit, and basic automation rates. [M810.1.2]

**24.1.3 Documentation**

A complete postage statement must accompany each mailing. Each mailing also must be accompanied by presort and rate documentation produced by PAVE-certified or MAC-certified software or by standardized documentation under 708.1.0. *Exception:* For mailings of fewer than 10,000 pieces, presort and rate documentation is not required if postage at the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. Combined mailings of more than one Periodicals publication also must be documented under 22.0 and 23.0. [M810.1.3]

707.24.1.4

**24.1.4 Marking**

Pieces not claimed at an automation rate must not bear “AUTO” or “AUTOCR.” [M810.1.4]

**24.1.5 General Preparation**

Grouping, bundling, and labeling are not generally required or permitted, *except* bundling is required in any mailing consisting entirely of card-size pieces and for pieces in overflow, less-than-full, and 3-digit carrier routes trays; pieces must be grouped (or bundled, if applicable) as specified in [707.24.2, Additional Standards](#); bundle labels are required only for Periodicals. [M810.1.5]

**24.1.6 Carrier Route**

Carrier route groups (or bundles, if applicable) may be placed only in carrier route, 5-digit carrier routes, or 3-digit carrier routes trays. [M810.1.6]

**24.2 Additional Standards****24.2.1 Preparation for Automation Letters**

Tray size, preparation sequence, and Line 1 labeling:

- a. 5-digit/scheme: optional, but 5-digit trays required for rate eligibility (150-piece minimum); overflow allowed; for Line 1, for 5-digit trays, use city, state, and 5-digit ZIP Code destination of pieces, preceded for military mail by the prefixes under [21.1.2](#); for Line 1, for optional 5-digit scheme trays, use destination shown in the current USPS City State Product.
- b. 3-digit/scheme: required (150-piece minimum except no minimum for required origin/optional entry 3-digit(s)/scheme); overflow allowed; for Line 1, use [L002](#), Column B.
- c. AADC: required (150-piece minimum); overflow allowed; group pieces by 3-digit ZIP Code prefix (or 3-digit/scheme if applicable); for Line 1, use [L801](#), Column B.
- d. [\[02-03-05\]](#) Mixed AADC: required (no minimum); group pieces by AADC; for Line 1, use [L011](#), Column B. [M810.3.1]

**24.2.2 Tray Line 2**

Line 2: “PER LTRS” or “NEWS LTRS” (except “NEWS LTR” for 5-digit scheme trays), as applicable, and:

- a. 5-digit scheme: “BC 5D SCHEME.”
- b. 5-digit: “5D BC.”
- c. 3-digit scheme: “BC SCHEME” and, if applicable, as shown in [L002](#), Column B, followed by the letter “A,” “B,” or “C.”
- d. 3-digit: “3D BC.”
- e. AADC: “AADC BC.”
- f. Mixed AADC: “BC WKG.” [M810.3.2]

## 25.0 Preparation of Flat-Size Automation Periodicals

### 25.1 Basic Standards

#### 25.1.1 Standards

Flat-size automation rate must be prepared under [25.0](#) and the eligibility standards for the rate claimed. Bundle, sack, and tray preparation are subject to [18.0](#) through [20.0](#). Trays and sacks must bear the appropriate barcoded container labels under [708.6.0](#). [M820.1.1]

#### 25.1.2 Mailings

All pieces in a mailing must meet the standards in [301.3.0](#), *Physical Standards for Automation Flats*, and be sorted together to the finest extent required. Periodicals mailings may include pieces prepared at automation 5-digit, 3-digit, and basic rates. Standard Mail mailings may include pieces prepared at automation 3/5 and basic rates. The definitions of a mailing and permissible combinations are in [18.0](#).

[M820.1.2]

#### 25.1.3 Documentation

A complete postage statement must accompany each mailing, supported by documentation produced by PAVE-certified (or, except for Periodicals, MAC-certified) software or standardized documentation under [708.1.0](#). Mailers may use a single postage statement and a single documentation report for all rate levels in a single mailing. Documentation of postage is not required if the correct rate is affixed to each piece or if each piece is of identical weight and the pieces are separated by rate when presented for acceptance. Combined mailings of Periodicals publications must also be documented under [22.0](#) and [23.0](#). [M820.1.3]

#### 25.1.4 Marking

Pieces not claimed at an automation rate must not bear "AUTO." [M820.1.4]

#### 25.1.5 Bundle Preparation

All pieces must be prepared in bundles and meet the following requirements:

- a. Pieces that meet both the size dimensions and the turning ability and deflection standards under [301.3.3](#), *Criteria for AFSM 100 Flats*, must be prepared in separate bundles from pieces that do not meet all AFSM 100 dimensions and the turning ability and deflection standards (but that do meet the dimensions and other criteria for UFSM 1000 processing under [301.3.4](#)).
- b. Firm bundles must not be included in Periodicals mailings prepared under [25.0](#).
- c. Each AFSM 100 bundle and each UFSM 1000 bundle must separately meet the bundle size minimum number of pieces in [25.2](#). When the total number of AFSM 100 or UFSM 1000 pieces for a specific presort destination (e.g., the 5-digit ZIP Code 12345) meets or exceeds the applicable minimum bundle size, the pieces for that presort destination must be prepared into a bundle or bundles labeled to that presort destination under the standards for the rate claimed.
- d. The physical size of each bundle for each specific presort destination may contain the exact bundle minimum, more pieces than the bundle minimum, or fewer pieces than the bundle minimum, depending on the size of the pieces in

## 707.25.1.6

the mailing or the total quantity of the pieces to that destination. Rate eligibility is not affected when a physical bundle contains fewer pieces than the minimum bundle size for the above reasons, provided the total number of AFSM 100 pieces physically bundled for that presort destination or the total number of UFSM 1000 pieces physically bundled for that presort destination meets or exceeds the rate eligibility bundle minimum under [14.0](#). [M820.1.5]

**25.1.6 Scheme Bundle Preparation**

Pieces meeting the AFSM 100 compatibility criteria in [301.3.3](#) may be prepared in 5-digit scheme bundles for those 5-digit ZIP Code combinations identified in [L007](#) and in 3-digit scheme bundles for those 3-digit ZIP Code combinations identified in [L008](#). These bundles must meet the additional standards in [18.4g](#). [M820.1.6]

**25.1.7 Sack Preparation**

Mailers may combine AFSM 100 bundles and UFSM 1000 bundles in the same sack. [M820.1.7]

**25.1.8 Exception—Automation and Nonautomation Pieces on Pallets**

When the physical dimensions of mailpieces in a Periodicals mailing meet the definition of both a letter-size piece under [201](#) and an automation flat-size piece under [301.3.0](#), the entire job may be prepared, merged, and palletized under [705.9.0](#) through [705.13.0](#) if the applicable standards are met. The nonautomation portion is all paid at the appropriate nonautomation rates for Periodicals. Mailing jobs prepared entirely in sacks and claiming this exception must be cobundled under [705.11.0](#). As an alternative to [705.9.0](#) through [705.13.0](#), if a portion of the job is prepared as palletized automation flats, the nonautomation portion may be prepared as palletized flats at Presorted rates and at carrier route rates. The nonautomation rate pieces that cannot be placed on ADC or finer level pallets may be prepared as flats in sacks and paid at the appropriate nonautomation rates.

[M820.1.8]

**25.1.9 Exception—Periodicals Preparation**

As a general exception to [25.2b](#), [25.2d](#), [25.3b](#), and [25.3c](#), 5-digit scheme ([L007](#)), 5-digit, 3-digit scheme ([L008](#)), and 3-digit bundles may contain fewer than six pieces when the publisher determines that such preparation improves service. Low-volume 5-digit and 3-digit bundles may be placed in 5-digit scheme ([L007](#)), 5-digit, 3-digit, and SCF sacks, as appropriate; or on merged 5-digit scheme ([L001](#)), 5-digit scheme, merged 5-digit, 5-digit, 5-digit metro, 3-digit, or SCF pallets, as appropriate. Low-volume 5-digit scheme and 3-digit scheme bundles may be placed in 5-digit scheme, 3-digit, and SCF sacks, as appropriate; or on 3-digit, or SCF pallets, as appropriate. Pieces in such low-volume bundles must be claimed at the basic rate. [M820.1.9]

**25.1.10 Cotraying, Cosacking, and Cobundling With Presorted Rate Mail**

The following standards apply (except as provided in [25.1.8](#)):

- a. If the mailing job contains a carrier route mailing, an automation rate mailing, and a Presorted rate mailing, then it must be prepared under one of the following options:

1. The carrier route mailing must be prepared under [13.0](#) and [23.0](#) and the automation rate and Presorted rate mailings must be prepared under [705.9.0](#).
  2. All three mailings in the mailing job must be prepared under [705.10.0](#).
- b. If the mailing job contains an automation rate mailing and a Presorted rate mailing, then it must be prepared under the cosacking standards in [705.9.0](#). Automation rate pieces may be cobundled with Presorted rate pieces under the standards in [705.11.0](#), *Preparation of Cobundled Automation Rate and Presorted Rate Flats*.
- c. If the mailing job contains a carrier route mailing and an automation rate mailing, then it must be separately sacked under [23.0](#) and [25.0](#) or prepared using the merged sack option under [705.10.0](#). [M820.1.10]

#### **25.1.11 Merged Containerization With Presorted and Carrier Route Flats**

When the conditions and preparation standards in [705.10.0](#), [705.12.0](#), or [705.13.0](#) are met, 5-digit bundles of Presorted, automation, and carrier route rate mail that are part of the same mailing job may be combined on merged 5-digit scheme sacks or pallets and merged 5-digit sacks or pallets. Bundles that are cosacked or copalletized must be part of the same mailing job and mail class. Automation rate pieces may be cobundled with Presorted rate pieces under [705.11.0](#). [M820.1.11]

### **25.2 Bundling and Labeling**

Preparation sequence, bundle size, and labeling:

- a. 5-digit scheme (optional); six-piece minimum (fewer permitted under [25.1.9](#)); optional endorsement line (OEL) required.
- b. 5-digit (required); six-piece minimum (fewer permitted under [25.1.9](#)); red Label 5 or OEL.
- c. 3-digit scheme (optional); six-piece minimum (fewer permitted under [25.1.9](#)); OEL required.
- d. 3-digit (required); six-piece minimum (fewer permitted under [25.1.9](#)); green Label 3 or OEL.
- e. ADC (required); six-piece minimum (fewer permitted under [25.1.9](#)); pink Label A or OEL.
- f. Mixed ADC (required); no minimum; tan Label X or OEL. [M820.4.1]

### **25.3 Sacking and Labeling**

For mailing jobs that also contain a Presorted rate mailing, see [25.1.10](#) and [705.9.0](#). Other mailing jobs are prepared, sacked, and labeled as follows:

- a. 5-digit scheme (required at 24 pieces, optional with one six-piece bundle minimum except under [25.1.9](#), may contain 5-digit scheme bundles only); labeling:
  1. Line 1: [L007](#), Column B.
  2. Line 2: "PER FLTS 5D SCH BC" or "NEWS FLTS 5D SCH BC," as applicable.

707.26.1

- b. 5-digit (required at 24 pieces, optional with one six-piece bundle minimum except under 25.1.9); labeling:
  - 1. Line 1: city, state, and 5-digit ZIP Code on mail (see 708.6.1.2 for overseas military mail).
  - 2. Line 2: “PER FLTS 5D BC” or “NEWS FLTS 5D BC,” as applicable.
- c. 3-digit (required at 24 pieces, except optional for bundles with 3-digit ZIP Code prefixes indicated by an “N” in L002, further optional with one six-piece bundle minimum except under 25.1.9); labeling:
  - 1. Line 1: L002, Column A.
  - 2. Line 2: “PER FLTS 3D BC” or “NEWS FLTS 3D BC,” as applicable.
- d. SCF (required at 24 pieces, optional with one six-piece bundle minimum except under 25.1.9); labeling:
  - 1. Line 1: L002, Column C.
  - 2. Line 2: “PER FLTS SCF BC” or “NEWS FLTS SCF BC,” as applicable.
- e. Origin SCF (required) and entry SCF(s) (optional); no minimum; labeling:
  - 1. Line 1: L002, Column C.
  - 2. Line 2: “PER FLTS SCF BC” or “NEWS FLTS SCF BC,” as applicable.
- f. ADC (required at 24 pieces, optional with one six-piece bundle minimum); labeling:
  - 1. Line 1: L004, Column B.
  - 2. Line 2: “PER FLTS ADC BC” or “NEWS FLTS ADC BC,” as applicable.
- g. Mixed ADC (required); no minimum; labeling:
  - 1. [02-03-05] Line 1: Use L009, Column B, effective May 15, 2005. Until then, use either L009, Column B or L011, Column B.
  - 2. Line 2: “PER FLTS BC WKG” or “NEWS FLTS BC WKG,” as applicable. [M820.4.2]

## 26.0 Combining Multiple Editions or Publications

### 26.1 Description

#### 26.1.1 Purpose

Periodicals publications may be prepared as a combined mailing by merging copies either during production or after finished copies are produced to achieve the finest presort level possible or to reduce the per piece charge. [M230.1.1]

#### 26.1.2 Methods

A Periodicals combined mailing may be prepared using either one of these methods:

- a. Individually addressed copies of different editions of a Periodicals publication (one title) or individually addressed copies of different Periodicals publications (more than one title) are merged and sorted together to obtain a finer presort level.
- b. Two or more copies of different Periodicals publications (two or more titles), and/or multiple editions of the same publication are placed within the same mailing wrapper or firm bundle and presented as one addressed piece to a single recipient to reduce the per piece charge. [M230.1.2]

## 26.2 Basic Standards

### 26.2.1 Eligibility and Mail Preparation

Each publication in a combined mailing must meet the basic eligibility standards in 4.0 and the specific standards for the rate claimed. In addition, the combined mailing must meet the eligibility and mail preparation standards for the rate claimed. [M230.2.1]

### 26.2.2 Minimum Volume

For combined mailings prepared under 26.1.2a, more than one Periodicals publication, or edition of a publication, may be combined to meet the required minimum volume per bundle, sack, or tray for the rate claimed. For combined mailings prepared under 26.1.2b, the appropriate minimum volume requirements in 22.0, 23.0, 201.3.0, or 25.0 apply for the rate claimed. [M230.2.2]

### 26.2.3 Labeling

All sacks or trays in a combined mailing are labeled the same, as either “NEWS” (see 21.1.3) or as “PER,” depending on which of the following conditions is met:

- a. If at least 51% of the total number of copies in the combined mailing can qualify for “NEWS” treatment, then all sacks or trays in such a mailing are labeled “NEWS,” unless the mailer chooses to use “PER.”
- b. If less than 51% of the total number of copies in a combined mailing can qualify for “NEWS” treatment, then all sacks or trays in such a mailing are labeled “PER.” [M230.2.3]

### 26.2.4 Documentation

Presort documentation required under 708.1.0 must show the total number of addressed pieces and total number of copies for each publication and each edition, if applicable, in the combined mailing claimed at the carrier route, 5-digit, 3-digit, and basic rates. The publisher must also provide a list, by 3-digit ZIP Code prefix, of the number of addressed pieces for each publication and each edition, if applicable, claimed at any destination entry and pallet discounts. [M230.2.4]

### 26.2.5 Postage Statements

Postage statements for a combined mailing must be prepared as follows:

- a. Copy weight and advertising percentage determine whether separate postage statements are required for editions of the same publication:

707.27.1

1. If the copy weight and advertising percentage for all editions of a publication are the same, all the editions may be reported on the same postage statement or each edition may be reported on a separate postage statement.
  2. If either the copy weight or the advertising percentage is different for each edition of a publication, each edition must be reported on a separate postage statement.
- b. For a combined mailing prepared under [26.1.2a](#), a separate postage statement that claims all applicable per piece and per pound charges must be prepared for each publication or edition except as provided in [26.2.5a](#). The mailer must annotate on, or attach to, each postage statement, the title and issue date of each publication or edition included in the combined mailing and indicate that the pieces were prepared as part of a combined mailing under [26.1.2a](#).
- c. For mailings prepared under [26.1.2b](#), a separate postage statement claiming the applicable per pound charges must be prepared for each publication or edition in the combined mailing except as provided in [26.2.5a](#). The mailer must annotate on, or attach to, each postage statement, the title and issue date of each publication or edition included in the combined mailing and indicate that the copies were prepared as part of a combined mailing under [26.1.2b](#). The per piece charges must be claimed as follows:
1. If all copies in a combined mailing prepared under [26.1.2b](#) are eligible for the Classroom or Nonprofit discount, the per piece charges must be claimed only on the postage statement for the publication that contains the highest amount of advertising.
  2. If all copies in a combined mailing prepared under [26.1.2b](#) are not eligible for the Classroom or Nonprofit discount, the per piece charges must be claimed only on the postage statement for the publication that contains the highest amount of advertising.
  3. If a portion of the copies in a combined mailing prepared under [26.1.2b](#) are eligible for the Classroom or Nonprofit discount and a portion are not eligible for those discounts, the per piece charges must be claimed only on the postage statement for the publication that contains the highest amount of advertising and is not eligible for the Classroom or Nonprofit discount. The Classroom or Nonprofit per piece discount must not be claimed. [M230.2.5]

## 27.0 Basic Standards for Periodicals Deposit

### 27.1 Service Objectives

The USPS does not guarantee the delivery of Periodicals within a specified time. Publications authorized or pending authorization for Periodicals entry receive, where practicable, expeditious distribution, dispatch, transit handling, and delivery. Publications labeled "NEWS" receive newspaper treatment if published weekly or more often or if authorized such treatment as of March 1, 1984. [D210.1.0]

**27.2 Periodicals Mail Deposit**

Only a publisher or registered news agent authorized Periodicals mailing privileges may mail at the Periodicals rates. The First-Class Mail, Standard Mail, or Package Services rate must be paid on all copies mailed by the public or by a printer to a publisher. The publisher or news agent must present mailings at the Periodicals rates only:

- a. At post offices where original entry, additional entry, or exceptional dispatch is authorized.
- b. At the times and places designated by the postmaster of the office of mailing or by the AMC/AMF manager. [D210.2.0]

**27.3 Exceptional Dispatch****27.3.1 Purpose of Exceptional Dispatch**

The postmaster of an entry post office may authorize a publisher to deliver copies of a time-sensitive Periodicals publication, at the publisher's own expense and risk, by exceptional dispatch from the post office of original or additional entry to other post offices. [D210.3.1]

**27.3.2 Intended Use of Exceptional Dispatch**

The provision for exceptional dispatch is intended for short-haul local distribution (zones 1 and 2) of publications with total circulation of no more than 25,000 and is not to be used to circumvent additional entry standards. Applications for exceptional dispatch for publications with over 25,000 total circulation may be considered on a case-by-case basis for possible waiver of the 25,000-circulation limit. [D210.3.2]

**27.3.3 Prohibited Use of Exceptional Dispatch**

Exceptional dispatch may not be used for publications authorized to be mailed under the Centralized Postage Payment System or under the plant-verified drop shipment postage payment system. [D210.3.3]

**27.3.4 Destination Rates With Exceptional Dispatch**

Copies of Periodicals publications deposited under exceptional dispatch may be eligible for and claimed at the destination sectional center facility (DSCF) or destination delivery unit (DDU) rates if the applicable standards in 28.0 are met. [D210.3.4]

**27.3.5 Applying to Use Exceptional Dispatch**

The publisher must file an application for exceptional dispatch at the office of original or additional entry where the postage is paid on the copies to be transported. The application must fully explain the proposed exceptional dispatch and include information on the mode of transportation and approximate time of arrival and the number of pieces qualifying for and mailed at the various presort level discount rates. If the number of pieces qualifying for and mailed at such rates changes more than 2%, the publisher must file an amended application with the approving office. The application may be filed jointly with applications for original entry, reentry, or special rates, or filed separately. No form is provided for this application. [D210.3.5]

**27.3.6 Approval to Use Exceptional Dispatch**

The postmaster who received the application approves it if the requested exceptional dispatch improves service and does not add to USPS costs. [D210.3.6]

707.27.3.7

**27.3.7 Appealing Denied Applications**

Denial of an application for exceptional dispatch may be appealed to the PCSC. The PCSC manager issues the final decision. [D210.3.7]

**27.4 Deposit at AMF****27.4.1 General**

Periodicals publications air freighted to an AMC/AMF must have either an original or additional entry authorization at the verifying office (i.e., the post office where those copies are presented for postal verification) and must be presented to an AMC/AMF under the PVDS program. Postage must be paid at the verifying office unless the publication is authorized under the Centralized Postage Payment program. [D210.4.1]

**27.4.2 Applying For AMF Deposit**

Authorization to enter airfreighted copies of a Periodicals publication at an AMF is obtained by filing an additional entry application. The distribution plan on Form 3510 must show the AMF as the entry point rather than the administering office (i.e., the post office responsible for the AMF). A publisher using plant-verified drop shipment must submit a copy of the distribution plan for the airfreighted copies to the administering office postmaster. [D210.4.2]

**27.4.3 Reentry Fee**

The required additional entry fee is not due if:

1. Form 3510 is submitted with either an initial application for Periodicals mailing privileges or an application for reentry at a new original entry office, and the AMF is under the jurisdiction of that original entry office.
2. The verifying office is already an authorized original or additional entry for the publication. [D210.4.3]

**27.4.4 Publisher Responsibilities [for AMF Deposit]**

For each mailing to be presented at the AMF, the publisher or agent is required:

- a. To provide the administering office postmaster with a delivery schedule (including the publication title, volume, air carrier, flight number, and arrival schedule) before the first mailing under the authorization. A revised schedule must be provided when there are changes.
- b. To arrange for delivery of the airfreighted copies of the publication to the AMC/AMF “back dock” or other area designated by the AMC/AMF manager.
- c. To arrange for payment of postage and submission of required postage statements and documentation with the copies of the publication to the verifying post office.
- d. To notify the designated AMF contact person when there are deviations from established transportation and delivery schedules.
- e. To ensure that Form 8125 accompanies each shipment. The total number of airline cargo containers must be annotated on the form in the comment section. Each airline cargo container must be sequentially numbered (e.g., 1 of 4, 2 of 4, etc.), and a copy of Form 8125 must be affixed to each airline cargo container.

- f. To provide a list, at least once a year, of publications entered at the AMC/AMF and a 24-hour contact number to the AMC/AMF manager.
- g. To follow procedures outlined in Network Operation Management's standard operating procedures (SOP). The procedures are available from the AMC/AMF manager. [D210.4.4]

#### **27.4.5 Nonconforming Mailers**

When a Periodicals mailing presented to an AMC/AMF fails to meet the procedures outlined in Network Operation Management's SOP or fails to meet either the basic mail preparation standards or the PVDS entry integrity and safety standards, the USPS will inform the mailer, or the mailer's agent, who presented the mailing. If, after the initial notification, the mailer continues to fail to meet the standards, the mailer is considered nonconforming. If a mailer is found to be nonconforming, its authorization to enter mail at an AMC/AMF may be revoked. [D210.4.5]

## 28.0 Destination Entry Rate Eligibility

### 28.1 Basic Standards

#### **28.1.1 Rate Application**

Outside-County addressed pieces may qualify for destination area distribution center (DADC) or destination sectional center facility (DSCF) rates and discounts subject to the standards in 28.2 and 28.3, respectively. Carrier route rate addressed pieces may qualify for destination delivery unit (DDU) rates and discounts subject to the standards in 28.4. Any advertising portion may be eligible for DADC, DSCF, or DDU advertising pound rates based on the entry facility and the address on the piece. For each addressed piece, only one destination entry discount may be claimed. An individual bundle, tray, sack, or pallet may contain pieces claimed at different destination entry rates and discounts. Addressed pieces may also qualify for the destination entry pallet per piece discount in 11.0. In-County carrier route rate addressed pieces may qualify for the DDU discount subject to the standards in 28.4. [E250.1.1]

#### **28.1.2 Documentation of Postage**

Subject to 708.1.0, the mailer must be able to show compliance with eligibility requirements (e.g., by bundle, tray, sack, or pallet), and list the number of addressed pieces by presort level for each 5-digit and 3-digit ZIP Code destination as appropriate for the rates and discounts claimed. Documentation is not required if each addressed piece in the mailing is of identical weight, and are separated by zone, rate, and destination entry (if applicable), when presented for mailing. [E250.1.2]

### 28.2 Destination Area Distribution Center (DADC)

#### **28.2.1 Definition**

For this standard, DADC includes the facilities listed in L004, or a USPS- designated facility. [E250.2.1]

707.28.2.2

**28.2.2 General Eligibility**

Addressed pieces meeting the standards in [28.1](#) and [28.2](#) are eligible for DADC rates when deposited at an ADC (or USPS-designated facility), and are addressed for delivery to one of the 3-digit ZIP Codes served by the facility where deposited. [E250.2.2]

**28.2.3 Rates**

DADC rates include a per piece discount off the addressed piece rate and, if applicable, an advertising pound rate. Pieces must meet the standards for any other rate and discount claimed. [E250.2.3]

**28.3 Destination Sectional Center Facility (DSCF)****28.3.1 Definition**

For this standard, DSCF includes the facilities listed in [L005](#) and [L006](#), or a USPS-designated facility. [E250.3.1]

**28.3.2 General Eligibility**

Addressed pieces meeting the standards in [28.1](#) and [28.3](#) are eligible for DSCF discounts when deposited at an SCF (or USPS-designated facility), and addressed for delivery within the service area of the facility, including when part of a 3-digit scheme combination in [L008](#). [E250.3.2]

**28.3.3 Rates**

DSCF rates include a per piece discount off the addressed piece rate and, if applicable, an advertising pound rate. Pieces must meet the standards for any other rate and discount claimed. [E250.3.3]

**28.4 Destination Delivery Unit (DDU)****28.4.1 Definition**

For this standard, the DDU is the facility where the carrier cases mail for delivery to the addresses on the pieces in the mailing. [E250.4.1]

**28.4.2 General Eligibility**

Addressed pieces, including pieces under exceptional dispatch, meeting the standards in [28.1](#) and [28.4](#) are eligible for DDU rates when deposited at the facility where the carrier serving the delivery address on the mail is located. [E250.4.2]

**28.4.3 Rates**

DDU rates for Outside-County include a per piece discount off the addressed piece rate and, if applicable, an advertising pound rate. DDU rates for In-County consist of a per piece discount off the addressed piece rate and a pound charge. Outside-County and In-County pieces must meet the standards for any other rate and discount claimed. [E250.4.3]

**28.4.4 Maximum Volume**

The same mailer may not present for deposit more than four DDU rate mailings at the same delivery unit (or another acting as its agent) in any 24-hour period. This limit may be waived if local conditions permit. A mailer may ask for such a waiver when scheduling deposit of the mailings. There is no maximum for plant-verified drop shipments made under [705.15.0](#). This standard does not apply to mailings

presented to the publication's authorized original entry, or additional entry, serving the place where the pieces were prepared for mailing, if that entry post office is also the facility at which the DDU rate pieces must be deposited. [E250.4.4]

#### **28.4.5 Deposit Schedule**

The mailer may schedule deposit of DDU rate mailings at least 24 hours in advance by contacting the district office in whose service area the destination facility is located. The mailer must follow the scheduled deposit time provided. The mailer may request standing appointments for renewable 6-month periods by written application to the district office in whose service area the destination facility is located. Mixed loads of Periodicals and Standard Mail or Package Services mail require advance appointments for deposit. For mail entered under exceptional dispatch, the application for exceptional dispatch required under 27.3 also serves as a request for standing appointments. [E250.4.5]

#### **28.4.6 Vehicle Unloading**

At destination delivery units (DDUs), the driver must unload all mail, whether bedloaded, sacked, or palletized (including pallet boxes on pallets) within 1 hour of arrival. If pallets (including pallet boxes on pallets) are stacked, the driver must unload, unstack, and unstrap them. If a mailer transports palletized mail (including sacks on pallets) to a DDU that cannot handle pallets, the driver must unload the pallets into a container specified by the DDU. The driver may be required to place bedloaded bundles prepared under 23.4.2 and sacks into containers provided by the DDU to maintain separation by 5-digit ZIP Code or 5-digit scheme (L001), as applicable, or to place containerized mail so as to maintain the separation of 5-digit ZIP Codes or 5-digit schemes. For scheduled arrivals at DDUs when USPS personnel may not be present, mail must be placed in a secure location protected from the weather. [E250.4.6]

## 29.0 Additional Entry

### 29.1 Basic Information

#### **29.1.1 Definition**

The term additional entry office refers to a post office where a publisher is authorized by the USPS to present copies of a Periodicals publication for postal verification. An additional entry authorization must be in effect for each post office where copies of the Periodicals publications are presented for postal verification. The publisher must deposit money and file postage statements for copies presented at an additional entry office unless the USPS authorizes an alternative postage payment method (e.g., Centralized Postage Payment (CPP) System under 16.0 and 17.0). Except for publications authorized an alternative payment method, the verification post office is also the office where Periodicals postage is paid. [D230.1.1]

#### **29.1.2 Eligibility**

The additional entry office must be a post office. Publication 65, *National Five-Digit ZIP Code and Post Office Directory*, shows whether a particular postal facility is a post office. [D230.1.2]

707.29.1.3

**29.1.3 Restrictions**

An additional entry may be authorized only at a post office where transportation and mail processing resources are adequate. The USPS does not authorize an additional entry if the publisher's requested effective date would cause the USPS additional transportation costs in serving the affected entry office. [D230.1.3]

**29.1.4 Same County**

Additional entries may be authorized in the same county as the office of original entry. If the publication is eligible for In-County rates, the publisher must provide the original entry office postmaster with a duplicate of all postage statements on which those rates are claimed. [D230.1.4]

**29.1.5 Distribution Plan**

The publisher must establish a distribution plan for each additional entry to detail the volume and ZIP Code ranges to be presented. Revisions to a distribution plan must account for copies for any additional entry being modified or canceled. When applicable, the publisher must specify how the distribution plan is to vary during the year (e.g., periodic fluctuations or transfers of volume or mailing activity). Separate distribution plans are required if there are differences in the distribution of regular issues, special issues, or back issues. [D230.2.0]

**29.2 Authorizing****29.2.1 Filing**

The publisher is responsible for timely filing of all forms and supporting documentation to establish, modify, or cancel an additional entry. [D230.3.1]

**29.2.2 Method**

To establish or cancel an additional entry for the scheduled presentation of regular, special, or back issues or for unscheduled contingency use, the publisher must submit two copies of Form 3510 marked "Pending" to the postmaster of the original entry post office. A publisher authorized to mail under the Centralized Postage Payment (CPP) System has additional filing requirements. [D230.3.2]

**29.2.3 Documentation**

Two copies of the most recent issue of the publication must accompany the application. If applicable, these copies must either contain an amended identification statement or show how it is to be amended in a specific future issue. [D230.3.3]

**29.2.4 Modifying Distribution**

The publisher must file Form 3510 and pay the required fee to modify a distribution plan and cancel additional entry points no longer used. [D230.3.4]

**29.2.5 Concurrent Application**

The publisher may *concurrently* apply for:

- a. Original entry and additional entry, although separate forms and fees are required for each.

- b. Establishment, modification, and/or cancelation of more than one additional entry, by filing a single Form 3510 and paying a single fee, if all required information is supplied for each entry, and the effective dates for the additional entry actions cover no more than 30 calendar days. [D230.3.5]

#### **29.2.6 Separate Application**

The publisher must submit a *separate* Form 3510 (with the applicable fee) for:

- a. Each additional entry action that cannot meet the standards of [29.2.5](#).
- b. Each reentry request.
- c. Any modification to the publication's distribution plan other than frequency of issuance or location of original entry. [D230.3.6]

#### **29.2.7 Fee**

The required additional entry fee must accompany an application for additional entry. One fee is charged regardless of the number of additional entries established. No additional fee is charged if the same Form 3510 is used to close or modify other additional entries, subject to the conditions stated above. The required reentry fee must accompany a Form 3510 that modifies or closes an additional entry. Only one fee is charged if the same Form 3510 is used to close or modify more than one additional entry, subject to the conditions stated above. [D230.3.7]

#### **29.2.8 Submission Date**

Timely adjustment of transportation without penalty to the USPS requires the publisher to submit requests for establishing, modifying, or canceling an additional entry at least 30 days before the requested effective date. A publisher authorized to mail under the Centralized Postage Payment (CPP) System has additional filing requirements. [D230.3.8]

#### **29.2.9 Information**

The USPS reserves the right to ask for more information about the application. The publisher's failure to provide such information is sufficient grounds to deny the application. [D230.3.9]

#### **29.2.10 Application Denial**

Except for pending publications, the manager of the PCSC rules on all applications requesting additional entry. If the application is denied, the denial takes effect 15 days from the publisher's receipt of the notice unless, within that time, the publisher files an appeal, through the PCSC, with the manager of Mailing Standards (see [608.8.0](#) for address), who issues the final agency decision. [D230.3.10]

### **29.3 Use of Additional Entry**

#### **29.3.1 Effective Date**

Subject to the restrictions detailed above, the effective date for use of an additional entry authorization is that requested by the publisher. However, the USPS may defer that date until transportation or other resources are in place to support the action requested. If the deferral is due to contractual limitations, the publisher's requested effective date may be approved if the publisher agrees to reimburse the USPS for any cost for modifying or canceling contracted transportation. [D230.4.1]

707.29.3.2

**29.3.2 Unauthorized**

An additional entry may not be used until authorized by the USPS. A publisher may not pay postage at another rate to present copies at an unauthorized additional entry. [D230.4.2]

**29.3.3 Annual Use**

Copies of a Periodicals publication must be presented at each additional entry (including contingency entries) at least once each calendar year. [D230.4.3]

**29.3.4 Following Plan**

Once an entry and its distribution plan are authorized, the publisher must ensure that copies are presented accordingly or as provided in [29.4, Modification](#), for limited temporary changes. Additional entry offices may not accept copies not included in the publisher's authorized distribution plan. [D230.4.4]

**29.3.5 Mixed Loads**

Advance appointments for deposit must be made for mixed loads of Periodicals and Standard Mail, handled operationally as Standard Mail. [D230.4.5]

**29.3.6 Postage**

Postage must be prepaid and available for all copies presented for verification at an additional entry office before their release. [D230.4.6]

**29.4 Modification****29.4.1 Permanent Change**

Except as provided below, the publisher may modify the use of an authorized entry post office only after submitting Form 3510 and receiving USPS approval. [D230.5.1]

**29.4.2 Temporary Change**

When a limited, temporary change affects only the distribution plans of two existing authorized entry post offices for one specific issue of a publication, the publisher must submit a letter detailing the specific issue, the dates and duration of mailing of the issue, the entry offices, and the volume and distribution area (ZIP Codes) affected by the modification. The postmaster of the original entry and additional entry offices affected for the issue of the publication involved and all distribution networks offices involved must receive the request at least 10 calendar days before the effective date of the change. See [29.3.1](#) above. [D230.5.2]

**29.4.3 Misuse**

Limited temporary changes must not be used instead of permanent alterations to authorized distribution plans. [D230.5.3]

**29.5 Cancellation, Revocation, And Restoration****29.5.1 Cancellation**

When a distribution plan modification results in nonuse of an additional entry, that entry must be canceled as part of the additional entry action. If a publisher fails to file Form 3510 to cancel an authorized additional entry, the PCSC manager cancels the additional entry upon notification by the additional entry postmaster that no mailings have been made for an entire calendar year. [D230.6.1]

**29.5.2 Revocation**

The USPS may revoke an additional entry authorization when the publication is found ineligible for such authorization. The revocation takes effect 15 days after the publisher receives notice, unless an appeal is filed through the PCSC with the manager of Mailing Standards (see [608.8.0](#) for address), who issues the final agency decision. [D230.6.2]

**29.5.3 Restoration**

To restore an additional entry authorization previously canceled or revoked, the publisher must submit Form 3510 and pay the required fee. [D230.6.3]

# 708 Technical Specifications

## Overview

- 1.0 Standardized Documentation for First-Class Mail, Periodicals, Standard Mail, and Flat-Size Bound Printed Matter
- 2.0 Presort Accuracy Validation and Evaluation (PAVE)
- 3.0 Coding Accuracy Support System (CASS)
- 4.0 Barcoding Standards for Letters and Flats
- 5.0 Barcoding Standards for Parcels
- 6.0 Barcoding Standards for Container Labels
- 7.0 Optional Endorsement Lines (OEL)
- 8.0 Carrier Route Information Lines
- 9.0 Facing Identification Mark (FIM)
- 10.0 Postal Zones

## 1.0 Standardized Documentation for First-Class Mail, Periodicals, Standard Mail, and Flat-Size Bound Printed Matter

### 1.1 Basic Standards

For First-Class Mail, Periodicals, Standard Mail, and flat-size Bound Printed Matter, documentation must be produced by software certified under the Presort Accuracy Validation and Evaluation (PAVE) program or the Manifest Analysis and Certification (MAC) program, appropriate for the accompanying class of mail and rate claimed, or the documentation must be prepared as standardized documentation according to this section. Standardized documentation contains the elements described in 1.2 through 1.5, as applicable. Documentation produced by PAVE-certified or MAC-certified software is considered standardized documentation. [P012.2.1]

### 1.2 Format and Content

For First-Class Mail, Periodicals, Standard Mail, and flat-size Bound Printed Matter, standardized documentation includes:

- a. A heading identifying the listing as a “USPS Qualification Report” appearing at the top of each page. The heading must contain these elements:
  1. For First-Class Mail and Standard Mail, the name of the mailer and the mailing, a mailing identification code corresponding to the postage statement, the date (e.g., the date when the list was processed or the documentation was produced), the class of mail, and either the DMM standard under which the mail was prepared (e.g., 245.5.0 for letters, 345.5.0 for flats, and 445.5.0 for parcels or 234.4.0 and 235.6.0 for First-Class Letters, and 244.4.0 and 245.7.0 for Standard Mail Letters) or the type of rates claimed.
  2. For Periodicals, each publication title and publication number corresponding to the postage statement and entry office, the date (e.g., the date when the list was processed or the documentation was

## 708.1.2

produced), the class of mail, and either the DMM standard under which the mail was prepared (e.g., [707.22.0, Preparation of Presorted Periodicals](#), [707.23.0, Preparation of Carrier Route Periodicals](#), or [707.24.0, Preparation of Letter-Size Automation Periodicals](#)) or the type of rates claimed. For publications that are combined or copalletized and represented on the same documentation, all publication titles and publication numbers are required to be listed in the header only on the first page.

- b. Sequential page numbers in the body of the listing.
- c. For mail in trays or sacks, the body of the listing reporting these required elements:
  1. Tray/sack sortation level.
  2. Tray/sack destination ZIP Code (use destination on top line of tray/sack label except that, for 3-digit carrier routes trays, list the individual 5-digit ZIP Codes contained in each tray).
  3. Depending on mail preparation: (a) group destination for automation letter mail (number of pieces) for each carrier route in carrier routes trays (First-Class Mail and Standard Mail) including the 5-digit ZIP Code and carrier route for pieces in 3-digit carrier routes trays; for each 5-digit ZIP Code in 5-digit scheme trays; for each 3-digit ZIP Code prefix in 3-digit scheme trays; for each 3-digit or 3-digit scheme in AADC trays; and for each AADC in mixed AADC trays; or (b) bundle level and bundle destination for automation flats, regular nonautomation presort mail, and Enhanced Carrier Route Standard Mail (use the presort destination as described in Mail Preparation standards for each class of mail); or (c) group destination for automation flats prepared under the tray-based option for each 3-digit in ADC trays and for each ADC in mixed ADC trays; or (d) group destination for each 5-digit ZIP Code in 5-digit scheme bundles and each 3-digit ZIP Code in 3-digit scheme bundles (Periodicals, Standard Mail, and Bound Printed Matter flats).
  4. Separate columns for each rate reported in the mailing, with pieces reported in the appropriate column, and a running total of pieces mailed that is continuous for each mailing (group information either in ZIP Code order and by sortation level or by sortation level and within each sortation level, by ZIP Code; report trays and sacks on pallets by pallet level and destination; include all information required in [1.2c](#) for mail in trays or sacks). Pieces prepared in 5-digit scheme bundles (Periodicals, Standard Mail, and Bound Printed Matter flats) must be listed by individual 5-digit ZIP Code within the 5-digit scheme bundle. Pieces prepared in 3-digit scheme bundles (Periodicals, Standard Mail, and Bound Printed Matter flats) must be listed by individual 3-digit ZIP Code within the 3-digit scheme bundle. Document SCF or BMC pallets created as a result of bundle reallocation under [705.8.11](#) or [705.8.12](#) on the USPS Qualification Report by designating the protected pallet with an identifier of "PSCF" (for

an SCF pallet) or "PBMC" (for a BMC pallet). These identifiers are required only on the USPS Qualification Report; they are not required on pallet labels or on any other mailing documentation.

5. A running total of pieces mailed that is continuous for each mailing.
  6. The tray identification number and tray size (1-foot or 2-foot) if available for letter mail in trays. The tray identification number is optional for tray-based automation flats.
  7. Separate columns for each rate reported in the mailing, with pieces reported in the appropriate column (group information either in ZIP Code order and by sortation level or by sortation level and within each sortation level, by ZIP Code).
  8. For all nonautomation rate Periodicals mailings that contain firm bundles, include a separate "Copies" column showing the number of copies for each bundle sortation level and destination. If mailings do not include firm bundles, a "Copies" column is optional because the number of copies equals the number of pieces reported. Copies included in firm bundles may be listed with other pieces to the same presort level destination with the number of copies and number of pieces reported as one line item entry, or firm bundles may be listed as separate line items under the "Group Destination" column followed by "F" (e.g., "C001F" or "12345F"), with the number of pieces reported in the "Rate" column. When firm bundles are reported separately in the "Group Destination" column, pieces for the same presort destination must be reported immediately before or after the firm bundles (e.g., one firm bundle for "C001" followed by five other pieces for "C001" that constitute a bundle of six pieces for the carrier route rate).
  9. For all Periodicals mailings, include a separate "Zone" column. If all copies for a specific tray destination (automation letters only), group destination, or bundle destination are subject to the same zone rate or entry discount, show the applicable zone or destination entry discount for those copies using the zone abbreviations in 1.7.3. If copies for a bundle destination or pieces for a tray destination (automation letters only) are for multiple zones, show all zones included (e.g., "3/4/6") or show "Mixed" (or the authorized abbreviation "M") in the "Zone" column. Report foreign copies separately.
- d. For bundles on pallets, the body of the listing reporting these required elements:
1. Pallet sortation level.
  2. Pallet destination ZIP Code (use destination on top line of pallet label).
  3. For each bundle, the sortation level and number of pieces claimed at each rate.
  4. Separate columns for each rate reported in the mailing, with pieces reported in the appropriate column, and a running total of pieces mailed that is continuous for each mailing (group information either in ZIP Code order and by sortation level or by sortation level and within each sortation level, by ZIP Code; report trays and sacks on pallets by pallet level and

## 708.1.2

destination; include all information required in 1.2c for mail in trays or sacks). Document SCF or BMC pallets created as a result of bundle reallocation under 705.8.11 or 705.8.12 on the USPS Qualification Report by designating the protected pallet with an identifier of “PSCF” (for a SCF pallet) or “PBMC” (for a BMC pallet). These identifiers are required to appear only on the USPS Qualification Report; they are not required to appear on pallet labels or on any other mailing documentation.

5. For mailings prepared as bundles on pallets under 705.12.0 and 705.13.0, a separate 5% threshold summary must appear beneath the pallet rate summary for the last physical pallet of each logical merged 5-digit scheme pallet and logical merged 5-digit pallet as provided in 705.12.1, 705.12.2, 705.13.1, or 705.13.2, as applicable.
  6. For all Periodicals mailings, include a separate “Zone” column. If all copies for a specific bundle destination are subject to the same zone rate or entry discount, show the applicable zone or destination entry discount for those copies using the zone abbreviations in 707.17.6.3. If copies for a bundle destination are for multiple zones, show all zones included (e.g., “3/4/6”) or show “Mixed” (or the authorized abbreviation “M”) in the “Zone” column. Report foreign copies separately.
  7. At the end of the listing, a summary report of the total number of pieces claimed at each postage rate on the pallet by postage payment method, and the total number of pieces and the total weight of the mail on the pallet.
- e. At the end of the documentation, a summary report of the total number of pieces mailed at each postage rate for each mailing reported on the listing by postage payment method (and by entry point for drop shipment mailings) and the total number of pieces in each mailing. This information must correspond to the information reported on the postage statement(s) for the pieces reported. For Periodicals, include a summary of the total number of copies for each zone, including In-County, delivery unit, SCF, and ADC rates. A separate summary report is not required if a PAVE-certified postage statement facsimile(s) generated by the presort software used to prepare the standardized documentation is presented for each mailing. Additional data must be provided if necessary to calculate the amount of postage for the mailing (or additional postage due, or postage to be refunded) if nonidentical-weight pieces that do not bear the correct postage at the rate for which they qualify are included in the mailing, or if different rates of postage are affixed to pieces in the mailing.
- [P012.2.2]

**1.3 Rate Level Column Headings**

The actual name of the rate level (or corresponding abbreviation) is used for column headings required by 1.2, *Format and Content*, and shown below:

a. Automation First-Class Mail, Periodicals, and Standard Mail:

| <b>RATE</b>  | <b>ABBREVIATION</b> |
|--|---------------------|
| Carrier Route [First-Class Mail letters/cards]   | CB                  |
| 5-Digit [First-Class Mail letters/cards and flats, Periodicals letters and flats, and Standard Mail letters] | 5B                  |
| 3-Digit [First-Class Mail letters/cards and flats, Periodicals letters and flats, and Standard Mail letters] | 3B                  |
| AADC [First-Class Mail letters/cards and Standard Mail letters]  | AB                  |
| ADC [First-Class Mail flats]   | AB                  |
| Mixed AADC [First-Class Mail letters/cards and Standard Mail letters]  | MB                  |
| Mixed ADC [First-Class Mail flats]   | MB                  |
| 3/5 [Standard Mail flats]  | 3/5B                |
| Basic [Standard Mail flats]  | BB                  |

b. Presorted First-Class Mail, nonautomation presorted Periodicals, and Standard Mail:

| <b>RATE</b>  | <b>ABBREVIATION</b> |
|--|---------------------|
| Presorted [First-Class Mail letters/cards, flats, and parcels] | Presort             |
| 5-Digit [Periodicals letters, flats, and parcels]              | 5D                  |
| 3-Digit [Periodicals letters, flats, and parcels]              | 3D                  |
| 3/5 [Standard Mail letters, flats, and parcels]                | 3/5                 |
| Basic [letters/cards and flats]                                | BS                  |

c. Carrier route Periodicals and Enhanced Carrier Route Standard Mail:

| <b>RATE</b>  | <b>ABBREVIATION</b> |
|--|---------------------|
| Saturation [letters, flats, and irregular parcels]   | WS                  |
| High Density [letters, flats, and irregular parcels] | HD                  |
| Basic [letters, flats, and irregular parcels]        | CR                  |
| Basic Automation [Standard Mail letters]             | CB                  |

[P012.2.3]

708.1.4

**1.4 Sortation Level**

The actual sortation level (or corresponding abbreviation) is used for the bundle, tray, sack, or pallet levels required by 1.2 and shown below:

| <b>SORTATION LEVEL</b>   | <b>ABBREVIATION</b> |
|--|---------------------|
| Carrier Route  | CRD                 |
| 5-Digit Carrier Routes   | CR5                 |
| 5-Digit Scheme Carrier Routes [sacks and pallets, Periodicals flats and irregular parcels, Standard Mail flats]                | CR5S                |
| 5-Digit Scheme [barcoded letters, barcoded and cobundled flats]  | 5DGS                |
| 5-Digit Scheme [pallets, Periodicals flats and irregular parcels, Standard Mail flats]   | 5DGS                |
| Merged 5-Digit [sacks and pallets, Periodicals flats and irregular parcels, Standard Mail flats]                               | M5D                 |
| Merged 5-Digit Scheme [sacks and pallets, Periodicals flats and irregular parcels, Standard Mail flats]                        | M5DS                |
| 5-Digit  | 5DG                 |
| 5-Digit Metro [pallets only, for Periodicals flats and irregular parcels, Standard Mail flats, and Bound Printed Matter flats] | MET                 |
| 3-Digit Carrier Routes   | CR3                 |
| 3-Digit  | 3DG                 |
| 3-Digit Scheme [barcoded letters, barcoded and cobundled flats]  | 3DGS                |
| ADC  | ADC                 |
| AADC   | AADC                |
| Mixed ADC  | MADC                |
| Mixed AADC   | MAAD                |
| SCF [pallets, Periodicals flats, Bound Printed Matter]   | SCF                 |
| SCF [pallets created from bundle reallocation]   | PSCF                |
| BMC  | BMC                 |
| ASF  | ASF                 |
| BMC [pallets created from bundle reallocation]   | PBMC                |
| Mixed BMC [working]  | MBMC                |

[P012.2.4]

**1.5 Combined, Copalletized, and Merged Mailings**

For combined or copalletized mailings of Periodicals and Standard Mail prepared under 705.8.0, 705.10.0, 705.12.0, or 705.13.0, the listing must show this additional information:

- a. For mailings that require a separate postage statement, a column that further identifies the contents of all trays/bundles by product or edition code. The applicable rates for each product or edition must be shown in the correct "Rate" column and must be summarized for each tray, sack, or pallet and for the entire mailing. For Periodicals, when copies of multiple editions or publications are combined in a firm bundle claimed as one piece, report "0" in

the “Product/Edition Code” column for all but one edition or publication contained in the firm bundle, report “1” in the appropriate associated “Piece Rate” column for that edition or publication, and report “0” in the “Piece Rate” column for the other editions or publications contained in the firm bundle.

- b. For large-volume mailing jobs reported on a single listing, the mailer may provide abbreviated documentation that shows full bundle detail for the first 20 pallets/sacks and every twentieth pallet/sack after that if the mailer keeps full bundle detail (by product or edition code and rate) for the entire mailing job for 90 days and can provide it to the USPS on request within 3 working days. Abbreviated documentation must include the rate summary by product or edition for each pallet/sack, including those for which full detail bundle listings are not reported. [P012.2.5]

**1.6 Optional Information**

Standardized documentation may include additional information about the pieces mailed (such as individual tray or sack total piece counts, optional identification codes, bundle weights) if this information does not conflict with the information required under 1.2 through 1.5. [P012.2.6]

**1.7 Detailed Zone Listing for Periodicals**

**1.7.1 Definition and Retention**

The publisher must be able to present documentation to support the actual number of copies of each edition of an issue, by entry point, mailed to each zone, at DDU, DSCF, DADC, and In-County rates. This listing is separate from the standardized documentation required under 1.0 to support presort. This listing may be submitted with each mailing, or, as an alternative, a publisher may keep records supporting zone and destination entry information reported on the postage statement for each mailing. Records must be kept for 2 months after the mailing date. A publisher must be able to submit detailed zone listings for specific mailings when requested in advance by the USPS. [P012.3.1]

**1.7.2 Characteristics**

Report the number of copies mailed to each 3-digit ZIP Code area at applicable zone rates using one of the following formats:

- a. Report copies by 3-digit ZIP Code, listed in ascending numeric order, for all ZIP Codes in the mailing. The listing must include the following columns: 3-digit ZIP Code, zone, and number of copies (for the zone). Include a summary of the number of copies at each zone rate at the end of the report. A 3-digit ZIP Code may appear more than once if there are copies at different zone rates for that ZIP Code (e.g., In-County and outside-county rate copies within the same 3-digit ZIP Code area).
- b. Report copies by zone (In-County DDU, In-County others, Outside-County DDU, Outside-County DSCF, and Outside-County DADC) and by 3-digit ZIP Code, listed in ascending numeric order, for each zone. For each zone, the listing must include the following columns: 3-digit ZIP Code and number of copies (for each zone) in the mailing. Include a summary of the total number of copies for each zone at the end of each zone listing. A 3-digit ZIP Code may

## 708.1.7.3

appear under more than one zone if there are copies at different zone rates for that ZIP Code (e.g., In-County and outside-county rate copies within the same 3-digit ZIP Code area). [P012.3.2]

### 1.7.3 Zone Abbreviations

Use the actual rate name or the authorized zone abbreviation in the listings in 1.0 and 707.17.6.2:

| ZONE ABBREVIATION                | RATE EQUIVALENT                   |
|----------------------------------|-----------------------------------|
| ICD                              | In-County, DDU                    |
| IC                               | In-County, Others                 |
| DDU                              | Outside-County, DDU               |
| SCF                              | Outside-County, DSCF              |
| ADC                              | Outside-County, DADC              |
| 1-2 or 1/2                       | zones 1 and 2                     |
| 3, 4, 5, 6, 7, 8 (as applicable) | zones 3 through 8 (as applicable) |
| M                                | mixed zones                       |

[P012.3.3]

## 2.0 Presort Accuracy Validation and Evaluation (PAVE)

### 2.1 Presort Accuracy Validation and Evaluation (PAVE)

#### 2.1.1 Basic Information

The Presort Accuracy Validation and Evaluation (PAVE) program is a process to evaluate presort software and determine its accuracy in sorting address files under DMM standards. PAVE is available only to software and hardware manufacturers (i.e., companies that develop presort software or manufacture presorting equipment). PAVE certification does not guarantee acceptance of customer mail prepared with PAVE-validated hardware/software. [M011.2.1]

#### 2.1.2 Process

PAVE evaluates the accuracy of presort products by providing test address files to vendors. Vendors process the test file(s) through their presort software or hardware and return the resulting postage statement facsimile(s) and other presort documentation to the USPS National Customer Support Center (NCSC) for evaluation of the answers. Each test file is evaluated for its accuracy of presort, compliance with current DMM standards, accuracy of sack/tray/pallet tag labels, and general acceptability of computer-generated facsimiles of postage statements and other presort documentation. If the answers are accurate, the vendor's presort product is validated for a 12-month period or until the end of the current annual period. [M011.2.2]

**2.1.3 Participation**

For information on participation in PAVE, presort product developers may request the *PAVE Program Technical Guide* from the NCSC by calling 1-800-238-3150. Participants may use the PAVE form included in that guide to order PAVE test files. [M011.2.3]

**3.0 Coding Accuracy Support System (CASS)**

**3.1 Basic Information**

**3.1.1 Purpose**

The Coding Accuracy Support System (CASS) improves the accuracy of delivery point codes, ZIP+4 codes, 5-digit ZIP Codes, and carrier route codes on mailpieces. CASS provides a common platform to measure the quality of address matching software and to diagnose and correct software problems. [A950.1.1]

**3.1.2 Requirement**

Any mailing claimed at an automation rate must be produced from address lists properly matched and coded with CASS-certified address matching methods listed below. A mailer using multiline optical character readers (MLOCs) to print delivery point barcodes on mailpieces (or for flats, ZIP+4 barcodes) must also obtain CASS certification (including Multiline Accuracy Support System (MASS)) for the address matching software used on the MLOCs. [A950.1.2]

**3.1.3 Methods**

[02-03-05] Delivery point or ZIP+4 coding may be obtained by using the National Change of Address Linkage System (NCOA<sup>Link</sup>); CASS-certified DPC address matching software; CASS-certified Z4CHANGE process; or Delivery Sequence File, Second Generation (DSF<sup>2</sup>) process. [A950.1.3]

**3.2 Software Certification**

**3.2.1 General**

Any user of address matching software that applies ZIP+4 codes to address lists to obtain an automation rate must use address matching software that is CASS-certified. Address matching software used to ZIP+4 code address records must, as part of its process, return a standardized address to ensure that the ZIP+4 code or mailer-applied barcode represents the proper depth of code available. The original input address submitted for coding may also be returned. The CASS-certified address matching software must be used according to specific parameter settings (configurations) as described below. [A950.2.1]

**3.2.2 Software Configuration**

All address lists used to produce mailings for automation rates must be matched and ZIP+4 coded with current CASS-certified software in line with the configuration standards shown below. Summary output reports or computer-generated facsimile Forms 3553 must contain information about the configuration used when processing the address list on the CASS-certified address matching software. [A950.2.2]

### 3.2.3 Permissible Configurations

These are permissible configurations for address matching software:

- a. Vendor-Supplied Software With Vendor CASS-certified Software Configurations. The software vendor is CASS-certified for specific configurations. The user is using that software as prescribed by the vendor and with the CASS-certified configurations obtained by the vendor.
- b. Vendor-Supplied Software With User CASS-certified Software Configurations. The software user is using vendor-supplied software in a configuration not CASS-certified by the vendor but by the user.
- c. User-Developed Software for Which User Obtained CASS Certification. The software user obtained individual user CASS certification for self-developed software and is using it as certified. [A950.2.3]

### 3.2.4 Use

When used for ZIP+4 or delivery point barcoding, the address matching software and coding methods must have a valid CASS certification and use the current USPS ZIP+4 Product updated to include all applicable change transaction files. [A950.2.4]

## 3.3 Date of Address Matching and Coding

### 3.3.1 Update Standards

Unless Z4CHANGE is used, all automation and carrier route mailings bearing addresses coded by any AIS product must be coded with current CASS-certified software and the current USPS database. Coding must be done within 90 days before the mailing date for all carrier route mailings and within 180 days before the mailing date for all non-carrier route automation rate mailings. All AIS products may be used immediately on release. New product releases must be included in address matching systems no later than 45 days after the release date. The overlap in dates for product use allows mailers adequate time to install the new data files and test their systems. Mailers are expected to update their systems with the latest data files as soon as practicable and need not wait until the “last permissible use” date. The mailer’s signature on the postage statement certifies that this standard has been met when the corresponding mail is presented to the USPS. The “current USPS database” product cycle is defined by the following matrix.

| <b>FILE RELEASE</b><br><i>Use of file released on...</i> | <b>REQUIRED USE</b><br><i>Must begin no later than...</i> | <b>LAST PERMISSIBLE USE</b><br><i>And must end no later than...</i> |
|--|---|---|
| February 15  | April 1   | May 31  |
| April 15   | June 1  | July 31   |
| June 15  | August 1  | September 30  |
| August 15  | October 1   | November 30   |
| October 15   | December 1  | January 31  |
| December 15  | February 1  | March 31  |

[A950.3.1]

### 3.3.2 Z4CHANGE List Matching

When using Z4CHANGE to match and code address lists for automation rate mailings:

- a. The entire address list must first be matched and ZIP+4 coded with current CASS-certified software and the current USPS ZIP+4 Product.
- b. Every 60 days after the first matching, the address list must be processed through Z4CHANGE using USPS-certified software to identify changed records since the last update.
- c. The changed records identified through the Z4CHANGE processing must then be matched and coded using current CASS-certified address matching software and the current ZIP+4 Product.
- d. The entire address list must be rematched and ZIP+4 coded every 3 years using current CASS-certified software and the current USPS ZIP+4 Product.

[A950.3.2]

### 3.4 Definitions—Mailing and Address Lists

For this section, *mailing list* or *address list* is the group of names and addresses to which mailpieces in the corresponding mailing are addressed. Whether the addresses used in a mailing are obtained from a single list or from two or more lists (whole lists or extracts of those lists), each list used to produce a mailing claimed at an automation rate must meet the standards in 3.0. [A950.4.0]

### 3.5 Documentation

#### 3.5.1 Form 3553

Unless excepted by standard, the mailer must complete a Form 3553 for each mailing claimed at all automation rates and all carrier route rates. A computer-generated facsimile may be used if it contains the required data elements in a format similar to the USPS form. The data recorded on Form 3553 must refer only to the address list used to produce the mailing with which it is presented. The postage statement must be annotated in the block(s) provided to reflect the date when address matching and coding were performed. When a mailing is produced using multiple lists, the mailer must show the earliest (oldest) date of address matching and coding (shown on Form 3553, section B2). The mailer certifies compliance with this standard when signing the corresponding postage statement.

[A950.5.1]

#### 3.5.2 Retention Period

Form 3553 and other documentation must be retained by the mailer or the mailer's agent for 1 year from the date of mailing and be made available to the USPS on 24-hour notice. [A950.5.2]

#### 3.5.3 Using Output Information

The data recorded on Form 3553 is taken from the summary output report generated by the computer process by which address lists are matched and ZIP+4 coded using CASS-certified software. The summary output information may also be generated as a facsimile Form 3553. Form 3553 may show summary output information for a single address list or consolidate summary output information from

## 708.3.5.4

multiple address lists combined to produce a single mailing. Figures on Form 3553 are not required to match total mailpiece figures on the corresponding postage statement. [A950.5.3]

**3.5.4 Providing Required Data**

Summary output reports or computer-generated Forms 3553 must contain this information:

- a. CASS-certified company name as it appears on the CASS certificate; name and software version that received CASS certification; and the software configuration used when processing the address list.
- b. Name of the list processor using the CASS-certified software to match and code the address list, the date the address list was processed, the date of the USPS database used to code the address list, the address list name or identification number, the total number of address records on the list submitted for coding, the total number of address records successfully coded to the appropriate depth of code, and the valid dates for the records successfully coded. [A950.5.4]

**3.5.5 Using a Single List**

When a mailing is produced using all or part of a single address list, the mailer must retain one Form 3553 and other required documentation reflecting the summary output information for the entire list, as obtained when the list was coded. When the same address list is used for other mailings within 180 days of the date it was matched and coded, a copy of the Form 3553 must be retained with the documentation for each mailing. [A950.5.5]

**3.5.6 Using Multiple Lists**

When a mailing is produced using multiple address lists, the mailer must retain a consolidated Form 3553 summarizing the individual summary output and/or facsimile Forms 3553 for each list used (and other required documentation). As an alternative, the mailer may combine the addresses selected from the multiple lists into a single new list, reprocess the addresses using CASS-certified address matching software, and retain one Form 3553 for the summary output generated by that process. [A950.5.6]

**3.5.7 Using CASS Certificate**

If the name of the CASS-certified company entered on Form 3553 does not appear on the list published by the USPS, a copy of the CASS certificate for the software used also must be retained by the mailer with the documentation. [A950.5.7]

**3.6 CASS Certification****3.6.1 Testing Arrangements**

To obtain information on standards and arrange for testing of carrier route, ZIP+4, or delivery point address matching software, contact the National Customer Support Center by calling 1-800-238-3150, or by writing to CASS/ZIP+4 Matching, National Customer Support Center (see [608.8.0](#) for address). [A950.6.1]

### 3.6.2 CASS Stage I

The CASS certification process is a two-stage procedure. Stage I is a test file with answers supplied on request to customers wanting to certify an address matching software product. The Stage I file contains fabricated sample addresses from address ranges across the country with missing or incorrect address elements. The correct answers supplied on this Stage I test file allow self-assessment of address matching software/hardware accuracy so that software/hardware vendors or users can predetermine product readiness for the actual test. [A950.6.2]

### 3.6.3 CASS Stage II

The Stage II file is the actual test without answers. This test measures the accuracy of address matching software/hardware. Similar to the Stage I file, the Stage II file contains fabricated sample addresses from address ranges across the country with missing or incorrect address elements that the address matching software must correct. Software vendors or users process the Stage II file against their address matching products, appending the correct or missing information in each address record. After completing the test, the vendor or user returns the Stage II file to the USPS for analysis, scoring, and, if qualified, certification. For multiline optical character readers (MLOCs) and encoding stations, CASS certification is obtained by barcoding sample mailpieces in a test deck. After completing the test, the vendor or user returns the test deck to the USPS for analysis, scoring, and, if qualified, certification. [A950.6.3]

### 3.6.4 Certification Standards

To be CASS-certified:

- a. Delivery point code address matching software/hardware must correctly ZIP+4 code the addresses in the Stage II file or test deck with 98% accuracy and must correctly append the additional two digits of the delivery point code (plus a check digit) to the Stage II file or test deck with 100% accuracy.
- b. A 2-digit utility (separate or stand-alone address matching software that appends only the correct 2-digit DP9019C information) must use the standardized address information returned by DPC address matching software when determining the correct delivery point code. A 2-digit utility must assign the 2-digit delivery point code (plus a check digit) to the addresses in the Stage II file with 100% accuracy.
- c. Address matching software used to assign 5-digit ZIP Codes and carrier route codes must assign the appropriate codes to the Stage II file with 98% accuracy.

[A950.6.4]

### 3.6.5 Customer Notification

The USPS sends written notice informing the customer of the results of the analysis and the product certification status. Follow-up notification is mailed to remind previously certified vendors and users of the next certification. [A950.6.5]

## 4.0 Barcoding Standards for Letters and Flats

### 4.1 General

#### 4.1.1 POSTNET Barcode

POSTNET (Postal Numeric Encoding Technique) is the USPS-developed barcode method to encode ZIP Code information on mail that can be read for sorting by automated machines. A POSTNET barcode can represent a 5-digit ZIP Code (32 bars), a 9-digit ZIP+4 code (52 bars), or an 11-digit delivery point code (62 bars). The information content of the barcode is based on the combination of tall (full) bars and short (half) bars. A tall bar represents "1," and a short bar represents "0." When separated into groups of five, these bars sequentially represent each of the digits of the ZIP Code (or ZIP+4 code or delivery point code) for the delivery address, plus an additional digit designated as the *correction digit*. The correction digit is derived from adding the numbers in the ZIP Code (or ZIP+4 or delivery point code) and determining which single-digit number must be added to that sum to make the total a multiple of 10. The first and last bars of the barcode are *frame bars* and must always be full bars. [C840.1.1]

#### 4.1.2 5-Digit Barcode

A 5-digit barcode is a single field of 32 bars consisting of a frame bar, a series of 25 bars that represent the correct 5-digit ZIP Code for the address on the piece, 5 bars that represent the correction digit, and a final frame bar. [C840.1.2]

#### 4.1.3 ZIP+4 Barcode

A ZIP+4 barcode is a single field of 52 bars consisting of a frame bar, a series of 45 bars that represent the correct ZIP+4 code for the address on the piece, 5 bars that represent the correction digit, and a final frame bar. [C840.1.3]

#### 4.1.4 Delivery Point Barcode

A delivery point barcode (DPBC) is formed by adding 10 bars (representing two additional digits) to the ZIP+4 barcode. The correct DPBC must be derived from a CASS-certified delivery point code address matching process. To obtain information on the rules for delivery point code calculation, contact the National Customer Support Center by calling (toll-free) 1-800-642-2914, or by writing to CASS/ZIP+4 Matching, National Customer Support Center (see [608.8.0](#) for address). The following unique codes are also valid DPBCs:

- a. For a firm (unique) 5-digit ZIP Code, the correct DPBC represents the 5-digit ZIP Code: either the USPS-assigned -0001 or (if the customer assigns four-digit add-ons to internal separations) the correct four digits applicable to the point of delivery, followed by the last two digits of the primary street number, post office box number, or rural/highway contract route box number derived from the standardized address returned by the CASS-certified ZIP+4 or delivery point code address matching process.
- b. For an individual (unique) ZIP+4 code assigned to a business customer, the correct DPBC represents the ZIP+4 code followed by the last two digits of the primary street number derived from the standardized address returned by the CASS-certified ZIP+4 or delivery point address matching process. [C840.1.4]

## 4.2 Barcode Dimensions and Spacing

Barcodes are subject to these standards for bar dimensions and spacing. Extraneous ink or ink voids must not cause any bar to fail to meet these standards:

- a. A full bar must be  $0.125 \pm 0.010$  inch high.
- b. A half bar must be  $0.050 \pm 0.010$  inch high.
- c. All bars must be  $0.020 \pm 0.005$  inch wide.
- d. Measured over any 1/2 inch, horizontal spacing of the bars must be  $22 \pm 2$  bars per inch, and pitch (a bar and a space) must average at least 0.0416 inch but no more than 0.05 inch. The clear vertical space between bars must not be less than 0.012 inch or more than 0.04 inch. [C840.4.0]

## 4.3 Reflectance

### 4.3.1 Background Reflectance

A background reflectance of at least 50% in the red portion and 45% in the green portion of the optical spectrum must be produced in the following locations when measured with a USPS or USPS-licensed envelope reflectance meter:

- a. The barcode clear zone of a card-size or a letter-size piece barcoded in the lower right corner.
- b. The area surrounding the barcode (within 1/8 inch of the leftmost and rightmost bars and 1/25 inch above and below the barcode) of a card-size, letter-size, or flat-size piece barcoded in the address block and of a flat-size piece barcoded elsewhere. [C840.5.1]

### 4.3.2 Print Reflectance Difference

A print reflectance difference (PRD) of at least 30% in the red and green portions of the optical spectrum is required between the background material of the mailpiece and the barcode, when measured with a USPS or USPS-licensed envelope reflectance meter. (PRD equals the reflectance of the background minus the reflectance of the ink.) [C840.5.2]

### 4.3.3 Opacity

The material on which the barcode appears must have enough opacity to prevent printing from “showing through” to the extent that it interferes with postal equipment that reads the barcode. The PCR of print (other than the barcode) that shows through the barcode clear zone or the barcode area in the address block must not exceed 15% when measured in the red and green portions of the optical spectrum. [C840.5.3]

### 4.3.4 Dark Fibers and Background Patterns

Dark fibers or background patterns (e.g., checks) that produce a print contrast ratio of more than 15% when measured in the red and green portions of the optical spectrum are prohibited in these locations:

- a. The area of the address block or the barcode clear zone where the barcode appears on a card-size or a letter-size piece mailed at automation rates or at Enhanced Carrier Route saturation or high density rates.

## 708.4.4

- b. The area of the address block or the area of the mailpiece where the barcode appears on a flat-size piece in an automation rate mailing. [C840.5.4]

**4.4 Skew and Baseline Shift****4.4.1 Card-Size and Letter-Size Pieces**

For a barcode on a card-size or a letter-size piece, the combined effects of positional skew (slant or tilt of the entire barcode baseline) and rotational skew (slant or tilt of the individual barcode bars) must be limited to a maximum rotation of the bars of  $\pm 5$  degrees from a perpendicular to the bottom edge of the piece. The individual bars of a barcode must not shift (be vertically offset) more than 0.015 inch from the average baseline of the barcode. For information on barcode placement for card-size and letter-size pieces, see [202.5.0](#). [C840.6.1]

**4.4.2 Flat-Size Piece**

For a barcode on a flat-size piece, the maximum rotational skew (slant or tilt of the individual barcode bars) is  $\pm 10$  degrees from a perpendicular to the baseline of the barcode; there is no positional skew requirement. The individual bars of a barcode must not shift (be vertically offset) more than 0.015 inch from the average baseline of the barcode. For information on barcode placement for flat-size pieces, see [302.4.0](#). [C840.6.2]

**4.5 Barcode Software and Hardware Certification****4.5.1 Purpose**

To help mailers evaluate the quality of their equipment producing barcodes, the USPS offers optional testing and certification to manufacturers of barcoding software and hardware. Certified barcoding equipment ensures that the equipment can produce dimensionally correct barcodes meeting postal specifications. Certification does not ensure that barcodes produced from that equipment can meet the requirements for automation rates because many other variables in barcode production (e.g., ink color and quality, paper color and contrast, equipment operation and maintenance) affect the quality of the barcodes printed on mailpieces. [C840.10.1]

**4.5.2 Testing Arrangements**

Manufacturers who want their products tested and mailers who want information on available certified products should contact the National Customer Support Center (see [608.8.0](#) for address). [C840.10.2]

**5.0 Barcoding Standards for Parcels****5.1 Basic Requirements for Postal Routing Barcodes**

The postal routing barcode discount applies to machinable parcels that meet the eligibility requirements in [443.5.5](#) for Standard Mail, [453.3.1](#) for Parcel Post, [463.4.1](#) for Bound Printed Matter, [473.3.4](#) for Media Mail, or [483.3.4](#) for Library Mail. To be eligible for the barcode discount, each machinable parcel (see [401.1.5](#)) must bear a properly prepared UCC/EAN Code 128 barcode symbology as described in [5.3](#) that accurately represents the correct ZIP Code or ZIP+4 code of the delivery address. For information on barcode placement for parcels, see [402.4.0](#). [C850.1.1]

## 5.2 Basic Elements of Postal Routing Barcodes

UCC/EAN Code128 postal routing barcode data elements (see Exhibit 1.2) include:

- Barcode Type.* UCC/EAN Code 128 is the only acceptable barcode and must be printed within Subset C.
- Start Code.* Postal routing barcodes must start with a Symbol Start Code, which is not shown in the human-readable text.
- Function One (FNC1).* The FNC1 numeric character for UCC/EAN Code 128 follows the symbol start character, is part of the symbology overhead, and is not shown in the human-readable text.
- Application Identifier (AI).* The AI for a postal routing barcode is “420” for domestic mail and is not shown in the human-readable text.
- ZIP Code or ZIP+4 Code.* Postal routing barcodes must include the 5-digit ZIP Code or ZIP+4 code of the address. Only the 5-digit ZIP Code appears in the human-readable text.
- Check Digit.* A check digit must be added at the end of the sequence of numbers to validate the authenticity of the number. UCC/EAN Code 128 postal routing barcodes must utilize a MOD 103 check digit, which is not shown in the human-readable text.
- Stop Code.* The UCC/EAN Code 128 postal routing barcode must end with a Symbol Stop Code, which is not shown in the human-readable text. [C850.1.2]

### Exhibit 5.2 Postal Routing UCC/EAN Code 128 Barcode Format

UCC/EAN Code 128 Format (as described in a-g)

|       |      |   |   |   |   |   |   |   |   |         |      |
|-------|------|---|---|---|---|---|---|---|---|---------|------|
| Start | FNC1 | 4 | 2 | 0 | 2 | 2 | 0 | 2 | 1 | Mod 103 | Stop |
|-------|------|---|---|---|---|---|---|---|---|---------|------|

ZIP 22021

22021

[Exhibit C850.1.2]

## 5.3 Use With Delivery Confirmation or Signature Confirmation Service

Eligible machinable parcels may qualify for the barcode discount and bear a Delivery Confirmation or Signature Confirmation barcode using one of the following options:

- The Single Concatenated Barcode (see [Exhibit 5.3a](#)). Mailers may place a single concatenated barcode that combines the postal routing information and Delivery Confirmation or Signature Confirmation information. Single concatenated barcodes must be prepared in accordance with the technical specifications and requirements in [503.9.0](#) for Delivery Confirmation service, [503.10.0](#) for Signature Confirmation service, and Publication 91, Confirmation

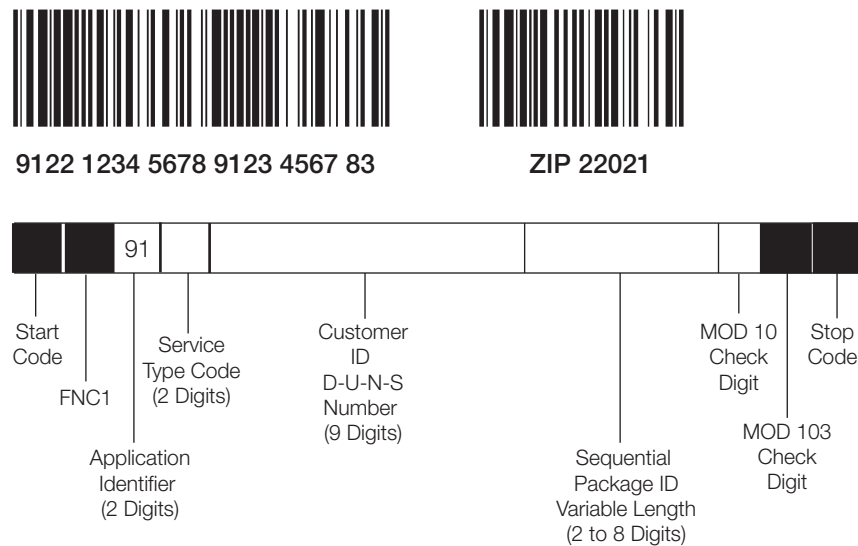

Services Technical Guide. If a parcel bears a single concatenated barcode, then no other barcode that contains the postal routing barcode may be affixed to the package.

**Exhibit 5.3a Confirmation Services Concatenated UCC/EAN Code 128 Barcode Format**

- b. Separate Barcodes (see [Exhibit 5.3b](#)). Mailers may place both a postal routing barcode described in 5.2 and a Delivery Confirmation barcode described in 503.9.0 or a Signature Confirmation barcode described in 503.10.0 (and Publication 91) on the same parcel.

**Exhibit 5.3b Confirmation Services UCC/EAN Code 128 Barcode Format Using a Separate Postal Routing Barcode**

[C850.1.3]

**5.4 Use With Confirmation Services and Insurance (Integrated Barcode)**

To eliminate the need to place one barcode for Delivery Confirmation or Signature Confirmation and another barcode for insurance, eligible machinable parcels may qualify for the barcode discount by placing a single integrated barcode that combines Delivery Confirmation or Signature Confirmation and insurance using one of the following options:

- a. Single Concatenated Integrated Barcode. Mailers may place a single concatenated integrated barcode that combines postal routing information and postal insurance (see [503.9.0](#)) with Delivery Confirmation service or Signature Confirmation service. The single concatenated integrated barcode option allows electronic option mailers to combine multiple special services into a single barcode on their packages. Single concatenated integrated barcodes must be prepared in accordance with the technical specifications and requirements in [503.9.0](#) for Delivery Confirmation service, [503.10.0](#) for Signature Confirmation service, and Publication 91. If a parcel bears a single concatenated integrated barcode then no other barcode that contains the postal routing barcode may be affixed to the package.
- b. Separate Barcodes. Mailers may place both a postal routing barcode described in [5.2](#) and an integrated barcode that combines insurance as described in [5.4a](#) on the same parcel with Delivery Confirmation in [503.9.0](#) or Signature Confirmation in [503.10.0](#). The integrated barcode option allows electronic mailers to combine multiple special services into a single barcode on their packages. [C850.1.4]

**5.5 Dimensions**

The preferred range of widths of narrow bars and spaces is 0.015 inch to 0.017 inch. The width of the narrow bars or spaces must be at least 0.013 inch but no more than 0.021 inch. All bars must be at least 0.75 inch high. [C850.2.1]

**5.6 Location**

The address and barcode must be placed squarely onto the largest surface area of the parcel, except when its shape and contents requires specific orientation for stability during processing; then the address and barcode(s) must be placed on the top. The address and barcode label(s) must not overlap any side of the parcel or other label. The barcode should be placed immediately adjacent to the delivery address and at least 1 inch from the edge of the parcel. The delivery address and barcode may be printed on an attachment or enclosure in a window envelope affixed to the parcel, subject to the reflectance standards in [4.3](#). The barcode may be placed on a separate label or in an alternate location on the address label, subject to the clearance standards in [5.7](#). Barcodes that are not placed immediately adjacent to the delivery address must not encroach the return address, postage, applicable markings, endorsements, and extra service labels. [C850.3.0]

**5.7 Clear Zone**

The barcode must be located as specified in [5.6](#). No printing may appear in an area 1/8 inch above and below the barcode. A minimum clear (quiet) zone equal to 10 times the average measured narrow element (bars or space) width must be maintained to the left and right of the barcode. [C850.2.2]

708.5.8

**5.8 Reflectance**

When measured in the red spectral range between 630 nanometers and 675 nanometers, the minimum white bar (space) reflectance (Rs) must be greater than 50%, and the maximum bar reflectance (Rb) must be less than 25%. The minimum print reflectance difference (Rs-Rb) is 40%. Reflectance must be measured with a USPS-specified reflectance meter or barcode verifier. [C850.2.3]

**5.9 Quality**

All barcodes in each mailing must measure American National Standards Institute (ANSI) grade C or above. ANSI grade barcodes D or F are unacceptable. It is strongly recommended that all printing processes be tested to ensure that they meet specification requirements. Information concerning ANSI guidelines X3.182-1990 may be obtained from the American National Standards Institute (see [608.8.0](#)). [C850.2.4]

**5.10 Human-Readable Information**

The human-readable information on the barcode must conform to one of the following options:

- a. For postal routing barcodes printed under [5.2](#), [5.3b](#), and [5.4b](#), if the postal routing barcode is printed on a separate label, the human-readable equivalent of the ZIP Code or ZIP+4 code encoded in the barcode preceded by the word “ZIP” must be printed between 1/8 inch and 1/2 inch below the barcode in 10-point or larger bold sans-serif type. Alternatively, the word “ZIP” may be placed no less than 10 times the average narrow bar or space element width and no more than 1/2 inch to the left of the barcode, in 10-point or larger bold sans-serif type (see [Exhibit 5.2](#)). While not recommended, if the postal routing barcode is printed on the delivery address label and is in close proximity to the address, the human-readable equivalent of the ZIP Code (and the word “ZIP”) may be omitted.
- b. For barcodes printed under [5.3b](#) or [5.4b](#) the human-readable information for the concatenated or concatenated/integrated barcode must include as text the application identifiers (AI) 420 and 91 and the full tracking identification number. When the AI 420 and ZIP Code information is used, it must be parsed separately from the main body of text. The first group will contain the 420 AI, space, 5-digit ZIP Code, space, +4 code (if used), space, with the remaining human-readable text parsed in groups of four with the remaining digits grouped at the end (e.g., 420 22021 9122 1234 5678 9123 4567 83). [C850.2.5]

**5.11 Technical Specifications**

Postal routing codes must meet the technical specifications in the UCC/EAN-128 Application Identifier Standard, which can be obtained from Uniform Code Council Inc. (see [608.8.0](#)), and the barcode characteristics in [5.0](#). [C850.2.6]

**5.12 Substrate Material**

Barcodes must be printed on substrate material that preserves the optical specification as described in the AIM-USA Uniform Symbology Specification documents. Typically, white label stock commonly used for barcode generation is suitable, providing it is not glossy (causing mirror-like, specular reflection) or prone to smearing or smudging. [C850.2.7]

## 6.0 Barcoding Standards for Container Labels

### 6.1 Basic Standards—Tray and Sack Labels

#### 6.1.1 Use

Exhibit 6.1.1 shows the types of mail requiring barcoded tray or sack labels. Barcoded labels must meet these general standards:

- a. Barcoded tray labels and sack labels must not be interchanged. Tray labels must be used only for trays, and sack labels must be used only for sacks.
- b. Mailer-produced barcoded labels must meet the standards in 6.0.
- c. All information on barcoded labels must be machine-printed. Alterations to preprinted barcoded labels (e.g., handwritten changes) may not be made.
- d. Barcoded labels must be inserted completely into the label holder on the tray or sack to prevent their loss during transport and processing. [M032.1.1]

#### Exhibit 6.1.1 Required Barcoded Container Labels

| RATE OR TYPE   | PROCESSING CATEGORY  |
|--|--|
| <b>First-Class Mail</b>  |  |
| Automation rate  | Letter-size, flat-size   |
| Cobundled and cotrayed under 705.9.0 through 705.13.0                                | Flat-size  |
| <b>Periodicals</b>   |  |
| Automation rate  | Letter-size, flat-size   |
| Cobundled and cosacked under 705.9.0 through 705.13.0                                | Flat-size  |
| <b>Standard Mail</b>   |  |
| Automation rate  | Letter-size, flat-size   |
| Enhanced Carrier Route high-density and saturation letter rates                      | Letter-size (barcoded labels not required for letter-size pieces at nonletter rates) |
| Cobundled and cosacked under 705.9.0 through 705.13.0                                | Flat-size  |
| Automation, Presorted, and Enhanced Carrier Route in letter trays under 345.3.0      | Flat-size  |
| Automation and Presorted in letter trays cotrayed under 705.9.0 using 345.3.0 option | Flat-size  |
| <b>Bound Printed Matter</b>  |  |
| Barcoded   | Flat-size  |

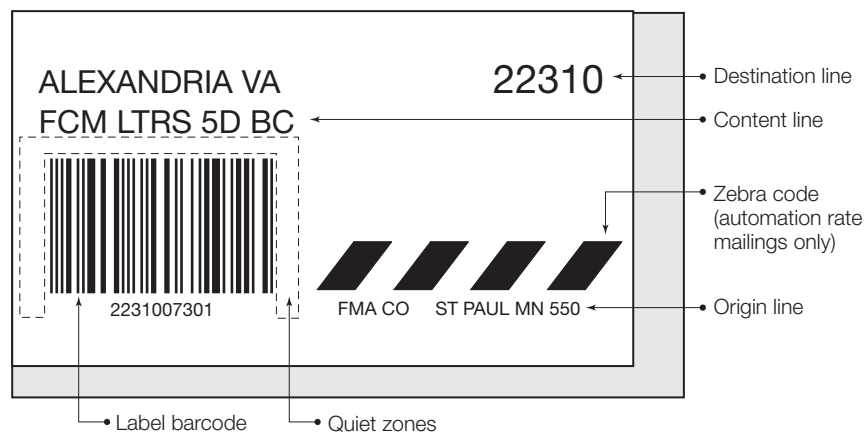

[Exhibit M032.1.1]

### 6.1.2 Line 1 (Destination Line)

The destination line must meet these standards:

- a. *Placement.* The destination line must be the top line of the label, placed in the position shown in [Exhibit 6.1.2a Barcoded Tray Labels](#) or [Exhibit 6.1.2b Barcoded Sack Labels](#) (above the barcode on tray labels and to the right of the barcode on sack labels). An exception is that one line of extraneous information may appear above the destination line on tray and sack labels as provided in [6.2.2, Printed Human-Readable Lines](#), and [6.2.2f](#). The destination line must be completely visible when placed in the label holder. This visibility is ensured if the destination line is no less than 1/8 (0.125) inch below the top of the label when the label is cut and prepared.

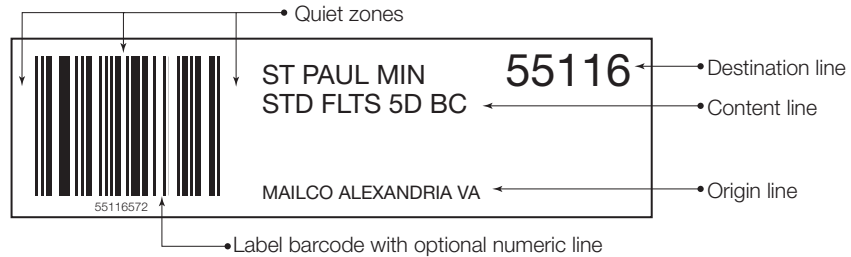

#### Exhibit 6.1.2a Barcoded Tray Labels

[Exhibit M032.1.2a]

- b. *Information.* The destination line must contain only the information required by the applicable standards for the class, processing category, sortation level of the tray or sack, and the rates claimed. This information is contained in module L labeling lists for all sortation and rate levels except trays and sacks to carrier route, 5-digit carrier routes, merged 5-digit, and 5-digit destinations, and except for automation letter trays to 5-digit scheme destinations. For the destination line of carrier route, 5-digit carrier routes, merged 5-digit, and 5-digit trays and sacks, the city, two-letter state abbreviation, and 5-digit ZIP Code of the destination 5-digit ZIP Code area must be shown. For 5-digit scheme trays, the city, two-letter state abbreviation, and ZIP Code for the destination scheme must be obtained from the City State Product. The destination line may contain abbreviated city and state information if such abbreviations are those in the City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*.

### Exhibit 6.1.2b Barcoded Sack Labels

Extraneous  
Information  
Placement:

Below origin line

Above destination line

Between content and origin lines

[Exhibit M032.1.2b]

- c. *Overseas Military Mail.* The exact content identifier number (CIN) that matches the level of tray or sack must be used in the barcode and barcode numeric line on barcoded tray or sack labels. The required second line of information that corresponds to the CIN must appear on the human-readable content line of the label. The human-readable content line is automatically printed when labels are obtained through the PASSPORT system or ordered on Form 1578-B for printing at the Label Printing Center in Topeka, Kansas. A footnote at the end of the content line information means that the mailer must add appropriate information as required in modules L and M when ordering and printing tray and sack labels. Any mailer using PASSPORT to order labels must also add the appropriate additional information to the human-readable content line for those content lines marked with a footnote. [M032.1.2]

### 6.1.3 Line 2 (Content Line)

The content line must meet these standards:

- a. *General.* The content line must appear directly below the destination line as shown in [Exhibit 6.1.2a Barcoded Tray Labels](#) or [Exhibit 6.1.2b Barcoded Sack Labels](#). This line must show the class, processing category, and the sortation level of the tray or sack as required by the applicable standards for the mailing in module M. The appropriate content identifier number (CIN) in [6.1.4](#) that corresponds to that content line must be used in the barcode.
- b. *Periodicals.* Except as provided in [705.8.15](#) for copalletized mailings and in [707.26.2](#) for combined mailings, Periodicals publications must use one of the following for Line 2 class information:
  1. “PER.”
  2. “NEWS” if published weekly or more often or if authorized newspaper treatment as of March 1, 1984.
- c. *Additional Information.* For 3-digit scheme trays as specified by the labeling list, the content line for some destinations must be followed by the letter “A,” “B,” or “C,” which is not required to be right-justified. For carrier route trays and sacks, the content information must be followed by a one-letter carrier route type description followed by a space and a 3-digit route number for the route to which the tray is destined. [[M032.1.3](#)]

### 6.1.4 3-Digit Content Identifier Numbers

The exact content identifier number (CIN) that matches the level of tray or sack must be used in the barcode and barcode numeric line on barcoded tray or sack labels. The required second line of information that corresponds to the CIN must appear on the human-readable content line of the label. The human-readable content line is automatically printed when labels are obtained through the PASSPORT system or ordered on Form 1578-B for printing at the Label Printing Center in Topeka, Kansas. A footnote at the end of the content line information means that the mailer must add appropriate information as required in modules L and M when ordering and printing tray and sack labels. Any mailer using PASSPORT to order labels must also add the appropriate additional information to the human-readable content line for those content lines marked with a footnote. See [Exhibit 6.1.4 3-Digit Content Identifier Numbers](#).

[[Exhibit M032.1.3](#)]

### 6.1.5 Line 3 (Origin Line)

The origin line must appear below the content line in a location appropriate for a tray or sack as shown in [Exhibit 6.1.2a Barcoded Tray Labels](#) or [Exhibit 6.1.2b Barcoded Sack Labels](#). This line must show the city and state of the entry post office or the mailer’s name and the city and state of the mailer’s location. It is recommended that the mailer’s name also appear with the city and state of the entry post office. The origin line may contain abbreviated city and state information if such abbreviations are those in the USPS City State Product or in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*. A mailer code assigned by the USPS or such words as “Mailer,” “From” (or “FR”), or “Entered at” may appear before the required information on this line. [[M032.1.4](#)]

[Exhibit M032.1.3]

## 6.2 Additional Standards—Barcoded Tray Labels

### 6.2.1 Paper Stock, Size, and Color

A barcoded tray label must meet these specifications:

- a. Color: white or manila for First-Class Mail and Standard Mail; pink for Periodicals.
- b. Reflectance: minimum reflectance requirements in [6.2.4i](#).
- c. Perforations: perforations are not permitted through the barcode and barcode quiet zone on labels.
- d. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- e. Height: 1.860 inches minimum; 2.015 inches maximum.
- f. Length: 3.250 inches minimum; 3.515 inches maximum.
- g. Thickness: 0.005 inch minimum. [[M032.2.1](#)]

### 6.2.2 Printed Human-Readable Lines

The printed human-readable text lines must meet these specifications:

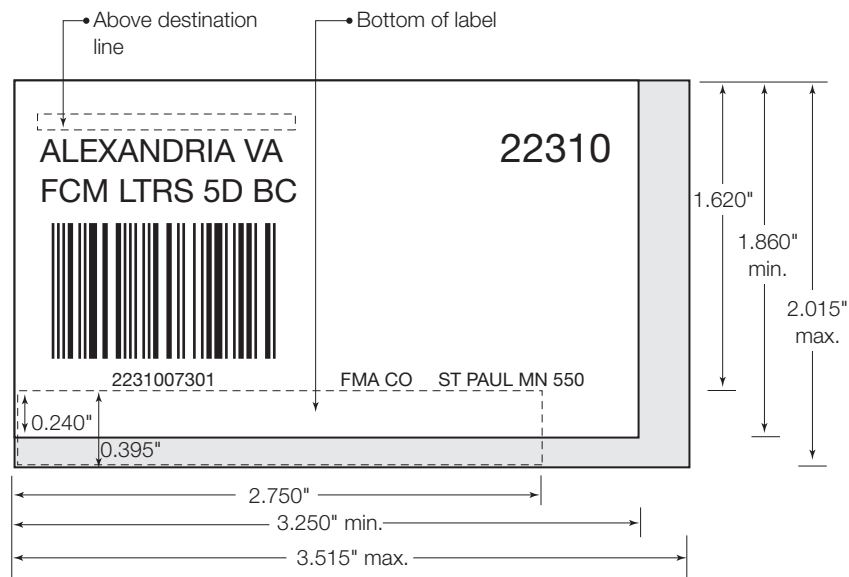

- a. *General*. The human-readable lines must be printed in uppercase letters, with no run-on letters or numerals. The letters and numerals in the destination, content, and origin lines must be easy to read. The character spacing can be proportional with respect to the type font used.
- b. *Destination Line (Line 1)*. The printed destination line must have a minimum character height of 0.120 inch and a maximum character density of 17 characters per inch. The corresponding ZIP Code must have a minimum character height of 0.190 inch and a maximum character density of 10 characters per inch. The destination line must accommodate at least 21 characters for the destination city and state and any required prefixes, and 5 characters for the ZIP Code. Only the correct 3-digit ZIP Code prefix is to be printed when the required labeling for a tray includes only a 3-digit ZIP Code prefix for Line 1 (i.e., trailing zeros are not permitted).
- c. *Content Line (Line 2)*. The printed content line must have a minimum character height of 0.120 inch. The content line must accommodate at least 21 characters and have an effective font density of no greater than 17 characters per inch.
- d. *Origin Line (Line 3)*. The printed origin line must have a maximum character height of 0.085 inch and must accommodate at least 21 characters.
- e. *Barcode Numeric Line*. The barcode numeric line must consist of a numeric representation of the information contained in the barcode as required by [6.2.4b](#) (5-digit ZIP Code, CIN, processing code). The printed numeric barcode line must have a maximum character height of 0.085 inch, must accommodate 10 characters, and must be placed below the barcode and lower barcode quiet zone as shown in [Exhibit 6.1.2a Barcoded Tray Labels](#).
- f. *Extraneous Information Lines*. Extraneous information may be printed only at the top of the label and/or at the bottom of the label. The preferred location is the bottom of the label. If placed at the bottom of the label, the information

must appear only in a rectangular area that begins 1.620 inches from the top of the label and extends to the bottom of the label. Within this lower area, the information may extend 2.75 inches to the right from the left edge of the label. See [Exhibit 6.2.2f](#). Extraneous information at the bottom of the label must appear below the barcode numeric and origin lines. There are no font restrictions for information printed in this area at the bottom of the label with one exception: if information in this area resembles a day of the week or a USPS air stop code it must be in 10-point or smaller type. Extraneous information printed at the top of the label must have a maximum character height of 0.083 inch. Barcodes for a mailer's internal use may not be placed in extraneous information areas or anywhere else on the label, unless approved on a case-by-case test basis by USPS Engineering (see [608.8.0](#) for address).

[M032.2.2]

### Exhibit 6.2.2f Extraneous Information Area

Extraneous Information Placement:

[Exhibit M032.2.2f]

### 6.2.3 Zebra Code

The zebra code is a series of diagonal or vertical marks to the right of the barcode that serves as a visual indication that a tray contains automation rate mail. The diagonal or vertical marks must each be from 0.25 to 0.375 inch high, and from 0.125 to 0.25 inch wide, separated by blank spaces equal in size to the diagonal or vertical marks. The zebra code is required on tray labels in automation rate mailings; it is not required on cotrayed automation and Presorted rate mailings. The zebra code must not appear on tray labels for nonautomation rate mail. [M032.2.3]

**6.2.4 Barcode**

The label barcode must meet these specifications:

- a. *Type of Barcode.* The barcode must be an interleaved 2-of-5 code according to the Automatic Identification Manufacturers' Uniform Symbology Specification (AIM/USS-I 2/5) with the exceptions noted below.
- b. *Information.* The barcode must represent three numeric elements:
  1. The 5-digit ZIP Code destination of the tray. For a 3-digit tray destination, the 3-digit ZIP Code prefix is followed by two zeros.
  2. The applicable 3-digit content identifier number (CIN) for the tray as shown in [6.1.4](#).
  3. The applicable 2-digit USPS processing code: (a) Code "01" is used for all automation rate and machinable letter-size pieces, for First-Class Mail automation rate flat-size pieces, and for First-Class Mail cotrayed automation rate and Presorted rate flat-size pieces. Code "01" is used also for certain Standard Mail flat-size pieces prepared in letter trays under [345.3.0](#): Standard Mail automation rate flat-size pieces and Standard Mail cotrayed automation rate and Presorted rate flat-size pieces. (b) Code "07" is used for all other mail (e.g., manual and nonmachinable letter-size pieces). Code "07" is also used for certain Standard Mail flat-size pieces prepared in letter trays under [345.3.0](#): Enhanced Carrier Route Standard Mail nonautomation rate and Standard Mail Presorted rate.
- c. *Placement.* The barcode must be on the left side of the tray label, below the destination and content lines. The top of the barcode must be not less than 0.6 inch from the top of the label. The bottom of the barcode must be no more than 1.5 inches from the top of the label. The barcode must not extend more than 2.0 inches to the right from the left edge of the label.
- d. *Quiet Zones.* Two quiet zones (clear areas) must be maintained, one to the left and one to the right of the barcode, each measuring at least 10 times the X dimension (see [6.2.4f](#)) and extending the full height of the barcode. Two additional quiet zones must be maintained, one above and one below the barcode for its full width, each measuring at least 0.070 inch. The quiet zones must meet the space reflectance specification in [6.2.4i](#).
- e. *Height.* The height of the barcode must be from 0.65 to 0.75 inch.
- f. *X Dimension.* The width of the narrow bar element and narrow space element is defined as the X dimension. It must be selected as a single dimension and it must be uniform within the barcode. The minimum X dimension or narrow element width is 0.012 inch and the maximum is 0.016 inch. The optimum X dimension or narrow bar/space width is 0.015 inch.
- g. *Wide-to-Narrow Bar Ratio.* The wide-to-narrow ratio for bars and spaces within the barcode must be between 3 to 1 and 2.3 to 1 and uniform within the barcode. The optimum ratio is 3 to 1.
- h. *Printing Tolerances.* The maximum irregularity in the edge straightness of any bar element is 0.3 times the X dimension. The printing tolerance for any (narrow or wide) bar or space is +0.004 inch and is not cumulative. Example 1: If an X

dimension of 0.015 inch is selected, each individual narrow bar or narrow space element on the printing of the barcode must not be less than 0.011 inch or more than 0.019 inch. Example 2: If the wide bar/space dimension of 0.045 inch is selected, each individual wide bar or space must not be less than 0.041 inch or more than 0.049 inch.

- i. *Reflectance.* When measured at 633 nanometers, bar reflectance must be less than 30% and space reflectance must be more than 40%. The bar-to-space reflectance difference must be more than 40%. [M032.2.4]

### 6.3 Additional Standards—Barcoded Sack Labels

#### 6.3.1 Paper Stock, Size, and Color

A barcoded sack label must meet these specifications:

- a. Color: white or manila for First-Class Mail and Standard Mail and Package Services; pink for Periodicals.
- b. Reflectance: minimum reflectance requirements in [6.3.3i](#).
- c. Weight: minimum 70-pound paper stock (500 sheets, 24 by 36 inches).
- d. Height: 0.937 inch minimum; 0.980 inch maximum.
- e. Length: 3.250 inches minimum; 3.375 inches maximum. [M032.3.1]

#### 6.3.2 Printed Human-Readable Lines

The printed human-readable text lines must meet these specifications:

- a. *General.* The human-readable lines must be printed in uppercase letters, with no run-on letters or numerals. The letters and numerals in the destination, content, and origin lines must be easy to read. The character spacing can be proportional with respect to the type font used, and should not exceed 17 characters per inch. When the information cannot be shortened by acceptable postal abbreviations, it may be printed in a compressed font. The information must appear to the right of the right barcode quiet zone.
- b. *Destination Line (Line 1).* The printed destination line must have a minimum character height of 0.083 inch. The corresponding ZIP Code must have a minimum character height of 0.111 inch. The destination line must accommodate at least 22 characters.
- c. *Content Line (Line 2).* The printed content line must have a minimum character height of 0.083 inch. The content line must accommodate at least 21 characters.
- d. *Origin Line (Line 3).* The printed origin line must have a minimum character height of 0.083 inch.
- e. *Barcode Numeric Line.* A barcode numeric line is optional. If used, the numeric line must consist of a numeric representation of the eight digits of information contained in the barcode as required by [6.3.3b](#) (5-digit ZIP Code and CIN). The printed numeric barcode line must have a maximum character height of 0.085 inch. It must be placed a minimum of 0.070 inch below the barcode (see [Exhibit 6.1.2b Barcoded Sack Labels](#)).

## 708.6.3.3

- f. *Extraneous Information Lines.* Extraneous information may be printed only to the right of the right quiet zone if it does not interfere with scanning and sorting by automated equipment. Extraneous information may be placed (1) below the origin line; (2) above the destination line; or (3) either between the content and origin lines or to the right of required information on the origin line, provided that the information does not consist of numerals that resemble a ZIP Code or 3-digit ZIP Code prefix. It is recommended that this information be placed below the origin line. If placed above the destination line, the maximum height of the type is 0.083 inch, and it is further recommended that the information be printed in a size of type much smaller than the size used on the destination line. Extraneous information must not be placed between the destination and content lines. [M032.3.2]

### 6.3.3 Barcode

The label barcode must meet these specifications:

- a. *Type of Barcode.* The barcode must be an interleaved 2-of-5 code according to the Automatic Identification Manufacturers' Uniform Symbology Specification (AIM/USS-I 2/5) with the exceptions noted below.
- b. *Information.* The barcode must represent the following information: the 5-digit ZIP Code destination of the sack (for sacks with a 3-digit destination, this is the 3-digit ZIP Code prefix followed by two zeros); and the 3-digit content identifier number (CIN) applicable to the content of the sack in [Exhibit, 6.1.4 3-Digit Content Identifier Numbers](#).
- c. *Placement.* The barcode must be on the left side of the sack label.
- d. *Quiet Zones.* Two quiet zones (clear areas) must be maintained, one to the left and one to the right of the barcode, each measuring at least 10 times the X dimension (see 3.3f) and extending the full height of the barcode. The quiet zones must meet the space reflectance specification in [6.3.3i](#).
- e. *Height.* The height of the barcode must be at least 0.700 inch.
- f. *X Dimension.* The width of the narrow bar element and narrow space element is defined as the X dimension. It must be selected as a single dimension and it must be uniform within the barcode. The minimum X dimension or narrow element width is 0.012 inch and the maximum is 0.016 inch. The optimum X dimension or narrow bar/space width is 0.015 inch.
- g. *Wide-to-Narrow Bar Ratio.* The wide-to-narrow ratio for bars and spaces within the barcode must be between 3 to 1 and 2.3 to 1 and be uniform within the barcode. The optimum ratio is 3 to 1.
- h. *Printing Tolerances.* The maximum irregularity in the edge straightness of any bar element is 0.3 times the X dimension. The printing tolerance for any (narrow or wide) bar or space is +0.004 inch and is not cumulative. Example 1: If an X dimension of 0.015 inch is selected, each individual narrow bar or narrow space element on the printing of the barcode must not be less than 0.011 inch or more than 0.019 inch. Example 2: If the wide bar/space dimension of 0.045 inch is selected, each individual wide bar or space must not be less than 0.041 inch or more than 0.049 inch.

- i. *Reflectance.* When measured at 633 nanometers, bar reflectance must be less than 30% and space reflectance must be more than 40%. The bar-to-space reflectance difference must be more than 40%. [M032.3.3]

## 7.0 Optional Endorsement Lines (OEL)

### 7.1 OEL Use

#### 7.1.1 Basic Standards

An optional endorsement line (OEL) may be used to label bundles instead of applying pressure-sensitive bundle labels or facing slips to the top piece of bundles. The OEL must show carrier route information or the type of bundle and ZIP Code information as shown in [Exhibit 7.1.1, OEL Formats](#). Use of OELs on bundles is subject to the standards for the rate claimed. OELs are required with 5-digit scheme and 3-digit scheme bundles. At the mailer's option, pieces in trays of noncarrier route automation letter-size mail may bear OEL information that corresponds to the sortation level of the tray in which the pieces are placed. The ZIP Code for use on OELs must include the 3-digit ZIP Code prefix or 5-digit ZIP Code as required. [M013.1.1]

### Exhibit 7.1.1 OEL Formats

| <b>SORTATION LEVEL</b>  | <b>OEL EXAMPLE</b>                                   |
|---|--|
| Firm—Periodicals  | ***** FIRM 12345                                     |

[Exhibit M013.1.1]

### 7.1.2 Keyline

A mailer's keyline or comparable information may not be placed on the same line as the OEL or on the line above the OEL. A keyline used on valid ACS mailpieces is subject also to [7.2.4, No ACS Code in OEL](#). [M013.1.2]

### 7.1.3 Firm Bundles

On a firm bundle of carrier route presorted Periodicals, “FIRM” may precede “CAR-RT SORT” in the carrier route information line under [6.0](#). [M013.1.3]

### 7.1.4 Rate Markings

At the mailer’s option, rate markings required by the standards for the rate claimed may be included in the OEL if the OEL appears on each piece in the mailing and if it remains a single line with the basic bundle label information (required by [7.1.1](#)) at the right end (e.g., on a carrier route bundle of Enhanced Carrier Route Saturation Standard Mail: \* \* \* \* ECRWSS\*\*C-001; on an automation Standard Mail 3-digit bundle: \* \* \* \* AUTO\*\*3-DIGIT 750). [M013.1.4]

### 7.1.5 Exceptional Address Format

The exceptional address format may appear above the OEL as specified in [602.3.0, Use of Alternative Addressing](#). [M013.1.5]

### 7.1.6 OEL With LOT Information

At the mailer’s option, line-of-travel (LOT) information for carrier route Periodicals and Enhanced Carrier Route Standard Mail may be included in the OEL using the applicable format in [7.1.1](#). All other OEL requirements apply. If there is insufficient space within the OEL to include any other information required (e.g., ACS participant code), this OEL format may not be used. [M013.1.6]

## 7.2 OEL Format

### 7.2.1 Presort Identification

Except when an address block barcode is placed above the optional endorsement line (OEL), the appropriate presort identification must be the first line at the top of the address block or label. A mailer receiving address corrections through Address Change Service (ACS) may use the first eight positions on the left side of the OEL for the ACS participant code. [M013.2.1]

### 7.2.2 Style and Size of Type

The information in the OEL must be in capital letters with letter size and line spacing no less than the size and line spacing of the largest letters or characters in the address block or any part of the address label. Letters in the endorsement line must be the same type font as those in the address block. Only capital letters of the alphabet, Arabic numerals, or asterisks may be used in the OEL. [M013.2.2]

### 7.2.3 ACS Code in OEL

If an Address Change Service (ACS) participant code (see [507.3.2](#)) is used in an OEL on a label or in an address block, the delimiter symbol (#) must be in the first position at the left margin of the OEL, followed by the seven-character USPS-assigned ACS participant code, then one blank space. The remaining blank spaces between the left-justified delimiter and ACS participant code and the first character of the right-justified mail sortation information of the OEL must be filled with asterisks. [M013.2.3]

### 7.2.4 No ACS Code in OEL

If an ACS participant code is not placed in the OEL as permitted by [507.3.2.4](#) or is not used at all, the OEL must be filled with asterisks from the left margin of the label or address block (as defined by the position of the first character printed at the left

## 708.7.2.5

margin in the label or address block) up to the first character in the OEL. A keyline prepared under [7.1.2](#) is required on valid ACS mailpieces if an ACS participant wants to receive notification of nondelivery information under [507.1.4.1](#) in addition to address correction service. [M013.2.4]

**7.2.5 ZIP Code Information**

Except for carrier route bundles, the OEL must include the ZIP Code information (5-digit ZIP Code or 3-digit ZIP Code prefix) determined by the sortation level and, when applicable, by the labeling list designated in [Exhibit 7.2.5](#) for ADC, mixed ADC, AADC, or mixed AADC sortation levels. Carrier route OELs must show carrier route information as specified in [6.0](#). [M013.2.5]

**Exhibit 7.2.5 OEL Labeling Lists**

| <b>PROCESSING CATEGORY AND PRESORT TYPE</b> | <b>ADC/AADC</b>   | <b>MIXED ADC/MIXED AADC</b> |
|---|-------------------|-----------------------------|

| Irregular parcels                           | L004              | L004 <sup>2</sup>           |

1. For AFSM 100-compatible flats, label according to [L007](#) for optional 5-digit scheme preparation.
2. [L010](#) if mail entered by mailer at a destination ASF or BMC or for mail placed on an ASF or BMC pallets under [705.8.0](#).
3. Effective May 15, 2005, mailers must use [L009](#), but until then may use either [L009](#), [L004](#), or [L011](#), as appropriate, or [L010](#) if entered at a BMC or ASF facility.
4. For irregular parcels of uniform thickness (see [445.5.4.1](#)), recommended use of [L004](#) (for ADCs) and [L009](#) (for mixed ADCs) immediately (required use of [L004](#) and [L009](#) effective May 15, 2005).

[Exhibit M013.2.5]

708.8.1

## 8.0 Carrier Route Information Lines

### 8.1 Basic Information

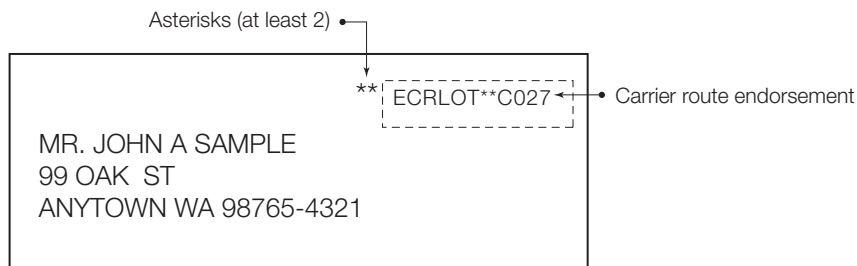

Bundles for individual carrier routes, rural routes, highway contract routes, post office box sections, or general delivery units must be prepared with facing slips under [235.2.11](#) for First-Class Mail Letters, [245.2.11](#) for Standard Mail Letters, [345.2.12](#) for Standard Mail Flats, [365.2.11](#) for Bound Printed Matter Flats, [445.2.11](#) for Standard Mail Parcels, [465.2.10](#) for Bound Printed Matter Parcels, and [707.19.15](#) for Periodicals, optional endorsement lines under [7.0](#), or carrier route information lines under [8.2](#). These standards apply to automation Carrier Route First-Class Mail, Carrier Route Periodicals, Enhanced Carrier Route Standard Mail, and Carrier Route Bound Printed Matter mailings. Carrier route information lines may be on all pieces in a mailing, regardless of presort level. [M014.1.0]

### 8.2 Format and Content

#### 8.2.1 Route Information

Carrier route information consisting of a descriptive prefix (or its abbreviation), plus a route number or numeric code, must be on the top line of the address, either alone or with other information (e.g., addressee, account data). Alternatively, when permitted by standard, the carrier route information may appear with the applicable carrier route endorsement on the line above or two lines above the address if the carrier route rate marking is in the address area (see [Exhibit 8.2.1](#)). [M014.2.1]

#### Exhibit 8.2.1 Address Format With Carrier Route Information

[Exhibit M014.2.1]

#### 8.2.2 Descriptive Prefix

The authorized descriptive prefixes and their abbreviations are “Carrier Route” (“C”), “Rural Route” (“R”), “Highway Contract Route” (“H”), “Post Office Box Section” (“B”), and “General Delivery Unit” (“G”). [M014.2.2]

#### 8.2.3 Route Code

These conditions apply to the carrier route code:

- The one-character descriptive prefix in [8.2.2](#) must be followed by a 3-digit route or post office box section number.
- On Periodicals and Standard Mail pieces bearing a simplified address that does not include a ZIP Code, the descriptive prefix in [8.2.2](#) must be followed by the last two digits of the 5-digit ZIP Code and the 3-digit route number or post office box section number.

- c. The route code required for simplified address mailings in 8.2.3b may also be used on mailings of any class that contain a ZIP Code in the address. [M014.2.3]

#### 8.2.4 Other Elements

The following elements also are included in the carrier route information line:

- a. The carrier route code must be preceded by at least two asterisks (\*\*).
- b. At least 10 spaces must be reserved for the carrier route code if other information is included on the top line.
- c. The carrier route information line may also contain the basic markings required by standard for the class of mail and rate claimed, prepared under 202 for letters, 302 for flats, and 402 for parcels.
- d. The carrier route information line may also include information to identify bundles of Periodicals matter mailed at:
  1. carrier route saturation rates (“SATURATION WALK-SEQUENCED CARRIER ROUTE MAIL” or the abbreviation “CAR-RT WSS”),
  2. high density walk-sequenced rates (“HIGH DENSITY WALK-SEQUENCED CARRIER ROUTE MAIL” or the abbreviation “CAR-RT WSH”), or
  3. basic carrier route rates (“CARRIER ROUTE LINE-OF-TRAVEL” or the abbreviation “CAR-RT LOT”). [M014.2.4]

#### 8.2.5 Firm Bundle

On a firm bundle of carrier route presorted Periodicals, “FIRM” may precede “CAR-RT LOT” or “CAR-RT WSH” or “CAR-RT WSS,” as applicable, in the carrier route information line. [M014.2.5]

## 9.0 Facing Identification Mark (FIM)

### 9.1 Using FIMs

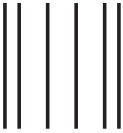

The facing identification mark (FIM) serves to orient and separate certain types of First-Class Mail during the facing-canceling process. The appropriate FIM is required on all letter-size business reply mail (BRM) under 507.8.0. The appropriate FIM also is required on letter-size courtesy reply mail (CRM) and meter reply mail (MRM) provided as enclosures in automation rate mailings under 201.3.0. Letter-size mail with IBI printed with nonfluorescent ink directly onto the envelope by an IBI meter or a PC postage system must use FIM D. A FIM must not be used on any other type of mail. [C100.5.1]

### 9.2 Pattern

The FIM pattern is a nine-bit binary code represented by vertical bars (with corresponding space element). A printed bar is considered binary 1; a nonprinted bar (placeholder), binary 0. The required FIM pattern as shown below depends on the type of mail and the presence of a POSTNET barcode as follows:

708.9.3

- a. FIM A is used for CRM and MRM with a preprinted barcode. (FIM A binary code is 110010011.)
- b. FIM B is used for BRM without a preprinted BRM ZIP+4 barcode. (FIM B binary code is 101101101.)
- c. FIM C is used for BRM with a preprinted BRM ZIP+4 barcode. (FIM C binary code is 110101011.)
- d. FIM D is used for letter-size First-Class Mail with IBI printed with nonfluorescent ink directly on the envelope. (FIM D binary code is 111010111.)

| NAME  | PATTERN   | USE                                     | POSTNET BARCODED? |
|-------|---|---|-------------------|
| FIM A |    | Courtesy reply mail<br>Meter reply mail | Yes               |
| FIM B |    | Business reply mail                     | No                |
| FIM C |  | Business reply mail                     | Yes               |
| FIM D |  | IBI meters and<br>PC Postage systems    | Not required      |

[C100.5.2]

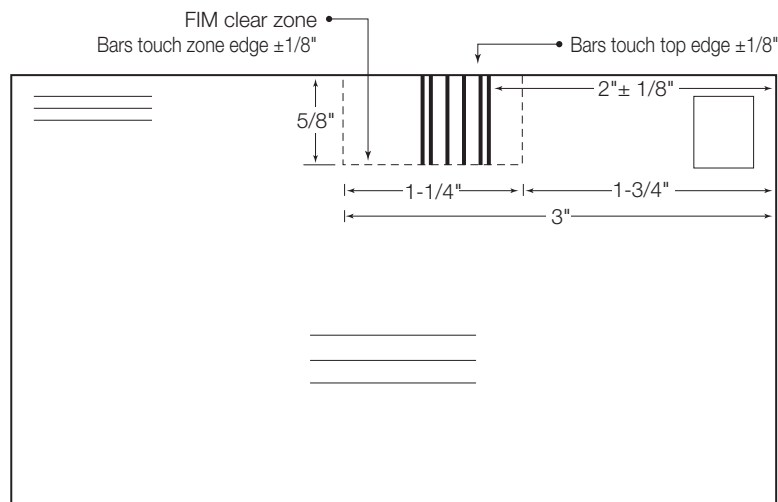

**9.3 Specification**

The FIM must meet these specifications:

- a. A FIM clear zone to the upper right of the address side of the mailpiece must be maintained and must contain no printing other than the FIM. [Exhibit 9.3](#) shows the FIM position and the FIM clear zone as defined by these boundaries:
  - 1. Left: 3 inches from the right edge of the piece.
  - 2. Right: 1-3/4 inches from the right edge of the piece.
  - 3. Top: top edge of the piece.
  - 4. Bottom: 5/8 inch from the top edge of the piece.
- b. The FIM bars must be 5/8 inch (±1/8 inch) high and 1/32 inch (±0.008 inch) wide and positioned as follows:

1. The right edge of the rightmost bar of the FIM must be 2 inches ( $\pm 1/8$  inch) from the right edge of the piece.
2. The tops of the FIM bars must be no lower than  $1/8$  inch from the top edge of the piece. The tops of the bars may extend over the top edge of the piece to the back (flap) of the piece if at least a  $1/2$ -inch bar height is maintained on the address side.
3. The bottoms of the FIM bars must touch the bottom boundary of the FIM clear zone or be no more than  $1/8$  inch above or below this boundary.  
[C100.5.3]

### Exhibit 9.3 Position of FIM

[Exhibit C100.5.3]

#### 9.4 Dimensional Tolerances

Extraneous ink must not cause a FIM bar to exceed the specifications in 9.3. The combined effects of positional skew (slant of the entire FIM) and rotational skew (slant of the individual FIM bars) must be limited to  $\pm 5$  degrees from the perpendicular edge of the printed FIM to the top edge of the mailpiece. Mail required to bear a FIM is considered nonmailable when the FIM has insufficient ink coverage, improper measurement, or ink in the space between the bars or when the FIM is enlarged or reduced. Camera-ready positives of FIMs, which must not be enlarged or reduced, are available at no charge from the USPS. [C100.5.4]

#### 9.5 Reflectance

There must be at least a 30% print reflectance difference between the ink used for printing the FIM and the background material on which the FIM is printed in the red and green portions of the optical spectrum when measured with a USPS or USPS-licensed envelope reflectance meter. [C100.5.5]

708.10.1

## 10.0 Postal Zones

### 10.1 Basis

Postal rates for certain subclasses of mail are based on the weight of the individual piece and the distance that the piece travels from origin to destination (i.e., the number of postal zones crossed). For the administration of these postal zones, the earth is divided into units of area 30 minutes square, identical with a quarter of the area formed by the intersecting parallels of latitude and meridians of longitude. Postal zones are based on the distance between these units of area. The distance is measured from the center of the unit of area containing the SCF serving the origin post office to the SCF serving the destination post office. The SCFs serving the origin and destination post offices are determined by using [L005](#), Column B. [G030.1.1]

### 10.2 Application

Zones are used to compute postage on zoned mail sent between USPS facilities, including military post offices (MPOs), as follows:

- a. For the purposes of computing postal zone information, except for items [10.2b](#) and [10.2c](#), the following table applies to MPOs not listed in [L005](#).

| 3-DIGIT ZIP CODE PREFIX GROUP | SCF SERVING THE DESTINATION OFFICE |
|-------------------------------|------------------------------------|
| 090-098                       | SCF New York NY 100                |
| 340                           | SCF Miami FL 331                   |
| 962-966                       | SCF San Francisco CA 940           |

- b. The postage rates for zoned mail transported between the United States, the Canal Zone, Puerto Rico, or U.S. territories or possessions, including the Trust Territory of the Pacific on the one hand, and MPOs on the other, or, among the MPOs, are the applicable zone rates for mail between the place of mailing or delivery and the city of the postmaster serving the MPO concerned.
- c. The postage rate for zoned mail mailed at or addressed to an MPO and transported directly to or from MPOs at Department of Defense expense, without transiting any of the 48 contiguous states (including the District of Columbia), is the applicable local zone rate. If such mail transits any area served by the USPS at USPS expense and the distance from the place of mailing to the embarkation point or from the debarkation point to the place of delivery is more than the local zone for such mail, postage is assessed by the distance from the place of mailing to the embarkation point or from the debarkation point to the place of delivery of such mail, as the case may be. The word transiting does not include en route transfers at coastal gateway cities necessary to transport military mail directly between MPOs. For example, a parcel mailed at Honolulu, HI, for direct dispatch by the Department of Defense from Honolulu to an MPO in the Pacific is subject to the local zone rate. A parcel mailed at Hilo, HI, and transported at USPS expense to Honolulu, HI, for direct dispatch at Department of Defense expense from Honolulu to an MPO in Japan is subject to zone 2 rates. [G030.1.2]

**10.3 Zone Charts**

The USPS Official National Zone Chart Data Program is administered from the National Customer Support Center (NCSC) in Memphis, TN. Single-page zone charts for originating mail are available at no cost from local post offices or online at <http://pe.usps.com>. Zone chart data for the entire nation can be purchased in print and CD-ROM formats. For more information or to purchase zone charts, call the Zone Chart program administrator at 800-238-3150 or write to the NCSC (see [608.8.0](#) for address). [G030.1.3]

**10.4 Specific Zones****10.4.1 Local Zone**

The local zone applies to mail deposited at any post office for delivery to addresses within the delivery area of that post office. For various types of post offices, the local zone applies to all mail that both originates and destines within:

- a. The 5-digit ZIP Code area(s) assigned to the same post office.
- b. Any of the 5-digit ZIP Codes that are part of any unique 3-digit ZIP Code prefix(es) or other separate 5-digit ZIP Code(s), as applicable, assigned to the same post office. [G030.2.1]

**10.4.2 Nonlocal Zone**

Nonlocal zones are defined as follows:

- a. The zone 1 rate applies to pieces not eligible for the local zone in [10.4.1](#) that are mailed between two post offices with the same 3-digit ZIP Code prefix identified in [L005](#), Column A. Zone 1 includes all units of area outside the local zone lying in whole or in part within a radius of about 50 miles from the center of the area.
- b. Zone 2 includes all units of area outside zone 1 lying in whole or in part within a radius of about 150 miles from the center of a given unit of area.
- c. Zone 3 includes all units of area outside zone 2 lying in whole or in part within a radius of about 300 miles from the center of a given unit of area.
- d. Zone 4 includes all units of area outside zone 3 lying in whole or in part within a radius of about 600 miles from the center of a given unit of area.
- e. Zone 5 includes all units of area outside zone 4 lying in whole or in part within a radius of about 1,000 miles from the center of a given unit of area.
- f. Zone 6 includes all units of area outside zone 5 lying in whole or in part within a radius of about 1,400 miles from the center of a given unit of area.
- g. Zone 7 includes all units of area outside zone 6 lying in whole or in part within a radius of about 1,800 miles from the center of a given unit of area.
- h. Zone 8 includes all units of area outside zone 7. [G030.2.2]

**10.4.3 SCF**

The sectional center facility (SCF) rate applies to mail originating and destinating within the service area of the same SCF as defined by the USPS. [G030.2.3]

**10.4.4 Delivery Unit (Office)**

The delivery unit rate applies to mail destinating within the delivery area of the delivery unit at which it is deposited by the mailer. [G030.2.4]

# 709 Experimental Classifications and Rates

## Overview

- [1.0 General Requirements for Negotiated Service Agreements \(NSAs\)](#)
- [2.0 Capital One Services, Inc. NSA](#)
- [3.0 Outside-County Periodicals Copalletization Drop-Ship Classification](#)
- [4.0 Outside-County Periodicals Copalletization Drop-Ship Discounts for High-Editorial, Heavy-Weight, Small-Circulation Publications](#)
- [5.0 Parcel Return Services](#)
- [6.0 Priority Mail Flat-Rate Box](#)

## 1.0 General Requirements for Negotiated Service Agreements (NSAs)

### 1.1 Basic Information

#### 1.1.1 Definition and Purpose

A negotiated service agreement (NSA) is a customized and mutually beneficial contractual agreement between the USPS and a specific mailer (customer or organization). An NSA provides for customized pricing, rates, and classifications under the terms and conditions established in the NSA and may include modifications to current mailing standards and other postal requirements. Any mailer may submit an application for an NSA if the mailer meets the requirements in [1.2](#) and follows the process in [1.3](#). [G911.1.1]

#### 1.1.2 Legal Framework

Terms and conditions of an NSA affecting rates or classifications require that the USPS request a recommended decision from the Postal Rate Commission before the USPS may approve and implement the NSA. NSAs must be recommended and approved under 39 U.S.C. 36 and the Postal Rate Commission's rules of practice and procedure. [G911.1.2]

### 1.2 Candidate Factors and Requirements

#### 1.2.1 Factors

The USPS considers the following factors in evaluating any candidate's NSA proposal:

- a. Candidate's presentation of information as requested by the USPS to document the following:
  1. Current mailing systems, postage payment systems, and quality control procedures and programs.
  2. Historical data showing mail volumes and use of specific mail services or mailpiece characteristics, as applicable. The candidate, as necessary, must also provide the effect on mail volumes of any corporate mergers, acquisitions, divestitures, and similar events.

## 709.1.2.2

- b. Candidate's ability to make and present in an acceptable format accurate forecasts of future mail volumes for USPS products and services proposed for an NSA.
- c. Candidate's ability to collect necessary data in an acceptable format to support an NSA.
- d. Candidate's willingness to establish and maintain electronic systems and quality control programs as specified by the USPS for paying postage and generating records to facilitate monitoring and reconciling mail volumes, rates, and fees, including volumes and postage paid by a mail preparation agent on behalf of the candidate.
- e. Candidate's production of mail using a formal system to ensure proper mail preparation and accurate postage calculations.
- f. Candidate's use or planned implementation of a Certified Mail preparation total quality program to ensure proper mail preparation and to provide accurate documentation of mailings and postage payment. [G911.2.1]

**1.2.2 General Requirements**

No proposed NSA may have an overall negative financial impact on the USPS. Any proposed NSA must also contain, at a minimum, the following general candidate requirements and conditions:

- a. The candidate must permit USPS inspection of mail content to determine rate eligibility.
- b. The candidate must prepare mail under current applicable mailing standards, unless they are to be modified under a proposed NSA.
- c. The candidate must meet and adhere to quality management standards for the classes of mail and rates claimed.
- d. The candidate must make available to the USPS necessary records and data related to the NSA in a form that facilitates monitoring of compliance with the terms and conditions of the NSA.
- e. The candidate must provide proper specified notice to cancel the NSA.
- f. The USPS has the right to cancel the NSA at any time with specified proper notice for any failure or, where appropriate, material failure of the mailer to:
  - 1. Use the NSA within the time period specified in the NSA.
  - 2. Provide accurate data, present properly prepared and paid mailings, or comply with any other material term or condition in the NSA.
- g. The candidate must engage counsel and file testimony as necessary in support of the NSA before the Postal Rate Commission. [G911.2.2]

**1.3 Application Process****1.3.1 Initial Proposal**

A mailer seeking to enter into an NSA with the USPS must submit a written proposal, with appropriate supporting documentation, to the USPS manager of Pricing Strategy (see [608.8.0](#) for address). The proposal must contain the reasons

for requesting the NSA along with a summary of the information responding to the applicable candidate features and general requirements described in 1.2. A nondisclosure agreement must be signed before any substantive discussion of the proposal. [G911.3.1]

### 1.3.2 Negotiations and Contractual Agreement

As a result of the proposal, the candidate and the USPS may enter into negotiations to establish an NSA, with terms and conditions specific to the candidate, that is either a functionally equivalent NSA (i.e., comparable to an existing baseline NSA) or a new baseline NSA (i.e., not comparable to an existing NSA). A candidate in the negotiation process may withdraw a proposal for an NSA at any time prior to the execution of the NSA. Once the NSA is executed, the NSA is controlled by its terms and conditions. [G911.3.2]

### 1.3.3 Additional Consideration

If the USPS decides to end negotiations with the candidate before reaching an agreement to enter into an NSA under 1.1, the manager of Pricing Strategy notifies the candidate in writing and gives the reasons for the decision. Within 15 days from the receipt of the written explanation, the candidate may ask for reconsideration of the manager's decision. The candidate's request for reconsideration must include additional information and reasons why negotiations for an NSA should be resumed. The candidate submits the request for reconsideration through the manager of Pricing Strategy to the vice president of Pricing and Classification (see 608.8.0 for address). [G911.3.3]

## 2.0 Capital One Services, Inc. NSA

### 2.1 Agreement

The negotiated service agreement (NSA) that was the subject of Docket MC2002-2 requires Capital One Services, Inc. (Capital One) to receive electronic notification for undeliverable First-Class Mail solicitations instead of physical return of the pieces. The notices are to be provided through the Address Change Service (ACS) program (see 507.3.2) and the usual electronic address correction fee is to be waived. Capital One also agrees to maintain and enhance address and mail preparation quality. In exchange for Capital One's receipt of the electronic notice for its First-Class Mail solicitations and its compliance with the terms of the NSA, Capital One would have available declining block rates of postage for volumes above stated thresholds. A copy of the NSA is filed with the Postal Rate Commission in Docket No. MC2002-2 as Attachment G to the Postal Service's Request for a Recommended Decision and can be found at [www.prc.gov](http://www.prc.gov). [G912.1.0]

### 2.2 Features

#### 2.2.1 Requirements

To be considered comparable to the NSA in 2.1, a proposed NSA must have the following features:

- a. Use of First-Class Mail for matter that qualifies for Standard Mail rates.
- b. Waiver of seal against postal inspection of mail as agreed to by the mailer.

## 709.2.2.2

- c. Computation of First-Class Mail postage by the use of declining block rates specified in the NSA and based on particular volume requirements that define incremental discount thresholds. The mail subject to the NSA must relate only to the mailer's products and services.
- d. Preparation of mail under applicable standards unless otherwise specified in the NSA.
- e. Adherence to the following address quality standards for the rates claimed:
  1. Participation in Address Change Service (ACS) under [507.3.2](#) using the endorsement "Change Service Requested" as described in [507.1.5.1](#) for undeliverable-as-addressed (UAA) mail.
  2. [\[02-03-05\]](#) Use of National Change of Address Linkage System (NCOA<sup>Link</sup>), *FASTforward*, or other premailing USPS-approved method for meeting the move update standards in [233.3.3](#) for letters, [333.3.3](#) for flats, and [433.3.4](#) for parcels, for Presorted First-Class Mail and [233.5.1](#) for letters and [333.5.1](#) for flats for automation rate First-Class Mail. In addition to those standards, addresses used on mailings must be updated more frequently than 180 days or as required by the NSA.
- f. Overall positive financial impact on the USPS. A minimum payment or transactional penalty is required to ensure a positive contribution.
- g. Agreement to make necessary records and data available to the USPS to facilitate and monitor compliance.
- h. Ability of the USPS to cancel the NSA for any failure or, where appropriate, material failure of the mailer:
  1. To provide accurate data.
  2. To present properly prepared and paid mailings.
  3. To comply with a material term of the NSA.
  4. To use the NSA. [\[G912.2.1\]](#)

**2.2.2 Candidate Factors**

The following factors are considered by the USPS in evaluating a proposal for a comparable NSA under [1.0](#):

- a. Presentation by the mailer of at least 3 years of historical data to document mail volumes (including UAA mail), mailing systems and postage payment systems in use, and quality control procedures. The effect on mail volumes of any corporate mergers, acquisitions, divestitures, and similar events must also be provided.
- b. Ability to make and present in an acceptable format accurate forecasts of future mail volumes for USPS products and services proposed for the NSA.
- c. Ability to collect necessary data in an acceptable format to support the NSA.
- d. Willingness to establish and maintain an active Centralized Automated Payment System (CAPS) for postage payment and to generate records monitoring mail volumes and discounts.

- e. Production of mail using an automated system to ensure proper mail preparation and accurate postage calculations.
- f. Implementation of a quality control program to ensure proper mail preparation and to provide accurate documentation of mailings and postage payment. [G912.2.2]

## **2.3 Application**

### **2.3.1 Initial Request**

A mailer seeking to enter into an NSA with the USPS comparable to the NSA under [1.0](#) must submit a written proposal, together with appropriate supporting documentation, to the USPS manager of Pricing Strategy (see [608.8.0](#) for address). The proposal must contain a general statement of the reasons for requesting the NSA, and a summary of the information addressing the elements of comparability described in [2.2.1](#) and [2.2.2](#). [G912.3.1]

### **2.3.2 Negotiation**

As a result of the proposal, the mailer and the USPS may negotiate a service agreement comparable to the NSA under [1.0](#), but with terms and conditions specific to the mailer. To take effect as an experimental mail classification, the comparable NSA must be recommended and approved pursuant to Chapter 36 of Title 39 of the United States Code, and the Postal Rate Commission's rules of practice and procedure. A mailer may withdraw its proposal for a comparable NSA at any time prior to agreement. Once concluded, a comparable NSA is controlled by its terms and conditions. Nothing in these regulations prohibits a mailer from seeking an NSA not comparable to the NSA under [2.1](#). [G912.3.2]

### **2.3.3 Determination Not to Conclude a Comparable NSA**

If negotiations between the mailer and the USPS end without the parties reaching an agreement comparable to the NSA under [2.1](#), the mailer may request that the manager of Pricing Strategy (see [608.8.0](#) for address) explain the determination in writing. The mailer may ask for reconsideration of the decision to end negotiations within 15 days from the receipt of the written explanation. The request for reconsideration may include additional information and reasons why negotiations for a comparable NSA should be resumed, and should be submitted through the manager of Pricing Strategy to the Vice President, Pricing and Classification (see [608.8.0](#) for address). [G912.3.3]

## **3.0 Outside-County Periodicals Copalletization Drop-Ship Classification**

### **3.1 Eligibility**

#### **3.1.1 Description**

The standards in [3.0](#) apply to mailings that are produced by mailers and consolidators who are approved to participate in the Outside-County Periodicals Copalletization Drop-Ship Classification experiment. [G991.1.1]

709.3.1.2

**3.1.2 Rate Application**

The Outside-County Copalletization Drop-Ship Classification discounts apply to pieces meeting the standards in 3.0. [G991.1.2]

**3.1.3 Basic Standards**

The basic standards for copalletized mailings are as follows:

- a. Each mailing must consist of at least two different Periodicals publications or two different editions, segments, or versions of a Periodicals publication.
- b. Each mailing must be presented with the correct postage statement(s). Mailings consisting of different Periodicals publications must be accompanied by a separate postage statement for each publication. Mailings consisting of different editions or versions of the same Periodicals publication must be accompanied by one consolidated postage statement and a register of mailings.
- c. Each mailing must meet the documentation and postage payment standards outlined in 3.0 and 707.16.0.
- d. Each mailing must be entered and postage paid at the post office where consolidation takes place, except that postage for publications authorized under the Centralized Postage Payment (CPP) system may be paid to the Pricing and Classification Service Center (PCSC). Each publication included in a mailing under these standards must be authorized for original entry or additional entry at the post office where the consolidated mailing is entered. [G991.1.3]

**3.1.4 Discount Eligibility**

To be eligible for one of the discounts, mailpieces must be:

- a. Part of a Periodicals mailing meeting the standards in 707.22.0, 707.25.0, or 705.9.0.
- b. Part of a mailing segment with less than 250 pounds per title or version per ADC destination, if independently presorted. This includes mail for an ADC service area that remains after finer levels of pallets are prepared.
- c. Prepared as bundles on pallets.
- d. Prepared on either an ADC or SCF pallet of copalletized pieces. Mailers may build on ADC or SCF pallets of 250 or more pounds prepared as part of the original presort. However, the pieces originally on these pallets (250 or more pounds per title or edition) do not qualify for the copalletization discounts.
- e. Drop-shipped to the appropriate DADC or DSCF. [G991.1.4]

**3.2 Documentation**

Each mailing must be accompanied by documentation meeting the standards in 707.17.0, as well as any other mailing information requested by the USPS to support the postage claimed (e.g., advertising percentage and weight per copy). Documentation must be presented by title and version, segment, or edition; or by codes representing each title and version, segment, or edition included in the copalletized mailing. In addition, documentation for the copalletized mailing must:

- a. Upon request, include presort reports showing how the pieces would have been prepared prior to copalletization.
- b. Include presort and pallet reports showing how the copalletized pieces are prepared and where they will be entered (DADC or DSCF).
- c. Distinguish publications or segments that do not qualify for the copalletization discounts (e.g., because there are 250 or more pounds to an ADC destination) from those that do qualify for the discounts.
- d. Allow easy reconciliation with reports prepared to reflect how mail would have been prepared prior to copalletization if requested to verify compliance with standards for discount eligibility. [G991.2.0]

### **3.3 Data Reporting**

Each month, the mailer or consolidator must provide the following data in spreadsheet format using the model spreadsheet and timelines provided by the USPS. The data must be sent via email to copal@usps.gov.

- a. Number of titles receiving one or both of the copalletization discounts.
- b. Number of sacks that would have been prepared without copalletization, as well as the weight and the number of addressed pieces that would have been in these sacks.
- c. Number of pallets that would have been prepared without copalletization, as well as the weight and the number of addressed pieces that would have been prepared on pallets.
- d. Number of sacks prepared after copalletization, as well as the weight and the number of addressed pieces in these sacks.
- e. Number of pallets containing mail qualifying for the ADC copalletization discount, as well as the weight and the number of addressed pieces receiving the ADC discount on these pallets.
- f. Number of pallets containing mail qualifying for the SCF copalletization discount, as well as the weight and the number of addressed pieces receiving the SCF discount on these pallets. [G991.3.0]

### **3.4 Available Discounts**

The following discounts are available:

- a. For pieces sorted to an SCF or ADC pallet of 250 or more pounds and drop shipped to the appropriate DADC: \$0.007 per piece.
- b. For pieces sorted to an SCF pallet of 250 or more pounds and drop shipped to the appropriate DSCF: \$0.01 per piece.
- c. Copalletized pieces sorted to overflow DSCF or DADC pallets qualify for the corresponding copalletization discount.
- d. Copalletized pieces sorted to ADC pallets weighing between 100 and 250 pounds and drop shipped to the appropriate DADC: \$0.007 per piece. [G991.4.0]

### 3.5 Request to Participate

A mailer or consolidator may request approval to mail in the experimental Outside-County Periodicals Copalletization Drop-Ship test by submitting a written request to the manager, Mailing Standards (see [608.8.0](#) for address). The request must be accompanied by the following:

- a. A completed application form (available from the manager, Mailing Standards).
- b. A process map and narrative demonstrating how and where presort and copalletization reports (including “before” and “after” data) are created as they relate to mail movement and consolidation of bundles to be copalletized. The map and narrative must also describe mail movement from production through the copalletization process to dispatch to destination entry postal facilities.
- c. Samples of all required documentation that must be provided at the time of mailing, including “before” and “after” reports and postage statements. The sample reports must demonstrate:
  1. How the copalletized portion of the mailing is segregated from other mailing segments on the “before” reports.
  2. How mailing jobs, mailing segments, and containers will be identified in both “before” and “after” reports to allow reconciliation of the reports.
  3. How pieces appearing on the “after” reports that qualify for the copalletization discounts (mailing segments with less than 250 pounds to an ADC) are differentiated from those that do not (mailing segments with 250 or more pounds to an ADC).
- d. An explanation of how data for mailings included under the copalletization experiment will be collected and reported to the USPS, including whether the model spreadsheet provided by the USPS can be used.
- e. A list of the publications to be included initially in the test and evidence that each publication has obtained the appropriate additional entry authorization at the office where mailings will be verified and postage paid. The list must indicate if the publications are authorized under the Centralized Postage Payment (CPP) system. If the applicant is not a printer and/or is consolidating publications for other printers, a list of these printers must be included with the application. [G991.5.0]

### 3.6 Decision on Request

The manager, Mailing Standards, approves or denies a written request to participate in the experimental Outside-County Periodicals Copalletization Drop-Ship Classification test. If the application is approved, the mailer or consolidator will be notified in writing by the manager, Mailing Standards. Initial approval is for a conditional 90-day period. When the mailer or consolidator has demonstrated the ability to prepare and enter mailings under the standards in [3.0](#), final authorization will be granted. If the application is denied, the mailer or consolidator may file at a later date or submit additional information needed to support the request.

[G991.6.0]

**3.7 USPS Suspension**

The manager, Mailing Standards, may suspend at any time an approval to participate in the experiment when there is an indication that postal revenue is not fully protected. The manager will notify the participant in writing of the decision. The suspension becomes effective upon the mailer's receipt of the notification.

[G991.7.0]

**4.0 Outside-County Periodicals Copalletization Drop-Ship Discounts for High-Editorial, Heavy-Weight, Small-Circulation Publications**

**4.1 Eligibility**

**4.1.1 Description**

The standards in 4.0 apply to mailings that are produced by mailers and consolidators who are approved to use the outside-county Periodicals copalletization drop-ship discounts for high-editorial, heavy-weight, small-circulation publications. [G992.1.1]

**4.1.2 Rate Application**

The outside-county copalletization drop-ship per-pound discounts apply to pieces meeting the standards in 4.0. [G992.1.2]

**4.1.3 Basic Standards**

The basic standards for eligibility under 4.0 are as follows:

- a. The advertising content of the publication must be 15 percent or less.
- b. The weight per copy must be 9 ounces or more.
- c. The total mailed circulation must be 75,000 addressed pieces or less (including all editions, issues, and supplemental mailings).
- d. Each mailing must consist of at least two different Periodicals publications or two different editions, segments, or versions of a Periodicals publication. Each mailing must be presented with the correct postage statement(s) and register of mailing. Mailings consisting of different Periodicals publications must be accompanied by separate postage statements for each publication. Mailings consisting of different editions or versions of the same Periodicals publication must be accompanied by one consolidated postage statement and a register of mailings.
- e. Each mailing must meet the documentation and postage payment standards outlined in 4.2 and 707.16.0 and 707.17.0.
- f. Each mailing must be entered, and postage must be paid, at the post office where consolidation takes place, except that postage for publications authorized under the Centralized Postage Payment (CPP) system may be paid to the Pricing and Classification Service Center (PCSC). Each publication included in a mailing under these standards must be authorized for original entry or additional entry at the post office where the copalletized mailing is entered. [G992.1.3]

709.4.1.4

#### 4.1.4 Discount Eligibility

To be eligible for the discounts, mailpieces must be:

- a. Part of a Periodicals mailing meeting the standards in [705.9.0](#) through [705.13.0](#), [707.22.0](#), [707.23.0](#), [707.25.0](#), or [707.26.0](#).
- b. Part of a mailing segment with less than 250 pounds per title or version per ADC destination, if independently presorted. This includes mail for an ADC service area that remains after finer levels of pallets are prepared.
- c. Prepared as bundles on pallets under [705.8.0](#), or under [705.9.0](#) through [705.13.0](#).
- d. Prepared on either an ADC or SCF pallet of copalletized pieces. Mailers may build on ADC or SCF pallets of 250 or more pounds prepared as part of the original presort. However, the pieces originally on these pallets (250 or more pounds per title or edition) do not qualify for the copalletization discounts.

[G992.1.4]

#### 4.2 Documentation

Each mailing must be accompanied by documentation meeting the standards in [708.1.0](#), as well as any other mailing information requested by the USPS to support the postage claimed (e.g., advertising percentage and weight per copy).

Documentation must be presented by title and version, segment, or edition; or by codes representing each title and version, segment, or edition included in the copalletized mailing. In addition, documentation for the copalletized mailing must:

- a. Include a detailed listing documenting the distribution of total advertising and editorial pounds to each zone “before” copalletization, based on origin entry of the mail (i.e., entry at the plant or the local post office for the plant, where it is printed and presorted into bundles ready for copalletization and mailing).
- b. Upon request, include presort reports showing how the pieces would have been prepared prior to copalletization.
- c. Include presort and pallet reports showing how the copalletized pieces are prepared and where they will be entered (DADC or DSCF).
- d. Distinguish publications or segments that do not qualify for the copalletization discounts (e.g., because there are 250 or more pounds to an ADC destination) from those that do qualify for the discounts (e.g., existing per-piece copalletization discounts and new per-pound discount).
- e. Allow easy reconciliation with reports prepared to reflect how mail would have been prepared prior to copalletization if requested to verify compliance with standards for discount eligibility. [G992.2.0]

#### 4.3 Data Reporting

Each month, the mailer or consolidator must provide the following data via e-mail to [copal@usps.gov](mailto:copal@usps.gov) in spreadsheet format using the model spreadsheet and timelines provided by the USPS:

- a. Number of titles receiving the new copalletization discounts for high editorial publications.

- b. Number of sacks that would have been prepared without copalletization, as well as the total weight, the editorial weight, and the number of addressed pieces that would have been in these sacks, by destination ADC and destination SCF.
- c. Number of sacks prepared after copalletization, as well as the weight and the number of addressed pieces in these sacks.
- d. Number of pallets containing mail qualifying for the ADC copalletization discounts, as well as the weight and the number of addressed pieces receiving the ADC discount on these pallets. Pallets containing some bundles that use the per-piece discounts and some bundles that use the per-pound discount must be counted separately.
- e. Number of pallets containing mail qualifying for the SCF copalletization discounts, as well as the weight and the number of addressed pieces receiving the SCF discount on these pallets. Pallets containing some bundles that use the per-piece discounts and some bundles that use the per-pound discount must be counted separately. [G992.3.0]

#### **4.4 Discounts**

##### **4.4.1 Basic Standards**

Pieces must be prepared on one of the following:

- a. An SCF or ADC pallet of 250 or more pounds drop shipped to the appropriate DADC.
- b. An SCF pallet of 250 or more pounds drop shipped to the appropriate DSCF.
- c. An overflow DSCF or DADC pallet drop shipped to the appropriate DSCF or DADC.
- d. An ADC pallet weighing between 100 and 250 pounds and drop shipped to the appropriate DADC. [G992.4.1]

709.4.4.2

**4.4.2 Discounts and Description**

The discounts in [Exhibit 4.4.2](#) are applicable to editorial pounds of the copalletized pieces prepared on an ADC or SCF pallet and entered at the destination ADC and SCF. The discounts are dependent on the applicable zones that would have resulted from origin entry of the publications without copalletization. [G992.4.2]

**Exhibit 4.4.2 Discount for Copalletized Pieces Prepared on an ADC or SCF Pallet**

| ZONE  | DISCOUNT |         |
|-------|----------|---------|
|       | DADC     | DSCF    |
| 1 & 2 | \$0.008  | \$0.014 |
| 3     | 0.013    | 0.019   |
| 4     | 0.028    | 0.034   |
| 5     | 0.050    | 0.056   |
| 6     | 0.073    | 0.079   |
| 7     | 0.101    | 0.107   |
| 8     | 0.125    | 0.131   |

[Exhibit G992.4.2]

**4.5 Request to Participate**

A mailer or consolidator may request approval to use the outside-county Periodicals copalletization drop-ship per-pound discounts by submitting a written request to the manager, Mailing Standards (see [608.8.0](#) for address). The request must be accompanied by the following:

- a. A completed application form (available from the manager, Mailing Standards).
- b. A process map and narrative demonstrating how and where presort and copalletization reports (including “before” and “after” data) are created as they relate to mail movement and consolidation of bundles to be copalletized. The map and narrative must also describe mail movement from production through the copalletization process including dispatch to destination entry Postal Service facilities.
- c. Samples of all required documentation that will be used to substantiate eligibility for the discounts, and of the documentation that must be provided at the time of mailing, including “before” and “after” reports and postage statements. The sample reports must demonstrate:
  1. How the copalletized portion of the mailing is segregated from other mailing segments on the “before” reports.
  2. How mailing jobs, mailing segments, and containers will be identified in both “before” and “after” reports to allow reconciliation of the reports.
  3. How pieces appearing on the “after” reports that qualify for the copalletization discounts (mailing segments with less than 250 pounds to an ADC) are differentiated from those that do not (mailing segments with 250 or more pounds to an ADC).

4. How pieces receiving the per-pound discounts are differentiated from those receiving the per-piece discounts.
- d. A detailed listing documenting the distribution of total advertising and editorial pounds to each zone “before” copalletization, based on origin entry of the mail (i.e., entry at the plant or the local post office for the plant, where it is printed and presorted into bundles ready for copalletization and mailing).
- e. An explanation of how data for mailings included under the copalletization experiment will be collected and reported to the USPS, including whether the model spreadsheet provided by the USPS can be used.
- f. A list of the publications to be included initially in the test and evidence that each publication has obtained the appropriate additional entry authorization at the office where mailings will be verified and postage paid. The list must indicate if the publications are authorized under the Centralized Postage Payment (CPP) system. If the applicant is not a printer and/or is consolidating publications for other printers, a list of those printers must be included with the application.

[G992.5.0]

#### **4.6 Decision on Request**

The manager, Mailing Standards, approves or denies a written request to use the experimental outside-county Periodicals copalletization per-pound discounts. If the application is approved, the mailer or consolidator will be notified in writing by the manager, Mailing Standards. Initial approval is for a conditional 90-day period. When the mailer or consolidator has demonstrated the ability to prepare and enter mailings under the standards in 4.0, final authorization will be granted. If the application is denied, the mailer or consolidator may file at a later date or submit additional information needed to support the request. [G992.6.0]

#### **4.7 USPS Suspension**

The manager, Mailing Standards, may suspend at any time an approval to use the per-pound discounts when there is an indication that Postal Service revenue is not fully protected. The manager will notify the participant in writing of the decision. The suspension becomes effective upon the mailer's receipt of the notification.

[G992.7.0]

## **5.0 Parcel Return Services**

### **5.1 Basic Information**

#### **5.1.1 Description**

The standards in 5.0 apply to parcels that are retrieved in bulk by authorized permit holders or their agents who are approved participants in the Parcel Return Services (PRS) experiment. The permit holder guarantees payment of postage and retrieval of all PRS parcels mailed with a PRS label. The provision, by a merchant or other party, of an approved PRS label to its customers or others constitutes the party's designation of the permit holder identified on the label as the party's agent for receipt of mail bearing that label, and authorizes the Postal Service to provide that mail to the permit holder or its designee. The permit holder has the option of

## 709.5.1.2

retrieving parcels at a designated return delivery unit (one of the postal delivery unit facilities designated as a pickup location for PRS parcels, also known for PRS purposes as an “RDU”) or at the bulk mail center (also known for PRS purposes as an “RBMC”) that serves the post office where returned parcels are deposited by customers. Payment for parcels returned under PRS is deducted from a separate advance deposit (postage due) account that is funded through the Centralized Account Processing System (CAPS). [G993.1.1]

**5.1.2 Applicability**

Parcels may use PRS when all of the following conditions apply:

- a. Parcels contain merchandise being returned to the merchant.
- b. Parcels bear a PRS label that meets the standards in 5.4.
- c. The parcel shows the permit number, and the permit holder has paid the annual PRS permit fee and the annual PRS accounting fee. [G993.1.2]

**5.1.3 Services**

Package Services pieces using Parcel Return Services are not eligible for ancillary or extra services. [G993.1.3]

**5.1.4 Customer Mailing Options**

Returned parcels must be mailed within the service area of the post office shown in the return address on the label. They may be deposited at:

- a. The main post office or any associated office, station, or branch.
- b. In any collection box (except an Express Mail box).
- c. With any rural carrier.
- d. On business routes during regular mail delivery if prior arrangements are made with the carrier.
- e. As part of a collection run for other mail (special arrangements may be required).
- f. At any place designated by the postmaster for the receipt of mail. [G993.1.4]

**5.1.5 Participation**

Companies who wish to participate in this experiment must send a request, on company letterhead, to the manager, Mailing Standards (see 608.8.0 for address). Requests may be sent also via e-mail to sherry.l.freda@usps.gov; or by fax to 202-268-4955. The request must contain the following information:

- a. Company name and address.
- b. Individual contact name, telephone number, fax number, and e-mail address.
- c. The rate category or categories to be used; proposed retrieval locations (delivery units and bulk mail centers); and individual contact information for the company contact or agent at each location.
- d. A list of clients, if the applicant is not the merchant (required for mailer identification number assignment).
- e. Projected volume per quarter for each RDU and/or RBMC.

- f. Label and instruction examples that comply with 5.4.
- g. Date(s) label distribution will begin for each client.
- h. Description of the electronic returns manifesting system to be used to document returns, by location and rate eligibility.
- i. Current Parcel Select and BPM parcel profile (volumes and weights). [G993.1.5]

#### 5.1.6 Evaluation

The electronic returns manifesting system will be subject to approval by the manager, Business Mailer Support (BMS). BMS can provide applicants information for developing and receiving approval for a parcel returns system, electronic file transfer requirements, and certification process. Once approved, participants must comply with the terms of the PRS Service Agreement and pay the annual fees in 5.2.2, and 5.2.3. The manager, Mailing Standards may request additional data and a visit to the applicant's plant. In selecting participants, the manager, Mailing Standards uses the following additional criteria:

- a. The applicant must be prepared to begin operation at a mutually agreed upon time soon after selection.
- b. The applicant must demonstrate the ability to retrieve parcels on a regular schedule mutually agreed upon from the designated RDU, RBMC, or both. [G993.1.6]

#### 5.1.7 Authorization

Participants during the first year of this experiment will be limited to the first 20; depending on the results in year one, 10 additional participants may be approved during the second year. The manager, Mailing Standards will review each request and will proceed as follows:

- a. If the applicant meets the conditions required for the PRS experiment and the application is otherwise consistent with the purposes and goals of the experiment, the manager, Mailing Standards will approve the letter of request. For the purposes of the experiment, the Postal Service may require additional documentation and periodic review and inspection of each participant's PRS processing and accounting operations.
- b. If the application does not appear to meet the conditions required for the PRS experiment, the manager, Mailing Standards will deny the request and send a written notice to the applicant, with the reasons for denial. [G993.1.7]

#### 5.1.8 Procedure

Upon approval and payment of fees, participants must provide a copy of the approval to each contact at each pickup location. The manager, Mailing Standards will provide a copy to each district manager, Business Mail Entry that has a pickup location. Local post offices can determine payment of fees through CAPS. [G993.1.8]

#### 5.1.9 Pickup Schedule

Unless more frequent pickups are specified in the service agreement, parcels must be retrieved on a regular schedule: from RBMCs, a minimum of every 48 hours excluding Sundays and USPS holidays; and from RDUs, a minimum of once every

709.5.2

7 days. Permit holders or their agents will be required to set up a recurring or standing appointment to retrieve PRS parcels. If the permit holder (or agent) already has existing appointments to deliver Parcel Select parcels to a BMC or DDU that meet these standards, the same appointment can be used for retrieving PRS parcels. [G993.1.9]

## 5.2 Postage and Fees

### 5.2.1 Postage

There are three PRS rate categories:

- a. *Parcel Select RDU*. Parcels returned as Parcel Post to, and retrieved in bulk from, a designated delivery unit.
- b. *Parcel Select RBMC*. Parcels returned as Parcel Post to, and retrieved in bulk from, a designated BMC.
- c. *Bound Printed Matter RBMC*. Parcels returned as Bound Printed Matter to, and retrieved in bulk from, a designated BMC. [G993.2.1]

### 5.2.2 Permit Fee

A \$150.00 permit fee must be paid annually at the post office where the PRS permit is held. The permit must remain valid during the course of the experiment. [G993.2.2]

### 5.2.3 Advance Deposit Account and Annual Accounting Fee

The participant must pay postage through an advance deposit account and must pay an annual accounting fee of \$475.00. The account must remain valid during the course of the experiment. [G993.2.3]

## 5.3 Rates

### 5.3.1 Parcel Select Return Services—Return Delivery Unit

Regardless of weight (up to the maximum weight of 70 pounds), any parcel that measures more than 108 inches (but not more than 130 inches) in combined length and girth must pay the oversized rate.

| LENGTH PLUS GIRTH                            | RATE   |
|--|--------|
| Not over 108 inches                          | \$2.00 |
| Oversized (Over 108 inches up to 130 inches) | 7.51   |

[G993.3.1]

### 5.3.2 Parcel Select Return Services—Return BMC Machinable

Parcels that weigh less than 15 pounds but measure more than 84 inches in combined length and girth are charged the applicable rate for a 15-pound parcel.

See [Exhibit 5.3.2 Parcel Select Return Services—Return BMC Machinable](#).

[G993.3.2]

[G993.3.2]

709.5.3.3

**5.3.3 Parcel Select Return Services—Return BMC Nonmachinable**

Parcels that weigh less than 15 pounds but measure more than 84 inches in combined length and girth are charged the applicable rate for a 15-pound parcel. Regardless of weight, any parcel that measures more than 108 inches (but not more than 130 inches) in combined length and girth must pay the oversized rate. See [Exhibit 5.3.3 Parcel Select Return Services—Return BMC Nonmachinable](#).

[G993.3.4]

**5.4 Label Formats****5.4.1 Label Preparation**

PRS labels must be certified for use by the Postal Service prior to distribution. In addition, permit holders must obtain Postal Service certification for barcode symbologies. Any photographic, mechanical, or electronic process or any combination of such processes may be used to produce PRS labels. The background of the label may be any light color that allows the address, barcodes, and other required information to be easily distinguished. If labels are electronically transmitted to customers for their local printing, the permit holder must advise customers of these printing requirements as part of the instructions in [5.4.3](#).

[G993.4.1]

**5.4.2 Labeling Methods**

If all applicable content and format standards are approved (including instructions to the user), a PRS label may be distributed by any of the following methods:

## 709.5.4.3

- a. As an enclosure with merchandise when initially shipped, as part of the original invoice accompanying the merchandise, or as a separate label preprinted by the permit holder. If the reverse side of the label bears an adhesive, it must be strong enough to bond the label securely to the mailpiece.
- b. As an electronic file created by the permit holder for local output and printing by the customer. [G993.4.2]

**5.4.3 Instructions**

Regardless of label distribution method, written instructions always must be provided to the user of the PRS label that, at a minimum, direct the user to do the following:

- a. "If your name and address are not already printed in the return address area, please print them neatly in that area or attach a return address label there."
- b. "Attach the label provided by the merchant squarely onto the largest side of the mailpiece, unless you need to use another side to make the parcel more stable. Place the label at least 1 inch from the edge of the parcel, so that it does not fold over to another side. If you are using tape to attach the new label, do not put tape over any barcodes on the label, even if the tape is clear, because the reflection interferes with barcode readers."
- c. "If you are reusing the original container to return the merchandise, use the label to cover your original delivery address and the barcodes and any other postal information on it. If it is not possible to cover all that information with the label, either remove old labels containing these items, mark them out completely with a permanent marker, or cover them completely with blank labels or paper that cannot be seen through. If that cannot be done, or if the original container is no longer sound, please use a new box to return the merchandise and attach the return label to that new box."
- d. "Once repackaged and labeled, you can mail the parcel at a post office, deposit it in a collection box, or give it to the carrier at the original delivery address. If the parcel is addressed to Return Delivery Unit, mail it at a local post office near the original delivery address. If the parcel is addressed to Return Bulk Mail Center, you can mail it at any post office or collection box in the town, city, or metropolitan area of the original delivery address." [G993.4.3]

**5.4.4 Label Format Elements**

There is no minimum size for PRS labels; however, the label must be of a sufficient size to accommodate all of the label elements and standards in this section. All PRS label elements must be legible. Except where a specific type size is required, elements must be of a type size large enough to be legible from a normal reading distance and to separate them from other elements on the label. Examples of PRS label formats are shown in [5.4.5a](#), [5.4.5b](#), [5.4.5c](#), and [5.4.5d](#). The following elements are required:

- a. Postage Guarantee. The imprint "No Postage Necessary if Mailed in the United States" must appear in the upper right corner.

- b. Horizontal Bars. A minimum of three horizontal bars must appear directly below the imprint in the upper right corner. The bars must be uniform in length, at least 1 inch long, 1/16 inch thick, and evenly spaced.
- c. Parcel Return Service Legend. The legend must be placed directly above the address and include:
  - 1. Line 1: In capital letters at least 3/16" high, "PARCEL SELECT RETURN SERVICE" (or "PARCEL SELECT RTN SVC") or "BOUND PRINTED MATTER RETURN SERVICE" (or "BPM RETURN SERVICE"), as appropriate.
  - 2. Line 2: In all capital letters, Permit holder's name, left justified, followed by PERMIT NO., followed by the permit number.
- d. Customer's return address. The return address of the customer using the label to mail the parcel back to the permit holder must appear in the upper left corner. If it is not preprinted by the permit holder or merchant, space must be provided for the customer to enter the return address.
- e. Address for return delivery unit (RDU) labels. The address must be the physical location of the return delivery unit, as provided by the Postal Service specifically for PRS. The address must consist of at least three lines in all capital letters, as specified below. As an option, the PRS participant's or merchant's name may appear above the first line. The ZIP Code may appear left-justified on a line directly below the city and state line.
  - 1. Line 1: "RETURN DELIVERY UNIT."
  - 2. Line 2: Street address, including number, of the RDU.
  - 3. Line 3: City, state, and ZIP Code.
- f. Address for return bulk mail center (RBMC) labels. The address must consist of at least three lines in all capital letters, as specified below. The ZIP Code must be printed in at least 12-point type and may appear left-justified on a line directly below the bulk mail center line.
  - 1. Line 1: PRS participant's or merchant's name.
  - 2. Line 2: "PARCEL RETURN SERVICE" (or "PARCEL RETURN SVC").
  - 3. Line 3: "BULK MAIL CENTER," followed by the unique PRS ZIP Code assigned by the USPS in the service agreement.
- g. Parcel Return Service Barcode. A PRS barcode must be printed directly on the label. The barcode may appear in any location on the label, except the upper left, upper right, and lower right corners. The barcode must meet the standards for barcodes in Publication 91, with the following exceptions:
  - 1. The barcode must be produced using the UCC/EAN Code 128 barcode symbology.
  - 2. The service type code (STC) contained in the barcode must identify the rate associated with the label destination. For labels addressed to a return delivery unit, the STC must be 58. For labels addressed to a return bulk mail center, the STC must be 57.

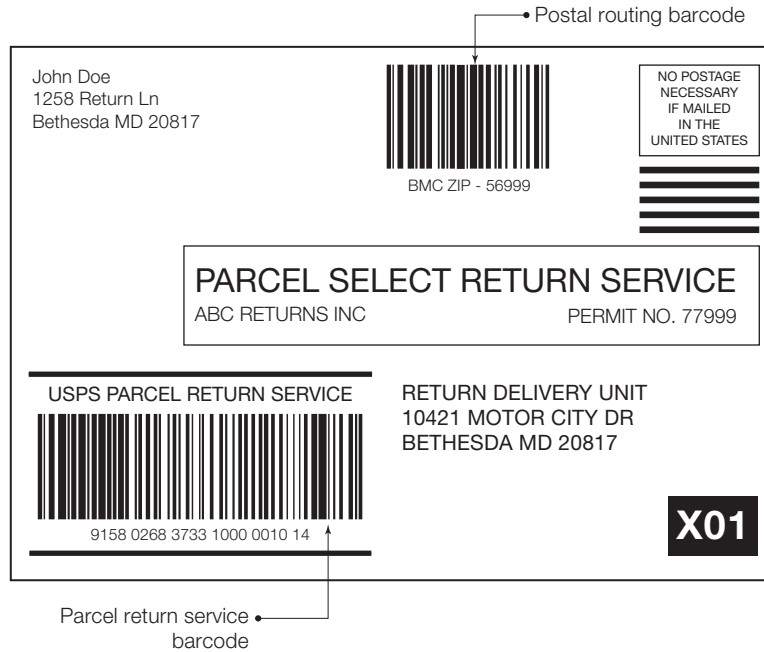

## 709.5.4.4

3. Human-readable text above the barcode must read “USPS PARCEL RETURN SERVICE” (or “USPS PARCEL RTN SVC”). If the barcode is a single concatenated barcode with the postal routing code described in [5.4h](#), the text above the barcode must read “BMC ZIP – USPS PARCEL RETURN SERVICE” (or “BMC ZIP – USPS PARCEL RTN SVC”). In the text below the barcode, the leading application identifier (“420”), ZIP Code information, and subsequent numbers must be parsed as shown in [5.4.5b](#), [5.4.5c](#), and [5.4.5d](#).
4. The clear zone between the barcode, human-readable text, and the horizontal bar above and below the barcode must be at least 1/16 inch.
- h. Postal Routing Barcode. If a single concatenated barcode is not used for the PRS barcode, a postal routing barcode also must be printed directly on the label. The barcode may appear in any location on the label, except the upper left, upper right, and lower right corners. Postal routing barcodes must meet the standards in [708.5.0](#), except that the human readable text below the barcode must read “BMC ZIP -,” followed by the unique PRS ZIP Code assigned by USPS in the service agreement.
- i. Mailer Identification (ID). An individual mailer ID must appear in the lower right corner. The mailer ID is assigned by the permit holder to each individual client (merchant) of the permit holder. The mailer ID must consist of a single, uppercase alpha character followed by a two-digit number, with no spaces or dashes (e.g., A01). The mailer ID must be at least 3/16 inch high and surrounded by a border (box), with a clearance of at least 3/16 inch between the mailer ID characters and the border. The mailer ID may be reverse-printed.
- j. Additional Information. Additional information (e.g., company logo, return authorization number, inventory barcode) is permitted on the PRS label if it does not interfere with any required format elements. Inventory barcodes must not resemble the barcodes described in [708.5.0](#), *Barcoding Standards for Parcels*.  
[G993.4.4]

**5.4.5 PRS Label Format Examples**

The following are PRS label format examples:

- a. Parcel Select Return Services Label Addressed to a Return Delivery Unit With Separate Parcel Return Services and Postal Routing Barcodes

[Exhibit G993.4.4a]

709.5.4.5

- b. Parcel Select Return Services Label Addressed to a Return Delivery Unit With Concatenated Parcel Return Services and Postal Routing Barcodes

[Exhibit G993.4.4b]

- c. Parcel Select Return Service Label Addressed to a Return Bulk Mail Center

[Exhibit G993.4.4c]

d. Bound Printed Matter Return Service Label

[Exhibit G993.4.4d]

6.0 Priority Mail Flat-Rate Box

6.1 Eligibility

6.1.1 Description

The standards in 6.0 apply to each addressed USPS-produced Priority Mail flat-rate box (Postal Item Numbers: OFRB1 and OFRB2). [G995.1.1]

6.1.2 Rate Application

Each USPS-produced Priority Mail flat-rate box is charged the experimental Priority Mail flat-rate box rate regardless of weight or destination. [G995.1.2]

6.1.3 Basic Standards

Any amount of mailable material can be mailed in a USPS-produced Priority Mail flat-rate box. Only USPS-produced Priority Mail flat-rate boxes are eligible for the flat-rate box rate. All other applicable Priority Mail standards apply. [G995.1.3]

6.1.4 Package Preparation

The box flaps must be able to close within the normal folds. Tape may be applied to the flap and seams for closure or to reinforce the box, provided the design of the box is not enlarged by opening the sides of the box and taping or reconstructing the box in any way. [G995.1.4]

709.6.2

**6.2 Rate****6.2.1 Priority Mail Flat-Rate Box Rate**

The flat-rate box rate is \$7.70. This initial rate is subject to change in a future rate proceeding. [G995.2.1]

**6.2.2 Postage Payment Methods**

Postage may be paid with postage stamps, meter stamps, information-based indicia (IBI) meter, PC Postage system, or permit imprint, providing all the standards for the postage payment method are met. [G995.2.2]

## L001 5-Digit Scheme—Periodicals, Standard Mail, and Package Services Flats and Irregular Parcels

[02-03-05] L001 describes the 5-digit scheme sort list for pallets and sacks of Periodicals, Standard Mail, and Package Services flats and irregular parcels destined for multiple 5-digit ZIP Codes served by a single delivery unit. When the 5-digit scheme sort is used, mail for the 5-digit ZIP Codes shown in Column A must be combined on pallets or in sacks as follows:

- a. Bundles on merged 5-digit scheme or 5-digit scheme carrier routes pallets.
- b. bundles on 5-digit scheme pallets only for Periodicals and BPM irregular parcels and flats not meeting the dimension, weight, and flexibility criteria of the AFSM 100 (301.3.3), including AFSM 100-compatible flats copalletized with other flats.
- c. Merged 5-digit scheme or 5-digit scheme carrier routes sacks labeled to the corresponding destination shown in Column B.

| Column A<br>Destination ZIP Codes | Column B<br>Label Container To | Column A<br>Destination ZIP Codes | Column B<br>Label Container To |

## L002 3-Digit ZIP Code Prefix Matrix

L002 lists every 3-digit Zip Code prefix for mail destined to 3-digit, 3-digit scheme, and sectional center facility (SCF) destinations as follows:

- a. 3-Digit ZIP Code Prefix: Use this column to find a 3-digit ZIP Code prefix. Those prefixes indicated by an **X** are unassigned. Those prefixes indicated by an **N** have been designated as 3-digit ZIP Codes for which the preparation of a 3-digit sack is optional, and for which the preparation of the optional 3-digit pallet is prohibited.
- b. Column A, 3-Digit Destinations: Use this information for Line 1 on 3-digit container labels (subject to the standards for the rate claimed). Unique 3-digit cities are indicated by a **U**.
- c. Column B, 3-Digit Scheme Destinations: Use this information for Line 1 on 3-digit scheme container labels (subject to the standards for the rate claimed). Line 2 of container labels for destinations indicated by an S must include either "SCHEME" or the specific information shown (3-digit groups by scheme group, where applicable, are shown in L003).
- d. Column C, SCF Destinations: Use this information for Line 1 on SCF container labels (subject to the standards for the rate claimed). SCFs serving only a single 3-digit area are indicated by a **D** (3-digit groups are shown by SCF in L005). Destination SCF Standard Mail rates, destination SCF Package Services rates, or destination SCF rates and per piece discounts for Periodicals mail are available only to those ZIP Code areas for which an SCF is shown.

To order labels from the USPS Label Printing Center, use Form 1578-B and indicate set number 001 (unique 3-digit cities only), set number 002 (3-digit destinations), or set number 003 (SCF destinations). Requests are supplied in lots of 300 (minimum) for each label on the list.

## L003 3-Digit ZIP Code Prefix Groups—3-Digit Scheme Sortation

L003 describes the 3-digit automation letters scheme sortation ZIP Code prefix list for trayed mail.

When required by the standards for specific rates, pieces for the 3-digit ZIP Code prefixes shown in Column A must be combined in trays labeled to the corresponding destination shown in Column B. Line 2 on tray labels must include “SCHEME” except as shown below.

| Column A<br>3-Digit ZIP Code Prefix Group | Column B<br>Label to             | Column A<br>3-Digit ZIP Code Prefix Group | Column B<br>Label to          |

## L004 3-Digit ZIP Code Prefix Groups—ADC Sortation

L004 describes the service area by individual 3-digit ZIP Code prefix for mail destined to an area distribution center (ADC).

Subject to the standards for the rate claimed, pieces for the 3-digit ZIP Code prefixes shown in Column A must be combined and labeled to the corresponding ADC destination shown in Column B. Where noted, the destination must be selected based on the class of mail prepared. Unassigned 3-digit prefixes or assigned 3-digit prefixes not associated with an ADC are omitted.

To order labels from the USPS Label Printing Center, use Form 1578-B and indicate set number 008 (First-Class Mail), set number 009 (Periodicals), or set number 010 (Standard Mail and Bound Printed Matter). Requests are supplied in lots of 300 (minimum) for each label on the list.

## L005 3-Digit ZIP Code Prefix Groups—SCF Sortation

L005 describes the service area by individual 3-digit ZIP Code prefix for mail destined to a sectional center facility (SCF).

Subject to the standards for the rate claimed, pieces for the 3-digit ZIP Code prefixes shown in Column A must be combined and labeled to the corresponding SCF destination shown in Column B. SCFs serving only one 3-digit area are identified with <sup>S</sup>; Line 1 on labels for these destinations does not include the “SCF” prefix before the facility name. Unassigned 3-digit prefixes or assigned 3-digit prefixes not associated with an SCF are omitted.

## L006 5-Digit Metro Scheme

L006 is an optional 5-digit metro-area scheme pallet preparation for Periodicals flats and irregular parcels, Standard Mail flats, and Bound Printed Matter flats. The scheme describes situations where processing responsibility for 5-digit ZIP Code destinations within a 3-digit ZIP Code prefix have been split between two or more facilities.

The first column lists the 3-digit ZIP Codes that have zones (5-digit ZIP Codes) assigned to the scheme shown in Column A. Residual 3-digit bundles may be placed on 5-digit metro pallets as shown in Column B. Label containers as shown in Column C.

| 3-Digit ZIP Codes | Column A<br>5-Digit Destination ZIP Codes   | Column B<br>Placement for Residual 3-Digit Bundles | Column C<br>Label Container to |
|-------------------|---|--|--------------------------------|

## L007 5-Digit Scheme—Periodicals, Standard Mail, and BPM Flats in Bundles

[02-03-05] L007 describes the 5-digit scheme sortation list for automation rate (see [345.7.0](#) for Standard Mail, [365.7.0](#) for Bound Printed Matter, and [707.25.0](#) for Periodicals) and cobundled automation and Presorted rate (see [705.11.0](#)) Periodicals and Standard Mail flat-size pieces and Presorted rate Bound Printed Matter (BPM) flat-size pieces that meet the AFSM 100 criteria under [301.3.3](#). The pieces within the scheme bundles are processed in the same operation and therefore are not required to be prepared in individual 5-digit bundles.

When the 5-digit scheme sort is used, mail for the 5-digit ZIP Codes shown in Column A must be combined in bundles for all combinations for which mail exists and density dictates. All 5-digit scheme bundles must include the appropriate OEL under [708.7.0](#), which must contain the 5-digit ZIP Code listed in Column B. 5-digit scheme sacks containing 5-digit scheme bundles must be labeled to the corresponding destination in Column B.

## L008 3-Digit Scheme—Periodicals, Standard Mail, and BPM Flats in Bundles

L008 describes the 3-digit scheme sortation list for automation rate (see [345.7.0](#) for Standard Mail, [365.7.0](#) for Bound Printed Matter, and [707.25.0](#) for Periodicals) and cobundled automation and Presorted rate (see [705.11.0](#)) Periodicals and Standard Mail flat-size pieces and Presorted rate Bound Printed Matter (BPM) flat-size pieces that meet the AFSM 100 criteria under [301.3.3](#). Pieces within scheme bundles are processed in the same operation and therefore are not required to be prepared in individual 3-digit bundles.

When the 3-digit scheme sort is used, mail for the 3-digit ZIP Codes shown in Column A must be combined in bundles for all combinations for which mail exists and density dictates. All 3-digit scheme bundles must include the appropriate OEL under [708.7.0](#), which must contain only the 3-digit ZIP Code listed in Column B. The city and state are provided as information only.

## L010 BMC/ASF Entry—Standard Mail Letters and Package Services Irregular Parcels

[03-17-05] [02-03-05] L010 indicates the label destination (Column B) for mixed AADC and mixed ADC trays of Standard Mail letters and mixed sacks of Package Services irregular parcels placed on an ASF or BMC pallet, or entered at an ASF or BMC (Column A).

This list also may be used for mixed ADC bundles and sacks of automation rate Periodicals and Standard Mail flats and barcoded Bound Printed Matter flats when these mailings are entered at a BMC/ASF facility. Effective May 15, 2005, L009 must be used when labeling mixed ADC bundles and sacks of these types of mailings.

## L601 BMCs

L601 describes the service area by individual 3-digit ZIP Code prefix for sorting mail to BMC destinations.

Use this list for:

- a. Standard Mail machinable parcels except ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC.
- b. Standard Mail bundles, letter trays, or sacks on pallets.
- c. Bound Printed Matter machinable parcels except ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC.
- d. Bound Printed Matter bundles or sacks on pallets.
- e. Parcel Post except for ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates and nonmachinable BMC Presort or OBMC Presort rate mail. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC. Nonmachinable parcels for the Buffalo ASF service area claimed at DBMC rates may be sorted to the Pittsburgh BMC if bedloaded and presented with machinable parcels.
- f. Presorted Media Mail and Presorted Library Mail to BMC destinations.

For labeling mixed BMC sacks and pallets, mailers must add "MXD" before the Column B information of the BMC serving the 3-digit ZIP Code prefix of the post office at which the mail is entered.

1. Mailed from ZIP Code areas 006-009.
2. Except for mail prepared for destination entry rates, if the origin entry post office is in ZIP Code areas 800-820, 822-831, 835, 838-884, 889-978, or 980-999 and the destination post office is in ZIP Code areas 850, 852, 853, 855, 859, 860, 863, or 864, then the mail containers are labeled to the Los Angeles BMC rather than the Denver BMC as follows:  
BMC LOS ANGELS CA 90901

## L602 ASFs

L602 describes the service area by individual 3-digit ZIP Code prefix for Standard Mail and Package Services mail that must be sorted to ASFs.

Use this list for:

- a. Standard Mail machinable parcels if ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC under [L601](#).
- b. Standard Mail bundles, letter trays, or sacks on pallets.
- c. Bound Printed Matter machinable parcels if ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC under [L601](#).
- d. Bound Printed Matter bundles or sacks on pallets.
- e. Parcel Post machinable parcels if ASF mail (other than mail for the Buffalo ASF service area) prepared and claimed at DBMC rates. Machinable parcels for the Buffalo ASF service area prepared and claimed at DBMC rates must be sorted to the Pittsburgh BMC under [L601](#). Nonmachinable parcels for the Buffalo ASF service area claimed at DBMC rates may be sorted to the Pittsburgh BMC under [L601](#) if bedloaded and presented with machinable parcels.

1. Mailed from ZIP Code areas 006-009.
2. Except for mail prepared for destination entry rates, if the origin entry post office is in ZIP Code areas 800-820, 822-831, 835, 838-884, 889-978, or 980-999 and the destination post office is in ZIP Code areas 850, 852, 853, 855, 859, 860, 863, or 864, then the mail containers are labeled to the Los Angeles BMC rather than the Denver BMC as follows:  
BMC LOS ANGELS CA 90901
3. May be combined in the same sack with ADC mail for ZIP Code areas 894-897, 936-961, and 967-969, labeled to BMC SAN FRAN CA 94850.

## L604 Originating ADCs—Standard Mail Irregular Parcels

L604 describes the service area by individual 3-digit ZIP Code prefix for mixed ADC Standard Mail irregular parcels.

For Line 1 (destination line) for labels for containers of mixed ADC mail: (1) determine the ZIP Code of the origin office (i.e., the post office where the mail is to be entered and postage paid); (2) find the first three digits of that ZIP Code in Column A; and (3) use the Column B entry as Line 1.

| Column A<br>Originating ZIP Codes   | Column B<br>Label to        |

## L606 5-Digit Scheme—Standard Mail and Package Services Parcels

[02-03-05] L606 lists the optional 5-digit scheme sort for Standard Mail machinable and irregular parcels (excluding ECR irregular parcels), and Package Services machinable and nonmachinable parcels destined for multiple 5-digit ZIP Codes served by a single delivery unit.

Use of the 5-digit scheme sort for parcels is always optional, including when 5-digit sortation is required for rate eligibility. This 5-digit scheme sort need not be used for all possible 5-digit scheme sorts. When used, all parcels for the 5-digit ZIP Codes shown in Column A must be combined in a 5-digit scheme sack(s) or on a 5-digit scheme pallet(s) labeled to the corresponding destination shown in Column B.

## Summary of Changes

### Overview

The Summary of Changes lists all of the revisions to the *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM 300) between the publication of the DMM (1-06-05) and the publication of Postal Bulletin 22150 (3-17-05).

### 1.0 Summary of Changes by Effective Date

#### 1.1 February 3, 2005

[233.3.3.2](#), [333.3.3.2](#), [433.3.4.2](#), [507.6.7.1](#), [708.3.1.3](#) and [709.2.2.1](#) are revised to change terminology from “National Change of Address” to “National Change of Address Linkage System” and from “NCOA” to “NCOA <sup>LINK</sup>.” Published in PB 22147 (02-03-05).

[245.5.4.2](#), [245.5.5.2](#), [245.7.7](#), [246.3.4](#), [345.5.7](#), [345.7.5.4](#), [346.3.4](#), [365.5.3.5](#), [365.7.4.1](#), [375.5.3.2](#), [385.5.3.2](#), [445.5.4.1](#), [445.5.4.8](#), [446.3.4](#), [465.5.2.4](#), [465.5.3.3](#), [475.5.3.4](#), [485.5.3.4](#), [705.8.10](#), [705.9.0](#), [705.10.2.5](#), [705.12.2.4](#), [705.13.2.4](#), [707.22.6](#), [707.24.2.1](#), [707.25.3](#), and [708.7.2.5](#) are revised to change the standards for labeling bundles and sacks of flats (except First-Class Mail) and certain irregular parcels sorted to the mixed area distribution center (ADC) level. New labeling list [L009](#) is established to consolidate the processing of the relatively low volume of mail at the mixed ADC level. L802 and L803 are moved to the general use sections and renumbered as [L010](#) and [L011](#). Published in PB 22147 (02-03-05).

[L001](#), [L007](#), and [L606](#) are revised to reflect changes in mail processing operations. Published in PB 22147 (02-03-05).

[705.12.1](#) and [705.13.1](#) are revised to clarify that, for purposes of calculating the 5% threshold, firm bundles (regardless of the rate claimed) are added together with the number of addressed pieces in carrier route bundles. Published in PB 22147 (02-03-05).

[503.10.0](#) is revised to reflect the elimination of the signature waiver option for Signature Confirmation service. Published in PB 22147 (02-03-05).

#### 1.2 March 17, 2005

[708.7.2.5](#) is revised to correct a reference to labeling lists for mailings of nonautomation flats. Published in PB 22150 (03-17-05).

[345.5.7](#), [365.5.3.5](#), [375.5.3.2](#), [385.5.3.2](#), and [707.22.6](#) are revised to allow use of [L004](#) through May 15, 2005, for OEL and sack labeling for mixed ADC bundles and sacks of nonautomatin rate flats. Published in PB 22150 (03-17-05).

[L010](#) and [L011](#) are revised to reflect changes in mail processing operations. Published in PB 22150 (03-17-05).

# Summary of Changes

---

245.5.4.2, 245.5.5.2, 245.7.7, 246.3.4, 345.5.7, 345.7.5.4, 346.3.4, 365.5.3.5, 365.7.4.1, 375.5.3.2, 385.5.3.2, 445.5.4.1, 445.5.4.8, 446.3.4, 465.5.2.4, 465.5.3.3, 475.5.3.4, 485.5.3.4, 705.8.10, 705.9.0, 705.10.2.5, 705.12.2.4, 705.13.2.4, 707.22.6, 707.24.2.1, 707.25.3, and 708.7.2.5 are all revised to include corrections to the revisions made in PB 22147. Published in PB 22150 (03-17-05).

## 2.0 Summary of Changes by DMM Module

### 2.1 **200—Discount Mail Letters and Cards**

233.3.3.2 is revised to change terminology from “National Change of Address” to “National Change of Address Linkage System” and from “NCOA” to “NCOA <sup>LINK</sup>.” Effective 02-03-05.

245.5.4.2, 245.5.5.2, 245.7.7, and 246.3.4 are revised to change the standards for labeling bundles and sacks of flats and certain irregular parcels sorted to the mixed area distribution center (ADC) level. Effective 02-03-05.

### 2.2 **300—Discount Mail Flats**

333.3.3.2 is revised to change terminology from “National Change of Address” to “National Change of Address Linkage System” and from “NCOA” to “NCOA <sup>LINK</sup>.” Effective 02-03-05.

345.5.7, 365.5.3.5, 375.5.3.2, and 385.5.3.2 revised to allow use of L004 through May 15, 2005, for OEL and sack labeling for mixed ADC bundles and sacks of nonautomatin rate flats. Effective 03-17-05.

345.5.7, 345.7.5.4, 346.3.4, 365.5.3.5, 365.7.4.1, 375.5.3.2, and 385.5.3.2 are revised to change the standards for labeling bundles and sacks of flats and certain irregular parcels sorted to the mixed area distribution center (ADC) level. Effective 02-03-05.

### 2.3 **400—Discount Mail Parcels**

433.3.4.2 is revised to change terminology from “National Change of Address” to “National Change of Address Linkage System” and from “NCOA” to “NCOA <sup>LINK</sup>.” Effective 02-03-05.

445.5.4.1, 445.5.4.8, 446.3.4, 465.5.2.4, 465.5.3.3, 475.5.3.4, and 485.5.3.4 are revised to change the standards for labeling bundles and sacks of flats and certain irregular parcels sorted to the mixed area distribution center (ADC) level. Effective 02-03-05.

### 2.4 **500—Additional Services**

503.10.0 is revised to reflect the elimination of the signature waiver option for Signature Confirmation service. Published in PB 22147 (02-03-05).

507.6.7.1 is is revised to change terminology from “National Change of Address” to “National Change of Address Linkage System” and from “NCOA” to “NCOA <sup>LINK</sup>.” Effective 02-03-05.
